- Gyropasma probe data from rocket observations, determining winter ionospheric electron density profiles, electron temperature and electrostatic cyclotron waves effect
15 p2606 A69-31446
- Weakly ionized plasma electron heating by interaction with HF electromagnetic field calculated using Boltzmann transport equation
15 p2665 A69-31480
- Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation
16 p2820 A69-31752
- Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing electron-electron interaction insufficient to maintain equilibrium
16 p2796 A69-31772
- Metagalactic electrons inverse Compton effect on relic radiation to interpret cosmic isotropic X radiation entire energy spectrum
16 p2847 A69-31800
- Nonequilibrium plasma boundary layer along channel insulator wall, noting different electron and heavy particle temperatures
[AIAA PAPER 68-134] 16 p2821 A69-31873
- Rocket measurements of upper F region electron temperature and density profiles, for particle and ener-

gy balance of ionosphere topside, noting diffusive equilibrium 16 p2848 A69-31975

Electron cooling rates due to vibrational excitation of molecular oxygen calculated as function of electron temperature in E region 16 p2774 A69-31982

Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements 16 p2849 A69-31990

Numerical analysis of charged particles radial distribution in radiation belts extended to geomagnetic tail for low energy auroral electrons 16 p2850 A69-32102

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line 16 p2822 A69-32115

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 Å band, obtaining ionization cross section 16 p2850 A69-32315

Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity 16 p2851 A69-32566

NonMaxwellian electron velocity distribution influence on ionospheric measurements by Thompson scattering, explaining disagreement between scattering and probe measurements of electron temperature 16 p2788 A69-32647

Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings [AIAA PAPER 69-643] 17 p3005 A69-33306

Electron temperature and number density measured at atmospheric pressure in plasma thermal laminar boundary layer adjacent to cooled wall [AIAA PAPER 69-692] 17 p3011 A69-33446

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential [AIAA PAPER 69-699] 17 p3011 A69-33475

One dimensional theory for cylindrical low pressure electrodeless discharge, predicting electron number density and temperature as function of applied fields [AIAA PAPER 69-703] 17 p3011 A69-33479

Coupling between electron dipoles in warm plasma, determining electron density and temperature from resonance peak of mutual impedance at electron plasma frequency 17 p2925 A69-33846

Lower ionosphere electron concentration confirmed as function of electron and ion temperature by satellite and probe data 17 p2966 A69-33981

Optically thin gas surrounding X ray source, plotting electron temperature and ionization equilibrium of hydrogen, He, carbon, nitrogen, oxygen and neon 18 p3186 A69-34295

Recombination coefficients of oxygen and nitrogen ions with electrons related to electron temperature, using microwave afterglow/mass spectrometer 18 p3176 A69-34789

Electron temperature, density and magnetic disturbances measurements at 1000 km compared with visual observations during 25-26 May 1967 magnetic storm and aurora 18 p3129 A69-34954

Electronic levels excitation in S I and II by beam foil method 18 p3177 A69-35015

Electromagnetic wave effect on electron in homogeneous magnetic field, noting relativistic momenta of dragged electrons 18 p3181 A69-35497

Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory 19 p3375 A69-35911

Electron density and electron temperatures determination in planetary nebulae, using maximum number of observed forbidden transitions 19 p3423 A69-36224

M8 electron temperature and internal kinematics from photoelectric Fabry-Perot spectrometric recording of H alpha line profiles and N II 19 p3424 A69-36334

Electron temperatures and densities in interelectrode plasma of close spaced high current cesium plasma diode 19 p3380 A69-36415

Longitudinal electric field, electron density and temperature in positive column of low pressure Cs-Ar DC arc discharge, discussing Cs vapor depletion 19 p3380 A69-36441

Electron energy distribution for Cs plasma in emitter region of ignited mode thermionic converter, noting nonequilibrium ionization effect 19 p3380 A69-36442

High resistivity gallium arsenide single crystal LF current oscillations at low temperature, investigating electron heating effect and mechanisms 19 p3391 A69-36609

Electron band forces probable values of Meinel system positive N molecules and first positive system of nitrogen molecules at high temperatures 20 p3579 A69-37307

Rarefied nonmagnetic plasma in wake of body moving at higher than electron and ion thermal velocities 20 p3525 A69-37660

Retarding potential analyzers to measure rocket vehicle potentials and ambient electric fields in active auroras 20 p3542 A69-37793

Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density 20 p3544 A69-37876

Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite 20 p3531 A69-37882

Ionospheric electron and ion concentration and temperature by Langmuir plate and spherical ion probe on Explorer 31 and ionosonde on Alouette 2 20 p3531 A69-37883

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder 20 p3532 A69-37898

Simultaneous observations of 5 to 15 second period modulated energetic electron fluxes at synchronous altitude and auroral zone 20 p3592 A69-38082

Precursors ahead of pressure driven shock waves in Ar, considering electron diffusion, temperature a density 20 p3518 A69-38237

Precursor electrons due to photoionization ahead of pressure driven shock waves, presenting electron temperature and density theoretical analysis 20 p3511 A69-38238

Shock and current sheet separation in magnetic shock tubes, determining electron temperature behind shock and within current layer 20 p3511 A69-38241

Ion density, electric field and electron temperature responses to gas density perturbation calculated for acoustic wave propagation in gas discharge using hydrodynamic equations 20 p3578 A69-38243

Electron momentum transfer cross sections by numerically solving electron energy distribution function from Boltzmann equation in Lorentz approximation 21 p3773 A69-38396

Rocket measurements indicating auroral electrons modulation near equatorial plane, noting intensity changes as function of rocket flight time and altitude 21 p3709 A69-38499

Optical data supporting satellite observations of soft electron precipitation on poleward side of normal auroral zone 21 p3709 A69-38501

Cosmic ray electron recorder for measuring intensity, energy spectrum and angular distribution of electron fluxes within specific energy range 21 p3724 A69-39074

Ariel 3 satellite observations, including topside ionospheric variations with time and solar activity, electron density, temperature measurements, etc 21 p3716 A69-39257

Electron temperature profile across shock wave in weakly ionized nonequilibrium argon by numerical integration of energy conservation equation, noting three body recombination 21 p3698 A69-39791

Electron energy loss spectrum of nitrogen, suggesting atmospheric auroral nitrogen emissions compatibility with low energy electron impact excitation mechanisms 22 p3935 A69-39970

Power per unit volume of UV and forbidden lines emitted by ionized C, N, O and Ne as function of electron temperature and density 22 p3984 A69-40157

Ionospheric electron temperature profiles for mid-day equinoctial conditions noting protonospheric and conjugate heating effects 22 p3939 A69-40506

Splash and return albedo electrons in cosmic ray electron spectrum between 12 Mev-1 Gev measured by high altitude balloon flight 22 p4005 A69-40510

Daily variation of trajectory derived high latitude vertical cut-off rigidities in magnetospheric model consistent with proton and electron experiments 22 p4005 A69-40513

Boltzmann equation analysis used to study near surface electron temperature for weakly ionized plasmas, showing nonequilibrium absorption layer governing electron temperature profile 22 p3989 A69-40528

Arc-heated plasma jet wind tunnel flow properties in plenum chamber by spectroscopic techniques, measuring electron excitation, temperature and densities 22 p3990 A69-40596

Radio recombination line data from H II regions interpreted in terms of single electron temperature, considering non-LTE /local thermodynamic equilibrium/ and clumping 22 p4025 A69-40645

Rocket measurements of plasma densities and temperatures in visual aurora using electrostatic onboard and ejected Langmuir probes, observing hyperthermal electron 23 p4167 A69-42334

Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements 23 p4161 A69-42438

Electron energy measurement accuracy in carbon dioxide laser plasma by S band radiometer 24 p4327 A69-42613

Plasma microinstabilities due to ion and electron anisotropic velocity distributions, considering frequencies near harmonics of ion cyclotron frequency 24 p4355 A69-42686

Low energy electrons energy loss by inelastic collisions in moving through atmosphere, estimating cross sections and loss rates 24 p4351 A69-42763

Conjugate regions 6300 Å airglow enhancement during predawn, noting photoelectrons role in heating dark ionosphere region by producing fast electron flux 24 p4308 A69-43011

Cosmic ray electron energy spectrum and intensity measurements indicating time variations attributed to solar modulation effects 24 p4367 A69-43175

Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere 24 p4310 A69-43181

Isotropic cosmic X rays measured by balloon-borne scintillation telescope, discussing agreement with electron energy spectral distribution 24 p4368 A69-43185

Magnetic and electron temperature interaction effects in fast MHD shock waves in slightly ionized plasma 24 p4356 A69-43361

Electron temperature distribution across shock wave in weakly ionized plasma, noting variable ionization across wave 24 p4356 A69-43362

Electron temperature and density of inviscid free molecular nozzle flow of shock tunnel measured with thin wire Langmuir probes 24 p4317 A69-43648

ELECTRON FLUX

U ELECTRONS

U FLUX [RATE]

ELECTRON FLUX DENSITY

Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay 01 p0146 A69-11124

Electron flux intensities and energy spectra in inner radiation zone, noting decay constants 01 p0147 A69-11235

Electron intensity diagram of diurnal trapped electron variation from Cosmos 5 satellite data, including harmonic analysis of data 01 p0147 A69-11321

Ionospheric electron content, slab thickness and scintillation occurrence measurements at low latitude stations

02 p0235 A69-11427

Photometric measurement of atomic oxygen green line emissions and high energy electron flux using twilight sounding rocket

02 p0309 A69-12743

Magnetic retuning of resonator with helical electron flux /gyromonoton/ in starting and prestarting modes

03 p0407 A69-13979

Energetic electron fluxes measured at 2000 km over auroral and polar regions and at 17 earth radii in magnetotail plasma sheet

03 p0503 A69-14013

Cosmic ray electron flux and energy spectrum from balloon data obtained at Palestine, Texas, monitoring proton flux periodically

05 p0815 A69-16250

Energetic electrons of terrestrial origin behind bow shock and upstream in solar wind

05 p0815 A69-16253

Drift periodic echoes in outer zone electron flux due to magnetospheric disturbance

05 p0815 A69-16259

Hydrogen, helium and electron flux measurements by differential detectors at Fort Churchill in 1967

05 p0756 A69-16277

Cut-off boundary latitude and electron flux changes in midnight sector of outer radiation belt during magnetic bay periods from Injun 4 satellite data

07 p1204 A69-18836

Particle measurements by Vela nuclear test detection satellites /2A and 2B/ noting plasma sheet in center of magnetotail

07 p1208 A69-19362

Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions

09 p1485 A69-21530

Auroral electron flux from particle fluxes measured with shielded Geiger-Muller telescopes mounted in rocket launched into diffuse aurora

09 p1576 A69-21663

Flux and energy spectrum of secondary electrons at balloon altitude in atmosphere, correcting Beedle and Webber plotting error

09 p1490 A69-21914

Energetic proton and electron fluxes spatial gradients after July 7, 1966 solar flare, noting satellite observations and injection mechanism geometry

10 p1767 A69-23767

Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere

11 p1950 A69-25144

Outer radiation zone electron intensities during magnetic storms for morphology of zone electron acceleration mechanisms

11 p1950 A69-25147

Auroral electrons intensity modulation by source at L equals 6 magnetic shell on geomagnetic equator, noting dispersion effects

12 p2065 A69-26108

Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests

12 p2152 A69-27144

Integral particle flux of protons and electrons in upper atmosphere, discussing energy and angular distribution

13 p2328 A69-27757

Low energy electron precipitation data at northern high latitudes obtained from satellite low altitude polar orbit

14 p2512 A69-28964

Electron flux-atmosphere interaction solved by numerical integration on computer, discussing auroral ionosphere

14 p2513 A69-29069

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations

14 p2438 A69-29079

Electron current, space potential and ionic composition obtained by Langmuir type probes on Explorer 31 for disturbance region dependence on ionic composition

14 p2518 A69-29122

Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions

16 p2783 A69-32525

Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity

16 p2851 A69-32566

Precipitated low energy protons and electrons measurements during breakup aurora, discussing fluxes and poleward boundaries

18 p3187 A69-34946

Periodic fading in 42 MHz auroral backscatter by high speed polarization measurements, discussing scatter bursts and pulsating primary electron flux relationship

18 p3102 A69-34950

Westward traveling auroral surge associated with electron flux during absence of H beta emission

18 p3130 A69-35189

Lithium doped solar cell irradiation by strontium 90 radioisotope, discussing electron flux rate, spectrum and recovery rates

19 p3251 A69-35693

Low energy electron accelerator to produce measurably small fluxes through photoelectric effect from Au cathode UV irradiation to achieve high flux stability

19 p3313 A69-36492

Ion and electron fluxes and drag force dependence on electrostatic charge and velocity of interstellar dust particle

19 p3425 A69-36562

Electron and gamma quanta concentrations measurements by high altitude balloon, noting fluctuations at various altitudes

20 p3587 A69-37046

Suprathermal electron flux in lower latitudes and polar region analyzed from measurements by retarding potential analyzers on Explorer 31 satellite

20 p3590 A69-37880

Simultaneous observations of 5 to 15 second period modulated energetic electron fluxes at synchronous altitude and auroral zone

20 p3592 A69-38082

Radiation sources fields and propagation in homogeneous lossy magnetoplasma, deducing wave equations for electric and magnetic current electron flux and mechanical body force sources

21 p3775 A69-38434

Cosmic ray electron recorder for measuring intensity, energy spectrum and angular distribution of electron fluxes within specific energy range

21 p3724 A69-39074

IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions

24 p4365 A69-42667

Conjugate regions 6300 A airglow enhancement during predawn, noting photoelectrons role in heating dark ionosphere region by producing fast electron flux

24 p4308 A69-43011

Magnetospheric electron sudden intensity increases correlated with magnetic substorms occurrence at midnight meridian from ATS 1 observation

24 p4367 A69-43173

Electron temperature and density of inviscid free molecular nozzle flow of shock tunnel measured with thin wire Langmuir probes

24 p4317 A69-43648

ELECTRON GAS

High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium

01 p0128 A69-10346

Model for fast randomization of electron gas by trapped electroacoustical waves

02 p0289 A69-12236

Electron fluid compression coefficient from simultaneous measurement and correlation of absolute magnitudes of ion acoustic wave potential and accompanying plasma density perturbation

03 p0475 A69-13148

Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system

08 p1353 A69-19782

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse

09 p1490 A69-21772

Plasma decay coefficient, charge recombination coefficient and electron scattering in cooling electron gas of quasi-steady cesium discharge plasma under high pressure

10 p1733 A69-23448

Specific heat of electron gas at temperatures approaching absolute zero, using method of displacements and collective variables

11 p1927 A69-24918

Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field

11 p1961 A69-25107

Fresnel dragging effect on 3 cm microwaves by electron gas drift in low pressure glow discharge, noting electron density and excitation modes

12 p2133 A69-25766

Ionosphere temperature profiles, discussing heating and cooling of electron gas and ion gases and thermal balance

12 p2063 A69-25903

Polarization of continuum background of planetary nebulae in window in visible spectrum from scattering of nucleus star radiation by electron gas

13 p2339 A69-27567

Electron gas behavior in nondegenerate envelope of magnetic white dwarf, discussing increased opacity due to magnetic fields

13 p2343 A69-27624

Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function

13 p2314 A69-28445

Electron shielding in heavily doped many valley semiconductors, discussing Thomas-Fermi screening and Mott transition

13 p2324 A69-28683

Neutrino-pair bremsstrahlung for hot degenerate electron gas during Coulomb scattering on imbedded nuclei in stellar regimes including lattice structure effects

18 p3176 A69-35004

Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons

21 p3798 A69-38600

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons

22 p4009 A69-39984

ELECTRON GUNS

Electron gun with plasma cathode consisting of gas discharge chamber, electron ejecting component and focusing system

04 p0598 A69-14857

Electron beam welding using glow discharge as source of electrons, noting hollow anode gun design and electrode geometry influence on beam shape

04 p0608 A69-15480

Design theory for electron guns using three high-perveance electrodes demonstrated with gun model

05 p0730 A69-16211

Beam transmission in electron guns having single apertured control grid, studying ratio of target current to cathode current

05 p0734 A69-16566

Convergent high-perveance electron gun design for use in microwave tubes, reducing anode aperture effect on current density

07 p1101 A69-18658

Optimal working parameters and operational characteristics of laboratory electron gun, examining beam shape, convergence and current density distribution

09 p1464 A69-22243

Energy distribution in electron gun with single crystal spherical cathode, noting work function, space charge cloud and beam overlapping effects

09 p1464 A69-22396

Unrippled space-charge flow in dense axially symmetric electron beams as basis for electron gun design

11 p1846 A69-24598

Current flow coefficient of high perveance three electrode electron guns with longitudinal compression

11 p1849 A69-24911

Paraxial electron beams from Pierce gun and spreading due to thermal velocities and space charge in nonuniform potential

12 p2036 A69-25920

Frequency distribution and statistical characteristics of high level RF noise produced by high perveance electron beam of magnetron injection gun/MIG/

14 p2449 A69-29558

Noise fluctuations transport in convergent flow crossed field electron guns using Monte Carlo method for two dimensional computerized gun simulation

15 p2572 A69-30031

- Electron microprobe to produce plane grating X ray hologram based on Lloyd mirror experiment principle
17 p2977 A69-34160
- Dynamic electron beam devices for refractory materials evaporation, discussing electron guns and vaporization film data
[ASM PAPER D8-22.2] 20 p3551 A69-38131
- ELECTRON IMPACT**
- Electron impact ionization cross section in cesium vapor measured with Tate-Smith apparatus
01 p0137 A69-10285
- Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions
01 p0123 A69-10620
- Electron impact ionization cross sections and rate coefficients from ground state given for free atoms and ions from hydrogen to calcium
01 p0125 A69-10992
- Electron impact excitation of Lyman alpha emission from 2p state of atomic H, noting discrepancy below 50 Mev
02 p0283 A69-12466
- Collisional ionization cross section for Fe ions evaluated to estimate solar corona temperature
04 p0651 A69-14365
- Emission cross sections of first negative band system of nitrogen under electron impact excitation
05 p0795 A69-15617
- Ion current output vs gas component partial pressure determined to measure ion source efficiency employing electron impact ionization
06 p0960 A69-16919
- Vibrational excitation by electron impact in kinetic energy range 30-60 eV studied for water vapor and carbon dioxide, determining intensities relative to elastic scattering
06 p0960 A69-17108
- Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion
06 p0961 A69-17135
- Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons
06 p0961 A69-17136
- Electron impact ionization cross sections for second quantum level of atomic H, using Born exchange approximation and Vainshtein approximation
06 p0961 A69-17138
- Polarization of diatomic molecular line radiation excited by electron impact
06 p0961 A69-17140
- Angular dependence of low energy electron impact excitation cross section of lowest molecular hydrogen triplet states
06 p0962 A69-17820
- Back bombardment of magnetron cathode as single surface multiplier, noting effects of cathode grooves and output loading
07 p1101 A69-18656
- Electron impact induced fragmentation of ring D in steroids involving loss of carbon atoms analyzed by mass spectrometry
07 p1069 A69-19497
- Plasma spectral line shifting and broadening under ion and electron impact
07 p1187 A69-19720
- Absolute excitation cross sections for emission of second positive bands of nitrogen under electron impact
08 p1355 A69-20208
- Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy
08 p1356 A69-20738
- Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere
09 p1590 A69-21376
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
09 p1554 A69-21468
- Electron impact ionization of negative H ions computed by wave expansion methods and compared with experiments
09 p1542 A69-21622
- Electron impact cross sections for diatomic molecule ionization and excitation from modified Gryzinski theory, discussing results from molecular models
09 p1542 A69-22249

- Optical cross section measurements for electron excitation from ground state of nitrogen
12 p2132 A69-26246
- Nonequilibrium radiation from first negative band of molecular nitrogen ion excited by shock wave electron impact
13 p2245 A69-27380
- Binary encounter model for ionization by charged particle impact modified to evaluate cross section for ionization of positive ions by electron impact
14 p2489 A69-29996
- Mass spectra peaks of N-Acyl-2-indolinols fragmentation processes upon electron impact, noting compounds predominance in open chain tautomer gas phase
15 p2561 A69-30407
- Electron impact field ionization source for mass measurement of molecular ions, noting organic geochemistry applications
15 p2608 A69-30428
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
15 p2669 A69-30713
- Electron impact broadening of isolated spectral lines emitted by neutral atoms in plasma
16 p2823 A69-32468
- Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere
18 p3198 A69-34764
- Stark broadened H gamma profile, considering effect of strong collisions in electron perturbation and electron impact broadening of lower levels
20 p3579 A69-37305
- Spectral line broadening and shift due to electron and ion shocks in impact theory
20 p3580 A69-37828
- Primary excitation mechanism in pulsed carbon dioxide lasers found to be electron impact

21 p3715 A69-38559

ELECTRON IONIZATION**U IONIZATION****ELECTRON IRRADIATION**

- Irradiation influence on yield stress of Ni-Al intermetallics noting temperature dependence and electron dosage
01 p0095 A69-10608
- Electron irradiation induced damage in undoped GaSb single crystals at 77 K, noting dependence on energy and orientation
01 p0141 A69-11256
- Fluorescence efficiency of air under electron bombardment measured at low pressure
02 p0284 A69-12734
- High current electron bombardment ion source for production of low energy ion beams without metastable contamination
03 p0428 A69-13106
- Electropulsion by thruster using colloidal carbon particles charged by electron bombardment to provide thrust, noting specific impulse
03 p0495 A69-13396
- Free radicals produced in ribonuclease, lysozyme and trypsin during exposure in vacuum and various temperatures to electron and heavy ion irradiation
03 p0372 A69-13484
- Modulated photocurrent in CdS crystal obtained by irradiation with intensity modulated electron beam, noting relaxation time and trap concentration
03 p0490 A69-13946
- Cathodoluminescence of n-type GaAs with various carrier concentration bombarded with 24-keV electrons, studying emission spectrum for radiative transition
04 p0639 A69-14436
- Fermi level in n- and p-type Ge after irradiation by 50 Mev electrons determined by temperature dependence of carrier concentration
04 p0640 A69-14444
- Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation
04 p0640 A69-14449
- High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D] 05 p0812 A69-16233
- Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device
05 p0733 A69-16562
- Recovery of carrier concentration and lifetime in n- and p-type Si during annealing after irradiation by 10 Mev electrons, noting impurities effects
06 p0974 A69-16865
- Disordered regions in electron irradiated silicon noting defect clusters concentration effect on electrical properties
06 p0974 A69-16866
- Recovery rate at room temperature in Li-doped p-n Si diodes and solar cells after 1 Mev electron irradiation, noting capacitance changes
06 p0974 A69-16867
- Electron radiation damage in MOSFET devices using bias temperature treatments
06 p0976 A69-16877
- GaAs laser excited by fast electrons exhibiting high efficiency and output power at room and liquid nitrogen temperatures
06 p0933 A69-16994
- Electron irradiation annealing and modification of 35 and 65 K defects in n-type Ge induced by 1 Mev electrons at low temperature
06 p0980 A69-17757
- Electron bombardment ion source generated Ar plasma beam to study wakes of disks and spheres, considering plasma interaction with bodies
[AIAA PAPER 69-79] 06 p0865 A69-18200

- Majority carrier concentration changes in P-doped n-type Si during fast electron bombardment, discussing relative effect of A and E centers
07 p1199 A69-18684
- Cross sections computed for excitation and ionization of atoms and ions by electrons, using peaking approximation to evaluate Coulomb-Born matrix approximation
08 p1355 A69-20206
- Electron bombardment effects on performance characteristics of UV gratings
08 p1318 A69-21097
- Electron bombardment mercury ion thruster plasma properties and performance, computing ion beam current, discharge losses and propellant utilization efficiency [AIAA PAPER 69-256]
09 p1560 A69-21214
- Electron bombardment thrusters for low specific impulse operation, discussing electrode structures fabrication by bonding alumina disk to metal electrode [AIAA PAPER 69-301]
09 p1568 A69-21730
- Electron irradiation effect on surface potential of thermally grown silicon dioxide layers, noting conductivity and annealing effects
09 p1557 A69-21743
- Liquid mercury cathode electron bombardment thrusters applicability to electric propulsion missions [AIAA PAPER 69-302]
09 p1569 A69-21876
- Causes and magnitudes of thrust misalignment of Kaufman type electron bombardment ion thruster [AIAA PAPER 69-303]
10 p1753 A69-23362
- Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects
10 p1747 A69-23713
- Diffusion processes during annealing of metals irradiated by electrons and neutrons, discussing crystal damage, recovery and recrystallization
11 p1891 A69-24800
- Electron and proton radiation doses impinging on orbiting satellites computed using orbit calculation and B, L coordinates
11 p1949 A69-24862
- Computer program for electron and proton fluxes impinging on spacecraft, performing computation for Van Allen belts and solar flares
11 p1949 A69-24863
- Electron, proton and gamma ray radiation effects on thin film CdS, GaAs and CdTe solar cells
11 p1825 A69-24872
- Drift and tunnel effect of MOS transistors under ionizing electron and X ray irradiation, considering fabrication, electrical characteristics and D-2 satellite tests
11 p1848 A69-24873
- Ionization and attachment of thermal electrons in oxygen and airlike nitrogen-oxygen mixtures during electron irradiation
13 p2302 A69-27456
- Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
13 p2284 A69-28682
- High temperature effects on electron and X ray irradiated MOS transistors for space charge analysis and defects in silica films
15 p2625 A69-30828
- Logic family with low power consumption subjected to 1 Mev electrons analyzed within telemetry circuit concept for space application
15 p2625 A69-30830
- Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance [AIAA PAPER 69-494]
16 p2845 A69-32735
- Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
16 p2828 A69-32792
- Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings [AIAA PAPER 69-643]
17 p3005 A69-33306
- Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
19 p3356 A69-35529
- Imperfection photoconductivity in electron irradiated Li-doped Si annealed at room temperature, noting level rearrangement in O rich material
19 p3382 A69-35696
- Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation
19 p3252 A69-35697
- Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons
19 p3252 A69-35698
- Proton and electron auroral ovals, deriving H alpha intensity and frequency distributions as function of geomagnetic latitude and time from patrol spectrographs in Canada
19 p3302 A69-35993
- Coherent recombinational radiation of semiconductors excited by electron beam
19 p3387 A69-36539
- Lithium doped silicon acceptor concentration resulting from electron irradiation damage decreased by annealing at 300 degrees K
23 p4197 A69-41498
- Electron irradiation-temperature dependence of introduction rate and room temperature annealing of carrier-removal defects in Li-doped Si
24 p4360 A69-42647
- ### ELECTRON MASS
- Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity
02 p0298 A69-12039
- Richardson constant and tunneling effective mass for thermionic and thermionic field emission in Schottky barrier diodes
07 p1089 A69-18247
- Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements
07 p1201 A69-19464
- Effective masses of electrons and holes in HgSe and HgTe characterized by narrow forbidden bands and high charge carrier mobility
11 p1937 A69-24920
- Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature
13 p2316 A69-27400
- Cadmium arsenide carriers effective mass under strong transverse magnetic field, noting restricted role of thermal EMF and Hall coefficients
13 p2318 A69-27897
- Electron effective mass, density and mobility in /000/ and /111/ conduction band minima in Te-doped degenerate GaSb-InSb single crystals
19 p3390 A69-36555
- Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
20 p3583 A69-37280
- ### ELECTRON MICROSCOPES
- Sliding surface tracks from hardened steel sliders on flat PTFE examined for molecular orientation with electron microscope
01 p0085 A69-10369
- Pedoscope use in soil microbiological studies including ecology, infection susceptibility, etc
01 p0021 A69-11092
- Crystal structure of boron filaments vapor deposited on tungsten wire substrate, using X ray diffraction and transmission-electron microscopy
02 p0268 A69-12405
- Electroerosion effect on fabrication of small disks for direct examination by electron microscopy, using refined and heat treated aluminum
03 p0427 A69-12880
- Magnified image of Al-Mg specimen microanalyzed during examination by electron microscope, studying segregation and initial precipitation at grain boundaries
03 p0442 A69-12894
- Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation
04 p0640 A69-14449
- Ultrahigh vacuum electron microscope using differential sputter ion pumps to obtain low contamination environment
04 p0599 A69-15016
- Electron fractography techniques and fracture modes in metallic materials interpretation, giving special attenuation to classical fracture replication and shadowing techniques
04 p0619 A69-15395
- Bioadhesive investigation in echinoderms extended to class Holothuroidea, using electron microscope with correlative light microscopy for tube feet of sea cucumbers
05 p0708 A69-15984
- Plastic yielding and strain distribution in Al reinforced with stainless steel wires determined by electron microscopy
06 p0940 A69-16947
- X ray fluorescence and electron microprobe for determining thin film thickness
07 p1113 A69-19582
- Dislocations effect on intermediate body centered tetragonal phase precipitation in Fe-Ni-Cr-Be alloy using transmission electron microscopy
08 p1333 A69-20447
- Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
09 p1495 A69-21651
- Inhomogeneity distribution of carrier concentration and electrovoltaic effect in GaAs devices analyzed by scanning electron microscope
09 p1557 A69-21746
- Electron microscopy for continuous observation and recording of dynamic reactions in high temperature materials
09 p1499 A69-22304
- Thin foil preparation technique for transmission electron microscopy and selected etch pitting technique for CoO single crystals
12 p2112 A69-25944
- Dislocations observations in fracture study of crystals, considering etching, decoration technique, X ray topography and diffraction electron microscopy
13 p2316 A69-27223
- Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation
13 p2274 A69-27224
- Wear-resistant hard thin layers deposited on various base material surfaces analyzed by electron microprobe
13 p2282 A69-28164
- Electron microscope fractographic studies to determine service failure causes, detecting grinding and quench cracks, hydrogen flakes and embrittlement fractures, etc
13 p2269 A69-28181
- Electron fractography used in machine parts failure analysis to detect internal and surface cracks, forging defects, stress corrosion, fluid leakage sources, etc
13 p2269 A69-28182
- Scanning electron microscopy to study device failure and performance, discussing limitations and progress
17 p2936 A69-32890
- Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
17 p2971 A69-32891
- Scanning electron microscopy of dehydrifying solder glass seals for hermetic packages, biased integrated circuits and metallization corrosion
17 p2936 A69-32892
- Scanning electron microscopy for reliability studies in semiconductor devices
19 p3382 A69-35788
- Cultured mammalian cell growth morphology studied in situ with scanning electron microscope, discussing surface morphology changes during mitotic cycle of Chang liver cells
20 p3467 A69-37100
- Recovery process observation in pure binary Al-Cu alloy and commercial Al-Cu-Mg-Pb alloy, noting electron microscope applicability
22 p3968 A69-40062
- ### ELECTRON MOBILITY
- Electron transport theory for pure and doped low mobility semiconductors and for impurity conduction in disordered semiconductors, noting related optical phenomena
01 p0135 A69-10047
- Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257
- Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves
01 p0047 A69-10882
- Magnetoplasma wave propagation in periodic conducting solid, calculating electron drift effect on space harmonics
02 p0287 A69-11945
- Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity
02 p0298 A69-12039

Electron flow in stable negative electrostatic potential well produced by electronic injection at center of hollow open spherical anode

03 p0475 A69-13153

Perfect piezosemiconductor resonator /phaser/ with CdSe/CdS/ crystal, discussing vibration excitation in wurtzite type crystal in electric field of electron drift

03 p0431 A69-13930

Epitaxial GaAs films with high electron mobility, noting radiation recombination spectra dependence on substrate orientation

03 p0492 A69-14172

Electron vs phonon superconductivity mechanism conditions for semiconductors, semimetals and molecular crystals

03 p0492 A69-14176

Fresnel drag produced by relativistic addition of electron velocities in semiconductors measured by changes in refractive index

05 p0807 A69-16026

Critical electron drift velocity threshold in surface wave amplification in semiconductor in magnetic field, noting partial effect of diffusion

05 p0810 A69-16648

Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces

06 p1009 A69-17966

Voltage dependence of mobility limited electron current density in gas filled diode for collision frequency proportional to electron speed

09 p1462 A69-21326

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution [AIAA PAPER 69-259]

09 p1569 A69-21877

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels

09 p1559 A69-22650

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by supersonic carrier drift currents

11 p1926 A69-24641

Vapor phase epitaxial production of indium arsenic phosphide crystalline layers, discussing electron mobilities, electrical resistivities and doping

12 p2142 A69-25934

Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves

12 p2041 A69-26646

Electron motion effects along magnetic field lines on axisymmetric torsional hydromagnetic oscillations in inhomogeneous low beta plasma, discussing resonance trapping

12 p2076 A69-27107

Linear approximation of electron temperature increment and electron mobility in nondegenerate polar semiconductor in crossed fields

14 p2508 A69-29662

Langmuir probe measurements leading to electron groups composition of electron velocity distribution function in negative glow light

14 p2493 A69-29694

Electron and ion mobility in multiple cusp magnetic fields related to Polytron experiment

14 p2499 A69-29852

Faraday rotation measurements in ionosphere by geostationary satellite ATS-3 as evidence of considerable nighttime electron transport

17 p2959 A69-32926

Electron transport initiated by radiant energy absorption or by reducing suitable electron acceptor as source of energy for extraterrestrial life

17 p2908 A69-32973

InSb thin films prepared by flash evaporation, discussing Hall measurements at various temperatures and electron mobility dependence on film thickness

18 p3182 A69-34348

Ion density, electrical conductivity and weighted mean mobility deduced from Gerden capacitor I-V characteristics used in balloon sounding of stratosphere

18 p3130 A69-34970

Electron effective mass, density and mobility in /000/ and /111/ conduction band minima in Te-doped degenerate GaSb-InSb single crystals

19 p3390 A69-36555

Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations

22 p4008 A69-39965

Electron transport chain of monovalent and divalent cations and of polyamines, studying effects on

menadione reductase activity to determine salt dependence

22 p3886 A69-41077

ELECTRON MULTIPLIERS U PHOTOMULTIPLIER TUBES ELECTRON OPTICS

Trajectory equations for outermost electron on beam in TWT operating in dynamic mode for Brillouin flux

03 p0406 A69-13974

Design and principles of operation of SHF electron-optical multiply stable storage elements with dynamic attributes of states

03 p0441 A69-13982

Advances in electronics and electron physics, Volume 25, covering linear ion accelerators, Hall effect, VLF propagation, thermionic cathodes and electron microscopy

09 p1469 A69-22696

Soviet book on electroluminescent devices covering panels, indicator contrast levels, control, multicolor indicators, image conversion and storage and optoelectrical systems

11 p1850 A69-24976

Lasers and opto-electronics - Conference, University of Southampton, England, March 1969

11 p1897 A69-25034

Energy resolution improvement in cylindrical electrostatic energy selector by focusing and limiting electron beam before entrance into monochromator

14 p2450 A69-29572

Axially symmetric magnetic fields for constant radius annular electron beams reflection, applying results to design of reflex klystron millimeter oscillator

19 p3267 A69-35930

Optical instruments as visual aids in scientific detecting including electron optical image converters detecting emissions invisible to human eye

22 p3943 A69-39974

Electron optical techniques for failure analysis involving brittle fracture, corrosion fatigue, stress corrosion, welding and surface phenomenon

24 p4313 A69-42768

ELECTRON ORBITALS

Polarized orbital method for calculating electron-atom scattering amplitudes, noting discontinuous wave function, nonvariational technique and strong dependence on parameter

02 p0284 A69-12702

Linear combination of atomic orbitals-molecular orbitals self consistent fields calculation on beryllium dihydride, using Gaussian basis functions

05 p0811 A69-15910

Incoherent wave scattering of particle orbits as nonlinear effect of LF instabilities

08 p1367 A69-20801

Thermionic emission from bare and Cs-covered metal surfaces, calculating current and work function by employing localized electron orbital model

14 p2505 A69-29264

Atomic size and outer electron effect on Fe, Co and Mn polymorphism, noting change in crystal lattices

15 p2638 A69-30321

Hartree-Fock calculations for wavelengths of K alpha X ray transitions, tabulating configuration and term energies, dipole integrals and relative multiplet strengths

22 p3984 A69-40156

Self consistent field molecular orbital method in LCAO/linear combination of atomic orbitals/ approximation applied to LiH ground state for potential energy curve

22 p3985 A69-40721

ELECTRON OSCILLATIONS

Shock tube and samples of fluoroethylene, difluorodichloroethylene and fluoromethane in argon diluent used to prepare carbon difluoride, discussing electronic oscillator strengths

04 p0632 A69-14944

LF electric potential oscillation of discharge plasma, describing oscillation behavior by theory of dissipative drift instability of weakly ionized plasma

08 p1370 A69-21020

Oscillating electron ion discharge in magnetic field in system of alternating positive and negative electrodes to obtain fast neutral particle fluxes

13 p2311 A69-28109

Electron velocity distribution function in gaseous plasma with known collective oscillations and frequency/wave number relationship

13 p2313 A69-28327

Push-pull circuit configurations for GaAs transferred electron oscillators, discussing CW X band and pulsed L band devices operation

15 p2574 A69-30168

Bayard-Alpert type ionization gage for low pressures with and without modulation, discussing role of electron oscillations

20 p3464 A69-37407

Response of pi electrons in large organic molecule to scalar field for coronene, showing oscillator strength enhancement near single particle excitation band

20 p3580 A69-37497

Electromagnetic radiation characteristics from vibrating electrons or electric dipole moving in compressible isotropic plasma and from stationary dipole in moving medium, emphasizing Doppler effects

23 p4114 A69-41359

ELECTRON PARAMAGNETIC RESONANCE

Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure

01 p0024 A69-10683

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane

03 p0484 A69-13278

Electric effect in ruby, discussing resonance magnetic field and transition

03 p0485 A69-13320

Benzene anion radical in solid solution ESR spectrum, noting removal of orbital degeneracy at 4.2 degrees K

03 p0382 A69-13379

UV induced excited-state properties of DNA using optical emission and electron spin resonance methods

03 p0372 A69-13488

Region of plasma electron capture during cyclotron electron resonance in magnetic trap with mirrors

03 p0478 A69-13849

EPR investigation of free radicals formed during mechanical fracture and gamma irradiation, discussing recombination rate and reaction rate with oxygen

03 p0434 A69-13871

Gamma irradiated silver carbonate EPR at liquid nitrogen temperatures

05 p0716 A69-15915

Ferroelectric Li niobate single crystals internal magnetic field analysis by acoustic EPR, establishing field induced hypersound resonance absorption in spin systems

09 p1556 A69-21563

Ion pairing effects of cyclooctatetraene anion radical, studying electron spin resonance spectra temperature dependence

10 p1651 A69-22938

Angular dependence of EPR line widths of trivalent Cr ions in zinc tungstate in rotating magnetic field, noting spin-phonon mechanism

10 p1743 A69-23131

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane

14 p2508 A69-29652

Parametron preamplifier for X band superheterodyne ESR spectrometer, noting sensitivity and SNR

14 p2423 A69-29757

Pulse radar quantum paramagnetic amplifier protection from saturation by transmitter power, using linear electrical bias of EPR line

15 p2579 A69-30956

Electric quadrupole coupling for N 14 in amidinofluorite studied by observation of second order transitions in electron spin resonance spectra

18 p3178 A69-35474

Electron spin resonance spectra of gamma irradiated single crystals of 9-methyladenine, analyzing H abstraction radical and temperature effects

19 p3264 A69-35974

ESR comparative study of selenoamino acids and S analog radical formation and radiation resistance, noting selenium groups ability as acceptors for unpaired electrons

21 p3668 A69-38425

Electron paramagnetic resonance line splitting between two nondegenerate Zeeman levels, using ruby laser as pumping source

21 p3735 A69-38582

Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance

22 p3992 A69-40574

Electron spin resonance /ESR/ of polycrystalline Mo(V) complexes with dipyrindyl and phenanthroline, observing hyperfine interaction due to odd numbered isotopes

22 p3897 A69-40971

- Defect structure of ceramic Ba titanate doped with Cr ions, evaluating visible, IR and EPR spectra
22 p3996 A69-41160
- ELECTRON PHONON INTERACTIONS**
- Phonon capture by electrons in semiconductors with high permittivity in external electric field
03 p0489 A69-13891
- Localized umklapp scattering effect on galvanomagnetic properties of nearly free electron bcc metal with spherical Fermi surface
03 p0493 A69-14240
- Electron phonon coupling in barriers of GaAs Schottky diodes, noting first and second derivatives of I-V characteristic in n-type GaAs-Pd Schottky diode
03 p0493 A69-14242
- Superconductivity and band structure from pseudopotential for zinc and cadmium, analyzing values of electron phonon mass enhancement
04 p0642 A69-14965
- Phonon capture by electrons in semiconductors with high permittivity in external electric field
11 p1939 A69-25692
- Electrons and optical phonons interaction effects on optical and photoconducting properties of semiconductors, discussing phonon cyclotron resonance and oscillatory and magneto-oscillatory photoconductivity
19 p3385 A69-36517
- Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
20 p3583 A69-37280
- Nonlinear interaction of electron-acoustic oscillations in plasma, allowing for decay and inductive scattering in equation derivation for wave packet intensity
21 p3776 A69-38584
- ELECTRON PHOTOGRAPHY**
- Electron microautoradiograph preparation determining trace element amount and distribution by utilizing radioactive isotopes and high resolution of electron micrographs
13 p2263 A69-28168
- ELECTRON PHOTON CASCADES**
- Generation process in three stage He-Ne cascade laser with wideband resonance, using simplified energy level scheme
06 p0934 A69-17496
- High energy electron photon cascades event recorded with X ray photography, discussing origin in related atmospheric cosmic ray showers component subgroups
13 p2331 A69-28398
- Nuclear active cosmic ray component particle energy spectrum and nuclear cascade avalanches curves, using ionization calorimeter with Pb absorber
13 p2303 A69-28399
- Stable particles heavier than nucleons in extensive cosmic ray showers detected by delayed coincidences relative to shower electron photon component
13 p2331 A69-28402
- High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence
13 p2332 A69-28404
- Sea level fluctuations of electron-photon, muon and active nuclear components of extensive cosmic ray showers determined, obtaining shower parameters
13 p2332 A69-28406
- Inverse problem method for reconstructing electrons differential spectral cross sections and photon pair formation in electron photon cascade
13 p2303 A69-28415
- Primary electrons and gamma quanta generated electron photon cascades in Pb, obtaining error free cascade curves
13 p2304 A69-28416
- Electron photon cascades energy dependence on primary particle energy determined in lead by various instruments
13 p2304 A69-28418
- High energy electrons producing electromagnetic cascades in electron photon showers in lead measured by scintillation detectors
13 p2332 A69-28419
- Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy
17 p3008 A69-33387
- Electromagnetic cascade showers transition effect in various materials, measuring energy deposition as function of position
22 p3987 A69-41003

ELECTRON PLASMA

- Light scattering from plasmas embedded in homogeneous magnetic field, discussing solid state and high temperature gas plasmas
01 p0125 A69-10015
- Electron plasma wave dispersion along cylindrical plasma column in magnetic field
01 p0126 A69-10277
- Statistical analysis of polarization of semiinfinite electron/ion plasma bounded by dielectric or conducting solid wall, deriving steady state and space potential
02 p0286 A69-11706
- Statistical analysis of polarization of two component nonisothermal electron-ion Coulomb gas plasma containing microfluxes
02 p0286 A69-11707
- Electron plasmas near plane metallic surfaces, determining transmittance and reflectance of incident light waves and surface waves dispersion characteristics
02 p0286 A69-11788
- Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
02 p0292 A69-12555
- Dipole and quadrupole bremsstrahlung and damping of electron plasma oscillations, finding negative k-square collisional electron-ion contribution
03 p0475 A69-13149
- Enhanced bremsstrahlung from supraluminous and sublumines waves in thermal isotropic homogeneous Maxwellian electron plasma, noting applicability to Crab Nebula
03 p0507 A69-13150
- Electron plasma oscillations diffusion due to scattering by large amplitude ion wave background, noting electron wave spectrum evolution
03 p0483 A69-14256
- Monograph on electron waves and resonances in bounded plasmas covering theoretical and experimental methods, metallic and dielectric resonance probes, etc
04 p0633 A69-14296
- Nonlinear electron oscillations in plasma, deriving asymptotic expression for plasma perturbation
04 p0635 A69-14552
- Kinetic theory to determine wave increments propagating across magnetic field in system of relativistic electrons in cold plasma
04 p0635 A69-14555
- Kinetic model equation for electron plasma incorporating collision terms for model scattering
04 p0636 A69-15042
- Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
05 p0803 A69-16212
- Potential functions to solve coupled wave equations for compressible anisotropic plasma with electric and magnetic current sources
05 p0803 A69-16350
- Whistler mode propagation in homogeneous electron plasma situated in longitudinal electrostatic field, using Fokker-Planck model
05 p0758 A69-16417
- Collision induced instability of partially ionized gases having large Ramsauer effect in external magnetic field, analyzing nonlinear characteristics
05 p0804 A69-16441
- Electron plasma interaction with transverse EM wave propagating along magnetic field, calculating permittivity, density, field strength and applied frequency
05 p0805 A69-16699
- Spatial and temporal characteristics of two component electron-ion nonisothermal plasma and penetration of external LF electric field into plasma
05 p0806 A69-16745
- Electron concentration in pulsed plasma measured with Fabry-Perot interferometer and laser radiation source
06 p0963 A69-16911
- Resonant four wave interaction for nonlinear energy transfer in electron plasma oscillations
06 p0963 A69-17143
- Surface plasmons microscopic theory based on modified random phase approximation
06 p0967 A69-17711
- Model for phase transition mechanism quantum-Coulomb plasmas, finding transition temperature for white dwarfs
06 p0968 A69-17785
- Real and imaginary parts of homogeneous isotropic electron plasma complex refractive index, noting application to plane electromagnetic wave propagation
07 p1193 A69-19183

- Plasma column radial density profile measurement by electron plasma waves propagation in presence of strong magnetic field
07 p1194 A69-19323
- Low energy electrons in magnetosphere fromOGO-1 and OGO-3 observations, discussing plasma sheet, magnetic bay activity, electron pressure, temperature and density gradient
07 p1209 A69-19373
- Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles
07 p1200 A69-19401
- HF wave propagation in unbounded electron-plasma systems using moment equations, discussing collisions effect and dispersion relation
07 p1086 A69-19468
- Nonlinear behavior of two stream instability between cold electron and ion streams
08 p1367 A69-20800
- Nonlinear longitudinal oscillations in nonisothermal electron plasma with Maxwellian distribution in velocity space and different temperatures of electrons and ions
09 p1550 A69-22025
- Integrodifferential equations describing longitudinal oscillation properties in nonlinear region of electron Maxwellian plasma waves and two cold electron beams
09 p1550 A69-22026
- Current distribution and impedance of insulated cylindrical antenna embedded in dielectric cylinder immersed in compressible electron plasma
10 p1663 A69-23423
- Ground wave propagation attainment of electron plasma resonance of F region, stressing need of wave vector orientation toward magnetic north
10 p1684 A69-23828
- Laser radiation spectrum scattered by low temperature plasma electrons at atmospheric pressure
11 p1922 A69-24233
- Electron confinement in magnetic mirror geometry supplemented with RF quasi-potential barriers, considering gas scattering
11 p1924 A69-24306
- Computer calculated phase velocities for surface wave and waveguide modes given for circular waveguide filled with inhomogeneous electron plasma
11 p1844 A69-24437
- Electromagnetic flux from nonlinear self interaction of electron plasma waves in far field of perturbation under anisotropic electron pressures
12 p2141 A69-27147
- Electron velocity distribution function in gaseous plasma with known collective oscillations and frequency/wave number relationship
13 p2313 A69-28327
- Linearized dispersion equation for electron oscillations in isotropic plasma with known electron velocity distribution function
13 p2313 A69-28328
- Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581
- Electron plasma oscillations and electron whistler of solar wind near Jupiter orbit
14 p2513 A69-29115
- Plasma electron temperature determination by line intensity ratio of beryllium-like ions, noting excitation functions
14 p2496 A69-29789
- Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
15 p2658 A69-30252
- Plane electromagnetic wave propagation normal and parallel to magnetic field in plasma analyzed by equivalent circuits and impedances
15 p2659 A69-30799
- Wave regeneration by resonant particles interaction in inhomogeneous plasma of electrons confined in quadratic potential solved in WKB approximation
15 p2660 A69-30918
- Hot electron plasma formation by injecting megaelectron volt ion beams followed by Lorentz trapping, noting advantages of DC operation
15 p2661 A69-30925
- Transverse instabilities in collisionless electron plasma in absence of permanent magnetic field with spheroidal velocity distribution, noting application to shock theory
16 p2817 A69-31645
- Equivalent dielectric tensor for warm drifting electron plasma using model
16 p2820 A69-31701

Normal modes of electrons-electromagnetic field coupled system for many valley semiconductors, calculating dielectric constant for electron gas for ellipsoidal energy surfaces
16 p2826 A69-31821

He-Ne laser plasma behavior, establishing parameters for electron gas, cross sections of formation and annihilation and excited states lifetimes
17 p2982 A69-33390

Precursor plasma electron number densities calculations for blunt reentry vehicles, analyzing extreme UV radiation emanating from bow shock
[AIAA PAPER 69-718] 17 p2893 A69-33487

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

Damping of plane sinusoidal wave in cold collisionless plasma, studying supercritical amplitude oscillatory process
18 p3180 A69-34703

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
20 p3581 A69-37784

Linearized dispersion equation for isotropic electron plasma without external fields solved by harmonic function model
21 p3775 A69-38564

Electron plasma velocity distribution function determined from dispersion equation by harmonic function analog
21 p3776 A69-38565

Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background
21 p3778 A69-39579

Microwave power coupling to high density plasmas for electrons heating, using dielectric plates
21 p3779 A69-39746

Stark broadening of H-gamma for electron density measurement in plasma, noting temperature range
22 p3985 A69-40664

Multifrequency dispersion interferometers applicability in plasma diagnostics, considering integral electron concentration measurements
22 p3947 A69-40959

Acoustic wave propagation in plasma, analyzing ionic and electron sound caused by oscillation and relaxation processes using Landau and Vlasov kinetic equations
23 p4196 A69-41726

Holographic interferometry for determining total free electrons in plasma produced by irradiating solid hydrogen foils with giant pulse ruby laser
24 p4314 A69-42980

ELECTRON PRECIPITATION

Magnetosphere studies in France noting magnetosphere characteristics, wave propagation, charged particles, particle precipitation mechanisms in auroral zones and polar caps
02 p0242 A69-11904

High latitude outer zone electrons boundary region during geomagnetically quiet periods
03 p0502 A69-14004

East-West aligned fast auroral waves, suggesting origin in hydromagnetic processes occurring near equatorial plane
04 p0594 A69-15123

High resolution electron and proton energy measurements by sounding rockets indicating plasma sheet as source of energetic auroral electrons
05 p0756 A69-16273

Satellite scintillation at high latitudes and possible relation to soft particle precipitation
05 p0757 A69-16406

Correspondence between HF radar backscatter, optical aurora and electron precipitation, noting application to gross tracking of auroral oval
06 p0918 A69-17383

Radio noise generation in topside ionosphere, noting Cerenkov radiation from intense soft fluxes of auroral electrons
07 p1127 A69-19257

Auroral electron penetration into atmosphere analyzed on basis of independent electron particle motion, using auroral electron angular distributions and energy spectra above atmosphere
07 p1128 A69-19368

Nocturnal auroral electron showers configuration and displacement determined from sounding balloon measurement of X rays due to showers braking in upper atmosphere
08 p1308 A69-20281

Auroral electrons intensity modulation by source at L equals 6 magnetic shell on geomagnetic equator, noting dispersion effects
12 p2065 A69-26108

Production source of ionization due to low energy electron influx and inclusion in ionospheric continuity equation, noting quiet ionosphere
12 p2066 A69-26112

ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons
13 p2327 A69-27754

Electron and proton spectra in 1-13 kev range relative to geomagnetic field lines measured by ESRO 1 satellite during Aurorae mission
13 p2328 A69-27755

Low energy electron precipitation data at northern high latitudes obtained from satellite low altitude polar orbit
14 p2512 A69-28964

Auroral substorms concept extended to include associated effects at all local times throughout magnetosphere, considering particle precipitation influence on substorms in midnight sector
15 p2593 A69-30008

Low energy electron and proton precipitation, discussing acceleration mechanisms and periodicity in relation to auroras and airglows
15 p2594 A69-30018

CNA and geomagnetic pulsations observed by ground based instruments in southern auroral region occurring near geomagnetic noon, noting electron precipitation role
15 p2597 A69-30697

He I/1.083 mu/ and O I/5577 A/ absolute brightness measured in sunlit aurora for various shadow heights of solar radiation, considering primary electron precipitation
16 p2780 A69-32311

Precipitated low energy protons and electrons measurements during breakup aurora, discussing fluxes and poleward boundaries
18 p3187 A69-34946

Auroral displays photographed by all-sky cameras at magnetically conjugate stations, morphological similarities and electron precipitation role
20 p3535 A69-38187

Lower thermosphere ion and neutral minor constituent concentrations in nighttime auroral zone, considering ionization due to electron precipitation and bremsstrahlung
21 p3704 A69-38365

Auroral zone geomagnetic pulsations on nightside and dayside of earth related to magnetospheric substorm and particle precipitation
21 p3708 A69-38497

Auroral electron and proton fluxes precipitation measurements by satellite, studying data in terms of spatial, energy and angular distributions
21 p3709 A69-38500

Optical data supporting satellite observations of soft electron precipitation on poleward side of normal auroral zone
21 p3709 A69-38501

Particle precipitation into auroral zone and plasma-energetic particle relationship in geomagnetic tail, discussing plasma sheet extent, energetic electron fluxes, etc
21 p3711 A69-38510

Dungey reconnection model of magnetosphere with dayside current sheet and pseudotrapping region compared with dayside observations of precipitation regions
21 p3711 A69-38511

Satellite observations of auroral particle precipitations indicating latitude dependence of auroral electrons averaged pitch angle and energy spectral distributions
22 p3938 A69-40502

ELECTRON PRESSURE

Hydrogen to He ratio effect on stellar atmospheric structure, considering flux relations, UVB color indices, H line profiles, electron and gas pressures
13 p2339 A69-27562

ELECTRON PROBES

Electron microprobe analysis of potassium feldspar in Weekeroo Station meteorite
04 p0659 A69-14979

Surface potential measurements for flat conductors or semiconductors using scanned electron beam probe
04 p0601 A69-15115

Tantalum diffusion layer on refractory cobalt and nickel base alloys analyzed by electron microprobe
[ONERA-TP-665] 06 p0941 A69-17097

Passive current maxima during anodic polarization of stainless steel in sulfuric acid, using electrochemical and electron microprobes
06 p0944 A69-17853

Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites
07 p1073 A69-18419

Electron probe analysis of olivine and pyroxene in LL-group chondrites, discussing iron and fayalite composition and unequilibrated stones
08 p1406 A69-20931

Impurity heterogeneities in oxidized and oxidized silicon slices from electron probe X ray microanalyzer, discussing thermal oxidation effects
10 p1743 A69-23171

Wear-resistant hard thin layers deposited on various base material surfaces analyzed by electron microprobe
13 p2282 A69-28164

Relativistic electron confinement within geomagnetic tail neutral sheet measured by Pioneer 7 deep space probe, confirming kinetic energy observations of IMP 1 satellite
14 p2433 A69-28934

Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure
19 p3291 A69-35722

ELECTRON RADIATION NT BETA PARTICLES

Silicon n-p solar cell behavior during electron radiation, describing radiation resistant solar cell
11 p1825 A69-24871

Angular distribution of electrons leaving plasma at electrode boundary, using kinetic Boltzmann equation with scattering function and specular reflection
11 p1933 A69-25546

Electron photon cascades energy dependence on primary particle energy determined in lead by various instruments
13 p2304 A69-28418

Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity
15 p2657 A69-31160

Criticism of Chiu theory on radio emission from pulsars supposing electron radiation
16 p2865 A69-32802

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars
21 p3790 A69-38823

Cosmic ray electrons component measurements at balloon altitudes with electron spectrometers
22 p4002 A69-40091

Pulsar CP 0328 radiation mechanism, considering relativistic effects of rapid rotation
22 p4035 A69-41206

ELECTRON RECOMBINATION NT RADIATIVE RECOMBINATION

Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature
02 p0283 A69-11834

Electrons relaxation caused by ionization and recombination in nonequilibrium plasma, using Kerrebrock model
03 p0477 A69-13609

Recombination rate of electrons in high pressure helium-like plasma with gas temperature fixed at 300 K and electron temperature varied between 300-2000 K
08 p1356 A69-20742

Static characteristics of transistors dependence on current carriers surface recombination in inactive base region, noting strong electric field influence
09 p1464 A69-22287

Metallic impurities effect on Ge surface charge and recombination properties, noting fast and slow electron density changes by forbidden band penetration
11 p1939 A69-25703

Nighttime maxima anomaly in electron concentration of ionospheric F layer at midlatitudes, considering diffusion and recombination
12 p2064 A69-26007

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on seminsulating substrates, discussing recombination of excess electrons and holes
13 p2207 A69-27236

Dielectric recombination in plasma, considering role in populating highly excited levels
20 p3580 A69-38016

- Electron recombination and diffusion in afterglow following short pulsed DC discharge in CO, using microwave diagnostic techniques
22 p3984 A69-40478
- Tabulated numerical values of Burgess general formula for computing dielectronic recombination rates
23 p4207 A69-41281
- ### ELECTRON SCATTERING
- Bragg reflection of electrons by standing light waves of giant pulse laser
02 p0255 A69-11833
- Polarized orbital method for calculating electron-atom scattering amplitudes, noting discontinuous wave function, nonvariational technique and strong dependence on parameter
02 p0284 A69-12702
- Elastic scattering cross section for low energy electrons on metastable He atoms, using polarized orbital method
03 p0469 A69-12922
- Elastic scattering of slow electrons by negative H and positive Li ions, calculating differential cross sections and phase shifts
03 p0469 A69-12924
- Carbon dioxide laser for observing nonlinear effects related to electron interaction with lattice vibration within semiconductors
03 p0437 A69-13041
- Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates
03 p0414 A69-13138
- Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures
03 p0484 A69-13280
- Radiative transfer equations solved for electron scattering stellar atmosphere, using transformation of integrodifferential transfer equations into singular integral equations
03 p0466 A69-13351
- InSb semiconductors electron scattering analysis at ionized impurities and optical and acoustical lattice vibrations with various polarizations
03 p0492 A69-14170
- Superconductivity of electron beam evaporated tungsten films by X ray and electron diffraction techniques, discussing temperature dependence of energy gap
04 p0640 A69-14447
- Elastic scattering of electrons from argon atoms in argon air plasmas by shock tube microwave reflection method, measuring power reflection coefficient [AIAA PAPER 68-138]
04 p0632 A69-14701
- Kinetic model equation for electron plasma incorporating collision terms for model scattering
04 p0636 A69-15042
- Quantum electrodynamics of radiation scattering from ionized interacting plasma, considering electron interactions
04 p0636 A69-15044
- Electron backscattering from cathode to cathode due to collisions with molecules, assuming isotropy of scattering
05 p0800 A69-15738
- Bounce resonant scattering of auroral zone electrons, noting contribution to microbursts and mirror point diffusion
05 p0754 A69-16260
- Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave
05 p0752 A69-16688
- Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time
06 p0974 A69-16864
- Physics of plasmas, Volume 2, Weakly ionized gas, covering inelastic collision, free electron scattering, intermediary plasmas, etc
06 p0963 A69-17165
- Ionizing electron collisions with He, determining energies and angular correlation distributions of scattered and ejected electrons
06 p0962 A69-17191
- Formation dynamics of thin sporadic layers of E region, determining maximum ionization and electron concentration and electron-neutral atoms collision frequency
06 p0922 A69-17751
- Chemisorption of H onto Nb (110) surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces
06 p0980 A69-17758
- Backscattering due to collisions for electrons from emitter accelerated through positive ion sheath into plasma in thermionic diodes
06 p0898 A69-17773
- Ratios of gas kinetic electron-atom collision integrals of Ramsauer for Ar
06 p0963 A69-17822
- Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms
06 p0981 A69-17881
- Equations for electron scattering by sound in n-type semiconductors, giving corrections to sound propagation velocity during interactions
07 p1199 A69-18680
- Electron-electron interaction effect on I-V characteristic and equivalent circuit of metal-semiconductor contact, noting conductivity and rectifying properties
07 p1107 A69-19162
- Low pressure measurement by electron scattering using Born approximation
07 p1181 A69-19218
- Solar X ray bursts decay curves and spectra in 10 to 150 keV range interpreted as hot coronal condensation during flare and electron bremsstrahlung
07 p1206 A69-19250
- Cyclotron- and bounce-resonance scattering of electrons trapped in geomagnetic field for pitch-angle scattering, noting whistler mode disturbances
07 p1208 A69-19367
- Physics of electronic and atomic collisions - Conference, Leningrad, July 1967
07 p1186 A69-19651
- Cross sections for inelastic interactions of electrons with atoms and heavy impurity ions and processes of atomic excitation
07 p1195 A69-19652
- Population inversion mechanism based on electron collisional excitation cross sections for molecular vibrational levels in carbon dioxide lasers
07 p1157 A69-19655
- Electron collisional excitation cross sections for upper states in Ar ion lasers
07 p1157 A69-19656
- Electron collisional excitation cross section calculations for atoms and ions using modified Born approximation taking into account three physical effects
07 p1187 A69-19658
- Cross section calculations for elastic and inelastic electron collisions with atoms, ions and molecules and ionization of atomic systems by electrons and photons
07 p1187 A69-19660
- Atomic and electronic collisions experimental study techniques, noting three data logging systems
07 p1187 A69-19662
- Electron collision excitation of positive ions, calculating collision cross sections for transitions between levels of P term
07 p1187 A69-19714
- Recombination coefficients for dense weakly ionized cesium plasma, treating recombination process as diffusion generated by electron collisions
08 p1359 A69-19844
- He concentration measurement in transient He-air mixture by spectroscopic analysis of fluorescence excited by high energy electron beam
08 p1312 A69-19860
- Electron-ion collisions during forbidden lines excitation in gaseous nebulae, using Hartree-Fock functions and variational principles
08 p1391 A69-20530
- Surface structures determination by energy analysis and low energy electron diffraction of scattered electrons
09 p1554 A69-21340
- Tables of effective electron cross sections and macroscopic coefficients, Volume 1, covering hydrogen and rare gas molecular and atomic interactions with electrons
09 p1541 A69-21579
- Electron impact ionization of negative H ions computed by wave expansion methods and compared with experiments
09 p1542 A69-21622
- Channel coupling effects in elastic electron-atom collisions involving electric dipole transitions, noting phase shifts and differential cross section
09 p1542 A69-21623
- Inverse Compton scattering of far IR background radiation proposed as explanation of high energy gamma ray flux
09 p1580 A69-22296
- Polarization measurements of July 1966 proton flare, considering electron scattering and density
10 p1764 A69-23740
- Thin film thickness and composition determination through scattered electron and characteristic X ray radiation recording
10 p1747 A69-23847
- Electrons resonance scattering by diatomic molecules from elastic and inelastic channel measurements in transmission
11 p1921 A69-24418
- Multiple scattering in Kapitza-Dirac effect describing electron scattering by standing electromagnetic wave, noting transition probability less than unity
11 p1919 A69-25323
- Auroral electrons intensity modulation by source at L equals 6 magnetic shell on geomagnetic equator, noting dispersion effects
12 p2065 A69-26108
- Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibrational region
12 p2132 A69-26114
- Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution
12 p2138 A69-26542
- Polarization of continuum background of planetary nebulae in window in visible spectrum from scattering of nucleus star radiation by electron gas
13 p2339 A69-27567
- Energy loss during inelastic collisions between electrons and ionospheric particles, determining ionospheric heating by UV radiation
13 p2252 A69-27614
- Transverse quantum thermogalvanomagnetic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations
13 p2318 A69-27890
- Cadmium arsenide carriers effective mass under strong transverse magnetic field, noting restricted role of thermal EMF and Hall coefficients
13 p2318 A69-27897
- Electronic structure of clean metallic interfaces, considering electron, ion and surface interactions for metal-vacuum interface
13 p2321 A69-28008
- Nonmagnetic quadrupole ionization gauge, discussing systems design and electron oscillations
13 p2262 A69-28020
- Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function
13 p2314 A69-28445
- Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms
14 p2503 A69-28790
- Molecular hydrogen electron scattering, optical refractivity and molecular anisotropy used to construct model dipole spectrum consistent with oscillator strength rules
14 p2488 A69-29094
- Thomson scatter probes for diurnal variations of daytime atmospheric density at 100 km altitude
14 p2440 A69-29125
- RF impedance method for electron density and collision frequency in plasma
14 p2492 A69-29352
- Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures
14 p2508 A69-29653
- Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693
- Free electron concentrations and dispersion in H I regions noting ionized interstellar gas components role
15 p2681 A69-30420
- Metagalactic electrons and relic radiation interaction calculations allowing for universe expansion, space curvature and X ray absorption
15 p2687 A69-30541
- Electron scattering due to Kapitza-Dirac effect in laser standing wave field
15 p2634 A69-30736
- Low energy neutral bremsstrahlung cross sections for Ne, Ar and Xe, using rapid scanning spectrometer
15 p2657 A69-31159
- Fluctuation kinetics of electron system in nonequilibrium state arising in semiconductor in strong electric field, considering lattice and interelectron scattering
16 p2824 A69-31569

Perturbation theory for nonlinear oscillations in ionized plasma, treating electron-neutral collisions effect by Boltzmann-Vlasov equation relaxation term, noting distribution function

16 p2820 A69-31702

Partial reflections method of Gardner and Pawsey for determining vertical profile of electron collision frequencies in lower ionosphere and upper D layer

16 p2775 A69-32034

Electronic collision frequency measurement at F layer peak near ground sunrise time

16 p2779 A69-32197

Ionosonde electric circuit modified to permit radio wave absorption measurements over wide frequency range, calculating electron collision frequencies in F region

17 p2968 A69-33994

X ray absorption in surrounding gas sphere as function of continuous absorption, electron scattering and diffuse ionizing radiation, using radiative transfer theory

18 p3186 A69-34296

Atomic excitation and ionization by thermal electrons, using Monte Carlo trajectories to determine adiabatic collisions effects on energy transfer near dissociation limit

18 p3176 A69-34790

Long lived highly excited atoms production in electron collisions with CO, O and N molecules

18 p3177 A69-35125

Lower ionospheric effective electron collision number from cosmic noise recordings and radio wave absorption data obtained by vertical sounding rocket

20 p3528 A69-37679

Radial motion of trapped electrons caused by pitch angle scattering in distorted geomagnetic field, noting diffusion coefficient

20 p3593 A69-38104

Diatomic molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation

21 p3775 A69-39665

Exact solution of macroscopic line transfer equation including electron scattering terms for Milne-Eddington model atmosphere, discussing electron scattering effect on growth curves

22 p4007 A69-40903

Electron collisions effect on polarization of waves reflected from ionosphere

22 p3941 A69-40922

Shape resonances in low energy elastic scattering of electrons by C, N and O, discussing ground state configurations and close coupling equations corrections

23 p4193 A69-41452

Low energy electrons energy loss by inelastic collisions in moving through atmosphere, estimating cross sections and loss rates

24 p4351 A69-42763

Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role

24 p4351 A69-43033

Diffuse cosmic X rays from Compton collisions between galactic leakage electrons and extragalactic background photons to verify microwave blackbody radiation properties

24 p4368 A69-43202

Solar X ray bursts decay curves and spectra in 10 to 150 keV range interpreted as hot coronal condensation during flare and electron bremsstrahlung

24 p4372 A69-43613

Elastic electron scattering by metastable states of rare gases, using effective potential matching experimental binding energy of negative ions

24 p4354 A69-43818

ELECTRON SOURCES

Electron gun with plasma cathode consisting of gas discharge chamber, electron ejecting component and focusing system

04 p0598 A69-14857

Cesium plasma produced inside hot cylindrical tantalum cavity at 1400 K by contact ionization at wall while obtaining electrons from internal filament

06 p0927 A69-17707

Diurnal variation of D region electron production rates, discussing Lyman alpha ionization of nitric oxide

09 p1577 A69-21717

Semiautomatic recording device to determine gas discharge ion and electron sources operation modes optimum parameters

15 p2658 A69-30237

ELECTRON SPIN

Acoustic paramagnetic resonance in arsenic doped germanium, measuring spin-lattice relaxation

02 p0296 A69-11835

Synchrotron radiation excitation in system of relativistic monoenergetic electrons rotating in cold magnetoactive plasma

03 p0476 A69-13383

Ground state energy of Anderson Hamiltonian calculated by cluster variation for cases of infinite d-d correlation energy

06 p0958 A69-17712

Spin-other-orbit matrix elements for F super 3 electron configurations

06 p0962 A69-17819

Electronegativity and work function relationship from thermodynamic and quantum mechanics standpoint, describing electrons structure by spin orbitals localized around lattice sites

14 p2505 A69-29263

Spin compensated state of localized magnetic impurity moment in space, calculating size range of magnetic impurity spin/conduction electron spin correlation function

22 p3983 A69-40061

Electron spin memory in optical pumping cycle of potassium halides F centers, measuring relaxed excited state g factors and spin resonance line widths

23 p4198 A69-42419

ELECTRON STATES

Electron states at deep levels in InSb by deriving equations for Bloch wave functions of conduction and valence bands

09 p1556 A69-21508

High temperature gas mixture plasmas thermodynamical properties, emphasizing Debye electrostatic interactions and electron states

10 p1810 A69-23794

Beam-foil technique for measuring radiative lifetimes of excited electronic states in ionic species of O, including transition probabilities

13 p2301 A69-27452

Electronic states of semiconductor acceptor centers at forbidden band deep levels, considering inner electron shell excitation in impurity ion

15 p2665 A69-30039

LTE departure calculated for He I in hot star model atmospheres for effects on populations of singlet and triplet states

21 p3801 A69-38761

Forbidden absorption bands of diatomic O in Ar continuum region, determining rotational constants of upper electronic states

22 p3896 A69-40479

ELECTRON SWEEPING

U SWEEP FREQUENCY

ELECTRON TELESCOPES

U PARTICLE TELESCOPES

ELECTRON TRAJECTORIES

Trajectory equations for outermost electron on beam in TWT operating in dynamic mode for Brillouin flux

03 p0406 A69-13974

Hamilton-Jacobi equations of motion for classical electron in presence of traveling pulse of electromagnetic radiation, solving radiation pulse shape orbits

08 p1377 A69-19790

Numerical integration of motion equations of electrons subject to electrostatic waves, considering turbulent heating

08 p1368 A69-20806

Electromagnetic field penetration into plasma cylinder having electron mean free path comparable with plasma diameter, noting anomalous skin effect

12 p2133 A69-25833

Surface resistivity oscillatory dependence on magnetic field in single crystal metals, examining electron trajectories, energy levels and wave functions

13 p2316 A69-27641

Nonmagnetic quadrupole ionization gauge, discussing systems design and electron oscillations

13 p2262 A69-28020

ELECTRON TRANSFER

Electron drift velocity, diffusion coefficient and trapping time in GaAs, measuring variation with electric field

01 p0140 A69-11255

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point

02 p0238 A69-11681

Electron transfer through metal/semiconductor contact surfaces, measuring electrical conductivity on sintered cylinders with or without silver addition

02 p0296 A69-11790

Gunn effect and resulting electron transfer mechanism in semiconductor devices

03 p0486 A69-13610

Transport diffusion cross sections of slow electrons during scattering at inert gas atoms by microwave method, calculating electron transfer coefficients

03 p0481 A69-14143

Electron temperature relation to population ratio in Gunn effect

05 p0810 A69-16576

Frequency and power stable backward wave oscillators as energy pumps for molecular and wideband parametric amplifiers used in satellite receivers

07 p1095 A69-18430

Oscillators and amplifiers based on intervalley electron transfer in bulk GaAs

07 p1096 A69-18442

Current and voltage waveforms of transit time, resonant domain and LSA modes of operation of transferred-electron oscillators

07 p1097 A69-18443

Enthalpies determination of adduct formation of sulfoxides, sulfanilamides and thionylamides with trimethylalane, noting replacement effect on electron donating ability of oxygen

07 p1074 A69-18631

Electron transport of Halobacterium cutirubrum, discussing spectrophotometric identification of cytochromes

07 p1068 A69-19481

Electron transport parameters in noble gases at low electric field intensities, elastic and inelastic scattering and Boltzmann transport equation

08 p1362 A69-20285

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point

13 p2257 A69-28712

Pseudospin splitting/peroxide mechanism for O reduction at fuel cell cathodes, analyzing O molecule adsorption, H bonding and electron transfer at surface

16 p2748 A69-32809

Interface electron transport phenomena in stress corrosion, expressing defect movements in terms of electron energy dynamics

19 p3349 A69-36889

Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH

20 p3484 A69-37101

Photon induced precursor ionization and electron produced wave separation from electrical shock tubes

20 p3511 A69-38240

Electron transport coefficients determined for weakly and fully ionized gases under various conditions

23 p4195 A69-41517

ELECTRON TRANSITIONS

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

01 p0090 A69-10381

Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements

01 p0124 A69-10901

Ar atom transition probabilities in 5000-6000 angstrom range, noting effect of nonuniform source temperature

01 p0125 A69-10963

GaAs photoemissive yield spectrum analysis, discussing transition energies and energy band structure models

01 p0140 A69-11254

Radiative lifetimes for four N II excited states emitting UV during transition to lower level

02 p0280 A69-11928

Laser transition and photon energy of lightly doped GaAs, showing many body electron-hole-lattice interactions

02 p0257 A69-12615

Induced combinational scattering /ICS/ on IR active transitions, deriving equations with allowance for population variation

02 p0282 A69-12636

High power output CW laser oscillation measured at 4416 A laser transition in Cd 2 using single isotope of Cd 114

02 p0259 A69-12653

Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures

02 p0285 A69-12833

Molybdenum interband transitions noting low energy optical property anomalies and origin of two absorption bands

03 p0442 A69-12986

- Semiconductor nonlinear electron polarizability, using model to obtain correct order of magnitudes 03 p0483 A69-13035
- F values for Ti II, Cr II and Fe II by empirical astrophysical line strength analysis, discussing f value determination from stellar growth curve 03 p0508 A69-13175
- Electron transition probability of oxygen molecule determined using weak bands telluric lines photoelectric recordings 03 p0420 A69-13276
- Doublet electronic states of benzyl radical, discussing configuration-interaction calculations and transition predictions 03 p0472 A69-13321
- Atomic electron spontaneous transition in theory of direct particle interaction, considering electrodynamic field zero-point oscillations role 03 p0468 A69-13773
- Electrical, optical, magnetic and structural properties of titanium oxide, stressing transition difference with vanadium oxide 03 p0490 A69-13923
- Autoionizing states effects on absorption cross sections for ejection of outer subshell electron from atomic oxygen 04 p0633 A69-15127
- Franck-Condon factors in radiative, excitation and ionization molecular transitions of oxygen, carbon monoxide, nitric oxide, etc 05 p0795 A69-15664
- Vibrational excitation by electron impact in kinetic energy range 30-60 eV studied for water vapor and carbon dioxide, determining intensities relative to elastic scattering 06 p0960 A69-17108
- Semiconductor lasers, discussing electron transitions, radiative band-band transitions, emission and absorption spectra, recombination rates, carrier lifetime and lasing conditions 06 p0937 A69-18009
- Plasma ionization enhancement by laser line radiation matched to specific atomic transitions [AIAA PAPER 69-47] 06 p0972 A69-18186
- Experiments on Josephson tunneling junctions and superconducting contacts to demonstrate quantum electronic properties of superconductors [IEEE PAPER D-7] 07 p1200 A69-19052
- Enhanced two photon emission between 6S and 4S levels of K, discussing stimulated three photon Raman scattering and four photon parametric coupling processes [IEEE PAPER S-8] 07 p1154 A69-19080
- Level crossing effect in stimulated emission and application to determination of hyperfine splitting in Xe 129 excited electronic state during laser transition 07 p1156 A69-19398
- Ligand field transitions in tertiary phosphine and arsine complexes of ruthenium and osmium 07 p1075 A69-19483
- Electron collisional excitation cross section calculations for atoms and ions using modified Born approximation taking into account three physical effects 07 p1187 A69-19658
- Atomic excitation and ionization involving inner shell electrons during collisions between atoms and ions, examining photoabsorption by inner shell electrons 07 p1187 A69-19659
- Electron collision excitation of positive ions, calculating collision cross sections for transitions between levels of P term 07 p1187 A69-19714
- Degree of population inversion and inverse temperature measurement in medium 07 p1137 A69-19761
- Vacuum UV perturbation spectroscopy compatibility with resonance transitions in Ar ion laser 08 p1324 A69-20161
- Mutual influence of two laser modes, showing reduced transition rates due to perturbation of lower level 08 p1325 A69-20283
- Mutual influence of two different laser modes corresponding to two transitions with same ground level, using He-Ne DC laser 08 p1325 A69-20284
- Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium difluoride crystal, noting spectrum shift with increasing crystal temperature 08 p1326 A69-20544
- Self consistent field calculations of effective quantum numbers for nd, nf and ng electrons for atomic configurations from 2-126 Z 08 p1355 A69-20734
- Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability 09 p1588 A69-21365
- Galactic and intergalactic ionic fine structure transitions effect on background microwave radiation intensity 09 p1590 A69-21445
- Temperature effect on pulsed laser action on electron transitions in diatomic molecules for rotational relaxation, discussing excitation mechanisms 09 p1520 A69-22654
- Triplet-triplet transitions for Q switching, examining organics for passive Q switches 09 p1520 A69-22682
- Transitions between heavy hole and spin orbit split bands in uniaxially stressed Ge and GaAs, noting spectra for various temperatures and valence band parameters 10 p1745 A69-23359
- Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition sustaining gas laser oscillations, discussing single pi mode laser operation 10 p1704 A69-23808
- Gas laser transitions and power broadening, analyzing saturation and gain profiles of He-Ne laser by light probe 11 p1898 A69-25046
- Multiple scattering in Kapitza-Dirac effect describing electron scattering by standing electromagnetic wave, noting transition probability less than unity 11 p1919 A69-25323
- Thermosphere radiative cooling by atomic O 62 micron line, noting cooling and heating rates 12 p2064 A69-26009
- Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels 12 p2109 A69-26676
- Hydrogenic transition derived excitation temperatures for Wolf-Rayet stars of WC sequence 12 p2160 A69-26904
- Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra 13 p2326 A69-27554
- Relative transition probabilities for visible Si atom lines, noting disagreement with LS coupling predictions and solar Si abundance determination 13 p2340 A69-27580
- Far IR electronic and vibronic transitions in single crystals of Nd ions in tysonite lanthanide fluorides 13 p2316 A69-27628
- Electron and proton components contribution to reverse current production after particle shower through upper Cu wall of ionization chamber with lower Pb wall 13 p2304 A69-28417
- Excited hydrogen RF spectral lines from nebula NGC 6618, calculating frequency for transitions by Balmer formula 13 p2353 A69-28433
- Electron transition probability of oxygen molecule determined using weak bands telluric lines photoelectric recordings 14 p2487 A69-28784
- Single crystals garnets Raman spectra using laser radiation, separating phonon spectra of host lattices from electronic Raman effect 14 p2507 A69-29334
- Partial wave description for calculating cross sections of fine structure transitions of Na in collision with He, discussing shape resonances 15 p2655 A69-30198
- Transition probabilities of spectral lines in helium-like ions estimated from hydrogen magnetic dipole transitions, discussing single photon decay 15 p2695 A69-30892
- Electron excitation and phase shift method for radiative lifetimes of Ar II UV transitions 15 p2656 A69-31034
- Oscillator strengths calculated for transitions in Si III using dipole length and velocity matrix elements, comparing many electron correlation problem approximations 15 p2656 A69-31158
- Magneto-optical oscillation of absorption coefficient in semiconductors during direct electron transitions 16 p2824 A69-31574
- Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser 17 p2982 A69-33633
- Shock tube application to transition probability measurements with emphasis on thermodynamic state of radiating gas, noting temperature dependence of level population 18 p3176 A69-34446
- Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability 18 p3197 A69-34755
- Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile 18 p3177 A69-35239
- Resonance effects between H levels by induced electric dipole transitions, using spatially periodic potential barriers 18 p3179 A69-35488
- Self mode locking of carbon dioxide laser with high order transverse mode oscillations in vibrational-rotational transitions of P branch 19 p3330 A69-35602
- Laser emission theory for indirect band-band transitions, considering light absorption by free carriers in semiconductors with polar and unpolar scattering 19 p3332 A69-35873
- Frequency shift dependence in transition of Rb 87 atoms on pulsed pumping intensity, discussing continuous and pulsed indication and peak determination 19 p3336 A69-36345
- Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique 19 p3386 A69-36521
- Fe-doped p-type gallium arsenide single crystal radiative recombination emission during current carriers transition from deep acceptor level into valence band 19 p3392 A69-36611
- Rotational analysis of O_2 band of gamma-prime system of TiO molecule, considering transition to ground state 20 p3577 A69-38170
- Effective Gaunt factors for threshold excitation of positive ions by electron collisions for 23 dipole transitions in 15 isoelectronic sequences 20 p3581 A69-38175
- Unquantized field calculations extended to include atomic field effect on atom, predicting spontaneous decay rate from excited state and light frequency time dependence 21 p3769 A69-38578
- Thermally insensitive technique for atomic transition probability measurement 22 p3983 A69-40100
- Hydrogen high level transition probabilities formula, giving two tables of oscillator strengths [AFCLR-69-0301] 22 p3983 A69-40149
- Level shifts and spontaneous transitions in steady state of universe by path integral method of first quantization, considering time symmetric electromagnetic theory 22 p3980 A69-40169
- Molecular N UV spectrum at various pressures, showing absorption band dependence on pressure induced dipole transitions 22 p3986 A69-40723
- Off-diagonal matrix elements of Breit interaction between singlet-triplet transitions for helium isoelectronic sequences 22 p3986 A69-40783
- Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules 22 p3965 A69-41117
- Pulsed Hg ion-He laser operation, revealing transition in near IR 23 p4171 A69-41393
- Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically 23 p4172 A69-41493
- Autoionized resonance transitions of He at 206.2-192.2 Å using He continuum produced by capillary spark, also producing He II line spectra 23 p4191 A69-42149
- Transitions competition in He-Ne laser pulse operating in single mode with nonuniform gain saturation 24 p4328 A69-43165

 NT VACUUM TUBE OSCILLATORS
 NT VACUUM TUBES
 NT VIDICONS

Electron tubes in phased array radar systems, discussing replacement limits by solid state devices, reliability and cost reduction

01 p0048 A69-11040

Transistors vs electron tubes as microwave power sources in UHF phased array radars, noting transistor cost competitive limit

01 p0048 A69-11041

Tube and transistor type quartz crystal FM oscillators circuitry and operating characteristics, discussing generation of three frequencies

05 p0732 A69-16532

Electronic tubes utilization in space flight, summarizing characteristics and satellite applications

07 p1093 A69-18421

Inertia limited flow transition to mobility limited flow in gas diodes by taking velocity moments of Boltzmann equation for electron velocity distribution function

09 p1462 A69-21325

TR tubes spurious harmonic power generation investigated for intersystem interference reduction and design criteria, discussing effects of incident power, gas pressure and tube geometry

15 p2573 A69-30032

Tubes faults monitoring in three phase Graetz convertor bridges by measuring voltage across DC smoothing inductor

15 p2575 A69-30180

Unsuccessful space charge noise suppression measurements on field emission tubes, obtaining diffusion and shot noise measurements at high currents

16 p2752 A69-32384

Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators

22 p3982 A69-40669

Heat pipe design for electron tubes cooling at various temperatures, including dielectric heat pipes and traveling wave tubes
 [ASME PAPER 69-HT-25]

24 p4412 A69-43543

ELECTRON TUNNELING

WKB approximation for metal-semiconductor junction tunneling and transmission coefficient of parabolic barrier, discussing density of states in degenerate semiconductors

02 p0301 A69-12652

Superconductor tunnel junction with noise, calculating frequency pulling, radiation linewidth and voltage power spectrum in AC Josephson effect

03 p0486 A69-13387

Tunnel breakdown in p-n junctions used to generate microwave oscillations, discussing Si and Ge properties

03 p0492 A69-14163

Low temperature conductance peaks observed in tunneling measurements on aluminum-phosphosilicate glass-degenerate silicon sandwich structures

03 p0493 A69-14183

Electron phonon coupling in barriers of GaAs Schottky diodes, noting first and second derivatives of I-V characteristic in n-type GaAs-Pd Schottky diode

03 p0493 A69-14242

Incremental conductance of heavily doped n-type Si semiconductor barrier tunneling as function of bias voltage, indicating Fermi level dependence on dopants

05 p0808 A69-16285

Impact ionization and tunneling effect during electroluminescence of zinc sulfides

06 p0980 A69-17261

Electron and phonon tunneling spectroscopy in metal Ge contacts, noting improved agreement with one electron model

06 p0982 A69-18234

Richardson constant and tunneling effective mass for thermionic and thermionic field emission in Schottky barrier diodes

07 p1089 A69-18247

Surface plasmon excitation by tunneling electrons in GaAs-Pb junctions, discussing conductance at bias voltages, plasmon energy and concentration

07 p1200 A69-19402

Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions

09 p1544 A69-21336

Stationary Josephson effect used to determine fluctuations influence on superconducting tunneling

09 p1556 A69-21669

Trapping state effect on tunneling probability in Schottky barriers, discussing current-voltage characteristics

09 p1557 A69-21748

Josephson effects in superconductivity and superfluidity including electron tunneling DC and AC effects, basic and double junctions

11 p1938 A69-25240

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes

15 p2573 A69-30062

Superconductive tunneling measurements on thin Al films, discussing enhanced transition temperatures, energy gap dependence on temperature, electron microscope observation of crystallites, etc

16 p2825 A69-31634

Field ionization at metal surfaces as rearrangement collision, considering anisotropic electron tunneling probabilities produced by Fermi surface

17 p3015 A69-32821

Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics

19 p3382 A69-36049

Diagonal tunneling and radiation polarization in doped heterojunctions and p-n junctions of GaAs, using electroluminescence spectrum analysis

24 p4362 A69-43737

ELECTRONIC AMPLIFIERS
U AMPLIFIERS

ELECTRONIC CONTROL

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelsat 3 satellite

06 p0897 A69-17590

Electronic controller with integrated circuits and inexpensive SCR as coupler or interface between card reader and frequency synthesizer designed for unattended operation

06 p0897 A69-17704

Direct coupled monolithic IF amplifier with active gain control, analyzing large signal response, stability, available gain and noise behavior

07 p1104 A69-18885

Electron-optical image converter camera for wide time intervals, considering nanosecond electronic control and high voltage stabilized power supply

12 p2083 A69-26140

Transistorized VOR system using electronic goniometer and fixed antennas, describing power supply, transmitter, goniometer, antenna and design

16 p2827 A69-31938

Beam control of optically fed two axis airborne electronically scanned phased arrays by on-array and off-array processing

17 p2942 A69-34085

Air traffic control/electronics automation developments and controllers responsibilities in Great Britain and Netherlands

18 p3168 A69-34805

Concorde Olympus 593 engines electronic control and adjustment devices

19 p3395 A69-36706

Servovalves with fluidic and electrical inputs compared for gas servoamplifiers performance, considering use as sensors in closed-loop hydraulic circuit

19 p3255 A69-36711

Thermostatic electronic control device of birefringent filter in Wroclaw Observatory coronagraph during prominence observations

22 p3943 A69-40000

Electronic measurement and control in industry - Conference, Budapest, 1969

22 p3915 A69-40934

Electronically controlled microwave phasers and time delay elements design and operation, discussing beam width, steering and effects, directivity and planar arrays

23 p4135 A69-41353

Integral cell-level electronic charge controls for secondary batteries, emphasizing performance, reliability and power system interfaces

23 p4076 A69-42542

Tensor analysis of brushless DC motor controlled by transistors, discussing torque phase, torque variation phase and efficiency phase characteristics

24 p4255 A69-42678

Mechanization of analog electrical-to-fluidic transducer using carrier circuit techniques and piezoelectric bender drive assembly

24 p4315 A69-43026

ELECTRONIC COUNTERMEASURES

NT CHAFF

Soviet book on electronic countermeasures and intelligence covering jamming methods for automatic systems

03 p0385 A69-12927

Radar or ECM/ECCM system simulation by digital computer, using signal and jamming spectral inputs

03 p0400 A69-13200

Avionics and electronic countermeasures equipment design, development, installation and application problems for high performance military aircraft to meet hostile electronic environment
 [AIAA PAPER 69-822]

19 p3243 A69-35599

Microcircuit phased array electronic countermeasures system design and hardware techniques for aerospace applications, analyzing adaptive, retrodirective and combination array systems

24 p4287 A69-43110

Cloud pictures from weather satellites reception according to automatic picture transmission /APT/ system, discussing design and field strength measurements

[UN PAPER 68-95451]

01 p0108 A69-10458

Small earth stations in future communication satellite systems, discussing applications, characteristics and equipment

[UN PAPER 68-95751]

01 p0028 A69-10492

Chemical phenomena during explosions of wires in various gaseous atmospheres, using apparatus with electronic crowbar for current flow regulation

01 p0081 A69-10680

Electronic device networks periodic structures accuracy estimated by automatic measurement of complete error spectrum of network spacings

01 p0045 A69-10732

Variable impedance matching device employing lumped and homogeneous circuit elements and stub line technique

01 p0046 A69-10740

Electronics and aerospace systems - IEEE Conference, Washington, D.C., September 1968

03 p0385 A69-13176

Avionics, discussing use of electronics in control of aerospace vehicles

03 p0431 A69-14085

Electronic scanning radar systems design, discussing beam types, bandwidth, tracking, target acquisition, etc

04 p0556 A69-14301

Time averaged products and squares of fluid turbulence signals at LF, using Hall effect multiplier device and integrating voltmeter

04 p0601 A69-15116

Flat cable terminating techniques for electric and electronic systems

04 p0578 A69-15217

Solid state precision frequency standard for L multiplex carrier equipment, using four precision quartz crystal oscillators

04 p0561 A69-15451

Ground station electronic environment, telemetry encoding and radio links for spacecraft communications and tracking

06 p0886 A69-16860

Transversal equalizer circuit consisting of delay line and variable sampler and reinjection coupler for microwave frequencies

07 p1102 A69-18671

Computer aided design methods for electronic and mechanical materials, discussing basic concepts and problems

08 p1278 A69-19971

Thermal stabilization and ethylene oxide effect on spaceborne electronic component sterilization and decontamination

08 p1283 A69-20266

Automation and instrumentation - Conference, Milan, November 1968, Volume 1

08 p1296 A69-20301

Ultrahigh speed systems and logic circuits specifications implementation into electrical design, discussing circuit selection, line propagation delays, noise margins and temperature effects [AGARDOGRAPH-114]

08 p1298 A69-20985

Electronic terminal guidance requirements for all-weather VTOL operations, suggesting future first generation landing system

08 p1348 A69-21064

Assessing cost effectiveness of reliability and quality of semiconductor products, using mathematical models

08 p1292 A69-21102

Electronic components reliability tests, determining correlation between material quality and failure

08 p1293 A69-21109

Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation

08 p1293 A69-21110

Conventional electronic and microelectronic circuits reliability, discussing external stress effects on improvement in avionics and rocket applications

08 p1293 A69-21112

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals

08 p1294 A69-21118

Large scale electronic systems configuration compatibility concept, discussing modular line replaceable units [LRU/ assigned set of numbers

08 p1322 A69-21154

Soviet book on electronics and radio instruments of flight vehicles, covering radars and antennas, automatic pilots and design

09 p1463 A69-21930

Accelerated reliability tests of electronic capacitors using voltage as main forcing factor, establishing correlations between lifetimes in accelerated and long term tests

09 p1464 A69-22244

Thick film hybrid circuit technology and equipment reviewing conductors, resistors, and insulator inks

09 p1508 A69-22337

Polyimide materials, discussing lamination and applications in electronic circuitry such as interconnection cables and multilayer interconnection boards

09 p1511 A69-22354

Digital computer simulation as maintainability design and prediction tools, discussing fault localization in complex electronics systems

10 p1668 A69-22974

Electronic circuit analysis by computer programming including system and program commands, network data, output control, discussing steady state circuit programming

10 p1659 A69-23143

Skorsky HH-3F helicopters electronic equipment, discussing communication and navigation aids, search and recovery missions, etc

10 p1662 A69-23222

Reliability function for electronic device during initial period of operation, based on use of lower bound

10 p1662 A69-23318

Digital design techniques for electronic equipment including measuring instruments, generators, synthesizers, etc

10 p1664 A69-23796

High energy radiation effects on electronic components in space missions, noting simulation tests and shielding

11 p1946 A69-24521

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment

11 p1834 A69-24544

Soviet book on electroluminescent devices covering panels, indicator contrast levels, control, multicolor indicators, image conversion and storage and optoelectrical systems

11 p1850 A69-24976

Modular designed automatic test system consisting of central computer controlled system with multiplexed remote test stations for depot level maintenance

11 p1864 A69-25067

Computer simulation application to electronic systems, discussing design, performance optimization, implementation and environmental effects

11 p1843 A69-25319

Reliability planning role in directing business functions to quality efforts integration in engineering, production and testing of electronic equipment

12 p2102 A69-25971

Digital computer-aided reliability engineering methods for electronic equipment design and analysis

12 p2037 A69-25973

Nuclear explosions electromagnetic effects on electronic systems, considering signals emitted from fireball and signal attenuation by changed atmospheric propagation

13 p2234 A69-28344

Parameters optimization in electronic equipment design, considering parameters and efficiency criteria as additive elements functions of dimensional chain

14 p2418 A69-28835

Quartz oscillator with electronic temperature compensation, noting reduced size, weight and power consumption

14 p2420 A69-29398

Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure

14 p2420 A69-29494

Reliability of electronic components for space - Conference, Grenoble, November 1968

15 p2622 A69-30816

Computer aided design [CAD/ of component selection for circuit optimization applied to circuit performance and sensitivity calculations

15 p2628 A69-30849

Automatic hybrid apparatus for solving linear equations, using Gauss-Seidel iterative method and stressing control arrangement, communication circuits, etc

15 p2572 A69-31089

Electronic equipment for data acquisition in extraterrestrial experiments including low noise charge amplifiers, discriminator, pulse lengthener, linear gate and logarithmic amplifier

16 p2759 A69-31857

Polish electronic measurement devices operating principles and specifications including vibration, frequency and pressure meters, fatigue testing machines, etc

16 p2790 A69-32076

Thermal silicone grease type filler materials for heat transfer across bolted or clamped sheet metal surfaces in electronic equipment for space applications

16 p2794 A69-32560

Integrated circuits effect on electronic equipment design and production technology

16 p2762 A69-32578

Wire-wrap solderless joints production technology in electronic equipment

16 p2763 A69-32579

Electronic device utilizing scanning beam to evaluate limb photographs, reducing errors by introducing second generator with frequency proportional to deflecting potential variation

17 p2970 A69-32884

Cosmic ionizing radiation effects on electronic elements operation based on radiation and matter interaction principles

17 p2937 A69-33583

Automatic device for logarithmic damping decrement measurement from vibrograms, showing structural arrangement and electrical circuitry

17 p2976 A69-33931

Electric power quality effects on aircraft electronic utilization equipment, discussing characteristics of variable speed constant frequency [VSCF/ generating system

17 p2905 A69-34091

Series 3 Skyvan design, describing controls, electric and electronics equipment, weather protection, environmental and fuel systems

17 p2906 A69-34194

Development, manufacturing and logistic costs of reliability improvement in electronic equipment design

18 p3231 A69-34485

Physics of Control program for electronic devices reliability, discussing qualified parts, chemical, physical and electrical properties, parameter ranges, specifications and corrective action

18 p3143 A69-34488

Radiation resistant devices for minimizing neutron and gamma radiation effects on military electronic components, discussing selection features and sampling lot sizes

18 p3144 A69-34491

Prefailure detection of unreliable electronics parts from random samples of received parts lots, noting cost reductions

18 p3146 A69-34508

Equipment maintainability demonstration technique, discussing simulation, repair time rates mathematical distribution, range and limits

18 p3117 A69-34530

Apollo 10 lunar landing module, detailing weight, shape, electronic system and rendezvous radar

18 p3207 A69-34629

Book on digital electronics for scientists covering digital circuits and instruments for measurement, control or computation

18 p3112 A69-34915

Fire-retardant thermoplastic and thermosetting materials for electronics industry use including blending of fire-retardant additives into plastics

18 p3162 A69-35273

Electronics applications of superconductivity including inductors for energy storage, computer elements and magnets, cavities for microwave circuits, signal generators and detectors, etc

19 p3382 A69-35807

IEEE Conference - San Antonio, April 1969

21 p3676 A69-39437

Electronic terminal guidance requirements for all-weather VTOL operations, suggesting future first generation landing system

22 p3978 A69-39875

Thermal protection for air-launched missile electronics during carry and free flight, considering active, passive and combination systems and weight penalties

22 p4049 A69-39943

Electronic equipment thermal control, describing design and use of heat pipes

22 p4049 A69-39944

Techniques to control, measure and assure reliability of electronics systems and equipment, emphasizing Thorndike chart and Molina tables

22 p3953 A69-40026

Reliability testing and parts screening of electronic systems for best parts selection

22 p3953 A69-40029

Electronic equipment environmental cooling by controlled airflow systems, reviewing systems designs, control problems, etc

22 p3954 A69-40035

Electronic measurement and control in industry - Conference, Budapest, 1969

22 p3915 A69-40934

Digital signal processing electronic device for linearizing signals from sensors with nonlinear frequency output by modifying time signal frequency

22 p3915 A69-40935

Two channel electronic system with one redundant channel for automatic replacement in case of failure evaluated for operational preparedness

23 p4136 A69-41559

Equipment reliability determination from relations for efficiency characteristics of stochastic queueing system with finite number of sources having Markov character

24 p4287 A69-43129

ELECTRONIC EQUIPMENT TESTS

Test procedure for obtaining large signal S characterization of nonlinear power transistors

02 p0214 A69-11600

Electronic system checkout in SAAB 37 Viggen, using computer controlled test equipment

05 p0726 A69-16767

Synthetic circuit equipment for semiconductor rectifier life testing with built-in fault analyzer for indicating shorted and broken diodes

08 p1293 A69-21113

Automatic transistor reliability testing system based on measured data and reliability research
08 p1294 A69-21119

Reliability in microelectronics estimated from failures expected during lifetime, describing various test methods
08 p1294 A69-21121

Computer controlled flight line tester performing automatic real time testing of aircraft avionics systems on flight line or hanger
11 p1864 A69-25060

Computer controlled testing of commercial aircraft avionics systems for automatic, semiautomatic and manual operation to perform repair and calibration tasks
11 p1864 A69-25061

Single purpose, multipurpose and multistation automatic test systems for production and maintenance
11 p1864 A69-25068

In-circuit diodes testing by semiautomatic low current regulated voltage test set
12 p2035 A69-25835

Plasma diagnostics FM phase meter circuits tests, considering raster phase indicators, phase detectors and frequency integrators
14 p2497 A69-29797

Scientific satellite 1 solar cell panels power output dependence on temperature and spin calculated and compared with results for outdoor sunlight
15 p2552 A69-30072

Pulse generator to accommodate electronic system testing to shock response spectrum by simulating real world shock environment
15 p2585 A69-30360

Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections
15 p2576 A69-30362

Integrated circuit failure analysis in military and space applications utilizing type-test programs
15 p2624 A69-30820

Electronic components reliability by failure rates and drift behavior, assuming probabilities product rule and exponential law of life distribution
15 p2626 A69-30835

Radiology and thermography in nondestructive reliability testing of electronic equipment
15 p2610 A69-30850

Reliability testing of development models during production, considering short term and large batch tests
15 p2579 A69-31036

Semiconductor rectifiers economic life testing with synthetic circuits utilizing thyristor switch
15 p2579 A69-31041

Diode burn-in dissipation measurement for reliability testing
15 p2579 A69-31043

Electronic hardware optimum quality assurance selected by dynamic programming in terms of failure mechanism detection efficiency per source allocation
15 p2722 A69-31127

Quality control of high volume microelectronic circuit assembly of military computer emphasizing preventive action
15 p2580 A69-31129

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards
15 p2580 A69-31130

Large scale integrated MOS devices tests for space applications, establishing quality specifications
15 p2580 A69-31131

Failure analysis techniques in electronic component reliability laboratory, discussing electrical and physical tests to detect weaknesses in manufacturing and design
15 p2722 A69-31133

Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion
15 p2630 A69-31137

Semiconductor devices leak testing methods including liquids, helium mass spectrometer, Radflo and hermetic seal tests
16 p2758 A69-31712

Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
16 p2759 A69-31851

Aircraft solid state electric system logic level tested functionally by built-in test equipment (BITE) operated on ground during preflight tests
17 p2977 A69-34110

Electromagnetic compatibility (EMC) hardware design, discussing NDC 1060 computer configuration, requirements and service environment
17 p2947 A69-34136

AGREE /Advisory Group on Reliability of Electronic Equipment/ testing philosophy, emphasizing environmental tests
18 p3143 A69-34481

Failure analyses of semiconductor devices for military use, suggesting modifications to MIL-STD reliability screen tests
18 p3108 A69-34499

Reliability prediction in electronics, discussing basics, advances, limitations, etc
18 p3146 A69-34514

Leak tests for sealed electronic circuits using helium mass spectrometer
18 p3138 A69-35271

Materials evaluation for devices with long term underground exposure, including field tests at tropical locations
19 p3321 A69-35568

Communication equipment reliability improvement through testing and failure analysis
19 p3282 A69-35783

Integrated circuits failure analysis techniques utilizing pin-to-pin curve tracer tests and thermal measurements
19 p3282 A69-35786

Bayesian reliability demonstration tests for predetermining sample size producer and consumer risks for equipment with exponential and binomial failure distributions
19 p3327 A69-36039

Visual inspection, thermal and mechanical shock, burn-in and hermeticity tests of microelectronic equipment, reviewing test methods and procedures of MIL-STD-883 program
19 p3284 A69-36043

Hazard and renewal rate and bathtub curves for electronic equipment reliability, noting single and multiple probability densities
20 p3504 A69-37070

MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling
20 p3551 A69-38289

Metallurgical, chemical and mechanical analyses and high stress tests application to verification of electronic device reliability, noting failure modes and rate
22 p3953 A69-40030

MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes
22 p3912 A69-40067

Solar array configurations and performance on Martian surface, including hard lander design and surviving shock levels
23 p4073 A69-42289

Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

All-equipments reliability test improved by removing usual truncation and extending accept- reject lines of test plan MIL-STD-781
24 p4321 A69-43203

Microelectronics test program consisting of four reliability screening levels based on Mil-Std 883
24 p4287 A69-43205

ELECTRONIC FILTERS

Integrated circuit digital filters design characterized by weight coefficients containing Lanczos factor for application to processing of signal transmitted from space vehicles
01 p0038 A69-10071

Multistub filter for microstripline using shorted and open stubs
01 p0041 A69-10200

Nonreciprocal tunable yttrium-iron garnet microstrip filter design through generation of circularly polarized field
01 p0041 A69-10202

Optimal predictor design by comparison of statistical input models, measuring signal filter performance by root-mean-squared errors
01 p0043 A69-10558

Digital matched filtering technique for RF interferometer employing carrier modulated by pseudonoise sequence, discussing applications to antenna arrays
01 p0048 A69-11003

Miniaturized adding sample and hold device with adjustable delay applied to digital filters
04 p0574 A69-14350

Line filter compression and positioning of bipolar video pulse trains for conjunctive use with moving target indicator in echo elimination
04 p0558 A69-15071

High speed modular multiplier and digital filter for LSI development
04 p0567 A69-15354

Digital filter transfer functions design by sampled data transformation, noting role of analog filters
04 p0584 A69-15461

Special purpose computer for implementing programmable digital filter used in sampled data control systems
04 p0569 A69-15462

Digital filters for moving target indicator radars compared with analog filter systems
04 p0580 A69-15463

Interpolation filters with restricted transmission zeros in transmission function capable of reconstructing continuous function from equidistant sample values
05 p0735 A69-16617

Expressions for calculating filtering errors resulting from insufficient information about useful signal and noise characteristics
05 p0740 A69-16668

Balanced diode shunt bridges with electronically tunable carrier selection high-Q N-path filter from 0 to 200 kHz, using single integrated module
07 p1089 A69-18249

Random filters and stabilization of periodic signals mixed with noise, establishing second order statistics at output
07 p1089 A69-18281

Parasitic reactance disturbing attenuation and return loss of reactance filters, discussing correction of numerator polynomial of characteristic function
08 p1283 A69-20128

Spherical electronically tunable multiresonator YIG filters design using filter tables and coupling bandwidth charts
08 p1292 A69-21006

Chebyshev error norms of polynomial approximations for ideal filter minimized by emphasizing role of transfer function even and odd parts
08 p1299 A69-21168

Filter design using transformed frequency variables suitable for computer programs
08 p1300 A69-21172

Insertion-loss synthesis of narrow band crystal band-elimination filters, using narrow band approximation and pseudoreactance theory
08 p1300 A69-21173

Equal element elliptic function filters, noting lower dissipation loss when applied to bandpass and bandstop filters
08 p1300 A69-21175

Discrete predicting filter optimal synthesis in terms of rms error by solving normal Gaussian equations
09 p1473 A69-21858

Precision trimmed RC active networks for high selectivity microelectronic filter fabrication for frequency division multiplex applications
09 p1466 A69-22452

Joint filter optimization in combination analog-digital hybrid multilevel transmission system
09 p1457 A69-22465

Signal conditioning amplifiers covering carrier and DC amplifiers, differential amplifiers, charge amplifiers and active filters
10 p1691 A69-23230

Noise in instrumentation systems, considering coupling and current noise source and reduction by isolation and filtering
10 p1691 A69-23231

Output pulse duration calculation for compressing filter in presence of pulse or continuous FM noise, using parallelogram of arguments method
11 p1844 A69-24445

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters
12 p2046 A69-26062

Optimal filtering of linear distributed parameter systems corrupted by boundary and/or volume stochastic disturbances
15 p2565 A69-30183

Feedback realization of continuous optimal filter applied to designing servomechanisms with stochastic inputs and disturbances
18 p3110 A69-34673

- Single loop directional stripline filters synthesis, including general expression for frequency characteristics based on wave matrices
19 p3284 A69-36570
- Transmission filter to improve voice communication intelligibility and SNR, describing applications to nonlinear circuits
20 p3505 A69-37293
- Electromagnetic compatibility (EMC) filter design and test methods to achieve effectiveness and reliability, emphasizing transfer impedance characteristics
23 p4142 A69-42233
- Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters
23 p4146 A69-42447

ELECTRONIC LEVELS
U ELECTRON ENERGY
U ENERGY LEVELS

ELECTRONIC MODULES
NT MICROMODULES

- Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities
11 p1864 A69-25065
- Semiautomatic and automatic off-line module testing machines, comparing costs for different test populations
11 p1865 A69-25076
- Spacecraft integration electronics modular packaging, discussing slice housing concept and design criteria including environmental resistance, reliability, performance, etc
22 p3910 A69-39949
- Modular configuration of recoverable scientific MAP/Modular Auroral Probe/ payloads aboard Nike-Apache rockets, discussing payload design concepts
23 p4223 A69-41763
- Modularized static AC and DC inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests
23 p4073 A69-42292

ELECTRONIC PACKAGING

- Electronic packaging techniques for long life spacecraft, discussing effects of mechanical and electrical stress, temperature cycling, vacuum, radiation and contamination
01 p0038 A69-10145
- Integrated circuits technology, discussing thin film, monolithic compatible and hybrid circuit techniques
02 p0216 A69-12050
- Plastics in electronic packaging - Conference, Binghamton, New York, October 1968
04 p0620 A69-14953
- Electric components encapsulation by combining liquid resin techniques and transfer molding
04 p0607 A69-14955
- Medium scale integration for packaging hybrid electronic monolithic systems
05 p0735 A69-16752
- Semiconductor device failure modes temperature dependence, discussing bonds, metallization and packaging
06 p0894 A69-17218
- Spacecraft component heat sterilization, discussing heat effects on electrical connections, polymers and adhesives
08 p1284 A69-20267
- Hybrid circuit technology application to packaging electronic systems
09 p1508 A69-22336
- Low temperature low cost dip brazing technique for light weight magnesium alloy electronic packaging structures, noting distortion
09 p1509 A69-22346
- Flat flexible printed circuitry in AWG-10 missile control system on F-4J, regarding wire harness packaging
09 p1511 A69-22356

- Electronic systems partitioning in preparation for MOS large scale integration for system performance and cost improvement
09 p1466 A69-22451
- Electrical, thermal and mechanical requirements in design of Landing Radar Electronic Assembly for Apollo Lunar Module
10 p1663 A69-23537
- Integrated circuits, discussing development from transistors and vacuum tubes, operation, fabrication and applications
12 p2038 A69-26331

- Fabrication techniques for plastic insulation in electronics, discussing packaging, low pressure molding, casting, etc
13 p2285 A69-27987
- Doppler radar clearance hole packaging method for ruggedized dual in-line integrated circuits with conventional etching, tooling and double-sided printed wiring techniques
14 p2419 A69-29102
- Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure
14 p2420 A69-29494
- Engineering problems in IC microminiaturization, dividing devices according to suitability for microminiaturization
15 p2576 A69-30352
- Large scale integration /LSI/ and medium scale integration /MSI/ circuits evolution and requirements, noting onboard computers and space applications
15 p2625 A69-30825
- Epoxy encapsulated transistors reliability, data from long term maximum rated life and accelerated tests
18 p3145 A69-34498
- Leak tests for sealed electronic circuits using helium mass spectrometer
18 p3138 A69-35271
- Seam and stitch welding in miniaturized semiconductor package fabrication, including leak rate tables
18 p3149 A69-35272
- Epoxy molding compounds performance on DIP integrated circuits, determining comparative moisture protection provided by encapsulants
19 p3280 A69-35546
- Glass encased electronic components with conformal coatings, considering glass breakage at low temperature
19 p3281 A69-35547
- Transfer molded epoxy dielectrics, comparing encapsulation rate, pressure and cure times to compression molding
19 p3281 A69-35548
- Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level
19 p3283 A69-36021
- Electronic packaging and production - Conference, Anaheim, February 1969 and Philadelphia, June 1969
22 p3909 A69-39941
- Environmentally sealed connector for avionics packaging with die-cast Al alloy shell meeting specification ARINC 404 requirements
22 p3910 A69-39946
- High voltage power supply electronic subsystem for electric propulsion of ATS-D satellite, describing packaging, temperature control and performance in simulated space environment
22 p3999 A69-39948
- Spacecraft integration electronics modular packaging, discussing slice housing concept and design criteria including environmental resistance, reliability, performance, etc
22 p3910 A69-39949
- Dual role core /Ducor/ memory system with unique core stack assembly feature to achieve cost reduction and structural integrity for severe environmental conditions
22 p3903 A69-39950
- Flexible circuitry for reliable spaceborne data processing equipment electronic packaging
22 p3903 A69-39951
- Hybrid microelectronic modules, using basic thermal design guidelines
22 p3910 A69-39952
- Encapsulation effects on piece parts in high density package, considering unexpected part failures elimination in Lunar Module Signal Conditioning Electronic Assembly
22 p3910 A69-39953
- Handbook of electronic packaging including rigid and flexible printed wiring, soldering and mechanical interconnections, bonding, computer and military applications, etc
22 p3911 A69-40046
- Micromodule unsteady thermal behavior reduced to calculating linear heat flux for boundary conditions containing temporal and spatial derivatives
23 p4136 A69-41558

ELECTRONIC PHOTOGRAPHY
U ELECTRO-OPTICAL PHOTOGRAPHY
ELECTRONIC RECORDING SYSTEMS

- Portable amplitude and frequency recording system for studying ionosphere by radio signals from artificial satellites
04 p0597 A69-14748

- Diffraction pattern recording technique and application to thin film measurements
09 p1499 A69-22303
- Electronic data processing facilitating engineering design development work, including computer programming
18 p3106 A69-34838

ELECTRONIC SIGNAL MEASUREMENT
U SIGNAL MEASUREMENT
ELECTRONIC SPECTRA

- Relation between energy spectrum and potential drop in plasma expelled from hot cathode tube into vacuum derived by electrostatic analyzer
06 p0963 A69-16899
- Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function
09 p1554 A69-21467
- Inverse problem method for reconstructing electrons differential spectral cross sections and photon pair formation in electron photon cascade
13 p2303 A69-28415
- Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function
15 p2669 A69-30712
- Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity
16 p2851 A69-32566
- Rocket instrumentation for electron and proton spectra measurement in aurora borealis
17 p2972 A69-33038

ELECTRONIC STRUCTURE
U ATOMIC STRUCTURE
ELECTRONIC SWITCHES
U SWITCHING CIRCUITS
ELECTRONIC TRANSDUCERS

- Design and development of electrical transducer and associated instrumentation for fluid pressure measurement
03 p0427 A69-12914
- Onboard aircraft weighing system /OBAWS/ for accurate gross weight and CG measurements, describing axle shear deflection transducer system
10 p1693 A69-23276
- HF electromagnetic decoupling pressure gage, using transducer with solid state strain gages as sensing elements
15 p2611 A69-31029
- Differential capacitance transducer measuring small displacements in heated transformer oil, air, castor oil or glycerin
22 p3946 A69-40439
- Capacitance sensor of vertical with flexible mobile electrode, describing diagram and operation
23 p4163 A69-41550

ELECTRONICS

- Physical electronics, discussing gas discharges, semiconductor devices, electron emission, noise in electronic devices and masers and lasers
05 p0735 A69-16666
- NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations
05 p0850 A69-16718
- Photoelectronic imaging systems in space exploration emphasizing acquisition time, storage capacity and transmission time
07 p1136 A69-19591
- Reliability in electronics - Conference, Budapest, October 1968, Volume A
08 p1321 A69-21098
- Reliability in electronics - Conference, Budapest, October 1968, Volume D
08 p1292 A69-21105
- Reliability in electronics - Conference, Budapest, October 1968, Volume B
08 p1293 A69-21111
- Advances in electronics and electron physics, Volume 25, covering linear ion accelerators, Hall effect, VLF propagation, thermionic cathodes and electron microscopy
09 p1469 A69-22696
- Cryogenic applications including maser amplification, IR detection and superconductivity, discussing systems optimization and cost reduction
10 p1665 A69-24017
- Space electronics, telemetry, antennas, computers - IEEE Conference, Cocoa Beach, Florida, November 1968
11 p1837 A69-25288

Astronautics - Conference Braunschweig, West Germany, October 1968, Volume 1, Flight control and electronics

12 p1217 A69-25870

Photoelectronic image devices, discussing detectors, electronography, Lallemand camera, spectracon and electron image multipliers

12 p2082 A69-26136

Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air

12 p2082 A69-26137

Electronics - Conference, Rome, March 1969

14 p2422 A69-29685

Quantum electronics, Volume 2, Maser amplifiers and oscillators

17 p2982 A69-33687

Aerospace electronics - IEEE Conference, Dayton, May 1969

17 p2939 A69-34056

Book on solid state electronics, discussing quantum mechanical approach, Fermi-Dirac statistics, electron theory of metals, semiconductors and magnetism

18 p3182 A69-34653

Soviet collection of papers on quantum electronics covering ruby laser actions, harmonic generation, laser outputs, etc

19 p3330 A69-35862

Soviet book on quantum electronics covering electronic devices, nonrelativistic quantum mechanics, radiation field and matter interaction, black body radiation spectra, etc

20 p3556 A69-38210

Book on electronics and electron physics covering electron beams, far IR radiation, electron microscopy, scintillation detectors and breakdown in solids

22 p3981 A69-40667

ELECTRONOGRAPHY

Thin CuAs selenide films by vacuum deposition, electronographic study proves cubic sphalerite phase existence

02 p0298 A69-12045

Electronographic determination of ternary alloys of germanium antimony tellurides noting hexagonal laminary with cell periods

02 p0298 A69-12046

Asymmetrical profiles of 4430 A interstellar absorption band, discussing stellar and electronographic spectra

10 p1781 A69-23676

Photoelectronic image devices, discussing detectors, electronography, Lallemand camera, spectracon and electron image multipliers

12 p2082 A69-26136

Magnetically focused electronographic image converters in far UV photography and spectroscopy in space astronomy applications

17 p2972 A69-33084

UBV photometry of faint stars, discussing photographic plate effect on accuracy, emulsion standardization and use of electronography

17 p3031 A69-33099

ELECTRONS

NT CONDUCTION ELECTRONS

NT FREE ELECTRONS

NT HIGH ENERGY ELECTRONS

NT HOT ELECTRONS

NT NEGATRONS

NT PHOTOELECTRONS

NT PI-ELECTRONS

NT POLARONS

Gravitational force measurement on electrons and positrons in free fall through vertical metal tubes at low temperatures

01 p0125 A69-10979

Solar X ray control of D layer based on Explorer 33 data, computing electron production rates due to typical X ray flux

03 p0500 A69-13224

Linear analysis of operation of multistage magnetron amplifiers using injected electron flux and stepwise varying dimensions of interaction space

03 p0407 A69-13977

Electron viscosity coefficient in weakly turbulent plasma in strong magnetic field, noting electrical and thermal conductivity

03 p0480 A69-14136

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays [IEEE Paper 3C-4]

07 p1135 A69-19198

Long lived streams of low energy solar electrons and protons and association with bright flares or solar active regions

07 p1206 A69-19249

Electron anomalous magnetic moment effect on nonlinear Lagrangian of electromagnetic field, deriving additional nonlinear corrective term

08 p1353 A69-19781

Trapped electron belts formation and storm time behavior assuming presence of bimodal diffusion from low energy source at magnetosphere outer edge

08 p1307 A69-20184

Components relationships in binary phase diagrams of IIIa and VIa transition metals on basis of electronic structure

08 p1331 A69-20191

Electron flux parameters determination from ionograms and reflected signal amplitudes between 120-130 km, considering electron collision frequencies

10 p1688 A69-23931

Two beam electron flux instability in crossed magnetic and inhomogeneous electric fields using linearized hydrodynamic and Lagrangian formalism approximation

12 p2133 A69-26714

Ionization processes in Seyfert galaxies, considering thermal electrons, superthermal protons and electrons and nonthermal UV radiation

13 p2346 A69-27710

Earth radiation belt data, discussing origin, density, distribution, etc, of protons, electrons and alpha particles

15 p2674 A69-30016

Aurora electron and proton excitation patterns determined spectroscopically, discussing ground based observations of emission geomagnetic latitude-time distribution

15 p2593 A69-30017

Phonons, electrons and protons in ferro-paramagnetics and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric properties

16 p2827 A69-32262

Auroral electrons measurement by rocket, discussing difficulties due to secondary electrons and method permitting primary electrons detection threshold determination as function of rocket position

16 p2785 A69-32617

Thermodynamic properties of hydrogen atoms, protons and electrons, using canonical group analysis to determine bound and free states

21 p3850 A69-38964

Diurnal variations of electron flux based on balloon observations near polar cap consistent with geomagnetic cut-off variations of magnetospheric models

22 p4005 A69-40511

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

22 p3965 A69-41116

ELECTROPHORESIS

Prototype system for continuous dielectrophoretic deposition and alignment of micron sized ultrahigh strength whisker reinforced composites

13 p2269 A69-28676

Dielectrophoretic zero gravity cryogenic liquid expulsion using lightweight high voltage ribbon electrode conduits and electrohydrodynamic bang-bang field effect

24 p4300 A69-43237

ELECTROPHOTOMETERS

Photoelectric photometry of Mercury, Venus, Mars, Jupiter and Saturn /1963-1965/, determining phase curves and monochromatic albedos

04 p0663 A69-15383

Photoelectric equipment for nephelometric simulation studies of light scattering by cloud particles

06 p0953 A69-17993

Absolute magnitudes and intrinsic color photoelectric observations of Wolf-Rayet stars in Magellanic Clouds and Galaxy

07 p1221 A69-19583

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars

09 p1590 A69-21381

Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters

09 p1602 A69-22216

Transistorized electrophotometer for polarimetric and photometric analysis of weak light fluxes, noting pulse amplifying and shaping circuits

11 p1884 A69-24735

Radioactive light sources in photoelectric photometry, analyzing characteristics, brightness and stability of light flux and energy spectrum

11 p1951 A69-25421

Plasma velocity measurement by Doppler shifts of spectral lines with photoelectric recording, using Fabry-Perot interferometer

12 p2079 A69-26021

Photoelectric recorder with timebase image converter tube for investigating ultrashort light pulse transient response of laser

12 p2083 A69-26139

Spectral reflectivity differences of selected dark and bright regions of Mars observed with double beam photometer

13 p2338 A69-27553

Photoelectric scanning of CH Cygni spectrum calibrated and compared with 45 Arietis, discussing high dispersion, excess blue and UV continua, H beta emission, etc

13 p2338 A69-27557

Photoelectric observations of blue light minima of U Geminorum variable Ex Hydrae indicating no change in orbital period

13 p2338 A69-27558

Photoelectric photometry of artificial satellites noting equipment, Pegasus satellite observations and light curves from Cosmos 151, 192 and 220

15 p2616 A69-31391

Photoelectric observations of color and titanium oxide in M7 giants in nuclear bulge of Galaxy compared with late giants near sun

16 p2863 A69-32396

Atmospheric extinction determined by monochromatic photometry in Chile in 3000 to 6000 A range, discussing components

17 p3031 A69-33100

UBV photoelectric investigation on southern globular clusters NGC 2808 and 1851, presenting star magnitudes and colors in tabular form and estimating reddening

18 p3190 A69-34290

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars

18 p3198 A69-34769

Astronomical data collection and evaluation, discussing digital distance measurement, photoelectric photometry, servocontrols and electronic computers suited for Schmidt telescope output

20 p3539 A69-37525

Automatic planetary electrophotometer designed for earth atmosphere and lunar photometry, noting operational data

20 p3547 A69-38310

Astronomical photoelectric photometry system, describing telescope and photometer, coldboxes, analog integrators, digital recording equipment and computer programs

24 p4318 A69-43805

ELECTROPHOTOMETRY

Rocket IR astronomy in support of big bang hypothesis, considering photoelectric detectors and instrument system

10 p1772 A69-22868

A and B stars near North Galactic Pole and with magnitudes from 5 to 14.5, noting photoelectric UBV and four color photometric measurements

10 p1773 A69-22963

Yellow and blue photoelectric observations of eclipsing binary CO Lac

10 p1775 A69-23202

Crab Nebula pulsar NP 0532 photoelectric spectrophotometry results, noting main pulse and interpulse spectral energy distributions similarity to extended synchrotron radiation

13 p2335 A69-27317

Photoelectric search for delta Scuti variables in Coma and NGC 752 clusters, discussing short period variability of B, A and F stars

13 p2343 A69-27620

Solar flares associated with intensive sodium D lines emission observed photoelectrically with telescope in unperturbed region, analyzing possibilities of comets solar origin

15 p2674 A69-30506

Photoelectric comet observation techniques, tabulating narrow and wideband filter combinations for determining parameter Q for various cometary spectral emissions

15 p2684 A69-30522

Photometry methods for spacecraft brightness in dynamical states of rapid spin and tumble

21 p3671 A69-38340

ELECTROPHYSICS

NT MOLECULAR ELECTRONICS

P-type zinc-tin-antimonide crystals electric conductivity, Hall coefficient and thermal EMF found similar to p-type diamond-like semiconductors properties
15 p2667 A69-30197

ELECTROPHYSIOLOGY

Tape recorder for simultaneous double channel recording of physiological experiments, describing circuit modifications and additional circuits
07 p1131 A69-18640

Graphical method for plotting electrophysiological observations, showing hodographs application in biopotential studies of cortical reactions
11 p1829 A69-24540

Peak amplitude selector for electrophysiological phenomena analysis, describing memory schemes, threshold crossing detectors and display, input and output circuits, timing, etc
15 p2612 A69-31266

Electrophysiological /electrospinalhogram/ medical data transmission via satellite from France to U.S. for real time computer processing
16 p2746 A69-32070

Soviet book on nervous mechanisms of vestibular reactions emphasizing mathematical description of operation, neurohythmic changes in cerebral cortex and oculomotor activity modeling
16 p2746 A69-32605

Electrophysiological data for directionally sensitive units in optic tectum of mammals, indicating midbrain as site for rotating spiral motion aftereffects
20 p3480 A69-38264

Visual retroactive perceptual masking effect in monkeys pretrained in visual discrimination task, interpreting electrical potentials recorded along optic pathways
22 p3876 A69-40265

Supraventricular arrhythmias after acute myocardial infarction, noting benefit of early DC shock
24 p4262 A69-42729

ELECTROPLATING

Graphite fiber electroplating with nickel on continuous basis for ribbon like continuous flexible twist free yarn
09 p1512 A69-22362

Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites
11 p1890 A69-24337

Plating wear resistant electrodeposits of Ag, Cu, Ni and Cr on Ti, noting adhesion tests
18 p3148 A69-34654

Electroplating method for local stress concentrations determination, discussing measurement techniques, metal fatigue failure prediction, etc
19 p3441 A69-36751

Soviet collection of papers on bright electrolytic coatings including physicochemical principles of deposition
22 p3958 A69-41261

Bright nickel plating, examining brighteners and anti-tipping additions effect on deposition mechanism
22 p3959 A69-41264

Bright cobalt plating electrolytic processes, examining brighteners and formation mechanism of deposits
22 p3959 A69-41265

ELECTROPLETHYSMOGRAPHY

Blood circulation in brain during acceleration analyzed by tensometric sensors and electroplethysmography, noting intracranial sensitivity to gravitational changes
06 p0874 A69-17646

ELECTROPOLISHING

Polishing-etching cell permitting continuous sample surface observation for use with inverted stage microscopes
13 p2281 A69-28156

Electrolytic and mechanical polishing techniques for metallographic specimens of beryllium
13 p2281 A69-28161

Automatic electropolisher for copper disks
21 p3720 A69-38597

ELECTRORETINOGRAPHY

Dark adaptation mechanisms studied from light intensity recovery after experimental flash, using electroretinography methods
10 p1647 A69-23588

Stiles-Crawford effect measurements before and following eye movements to determine retina shearing during eye movements
15 p2555 A69-31035

Local electroretinogram responses produced in cats by light intensity incremental changes
22 p3878 A69-40835

Electroretinogram a-wave relationship to early inhibition and excitation of retinal ganglion cells produced by flash superimposition in rabbits
22 p3878 A69-40836

Cat intraretinal DC component and b-wave separation based on sensitivity to visual stimuli, discussing electroretinogram recorded with microelectrodes
22 p3883 A69-40881

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina
22 p3883 A69-40882

Human electroretinogram /ERG/ physiological variations as function of stimulation energy and wavelength
22 p3884 A69-40884

Pigeon visual adaptation to flickering light, attributing ERG b-wave postadaptation rebound to retina bipolar cells inhibition
23 p4084 A69-41463

Rabbits long term reversible retinal function changes due to short high intensity light flashes, noting ERG suppression
23 p4084 A69-41468

Rhythmic wavelets electroretinogram recorded from rabbit retina in vitros preparation indicating dominant relatively low voltage waves compared to in vivos waves
23 p4101 A69-41471

Electroretinogram and visually evoked cortical potential as response potentials in human visual system
24 p4271 A69-42644

ELECTROSEISMIC EFFECT

U ELECTRIC CURRENT
U SEISMIC WAVES

ELECTROSLAG REFINING

Pitting corrosion resistance improvement in austenitic stainless steels with added molybdenum through electroslog resmelting
05 p0781 A69-16499

ELECTROSLAG WELDING

Welding methods used for Ti and Ti alloys and difficulties encountered
07 p1139 A69-18789

Electroslog welding using plasma jets with powdered material, discussing various parameters
08 p1321 A69-20766

Covered electrode, submerged arc, electroslog, gas metal arc, gas tungsten arc and plasma arc welding processes application to high strength steels
12 p2100 A69-25828

ELECTROSTATIC CHARGE

Electrostatic potential generated by rockets on space vehicles, noting source of electric current in exhaust plumes and effect on instrumentation
03 p0522 A69-13903

Aircraft instrumentation for measuring aircraft electrostatic charge, atmospheric electric field intensity and currents of aircraft
04 p0549 A69-15107

Aircraft charge measurements in stratus clouds, noting charge sign is independent of cloud space charge
04 p0549 A69-15108

Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential
09 p1593 A69-21655

Interfacial charges in MOS transistors determined as function of surface potential by measuring channel conductance as function of temperature
10 p1744 A69-23178

LF electrostatic oscillations of inhomogenous solid state plasma with small number of current carriers in parallel external electric and magnetic fields
15 p2665 A69-30042

Ion and electron fluxes and drag force dependence on electrostatic charge and velocity of interstellar dust particle
19 p3425 A69-36562

Steady state sunlit lunar surface electrostatic charge and potential distributions, noting electrons photoemission and solar wind particles collection
20 p3609 A69-38077

Electrostatic charge formations in atmosphere, discussing atmospheric electricity during precipitation and thunderstorms
21 p3758 A69-38785

ELECTROSTATIC ENGINES

Electrostatic electron bombardment ion thruster with magnetoelectrostatically contained plasma
[AIAA PAPER 69-260] 09 p1567 A69-21262

Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects
[AIAA PAPER 69-271] 09 p1569 A69-21874

Electric rocket propulsion, discussing roles of plasma and gas discharge physics in development of electromagnetic, electrostatic and thermoelectric nuclear systems
13 p2325 A69-28253

Nuclear rocket propulsion operation, design, properties and performance of electrostatic, electrothermal and electromagnetic systems
13 p2297 A69-28254

ELECTROSTATIC EROSION

U SPARK MACHINING

ELECTROSTATIC FIELDS

U ELECTRIC FIELDS

ELECTROSTATIC GYROSCOPES

Strapdown electrostatic aerospace navigator /SEAN/ using electrostatically suspended gyros /ESG/ for inertial reference, including drift and computer tests
19 p3369 A69-35802

ELECTROSTATIC PLASMA

U PLASMAS [PHYSICS]

ELECTROSTATIC PRECIPITATORS

Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields
21 p3707 A69-38490

ELECTROSTATIC PROBES

Wake structure behind spherical bodies in rarefied plasma flow by measuring plasma parameters and disturbances with probes
01 p0134 A69-11308

Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device
02 p0288 A69-12172

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method
02 p0292 A69-12556

Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F1 region
03 p0502 A69-14008

Multielectrode analyzers for measuring properties of ionospheric charged particles
05 p0761 A69-15702

Langmuir probe to determine helium plasma density effect on electron temperature from relation between spectral line intensities
05 p0804 A69-16376

Qualitative mechanisms to explain Langmuir paradox, discussing wall mechanism for Maxwellian distribution formation in low pressure discharges
06 p0960 A69-16922

Stagnation point electrostatic probe measurements of flowing partially ionized high density monatomic gases
06 p0964 A69-17196

Weakly ionized gas flow past discontinuous wall potential used to study edge effects and interaction problems for single and multiple flush electrostatic probes
[AIAA PAPER 69-80] 06 p0972 A69-18191

Space plasma potential measurement based on RF impedance of plasma sheath/probe system
07 p1130 A69-18300

Analytic integration of Langmuir equation for spherical space charge flow obtained in terms of Airy equation or Bessel functions solution
07 p1115 A69-18864

Spacecraft applications of Langmuir probes, obtaining data from current-voltage characteristics for electron/ion concentrations, ion mass spectra and charged particle energy distribution
08 p1316 A69-20474

Current fluctuations in Langmuir probe in turbulent plasma measured for various pressures, frequency bands, etc, noting plasma density fluctuations role
08 p1364 A69-20517

Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding potential curve to particle floating potential, kinetic temperature, etc
08 p1364 A69-20521

Moderately ionized plasma electrical conductivity calculated by generalized Ohm law and measured along with other plasma properties
[AIAA PAPER 69-277] 09 p1543 A69-21264

Electron density fluctuations in turbulent wakes of hypersonic projectiles in ballistic ranges, discussing use of cylindrical Langmuir probe for direct measurement
09 p1496 A69-21934

Electrostatic probe measurements in gas warmer than probe, demonstrating applicability of continuum theory for highly negative probe

11 p1930 A69-25274

Electrostatic charge distribution on ultrahigh vacuum cleaved silicates including instrumentation, UV irradiation, half life, Paschen relation, etc

13 p2322 A69-28018

I-V characteristics of electron emitting satellite in ionosphere, analyzing spherical Langmuir probe in collisionless plasma in magnetic field

14 p2511 A69-28956

Electrode surface bismuth coating selected for reducing electrostatic analyzers photocurrents

14 p2446 A69-29048

Spherical plate electrostatic analyzer transmission characteristics, emphasizing angular response to external particle sources as functions of angular coordinates and particle energy

14 p2449 A69-29560

Langmuir probe measurements leading to electron groups composition of electron velocity distribution function in negative glow light

14 p2493 A69-29694

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method

15 p2658 A69-30253

Electronic density of collisional cesium plasma, comparing measurements made by Langmuir and HF spherical probes

15 p2659 A69-30300

Flush electrostatic probe edge effect, considering Couette flow of weakly ionized compressible gas past discontinuous wall potential

15 p2653 A69-30912

Vaporization rates of Ti, Zr, Hf, Nb and Ta carbides at high temperatures measured by Langmuir method

15 p2640 A69-30983

Plasma parameters, except ion temperature, obtained from current-voltage characteristics of flowing plasma measured by electrostatic probes in low density wind tunnel

16 p2816 A69-31637

Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts

[AIAA PAPER 69-573]

16 p2840 A69-32677

Data distortion elimination by improved superimposing of sinusoidal audio frequency signal on DC voltage of automatic Langmuir probe second derivative plotters

17 p2970 A69-32855

Langmuir probe to determine space vehicle orientation in ionospheric or interplanetary plasma, discussing apparatus, accuracy and application

17 p3001 A69-33222

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties

[AIAA PAPER 69-698]

17 p3010 A69-33438

Surface type airborne electrostatic probes in ambipolar diffusion flux, measuring ion saturation current, discussing electrode contamination and temperature and ablation tests

[AIAA PAPER 69-700]

17 p2974 A69-33443

Shock structure in RF heated partially ionized Ar plasma jet, using cylindrical free molecule Langmuir probe

[AIAA PAPER 69-697]

17 p3011 A69-33466

Positive ion concentration in D region, using spherical stationary electrostatic probe in weakly ionized collision dominated gas

18 p3128 A69-34804

Plasma parameters relationship with double electrostatic probe volt-ampere characteristics, applying corrected formulas for temperature, ion density, etc, to flame diagnostics

18 p3137 A69-34932

Biased electrostatic probes determining free stream charge density and ionization risetime in supersonic flows in arc heated pressure driven shock tube

19 p3291 A69-35715

Electrostatic probes in nonequilibrium collision dominated ionized gas flow ballistic ranges

19 p3291 A69-35716

Electrostatic probes calibration and use for hypersonic wakes behind projectiles in ballistic range

19 p3291 A69-35717

Ion collecting cylindrical electrostatic probes as flow field tracing instruments in low density slightly ionized flows

19 p3291 A69-35718

Small continuum electrostatic probes calibration and operation in ionized plasma flow with sheath dimensions larger than boundary layer dimensions

19 p3304 A69-35719

High speed analog to digital multiple channel wide-band data acquisition system designed for short pulse Doppler radar and probe measurements

19 p3307 A69-35745

Spherical, cylindrical and toroidal electrostatic analyzers with symmetrical angular characteristics for solar wind investigations

19 p3396 A69-36632

Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density

20 p3544 A69-37876

Cylindrical electrostatic probe measurements on Alouette 2 and Explorer 31, considering implications for future missions

20 p3544 A69-37877

Langmuir plate and spherical ion probe experiments aboard Explorer 31, measuring concentrations and temperatures of thermal electrons and ions

20 p3545 A69-37881

Langmuir probe immersed in plasma RF response over range of signal amplitude and frequency and plasma electron density, showing sheath capacitance role

21 p3723 A69-38939

Anode fall measurements with Langmuir probe in coaxial arcs in Ar compared with anode energy balance values

24 p4256 A69-43695

ELECTROSTATIC PROPULSION ION PROPULSION

West German activity in field of electrostatic propulsion, discussing ion thrusters, colloid thruster development and mission analysis

09 p1565 A69-21248

Research and development program in annular slit colloid thruster technology, proving thruster feasibility by performance tests

[AIAA PAPER 69-287]

09 p1566 A69-21257

Electrostatic thrusters using RF ion sources to optimize payload ratios, terminal velocities, propellants, life span and efficiencies

09 p1568 A69-21489

Development and applications of ion propulsion covering electrostatic acceleration of particles, Cs contact and electron bombardment ion thrusters, space missions, etc

17 p3020 A69-33354

ELECTROSTATIC SHIELDING

Dipole shielding factor in coupled Hartree-Fock approximation for atomic S state

02 p0281 A69-12179

Electron shielding in heavily doped many valley semiconductors, discussing Thomas-Fermi screening and Mott transition

13 p2324 A69-28683

Electrostatic screening in isothermal symmetrically charged and quasi-neutral plasmas, noting confinement in electrostatic trap

14 p2490 A69-29035

Electrostatic control for portable clean rooms, describing fabrication, assembly and checkout problems with Instrument Unit (IU) control center for Saturn launch vehicles

19 p3428 A69-35550

ELECTROSTATIC WAVES

Ionospheric plasma electrostatic resonances from Alouette satellite signal observations

01 p0067 A69-10983

Electrostatic plasma wave instabilities in ionosphere along auroral field lines, noting critical electron flux and subsequent acceleration of electrons

01 p0075 A69-11222

Nonlinear large amplitude electrostatic and electromagnetic oscillations in cold plasma having one dimensional spatial variations and fixed neutralized ion background

02 p0288 A69-12171

Acceleration of charged particles in strong DC magnetic field by electrostatic waves with spatially varying phase velocities integrated numerically on IBM 360/65

03 p0479 A69-14028

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency

04 p0638 A69-15174

Electrostatic ionospheric waves excited around lower hybrid resonance frequency by high energy electrons

06 p0918 A69-17381

Electrostatic waves interaction to electrons in plasma characterized by bump-in-tail distribution function, deducing mechanism of wave particle interaction

06 p0966 A69-17521

Electrostatic waves in inhomogeneous plasma in finite magnetic field, noting dispersion relation for cold plasma and stabilization of instability

06 p0967 A69-17761

Longitudinal electrostatic oscillations in plasma with Fermi distribution of energies, noting oscillation frequency dependence on electron density

08 p1359 A69-19985

Ion cyclotron resonance acceleration and higher harmonic acceleration in axially nonuniformly magnetized plasma under influence of RF electric field

08 p1360 A69-20079

Numerical integration of motion equations of electrons subject to electrostatic waves, considering turbulent heating

08 p1368 A69-20806

Current instability in H plasma in electric field of large amplitude fast magnetosonic wave, noting plasma heating

09 p1552 A69-22526

Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations

10 p1727 A69-23092

One dimensional electrostatic plasma oscillations in alternating external electric field, noting plasma stability and electron-electron two stream instability

11 p1924 A69-24298

Electrostatic wave dispersion relation in uniformly rotating plasma cylinder used in interpreting Q machine experiments

11 p1924 A69-24300

HF electrostatic waves propagation in nonuniform plasma in uniform magnetic field, obtaining solutions of dispersion relation

11 p1931 A69-25360

HF electrostatic waves propagation excited by electron beam in hot inhomogeneous plasma in magnetic field, studying wave transformation and absorption

11 p1931 A69-25364

Electrostatic drift wave dissipative instability in framework of macroscopic theory, accounting for resistivity and viscosity using WKB method

11 p1934 A69-25655

Alternating electric field parametric effects on inhomogeneous plasma in magnetic field, obtaining electrostatic wave coupling dispersion relation by density gradients considerations

13 p2304 A69-27298

Ballistic wake structure and jump conditions for plane plasma shock waves with electrostatic turbulence

15 p2660 A69-30914

Critical study of Tidman model for turbulent electrostatic shock wave structure in plasmas, noting velocity distribution function role

15 p2661 A69-30927

Propagation and linear transformation of HF electrostatic waves in hot magnetoactive radially inhomogeneous plasma, noting wavelength shortening

16 p2816 A69-31638

Wave damping in current sheet in geomagnetic tail by radiating energy from sheet sides by electrostatic waves

[AFCRL-69-0396]

16 p2781 A69-32318

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency

18 p3180 A69-34716

Magnetospheric disturbances effect on radio wave propagation, discussing wave-particle interactions, VLF emissions and electrostatic waves

19 p3303 A69-36429

ELECTROSTATICS

Mixed boundary value problem of elastostatics for isotropic elastic cylinder containing strip crack opened by internal pressure, using auxiliary functions

01 p0167 A69-10317

Nonexistence of Biota-Cloud recontamination hazard for planetary lander proved by analysis of interactions between small particles and physical fields around vehicle

02 p1201 A69-11771

Electron flow in stable negative electrostatic potential well produced by electronic injection at center of hollow open spherical anode

03 p0475 A69-13153

Fiber optic electrostatically focused image intensifier tube for recording star spectra with reduced exposure time

[WERL-68-1C2-TAEC-P1]

04 p0603 A69-15444

Electrostatic storage display tube characteristics, construction, applications and reliability

07 p1101 A69-18655

Periodic electrostatic focusing structures in microwave tubes, evaluating properties by action function method
07 p1102 A69-18659

Shock-like solutions of electrostatic Vlasov and Poisson equations, assuming zero temperature of positive ions and increasing electrostatic potential
08 p1359 A69-19982

Atmospheric ion concentration increment by electrostatic lens to facilitate electrical properties measurements of charged particles in submicroscopic range
17 p2971 A69-32928

Electrostatically focused klystron /EFSK/ small signal gain calculations based on lens cell space charge wave analysis
18 p3109 A69-35294

Ionospheric VLF electrostatic noise observed by sounding rocket, noting proton gyrofrequency harmonics effects within emission attenuation bands
21 p3714 A69-38550

ELECTROSTRICTION

Kerr effect and electrostriction during self focusing of high power laser beam in gases and liquids
04 p0611 A69-14792

ELECTROTHERMAL ENGINES

NT ARC JET ENGINES
NT PLASMA ENGINES
NT RESISTOJET ENGINES

Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] 02 p0305 A69-12375

Performance analysis for electrothermal thruster using lithium propellant with supersonic heat addition
[AIAA PAPER 69-286] 09 p1567 A69-21267

Electric rocket propulsion, discussing roles of plasma and gas discharge physics in development of electromagnetic, electrostatic and thermoelectric nuclear systems
13 p3235 A69-28253

Nuclear rocket propulsion operation, design, properties and performance of electrostatic, electrothermal and electromagnetic systems
13 p2297 A69-28254

Fast heat-up electrothermal ammonia thruster role in development of hybrid resistojet in millipound thrust range
[AIAA PAPER 69-496] 16 p2838 A69-32649

Refractory metals in rocket propulsion devices, applying tungsten in uncooled rocket nozzles and tungsten and rhenium to electrothermal propulsion
23 p4177 A69-42161

ELEKTRON SATELLITES

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position
05 p0824 A69-16059

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position
20 p3606 A69-37969

ELEKTRON 4 SATELLITE

Elektron 4 satellite radio emission data transmitted from July to December 1964, noting month-to-month variations in mean radiation level
09 p1578 A69-21776

ELEMENT ABUNDANCE

U ABUNDANCE

ELEMENTARY EXCITATIONS

NT EXCITONS
NT MAGNONS
NT PHONON BEAMS
NT PHONONS
NT PLASMONS
NT POLARONS

Low field helicon wave transmission through n-type Ge at liquid He temperature, noting cyclotron resonance damping
02 p0295 A69-11787

Quasi-phonon model for acoustic scattering and diffraction from rigid real obstacle in fluid medium
05 p0797 A69-16649

ELEMENTARY PARTICLE INTERACTIONS

NT ELECTRON CAPTURE

Light tachyons, tachyon velocity and relation to gravitational quanta
02 p0282 A69-12746

Strong interactions at energies above 100 Gev, examining use of cosmic ray experiment for qualitative studies of interaction process
03 p0498 A69-12939

High energy cosmic ray research facility at mountain altitudes, noting nucleon-proton interactions, particle identification and momentum analysis
03 p0499 A69-12942

Field theories and direct interparticle action theories of classical electrodynamics, establishing general correspondence between formalisms
04 p0631 A69-15189

Upper limit estimated for anomalous interaction between cosmic muons with greater than 100 Bev energy
06 p0986 A69-17246

Weak interaction theory modifications needed for high energy cosmic ray muons to not violate conservation of probability
09 p1583 A69-22758

Book on stellar, galactic and nucleosynthetic evolution covering nuclear, Fermi, electromagnetic and gravitational interactions roles
11 p1964 A69-25413

Photoemulsion stacks irradiated by protons in magnetic field, determining nuclear isobar generation during quasi-nucleon interactions
13 p2303 A69-28373

ELEMENTARY PARTICLES

NT ALPHA PARTICLES
NT ANTINEUTRINOS
NT ANTINUCLEONS
NT ANTIPARTICLES
NT ANTIPROTONS
NT BARYONS
NT BETA PARTICLES
NT BOSONS
NT COLD NEUTRONS
NT CONDUCTION ELECTRONS
NT DEUTERONS
NT ELECTRONS
NT FAST NEUTRONS
NT FERMIONS
NT FREE ELECTRONS
NT HADRONS
NT HIGH ENERGY ELECTRONS
NT HOT ELECTRONS
NT HYPERONS
NT K-MESONS
NT KAONS
NT LEPTONS
NT LIGHT BEAMS
NT MESON RESONANCES
NT MESONS
NT MUONS
NT NEGATONS
NT NEUTRINOS
NT NEUTRONS
NT NUCLEONS
NT PHOTOELECTRONS
NT PHOTON BEAMS
NT PHOTONEUTRONS
NT PHOTONS
NT PI-ELECTRONS
NT PIONS
NT POLARONS
NT POSITRONS
NT PROTONS
NT QUARKS
NT SOLAR PROTONS
NT THERMAL NEUTRONS

Elementary particles and cosmic radiation, discussing current state of knowledge and observational techniques
02 p0307 A69-11907

Light tachyons, tachyon velocity and relation to gravitational quanta
02 p0282 A69-12746

Static formations in general theory of relativity and plankions
05 p0793 A69-15776

Cosmic rays, elementary particle physics and astrophysics - Conference, Aligarh, India, December 1967
06 p0986 A69-17268

Einstein space time concepts for unified formalism of matter interactions from elementary particles to astronomical bodies, discussing relativity theory
08 p1352 A69-20730

Universe origin, discussing big bang theory, effects of expansion time and temperature on elementary particles, RF quanta, etc
11 p1953 A69-24352

Validity of Lorentz invariance, discussing nuclear magnetic resonance test on torque for spin of electrons, muons and neutrons
18 p3176 A69-35007

Static formations in general theory of relativity and plankions
18 p3173 A69-35029

Cosmological constant and elementary particle theory
20 p3606 A69-38013

Unified theory of elementary particles assuming quantum mechanics as consequence of changes in time within microcosmos and particle-universe interaction
21 p3816 A69-39622

Magnetic monopole search using synchrotrons and cosmic radiation to destroy ferromagnetic materials binding in rocks, meteorites and deep sea sediments
22 p3981 A69-40197

ELEMENTS

Stellar abundance and origin of elements, discussing stellar atmospheres and gaseous nebulae spectral determination, chronology of galactic halo, etc
09 p1587 A69-21306

Quantitative separation of elements in gamma prime from precipitation hardened high temperature nickel-base alloys by anodic dissolution
13 p2277 A69-27408

Relative element abundances in Cyg, Her and Boo atmospheres, calculating curves of growth by Planck gradient method for stellar spectra
14 p2519 A69-29356

Nucleosynthesis based on stellar spectra and nuclear reactions data, discussing elements in sun and stars, meteorites, solar neutrinos, etc
14 p2529 A69-29985

Abundance compilations of elements due to nuclear processes, discussing carbonaceous chondrites character
21 p3789 A69-38812

ELEVATION ANGLE

Wavefront Wilkins-Minnis, null selection and elevation scanning techniques for measuring radio signals elevation angles with vertical antenna arrays
08 p1275 A69-20293

Mathematical expressions for measuring heights of vertical and nonvertical features with both slant and ground range radar images
13 p2263 A69-28198

Ground backscatter elevation angle recorded by phase comparison method, postulating ionospheric tilts to interpret data
20 p3535 A69-38188

ELEVATORS [CONTROL SURFACES]

Aerodynamic stick force and speed characteristics of various horizontal tails and elevator trimmers, noting zero stick force case
09 p1434 A69-22597

ELEVATORS [LIFTS]

Stress-strain state of shells of multicable elevator pulleys under asymmetric load for various friction coefficients and pulley shell lengths and widths
06 p1026 A69-18016

ELEVONS

Concorde elevons sandwich construction to meet sonic environment, discussing core, adhesive, design and fabrication
24 p4403 A69-43429

ELLIPSES

Hankel functions and vibration equations solutions, discussing asymptotic behavior and monotonic properties in neighborhood of ellipses
08 p1416 A69-20714

Elastohydrodynamic lubrication film thickness in finite elliptical contact determined by two dimensional Reynolds equation in inlet region, using finite difference approximation
[ASME PAPER 69-LUBS-17] 18 p3120 A69-34379

Visual ellipse phenomena excitation by sinusoidal stimulating currents, noting frequency effects on ellipse shape
23 p4095 A69-42077

ELLIPSOIDS

Earth oblateness, discussing geometric interpretation and direct measurement
01 p0064 A69-10447

Three body problem, discussing impossibility of libration points of gravitating ellipsoid
01 p0155 A69-10957

Stress-strain state of thin elliptical shell of revolution under rapidly varying cyclic edge loads
05 p0832 A69-15686

Circumferential buckling of ellipsoid of revolution due to internal pressure, assuming linear deflection and uniform thin shell
[ASME PAPER 68-WA/PVP-12] 05 p0840 A69-16190

Wall temperature and Mach number effect on heat flux distribution at spreading line of flow for supersonic gas on ellipsoid of revolution
06 p0858 A69-17331

Asymmetric supersonic air flow at 60 degree angle of attack past ellipsoid with frontal spike creating separation area
06 p0858 A69-17337

Mixed three dimensional separation of boundary layer on ellipsoid of revolution at ten degree angle of attack, ignoring heat flux
08 p1251 A69-19876

Morphology of E and SO galaxies in terms of equilibrium isopleths within general relativity
08 p1395 A69-20636

Aerodynamic forces causing deformation and breakup of liquid droplet with ellipsoid of revolution form in constant velocity gas flow
11 p1875 A69-25466

Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects
12 p2022 A69-26235

Coupling geodetic systems of coordinates linked to reference ellipsoids from determination of angle of inclination relative to earth rotation axis and equatorial plane
12 p2068 A69-26426

Residual field in inner airspace of magnetostatic shielding thin walled stretched ellipsoids of revolution
13 p2237 A69-28610

Close binary system components approximated by two nonsimilar ellipsoids, obtaining interpretation of light curves
15 p2695 A69-30957

Three dimensional periodic boundary layer on ellipsoid in harmonic motion at given angle of attack, using successive approximations
15 p2548 A69-31008

Geopotential represented in ellipsoidal harmonics, discussing Lamé functions generation and rectangular-ellipsoidal coordinates relation and orbital elements perturbations
15 p2599 A69-31333

Earth ellipsoid determination by satellite observations, noting accuracy of polar flattening measurement on basis of perturbation or perigee argument
18 p3131 A69-35195

H II regions radial velocities ellipsoidal distribution in M 33 explained as distribution with minor axis in direction of rotation
21 p3797 A69-38538

Inertial motions, equipotential surfaces and Coriolis forces on earth ellipsoid, discussing pendulum-like oscillations
24 p4346 A69-43156

ELLIPSOMETERS

Ellipsometric dimensions calculations with aid of laser radiation, stressing formulas for compensator and polarizer assemblies
15 p2636 A69-31474

Ellipsometric liquid immersion method for optical parameters determination of system with nonabsorbing surface film on absorbing substrate
24 p4316 A69-43321

Ellipsometer measurements for oxidation rates of binary Ti-Al alloys in vacuum and in pure and premixed gases, using in situ test cell
24 p4316 A69-43322

ELLIPTIC DIFFERENTIAL EQUATIONS

Differentiability of fundamental solution to elliptic equations based on exact theorems of smoothness
01 p0106 A69-10955

Upper semicontinuity of subsolutions of second order elliptic partial differential equations in divergence form with discontinuous coefficients
02 p0270 A69-11548

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space
02 p0272 A69-12221

Soviet book on linear and quasi-linear second order elliptic equations, emphasizing boundary value problems in various functional spaces
02 p0273 A69-12566

Dirichlet problem for degenerating elliptical equations with nonlinear low order terms
03 p0456 A69-13601

Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half plane and circle cases
03 p0456 A69-13602

Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem
03 p0456 A69-13603

Second order elliptical operator for m-dimensional Euclidian space with open region bounded by closed surface
03 p0456 A69-13604

Discretization error of Dirichlet problem analyzed in plane region with corners, discussing error in numerical solution of elliptic differential equations
03 p0457 A69-13741

Quantitative form of maximum principle for elliptic partial differential equations
03 p0457 A69-13826

Numerical solution of elliptic equations by iteration result in convergence prevention and solution of Laplace and Poisson equations with singular Laplace operator
04 p0625 A69-15133

Solution regularity for class of quasi-linear second order elliptic systems, applying results to regularity of extremals of particular integral
05 p0786 A69-15927

Asymptotic expansion of solution to linear singular perturbation problem of elliptic type in bounded strictly convex domain
05 p0786 A69-15928

Boundary value problems for second order degenerate elliptic equations, formulating and proving theorems for existence of generalized solutions
05 p0786 A69-16422

Boundary value problems for unstable quasi-linear elliptic differential operator class, proving theorems on properties of quasi-linear elliptic-parabolic equations in bounded space
05 p0787 A69-16424

N-dimensional analog of Fragmen-Lindelof theorem applied to solving partial differential elliptic equation
06 p0947 A69-17393

Elliptic equation solution of Dirichlet problem with zero boundary condition, examining dependence of modulus of continuity of solution on boundary properties
07 p1173 A69-18498

Dirichlet problem for nonuniformly second order elliptic quasi-linear equation for case of arbitrary coefficient growth
07 p1173 A69-18500

Existence and uniqueness of Dirichlet problem solutions for elliptic type equations with measurable and bounded coefficients
08 p1343 A69-20659

Singular perturbation problem for elliptic linear partial differential equation, studying asymptotic expansion of solution in vicinity of singular points in nonconvex domain
08 p1352 A69-20751

Difference schemes for approximating boundary value problems of elliptic equation free of mixed derivatives in rectangular region
09 p1532 A69-21788

Linear elliptic partial differential equations, deriving sufficient conditions on coefficients for equations to be oscillatory in certain unbounded domains
09 p1533 A69-22771

Boundary value problems solutions for quasi-linear elliptic and parabolic equations of arbitrary order applied to nonlinear differential equations
10 p1717 A69-22809

Scheme for choosing approximating system of difference equations for degenerate linear and nonlinear elliptic boundary value problems
10 p1719 A69-23515

Boundary value problem for elliptic-parabolic partial differential equations in theory of random processes, obtaining analytical solution in terms of hypergeometric functions
10 p1719 A69-23516

Factorization procedure for iterative solution of systems of algebraic equations from discretization of elliptic boundary value problems
10 p1719 A69-23520

Nonlinear A/x operators in reflexive Banach space Y characterized by weak closure of values, defining solvability conditions for equations having such operator
10 p1720 A69-23563

Elliptic equation of degenerating order in neighborhood of degeneration hyperplane, discussing solution behavior
11 p1908 A69-24696

Oscillation theorems for linear self adjoint elliptic equations of even order 2m, discussing proofs dependence on Swanson comparison theorem
11 p1909 A69-24882

Dynamic programming approach to numerical solution of elliptic boundary value problems, using Laplace equations
11 p1910 A69-25411

Dirichlet problem solution for Volterra elliptic integrodifferential equation, considering existence theorem hypotheses
12 p2121 A69-26468

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc
12 p2182 A69-26726

Dirichlet problem for elliptic second order differential equations with constant coefficients in region of Euclidean space of two real variables bounded by ellipses
12 p2123 A69-26728

Dirichlet problem of linear degenerate second order differential elliptic systems with independent variables
12 p2123 A69-26729

Elliptic second order equation showing nonequivalent regularity conditions for Laplace and continuous coefficient equations
13 p2288 A69-27743

Variational difference method application to second order elliptic equations with inhomogeneous boundary conditions, applying results to boundary value problems in elasticity theory
13 p2289 A69-28318

Pointwise estimate for gradient of solution of first boundary value problem /Dirichlet problem/ for second order elliptic equation
13 p2289 A69-28319

Algorithm for solving Dirichlet problem of nonlinear elliptical differential equations representing atmospheric dynamics balance equation
14 p2470 A69-29401

Monograph on Dirichlet problem for quasi-linear elliptic differential equations with many independent variables
14 p2471 A69-29599

Mixed boundary problem for elliptic equations with variable coefficients reduced to finite system of algebraic equations
16 p2804 A69-32062

Static implications of strong ellipticity condition in linearized elasticity theory, exemplifying homogeneous deformations
17 p3058 A69-33415

Convergence rate estimates for singular perturbations solutions of linear elliptic boundary value problems
19 p3360 A69-35899

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure
19 p3438 A69-36203

Large atmospheric motions analyzed by elliptic partial differential equation and hydrostatic and quasi-geostrophic approximations
19 p3364 A69-36504

Book on heat and mass transfer in recirculating flows, presenting elliptic differential equations and numerical solutions by computer
21 p3691 A69-38333

Partial difference methods from parabolic, elliptic and hyperbolic equations solved by splittings of locally one dimensional nature
21 p3754 A69-38745

Resistor network electric analog consisting of arithmetic units block, proposing procedure for elliptic equation solution
21 p3680 A69-39854

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space
23 p4182 A69-41972

ELLIPTIC FUNCTIONS

Nonlinear time dependent parameters systems, analyzing governing differential equations in terms of elliptic functions
01 p0050 A69-10237

Canonical forms for second order elliptic systems with constant coefficients, studying Dirichlet problem solvability for systems reduced to canonical forms
07 p1174 A69-19476

Sobolev type boundary value problems for elliptic operators using manifold theory
08 p1344 A69-21157

Equal element elliptic function filters, noting lower dissipation loss when applied to bandpass and bandstop filters
08 p1300 A69-21175

- Elliptic complexes over compact manifolds without boundary, discussing general theory of elliptic operators in vector bundles
09 p1532 A69-21733
- Higher order Rayleigh-Ritz approximations to eigenvalues and eigenfunctions of elliptic boundary value problem
09 p1534 A69-22798
- Generalized solutions of elliptic boundary value problems by applying Green functions
10 p1718 A69-23207
- Elliptic integrals to determine orbital elements time dependence in three body problem, estimating satellite lifetime
10 p1791 A69-24196
- Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations
11 p1908 A69-24534
- Elliptic boundary value problem for differential equation and pseudodifferential boundary conditions, obtaining Green formula from formulated conjugate problem
12 p2121 A69-26200
- Homeomorphism theorem for Petrovskii and homogeneous elliptic systems applied to boundary value problems and Green formula
13 p2287 A69-27515
- Density distribution in axisymmetrical gravitating systems with ellipsoidal velocity distribution function, using integral equation of state for effective radii of cylindrical configurations
14 p2486 A69-29465
- Applied function theory, Volume 6, Tables of theta functions and elliptical functions with examples, Part 1
14 p2471 A69-29774
- Sobolev type boundary value problems for elliptic operators using manifold theory
15 p2645 A69-31250
- Stepped digital narrow band pass microwave elliptic function filters design and construction
16 p2759 A69-31939
- Generalized solutions of elliptic boundary value problems by applying Green functions
21 p3756 A69-39148
- Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations
21 p3756 A69-39151

ELLIPTICAL CYLINDERS

- Elliptic cylindrical chambers optimum design for optical pumping of solid state lasers, discussing transfer efficiency and approximation by circular cylindrical chambers
10 p1706 A69-24010
- Radiation fields induced by constant current in elliptic ring, discussing analysis results applicability to elliptic capacitive antennas and annular slot
11 p1850 A69-24981
- Radiation field patterns from metal wall aperture in waveguide with rectangular cross section determined using elliptic cylinder
11 p1850 A69-24982
- Channel wall effect on gain of apparent mass of cylindrical and elliptical bodies floating in channel and subject to vertical impact
11 p1875 A69-25487
- Steady state problems of elastic orthotropic cylinder solutions applicable to boundary value problems of laminar orthotropic elliptical cylinders
13 p2369 A69-28528
- Unsteady heat conduction equations for elliptic cylinder with convection solved by point matching
16 p2879 A69-32171
- Stationary elliptic cylinders in subcritical flow, determining Strouhal number, pressure fluctuations and wake geometry as functions of angle of attack
18 p3084 A69-34412

ELLIPTICAL ORBITS

- NT INTERPLANETARY TRANSFER ORBITS
- NT PERIHELIONS
- NT TRANSFER ORBITS
- Stability of elliptical Venus orbits with solar gravitational perturbations, using equation accuracy and influence on mission planning
02 p0331 A69-12819
- Release windows for auxiliary body ejection from satellite in eccentric orbit, discussing visibility, celestial body interference, etc
03 p0505 A69-13003
- Rendezvous maneuvers for vehicle and elliptically orbiting targets, formulating relative motion of two bodies
04 p0658 A69-14828

- Roll dynamics of spinning axisymmetric satellite in elliptical orbit, discussing eccentricity and gravity gradient torque effect
05 p0830 A69-16397
- Molniya 1 communication satellite using elliptical orbit to provide radio, telephone and TV service [UN PAPER 68-95771]
06 p1013 A69-17044
- Braking and acceleration speeds and maximum magnitude during transfer from circular orbit having earth center as focus to elliptical orbit within circular orbit
06 p1007 A69-17578
- Rendezvous maneuvers for fixed elliptical target orbit, discussing numerical solution of problem and suitability of various points of target ellipse for rendezvous
09 p1538 A69-21649
- Earth gravitational field effect on satellite orbits, noting elliptical motion in central force field, energy criteria and rotational ratios
10 p1776 A69-23295
- Perturbing body influence on motion near triangular Lagrangian solutions of restricted elliptical three body problem applied to earth-moon system under solar perturbations
10 p1779 A69-23612
- Relation between planets axial moments and protoplanetary particles orbital eccentricity as explanation of outward winding of planets
12 p2154 A69-25818
- Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions
14 p2534 A69-29318
- Provisional elliptic orbit computed for asteroid Floirac using Gauss-Encke and least squares method, tabulating residuals and ephemeris
14 p2521 A69-29585
- Discrepancy between Kepler first two laws and corresponding Newton propositions, noting necessary substitution of ovals for elliptical orbits
15 p2695 A69-31011
- Optimal rendezvous maneuver of pursuing vehicle with minimum fuel expenditure in approach stage on elliptic and hyperbolic orbits
15 p2701 A69-31548
- Equatorial moderately elliptical satellite orbit perturbations calculated in local invariants, assuming state vector dependence of acceleration
17 p3039 A69-33796
- Orbit computation by means of predictor-corrector algorithms based on nonpolynomial functions, including numerical results for two body elliptic motion
19 p3397 A69-35611
- Optimal fuel transfers between coplanar and noncoplanar coaxial elliptical orbits determined by Pontryagin maximum principle, using digital program for Hamiltonian equations solutions
19 p3399 A69-35670
- Minimum impulse transfer between circular and nearby noncoplanar elliptic orbit, applying Pontryagin principle
19 p3400 A69-35675
- Stability of periodic orbits in elliptic restricted three body problem [AAS PAPER 68-086]
20 p3595 A69-37172
- Time-independent feedback attitude control system for high accuracy earth pointing motion of stable and unstable satellites in elliptic orbits
21 p3804 A69-39020
- Daily communication link geometry between spacecraft in elliptical orbit and landed capsule, establishing spacecraft visibility contours for landing site latitude [AAS PAPER 68-110]
21 p3805 A69-39223
- Recurrence formulas for calculating Fourier expansions in elliptic motion in terms of eccentric and mean anomaly [AIAA PAPER 69-910]
21 p3807 A69-39342
- Gravity gradient perturbing torque cast in terms of perturbing Hamiltonian, deriving long term changes in rotational motion of tumbling triaxial satellite in elliptical orbit [AIAA PAPER 69-922]
21 p3821 A69-39353

ELLIPTICAL POLARIZATION

- Frequency discrimination characteristics of elliptically polarized dual polarization gas laser, discussing intensity crossover phenomenon and frequency stabilization application [IEEE PAPER P-5]
07 p1153 A69-19074
- Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
09 p1453 A69-21527
- Elliptical polarization in ultrabroadband YIG pulse compression networks, using reflections at rod faces
13 p2230 A69-27680

- Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
16 p2754 A69-32522
- Singular electromagnetic field rectilinear and elliptical polarization in general relativity, calculating light plane rotation in Schwarzschild space
20 p3576 A69-37431
- Polarization ellipse orientation at source from Faraday fringes on Jupiter decametric radio bursts swept frequency records
20 p3594 A69-38169
- Poincare sphere properties representing birefringent behavior of materials and qualitative measurement technique for elliptically polarized light
21 p3844 A69-39318
- Statistical analysis of random production errors on phasing section polarization field of antenna with elliptical polarization
23 p4125 A69-42041

ELLIPTICITY

- Ellipticity of trajectory of free motions of pole of revolution of earth, using harmonic analysis of motion amplitudes and phases
06 p0919 A69-17536
- Photometric over dynamical ellipticity excess attributed to gravitational darkening in eclipsing binaries of W Ursae Majoris type
10 p1776 A69-23217
- Plane stress solution for stresses due to concentrated couple acting at any point on elliptic plate with fixed edge
15 p2712 A69-31014
- Rapid orbit prediction method for planning satellite observation programs, considering oblateness and radiation pressure effects
15 p2697 A69-31310

ELONGATION

- Surfaces role in superplasticity, demonstrating rate of neck growth dependence on surface irregularities
03 p0449 A69-13879
- Elongational viscosity coefficient determined from tensile measurements of materials under applied stress
10 p1681 A69-23976
- Stress-strain relation in crystalline media for pure tension and elongation epsilon several times conventional elastic limit, verifying by testing Al alloy [ONERA-TP-695]
11 p1975 A69-24754
- Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics
14 p2464 A69-29322

EMANATION

U EMISSION

EMBEDDING

- Necessary and sufficient conditions for Einstein spaces of second embedding class
06 p0957 A69-17547
- Direct epoxy embedding of monolayer cells cultured on millipore filter and fixed, dehydrated and microscoped before immersion
10 p1649 A69-23404
- Strain gage embedding techniques and applications
21 p3725 A69-39327

EMBOLISMS

- Decompression gas emboli detection while moving in flow streams of arteries and veins using ultrasonic Doppler shift principle and square-wave electromagnetic flowmeter
21 p3663 A69-38914
- Ultrasonic Doppler flowmeter for detection of circulating gas emboli of animal blood vessels during decompression
21 p3663 A69-38915
- Intravascular gas emboli literature critique covering early nonclinical decompression experiments, clinical use of intravenous gas emboli, etc
21 p3655 A69-38916

EMBRITTELEMENT

- High pressure hydrogen environment on tensile properties of stainless steel with and without strain induced martensite
01 p0093 A69-10062
- Welding with aluminum-zinc-magnesium alloys, discussing stress corrosion, embrittlement, compositions, heat treatment, material production and fabrication
02 p0266 A69-12063
- Liquid metal adsorption induced embrittlement, noting bond strength reduction and grain boundaries penetration
03 p0448 A69-13872

Hydrogen effect on interatomic bonds of Ti beta alloy and Young modulus, noting measurements at various temperatures

04 p0618 A69-15178

Metals hydrogen embrittlement theory, discussing role of dynamic strain aging hypothesis in overcoming theory defects

09 p1523 A69-21849

Pressure vessel design to alleviate hydrogen embrittlement of steels for shock tunnel drivers [AIAA PAPER 68-367]

09 p1477 A69-21993

Nb H alloys embrittlement, discussing hydride formation and resistance variation with temperature

10 p1707 A69-22989

Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction

10 p1713 A69-23823

Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation

12 p2114 A69-26495

Hydrogen embrittlement of stainless steel and effects on mechanical properties, discussing martensitic phase role

12 p2115 A69-26616

Sigma phase and temperature effects on toughness of austenitic stainless steel weldments

18 p3150 A69-35429

Hydrogen effect on embrittlement of Cr-Ni stainless steel from viewpoint of corrosion cracking, using reverse bending apparatus

19 p3358 A69-35774

Ti-Al alloys yield and fracture characteristics as function of high exposure temperatures, studying causes of embrittlement

19 p3344 A69-35927

Hydrogen embrittlement mechanism in steel based on modified pressure theory, discussing crack propagation mechanisms and stress corrosion cracking

19 p3350 A69-36894

EMBRYOLOGY

Weightlessness effects on fertilized frog egg development on board Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogenesis

01 p0017 A69-11084

EMERALD

U BERYL

EMERGENCY LIFE SUSTAINING SYSTEMS

Physiological approach to tests and evaluation of aviation survival equipment, noting human reactions study under extreme conditions

06 p0877 A69-16953

Automatic inflators for life jackets and survival gear in emergencies activated after submersion in water

06 p0877 A69-16955

Small column insulated delay /SCID/ aircraft seat ejection systems, illustrating weight saving

06 p0877 A69-16957

Survival of aircrew after successful ejection over water and boarding life raft

06 p0878 A69-16958

FAA regulations for improvements on crashworthiness and emergency evacuation from viewpoint of plastic applications and fire safety in aircraft

08 p1254 A69-20497

Emergency escape and personnel recovery systems including F-111 explosive system, midair deployed buoyancy aerostat and fly-away flexible wing rotor

15 p2551 A69-30853

Gangrene and caisson disease due to diving accidents, discussing emergency treatment with hyperbaric oxygen

17 p2911 A69-33775

Aircrew Arctic survival situation simulation experiments with survivors staying close to aircraft and walking across difficult terrain from emergency location

23 p4088 A69-41810

NT TYPE 5 BURSTS
NT X RAY FLUORESCENCE

Emission and diffusion theories of metal-semiconductor contacts for describing current characteristics of abrupt isotype nGe-nGaAs heterojunction

11 p1938 A69-25115

Radiation absorption and emission problem for material of unit density at rest solved by finite difference scheme

21 p3773 A69-39666

EMISSION SPECTRA

IR emission in NGC 7027 spectrum and role of discrete line emissions, discussing magnetic dipole transitions, temperature and density

01 p0148 A69-10051

GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods

01 p0137 A69-10259

Adsorbed gas influence on X ray emission from exploding tungsten wires noting ungassed and degassed specimens in vacuum

01 p0118 A69-10668

Red shift pattern in quasar emission spectra consistent with fractional screening charges on emitting atom nuclei

01 p0153 A69-10855

Europium complexes high resolution emission spectra in relation to molecular configuration

01 p0024 A69-10893

Free bounded continuum processes effect in nonequilibrium gases of finite continuous opacity, noting curves of growth for finite plane parallel layer emission lines

01 p0121 A69-10959

Auroral emission rates and heating effects as function of altitudes

02 p0235 A69-11426

Polarization of nightglow, line vs continuum

02 p0235 A69-11428

Ebert spectrometric experiment during Mars flyby aimed at detecting upper atmosphere atoms, ions and molecules in 1100-4300 angstrom spectral range [AAS PAPER 68-184]

02 p0311 A69-11469

Ionized metals emission lines intensity in chromosphere observed with coronagraph, determining hydrogen concentration

02 p0314 A69-11635

Absorption and emission redshift distribution in quasars, N systems and similar compact and radio galaxies

02 p0325 A69-12591

Temperature dependence of electron beam pumped GaAs laser threshold current density and emission spectra, noting doping effects

02 p0260 A69-12683

Spectrophotometric studies of planetary NGC 6543 gaseous nebula, measuring emission line intensities, electron density and temperature [ARL-68-0200]

02 p0327 A69-12708

Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz

03 p0500 A69-13080

Interstellar gas masers account for properties of 18 cm emission lines from OH molecules

03 p0511 A69-13465

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission

03 p0488 A69-13887

Diurnal variations of low latitude VLF emissions observed at Hiraio, Japan

03 p0398 A69-13900

GaAs diode laser short wave emission, discussing coherent radiation and photon energy

03 p0441 A69-14165

Epitaxial n-GaAs photoluminescence obtained from p-GaAs, considering emission intensity

03 p0492 A69-14167

Luminescence spectra due to radiative recombination of optically injected carriers in Co 60 gamma ray and neutron irradiated Si at low temperature

03 p0494 A69-14243

Microwave excited argon discharge emission spectrum analysis, suggesting possible laser action in microwave discharges

04 p0609 A69-14346

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition

04 p0610 A69-14383

Cathodoluminescence of n-type GaAs with various carrier concentration bombarded with 24-keV electrons, studying emission spectrum for radiative transition

04 p0639 A69-14436

Gas laser generation frequency control by emission absorption saturation effect, inserting neon filled emission absorbing cell into resonator

04 p0611 A69-14550

Radio emission spectra of radio galaxies from 3CR catalog

04 p0661 A69-15234

Emission lines structure in quasar spectra, analyzing problem of weak absorption lines identification

04 p0662 A69-15236

Coronal X ray emission near limbs in 16-40 A during solar eclipse

04 p0650 A69-15531

Emission cross sections of first negative band system of nitrogen under electron impact excitation

05 p0795 A69-15617

Parameters and relative errors tabulated from IR spectral emittance of Mo, Nb, Zr and Ta near 1400 K

05 p0846 A69-15903

Frequency and polarization selection of neodymium glass laser oscillators by directing secondary radiation into laser cavity and duplicating spectral properties [IEEE PAPER P-3]

05 p0775 A69-16324

Continuous emission spectrum and continuous plasma absorption spectral coefficients for optically dense quasi-steady state electrical discharge plasma in sulfur capillary

06 p0964 A69-17251

Lasing threshold and spectral characteristics of organic dye solutions, using excitation of second harmonic of monopulse ruby laser

06 p0933 A69-17255

Identification of emission lines from 3200 to 7000 A in Eta Carinae spectrum, noting P Cygni-like absorption lines

06 p1002 A69-17263

Mass motion in solar flares, discussing loop flares from emission line profile characteristics

06 p0993 A69-17429

Mass motions in flares and moustaches indicated by spectral features, discussing red asymmetry of line emission

06 p0994 A69-17432

Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics

06 p0936 A69-17901

Emission line profiles in spherical atmosphere expanding with constant radial velocity computed by Monte Carlo methods

06 p1009 A69-17965

Semiconductor lasers, discussing electron transitions, radiative band-band transitions, emission and absorption spectra, recombination rates, carrier lifetime and lasing conditions

06 p0937 A69-18009

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies

07 p1148 A69-18803

Radio telescope survey of intense emission regions along galactic plane, considering antenna temperatures, spectrum and steps of observed emission

07 p1216 A69-19138

Induced emission cross section of neodymium glass laser in quasi-steady mode measured as function of rod section, mirror reflectivity and output

07 p1156 A69-19161

Band profiles and emission spectra of shock heated AlO compared for self absorption of blue-green system, discussing electronic transition moment

07 p1184 A69-19163

Absorption and emission spectra of ruthenium 2 complexes dissolved in rigid glasses, discussing crystal field theory and luminescence

07 p1200 A69-19219

- Spectrum data of Nova Vulpeculae /1968/ summarized concerning dispersion figures
07 p1220 A69-19337
- Ligand field transitions in tertiary phosphine and arsine complexes of ruthenium and osmium
07 p1075 A69-19483
- Emission spectrum analysis of faint solar prominences noting kinetic temperature, turbulent velocity and electron density
07 p1210 A69-19718
- UV emission spectrum of double star Boss 1985, excitation potential effect on Fe II lines and table identifying emission lines
08 p1385 A69-20060
- Absolute excitation cross sections for emission of second positive bands of nitrogen under electron impact
08 p1355 A69-20208
- Carbon dioxide absorption and emission in mesosphere, discussing vibrational relaxation time and radiative heating rate
08 p1308 A69-20308
- Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium difluoride crystal, noting spectrum shift with increasing crystal temperature
08 p1326 A69-20544
- Neutral hydrogen asymmetry in Galaxy M101 as evidence for tidal effects due to nearby companions, noting hydrogen emission spectra
08 p1394 A69-20625
- Color index and mean light curves constructed for Cepheid Variables
08 p1395 A69-20635
- Laser rubies emission characteristics operating at different temperatures in common resonator, studying kinetics for pumping powers
08 p1327 A69-21076
- Emission line galaxy NGC 5253, discussing radial velocity, line width and excitation and similarity to Seyfert galaxies
08 p1407 A69-21132
- Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate
08 p1328 A69-21185
- Luminescence spectra of molecular gases excited by fast electrons in infrared spectral region, noting H alpha line
09 p1590 A69-21382
- OH emission source in constellation Canis Major discovered with interferometer in October 1968, noting nearby IR object
09 p1591 A69-21448
- Detection of micron Ne emission line from planetary nebula IC 418 using IR spectrometer
09 p1591 A69-21452
- Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
09 p1485 A69-21533
- Emission spectra of BaO during barium release compared with computed spectra for upper atmosphere temperatures evaluation
09 p1488 A69-21664
- Frequency fluctuations in mode coupled gas laser used to determine natural emission line width
09 p1516 A69-21670
- VLF emissions intensity and spectra variations compared with energetic electron fluxes variations during magnetosphere storm periods
09 p1488 A69-21698
- Hydrogen beta emission profiles for pole-on type Be stars, measuring stellar rotational velocity by Huang-Struve method
09 p1596 A69-22052
- Hydrogen alpha emission nebulae catalog in western half of Cygnus X region, obtaining interstellar absorption from nebular distances determination
09 p1596 A69-22053
- Further microwave emission lines and ammonia clouds in Sagittarius region, tabulating relevant transitions in ammonia and water
09 p1597 A69-22150
- Outstanding solar type 4 radio burst from spectrographic records at metric and decametric wavelengths from Weissenau Observatory
09 p1578 A69-22157
- Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics
09 p1578 A69-22168
- Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions
09 p1578 A69-22169
- Red shifts of radio sources obtained with Carnegie image tube spectrograph, noting quasi-stellar objects and galaxies
09 p1602 A69-22224
- Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
09 p1580 A69-22231
- Ratio of volume emission rates of 5577 A and band of positive N molecular ion first negative system for use in auroral observations
09 p1491 A69-22607
- GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods
09 p1559 A69-22652
- IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder
10 p1778 A69-23414
- IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves
10 p1746 A69-23565
- Laser emission lines produced by pulsed electrical discharge through ammonia
10 p1704 A69-23666
- Simultaneous photometric observations of coronal emission lines during July 1966 solar proton flare plotted on synoptic charts
10 p1763 A69-23731
- Auroral H beta intensities determined from photographs by image intensifier, describing equipment and data reduction method
10 p1684 A69-23824
- Nuclear sizes, emission line widths and densities in Sc galaxy M 51 and Seyfert galaxy NGC 4151, noting similarities and difference between nuclei
10 p1785 A69-24089
- Spectra of low energy X ray source at position of Large Magellanic Cloud, noting flux
10 p1770 A69-24093
- Models for emission line region of 3C 273, considering ionization distributions for estimation of relative abundances
10 p1790 A69-24137
- Tunable Fabry-Perot interferometer for photoelectric measurements of absorption and emission line contours and line center particle concentrations
10 p1698 A69-24212
- UV, visible and near IR spectral characteristics of hydrocarbon-air flames with particulate Al, Mg and B, noting hot metal continuum and oxide emissions
11 p1940 A69-24483
- Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks
11 p1958 A69-24591
- B star HD 191980 spectral variations from B-3 to B-8 noting helium to carbon line intensity ratio, interstellar D line strength and radial velocity measurements
11 p1958 A69-24594
- Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions
11 p1894 A69-24618
- Hydroxyl microwave emission sources in Cygnus not connected with continuum emission
11 p1964 A69-25403
- Magnetic fields, green corona emission and filaments relationship at high solar latitudes using synoptic charts
11 p1964 A69-25416
- Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase
11 p1964 A69-25417
- Free emission spectrum analysis of ruby laser with external mirrors and elimination of axial mode discrimination
11 p1900 A69-25547
- Recombination emission spectrum relation to plasma recombination coefficient, determining plasma electron temperature from continuous spectrum intensity
11 p1934 A69-25566
- Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission
11 p1939 A69-25688
- Spectral brightness temperature of shock waves in air measured at 220-800 nm, obtaining 9-14 km/sec shock waves by detonating explosives
11 p1877 A69-25755
- Emission spectrum of ruby laser as function of relative orientation of resonator and active crystal axes, noting spectrum width
12 p2104 A69-26029
- Emission from solutions of organic luminophores excited by harmonics of Q switched neodymium laser
12 p2104 A69-26030
- Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N and O
12 p2107 A69-26330
- H alpha line photograph in M 82 spectra, giving equivalent radiating area and total ionized hydrogen mass
12 p2171 A69-27067
- Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes
12 p2172 A69-27158
- Spectrum analysis of radio galaxy M82 nucleus, noting H alpha emission lines from analysis of IR photograph
13 p2335 A69-27310
- Scorpius XR-1 X ray emission spectra, discussing Fe emission line near 7 keV plasma models, supernova mass and cosmic abundance
13 p2325 A69-27313
- Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
13 p2271 A69-27534
- NGC 4194 galaxy emission line spectrum analysis showing presence of highly excited gas in nucleus and in bright central region similar to NGC 7714
13 p2339 A69-27571
- Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores
13 p2340 A69-27579
- Radio emission from high level transitions in hydrogen calculated by superposing emission lines on background continuum, using Gaunt factor for free-free emission
13 p2327 A69-27596
- IR extragalactic radio sources including normal radio galaxies, quasars and Seyfert galaxies
13 p2342 A69-27597
- Ruby and neodymium glass traveling wave laser free generation spectra kinetics, noting mode transitions as function of pumping levels
13 p2271 A69-27655
- Markarian galaxies with strong UV continuum, observing emission lines differing from each other
13 p2351 A69-27866
- Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures
13 p2271 A69-27888
- Single frequency ruby laser emission spectrum coincidence with interacting laser radiation at instant of Q switching
13 p2272 A69-27911
- CW lasers based on composite yttrium fluoride type crystals, noting large number of intense emission bands
13 p2273 A69-28316
- HF emission spectra of radio pulses from cosmic ray showers confirming Dublin group observations
13 p2333 A69-28471
- Intratomic collisions effect on multimode He-Ne lasers output power and spectral composition
14 p2456 A69-28756
- Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz
14 p2509 A69-28762
- Rocket observations of Lyman alpha anisotropic galactic radiation, noting distribution of neutral interstellar hydrogen near sun
14 p2516 A69-28952
- Weak superconducting contacts volt-ampere characteristics current steps and emission spectra, showing singularities due to superconducting current nonharmonicity
14 p2504 A69-28994
- Blue continuum emission from hot carbon dioxide measured in shock tube, discussing applications to temperature measurement of gases containing carbon dioxide
14 p2427 A69-29014
- Solar cosmic ray flare of 28 January 1967 observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary
14 p2513 A69-29066
- Galactic OH emission sources time variations found in W49 and W75
14 p2517 A69-29085

Pulsars dynamic spectra, suggesting inadequacy of interstellar scintillation models to explain observed dependence of decorrelation band widths on frequency
14 p2517 A69-29087

Interstellar gas radio and optical spectral lines of neutral H compared with Ca and neutral Na, discussing critically low velocity gas distribution
14 p2519 A69-29135

CdS crystals emission spectrum during two photon excitation by ruby laser, noting dependence on pump power
14 p2458 A69-29167

Emission spectrum width of solid state lasers as function of temperature, investigating effects of active medium parameters, pumping and cavity
14 p2459 A69-29389

Late type stars with emission peak wavelength approximating graphite Debye frequency induced by graphite impurity atoms
14 p2521 A69-29586

High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities
14 p2496 A69-29784

Emissivity of two photons decay from metastable 2s level of pure hydrogen gaseous nebula, noting radiative and collisional excitation
14 p2529 A69-29975

Airglow research, discussing emission features, observation methods and instruments, ground station network, etc
15 p2594 A69-30020

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory
15 p2633 A69-30121

Molecular benzene emission spectra excited by electron beams in RF modulated source, tabulating lifetime measurements
15 p2562 A69-30468

Solar flares associated with intensive sodium D lines emission observed photoelectrically with telescope in unperturbed region, analyzing possibilities of comets solar origin
15 p2674 A69-30506

Spectral emission of active prominences, showing looplike lines during quiet phases and differences in turbulent velocities magnitude
15 p2674 A69-30510

Photoelectric comet observation techniques, tabulating narrow and wideband filter combinations for determining parameter Q for various cometary spectral emissions
15 p2684 A69-30522

Neutron star atmosphere and X ray emission spectrum, computing incident protons mean free path for two assumptions
15 p2686 A69-30535

Neutral hydrogen in dark dust clouds in 21 cm line, showing hydrogen excesses and deficiencies
15 p2691 A69-30763

Transition probabilities for radiative lifetime of Swan and Mulliken diatomic C bands calculated from lifetime data using Franck-Condon factors
15 p2694 A69-30789

Unsaturable frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum
15 p2635 A69-30967

Atmospheric hydrogen and helium atoms emission in geomagnetic poles and winter hemisphere, comparing thermal dissipation and migration of light atoms
15 p2599 A69-31322

IR horizon of earth from ionospheric IR emission spectra obtained by sounding capsule, discussing earth geometric horizon and particular spectral bands [ONERA-TP-709]
15 p2601 A69-31370

Balmer alpha emission for abundance and distribution of hydrogen around earth, relating temporal variations to azimuth
15 p2700 A69-31437

Supernovae spectra observation suggesting tracing as broad band interstellar absorption rather than emission features on continuum
15 p2701 A69-31534

Optical and electrical properties of electroluminescent diffused gallium arsenide phosphide diodes with low donor concentrations, analyzing spectral emission and fabrication effects
16 p2758 A69-31699

Spectral characteristics of B stars group, reviewing causes of spectral line profile deformation
16 p2855 A69-31828

Intensity and rotational temperature seasonal variations of hydroxyl emission at different latitudes in upper atmosphere
16 p2775 A69-32081

Chromospheric spectrum outside of eclipse, wave lengths 3040 to 9266 Å, listing emission lines taken at McMath solar telescope
16 p2861 A69-32257

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
16 p2783 A69-32528

Vertical ozone distribution from emission and absorption in 9.6 μ band determined during IGY in Switzerland
16 p2785 A69-32625

Emission intensity ratio change as function of polar auroral height compared to variation in atmospheric concentration ratio of oxygen to nitrogen
17 p2963 A69-33956

GaAs semiconductor laser emission band homogeneity and continuous energy spectrum levels contribution to induced optical transitions
17 p2984 A69-34161

Thermal emission and spectral degree of blackness of W derived from electron motion equation
18 p3156 A69-34715

Luminescence spectra of molecular gases excited by fast electrons in IR spectral region, noting H alpha line
18 p3176 A69-34770

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter
18 p3152 A69-35016

Spectral inhomogeneity effect on spectrum of modes emitted by semiconductor p-n junction/laser
18 p3152 A69-35023

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate
18 p3152 A69-35154

Water vapor microwave emission measurement from galactic hydroxyl sources
18 p3205 A69-35435

Laser emission in system of four level centers, determining nonuniform emission line broadening due to disturbed quasi-equilibrium distribution of electron subsystem elementary excitations
19 p3333 A69-35877

Single and two mode laser emission dependence on pumping power distribution between four level active centers of different types
19 p3333 A69-35878

High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962

Emission line spectrum for ionization and excitation in solar coronal structures, tabulating intensities from ground based eclipses observations
19 p3422 A69-36217

Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines
19 p3422 A69-36220

Forbidden emissions in CH Cygni and VV Cephei noting symbiotic star
19 p3423 A69-36228

Intensity variations of Eta Carinae emission lines
19 p3423 A69-36231

Forbidden transitions in emission line spectra of variables near minimum light, finding origin in hot chromosphere
19 p3424 A69-36232

MH alpha 328-116 spectral characteristics noting weak continuum, emission lines from forbidden transitions and absence of absorption
19 p3424 A69-36233

Forbidden emission lines used to study interstellar gas, discussing gas ionization, neutral hydrogen, calcium lines, etc
19 p3424 A69-36235

Forbidden emission lines in spectra of normal, radio and Seyfert galaxies and quasars, giving information about quasi-stellar mean densities, temperatures, ionization, etc
19 p3424 A69-36236

Water vapor laser submillimeter emission spectra, considering rotational and vibrational lasing transitions due to electron impact and molecular interactions
19 p3336 A69-36349

Pulsed water vapor laser high power operation and strongest component wavelength measurement
19 p3337 A69-36416

Power, efficiency and temperature dependence of emission spectra and threshold current density in electron beam pumped GaAs laser, noting doping concentration
19 p3338 A69-36538

Undoped n-type gallium arsenide single crystals edge emission spectral band shape dependence on crystal type and ambient temperature
19 p3392 A69-36610

Gallium arsenide junction lasers operating above threshold, showing resonant modes dependence of steady state gain function and frequency dependence of spatial gain distribution
19 p3338 A69-36691

Carbon dioxide lasers near IR spontaneous emission spectra
19 p3339 A69-36697

Monochromatic coronal emission line photographs improved by composite technique
20 p3539 A69-37547

Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density
20 p3603 A69-37548

H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile
20 p3607 A69-38039

Doppler broadened atomic O emission line measurement providing indication of exospheric temperature storm-time variations
20 p3546 A69-38099

Solar UV emission lines from high resolution rocket observations
20 p3612 A69-38167

Ce II line reversal from absorption to emission in solar spectrum, noting reversal position dependence on wavelength and line source function scattering term
20 p3613 A69-38168

Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
20 p3556 A69-38201

Simultaneous ground and Alouette 2 satellite measurements of enhanced electromagnetic band emission in 500-1000 Hz range
21 p3708 A69-38496

Intensity changes of OI nightglow emission at 100 km by transport associated with tides, gravity waves and turbulent mixing
21 p3713 A69-38526

Emission band intensities of carbonyl fluoride in 2.0-6.0 micron region with scanning spectrometer, comparing results for room and shock temperature with theoretical data
21 p3669 A69-38759

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
21 p3736 A69-38948

Spectral characteristics of Q switched single frequency ruby laser with tunable emission frequency in giant pulse mode
21 p3737 A69-38991

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures
21 p3738 A69-39146

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions
21 p3740 A69-39546

Spectral, angular and temporal characteristics of traveling wave mode ruby laser emission, noting high transverse divergence effect on mode operation
21 p3741 A69-39554

Lunar surface IR emissivity comparison spectra including proposed Apollo landing sites, indicating Si-O ratio difference for Plato crater
21 p3815 A69-39587

Ti emission and absorption K spectra in Ti-Al intermetallics, suggesting hypothesis concerning long wave and fundamental subbands origin
21 p3749 A69-39787

Solar flares and prominences emission lines equivalent width correlated with relative differential velocity between filaments
22 p4001 A69-39994

Singlet-singlet energy transfer kinetics dependence on emission and absorption spectra overlap via dipole-dipole interaction
22 p3895 A69-40056

- Radiation emission and ionization in precursor and nonequilibrium region behind shock wave during approach to equilibrium in argon-like gas
22 p4006 A69-40526
- Mars upper atmosphere ionized carbon dioxide and CO emission spectra in 1900-4300 Å region measured by Mariner 6, observing atomic hydrogen and oxygen lines
22 p4023 A69-40568
- Emission dynamics and fine pulse structure in GaAs injection lasers, determining pulse duration and amplitude dependence on current and resonator length
22 p3963 A69-40603
- K-alpha band characteristics of N spectra stimulated in nitrides of transition metals by X rays
22 p3974 A69-41118
- Radiative properties of Ta, Mo, Nb, graphite and niobium carbide at high temperatures
23 p4175 A69-41331
- Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically
23 p4172 A69-41493
- IC 3258 emission line spectrum observations, discussing blueshift, extragalactic location, possible nature, etc
23 p4219 A69-42374
- Daylight observations of Comet Ikeya-Seki 1965-f at perihelion passage, discussing resulting emission line spectra within comet head
23 p4221 A69-42386
- Forbidden O I 5577 Å dayglow emission equatorial measurements with rocket photometer, discussing altitude profiles and excitation mechanism
24 p4314 A69-43005
- Upper atmosphere OH molecules vibrational temperature and total emission energy, measuring average seasonal variations
24 p4308 A69-43007
- Emission spectrum of nonself locked He-Ne ring laser, deriving phase relations for LF intermode oscillations
24 p4328 A69-43159
- Atmospheric gases emission spectra excited by electron beam at angles of pressure
24 p4353 A69-43698
- EMISSION**
- Emissivity and other radiative characteristics of stainless steel oxides heated to various temperatures in air
03 p0453 A69-14157
- Emissivity of rough metallic surfaces with preserved profile similarity, showing independence to roughness height
05 p0845 A69-15894
- Emissivity of high temperature air and carbon dioxide-nitrogen mixtures in two diaphragm shock tube
06 p0911 A69-17348
- IR radiative heat transfer in nongray gases for non-black bounding surfaces, considering diatomic gases with single vibration rotation band
06 p1033 A69-17559
- Oxidation influence on molybdenum disilicide coatings, determining degree of blackness over thermal stability range
09 p1522 A69-21588
- High altitude radiant emittance of cirrus clouds and cloudless sky for IR transmissivity based on aircraft measurements
09 p1536 A69-21641
- Integral normal emissivity of electrically conducting materials heated to high temperatures by HF field of inductor, discussing measurement procedure and equipment
11 p1888 A69-25230
- Radiative heat transfer calculations between parallel surfaces, applying approximations based on total emissivities to known spectral emissivities
14 p2539 A69-29223
- Integral normal emissivity of Ta and Hf carbides at temperatures from 1300 to 3000 K measured by radiation method in vacuum
15 p2640 A69-30984
- Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission
15 p2613 A69-31269
- Balmer line H alpha emission and absorption coefficients measured with hydrogen plasma generated in high current low voltage free burning arc
16 p2822 A69-32040
- Emissivity of high melting point compounds measured, considering electronic structure and atomic weight
18 p3158 A69-35260
- Spectral absorption coefficients and emissivities of thermodynamic equilibrium mixture of various combustion products at high temperatures, based on graphs
19 p3266 A69-36840
- Emissivity of nitrogen, oxygen and air plasmas in vacuum UV region of spectrum by photographic measurement, using He recombination radiation as brightness standard
21 p3774 A69-38944
- Corrections for eliminating anomalous skin effect on IR emissivity for Ag, Cu, Au and Al
23 p4177 A69-42212
- EMISSOGRAPHS**
U ACTINOMETERS
U RECORDING INSTRUMENTS
- EMITTANCE**
- Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
01 p0176 A69-10847
- Total and spectral emittance of cobalt surfaces conditioned by evaporating some cobalt from surface at high temperature in vacuum
05 p0716 A69-16447
- Solar absorptance and hemispherical emittance of metals at space conditions determined with cyclic incident radiation technique
06 p0945 A69-18154
- Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry
17 p2973 A69-33280
- Normal and directional emittance for two dimensional emitting, absorbing and scattering semiinfinite plane slab based on Monte Carlo method compared with Bobco approximation
17 p3005 A69-33301
- IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
23 p4164 A69-41633
- EMITTERS**
NT THERMIONIC CATHODES
- Emitter base lateral diode carrier injection effect on current gain properties of small area double diffused planar transistors
05 p0728 A69-15808
- Finned radiation emitter tube unsteady state temperature field as function of working body temperature and emitter geometry
05 p0846 A69-15898
- Thermal instability in power transistor structures, considering effects of design, emitter and base resistance at high currents
08 p1373 A69-20858
- Lanthanum hexaboride single crystal field emitters for vacuum devices, describing construction and performance
09 p1468 A69-22601
- Emitter current density dependence on distance from center of drift transistor circular emitter, obtaining distributed base resistance in presence of arbitrary base current
11 p1853 A69-25565
- Emitter self bias in power stages of transistor transmitters, considering transistor parameters dispersion
13 p2226 A69-27217
- EMOTIONAL FACTORS**
- Psychiatric study of master attack carrier aviators inability to fly, considering adult situational reaction diagnosis
03 p0369 A69-12883
- Isolation effects on higher nervous activity, motor and vegetative reactions, muscular strength and emotional state
03 p0377 A69-14202
- Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions
05 p0709 A69-16518
- Professional activity of cosmonauts, considering training, mental and physical qualities and engineering background
06 p0879 A69-17036
- Time perception capacity of astronauts and jet pilots during brief weightlessness, noting emotional state effects
07 p1065 A69-18981
- Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions
18 p3096 A69-34737
- Time perception capacity of astronauts and jet pilots during brief weightlessness, noting emotional state effects
20 p3480 A69-38229
- Male patients urine tests during sinusoidal vibration, noting catecholamine excretion as criterion of emotional stress under various environmental conditions
21 p3654 A69-38909
- Heart rate measurements in ski jumpers with radio telemetric system revealing tachycardia during climbing and emotional stress
23 p4078 A69-41313
- Psychological stress effect on human convergent and divergent thinking after presentation of disturbing or benign control films
24 p4269 A69-42555
- Supersonic flying effect on urinary catecholamine excretion rates in pilots, noting emotional state
24 p4265 A69-43370
- EMPHYSEMA**
- Pulmonary emphysema effect on expiratory flow limitation from static pressure-volume and flow volume curves during natural and forced deflation of hamster lungs
23 p4082 A69-41442
- EMPLOYMENT**
- Industrial loyalty and trade secrets, discussing preservation of forms of intellectual property posed by mobile employee and management policies
01 p0180 A69-10991
- Occupational attrition estimation methods for determining personnel separation through marriage, death, retirement and transfer applied to engineering and nursing
07 p1245 A69-19728
- Organizational identification of scientists as professional employees, exploring degree of loyalty and perceived self prestige
21 p3855 A69-38765
- EMULSIONS**
NT NUCLEAR EMULSIONS
NT PHOTOGRAPHIC EMULSIONS
- JP-4 fuel emulsions properties, handling characteristics and safety performance, noting satisfactory shelf life and thermal stability
06 p0982 A69-17190
- Fuel control systems using emulsified fuel, noting exposure effects and temperature and pressure characteristics
09 p1571 A69-22486
- Two phase MHD generator with gas in liquid metal emulsions, discussing loops efficiency
13 p2306 A69-27479
- ENCAPSULATING**
- Plastic material requirements for semiconductor device encapsulation noting electrical compatibility, mechanical and environmental protection and costs
02 p0270 A69-12161
- Electric components encapsulation by combining liquid resin techniques and transfer molding
04 p0607 A69-14955
- Gallium arsenide materials technology, discussing solution and vapor-phase epitaxy and liquid encapsulation as related to crystal growth and purification
12 p2141 A69-25834
- Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions
19 p3281 A69-35549
- Encapsulation effects on piece parts in high density package, considering unexpected part failures elimination in Lunar Module Signal Conditioning Electronic Assembly
22 p3910 A69-39953
- ENCKE METHOD**
- Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction
21 p3807 A69-39340
- Multispacecraft simultaneous simulation on hybrid computer using Encke perturbation method for translational motion and Hamilton quaternion method for inertial transformations
22 p4036 A69-40320
- ENCODERS**
U CODERS
- ENCODING**
U CODING
- ENCOUNTERS**
- Distributions of close planet-comet encounters for various orbital elements, calculating trajectory by conic matching
18 p3195 A69-34433

END PLATES

END PLATES

Atomic flux from Cs and K ion recombination on hot end plates of Q machine measured, noting contribution to total plasma end loss rate
08 p1358 A69-19810

Cesium plasma confinement time improvement in symmetrically heated tungsten end plates of Q machine
11 p1925 A69-24314

End constraints and length/width ratio influence on composites off axis tensile tests, considering rigid clamping with/without end rotation
13 p2286 A69-28667

End loaded two layer laminated elastic strip stress concentration and self equilibrating traction distribution analyzed by eigenvalue equation
13 p2370 A69-28672

Spanwise velocity correlations of turbulent vortices shed by two dimensional bluff body of D section with different aspect ratios, noting end plates effect
23 p4234 A69-42397

ENDFIRE ARRAYS

NT YAGI ANTENNAS

Superdirective aerial endfire array of four unequally spaced half wave dipoles and only one fed element, calculating and measuring maximum gain
09 p1468 A69-22603

Electromagnetic plane wave scattering from slender semiinfinite cone, obtaining contribution to tip return arising from direct diffraction
11 p1836 A69-24988

Gain optimization for dipole endfire array through orthogonalization of element directivity noting effects of element spacing, element gain and mutual coupling
13 p2226 A69-27186

ENDOCRINE GLANDS

- U ADRENAL GLAND
- U PINEAL GLAND
- U PITUITARY GLAND
- U THYROID GLAND

ENDOCRINE SECRETIONS

- NT ALDOSTERONE
- NT CORTISONE
- NT HORMONES
- NT PITUITARY HORMONES

Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity
01 p0022 A69-11337

F-102 pilot anticipatory and flight stress, noting endocrine-metabolic hyperactivity
12 p2023 A69-26552

European pilots accustomed to equatorial climate tested during regular flying missions, discussing heat effects on urinary steroids
12 p2024 A69-26560

Rats adrenal corticosterone concentrations changes in response to ACTH, determining response sensitivity dependence on time after hypophysectomy
22 p3870 A69-39871

ENDOCRINE SYSTEMS

Pituitary-adrenocortical axis and neuro-endocrine functions in animals maintained in oxygen atmosphere, discussing norepinephrine and epinephrine excretion values, etc
01 p0019 A69-11343

Glucose, lactate, free fatty acids, hepatic glycogen and endocrine activity in fasting hibernating dormouse and rat in deep hypothermia
10 p1642 A69-23118

Urinalysis of crew members of first transatlantic helicopter flight indicating interindividual endocrine-metabolic variability and circadian trends modification
19 p3263 A69-36452

ENDOGENOUS CONDITIONS

U PHYSIOLOGY

ENDOTHERMIC REACTIONS

Temperature profiles in laminar boundary layer with endothermal reaction investigated using nitrogen plasma jet in rarefied gas wind tunnel
16 p2821 A69-31833

Packed bed catalytic reactors cooling capacity in promoting endothermic reactions of hydrocarbon fuels, using computerized temperature and composition profiles
[AIAA PAPER 69-588] 17 p3071 A69-33265

ENDURANCE

Maximum voluntary isometric muscle strength relation to endurance time in static work during partial curarization
22 p3890 A69-40213

ENERGETIC PARTICLE EXPLORER D

U EXPLORER 26 SATELLITE

ENERGY

Energy definition in relativity for steady state universes, particularly Schwarzschild universes
05 p0792 A69-15683

ENERGY ABSORPTION

- NT AURORAL ABSORPTION
- NT ELECTROMAGNETIC ABSORPTION
- NT MOLECULAR ABSORPTION
- NT NEUTRON THERMALIZATION
- NT PHOTOABSORPTION
- NT POLAR CAP ABSORPTION
- NT SELF ABSORPTION
- NT THERMAL ABSORPTION
- NT THERMALIZATION [ENERGY ABSORPTION]
- NT X RAY ABSORPTION

Nonequilibrium carriers during semiconductor depolarization, noting microwave oscillation energy absorption in silicon and zinc sulfide crystals
01 p0138 A69-10434

Approximation formulas of Appleton-Hartree equations for nighttime medium wave frequency absorption in E region of ionosphere, discussing electron density
07 p1122 A69-18295

Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles
08 p1277 A69-21077

Self focusing of CW argon laser beam due to absorptive heating in crown glass, emphasizing time dependence of beam diameter as function of distance
10 p1706 A69-24009

Radiant power flow, transmittance and absorbance of absorbing thin film multilayer in terms of characteristic matrix and admittance of surrounding media
11 p1896 A69-24850

Nuclear component energy flux absorption in Fe measured with ionization calorimeter
13 p2330 A69-28386

Shock load protection through energy absorption and dissipation in primary or composite structures, listing honeycomb, cellular plastics and rubber mechanical properties
[ASME PAPER 69-DE-37] 14 p2531 A69-28846

Disaccommodation component of magnetic aftereffect causing dynamic absorption of HF magnetic energy in ferrites
15 p2665 A69-30038

Quality assurance impact energy attenuation testing of U.S. Army flyer protective helmet, considering combined interaction of shell, foam liner and plastic pads
15 p2559 A69-30851

Energy absorption by cold nonuniform plasma from externally driven electric field, noting relation between plasma and driving frequencies
15 p2661 A69-30922

Pumping energy absorbed by active element of neodymium glass during laser emission related to activator concentration
15 p2635 A69-31104

Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission
15 p2613 A69-31269

Ultrasonics for wrought and cast aluminum alloys nondestructive testing, discussing ultrasonic energy damping measurements
16 p2800 A69-31778

Electron transport initiated by radiant energy absorption or by reducing suitable electron acceptor as source of energy for extraterrestrial life
17 p2908 A69-32973

Radiative heat transfer in nonisothermal media composed of spherical particles with complex refractive index emitting absorbing and scattering energy anisotropically, considering various geometries
[AIAA PAPER 69-626] 17 p3073 A69-33297

Generalized energy absorption coefficient effect on vibration mode of specimen on vibration test bench
17 p3062 A69-33718

Neodymium activated glass laser efficiency as function of absorption of pumping and emission energy by glass
22 p3964 A69-40797

Plasma dielectric constant and RF wave energy and power absorption in anomalous dispersion region, noting plasma permittivity inverse relation to absorption band frequency
23 p4195 A69-41385

Molecular radiobiology, discussing physicochemical processes caused by energy absorption in targets, leading to inactivation under various circumambient conditions
23 p4090 A69-41963

Microwave absorption by biological materials, noting energy distribution between reflected, transmitted and absorbed radiation as function of medium physical properties
24 p4270 A69-42574

ENERGY ABSORPTION FILMS

Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity
04 p0610 A69-14384

Solar irradiance spectral distribution data normalized and combined with spectral absorbance of satellite surface coatings, obtaining absorbed energy for spectral range
09 p1576 A69-21644

Oscillation mode selection in gas lasers by thin film absorber in resonator, using standing wave electric fields periodicity
14 p2456 A69-28757

ENERGY BANDS

- NT BLOCH BAND
- NT CONDUCTION BANDS
- NT FORBIDDEN BANDS

Ionization losses of Ge 72 atoms stopping in Ge, noting no cut-off indicative of energy gap effects
01 p0140 A69-11245

GaAs photoemissive yield spectrum analysis, discussing transition energies and energy band structure models
01 p0140 A69-11254

Intensity ratio of first negative nitrogen band and oxygen line varies in auroral displays
02 p0235 A69-11425

Auroral emission rates and heating effects as function of altitudes
02 p0235 A69-11426

Electron band structure of copper-nickel alloys, discussing thermoelectric properties, energy ranges and effect of alloying additions
02 p0301 A69-12765

Molybdenum interband transitions noting low energy optical property anomalies and origin of two absorption bands
03 p0442 A69-12986

Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements
03 p0368 A69-13075

Superconductor energy spectrum gap, discussing temperature dependence, anisotropy, thermodynamic and kinetic properties and relation to Fermi surface and phonon spectrum
03 p0485 A69-13331

Light absorption in semiconductors with electron hole pair formation noting conduction and valence band
06 p0978 A69-16901

Superconductors with overlapping energy bands studied by nuclear magnetic resonance method
07 p1198 A69-18513

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser
[IEEE PAPER C-6] 07 p1150 A69-19051

Nonequilibrium radiation from first negative band of molecular nitrogen ion excited by shock wave electron impact
13 p2245 A69-27380

Band structure for narrow energy gaps of GeTe and SnTe by perturbation model, noting constant free path and relaxation time
19 p3385 A69-36516

Electroabsorption oscillations in CdTe films compared with results of interband transitions theory
19 p3386 A69-36523

Low temperature energy band gap in n-type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient
19 p3390 A69-36552

Energy band gap variation as function of composition in In-Ga-P semiconductor crystals
19 p3390 A69-36553

GaAs injection laser properties calculation with doping levels for exponential band tails formation, deriving threshold currents, lasing frequencies, I-V characteristics, etc
22 p3959 A69-40012

ENERGY BUDGETS

- NT ATMOSPHERIC HEAT BUDGET
- NT HEAT BUDGET

Turbulence characteristics up to 150 m above ground, noting surface roughness length directional de-

pendence, longitudinal turbulence spectra and turbulent energy budget

01 p0110 A69-10695

Plasma discharge energy balance analysis to determine discharge power and temperature as function of electric field parameters

02 p0286 A69-11572

Surface radiation balance measurements in India during IQSY, discussing diurnal, seasonal and spatial variations of net radiation

02 p0307 A69-11820

DC arc plasma torch as heat source in plasma tunnel, discussing nonuniformity of plasma flame

02 p0291 A69-12424

Statistical energy approach for analyzing steady state vibration distribution in composite structures in terms of energy balances

04 p0675 A69-14687

Energy metabolism changes during weightlessness, considering effects on basal and nonbasal requirements connected with added increments for activity

06 p0872 A69-17014

Computer simulations, comparing self adaptive/neutron/ control of spacecraft energy allocation subsystem to programmed control

07 p1058 A69-18389

Terrestrial and Cytherean atmospheres evolution based on gray atmosphere model, surface energy budget and partition of water and carbon dioxide

07 p1213 A69-18608

Exchange coefficient of energy balance of earth surface for propagation studies of entrained atmospheric contaminants

09 p1535 A69-21514

Nitrogen impurities effect on electron energy balance in DC arc burning in inert gas

10 p1732 A69-23442

Reactors technical characteristics for high temperature mineralization of closed life systems biological wastes, deriving equations to estimate energy balance

10 p1649 A69-23504

Open loop suboptimal control for linear time dependent tradeoff between energy expenditure and probability of target set entry

11 p1860 A69-25443

Dynamic energy balance in positive column of electric arc, integrating expression to determine temperature time dependence

12 p2137 A69-26535

Soviet book on combustion, detonation and explosive energy of condensed systems covering stable/unstable processes

12 p2190 A69-26757

Kinetic energy balance equation of mean zonal flow in symmetrical polar cap derived from basic concepts of mechanics, discussing relative coordinate system rotation

15 p2595 A69-30219

Energetics relations of limited atmospheric region to global energy budget, discussing interaction, potential energy, generation, boundary flux and conversion terms

15 p2648 A69-30220

Energy budget equations applicable to limited atmospheric region using available potential energy concept, discussing relation to global energy

15 p2648 A69-30221

Air masses transformation, solving nonlinear simultaneous system of equations of motion, heat influx and turbulent energy balance

15 p2649 A69-30647

Food intake changes of female rats in response to changes in energy balance, discussing steroids as physiological tracer

15 p2555 A69-30693

Radiative luminescence of gas discharge plasmas in channel with substantial radial heat transfer determined from energy balance measurement

15 p2662 A69-30978

Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles

15 p2603 A69-31402

Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium

16 p2848 A69-31975

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation

17 p3052 A69-32984

Critical review of Deriugin theory of scattering from rough lamellar surfaces using separation of variables method, discussing energy conservation violation

17 p2930 A69-33885

Magnetic storm energy balance, assessing solar corpuscular flux energy consumption in and beyond magnetosphere

17 p2964 A69-33959

Floating body attitude and stability analysis based on system potential energy balance, considering Archimedes principle, torques, equilibrium conditions, body shape, etc

[SAWE PAPER 773] 18 p3172 A69-34874

Energy balance equation for two phase liquid-gas mixture ignition process, deriving formula for speed of combustion zone movement

18 p3231 A69-35123

Meridional circulations in kinetic energy budget of Northern Hemisphere troposphere based on winter and summer climatic mean data, noting Hadley circulation

20 p3523 A69-37505

Components of turbulent energy balance at 1 and 4 meter heights, discussing average motion energy transformation into turbulent energy

20 p3571 A69-37696

Geophysical aspects of earth chemical composition, structure and energy balance

22 p4032 A69-40983

ENERGY CONVERSION

Exploding wire discharges similarity with underwater sparks for understanding water breakdown and parallel discharges

01 p0117 A69-10657

Direct energy conversion and materials limitations, discussing thermoelectricity, solar cells, thermionics and fuel cells

02 p0194 A69-11801

Satellite power generation and transmission system for solar energy conversion, noting estimates of surface area and weight of collectors

02 p0323 A69-12296

Electrostatic generator for direct conversion of moving dielectric medium potential or thermal energy to electric power

03 p0369 A69-14153

Porous gas diffusion electrodes design for electrochemical energy converters, noting contribution of theory of electrode kinetics

04 p0551 A69-15309

Electrostatics/EGD/ engineering, discussing generators and compressors

05 p0804 A69-16586

Solar flares, discussing transformation of magnetic energy into ion and electron kinetic energy by acceleration in high impedance region in current filaments

06 p0995 A69-17445

Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity

08 p1367 A69-20795

Pure fluid amplifying logic and energy converting elements, discussing parameters, characteristics and working principles

[AGARDOGRAPH-118] 08 p1257 A69-20951

Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula

09 p1591 A69-21454

Side wall currents in unignited hardware type thermionic energy converters, discussing work function and heat choke

09 p1439 A69-21822

Isothermal diode as study basis for internal complex controlling thermionic energy conversion

09 p1439 A69-21827

Local creation of mass in steady state universe as source of static field energy propagating away at speed of light

09 p1601 A69-22212

Second harmonic generation by electromagnetic wave incident on inhomogeneous plasma, determining power output

10 p1653 A69-23133

MHD generators with segmented electrodes at high Hall parameters, noting electron density, conductivity and Hall field reduction factor

10 p1637 A69-23476

Nonequilibrium ionization effects on performance of subsonic constant area MHD generator, using closed cycle blowdown loop facility

10 p1637 A69-23481

ENERGY CONVERSION EFFICIENCY

MHD blowdown loop facility for alkali seeded noble gas MHD energy conversion, noting performance and plasma insulation from ground

10 p1674 A69-23482

Closed loop magnetoplasmadynamic energy conversion system design, operation and duct section

10 p1638 A69-23483

Energy release in quasars through nonmassive gravitational collapse compared with local objects, noting cosmological luminosities

10 p1785 A69-24091

Plasma wave conversion into electromagnetic waves in strong magnetic field, studying nonlinear coalescence and scattering on thermal and epithermal ions

11 p1922 A69-24245

Electrochemical energy storage and conversion for space flight, emphasizing hydrogen oxygen and silver zinc batteries, Gemini and Apollo programs, etc

12 p2015 A69-25866

Turbomachinery buffer seals, buffer gas regulation and cleanup systems for operation of closed Brayton cycle power conversion system with gas cooled nuclear reactor

13 p2268 A69-27367

Segmented-electrode and Hall ducts tested on supersonic magnetoaerodynamic conversion rig, defining electrical model for boundary layer losses at electrode surfaces

13 p2311 A69-28034

Book on elements of solid state energy conversion covering quantum mechanics, thermodynamics, thermoelectricity and photovoltaic energy conversion

13 p3222 A69-28038

Convective instability by active stress, discussing composition dependent stress fields in continuous and mechanically isolated material and chemical to kinetic energy conversion

14 p2540 A69-29634

Laser radiation conversion during induced combination scattering, discussing stabilization of emission mode of first Stokes component

14 p2460 A69-29648

Kinetic energy conversion into heat in moving viscous media, formulating equations as volume integrals of spherical harmonics products

14 p2487 A69-29980

Energetics relations of limited atmospheric region to global energy budget, discussing interaction, potential energy, generation, boundary flux and conversion terms

15 p2648 A69-30220

Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments

15 p2586 A69-30383

Planetary jetstream and general circulation energy transformations, applying circulation model results to specific weather situations

17 p3000 A69-33758

Laboratory device for investigating thermionic energy converters and measuring current-voltage characteristics by static/dynamic methods

18 p3136 A69-34700

Energy conversion - Conference, Washington, D.C., September 1969

23 p4064 A69-42236

Three phase DC-AC inverter with low harmonic distortion, good efficiency and packaging capability, stabilizing frequency by crystal controlled clock oscillator

23 p4074 A69-42294

ENERGY CONVERSION EFFICIENCY

Limited space-charge accumulation mode efficiency for gallium-arsenide diodes, taking into account electron-lattice relaxation processes

01 p0137 A69-10321

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization

03 p0369 A69-14154

Heat pipe for thermal control of terrestrial and aerospace energy conversion systems

06 p1030 A69-17189

Thermionic energy converter theory and efficiency, discussing design considerations to improve performance

07 p1057 A69-18255

Second harmonic generation conversion efficiencies at 5300 A with KDP and lithium niobate crystals, using Nd-glass laser of high radiance and narrow bandwidth

09 p1514 A69-21333

Optical motor system to efficiently convert laser energy into mechanical rotational energy, giving equations for controlling motor speed

09 p1442 A69-22457

Gunn effect cavity controlled generator oscillations, noting phase trajectory closing conditions dependence on resonant mode parameters

09 p1468 A69-22596

Closed loop cycle converter, composed of MHD generator and compressor consuming thermal energy, exhibiting moderate cycle efficiency decreases

11 p1824 A69-24223

Minimum conversion loss in general mixer circuit configuration, noting dependence on time varying resistance and equal terminating impedances

11 p1845 A69-24550

Thermodynamics of sinusoidal steady state energy converters governed by Onsager reciprocal relation, determining maximum conversion efficiency

11 p1826 A69-25396

Thermionic converter SD-4 design and performance tests covering emitter, collector and Cs reservoir temperatures and power efficiency

11 p1827 A69-25398

Constant and traveling magnetic fields MHD converters induction and finite dimensions influence analyzed by conformal mapping, separation, Fourier and finite difference methods

11 p1827 A69-25399

Arc mode thermionic Cs converter nonlinear I-V characteristics explained by current-dependent temperature and potential fields in plasma

11 p1827 A69-25400

DC to RF energy conversion in ungridded klystron gaps, calculating efficiency and optimum load conductance as function of gap dimensions

12 p2041 A69-26629

Synchronized microwave harmonic energy generation by filtering using DC step source feeding modified pulse forming network

12 p2041 A69-26630

Thermodynamic atomization in MHD energy conversion through convergent-divergent nozzles, noting nozzle efficiency and droplet size

13 p2245 A69-27477

Energy conversion with liquid metal working fluids in MHD generators, discussing single stage fully Carnotized process

13 p2372 A69-27482

Liquid metal multistage injection efficiency with sodium and potassium working fluids, noting preheating

13 p2372 A69-27483

Liquid metal two phase flow MHD generators efficiency prediction, discussing end losses and flow velocity

13 p2205 A69-27485

Optimal cycle parameters for liquid metal single component MHD cycle, employing condensing ejector in front of generator

13 p2205 A69-27488

Liquid metal MHD generator cycles thermodynamic analysis, considering multicycle operation improvement with heat regeneration

13 p2372 A69-27489

Liquid-metal MHD space power generation system using intermittent vaporization slugs shooting at 2700 R peak temperature

13 p2206 A69-27492

Liquid metal MHD induction generators design and performance, considering effect of geometry, operating conditions, fluid properties and power level on efficiency

13 p2207 A69-27503

Liquid metal induction MHD generator I-V characteristics at no load permitting self excitation with capacitors

13 p2208 A69-27509

Induction, helical and straight through liquid metal MHD generators tested under independent and self excitation conditions

13 p2208 A69-27512

Three phase high temperature liquid metal induction MHD generator performance, noting velocity profile nonuniformity influence

13 p2208 A69-27513

Two chamber DC arc heater with vortex stabilization, determining current-voltage characteristics and efficiency

13 p2244 A69-28557

Reliability and efficiency improvements for thermionic converters at JPL, giving failure analyses

14 p2397 A69-29175

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times

14 p2481 A69-29191

Output current and efficiency of vapor thermionic converters obtained in terms of electrodes and interelectrode gas parameters, exemplifying nuclear fuel element

14 p2400 A69-29222

Noble gas thermionic converters, discussing auxiliary discharge compensation of negative space charge, I-V characteristics, efficiency and comparison to ignited mode cesium vapor converter

14 p2403 A69-29249

Rare gases effect on thermionic converters volt-ampere characteristics, noting gas pressure, oxygen contamination and performance relations

14 p2403 A69-29251

Soviet research on thermionic energy conversion, advantages and applicability in various fields

14 p2405 A69-29279

Energy relations and conversion for electrodynamic plasma acceleration with allowance for mass transfer processes resulting from recombination, diffusion and electrode erosion

15 p2664 A69-31176

Electric arc plasma generator efficiency analysis including supply voltage, working current, current-source impedance, ballast resistor and optimum voltage-current selection

15 p2664 A69-31177

Laser effect in neodymium glass, estimating efficiency of light energy output vs electric energy input

17 p2979 A69-32828

Rotary power transformer design for spin stabilized spacecraft power system, discussing efficiency and advantages

17 p3050 A69-34111

Thermal cycle for direct flow supersonic compressorless MHD generator without heat regeneration and high temperature exchange

18 p3093 A69-34714

Mechanical work recoverable from stored energy and heat absorbed by taking material through closed cycle in strain and entropy space

20 p3575 A69-37074

MHD losses in liquid metal converters due to nonideal magnetic field profile and to flow hydraulics

21 p3649 A69-39483

Rocket motor combustion efficiency evaluated by chemical energy conversion to equilibrium, applicable to fuels, oxidizers and combustors at subsonic or supersonic velocity

23 p4239 A69-41919

Radioisotope thermoelectric generators /RTG/ design and performance analysis method applied to generators using Si-Ge Air-Vac type thermocouples

23 p4188 A69-42260

Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc

23 p4070 A69-42271

Brayton-B generator for 2-10 kwe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis

23 p4071 A69-42278

Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor

23 p4075 A69-42303

ENERGY CONVERTERS

U DIRECT POWER GENERATORS

ENERGY DENSITY

U FLUX DENSITY

ENERGY DISSIPATION

NT VISCOUS DAMPING

Energy dissipation at rounded pipe entrance in viscous fluid, showing relation between entrance loss and radius of roundness

01 p0059 A69-10308

Energy gap behavior and thermodynamic properties of anomalous superconductors noting sensitivity to phonon spectrum

01 p0138 A69-10436

Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front

01 p0152 A69-10579

Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions

01 p0123 A69-10620

Ionization losses of Ge 72 atoms stopping in Ge, noting no cut-off indicative of energy gap effects

01 p0140 A69-11245

Energy characteristics of laser with passive Q switch, taking into account internal reflections

02 p0256 A69-11999

Ruby laser limiting gain, stimulated emission loss, noise loss and spectral distribution determined by radiation intensity, pumping power and mirror reflection

02 p0256 A69-12000

Photoelectron energy loss mechanisms in planetary atmospheres, considering possible constituents in Mars and Venus upper atmospheres

02 p0321 A69-12118

Ruby laser output energy degradation due to pump light absorption by color centers of ruby rod

02 p0256 A69-12358

Angular distribution of radiation scattered by microscopic polyvinyl toluene sphere monolayer, noting intensity distribution approximation using Mie theory [AIAA PAPER 68-30]

02 p0282 A69-12503

Single degree of freedom structural damping estimations from viscous and hysteretic energy dissipation data

03 p0523 A69-12947

Nonlinear influence of resonator losses on stimulated emission of ruby laser, noting cut-off action

03 p0439 A69-13058

Aperiodic hydrodynamic beam instability development and energy losses, discussing plasma oscillation enhancement and nonlinearities

03 p0480 A69-14137

Q switched Ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

04 p0610 A69-14381

Electric field and energy dispersion law effects on plasma oscillations in semiconductors, calculating composite oscillation frequency

04 p0642 A69-14554

Energy dissipation effects on attitude stability of dual-spin satellites with damping mechanism on rotating sections

04 p0665 A69-14703

Average energy dissipation in MHD duct flow of arbitrary cross sectional shape, evaluating bulk temperature, net wall heat flux and pressure gradient

04 p0635 A69-14724

Twin differential calorimeter for measuring heat dissipation by wire specimen under fatigue tests, using semiconductor thermopiles

04 p0618 A69-15205

Asymptotic stability of gyroscopic systems equilibria with partial dissipation used for motion stability analysis

04 p0631 A69-15537

Three energy dependent quantities examined for gases, describing relation between ionization yields, cross section and loss functions

05 p0795 A69-15660

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number [ASME PAPER 68-WA/FE-45]

05 p0698 A69-16112

Sounding energy optimum spatial distribution during scanning and detection of several signals, noting reduction of mean energy losses

05 p0723 A69-16786

Magnetosonic waves absorption in plasmas, studying collisions leading to HF energy resonant absorption at lower hybrid frequency

06 p0963 A69-16904

Thermal considerations of spacecraft external panel effects on specular lower systems, discussing heat dissipation and computer program [AIAA PAPER 69-26]

06 p1037 A69-18097

Spherical and single axis passive oscillation energy dampers for gravity gradient oriented satellites, utilizing earth gravity field or solar pressure

07 p1229 A69-18347

Energy losses of clusters of charged particles moving through unbounded isotropic plasma manifesting nonlinearity in interaction of particle generated fields

07 p1189 A69-18528

Superconducting flux-flow resistivity minimum in Pb-Tl alloy, discussing thermal dissipation associated with temperature gradients across moving fluxoid

07 p1198 A69-18642

Atmospheric circulation intensity measurement, using potential energy conversion to kinetic or kinetic energy dissipation by friction

07 p1175 A69-18947

- Power losses in MHD channel due to longitudinal end effects related to finite dimensions of electrodes and terminal insulators
07 p1193 A69-19030
- Diffusion coefficient of interstitial oxygen atoms in tantalum by elastic energy dissipation measurements as temperature function, discussing relaxation effect
07 p1168 A69-19452
- Earth and planets shallow seas tidal dissipation reflected in Q values, noting larger planet pressure effect
08 p1393 A69-20581
- Equal element elliptic function filters, noting lower dissipation loss when applied to bandpass and bandstop filters
08 p1300 A69-21175
- Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion
09 p1450 A69-21277
- Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
09 p1587 A69-21359
- Type two superconductors physical properties, discussing magnetic flux lines interaction with structural defects
09 p1555 A69-21490
- Energy characteristics of exploding wires considered as shock wave source
09 p1539 A69-21560
- Galactic cosmic ray scattering and energy loss through solar wind interaction
09 p1580 A69-22202
- Damping criteria for satellite vibration based on energy dissipation by material hysteresis, friction in viscous flow, magnetic hysteresis and eddy currents
10 p1791 A69-22921
- Polymeric composites mechanical energy dissipation dependence on dimensions of interfacial region between matrix and filler phases, considering particle size and strain magnification
10 p1794 A69-23037
- Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap
10 p1728 A69-23130
- Differential energy losses of fission fragments in thin carbon films as function of mass and initial energy mapped by time of flight method
10 p1694 A69-23348
- Cosmic protons interaction with interplanetary plasma, analyzing beam energy loss due to excitation of longitudinal electrostatic oscillations
10 p1760 A69-23617
- Summation curves method for development of active region and time dependence of energy loss during proton flare
10 p1764 A69-23743
- Plastic energy dissipation and crack surface displacement of penny shaped crack in elastoplastic material
10 p1803 A69-24030
- Force-free magnetic field integral properties, obtaining rate of decrease limitation via virial theorem
11 p1951 A69-24239
- Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
11 p1954 A69-24381
- Output power losses in lasers with inhomogeneous active rods, deriving formulas for losses in ruby and Nd-glass laser rods
11 p1926 A69-24603
- Energy dissipation in freely oscillating bodies under static stresses described by differential equation, assuming elliptical hysteresis loop
11 p1919 A69-25092
- Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system
11 p1985 A69-25176
- Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion
11 p1841 A69-25634
- Energy loss during turbulent plasma heating by current in open magnetic trap, attributing heating to ion-acoustic instability in plasma
11 p1935 A69-25753
- Viscoelastic models for solving longitudinal oscillations of one degree of freedom system under dynamic load, taking into account energy dissipation
12 p2177 A69-25995
- Noise sensitivity of space diversity reception system with narrow beam electrically switchable antennas for incomplete beam separation
12 p2030 A69-26485
- Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect
12 p2181 A69-26612
- Standard phenomenological laser rate equations for population inversion and light intensity generalized by considering intensity dependent losses and Einstein coefficients
12 p2110 A69-27014
- Radiative energy losses in nonequilibrium plasmas, considering plasma geometries and distributions of Plancks function
13 p2305 A69-27374
- Electrical end losses in liquid-metal MHD generators with variable conductivity, noting working fluids and aspect ratios
13 p2206 A69-27493
- Linear inductive MHD converters, reducing effects of losses due to finite length of converter by cylindrical construction
13 p2207 A69-27505
- Radiative relaxation of relativistic particle distribution undergoing synchrotron radiation and reabsorption, discussing self absorbed radio source model
13 p2327 A69-27572
- Energy loss during inelastic collisions between electrons and ionospheric particles, determining ionospheric heating by UV radiation
13 p2252 A69-27614
- Resonance tube excitation from energy depletion in central part of subsonic jet supplying tube
13 p2247 A69-27738
- Dielectric constant, loss and breakdown of electrical insulation materials, discussing atomic and molecular models and effects of polarizations, environment and manufacturing procedures
13 p2230 A69-27983
- Radiative thermal losses of K in gases for MHD flow
13 p2308 A69-28022
- Output power and loss analysis of 2 n injection locked oscillators combined through magic tee hybrids
13 p2232 A69-28061
- Muon energy losses due to pair formation taking into account nucleus screening by electrons
13 p2304 A69-28423
- Two chamber DC arc heater with vortex stabilization, determining current-voltage characteristics and efficiency
13 p2244 A69-28557
- Q switched ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes
14 p2456 A69-28754
- Shock load protection through energy absorption and dissipation in primary or composite structures, listing honeycomb, cellular plastics and rubber mechanical properties
[ASME PAPER 69-DE-37] 14 p2531 A69-28846
- Low voltage arc discharge characteristics in cesium vapor, considering energy balance, electron temperature, energy losses, volt-ampere characteristics, ignition, cathode temperatures, etc
14 p2401 A69-29234
- External and internal energy dissipation coefficients in vibrating aerodynamic rod structures
14 p2537 A69-29748
- Hydrogen gas role in galaxy formation, estimating quantity needed to dissipate gas cloud contraction energy, discussing formation mechanics of molecular hydrogen
15 p2680 A69-30204
- Thermistor thermometer with low energy dissipation for flow measurements, discussing design considerations
15 p2608 A69-30296
- Back pressure control system for heat leak evaluation tests of cryogenic containers, discussing component selection and error analysis
15 p2702 A69-30397
- Seal selection criteria based on maintaining fluid film between faces, discussing facial heat generation and dissipation, speed and size effects, etc
[ASLE FICF5 PREPRINT 25] 15 p2620 A69-30488
- Unsteady nonadiabatic shock waves in stellar gas dynamics, analyzing energy losses due to ionization at shock fronts by extended Chiznell-Wisem method
15 p2682 A69-30508
- Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
15 p2709 A69-30749
- Stellar energy diffusion processes studied to determine energy transfer time scale between stellar layers
15 p2692 A69-30767
- Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection
15 p2692 A69-30769
- Energy transfer during fast electrons and photons interactions, indicating Compton energy losses related to space X ray and gamma radiation sources
15 p2676 A69-30953
- Diode burn-in dissipation measurement for reliability testing
15 p2579 A69-31043
- Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles
15 p2603 A69-31402
- Waveguide capacitive screw tuners effects on dissipative loss, discussing microwave measurements with copper screw tuners
16 p2757 A69-31586
- Energy release efficiency in gravitational collapse, estimating rest energy fraction from energy conservation, neutron star stability and spherically symmetrical systems collapse considerations
16 p2853 A69-31594
- Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents
16 p2758 A69-31618
- Ruby laser output energy degradation due to pump light absorption by color centers, discussing roles of defects and impurities in center formation
16 p2795 A69-31697
- Plasma experiments with TM-3 apparatus under stable discharge conditions in H, discussing energy loss mechanisms, transport coefficients, reciprocal lifetime, etc
16 p2820 A69-31795
- Far field energy radiated by two body system using approximation method in general relativity and Minkowski gravitation theory
16 p2812 A69-31836
- Laser amplifier nonlinear losses effect on light beam propagation, studying arbitrary waveform development into asymptotic steady state pulse /SSP/
16 p2797 A69-32043
- Incident energy transfer to particles due to nonlinear interactions during passage of intense light beam through plasma, considering decay into plasma waves
16 p2822 A69-32046
- Transistor temperature and power limitations and thermal resistance calculation, discussing heat sink surface optimum design for power losses
16 p2760 A69-32047
- Nonlinear mechanical systems vibrations damping emphasizing energy dissipation
16 p2874 A69-32245
- Turbulence dissipation rate in clouds and precipitations determined from rms width of vertical sounding radar signal fluctuation spectra, distinguishing gravity and turbulence effects
16 p2807 A69-32273
- Thermal contacts effects on optimum operating conditions of solar thermoelectric power generator, discussing losses due to low thermal conductivity coefficient of insulating layers
16 p2741 A69-32797
- Linear pyrolysis of condensed materials in presence of heat loss into ambient medium expressed in terms of thermoneutral and thermal reactions
17 p3069 A69-33134
- Radiative heat transfer in nonisothermal media composed of spherical particles with complex refractive index emitting absorbing and scattering energy anisotropically, considering various geometries
[AIAA PAPER 69-626] 17 p3073 A69-33297
- Combustion and exhaust losses in gas turbines, recommending pulsating combustion for increased useful energy
17 p3021 A69-33360
- Energy dissipation in collisionless shock waves generated in plasmas with 1-500 trillion/cm electron density by theta pinch, measuring axial ionic energy spectrum
17 p3013 A69-33820
- Soviet collection of papers on energy dissipation during vibrations of mechanical systems, covering elastic

oscillations, nonlinear systems, energy frequency characteristics, etc
17 p3062 A69-33912

Nonlinear differential equations of mechanical systems with restoring forces approximated by odd power displacement functions and energy dissipation approximated by displacement and velocity functions
17 p3007 A69-33914

Oscillations of nonlinear dissipative mechanical system with two degrees of freedom, possessing structural damping at joints between moving masses and base
17 p3064 A69-33915

Forced oscillations of resonance machine elements represented by truss of concentrated masses and external forces, taking into account aerodynamic energy dissipation
17 p3064 A69-33916

Axisymmetric bending oscillations of thin circular plates of constant thickness with allowance for energy dissipation in material, analyzing resonance and phase amplitude characteristics
17 p3064 A69-33919

Energy dissipation influence on elastic elements random vibrations, obtaining relations between displacements rms value and random disturbance intensity
17 p3064 A69-33921

Energy-frequency characteristics of vibrating machines obtained as spatial curves relating energy dissipation to system vibrations frequency
17 p3065 A69-33922

Energy dissipation in elastic systems as function of limiting damping characteristics of oscillations
17 p3065 A69-33923

Energy dissipation in vibrating warped turbine blades subject to complex stress-strain rate produced by simultaneous bending, torsional and tensile stresses
17 p3065 A69-33924

Facility for determining energy dissipation in materials under cyclic stresses or strains for wide range of temperatures
17 p2946 A69-33925

Facility for studying energy dissipation in refractory materials during fatigue tests in vacuum at various temperatures, describing principal components
17 p2947 A69-33926

Scale factor determination for energy dissipation at clamped ends, analyzing geometric parameter and clamping force effect on oscillation damping constant
17 p3065 A69-33927

Test facility to determine factors influencing aerodynamic energy dissipation of cantilever rods oscillating in airstream
17 p2947 A69-33928

Stationary liquid under pressure effect on energy dissipation of rectilinear pipelines under pure bending
17 p2904 A69-33930

Static tensile stresses effect on energy dissipation in alloys used in compressor blades found dependent on composition and heat treatment
17 p2991 A69-33934

Energy dissipation in fiberglass reinforced plastics subjected to axially induced sinusoidal stresses, noting absorption coefficient and hysteresis heating
17 p2993 A69-33937

Energy dissipation in bonded structures, analyzing vibration damping, hysteresis loop and absorption coefficient dependence on deformation energy
17 p3066 A69-33943

Aerodynamic energy dissipation during vibrations of bars in airstreams characterized by energy loss per cycle and logarithmic decrement
17 p3066 A69-33948

Magnetic storm energy balance, assessing solar corpuscular flux energy consumption in and beyond magnetosphere
17 p2964 A69-33959

Dynamic model of bodies with microstructure and nondissipative energy motion, discussing action steadiness, invariance conditions and Galilean relativity
17 p3067 A69-34149

Plastic energy dissipation rate during stable crack growth in sheet under uniaxial tension
18 p3212 A69-34345

Networks of ideal inductors, capacitors and periodically operated switches with no energy loss, deriving frequency-power formulas from response functions
18 p3111 A69-34682

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
18 p3197 A69-34749

Climatological patterns of atmospheric kinetic energy dissipation in free atmosphere derived from upper

wind statistics of Northern Hemisphere, using Kolmogoroff functions
18 p3166 A69-34825

Earth bow shock electrical conductivity estimation from macroscopic equations without knowing microscopic dissipation processes
18 p3131 A69-35191

Hexagonal and nonhexagonal cell phenolic honeycomb design as energy dissipating material noting processing, composite constituents, cell configuration and usage environment
19 p3353 A69-35503

Energy dissipation of solder-covered and solderless solar cells with TiAg contacts as function of storage time, temperature and humidity
19 p3253 A69-35706

Ruby laser resonator losses resulting from changes in mirror transmittance or inclination, or introduction of bleachable absorbers
19 p3331 A69-35863

Acoustic measurements at room temperature for determining losses in rocket chamber during combustion instability, using small scale model
19 p3394 A69-35946

Energy dissipation near tropopause determined from measured clear air turbulence spectra and probabilities
19 p3303 A69-36407

NonNewtonian power law fluids flow behavior in circular pipe entry region, taking into account energy loss due to viscous dissipation in boundary layer
19 p3240 A69-36472

Nondestructive test method using transducer action of flow in stress field causing plastic deformation with energy release as acoustic emission
19 p3314 A69-36634

Inductively coupled RF excited toroidal Ar ion laser, confining current discharge by strong axial magnetic field to reduce wall losses
19 p3338 A69-36690

Energy losses due to drag in unstable laminar fluid flow in tube
20 p3513 A69-36973

Mechanical loss factors calculated by approximation formula from resonance curves of Voigt-Kelvin and Maxwell models
20 p3623 A69-37435

Aluminum doped silicon solar cell energy loss coefficient under proton and high energy electron irradiation
20 p3465 A69-37911

Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
20 p3613 A69-38173

Semiempirical electron impact cross sections and energy loss functions applied to dayglow and auroral intensities calculation, discussing atomic and aeronomic implications
21 p3713 A69-38527

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures
21 p3848 A69-38706

Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices
21 p3776 A69-38708

Fluid loop rotational kinetic energy dissipator reducing time required for reaching WRESAT 1 satellite spin stabilization axis
21 p3828 A69-39767

Electron energy loss spectrum of nitrogen, suggesting atmospheric auroral nitrogen emissions compatibility with low energy electron impact excitation mechanisms
22 p3935 A69-39970

Differential approximation for radiant energy loss in nonequilibrium plasma generated from truncated Taylor series expansion of radiation source function
22 p3988 A69-40102

Seasonal effects on energy expenditure during rest and exercise at controlled ambient temperatures, noting effects on heart rate
22 p3890 A69-40211

Small losses measurement in circulators and reciprocal quadrupoles, using scattering matrix to eliminate mismatch errors
22 p3875 A69-40259

Radiant energy diffusion from spherical expanding matter for masses and velocities of model supernova outbursts, discussing thermonuclear and neutron star origins of supernovae
22 p4026 A69-40649

Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point
22 p3996 A69-41164

Power flow relations between randomly vibrating systems with weak linear elastic or dissipative coupling
23 p4227 A69-41877

Average total losses of H waves transmitted over waveguide communication lines by nanosecond pulse sequences
23 p4123 A69-41949

Electromagnetic oscillations emission by monochromatic electron beam in infinite waveguide formed by periodic diffracting array with energy losses, determining radiated power
23 p4124 A69-42031

Energy cost of muscular exercise in gastrocnemius muscle of dogs anesthetized with morphine, chloralose and urethane
23 p4093 A69-42065

Antenna losses produced by metal space frame radome determined by considering end effects, member junctions circulating currents, mutual scattering and near field effects
23 p4149 A69-42127

Integral energy loss spectrum of extensive air showers recorded by Haverah Park 50-m array
23 p4207 A69-42499

Hemolysis rates in various blood flows, considering effects on energy dissipation
23 p4100 A69-42533

Low energy electrons energy loss by inelastic collisions in moving through atmosphere, estimating cross sections and loss rates
24 p4351 A69-42763

Stellar neutrino energy loss due to electron-electron neutrino bremsstrahlung in nondegenerate gas determined from transition probability for charged baryons or leptons interaction
24 p4351 A69-42794

Thermal nonequilibrium state and effective collision frequency between protons and electrons in solar wind plasma, explaining abnormal dissipation
24 p4368 A69-43187

Energy dissipation in oscillating sphere filled with viscous fluid, giving fluid response by solving Navier-Stokes equation
24 p4305 A69-43587

Solar flare models in terms of energy storage and release mechanisms
24 p4374 A69-43622

Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
24 p4389 A69-43771

ENERGY DISTRIBUTION

NT SPECTRAL ENERGY DISTRIBUTION

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes
01 p0140 A69-11109

Total energy of plasma wave from second order energy, showing close approximation to wave packet energy
02 p0287 A69-11876

Energy distribution and capture cross section ratio limiting factors in semiconductors with deep energy levels
02 p0299 A69-12562

Positive Ar ion energy distribution for beam extracted from nonmagnetic hot cathode gas discharge ion source under various source conditions
03 p0427 A69-13102

Energy distribution among products of reactive collision of atomic H with Br molecule yielding HBr and Br atom, using perturbed Morse oscillator approximation
03 p0472 A69-13316

Energy partition between mechanical and magnetic modes in turbulent plasma in external field
03 p0476 A69-13384

Trouton-Noble experiment to detect motion of earth through ether by electromagnetic torque on charged suspended parallel plate capacitor, explaining null results
03 p0517 A69-14106

Statistical energy approach for analyzing steady state vibration distribution in composite structures in terms of energy balances
04 p0675 A69-14687

Inelastic collisions effect on electron energy distribution in low temperature diffusion dominated discharges
04 p0637 A69-15047

Variable energy blast waves analysis with reference to cylindrical spark channel formation, noting shock front velocity approximation
04 p0590 A69-15203

Low collision energy charge transfer and dissociative charge transfer between rare gas ions and molecular

- nitrogen, measuring nitrogen ion kinetic energy distributions
05 p0796 A69-15909
- Sounding energy optimum spatial distribution during scanning and detection of several signals, noting reduction of mean energy losses
05 p0723 A69-16786
- Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules
06 p0960 A69-17110
- Ground state energy of Anderson Hamiltonian calculated by cluster variation for cases of infinite d-d correlation energy
06 p0958 A69-17712
- Energy fluxes statistical distribution produced by random and regular energy sources
07 p1076 A69-18510
- Pulsation energy balance of turbulent jet of conducting fluid expanding in longitudinal magnetic field
07 p1192 A69-19021
- Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution
07 p1193 A69-19142
- Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements
07 p1201 A69-19464
- Energy deposits from decay of tritium incorporated into bacteria, using computer simulation for radiation dose distribution
07 p1068 A69-19490
- Tropospheric energy cycle interannual variability and quasi-biennial oscillation from geostrophic computations of eddy kinetic energy, energy transfer and internal redistribution
07 p1129 A69-19628
- Unstable elastoplastic brittle fracture criterion based on energy balance considerations
07 p1238 A69-19693
- Electron energy distribution measurements in carbon dioxide laser discharges noting similarity of distribution for nitrogen
08 p1323 A69-19801
- Micromachining with laser beam, choosing mirrors and lenses of optical system to provide uniform energy distribution for microwelding or hole boring
08 p1324 A69-19980
- Electron energy distribution function in plasma heated by electron-cyclotron resonance in adiabatic trap determined from bremsstrahlung spectrum
08 p1365 A69-20547
- Energy density and transport velocity of RF wave in plasma in damped oscillations region, discussing resonance
08 p1365 A69-20553
- Atmospheric structure and energy distribution of planetary nebulae central stars
08 p1393 A69-20570
- Contour of axisymmetric holes in dimensional electron-beam machining calculated from density distribution of transmitted energy
08 p1321 A69-20727
- Optical systems with quasi-monochromatic partially coherent illumination, discussing energy distribution computation program
08 p1353 A69-21096
- Temperature dependence of energy gap in gallium arsenide and gallium phosphide from absorption measurements
09 p1553 A69-21330
- Surface structures determination by energy analysis and low energy electron diffraction of scattered electrons
09 p1554 A69-21340
- Ultrashort light pulses problems in measurements of time characteristics and instantaneous power of laser radiation
09 p1516 A69-21575
- Circular central shading effect on energy distribution parameters of paraboloidal mirrors, noting reflected radiant flux power limitation
09 p1436 A69-21804
- Energy distribution in electron gun with single crystal spherical cathode, noting work function, space charge cloud and beam overlapping effects
09 p1464 A69-22396
- Computation and optimization of energy distribution over randomly oriented elements of radiation receiving surface of hollow collector of concentrator type solar device
09 p1442 A69-22534
- Angular energy distribution in gamma quanta beam during collision between laser photons and relativistic electrons
10 p1701 A69-23132
- Fast electron energy distribution function and atom concentration in first excited level in weakly ionized plasma, considering transitions between excited levels
10 p1739 A69-23628
- Stratified atmosphere mean vertical flux due to ground disturbances, obtaining results for various wind and temperature profiles
10 p1685 A69-23856
- Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities
10 p1785 A69-24100
- Mean absolute solar spectrum energy distribution from 1800 Å to 4 mm, noting solar constant and radiation intensity determination
11 p1951 A69-24242
- Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
12 p2132 A69-26097
- Light scattering from high reflectivity dielectric mirrors, measuring angular power distribution from beam axis by scanning with narrow slit
13 p2298 A69-27663
- Maxwellian velocity distributions simulated in one, two and three dimensions by superposition of N monoenergetic isotropic distributions, noting application to kinetic theory computation
13 p2313 A69-28222
- Half wave dipole antenna operational factors analyzed for RF radiation spatial power distribution from atmospheric cosmic ray showers
13 p2332 A69-28408
- Cosmic ray showers components relationships, analyzing superhigh energy nuclear cascade development, discussing components distribution function at constant proton energy
13 p2332 A69-28410
- Cosmic ray showers electron, positron and photon energy distribution functions calculated, considering positron annihilation, Compton effect and relativistic electrons formation
13 p2303 A69-28413
- Cosmic ray muons energy and angular distribution measurements, obtaining curve with respect to projection angles
13 p2332 A69-28420
- Bayes theory and nonclassical variation method to solve optimal energy distribution available for identifying weak signals in background noise
14 p2410 A69-28817
- Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
14 p2512 A69-28963
- Low voltage arc discharge characteristics in cesium vapor, considering energy balance, electron temperature, energy losses, volt-ampere characteristics, ignition, cathode temperatures, etc
14 p2401 A69-29234
- Electron energy distribution function and nonequilibrium ionization rate in near cathode layer of thermionic converter
14 p2404 A69-29255
- Energy momentum tensor in Einstein field equations derived from covariant field equations for vector meson
14 p2486 A69-29452
- Space radiometers energy characteristics calculation taking into account reflecting surface roughness and antennas directional patterns
15 p2575 A69-30338
- Comet Ikeya-Seki tail spectra from nebular spectrograph, tabulating energy distribution in comet tail, noting similarity to solar spectrum
15 p2685 A69-30524
- Electron energy distribution determination from electron synchrotron radiation spectrum for various magnetic field configurations within radio source
15 p2655 A69-30546
- Spatial and energy characteristics of laser with nonuniform transmittance across resonator mirrors, analyzing transverse modes interaction
15 p2634 A69-30962
- Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing electron-electron interaction insufficient to maintain equilibrium
16 p2796 A69-31772
- Earth-reflected solar energy /albedo energy/ distribution model, assuming isotropic scattering by homogeneous atmosphere
17 p2961 A69-33292
[AIAA PAPER 69-591]
- Solar power concentrator-absorber system, discussing flux distribution in focal plane and cavity heater optimization
17 p3022 A69-33795
- Ion energy distribution function and density profile in strong implosion wave generated by theta pinch discharge, investigating compression wave in deuterium
17 p3013 A69-33821
- Molecular gas absorption coefficient dependence on laser emission energy density, considering disturbed equilibrium distribution of molecules
17 p2983 A69-33973
- Bernoulli distribution and Monte Carlo method for electrical load analysis in designing electric power generation and distribution
17 p2905 A69-34090
- Differential cross sections for secondary electron production in atomic ionization by charged particle impact, using classical binary encounter approximation
17 p3009 A69-34189
- IR and optical measurement of Crab pulsar NP 0532, analyzing energy density per pulse and smoothness of visual data
18 p3191 A69-34318
- Light curve of pulsar NP 0532 represented with oblique rotator hypothesis, assuming concentrated emission at opposite spots on star
18 p3192 A69-34321
- Gaseous and solid phase properties of atomic and molecular systems, treating statistical energy distribution, kinetics, excited states and relaxation
18 p3178 A69-35406
- Single and two mode laser emission dependence on pumping power distribution between four level active centers of different types
19 p3333 A69-35878
- Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory
19 p3375 A69-35911
- Electron energy distribution for Cs plasma in emitter region of ignited mode thermionic converter, noting nonequilibrium ionization effect
19 p3380 A69-36442
- Electron momentum transfer cross sections by numerically solving electron energy distribution function from Boltzmann equation in Lorentz approximation
21 p3773 A69-38396
- Auroral electron and proton fluxes precipitation measurements by satellite, studying data in terms of spatial, energy and angular distributions
21 p3709 A69-38500
- Ionization wavefronts nonlinear analysis including energy effects and ionization wave structure, discussing Joule heating due to transverse electric field
22 p3990 A69-40758
- Electromagnetic cascade showers transition effect in various materials, measuring energy deposition as function of position
22 p3987 A69-41003
- Pulsed energy balance expressions for turbulent characteristics of incompressible circular flow in channel with inserted rotating cylinder
22 p3933 A69-41028
- Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution
23 p4196 A69-41696
- Microwave absorption by biological materials, noting energy distribution between reflected, transmitted and absorbed radiation as function of medium physical properties
24 p4270 A69-42574
- Energetics of planetary boundary layer /Prandtl layer/ from system of hydrodynamic equations, discussing flux divergence term importance in free-windless convection transition region
24 p4309 A69-43148

ENERGY EQUIPARTITION
U EQUIPARTITION THEOREM

- ENERGY LEVELS
NT ATOMIC ENERGY LEVELS
NT ELECTRON STATES
NT GROUND STATE
NT INTERMOLECULAR FORCES
NT MOLECULAR ENERGY LEVELS

Saturation peak half widths on Ne energy level population inside single frequency Michelson-type He-Ne

laser by tuned differential spectrometry, observing power broadening 01 p0089 A69-10182

Satellite optimal transfers from elliptic to parabolic orbits within set time 01 p0157 A69-11306

Energy distribution and capture cross section ratio limiting factors in semiconductors with deep energy levels 02 p0299 A69-12562

Inverse population of vibrational levels generation in polyatomic molecules 02 p0259 A69-12647

Mean life measurement of excited ions electronic levels using beam foil light source, emphasizing beam particle monitoring and theoretical equations 04 p0595 A69-14278

Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states 05 p0745 A69-15890

Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes 05 p0808 A69-16287

Relaxation time of carbon dioxide laser levels as function of water vapor, CO and Xe gas pressure measured by afterglow pulse gain technique [IEEE PAPER G-1] 05 p0774 A69-16314

Angular dependence of low energy electron impact excitation cross section of lowest molecular hydrogen triplet states 06 p0962 A69-17820

Radio recombination lines in populations of highly excited states of hydrogen, discussing collisional transition effects 06 p1010 A69-17970

Lasers, reviewing phenomenology, physical and theoretical fundamentals, quantized energy levels, population of energy levels and laser components 06 p0936 A69-18003

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum 07 p1199 A69-18686

Hole concentration at deep energy levels in p-type indium antimonide single crystals containing structural defects 07 p1199 A69-18687

Optical excitation process of energy states by light pulses of short duration compared to relaxation time, predicting Raman echoes [IEEE PAPER H-3] 07 p1152 A69-19062

Degree of population inversion and inverse temperature measurement in medium 07 p1137 A69-19761

Mutual influence of two different laser modes corresponding to two transitions with same ground level, using He-Ne DC laser 08 p1325 A69-20284

Relaxation times of carbon dioxide laser levels induced by radiation 09 p1515 A69-21488

Quark model to account for enormous energy from quasars 09 p1597 A69-22084

Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity 09 p1560 A69-22718

Interfacial charges in MOS transistors determined as function of surface potential by measuring channel conductance as function of temperature 10 p1744 A69-23178

Electronic states and minority carrier transport in mixed semiconductors with graded composition, noting position dependent band gaps and effective masses 10 p1745 A69-23360

Shallow impurity states in semiconductors, calculating bulk and surface energy eigenvalues in Si and Ge 10 p1745 A69-23361

Level degeneracy effect on nonlinear interactions between traveling waves of different planes of polarization 10 p1705 A69-23815

Reabsorption effect of emitted quantum on lifetime of excited levels in gas laser, determining capture factor 12 p1204 A69-26028

Anomalous interaction of argon and krypton ion laser lines, considering connecting radiative transitions and cross modulation 13 p2270 A69-27204

Radio emission from high level transitions in hydrogen calculated by superposing emission lines on background continuum, using Gaunt factor for free-free emission 13 p2327 A69-27596

Surface resistivity oscillatory dependence on magnetic field in single crystal metals, examining electron trajectories, energy levels and wave functions 13 p2316 A69-27641

Electrical properties of p-type indium antimonide, noting effects of deep level compensation on ν values 13 p2318 A69-27895

Monte Carlo method used to calculate probability of muon penetration to deep underground levels with sea level energies 13 p2333 A69-28424

Emissivity of two photons decay from metastable 2s level of pure hydrogen gaseous nebula, noting radiative and collisional excitation 14 p2529 A69-29975

Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels 15 p2666 A69-30060

Human locomotion analysis, measuring metabolic expenditure and mechanical energy levels of principal body segments during walking 15 p2558 A69-30587

Beam foil technique to measure energy transition levels radiative lifetime for nitrogen ions 17 p3009 A69-34154

Mean life of D energy level in N IV, discussing Be I isoelectronic sequence 17 p3009 A69-34187

Energy level NMR spectral analysis for spin systems with sets of magnetically nonequivalent chemical-shift equivalent nuclei 20 p3579 A69-37348

Differential equations for field amplitude and level populations applicable to solid state lasers output power pulsations 20 p3554 A69-37726

He-Ne laser oscillation frequency shifts with variations in DC discharge ascribed to changes in populations of He and Ne levels 20 p3556 A69-38124

Stellar nuclear reactions at low energies studied to provide predictions of cross sections in carbon burning 20 p3612 A69-38164

Optical pumping and selective population applications, considering double magneto-optic resonance and inelastic interatomic collisions 21 p3735 A69-38454

Exponential decay and mean lives of lowest P levels in N V measured with beam foil source, noting agreement with theories taking configuration interaction into account 21 p3774 A69-38760

Energy levels of multicharge acceptor centers and level splitting in InSb and GaAs deformed crystals, using multizone approximation 21 p3781 A69-39067

Response of three level particles system with equidistant spectrum under resonant action of acoustic and electromagnetic pulses sequence with different frequencies 21 p3737 A69-39068

Population and excitation rates of working levels of carbon dioxide laser calculated on basis of emission power, amplification coefficient and spontaneous emission intensity 22 p3964 A69-40795

Approximations for meson-nucleus scattering length from energy level measurements on mesonic atoms, emphasizing formula for negative pi mesonic atoms 22 p3987 A69-41004

Prebiological chemical evolution, studying synthesis and degradation rates relationship at primitive environment energy levels 24 p4269 A69-43514

ENERGY METHODS

NT BERNSTEIN ENERGY PRINCIPLE

NT STRAIN ENERGY METHODS

Electrical equation of state of metals determination from density, conductivity, energy and metal vapor velocity measurements in wire explosions 01 p0117 A69-10659

Structural designs for minimum flexibility or weight using energy intensity per unit mass parameter 02 p0345 A69-12380

Rayleigh-Ritz finite element method for approximate solution of nonlinear energy functional describing large deflection bending behavior of uniform beam under point loads 05 p0833 A69-15711

Generation process in three stage He-Ne cascade laser with wideband resonance, using simplified energy level scheme 06 p0934 A69-17496

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression [AIAA PAPER 69-119] 06 p1028 A69-18159

Elastic stability of one dimensional structures analyzed by energy method, discussing deformable line, conservative forces and linear stability 08 p1418 A69-20846

Matrix elements for asymmetric rotors using rigid rotor reduced energies, describing computations method 09 p1614 A69-21913

Energy theorem for time dependent materials, deriving convexity conditions for minimum work and maximum complementary work functions 11 p1969 A69-24412

Solution for kinetic energy equation for organic semiconductors with narrow conduction band situated in strong electric field 12 p2144 A69-26673

Energy detection of random processes in colored Gaussian noise, discussing filtering, threshold detection, false alarm, probability distribution and density 13 p2220 A69-27937

Kolmogorov-Prandtl turbulence energy hypothesis extended from turbulent region of one dimensional flow to laminar sublayer, obtaining numerical solutions for Couette flow 13 p2250 A69-28339

Energy separability method for linear systems in transient evolution using two new identities 13 p2370 A69-28634

Atmospheric circulation by energy concepts, giving quantitative analysis of interaction between upper and lower atmosphere 14 p2477 A69-29825

Energy principle applied to Astron type device stability based on model with rigid E layer electrons, finding critical pressure expression for ballooning modes 16 p2821 A69-32035

Energy method determining sufficient conditions for fluid motion stability described by infinitesimal theory of viscoelasticity, restricting analysis to confined fluids or periodic velocity field 17 p2949 A69-33015

Perturbation procedures applied to energy computation for ground and first excited state of hydrogen molecule at large separation 17 p3009 A69-34170

Quasi-static crack growth in viscous bodies analyzed by continuum mechanics, rheological models and energy equation, discussing fine structure 18 p3215 A69-34570

Structural vibrations characteristics using expression of complex energy applied to structure, discussing coupling between damping modes [ONERA-TP-724] 18 p3218 A69-34639

Active attitude control method with energy increases and decreases induced to modify attitude motions for particles and rigid bodies 19 p3429 A69-35958

Uniqueness theorems for energy methods solution of equations of dynamic thermoelasticity and viscoelasticity 19 p3439 A69-36470

Energy criteria inconsistency in evaluating frequency band changes attributed to simultaneous narrowing and broadening of different signal power bands 19 p3278 A69-36716

Bending of normally loaded simply supported rectangular plates in large deflection range solved by nonlinear differential equations and minimum potential energy principle 19 p3445 A69-36828

Interface electron transport phenomena in stress corrosion, expressing defect movements in terms of electron energy dynamics 19 p3349 A69-36889

Rotta analysis for linear flow transformation into turbulent flow, discussing Reynolds numbers 20 p3513 A69-37086

Energy formulation extended for plane anisotropic rectangular plates, handling nonuniform properties and loadings 20 p3627 A69-37766

Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core 22 p4038 A69-39895

- Natural frequency equations for torsional vibration of fixed/fixed and fixed simply supported uniform thin walled beams of open section based on energy method
22 p0400 A69-39935
- Pulsed energy balance expressions for turbulent characteristics of incompressible circular flow in channel with inserted rotating cylinder
22 p3933 A69-41028
- Potential energy modeling method for optimal design of structural systems with diverse performance criteria, giving truss design example
23 p4228 A69-41923
- Large deflection of three dimensional bar structures stability analyzed by potential energy minimization method, considering radome design
23 p4232 A69-42141

ENERGY OF FORMATION

- Linear elastic theory for calculating monovacancies entropy and energy of formation in metals
24 p4360 A69-42649

ENERGY REQUIREMENTS

- Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and ions, calculating ionic heats of formation and bond dissociation energies
02 p0205 A69-12464
- Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
03 p0519 A69-13068
- Wall attachment type fluidic logic devices with low power consumption requirements, noting monostable and bistable devices
05 p0704 A69-16002
- Radar signal parameters measurements consisting of SNR estimation and optimum energy supply determination from SNR estimation
07 p1085 A69-19153
- Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
14 p2530 A69-28750
- Energy cost of piloting helicopters and fixed wing aircraft calculated from expired minute volume and air oxygen content measured during basal state and flight
22 p3891 A69-40218
- Regression relations for energy expenditure in work predicted from heart rate and pulmonary ventilation in volunteers carrying loads upstairs
22 p3891 A69-40220
- Eddy current plasmoids formation in potential magnetokinematic plasma flux found economical in terms of energy requirements
23 p4214 A69-41834

ENERGY SOURCES

- Hydrocarbon-air fuel cell producing electric power automatically for five days
01 p0013 A69-10965
- Energy source specifications and control techniques evaluated for microwave amplifier arrays, discussing use of common power supply and energy storage bank
01 p0047 A69-10998
- Liquid lasers compound range of organic type, circulating system of inorganic type and power peaks
01 p0092 A69-11194
- Technique for combining large numbers of solid state energy sources by using dense array of radiating elements
02 p0217 A69-12148
- Energy sources and properties of quasars and radio galaxies by X ray astronomy
02 p0310 A69-12793
- Homopolar generator as energy store for large laser pumping
04 p0612 A69-15151
- Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance
04 p0551 A69-15310
- Gas accretion on neutron star surface as energy source for X ray radiation
05 p0814 A69-15847
- High energy density lithium/dichloroisocyanuric acid battery system discharging under constant voltage and load conditions [ECS PAPER 15]
05 p0706 A69-16231
- Plasma instability role in radiant energy release from astronomical objects, noting plasma instabilities in solar system, cosmic rays, galactic and extragalactic objects
06 p1009 A69-17967

- Electronic circuits power supply onboard space vehicle, discussing chemical, solar and nuclear energy sources
07 p1225 A69-18251
- Energy fluxes statistical distribution produced by random and regular energy sources
07 p1076 A69-18510
- Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
07 p1178 A69-18825
- Two dimensional flat geometry for initial solar flare development stage, discussing tearing mode energy source for solar flares and plasma compressibility effects
09 p1583 A69-22757
- Microwave solid state power sources including transistors, varactor harmonic generator chains, tunnel diodes, avalanche transit time devices, etc
10 p1662 A69-23144
- Astronautics - Conference, Braunschweig, West Germany, October 1968, Volume 2, Energy sources
12 p2014 A69-25862
- Cadmium sulfides thin film solar cells for supplying power to instrumentation and data telemetry on longer lived balloons
15 p2553 A69-31287
- Satellite solar power station proposed for power generation for future requirements, discussing world energy needs and finiteness of fossil fuel reserves
16 p2867 A69-31817
- Multispectral imaging remote sensors, analyzing energy sources affecting systems synthesis
17 p2977 A69-34064
- Acoustic gravity waves generated in isothermal atmosphere by ground energy source calculated using stationary phase method and kinematic theory
18 p3129 A69-34953
- Nova luminosity sources during premaximum, considering stellar shell separation and intense ejection of matter
19 p3426 A69-36574
- High energy phosphate splitting flux energy requirements not met by oxidation during supermaximal exercise, noting glycogen splitting into lactic acid after phosphate exhaustion
23 p4100 A69-41443
- Book on interaction between oscillatory systems and energy source of limited capacity, examining stability and resonance phenomena
23 p4170 A69-42166
- Radioisotope thermal energy (RITE) source for integrated life support systems for two man 180 day space station mission, determining optimum material selection and design details
23 p4189 A69-42268
- Solar flares energy supply origin from studying magnetic field behavior, flare position and initial evolution
24 p4366 A69-42687
- Magnetic field energy supply to solar flares from consideration of energies in solar active regions
24 p4370 A69-43606
- Solar flare energy source derived from energetic protons trapped in sunspot magnetic field prior to flare occurrence
24 p4374 A69-43623

ENERGY SPECTRA

NT ELECTRONIC SPECTRA
NT NEUTRON SPECTRA

- Continuous random process spectral density at PAM system output
01 p0050 A69-10211
- Equation of characteristic functional for Burgers one dimensional model fluid turbulence using logarithmic expansion method, discussing change in time of energy spectrum
01 p0059 A69-10338
- Energetic X ray intensities from large and small Magellanic clouds investigated by balloon flight sky survey, noting energy flux upper limits
01 p0150 A69-10370
- Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum
01 p0139 A69-10833
- March 1966 Forbush decrease observed in underground meson component at 70 mwe compared with neutron and sea level meson intensity variations
01 p0146 A69-11129
- Electron flux intensities and energy spectra in inner radiation zone, noting decay constants
01 p0147 A69-11235

- Longitudinal correlation lengths in grid turbulence air flow transport subjected to planar deformation measured from energy spectra of velocity fluctuations
02 p0192 A69-12626
- Superconductor energy spectrum gap, discussing temperature dependence, anisotropy, thermodynamic and kinetic properties and relation to Fermi surface and phonon spectrum
03 p0485 A69-13331
- Absolute cross sections for coincidence detection of deuteron breakup by 42 Mev alpha particles, showing He 5 and Li 5 final state interaction peaks
03 p0472 A69-13469
- Galactic cosmic rays energy modulation spectrum in interplanetary space, showing influence of solar wind velocity and diffusion coefficient dependence
03 p0501 A69-13527
- Polar aurora incident energetic particles spectroscopic analysis, showing system of lines and bands intensity dependence on particle energy spectrum and magnetic activity
05 p0752 A69-15799
- High energy proton and neutron fluxes and spectra from nuclear emission stacks on Cosmos satellites, calculating cosmic radiation doses
05 p0814 A69-16051
- Cosmic ray electron flux and energy spectrum from balloon data obtained at Palestine, Texas, monitoring proton flux periodically
05 p0815 A69-16250
- Auroral electron energy spectrum observed by sounding rocket reveals smooth continuum with peak to produce auroral arcs
05 p0756 A69-16274
- Energy spectrum and intensities of medium and very heavy nuclei in primary cosmic radiation
05 p0816 A69-16365
- Heavy nuclei energy spectrum in primary cosmic rays explained by assuming two component charged nuclei
05 p0816 A69-16366
- Secondary particle spectra from proton-proton interactions analyzed in two temperature statistical model, considering momentum distributions
05 p0797 A69-16368
- Galactic magnetic field estimation obtained from cosmic ray electron spectrum and radio data
05 p0828 A69-16612
- Temperature dependence of Josephson critical current in superconductor model having anisotropic energy gap
05 p0810 A69-16803
- Relation between energy spectrum and potential drop in plasma expelled from hot cathode tube into vacuum derived by electrostatic analyzer
06 p0963 A69-16899
- Optical mean energy distribution of quasars, discussing red shift effects, significance of physical origin of optical continuum radiation and K-term magnitude determination
06 p0999 A69-16975
- Low energy diffuse cosmic X radiation, considering adequacy of single exponent power law spectrum [ISAS-428]
06 p0986 A69-17024
- Cosmic radiation propagation in interstellar space, discussing differential kinetic energy spectra of protons, He, C and O nuclei and Fe
06 p0988 A69-17269
- Cosmic ray propagation model, considering determination of He interstellar spectrum and amount of matter traversed at low energies
06 p0988 A69-17270
- Heavy nuclei abundances and energy spectra in primary cosmic rays, using blob gap parameter as measure of primary ionization
06 p0988 A69-17274
- Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei
06 p0989 A69-17280
- Galactic cosmic rays anisotropies due to density gradient perpendicular to ecliptic plane studied, using diurnal and semidiurnal component and intensity deficiency
06 p0990 A69-17289
- Astrophysical aspects of primary energy spectrum deduced from shower size spectra and high energy interactions of extensive air showers
06 p0990 A69-17298
- Extensive air shower high energy muons measurements noting energy spectrum, lateral spread and dependence on shower size
06 p0990 A69-17300

Energy spectra of muons determined from knock-on electrons projected angles of emission in C, Al and Cu
06 p0991 A69-17305

Primary electrons implications on cosmic ray confinement in Galaxy, astrophysical aspects and problems of energy spectrum
06 p0991 A69-17308

Low energy photon spectrum at balloon altitudes, noting small geomagnetic latitude dependence
06 p0992 A69-17313

Nonadiabatic particle losses effect on integral proton flux in inner radiation belt, discussing proton energy spectrum
06 p0921 A69-17742

Electron and phonon tunneling spectroscopy in metal Ge contacts, noting improved agreement with one electron model
06 p0982 A69-18234

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum
07 p1199 A69-18686

Differential energy spectrum of protons and helium nuclei using lithium drifted silicon detectors and scintillator-Cerenkov counter
07 p1204 A69-18833

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays [IEEE PAPER 3C-4]
07 p1135 A69-19198

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects
07 p1206 A69-19269

Arrival time distribution and energy content of extensive air shower at large core distances, discussing photon energy spectra and Monte Carlo calculation
07 p1186 A69-19410

Cosmic ray nuclei energy spectra and abundances above 20 Mev/nucleon determined by OGO-1 satellite experiment, considering He, B, C, N, O, Ne, Mg, Si, Mn, Fe, Co and Ni
08 p1378 A69-20067

Energy dissipation of solar particles in atmosphere for 3914 and 5577 Å bands, computing light emissions associated with PCA
08 p1378 A69-20186

Energy spectrum of primary cosmic ray helium nuclei from nuclear emulsion stacks exposed in sounding rocket flights
08 p1378 A69-20264

Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding potential curve to particle floating potential, kinetic temperature, etc
08 p1364 A69-20521

Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation
08 p1380 A69-20632

Cosmic ray Li, Be and B nuclei measurements, analyzing differential energy spectra, L-M ratio, atmospheric and solar modulation
08 p1380 A69-20638

Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions
09 p1544 A69-21336

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability
09 p1588 A69-21365

Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions
09 p1485 A69-21530

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
09 p1487 A69-21554

Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
09 p1576 A69-21699

Power spectrum of nonstationary processes with periodicity in two dimensional autocorrelation function based on Fourier transform
09 p1455 A69-21847

Mean and turbulent energies and energy spectra of large scale wind velocity pulsations, analyzing annual variation for fixed wave numbers
09 p1536 A69-21861

Flux and energy spectrum of secondary electrons at balloon altitude in atmosphere, correcting Beedle and Webber plotting error
09 p1490 A69-21914

Photometric standard based on calibration of Vega by Hayes compared with six color magnitudes
09 p1603 A69-22233

Energy spectra and angular dependence characteristics of electromagnetic wave scattered on statistically uneven surface studied by vector form of Kirchhoff integral
09 p1459 A69-22635

Cosmic rays origin, measurements of energy spectrum and stellar diurnal variations
10 p1757 A69-22823

Forbush decreases spectra in low energy region from satellite measurements of neutron and hard component of cosmic rays
10 p1758 A69-22829

Cosmic ray electrons and gamma quanta at lower atmosphere recorded with balloon equipment, plotting vertical profiles of electron energy spectra
10 p1758 A69-22830

Slow atmospheric neutron energy spectrum determined by resonance detectors and $1/\nu$ detectors, measuring cadmium ratio dependence on longitude and latitude
10 p1758 A69-22831

Solar protons balloon measurements following flare, noting integral proton flux and energy spectra
10 p1767 A69-23763

Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum
11 p1936 A69-24700

Radioactive light sources in photoelectric photometry, analyzing characteristics, brightness and stability of light flux and energy spectrum
11 p1951 A69-25421

Correlation functions and spectral density of current fluctuations in weakly ionized plasma flows
11 p1934 A69-25715

Solar radio emission bursts periodicity relation to burst intensity
12 p2157 A69-26234

Atmospheric turbulent energy spectra in boundary surface layer, considering homogeneous axisymmetric model in presence of temperature and velocity gradients
12 p2067 A69-26355

Primary cosmic ray energy spectrum studies during 11-year cycle based on changes in intensity at various altitudes
12 p2149 A69-26682

Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
12 p2151 A69-26943

Interplanetary plasma measurements by Luna, Mars 1, Zond 2 and Venera 3 probes, including solar plasma flux energy spectra diagram
13 p2336 A69-27354

ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons
13 p2327 A69-27754

Electron and proton spectra in 1-13 keV range relative to geomagnetic field lines measured by ESRO 1 satellite during Aurorae mission
13 p2328 A69-27755

Radiative heat transfer of materials, discussing spectrum characteristics
13 p2373 A69-27768

Cosmic ray postinteraction nuclear active particle energy spectrum measurements with ionization calorimeter, noting energy underrating
13 p2331 A69-28392

Nuclear active cosmic ray component energy spectrum determined from calorimetric ionization burst measurements, discussing nuclear particle interactions absorption coefficients
13 p2331 A69-28393

High energy nuclear active particles and muons studied with calorimeters, noting cascades muon origin and muon energy spectra
13 p2331 A69-28395

Nuclear active cosmic ray component particle energy spectrum and nuclear cascade avalanches curves, using ionization calorimeter with Pb absorber
13 p2303 A69-28399

High energy muons energy spectrum in extensive cosmic ray showers from spectrum study of ionization bursts due to penetrating component
13 p2332 A69-28403

Cosmic ray chain reaction particles energy spectrum determination in heavy media, discussing cascade parameter application in showers development
13 p2303 A69-28412

Monte Carlo method used to calculate probability of muon penetration to deep underground levels with sea level energies
13 p2333 A69-28424

Continuous random process spectral density at PAM system output
14 p2424 A69-28748

Electromagnetic energy spectra of lightning expressed as function of electric field spectral density of atmospheric
14 p2437 A69-29076

Plasma screening effect on energy spectra of electrons localized at surface charges in weakly doped unipolar n-type semiconductor
14 p2505 A69-29170

Soviet book on solar cosmic rays covering origin, propagation, energy spectrum, diffusion dependence on particle energy and distance, solar flares, etc
14 p2514 A69-29816

Duoplasmatron charged particles energy spectra analyzed as function of discharge parameters
14 p2501 A69-29955

IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra
15 p2673 A69-30014

Negative curvature electron energy spectrum of discrete radio source model, assuming acceleration by Fermi mechanism and energy loss by synchrotron radiation
15 p2687 A69-30540

X ray energy spectrum from Crab Nebula and diffuse background on celestial sphere near galactic anticenter, noting spectral index
15 p2675 A69-30759

Eigenfrequency spectrum and stability of perfectly conducting inviscid incompressible fluids in cylindrical channels and twisted magnetic fields, noting flowfields and critical wavelengths
15 p2664 A69-31063

Photometric rocket measurements in hydrogen auroras, finding vertical H beta emission profile estimate of proton energy spectrum for H beta production cross section
15 p2598 A69-31307

Rocket observations of protons and alpha particles energy spectra after solar flares, noting riometer and magnetometer recordings
15 p2677 A69-31329

Ground level muon density of extensive air showers related to threshold energy and zenith angle for primary particles
15 p2678 A69-31483

Pulsar NP 0532 in Crab Nebula observed by rocket and telescope showing strong pulsed X ray signal
15 p2679 A69-31529

Kovaszny spectral theory of turbulence, discussing energy spectrum decrease in viscous subrange
16 p2768 A69-31686

Metagalactic electrons inverse Compton effect on relict radiation to interpret cosmic isotropic X radiation entire energy spectrum
16 p2847 A69-31800

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 Å band, obtaining ionization cross section
16 p2850 A69-32315

Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions
16 p2783 A69-32525

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
16 p2784 A69-32549

Spatial and temporal dependence of trapped particle energy spectra on basis of bimodal diffusion
16 p2852 A69-32619

He II excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well
17 p3008 A69-33118

GaAs semiconductor laser emission band homogeneity and continuous energy spectrum levels contribution to induced optical transitions
17 p2984 A69-34161

Solar thermonuclear reactions studied by emitted neutrinos detection, plotting energy spectra for sensitivity of Cl 37 detection system
18 p3185 A69-34278

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability
18 p3197 A69-34755

- Energy spectrum of Fe group heavy nuclei from fossil track densities depth variation in hypersthene and oligoclase crystals from meteorite Saint-Severin, noting ablation
19 p3410 A69-36095
- Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momentum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum
19 p3424 A69-36335
- Turbulence energy spectra in free atmosphere with convective layer surmounted by inversion layer, noting power law followed by velocity components
19 p3362 A69-36406
- Energy spectrum and transport mechanism for current carriers in amorphous-crystalline semiconductors, measuring thermostimulated conductivity, induced photoconductivity, optical quenching, etc
19 p3391 A69-36558
- Ensembles of random Hermitian cyclic matrices in statistical theory of complex systems energy level spectra, noting Gaussian density function of eigenvalues
20 p3567 A69-36988
- High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
20 p3591 A69-37961
- Energy spectrum, spatial characteristics and displacements of auroral zone X rays from X ray spectrometry
21 p3787 A69-38359
- Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields
21 p3707 A69-38490
- Energy spectra measurements of turbulent velocities behind grids of different geometries noting relation to deviation from isotropy
21 p3693 A69-38704
- One dimensional model and equation of energy spectrum function solved in studying turbulent diffusion in fluid at rest
21 p3693 A69-38749
- Meteoritic compositions used to determine prehistoric cosmic rays composition and energy spectrum
21 p3789 A69-38815
- High energy cosmic rays primary spectrum determined from observations of secondary components including gamma rays, muons and air showers
21 p3790 A69-38822
- Approximate formula for energy spectrum of isotropic turbulence at large wave numbers, showing agreement with Gaussian exponential form
21 p3694 A69-38834
- Cosmic ray electron recorder for measuring intensity, energy spectrum and angular distribution of electron fluxes within specific energy range
21 p3724 A69-39074
- Galactic cosmic rays, discussing chemical composition, isotopic separation, proton and alpha particles energy spectra, propagation, interactions, etc
21 p3791 A69-39502
- Electron energy loss spectrum of nitrogen, suggesting atmospheric auroral nitrogen emissions compatibility with low energy electron impact excitation mechanisms
22 p3935 A69-39970
- Sco X-1 X-ray source energy spectrum and time variation from rocket flights in India
22 p4030 A69-40774
- Neutrons energy spectrum at sea level calculated and proved consistent with satellite cosmic ray data
23 p4205 A69-41701
- Integral energy loss spectrum of extensive air showers recorded by Haverah Park 50-m array
23 p4207 A69-42499
- Low energy galactic cosmic ray spectrum determined from ionization rate per hydrogen atom, correlating peak intensity with stellar particle emission high energy portion
24 p4365 A69-42608
- N II 4176 A emission line occurrence in connection with type B auroras, studying secondary electrons energy spectra
24 p4309 A69-43012
- Horizontal wind speeds kinetic energy spectrum near surface, discussing diurnal variations
24 p4343 A69-43063
- H beta production in hydrogen aurora measured during rocket flight, obtaining proton energy spectrum
24 p4309 A69-43170
- Cosmic ray electron energy spectrum and intensity measurements indicating time variations attributed to solar modulation effects
24 p4367 A69-43175
- Crossed beam apparatus /evatron/ for studying energy spectra of crossed positive ethylene ion beams and neutral ethylene molecule beams
24 p4280 A69-43813
- ENERGY STORAGE**
NT ELECTRIC ENERGY STORAGE
NT HEAT STORAGE
- Energy source specifications and control techniques evaluated for microwave amplifier arrays, discussing use of common power supply and energy storage bank
01 p0047 A69-10998
- Stored energy function of hyperelastic material by Lie group extension of Truesdell theorem on symmetry groups
04 p0680 A69-14945
- Line broadening possibility for Q switched iodine laser with aid of magnetic effect /Zeeman effect/, noting energy storage capability increase
05 p0773 A69-16288
- Electrochemical energy storage and conversion for space flight, emphasizing hydrogen oxygen and silver zinc batteries, Gemini and Apollo programs, etc
12 p2015 A69-25866
- Transient temperature response of cylindrical composite energy storage devices with thermal conductivity, density and specific heat independent of temperature
22 p3868 A69-40132
- Solar flare models in terms of energy storage and release mechanisms
24 p4374 A69-43622
- ENERGY TRANSFER**
NT COUPLING CIRCUITS
- Sensitivity of voltage transfer function relative to variation in value of components of resistance terminated reciprocal reactive network
01 p0049 A69-10069
- Mass or energy transfer in reinforced media, discussing components characteristics and role of diffusion processes
01 p0173 A69-10079
- Excitation heating energy pumping mechanism for explaining dynamic equilibrium in C rich arc plasmas with high ion temperature/electron temperature ratio
01 p0126 A69-10276
- Quasi-monochromatic wave dispersion relation and energy transfer in inhomogeneous anisotropic medium
01 p0126 A69-10278
- Nonradiative transfer of excitation energy between mixed trinuclear complexes of Tb and Eu ions with lactose in aqueous solution
01 p0023 A69-10288
- Thermal model for interaction of exploding wires with methane atmosphere, discussing energy transfer efficiency in high temperature pyrolyses near explosion
01 p0119 A69-10674
- Intermolecular collision induced vibration to vibration energy transfer in nitrous oxide in various gas mixtures, measuring fluorescence and relaxation rates
01 p0123 A69-10684
- Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration
01 p0145 A69-10790
- Solar flare mechanism from analysis of energy transfer in quiet solar atmosphere, discussing convection, radiation, mechanical and MHD waves and thermal conduction
01 p0145 A69-10990
- Turbulent flow between parallel plates, discussing turbulence generation by energy addition
01 p0061 A69-10993
- Energy transport in atmosphere studied by considering sphere in isotropic fluid in infinite field without gravity, using first law of thermodynamics
01 p0067 A69-11032
- Resonance energy transfer mechanism in Forster-Dexter theory of electron energy transfer by resonance interaction in condensed media, using many particle treatment
01 p0121 A69-11257
- Mathematical models of energy and mass transfer processes in closed loop multicomponent life support systems
01 p0021 A69-11316
- Transhorizon UHF energy transmission via tropospheric scatter, using propagation path model
02 p0209 A69-12350
- Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
03 p0474 A69-13114
- Energy transfer and viscosity coefficients during gas molecular interactions, using spherical monatomic gas molecules model
03 p0415 A69-13419
- Conceptual problems of quantum optics, considering quantum mechanical and classical descriptions of effect of field on matter for damped and undamped modes
03 p0467 A69-13474
- Energy transfer in circulatory force fields, noting mechanism changes for simultaneously operative original field and adjoint field energy sources
04 p0671 A69-14415
- Laser with combined active medium resulting from investigation of autoresonant energy transfer in composite crystals with optical centers
04 p0611 A69-14546
- Motion of vapor derived from solid material vaporization and subsequent heating by nonequilibrium continuum radiation, noting continuity equations and energy transfer
04 p0686 A69-14985
- Turbulent transport of energy in atmospheric boundary layer near earth surface resulting from forced convection
04 p0627 A69-15087
- Perturbation method determination of gravitational induction for quasi-static axisymmetric systems
04 p0661 A69-15190
- Internal gravity waves propagation in shear flow, detailing interaction stress in incompressible stratified Boussinesq liquid, conservation energy exchange and radiation stress
05 p0788 A69-15721
- Energy transfer from radiating sphere to medium with molecular heat conduction
05 p0845 A69-15782
- Diagrams for power transfer parameters between double tuned bandpass filters with arbitrary coupling
05 p0729 A69-15964
- Relaxation time of carbon dioxide laser levels as function of water vapor, CO and Xe gas pressure measured by afterglow pulse gain technique [IEEE PAPER G-1]
05 p0774 A69-16314
- Stimulated Compton effect for energy transfer between relativistic electrons and radio photons in quasi-stellar objects
05 p0828 A69-16652
- Cross field energy transfer in collisionless plasma across earth magnetospheric boundary, using computer and one dimensional sheet model simulation [ISAS-429]
06 p0916 A69-17023
- Resonant four wave interaction for nonlinear energy transfer in electron plasma oscillations
06 p0963 A69-17143
- Solar flare eruptions due to current disruption, leading to magnetic energy transfer from whole current circuit to very small volume
06 p0995 A69-17444
- Mathematical description of electromagnetic field containing plasma, discussing energy transfer modes between plasma and containing field
06 p0965 A69-17517
- Life support system energy efficiency, treating transfer equations of closed space regeneration systems
06 p0882 A69-17644
- Power flow in cyclotron and plasma modes propagating in waveguide filled with cold collisionless axially magnetized plasma
06 p0897 A69-17760
- Vibrational excitation in diatomic gas mixtures by translation to vibration energy conversion in simple collisions and by vibrational energy exchange between components
06 p0962 A69-17821
- Zeta discharge in low density regime characterized by strong turbulence, rapid loss of plasma, resistance higher than predicted and high ion temperature
06 p0970 A69-17955
- Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency [AIAA PAPER 69-113]
06 p0971 A69-18123
- Surface parameters influence on energy transfer to arc jet anode, discussing work function, accommodation coefficient and diffuse reflection coefficient of electrons [AIAA PAPER 69-107]
06 p1039 A69-18185
- Radiation transfer in resonance lines and in recombination continuum in plasma, discussing frequency redistribution during reradiation and optically dense systems
07 p1188 A69-18282
- Laser excited vibrational fluorescence for determining vibrational energy transfer rates in HCl-carbon dioxide, HCL-HI and HI-carbon dioxide
07 p1144 A69-18289

Radiative transfer problems in inhomogeneous anisotropically scattering plane parallel planetary atmospheres with internal source distributions solved by recursive method
07 p1213 A69-18610

Meteorological satellites observation of energy exchange between earth and space, discussing planetary albedo, energy absorption and source and sink regions
07 p1127 A69-19261

Geomagnetic field line stretching outward due to energy entry in form of large number of charged particles or increase in particle temperature/inflation/
07 p1127 A69-19357

Energy transfer through ionospheric electrons, discussing degradation of fast electrons and role of neutral gas motion in ionospheric currents
07 p1128 A69-19369

Discrete ordinate difference equations of radiative transfer for slab using invariant method, noting storage and computing time advantages
07 p1183 A69-19623

Tropospheric energy cycle interannual variability and quasi-biennial oscillation from geostrophic computations of eddy kinetic energy, energy transfer and internal redistribution
07 p1129 A69-19628

Nonlinear interactions of positive and negative energy electrostatic modes of plasma immersed in magnetic field, discussing instability criterion and Landau damping [IAEA PAPER CN-24/E-13]
07 p1196 A69-19768

Exact solution to kinetic equation for resonant three wave coupling in weakly turbulent plasmas, assuming only single triplet of modes interaction
08 p1360 A69-19989

Radiative transfer by doubling very thin layers in problem of diffuse reflection from plane-parallel atmosphere eliminates numerically solving transfer equation
08 p1420 A69-20064

Radiative transfer equation solution for spectral line formed in two dimensionally varying atmosphere extended to continuum radiation in inhomogeneous atmospheres
08 p1386 A69-20077

Temperature profile calculations for high pressure electric arcs using diffusion approximation for radiant flux density, taking energy transfer into account
08 p1420 A69-20148

Drift measurements of rate constants for charge transfer in ion-molecule processes
08 p1355 A69-20210

Meridional flow, angular momentum and energy flux in atmosphere calculated from IGY data
08 p1346 A69-20312

Energy consideration in electron beam welding, obtaining expression for penetration decrease in terms of thermal diffusivity [ECS PAPER 144]
08 p1320 A69-20360

Green function in closed form for energy transport equation solution in axisymmetric Oseen flow
08 p1305 A69-20850

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions
08 p1358 A69-21011

Energy transfer in gases transmitting heat by interaction of thermal conduction and IR radiation
09 p1621 A69-21442

Momentum and energy transfers analogy in turbulent convection fluid flow emphasizing difficulties in case of liquid metals
09 p1480 A69-21687

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile [AIAA PAPER 69-142]
09 p1560 A69-21900

Variational principle to obtain variational estimate of arbitrary functional of solution to radiative transfer equation
09 p1541 A69-22253

Eddington approximation to radiative transfer equation extended to time dependent multifrequency problems
09 p1541 A69-22254

Algorithm for mean energy transmission coefficient of fundamental mode in beam guide with given inhomogeneities, discussing mode conversions
09 p1469 A69-22629

Early disturbances in active migration of potassium 42 ions in irradiated erythrocytes in rats, showing relation between influx and energy exchange in cells
10 p1647 A69-23966

Vibrational energy transfer computed for processes in carbon dioxide-nitrogen laser based on vibrational relaxation data
10 p1706 A69-24083

Radiative transfer equation in nonuniform magnetoactive medium derived from continuity equation for radiative energy density in space of coordinates and wave vectors
10 p1742 A69-24143

Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction
11 p1997 A69-24457

Multiple scattering of solar radiation in turbid atmosphere, considering equations of sky radiation and radiative transfer
11 p1911 A69-24587

Radiant power flow, transmittance and absorbance of absorbing thin film multilayer in terms of characteristic matrix and admittance of surrounding media
11 p1896 A69-24850

Solar wind particles acceleration and transformation into radiation belt particles
11 p1948 A69-24855

Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p1313 A69-25984

Translational-vibrational energy transfer value between atom and diatomic molecule determined using steric factor with repulsive interaction potential
12 p1334 A69-25988

Energy exchange between LF waves and magnetospheric energetic particle population by bounce resonant interaction
12 p2073 A69-26946

Spectral line formation in nonlinear multilevel atom line transfer problems, considering radiation transfer through plane parallel atmospheres of H and Mg atoms
12 p1333 A69-26967

Energy transfer mechanisms between translational, rotational, vibrational, chemical and electronic degrees of freedom in hypersonic shock wave in high temperature air
12 p2063 A69-26969

Resonance line radiation transfer in finite homogeneous cylinders of various shapes and optical thicknesses using Monte Carlo method
12 p191 A69-26970

Vibrational energy exchange between diatomic molecules by IR emission of CO fundamental behind shock waves
13 p2301 A69-27361

Heat transfer in solid bodies, deriving thermal conductivity equation and surface boundary conditions in presence of radiative energy transfer
13 p2373 A69-27584

Acoustic power transferred to plane homogeneous elastic structures and cylindrical shells by neighboring sound sources
13 p2363 A69-28186

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations
13 p2378 A69-28340

Transistorized DC amplifier circuit with reversible and controllable transfer constant based on voltage conversion principle
13 p2235 A69-28511

Energy exchange of rare earth ions in uranyl phosphate liquids and glasses, studying sensitized luminescence origin
14 p2485 A69-29034

Gas-surface interaction for trapping and energy exchange, comparing continuum and discrete lattice models for solids
14 p2409 A69-29092

Energy transport between vortices in turbulent flow calculated from vortex stability study
14 p2430 A69-29508

Self resonant energy transfer mechanisms in active media for lasers investigated by two methods
14 p2460 A69-29644

Energy exchange between active centers in silicate and phosphate glass, comparing luminescent and lasing properties
15 p2632 A69-30053

Wave energy flux and correlation wave energy flux relationship to energy transport, noting applicability to fluids
15 p2595 A69-30218

Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy
17 p3008 A69-33387

Half space applications regarding equation of transfer for planetary atmosphere
18 p3191 A69-34306

Radiation gas dynamics in shock tube, studying radiation coupled flows with flow field affected by radiant energy transport
18 p3116 A69-34447

Prestressed ceramic driver chamber energy efficiency for arc driven shock tube by pressure measurements with piezoelectric probe
18 p3116 A69-34456

Atomic excitation and ionization by thermal electrons, using Monte Carlo trajectories to determine adiabatic collisions effects on energy transfer near dissociation limit
18 p3176 A69-34790

Balmer alpha and Lyman beta intensities for multiple scattering calculated for hydrogen geocorona models by radiative transfer equations, discussing radiation transport through earth hydrogen atoms
18 p3128 A69-34943

Energy transfer from radiating sphere to medium with molecular heat conduction
18 p3230 A69-35034

Moment and discrete ordinate methods in radiative transfer problems in planar, radiating and nonscattering media, noting conical transformation of moment equations
18 p3174 A69-35237

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation
18 p3231 A69-35325

Solar flare model based on force-free currents in solar atmosphere, noting rapid energy release due to exceeding current density critical limit
18 p3188 A69-35392

Stored energy release in exploding wire circuit during divergent detonation wave ignition in propane-oxygen mixture in circular sector
19 p3451 A69-36365

Hypervelocity ionized gas flow analysis, allowing for finiteness of energy exchange duration between electrons and ions
19 p3379 A69-36383

Gas-surface energy transfer experiment on OGO-F satellite, measuring upper atmosphere kinetic energy flux to determine accommodation and drag coefficients, density, etc
19 p3255 A69-36680

Stochastic motion in linear lattice of coupled harmonic oscillators analyzed by Schroedinger coordinates and Bessel functions for time behavior, energy flow and impurity effect
19 p3374 A69-36752

Homogeneous isotropic turbulence spectrum asymptotic behavior for various spectral energy transfer models
19 p3301 A69-36818

Active center chemical bond alteration influences on luminescence characteristics of phosphate glasses, noting quick energy transfer via ions
20 p3552 A69-37017

Radiative energy transport quantities for hydrogen plasma including Plank and Rosseland mean absorption coefficients, discussing line and continuum radiation and optical limits
20 p3581 A69-37306

Kinetic energy of sunspot rotational motion transferred to electromagnetic energy in filamentary currents, noting time variations in solar atmosphere preconditioning for flare
20 p3589 A69-37550

Radiative transport equation solution in two flow approximation for plane layer, considering absorption and dispersion characteristics dependence on radiation density
20 p3553 A69-37608

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subsonic ray acceleration
20 p3591 A69-38008

Negative energy waves presence, showing qualitative difference on theoretically derived parametric amplification in plasmas
20 p3582 A69-38244

Polarization effect on diffusion equations of radiative transfer, noting anisotropy in Rayleigh scattering
21 p3847 A69-38473

DC MHD generator using gas plasma as working fluid, discussing fundamental principle, components interactions and energy conversion
21 p3777 A69-39165

Transformer for unilateral energy transfer using single domain uniaxial Permalloy film
21 p3684 A69-39454

Singlet-singlet energy transfer kinetics dependence on emission and absorption spectra overlap via dipole-dipole interaction
22 p3895 A69-40056

Spatiotemporal signal distortions for multiple scattering from unsteady radiant energy transfer equations
22 p3899 A69-40247

Radiation transfer in circumstellar dust envelopes, considering thin and opaque clouds
22 p4027 A69-40655

Emission lines in optical spectra of radio galaxy nuclei, considering time dependent energy release nature
22 p4034 A69-41174

Electron excitation and collisional energy transfer processes in laser level of pure carbon dioxide fill and carbon dioxide-water vapor mixture
23 p4171 A69-41390

Thermotidal energy transfer from lower neutral atmosphere to and above lower ionosphere, considering tidal wave transmission mechanism
23 p4155 A69-41561

Monte Carlo method for energy transfer efficiency of ruby laser pumping cavities by helical flash lamps, noting dependence on ruby parameters
23 p4173 A69-41630

Interplanetary magnetic field role in interaction between terrestrial magnetosphere, solar plasma and solar flux energy transfer
23 p4214 A69-41865

Power flow relations between randomly vibrating systems with weak linear elastic or dissipative coupling
23 p4227 A69-41877

Parametric differentiation applied to radiation gas dynamics equations solution, considering energy transfer by thermal radiation in high speed reentry
[AIAA PAPER 68-668] 23 p4059 A69-41892

Arc heating of shock tube driver gas, describing radiative energy transfer mechanism
23 p4147 A69-41895

Time dependent natural oscillations of plane open resonators infinite periodic sequence, considering electromagnetic energy transfer into ambient medium
23 p4139 A69-42039

Optimum functions for mass and energy flow during spacecraft orbital transfer, emphasizing time behavior of propulsion variables
24 p4382 A69-42921

Oscillatory convection, energy transport and structure of sunspots, suggesting fast changes in equilibrium conditions for magnetic reconstruction and solar flares origin
24 p4374 A69-43624

Transmission functions probabilistic model for solving radiative transfer problems in spherical shell medium surrounding emitting black core or point source, using integrodifferential equations
24 p4415 A69-43637

ENGINE ANALYZERS

Maintenance process simulation for engine and major components to provide routine material usage forecast and policies
09 p1503 A69-21802

Howell engine hot section analyzer/HSA/ developed to improve maintenance, flight safety and costs of jet aircraft engines
10 p1671 A69-23263

Sonic diagnostic engine analyzer for detecting jet engine malfunctions prior to failure
24 p4312 A69-42758

ENGINE CONTROL

NT ROCKET ENGINE CONTROL

NT TURBOJET ENGINE CONTROL

Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems
02 p0249 A69-12088

Fluidic system controlling inlet guide vanes to high pressure compressor of two spool jet engine, using digital elements to drive hydraulic servosystem
02 p0305 A69-12090

Digital electronic computer technique for control of aircraft power plant, describing self adaptive control
03 p0496 A69-14091

Aircraft turbine engines operation and control, discussing technology, simulation and system developments
05 p0812 A69-16528

Aircraft gas turbine engines control systems capabilities and future requirements, considering maximum propulsion system performance with minimum fuel consumption
[ASME PAPER 68-GT-62] 08 p1376 A69-19846

Digital computer simulation and analysis of control loops for ion thruster control
[AIAA PAPER 69-239] 09 p1564 A69-21240

30 cm diameter mercury bombardment low impulse thruster development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] 09 p1566 A69-21256

Gas turbine engines control and fuel systems integration, considering weight reduction
[ASME PAPER 69-GT-49] 09 p1571 A69-22483

Fluidic overspeed sensor for small turboshaft power turbine, discussing requirements, circuit and system design, packaging, reliability and maintainability
[ASME PAPER 69-GT-17] 09 p1571 A69-22500

Compressor inlet Mach number choice to control high performance variable stator compressors geometry
[ASME PAPER 69-GT-14] 09 p1571 A69-22502

Fluidic compressor bleed control unit for TF-30 jet engine to prevent stall at low rpm operation
10 p1753 A69-23559

Flow control valve for hydraulic motor speed regulation operated by remote pressure signal
11 p1827 A69-25646

Control technology advancement effects on gas turbine design and application, integrating control scheme, modularization and commonality, system design and energy input and load control
12 p2146 A69-25786

Gas turbine fuel and control systems for two and three shaft engines in military and civilian aircraft including helicopters
[IME PAPER 12] 12 p2147 A69-25796

Blade material temperature variation observed in turbojet engine during air bleed of varying intensity and duration
13 p2325 59-27444

Digital computers for aircraft engine control, discussing economic assessment, advantages basic control system
15 p2671 At 30323

Aircraft engine accessories for engine control monitoring and protection, discussing transducer redesign, equipment range for Concorde, small engine design, etc
16 p2789 A69-31813

Integrated propulsion control system for ramjet Hypersonic Research Engine to operate at 3-8 Mach numbers
[AIAA PAPER 69-546] 16 p2845 A69-32744

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbine speed control simulations and transition from mathematical models to hardware components
[AHS PAPER 332] 17 p2946 A69-33531

Digital computer for aircraft engine control covering in-flight health monitoring, automatic flight checkout, diagnostic failure routines, etc
17 p3022 A69-33603

Monograph on control dynamics of gas turbines with adjustable guide vanes, using methods of control theory and applied mathematics
21 p3784 A69-38449

JT9D engine fuel and vane control systems for Boeing 747, noting computing system positioning of throttle valve for fuel flow control
[SAE PAPER 69-0405] 23 p4201 A69-41658

Engine fuel and geometry control design for large high bypass aircraft turbofan engines used for airbus powering
[SAE PAPER 69-0403] 23 p4201 A69-41659

Digital computers effect on aircraft automatic power unit controls, discussing safety, reliability, self monitoring and redundant computer systems
24 p4253 A69-43113

ENGINE COOLANTS

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode
03 p0495 A69-12970

NERVA engine cooldown system for emergency shutdowns using high pressure liquid H followed by gaseous H warmup and liquid N cooldown
[AIAA PAPER 69-512] 16 p2810 A69-31846

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability
[AIAA PAPER 69-582] 16 p2839 A69-32668

Turbine rotors temperature reducible by increasing air cooling system flow rate
24 p4364 A69-43081

Foamed liquid as potential coolants in rocket engine to overcome low efficiency and streaky coverage of conventional liquid film cooling
24 p4408 A69-43127

Scramjet engine active cooling with regenerative system using superalloy heat exchangers and hydrogen fuel as coolant
[AIAA PAPER 68-1091] 24 p4365 A69-43725

ENGINE DESIGN

Brushless DC torqued motor using reluctance magnetic circuit and toroidally distributed coil winding
01 p0012 A69-10154

Engine air intake design and development for Concorde aircraft, discussing design constraints
[AIAA PAPER 67-752] 01 p0006 A69-11014

Human reaction to aircraft engine noise, evaluating effective perceived noise level and constraints on engine design
02 p0204 A69-12766

CF6 turbofan engine technology program for improvement in performance, weight, durability, noise, etc
[SAE PAPER 68-0691] 03 p0496 A69-13446

Aerothermodynamics of subsonic-aircraft propulsion, analyzing performance of bypass engine, fuel consumption and specific weight
05 p0695 A69-15551

High bypass turbofan design, discussing JT9D engine combustion, materials and cooling
05 p0811 A69-15552

Engines for V/STOL application, discussing aerodynamics of thrust lift and lift jet engines
05 p0811 A69-15553

Soviet book on design of aircraft engine component and subsystem elements, emphasizing aligning, locking and sealing methods, torque transmission, etc
05 p0812 A69-15864

Similarity conditions in turbine engine tests, analyzing flight speed, Reynolds number, combustion efficiency, heat changes, inlet turbulence and outlet nozzle
05 p0742 A69-16028

Transpiration air cooled blading to test and design small gas turbine at 2500 F inlet, discussing cascade and full stage component
[SAE PAPER 69-0035] 07 p1203 A69-18310

Optimum fixed geometry ramjet in Mach range of 3 to 7 with successively subsonic and supersonic combustion
[ONERA-TP-656E] 07 p1203 A69-18415

T-53 engine operation in U.S. Army helicopters noting design problems from compressor blade failure, sand and dust erosion and bearing and lubrication malfunctions
[AHS PAPER 215] 07 p1203 A69-18867

Instrumentation design problems connected with NERVA, considering high gamma and neutron radiations and temperature environments
[IEEE PAPER 2D-5] 07 p1134 A69-19189

Material design problems in small gas turbines, discussing engine performance sensitivity, thinness of rotor-blade and stator-vane trailing edges, dimensional tolerances, etc
[ASM PAPER D8-16.2] 07 p1204 A69-19668

Titanium alloys role in turbofan and turbojet engine design, noting use in components and introduction in manufacturing techniques
[ASM PAPER D8-26.4] 07 p1143 A69-19673

Supercharged bypass engines for possible application in light aircraft, noting payload fractions and total takeoff weights values
08 p1254 A69-20168

Three shaft turbofan engines for 1970s noting thermodynamic and propulsive efficiencies, fuel consumption, weight, noise reduction, etc
08 p1376 A69-20627

Motor design for operation in ultrahigh vacuum, discussing absence of convection cooling, outgassing avoidance, lubrication impossibility and oxygen absence as design parameters
08 p1377 A69-21028

Dual-rotor high-bypass-ratio CF6 turbofan engine design and development programme and growth
08 p1377 A69-21163

Experimental program for tests to identify primary electric propulsion system integration problems and solutions, emphasizing design and initial testing
[AIAA PAPER 69-236] 09 p1560 A69-21213

Extraction and acceleration mechanism in RF ion motors, fixing plasma potential with extraction anode [AIAA PAPER 69-284] 09 p1564 A69-21237

RF ion thrusters using self sustaining electrodeless discharge [AIAA PAPER 69-285] 09 p1565 A69-21247

Radiation cooled MPD arc thruster design and performance, noting specific impulse relation to arc spoke rotation frequencies [AIAA PAPER 69-245] 09 p1566 A69-21259

Power systems for future aircraft emphasizing growth in performance and reduction in weight 09 p1567 A69-21387

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements [AIAA PAPER 69-300] 09 p1569 A69-21880

Composite materials and alloys for jet turbine components in 1970s, discussing anticipated temperatures and material properties 09 p1523 A69-22061

Design, metallurgical and manufacturing problems of titanium application in superjet C5 and SST engines 09 p1570 A69-22062

High recovery inlet design for Boeing 747 high bypass ratio fan engine, considering throat Mach number, lip losses and auxiliary passage losses [ASME PAPER 69-GT-41] 09 p1570 A69-22482

Fan compressor noise reduction indicating effects of design, number of blades, vane/blade ratio, aerodynamic parameters and blade spacing [ASME PAPER 69-GT-9] 09 p1571 A69-22505

High bypass ratio compound fan shaft engine design and performance for convertible rotary wing aircraft [ASME PAPER 69-GT-51] 09 p1572 A69-22511

Baseline requirements for commercial aircraft propulsion systems, stressing engine installation in aircraft [ASME PAPER 69-GT-57] 09 p1572 A69-22514

JT15D business aircraft turbofan engine, discussing low costs and fuel consumption, maintenance, reliability, installation, etc [ASME PAPER 69-GT-119] 09 p1572 A69-22524

Compressor to inlet distortion tolerance design techniques for gas turbine compressors, noting rotor matching, blade chord length, blade geometry, etc [ASME PAPER 69-GT-115] 09 p1572 A69-22525

Combustion chamber design for advanced gas turbines, noting influence of fuel air mixing and air flow distribution 09 p1573 A69-22612

Film cooling injection slots number and position over flame tube and minimum cooling airflow in aircraft gas turbines 09 p1625 A69-22623

Gas turbine engine development data system based on test stands subsystems and central computer 10 p1660 A69-23284

Aircraft engines future specifications as affected by expanding market, noting speed requirements and thrusts 11 p1942 A69-25215

Aerodynamic design of axial flow compressors and turbines, using aerothermodynamic equations for compressible flow analysis 11 p1821 A69-25585

Hybrid chemical rocket theory and design noting radiation effects, regression and convective heat transfer 11 p1944 A69-25589

Nuclear rocket propulsion, discussing solid core and fluid core systems for reactors, nozzles, feed systems, control, component design and performance 11 p1914 A69-25590

Control technology advancement effects on gas turbine design and application, integrating control scheme, modularization and commonality, system design and energy input and load control 12 p2146 A69-25786

Radial gas turbine design and performance including nozzle and rotor loss, mechanical and thermal stresses and manufacturing methods and materials [IME PAPER 7] 12 p2146 A69-25787

Aerodynamic and thermal considerations in axial flow turbine blade design, discussing internal air cooling [IME PAPER 2] 12 p2146 A69-25788

Gas turbine combustion chamber design factors including combustion volume, burning zone, dilution zone, pressure drop, fuel preparation, injection and ignition, exhaust smoke, etc [IME PAPER 3] 12 p2146 A69-25789

Tubular gas turbine combustion chamber design for optimum mixing performance using flow and mixing data of cold air injection into hot gas stream [IME PAPER 15] 12 p2147 A69-25793

Concorde SST turbojet engine integrated assembly consisting of air inlet, gas generator, reheater and convergent-divergent nozzle 12 p2147 A69-26357

Thin ring-strut structure resting on elastic foundation, analyzing deformation taking warping effects into account, noting applicability to engine design 12 p2184 A69-26812

CF6 turbofan engine technology program for improvement in performance, weight, durability, noise, etc 13 p2324 A69-27331

Gas turbine compressor end seals, discussing air leakage paths, primary and secondary seals, design and efficiency [ASLE PREPRINT 68AM 4B-4] 13 p2267 A69-27366

Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc 14 p2509 A69-29433

Jet engine intershaft bearing oil feed design, discussing use of nonrotating feed link and improvement of oil scavenging at high altitudes 15 p2671 A69-30702

Aircraft gas turbine parts design and fabrication, discussing role of welding techniques 15 p2629 A69-30928

Europa 1 booster supplementing with perigee-apogee system for development of Europa 2, noting payload launching capability into 24-hr circular orbit 15 p2671 A69-31051

Subsonic transport high bypass ratio engine evaluation in terms of fuel consumption, size, thrust-weight ratio, noise and price 16 p2835 A69-31803

Aircraft engine accessories for engine control, monitoring and protection, discussing transducer redesign, equipment range for Concorde, small engine design, etc 16 p2789 A69-31813

CF6 turbofan engine technology program for improvement in performance, weight, durability, noise, etc [SAE PAPER 680691] 16 p2837 A69-32367

Fast heat-up electrothermal ammonia thruster role in development of hybrid resistojet in millipound thrust range [AIAA PAPER 69-496] 16 p2838 A69-32649

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structural and thermal analyses [AIAA PAPER 69-524] 16 p2838 A69-32662

Systems approach in turbofan engine design acoustic evaluation, discussing noise sources and radiation patterns [AIAA PAPER 69-491] 16 p2839 A69-32667

L-500 inlet development program, discussing external forebody design, entry lip and diffuser geometries, configuration and technology developments, experimental techniques and test equipment [AIAA PAPER 69-448] 16 p2733 A69-32684

M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system [AIAA PAPER 69-447] 16 p2845 A69-32732

Self contained lift fan concept and circulation controlled rotor aircraft power plants for high speed VTOL transports 17 p2897 A69-33208

High bypass ratio engine influence on short range civil aircraft design, considering performance, noise, engine location, etc 17 p2897 A69-33212

Aircraft auxiliary power system influence on power plant installation and aerodynamic design 17 p3017 A69-33216

Aircraft auxiliary power systems, discussing weight and power requirements, component design, driving methods and influence on power plant design 17 p3018 A69-33217

Liquid oxygen and hydrogen rocket engine HM4 design and operation, discussing fuel, low temperatures and heat exchange 17 p3020 A69-33345

Gas turbine engines smoke reduction, aerated fuel sprays for smoke control on engine design and factors affecting visibility of exhaust plumes 17 p3020 A69-33350

Propulsion power plant arrangements for rotary wing aircraft with thrust producer for forward flight, considering convertible fan/shaft engine configurations [AHS PAPER 333] 17 p3021 A69-33529

Vertical takeoff aircraft propeller/rotor design and performance prediction, discussing vortex model, wake contraction, blade element aerodynamic properties, etc [AHS PAPER 325] 17 p2894 A69-33534

Aircraft engine lubrication system design, discussing bearings reduction, oil compartment scavenging, sealing, cooling, pressurization, etc 18 p3185 A69-35244

Low smoke emission combustors for aircraft turbine engines, discussing effects on ignition and exit temperature distribution [AIAA PAPER 69-493] 19 p3394 A69-36299

Jet engine compressors and fans, combustors, turbines and composite materials in evaluating thrust-weight ratio, engine size, weight and life, etc 19 p3395 A69-36322

Pressure sensors, strakes, removal of full length guide vanes indicate possible difficulties with thrust of NK-8-2 turbofans in Tu-154 19 p3395 A69-36757

Turbine engine monitoring during operation, discussing automatic monitoring systems and engine design 19 p3329 A69-36873

Lift engine inlet development for XV-4B aircraft, discussing tests, pressure distortion and recovery during simulated hover and transitional flight [AIAA PAPER 68-636] 20 p3585 A69-37150

Rolls-Royce RB.211 turbofan engine development, discussing three shaft design, engine performance, testing program, etc 20 p3640 A69-37927

Superalloy technology applications to gas turbine engines 21 p3785 A69-38928

RB 202 self contained lift fan engine design for high speed interurban civil VTOL operations, considering weight, cost, noise and fuel consumption 22 p3862 A69-39933

Wakkel engine development in Poland for powered military gliders at 18 hp and 5500 rpm 22 p3999 A69-40006

Building block approach to turbofan engine design, discussing fuel consumption, noise and component research [RAES PAPER 14] 22 p3999 A69-40493

Aircraft engine technology, discussing turbine entry temperatures, reheat temperatures, high pressure spools, high temperature materials and small blades fabrication [RAES PAPER 20] 22 p4000 A69-40499

TF39 high bypass ratio engine design, development and tests, noting low smoke combustor [RAES PAPER 21] 22 p4000 A69-40622

Dynamic simulation for gas turbine engine components design to assure stable operation and rapid response characteristics [SAE PAPER 690386] 23 p4200 A69-41655

Large fan blade design, discussing aerodynamic design and rig test program supporting fan definition [SAE PAPER 690387] 23 p4200 A69-41656

Engine fuel and geometry control design for large high bypass aircraft turbofan engines used for airbus powering [SAE PAPER 690403] 23 p4201 A69-41659

Douglas DC-10 aircraft design programs and methods stressing power plant reliability, maintainability and costs [SAE PAPER 690391] 23 p4201 A69-41664

Lockheed 1011 propulsion system design relating to system and component maintainability, reliability, performance and noise [SAE PAPER 690390] 23 p4201 A69-41665

Optimization of RF ion thruster cluster engines for ascending trajectory, discussing unfolding mechanism of solar cell panels [DGLR-69-022] 23 p4203 A69-41933

Rankine cycle power systems with reciprocating engines using organic working fluids, discussing engine development, system characteristics, etc 23 p4067 A69-42237

Computerized design of potassium vapor turbine with supersaturation effects compared with equilibrium flow turbine design 23 p4187 A69-42251

Positive displacement Rankine cycle rotary wet steam engine design compared with piston type, noting simplified evaporator and tests 23 p4069 A69-42252

Rolls-Royce-Bristol/SNECMA M45H medium power turbojet for VFW 614 aircraft
24 p4363 A69-42566

Turbofan jet engine research, discussing future compression and bypass ratios, weight and noise reduction, maintenance and reliability, temperature effects, etc
24 p4363 A69-42569

Aircraft engine lubrication system design, discussing bearings reduction, oil compartment scavenging, sealing, cooling, pressurization, etc
24 p4363 A69-42780

Engine design program for TF34-GE2 high bypass ratio turbofan military aircraft engine, outlining estimating procedures for thrust, fuel consumption and weight requirements
24 p4364 A69-43042

Monitoring devices and modular construction features of Rolls-Royce RB.211 three shaft turbofan engine, discussing maintainability
24 p4321 A69-43112

ENGINE FAILURE

Titanium alloy stress corrosion behavior in atmospheric salt environments at elevated temperatures related to aircraft engine part failures
01 p0099 A69-11056

T-53 engine operation in U.S. Army helicopters noting design problems from compressor blade failure, sand and dust erosion and bearing and lubrication malfunctions
[AHS PAPER 215] 07 p1203 A69-18867

Helicopter flight safety as function of service duration, performance limitations and propulsion failure
07 p1054 A69-19313

Engine usage indicator to cumulate small gas turbine engine exposure to certain deterioration, presenting circuit logic block diagram
[ASME PAPER 69-GT-69] 09 p1572 A69-22519

Monitors to detect incipient failure during turbine engine development, describing servocontrol
10 p1692 A69-23253

Spectrometric oil analysis procedure /SOAP/ for predicting failure of oil wetted parts in small turboprop aircraft engines
[SAE PAPER 690325] 11 p1941 A69-24508

Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data
18 p3185 A69-35175

Computer program using system simulation and Monte Carlo techniques to assess turbojet engine compressor disk reliability, discussing maintenance policy and engine design effects
19 p3394 A69-36042

Flight vehicle motion optimization taking into account random failures of sectioned power plant with limited capacity and independent parallel units
21 p3647 A69-38893

Engine oil analysis applied to commercial airline operations, ensuring lubricating qualities retention and detecting oil-wetted component failures
[SAE PAPER 690423] 23 p4169 A69-41647

Solid rocket motors failure during static firing, discussing sequence of events
24 p4365 A69-43260

ENGINE INLETS

NT HYPERSONIC INLETS

Engine inlet thermal antiicing analysis, detailing computer programs to determine air flow velocity, water impingement and thermal requirements
01 p0055 A69-11045

Turbine powered helicopter engine inlet air filtration system utilizing direct-connect S-bend duct
01 p0143 A69-11054

Vitiated inlet air effects on J60-P-6 turbojet engine performance at sea level for various simulated flight Mach numbers
01 p0143 A69-11063

Analytical design of SH-3 helicopter engine inlet ice deflector shield interior surfaces, defining potential flow pattern and moisture droplet trajectories
01 p0011 A69-11064

Fluidic system controlling inlet guide vanes to high pressure compressor of two spool jet engine, using digital elements to drive hydraulic servosystem
02 p0365 A69-12090

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions
02 p0229 A69-12537

Jet engine inlet noise control by modification of inlet guide vanes
05 p0811 A69-15622

C-5 engine inlet development, presenting two phase nacelle forebody and five phase model tests, scale corrections inlet/cowl optimization and prototype tests
[ASME PAPER 69-GT-52] 09 p1570 A69-22481

High recovery inlet design for Boeing 747 high bypass ratio fan engine, considering throat Mach number, lip losses and auxiliary passage losses
[ASME PAPER 69-GT-41] 09 p1570 A69-22482

Compressor inlet temperature /CIT/ sensors, describing bimetal strip and liquid expansion aspirated types
[ASME PAPER 69-GT-18] 09 p1571 A69-22499

Compressor inlet Mach number choice to control high performance variable stator compressors geometry
[ASME PAPER 69-GT-14] 09 p1571 A69-22502

Compressor to inlet distortion tolerance design techniques for gas turbine compressors, noting rotor matching, blade chord length, blade geometry, etc
[ASME PAPER 69-GT-115] 09 p1572 A69-22525

Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests
[AIAA PAPER 69-487] 16 p2840 A69-32676

L-500 inlet development program, discussing external forebody design, entry lip and diffuser geometries, configuration and technology developments, experimental techniques and test equipment
[AIAA PAPER 69-448] 16 p2733 A69-32684

Fluidic temperature sensors for measuring turbine inlet temperature on large turbine engine
[AIAA PAPER 69-544] 16 p2792 A69-32692

Aircraft wing aerodynamic forces and moments due to lifting engine air intake simulated by wind tunnel experiment
19 p3239 A69-36400

Lift engine inlet development for XV-4B aircraft, discussing tests, pressure distortion and recovery during simulated hover and transitional flight
[AIAA PAPER 68-636] 20 p3585 A69-37150

ENGINE MONITORING INSTRUMENTS

Engine usage indicator to cumulate small gas turbine engine exposure to certain deterioration, presenting circuit logic block diagram
[ASME PAPER 69-GT-69] 09 p1572 A69-22519

Multichannel miniature telemetry for vibration, strain and temperature measurements in high speed machinery by solid state encapsulated devices
10 p1654 A69-23251

Aircraft engine accessories for engine control, monitoring and protection, discussing transducer redesign, equipment range for Concorde, small engine design, etc
16 p2789 A69-31813

C-141 engine health monitoring program, applying results to maintenance costs reduction
[AIAA PAPER 69-775] 19 p3244 A69-35646

Turbine engine monitoring during operation, discussing automatic monitoring systems and engine design
19 p3329 A69-36873

Jet fleet engine performance monitoring program, discussing systems design and resultant management planning
22 p3999 A69-39922

ENGINE NOISE

Aircraft engine noise reduction in test runs by sound insulating hangar
01 p0054 A69-10033

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanisms of jet noise
01 p0009 A69-10349

Human reaction to aircraft engine noise, evaluating effective perceived noise level and constraints on engine design
02 p0204 A69-12766

Soviet MI-8 and MI-4 passenger helicopters noise characteristics with turboprop and piston engines and during landing takeoff and horizontal flight
03 p0366 A69-13417

Power generation in combat environment by tested self contained organic Rankine silent engine, discussing working fluid properties
[SAE PAPER 690062] 07 p1058 A69-18309

Concorde jet engine silencer concept and characteristics
[AIAA PAPER 67-391] 12 p2148 A69-26759

Rolls Royce noise and compressor test facility for continual lowering of engine sound pressure levels, considering sound generating mechanisms
13 p2240 A69-27616

Equipment and test installations for turbojet noise studies, discussing noise from rotating parts, pure jet noise and air propagation of noise
13 p2325 A69-28589

Aircraft noise control at source through high bypass ratio engine modification, FAA decibel standards and higher capacity aircraft for increased traffic density
14 p2509 A69-29156

Systems approach in turbofan engine design acoustic evaluation, discussing noise sources and radiation patterns
[AIAA PAPER 69-491] 16 p2839 A69-32667

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan powerplants
[AIAA PAPER 69-492] 16 p2767 A69-32727

Real time analyzers of acoustic signals for aircraft engine noise, noting automatic test
20 p3462 A69-37756

Jet engine noise technology evaluation, noting effects on airport neighbor
[RAES PAPER 13] 22 p3999 A69-40492

Sonic diagnostic engine analyzer for detecting jet engine malfunctions prior to failure
24 p4312 A69-42758

ENGINE PARTS

Protective coatings for gas turbine engine components in marine environments, considering corrosion of diffuser, impeller, compressor case and turbine blades
01 p0099 A69-11057

Soviet book on design of aircraft engine component and subsystem elements, emphasizing aligning, locking and sealing methods, torque transmission, etc
05 p0812 A69-15864

Maintenance process simulation for engine and major components to provide routine material usage forecast and policies
09 p1503 A69-21802

Composite materials and alloys for jet turbine components in 1970s, discussing anticipated temperatures and material properties
09 p1523 A69-22061

Potential usage of titanium in cast parts for gas turbine engines, emphasizing alloys development
[ASME PAPER 69-GT-24] 09 p1513 A69-22494

Radiographic, ultrasonic, thermographic and leak test quality control for brazed liquid propellant rocket engine components
10 p1699 A69-23054

Spectrometric oil analysis procedure /SOAP/ for predicting failure of oil wetted parts in small turboprop aircraft engines
[SAE PAPER 690325] 11 p1941 A69-24508

Explosive fabrication of aircraft components including turbine engine exhaust components, door seals, etc
[SAE PAPER 690316] 11 p1890 A69-24510

Fabricable materials with low plastic deformation for gas turbine components, noting strength vs temperature for alloys, fiber composites and ceramics
[IME PAPER 8] 12 p2147 A69-25791

Small gas turbine Brayton cycle analysis treating component efficiencies as dependent variables in examining single stage radial compressor and turbine aerodynamic configuration
[IME PAPER 5] 12 p2147 A69-25794

Cast high temperature alloys for gas turbine components, discussing production, temperature capability, composition, oxidation, hot corrosion and weldability
[IME PAPER 10] 12 p2147 A69-25795

Statistical theory of cumulative wear of machine parts with application to engine parts of passenger aircraft, automobiles, tractors, etc
13 p2268 A69-28052

Aircraft gas turbine parts design and fabrication, discussing role of welding techniques
15 p2629 A69-30928

Forced oscillations of three layer plate used as vibration dampers for engine components
16 p2873 A69-32143

Molded composites application to engine components, discussing turboprop reduction gear case design using polymer matrix boron composite
[AIAA PAPER 69-466] 16 p2795 A69-32763

Vernier motor for Europa 1 rocket third stage, discussing component design, system performance and fuel composition
17 p3018 A69-33328

Aircraft turbines mechanical parts reliability tests, discussing examples of blade fatigue rupture and rotor disk fatigue
17 p3020 A69-33347

ENGINE STARTERS

Holography application in gas turbine components stress and vibration analysis, discussing techniques and apparatus usable by nonspecialist and measurement accuracy 17 p2974 A69-33351

Mechanical components life or cycles to failure probability distributions determined by Monte Carlo method, comparing theory with aircraft engine parts field data 19 p3327 A69-36031

Jet engine compressors and fans, combustors, turbines and composite materials in evaluating thrust-weight ratio, engine size, weight and life, etc 19 p3395 A69-36322

Airbreathing gas turbines construction materials including composites and Ti and austenitic alloys [ASM PAPER D8-25.2] 20 p3586 A69-38133

Building block approach to turbofan engine design, discussing fuel consumption, noise and component research [RAES PAPER 14] 22 p3999 A69-40493

Numerical control as manufacturing tool, with application to aircraft engine precision components 24 p4318 A69-42710

Carbon fibers and resin composites used as rocket motor systems ablative liners and structures, noting role in motor weight reduction 24 p4336 A69-43210

ENGINE STARTERS

Solid propellant cartridges, discussing uses for starting large engines and providing auxiliary power in missiles or actuating devices 02 p0302 A69-11524

M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system [AIAA PAPER 69-447] 16 p2845 A69-32732

ENGINE TESTING LABORATORIES

Blow-down facility for hypersonic testing of air breathing engines, describing test cell, air heating system, exhausters and data system 02 p0227 A69-11756

Turbine engine in-flight operating conditions simulated on test stand 11 p1942 A69-24528

ENGINE TESTS

NT COLD FLOW TESTS

NT SPACE ELECTRIC ROCKET TESTS

NT STATIC FIRING

Nondestructive testing of brazed liquid propellant rocket engine components and assemblies, describing radiographic, ultrasonic, thermographic, and leak test methods 01 p0085 A69-10534

Steam ingestion tests on carrier aircraft gas turbine engines, analyzing inlet pressure and temperature distortion in steam-air environment 01 p0143 A69-11062

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions 02 p0229 A69-12537

Weapons propulsion system off-design engine performance, noting installation loss effects [SAE PAPER 680712] 03 p0496 A69-13445

Quantitative amounts of contaminants oil from piston engine and life of oil lubricant in engine 04 p0604 A69-14500

Similarity conditions in turbine engine tests, analyzing flight speed, Reynolds number, combustion efficiency, heat changes, inlet turbulence and outlet nozzle 05 p0742 A69-16028

Transpiration air cooled blading to test and design small gas turbine at 2500 F inlet, discussing cascade and full stage component [SAE PAPER 690035] 07 p1203 A69-18310

Concorde testing program, detailing materials, structure, systems, engine, wind tunnel and flight tests 07 p1054 A69-19294

Computer simulation on engines dynamic behavior covering thrust transfer functions, time behavior and engine and fuel controller operation 08 p1301 A69-20167

C-5 engine inlet development, presenting two phase nacelle forebody and five phase model tests, scale corrections inlet/cowl optimization and prototype tests [ASME PAPER 69-GT-32] 09 p1570 A69-22481

Transpiration cooling effect on turbine stator blade performance determined by annular cascade tests, using data to establish empirical correlation for loss coefficient [ASME PAPER 69-GT-39] 09 p1432 A69-22487

Miniature fluidic oscillator temperature sensors evaluated in gas turbine engine nozzle, discussing temperature control and related signal error compensation and temperature averaging [ASME PAPER 69-GT-70] 09 p1572 A69-22512

Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques [ASME PAPER 69-GT-104] 09 p1501 A69-22522

Fuel concentration effect on turbojet engine reheat jet pipe vibrations via tests 09 p1573 A69-22616

Bearing deposition test for evaluating degradation characteristics of aircraft gas turbine engine lubricants 10 p1700 A69-24070

Turbine engine in-flight operating conditions simulated on test stand 11 p1942 A69-24528

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust minus drag, noting nozzle configurations variations effect [AIAA PAPER 68-395] 12 p2059 A69-26769

Thrust balance for scale model of powered nacelle fan jet engine from drag analysis in wind tunnel, deriving fan nozzle velocity coefficient 13 p2199 A69-27446

Thermocouples precision used for measuring metal temperatures of cooled jet engine turbine buckets 15 p2613 A69-31274

Analog computer for design of control systems used in nonnuclear testing of nuclear rocket engine components and subsystems 15 p2589 A69-31289

Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution [AIAA PAPER 69-525] 16 p2841 A69-32686

Flox/methane pump fed engine, discussing RL-10-1-A engine tests and optimized 5000 lb thrust engine design [AIAA PAPER 69-510] 16 p2741 A69-32720

Interagency Chemical Rocket Propulsion Group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model [AIAA PAPER 69-734] 16 p2846 A69-32781

Nondestructive ultrasonic, spectroscopic and TV test methods reducing time for inspection and increasing reliability of turbines 17 p2978 A69-33330

Twin spool hydrogen turbopump performance at zero net positive suction pressure (NPSF) saturated fluid in propellant tank, including steady state and simulated transient engine tests [AIAA PAPER 69-550] 18 p3140 A69-34414

Supersonic aircraft and power plant structural members operating under cyclic stress at elevated temperatures tested by various methods for interaction between creep and fatigue 20 p3620 A69-37001

Monograph on jet turbine with small hub ratio for cases of complete and partial admission, considering masking effects, flow measurements, etc 20 p3586 A69-37924

Rolls-Royce RB.211 turbofan engine development, discussing three shaft design, engine performance, testing program, etc 20 p3640 A69-37927

RB 202 self contained lift fan engine design for high speed interurban civil VTOL operations, considering weight, cost, noise and fuel consumption 22 p3862 A69-39933

LM descent engine behavior upon contact with lunar surface simulated, basing test condition on statistical trajectory analysis indicating fire until touchdown possibility [AIAA PAPER 69-1020] 22 p3923 A69-40391

Cs contact ion engine with tubular W ionizer tested for performance and reliability in vacuum chamber 22 p4000 A69-40592

Solid rocket motor static firing tests in low pressure environment, presenting data concerning vacuum chamber pressure, diffusers pressure distribution, chamber wall temperature distribution, etc 22 p4000 A69-40593

TF39 high bypass ratio engine design, development and tests, noting low smoke combustor [RAES PAPER 21] 22 p4000 A69-40622

Performance test of German MPD plasma rocket engine with augmented magnetic field and 5-10 kw output, describing integral measurement procedure and observed phenomena [DGLR-69-024D] 23 p4202 A69-41927

ENGINEERING

Physical electronics, discussing gas discharges, semiconductor devices, electron emission, noise in electronic devices and masers and lasers 05 p0735 A69-16666

Society of American Value Engineers Conference, San Diego, April 1969 13 p2382 A69-28092

Value engineering application to engineer recruiting phase of industrial relations 13 p2382 A69-28093

Aircraft design cost control emphasizing engineering performance direct inclusion in design costs including tooling, testing, etc 13 p2382 A69-28094

Value engineering proposal costs sustained by maintenance and overhaul industry in government contract negotiations, discussing reimbursement and proposed central agency 13 p2383 A69-28099

Value engineering ultimate objectives in industry, discussing engineering and procurement role in prorating goal to applicable departments 13 p2383 A69-28101

NASA Pilot Program in instructional monographs to provide up-to-date material from current research for engineering education 18 p3236 A69-35078

IEEE Conference - San Antonio, April 1969 21 p3676 A69-39437

Book on matrix-computer methods in engineering covering matrix algebra and calculus, computer programming, Fourier transforms, etc 23 p4234 A69-42421

ENGINEERING DEVELOPMENT U PRODUCT DEVELOPMENT ENGINEERING DRAWINGS

Three dimensional computer graphic modeling program, discussing SIGHT and LEGER programs 05 p0724 A69-16383

Computer aided automatic drawing of printed circuits, including design and manufacture of films for engraving 08 p1296 A69-19979

Computerized system-safety fault trees, discussing drawing, configuration control and simulation program 19 p3280 A69-36029

- Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape [AIAA PAPER 69-257] 09 p1569 A69-21878
- Thermodynamic analysis of engines and heat pumps operating within negative absolute temperatures, noting work increase by throttling 09 p1623 A69-22219
- Temperature and pressure relations in power plant with closed gas cycles with radiative heat transfer, noting radiation area reduction influence 20 p3464 A69-37603
- ENGRAVING**
U PHOTOENGRAVING
- ENLARGING**
U EXPANSION
- ENSKOG-CHAPMAN THEORY**
U CHAPMAN-ENSKOG THEORY
- ENSTATITE**
Carbonaceous, enstatite and stony meteorite classification on basis of siderophilic, chalcophilic and lithophilic element proportions or isotope composition, discussing thermodynamic equilibrium 01 p0025 A69-11368
- Enstatite chondrites structure and mineral content and composition using microscopic and X ray analysis, grouping parameters in distinguishing types 02 p0317 A69-12016
- Shocked Bamle enstatite transformed to disordered enstatite, noting Debye-Scherrer patterns similarity 21 p3792 A69-38321
- ENTHALPY**
Nitrogen compressibility and thermodynamic functions up to 10,000 atm pressure and 400 C 01 p0175 A69-10366
- Vibrational relaxation of diatomic gases behind shock waves, with variable heat bath temperature extended to constant enthalpy and constant total enthalpy conditions 01 p0061 A69-11204
- Formation energy of heat vacancies in molybdenum and temperature dependence of concentration determined on basis of enthalpy data 02 p0266 A69-12184
- Semiperfect gases with enthalpy dependent only on temperature, discussing validity of concept and Joule experiment on equivalence of heat and work 05 p0848 A69-16336
- Plane reaction cell unit for use in differential flux calorimeters and devices for differential enthalpy analysis 05 p0764 A69-16607
- High enthalpy, Mach and Reynolds number flight studies on ballistic ranges, describing launchers, flight simulation, measuring and recording techniques 06 p0860 A69-17632
- Enthalpies determination of adduct formation of sulfonides, sulfanilamides and thionylamides with trimethylalane, noting replacement effect on electron donating ability of oxygen 07 p1074 A69-18631
- Local enthalpy measurements in atmospheric argon arc plasma jet at various arc currents, comparing calorimetric and spectrometric methods 09 p1547 A69-21602
- Enthalpy distribution in plasma tube arc heater inlet flow region with hot and cold gas core boundary in presence of electric field 09 p1553 A69-22538
- Enthalpy excess thermodynamic functions of binary gas mixtures based on stationary diffusion thermoeffect in tube 11 p2003 A69-25552
- CoO complex defects indicated by negative enthalpy of formation, considering isobaric electrical conductivity measurements at various temperatures and oxygen pressures 14 p2508 A69-29925
- Multimegawatt arc heater for hypersonic continuous flow high enthalpy wind tunnel 15 p2586 A69-30378
- Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams 15 p2614 A69-31275
- Solid W enthalpy from 2800 K to melting point measured with drop calorimeter, tabulating heat capacity, entropy and free energy function 17 p2987 A69-33075
- High energy recovery pressure and enthalpy sensor /HERPES/ for flow measurements in aerospace simulation facilities 19 p3307 A69-35750
- Enthalpy and heat capacity of high melting point homogeneous Ti, Zr and Nb carbides, analyzing influence of Me-Me bonds and carbon sublattice defects 21 p3742 A69-38614
- Uniform flow and wall boundary layer growth measurement in conical nozzle of reflected shock tunnel operating at high enthalpy conditions 24 p4247 A69-43575
- High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions 24 p4305 A69-43664
- ENTIRE FUNCTIONS**
Tabulation of definite and indefinite integrals of products of error function with elementary and transcendental functions 12 p2121 A69-26395
- Computer implementation of Bergman solution to initial value problem for partial differential equation of compressible fluid flow 18 p3164 A69-34614
- Polya concept of maximum and minimum densities of series applied to entire functions of finite order with positive zeros 20 p3568 A69-37442
- ENTRAINMENT**
Coanda nozzle entrainment and flow augmentation approximating numerical stability by finite differences 05 p0746 A69-16021
- Solid cylindrical body entrainment by viscous incompressible fluid flow in tube under constant pressure gradients and absence of gravitational force 10 p1678 A69-23366
- Entrainment and acoustothermal effect in piezoelectric semiconductors having electrons with different energy 10 p1746 A69-23573
- Entrainment of viscous electrically conducting liquid in long duct with narrow rectangular cross section and movable walls in magnetic induction field 16 p2816 A69-31606
- Turbulent boundary layer on disk rotating in free air, using circumferential and radial momentum integral equations and entrainment equation 17 p2957 A69-33601
- Turbulent boundary layer growth predicted for adverse pressure gradients, using entrainment theory for two dimensional and axisymmetric flows [ASME PAPER 69-FE-16] 20 p3517 A69-37991
- Diurnal entrainment deviations and atmospheric turbulence effects on flash photographs from Geos I 21 p3793 A69-38339
- ENTROPY**
Nitrogen compressibility and thermodynamic functions up to 10,000 atm pressure and 400 C 01 p0175 A69-10366
- Unsteady aerodynamics of ablating flared reentry body, noting complications due to blunted nose shear flow and entropy gradient effects 02 p0189 A69-12524
- Thermodynamics of directed continuous media, discussing kinematics, equations of state, entropy inequality and material objectivity principle 02 p0354 A69-12611
- Physical mechanism of stability loss in nonvortical flows of uniformly dense ideal fluids, discussing entropy production 06 p0911 A69-17498
- Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas 07 p1050 A69-18755
- Hydrodynamic stability and entropy decrease in flow in three dimensional space, using irreversible thermodynamics principles 10 p1808 A69-22892
- Lagrangian evolution criterion for electromagnetic conducting fluid and MHD flow, defining generalized fluxes and forces 10 p1727 A69-22904
- Mach wave and anisentropic supersonic flow interaction, considering constant entropy along streamline and layer of entropy discontinuities/interfaces 10 p1631 A69-22906
- Molar heat and entropy of adsorption and activity coefficient of adsorbed phase for methane-ethane-silica gel system 10 p1652 A69-23370
- Growth rates for convective disturbances propagation in atmosphere with linear entropy variation, noting WKB approximation 11 p1957 A69-24422
- Entropy minimization in feature extraction by dimensionality reduction with linear transformation of pattern vectors, noting recognition time and storage space savings 11 p1909 A69-25291
- Thermomechanical theory for nonreacting binary fluid mixtures, discussing free energy function, entropy flux vector, equations of motion, constraints, etc 12 p2191 A69-26927
- Fundamental principles of thermodynamics incorporation into general relativity and geometrodynamics, interpreting entropy growth in terms of space dynamics 14 p2538 A69-29019
- Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy 14 p2390 A69-29616
- Supersonic jet flow with separated shock wave flowing past infinite wedge using Chapplygin method, assuming negligible entropy variations 14 p2391 A69-29619
- Vibrational excess entropy in dilute solid solutions alloys calculated by changes in potential fields surrounding impurity atoms 16 p2798 A69-31706
- Communication channel information capacity determination through particle ensembles entropy analysis 19 p3334 A69-35885
- Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves 20 p3582 A69-38242
- Universal dependence of density fluctuations on specific entropy derived from equation describing material composed of neutral particles and equal number of charged and antiparticles 21 p3771 A69-38995
- Physics of massive starlike objects, discussing high entropy requirement, eventual nonrelativistic collapse and gravitational fields produced by low entropy equilibrium 21 p3811 A69-39516
- Parameter estimation using entropy of error as criterion function compared with mean square error analysis 21 p3757 A69-39664
- Relativistic thermodynamics using entropy principle to find restrictions on constitutive functions 22 p4050 A69-40451
- Book on entropy gradient effect on laminar hypersonic boundary layers, covering external frictionless flow calculations based on momentum and energy integral theorems 22 p3930 A69-40618
- Entropy definition for nonequilibrium states, using mathematical theory of stability of motion applied to kinetic equations of irreversible processes 23 p4238 A69-41366
- Linear elastic theory for calculating monovacancies entropy and energy of formation in metals 24 p4360 A69-42649
- ENVELOPES**
Weak signal optimization of multilevel quantization and corresponding detection performance, discussing asymptotic limits 09 p1456 A69-22293
- Galactic novae observational data and theoretical interpretations, considering envelope detachment from star, luminosity, motion and emission line intensities 17 p3032 A69-33103
- Envelope detection threshold levels definition for low input SNR based on apparent modulation depth reduction 22 p3902 A69-41225
- ENVIRONMENT MODELS**
RF synchrotron emission from electrons trapped in earth magnetic field observed by satellite, using magnetospheric environment model 18 p3128 A69-34948
- ENVIRONMENT SIMULATION**
NT ACOUSTIC SIMULATION
NT ALTITUDE SIMULATION
NT SPACE ENVIRONMENT SIMULATION
NT THERMAL SIMULATION
NT WEIGHTLESSNESS SIMULATION
- Passive ice protection of aerodynamic surfaces by icephobic coating, measuring removal of ice under simulated conditions in tunnel tests 01 p0056 A69-11047
- Automatic life support system tried on leeches for space applications 01 p0021 A69-11080

Pituitary-adrenocortical axis and neuro-endocrine functions in animals maintained in oxygen atmosphere, discussing norepinephrine and epinephrine excretion values, etc

01 p0019 A69-11343

Mathematical simulation of temperature and humidity changes in compartments of hermetically sealed space vehicle cabins

02 p0200 A69-11489

Closed system toroidal electrodynamic facility proposed for reentry simulation, discussing velocity generation

04 p0585 A69-15323

Lunar environment simulation, discussing space suit encumbrances on astronaut performance, gravity effects, surface texture, illumination, confinement and isolation

06 p0906 A69-17388

Oxygen-helium cabin atmosphere effect on speech communication analyzed during simulated space mission

07 p1066 A69-19420

Prolonged hypokinesia effects on white rats resistance to convulsions induced by high altitude simulation

08 p1262 A69-19929

Environmental simulation in aircraft engineering, tests concerning aerodynamic conditions and simulator design

08 p1301 A69-20603

Vacuum engineering problems during booster rocket engine ground tests, simulating flight environment [TR-781-O]

09 p1570 A69-22300

Near field repeatable stimulator of infrared earth horizon sensors in variable environments and test levels, noting orbital conditions [AIAA PAPER 69-322]

09 p1478 A69-22376

Nitrogen dilution low pressure simulation technique for subsonic flow flame stabilization of bluff bodies

09 p1624 A69-22614

Lunar visual environment effects on astronaut control manipulation task performance, discussing solar illumination simulation facility

12 p2059 A69-26554

Vibration machine as vibration environment simulation for product reliability testing, analyzing spectrum of acceleration waveforms

12 p2060 A69-26940

Real time pressure simulation chambers for testing space vehicles, discussing slow and rapid evacuation and pumping systems

13 p2240 A69-28077

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge

13 p2213 A69-28090

Superconductivity methods to neutralize ambient magnetic field by free electrons motion for nonmagnetic environments

13 p2244 A69-28604

Selectively pumped thermal vacuum test chamber for orbital heat transfer and environment simulation for flight vehicle performance prediction

15 p2587 A69-30392

Saturn 5 boost phase environment simulation on Apollo stages, discussing fixtures, load devices, instrumentation and ground test

15 p2588 A69-30405

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model

[AIAA PAPER 69-701]

17 p2920 A69-33461

Medical and biological laboratory ground experiments role in development of life support systems and suitable environments for prolonged manned space flights

18 p3098 A69-35165

Random vibratory environment simulation for spectra, noting electrodynamic generator employed to excite electric field force

19 p3294 A69-35904

Onboard computer and environment simulation for real time programs development, discussing instructions analysis, variables extraction and values and peripheral components

20 p3502 A69-37395

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions

[AIAA PAPER 69-1023]

22 p3923 A69-40393

Aircrew Arctic survival situation simulation experiments with survivors staying close to aircraft and walking across difficult terrain from emergency location

23 p4088 A69-41810

Swept frequency X band reflectometer for measuring antenna properties in simulated reentry environments

[AAS PAPER 69-282]

24 p4313 A69-42861

ENVIRONMENT SIMULATORS

NT HIGH VACUUM ORBITAL SIMULATOR

NT LUNAR GRAVITY SIMULATOR

NT SOLAR SIMULATORS

NT SPACE SIMULATORS

Lunar gravity simulation effect on human performance, discussing fidelity requirements, self locomotion, metabolic rate and psychomotor task decrement

02 p0203 A69-12217

Martian entry test facility for real size entry systems, discussing design, fabrication and operation

15 p2587 A69-30390

Motion cues simulation system with seat of six differentially inflatable sections, discussing DYNASEAT

17 p2947 A69-34007

Space environmental simulation facilities, discussing digital computers and equipment for simulating oxygen atmosphere, vacuum, heating and cooling, etc

19 p3295 A69-36326

Test facility for space vehicles simulating outer space gas pressure, heat sink behavior and relative motion to sun, detailing design and operation

21 p3689 A69-38420

ENVIRONMENTAL CHAMBERS

U TEST CHAMBERS

ENVIRONMENTAL CONTROL

Biological aspects of space exploration, analyzing human response to artificial environment in prolonged space missions

[UN PAPER 68-95715]

06 p0873 A69-17035

Pollution control forecast, contamination control specialist and systems approach

08 p1265 A69-19808

High bay clean room design with laminar air flow, discussing air filtration, sound attenuation, construction, illumination, etc

10 p1673 A69-23354

Biaxial stress effect on creep properties of thin walled tubes of polymethyl methacrylate at controlled temperature and humidity

10 p1717 A69-24216

Bleed air environmental system utilizing air to air jet pumps as flow multipliers for cabin pressurization air supply in commercial turboprop aircraft

[SAE PAPER 690331]

11 p1941 A69-24494

Pressurized Navajo aircraft environmental system, discussing ventilation, pressurization, heating and air cooling systems

[SAE PAPER 690330]

11 p1829 A69-24504

Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence

11 p1965 A69-25644

Space flight research programs including stellar and biological evolutions and environmental control

12 p2155 A69-26005

Remote sensing of environment - Conference, University of Michigan, Ann Arbor, April 1968

12 p2094 A69-26974

Theoretical model of homogeneous solid propellant ignition in neutral nonflow environment, discussing ignition time

13 p2324 A69-28218

Climatic environments development for physiological studies, considering ambient temperature, radiated heat and air velocity and movement

13 p2215 A69-28594

Airport noise control responsibility for airport and community planners using perceived noise level, noise and number index and community annoyance index as planning criteria

14 p2541 A69-29506

Aircraft noise environmental problem, discussing improvement through source, transmission and receiver control options

15 p2585 A69-30373

Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities

15 p2559 A69-31124

Avionics clean room workshops, discussing turbulent and laminar flow rooms and contamination monitoring of controlled environment facility

16 p2767 A69-32369

Ti corrosion resistance improved in special environments by oxidizing agents heavy metal ions and alloying

16 p2802 A69-32436

Optimal design for improving thermal performance of existing spacecraft thermally actuated lower system by increasing open-to-closed emittance ratio

[AIAA PAPER 69-627]

17 p3071 A69-33269

Mars lander thermal control system design parameters including environment, power duty cycle and lander size and weight

[AIAA PAPER 69-610]

17 p3072 A69-33274

Apollo Lunar Module Environmental Control System /LM/ECS/ steady state performance simulation techniques, discussing vacuum chamber data of LTA-8/LM-3

[AIAA PAPER 69-616]

17 p2903 A69-33307

Habitat modification for airport bird population control, discussing draining of wet areas, waste control, etc

17 p2915 A69-33368

Flight recorder program determining combat operating environments of CH-46D helicopters analyzed and compared with aircraft design criteria

[AHS PAPER 375]

17 p3059 A69-33513

Organic Rankine cycle system using heat absorption from turbine exhaust to provide increased electrical output and to power air conditioning

23 p4070 A69-42267

ENVIRONMENTAL ENGINEERING

Space photography to provide synoptic sedimentary environmental data analysis, discussing orbital sensing advantages

05 p0753 A69-15993

Displacement pumps and fluids for extreme environments, discussing fluid types and operational parameters such as speed, pressure, temperature, power, displacement and size

06 p0931 A69-17188

Test program for solid propellant rockets capability to withstand space environments

06 p0982 A69-17594

Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering trade-off studies

[AIAA PAPER 69-54]

06 p1010 A69-18042

Venusian atmosphere model developed from satellite and earth based radar data for environmental criteria in spacecraft design and mission planning

[AIAA PAPER 69-51]

06 p1011 A69-18096

IR camera determining surface temperatures, discussing construction and space applications

08 p1315 A69-20455

Field noise reduction frequency spectra afforded by spacecraft shroud, basing estimating criterion on flight test data

09 p1609 A69-21892

Surveyor electronic engineering design for lunar environment, discussing vacuum and temperature effects

11 p1958 A69-24633

Remote sensing of urban environments for metropolitan information systems noting photographic, thermal IR, radar and microwave applications

12 p2193 A69-27012

Environmental studies - Conference, Paris, March-April 1969

13 p2214 A69-28587

Man and environment - Conference, Anaheim, California, April 1969

15 p2584 A69-30356

Transient and long lasting space environment stresses, discussing accelerations, vibrations, shocks, rapid descent in vacuum, temperature variations, gravity, etc

15 p2625 A69-30824

Equipment environmental conditions tabulated to assist engineer in preliminary design considerations and in planning test programs for specimens

17 p2910 A69-33661

High density environment-resistant circular connectors, discussing design, applications, test and performance data compliance with MIL-C-81511 specifications

22 p3910 A69-39947

Dynamic power and life support systems electrical/thermal integration for manned spacecraft using low temperature Rankine cycle generator

23 p4189 A69-42269

Closed Brayton cycle power systems for space, lunar, terrestrial and undersea environmental conditions, discussing design and performance

23 p4071 A69-42277

Commercial aircraft environmental compatibility planning, considering problems of airport traffic growth and restrictive air traffic control regulations

[AAS PAPER 69-326]

24 p4252 A69-42808

ENVIRONMENTAL LABORATORIES

Book on groups under stress covering psychological research in SEALAB 2, emphasizing planning of data collection and experimental results
04 p0552 A69-14533

Equipment testing, discussing collaboration between government agencies and independent environmental testing laboratories
15 p2720 A69-30398

Lunar conditions differing from simulations in laboratories, examining surface, physicochemical properties and friction
18 p3113 A69-34241

Medical and biological laboratory ground experiments role in development of life support systems and suitable environments for prolonged manned space flights
18 p3098 A69-35165

ENVIRONMENTAL TEMPERATURE

U AMBIENT TEMPERATURE

ENVIRONMENTAL TESTS

NT CORROSION TESTS

NT HIGH TEMPERATURE TESTS

NT LOW TEMPERATURE TESTS

NT SALT SPRAY TESTS

NT THERMAL VACUUM TESTS

NT UNDERWATER TESTS

High pressure hydrogen environment on tensile properties of stainless steel with and without strain induced martensite
01 p0093 A69-10062

Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
01 p0096 A69-10612

Structural testing in aircraft design, discussing costs, environmental conditions, test rigs and apparatus
01 p0170 A69-10864

Environmental effects on aircraft and propulsion systems - Conference, Bordentown, New Jersey, October 1968
01 p0055 A69-11043

Permissible JP-5 fuel sulfur content effect on hot corrosion of protective coated Ni-base superalloys in marine environment, noting atmospheric sea salt role
01 p0141 A69-11059

Resistance of animal organisms and cells to extreme environmental conditions discussing exobiological implications for extraterrestrial life systems
01 p0017 A69-11083

Titanium-base alloys resistance to atmospheric corrosion based on weight change measurements and tensile tests after multicyclic exposures
01 p0100 A69-11351

Atmospheric stress corrosion tests of aluminum alloys in various environments, comparing aging results with accelerated laboratory tests
01 p0100 A69-11352

Space lubrication system for Orbiting Solar Observatory program, discussing theoretical high vacuum principles and flight performance and environmental test data
02 p0252 A69-11766

Environmental tests of space vehicles, determining parameter effects on ground storage and transportation, launching and orbital life
02 p0228 A69-11918

Surface effects on mechanical properties of crystalline and vitreous materials, considering environmental effects on dislocation mobility
03 p0454 A69-13870

Manual performance relationship to men exposed to cold, thermal neutral and hot environments, discussing finger dexterity and motor coordination tests
03 p0381 A69-14074

Hypoxia effect on animal brain gamma-aminobutyric acid levels
04 p0552 A69-14482

Atmospheric exposure chamber design for small animals, discussing dynamic and recirculating operations and gas scrubbing system
04 p0584 A69-14678

Graphite ablation in high pressure environments, extending existing analysis of thermochemical and thermomechanical behavior to include allotropic features [AIAA PAPER 68-1153]
04 p0686 A69-14873

Temperature, acoustic, vibration and shock environment effects on pure fluid bistable and proportional amplifiers [ASME PAPER 68-WA/FE-31]
05 p0705 A69-16104

Sensible heat exchange from Gemini and Apollo space suits determined in environmental test facilities, presenting data for heat flux distributions
06 p0880 A69-17089

Graphite ablation in air, N₂, Ar and He assuming chemical equilibrium, equal diffusion coefficients and steady state ablation [AIAA PAPER 69-148]
06 p0947 A69-18155

Lunar shelter regenerative life support system performance and manned test
07 p1071 A69-19427

Shock ignition procedure to keep pyrotechnic composition in optimum condition in space environment, describing test layouts and theory
10 p1749 A69-23007

Environment influence on fatigue crack propagation mechanisms in aluminum alloys in vacuum, ambient air and distilled and sea water
10 p1710 A69-23084

Environmental requirements of military specifications tabulated according to tests for altitude, temperature, vibration, shock, humidity, temperature/altitude, etc
11 p1862 A69-24331

Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity
11 p1848 A69-24868

Single crystal solar cell degradations in space, duplicating radiation effect on minority carriers lifetime by laboratory tests
11 p1826 A69-24876

Ablation test specimen environment at high temperature, analyzing laboratory heating, pyrolysis gas diffusion, convective heating, critical stress and temperature profiles, etc
12 p2191 A69-26815

Ablation wedge model design for testing in wave superheater under controlled pressure gradients and constant temperature
12 p2059 A69-26816

Transistorized amplifiers reliability estimated from step by step failures during operation in intense external environment
12 p2043 A69-26886

Procedures and facilities applicable to sonic environmental testing of flight vehicles, discussing sonic energy sources in vehicles and potential failure modes
12 p2060 A69-26939

Polymeric insulation materials, discussing intrinsic properties dependence on temperature and atmosphere, stressing effect on aging
13 p2285 A69-27985

One inch ceramic vidicon with slow scan photoconductor, electrostatic focusing and magnetic deflection to withstand sterilization and environmental testing for space applications
13 p2234 A69-28262

Accelerometer force balance used in measuring forces and moments acting on models in short duration rocket plume tests at simulated high altitude [AIAA PAPER 69-351]
13 p2264 A69-28285

Meteoroid perforation effects on space cabin design, discussing simulated destructive environmental tests [AIAA PAPER 69-365]
13 p2357 A69-28297

Climatic environments development for physiological studies, considering ambient temperature, radiated heat and air velocity and movement
13 p2215 A69-28594

Helicopter climatic testing, discussing component, systems and field tests and facilities
14 p2427 A69-29505

Space environment simulation tests of cadmium sulfide thin film solar cells, noting output loss
14 p2405 A69-29538

Continuous-channel electron multipliers degradation in spacecraft environment simulation laboratory equipment
14 p2449 A69-29565

Pulse generator to accommodate electronic system testing to shock response spectrum by simulating real world shock environment
15 p2585 A69-30360

Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
15 p2586 A69-30383

Space Environment Simulation (SES)/ facility at Goddard Space Flight Center, discussing operations and maintenance
15 p2586 A69-30386

Vibration/acoustics environmental testing, discussing advantages of digital computer control system and digital noise generation techniques
15 p2586 A69-30387

Vibration/acoustics digitally controlled environmental testing, describing random test signal generation and random vibration tests
15 p2587 A69-30389

Integrated structural and dynamic testing plans for proposed large interplanetary spacecraft, discussing acoustic testing, testing environments and flight environment transformation into laboratory
15 p2588 A69-30399

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards
15 p2580 A69-31130

Large scale integrated MOS devices tests for space applications, establishing quality specifications
15 p2580 A69-31131

Titanium alloy tensile specimens tests in air, methanol and anhydrous methanol environments at known stress-strain-time relations examined by fractography and high resolution electron diffraction
16 p2799 A69-31718

Static, transient and in-space environmental tests at satellite structures and heat shield test facilities in Italy
16 p2765 A69-31750

Gas environment effect on catabolic activities and enzymatic reactions of trachoma and meningopneumonia agents of genus Chlamydia
16 p2747 A69-31865

Urine excretion following water load in male subjects exposed to normal, hot/dry and comfortable/dry environment applied to airline crews
17 p2914 A69-33182

Hand movements in water environment, weightlessness and normal gravity conditions, discussing inner coordinative structure and muscular efforts
17 p2915 A69-33385

Acoustic spectrum averager for Mariner spacecraft environmental tests, calculating rms average 1/3 octave spectrum bands in real time [JPL-TR-32-1442]
17 p2946 A69-33658

Equipment environmental conditions tabulated to assist engineer in preliminary design considerations and in planning test programs for specimens
17 p2910 A69-33661

Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments [AIAA PAPER 69-641]
17 p2993 A69-33762

AGREE /Advisory Group on Reliability of Electronic Equipment/ testing philosophy, emphasizing environmental tests
18 p3143 A69-34481

Environmental testing role in qualification, acceptance, burn-in and reliability demonstration tests
18 p3143 A69-34482

Thermal and mechanical properties UV of diazadiphenoxides, carbodiimides and phosphorus amide epoxies resins composites for use in environmental extremes
19 p3356 A69-35528

Future combined environment space simulation tests duplicating environment interaction encountered during earth orbits, deep space probes and manned flights
19 p3288 A69-35531

Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions
19 p3281 A69-35549

Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels
19 p3321 A69-35567

Materials evaluation for devices with long term underground exposure, including field tests at tropical locations
19 p3321 A69-35568

Tilt wing V/STOL aircraft spray circulation characteristics in overwater operation, examining forces, moments and generated environmental conditions [AIAA PAPER 69-791]
19 p3243 A69-35638

Thin silicon solar cells environmental tests, evaluating temperature and humidity effects on various contacts and coatings
19 p3252 A69-35699

Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis
19 p3430 A69-36009

Apollo spacecraft equipment qualification program for margin assurance, discussing ground and flight tests
19 p3430 A69-36015

Surveyor thermal vacuum test data comparison with flight results indicating performance prediction reliability of earth-based tests for vacuum and lunar environments
19 p3430 A69-36016

Environment effect on scientific and telecommunication equipment mounted on exploratory probe during Venus atmosphere entry for acceleration loading in design

19 p3431 A69-36037

Environmental crowding effect on individual and group behavior in rat colony, using implanted passive resonant circuits for identification and passage information

19 p3257 A69-36243

Stress corrosion cracking of stainless steels and Incoloy and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments

19 p3349 A69-36890

Ti alloy stress corrosion susceptibility in salt water, alcohols and alkanes, comparing stress intensity for crack propagation in dry air

19 p3353 A69-36907

Stress corrosion cracking of alpha and alpha-beta Ti alloys in aqueous environment at ambient temperature, noting Al content and microconstituents

21 p3743 A69-38663

Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc

21 p3690 A69-38894

Space simulation facility assembly and operational testing

22 p3919 A69-39959

Reliability test program based on MIL-STD-781 B specification, noting test environments with AGREE chamber

22 p3953 A69-40027

Environmental neutron flux measured by various techniques, studying effects of soil and moisture on density

22 p4002 A69-40094

Operational reliability verification of Apollo real time mission program and testing structure, discussing environment, processing, controls, response criteria, etc

[AIAA PAPER 69-981]

22 p3907 A69-40361

Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator

[AIAA PAPER 69-992]

22 p3893 A69-40370

Mariner Mars 1969 TV system environmental test and calibration program

22 p3920 A69-40372

Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design

[AIAA PAPER 69-995]

22 p3920 A69-40373

Mission sequential environment effects on Dacron parachute material mechanical properties

[AIAA PAPER 69-1018]

22 p3923 A69-40390

Ceramic-sealed Ni-Cd secondary batteries space environmental behavior testing to determine heat dissipation during spaceborne operation

22 p3869 A69-40591

Corrosion of Ni through porous Au plate in humid sulfur dioxide atmospheric environments, analyzing product deposits and contact properties

23 p4176 A69-41534

Heart rate responses and corresponding tolerance tests in trained athletes and nonathletes during simulated environmental extremes

23 p4102 A69-41683

Large reflector paraboloid antenna performance under environmental loads

23 p4231 A69-42132

Closed Brayton cycle power systems for space, lunar, terrestrial and undersea environmental conditions, discussing design and performance

23 p4071 A69-42277

Design, fabrication and evaluation of lunar base solar array power modules, emphasizing structural/dynamic, thermal vacuum and acoustic tests

23 p4072 A69-42288

Solar array configurations and performance on Martian surface, including hard lander design and surviving shock levels

23 p4073 A69-42289

Fuel cells construction materials selecting and optimizing techniques using diffusion block and differential corrosion concepts

23 p4075 A69-42299

Stress corrosion cracks propagation from fatigue precrack in Al alloy exposed to organic liquid environments

23 p4178 A69-42452

Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities

24 p4262 A69-43025

Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions

24 p4321 A69-43126

Behavioral patterns and physiological parameters of medical leech Hirudo medicinalis determined in natural environment prior to biological experiment in space

24 p4268 A69-43402

Environmental stress effects on medical leech studied to determine tolerance to spacecraft launching, orbiting and reentry

24 p4268 A69-43403

Crash protection of flight data recorders, aircraft accident investigation, systems analysis, environment and enclosures

10 p1691 A69-23248

Altered gaseous environments effect /parabrosis/ on interferon production in mice injected with Newcastle disease virus, noting hypoxia role

24 p4262 A69-42888

ENZYME ACTIVITY

Tyrosine transaminase activity estimation by radioactive isotopic assay method, discussing application to rat liver and other organs

01 p0014 A69-10902

Glycolysis rate role in regulation of substrate inhibition of dehydrogenases

01 p0015 A69-10931

Insignificant or recoverable changes observed in blood acetylcholine content and cholinesterase activity of rabbits subjected to 8 g acceleration

02 p0197 A69-11491

1.5 g angular acceleration effects on acetylcholine metabolism in guinea pig brains and hearts

02 p0198 A69-11505

Ribulose diphosphate carboxylase and phosphoribulokinase activity in chemosynthetic autotrophs Thiobacillus thioautotrophicus and Thiobacillus neapolitanus, noting sedimentation and gel filtration characteristics

02 p0199 A69-11866

Phosphodiesterase activity of anterior pituitary, median eminence, heart and cerebral cortex of rat, studying effects of caffeine, theophylline and hydrocortisone

02 p0199 A69-11885

Lactodehydrogenase activity and LDG isoenzymes ratio in various tissues of rats during exposure to prolonged hypoxia at simulated heights

02 p0199 A69-11982

Slow proton irradiation of ribonuclease thin layers, determining differential inactivation cross section for various proton energies

03 p0371 A69-13482

Inactivation by heavy ions of esterase activity of dried trypsin as function of temperature during irradiation

03 p0372 A69-13483

Free radicals produced in ribonuclease, lysozyme and trypsin during exposure in vacuum and various temperatures to electron and heavy ion irradiation

03 p0372 A69-13484

Long lived radicals produced in crystalline ribonuclease and lysozyme by 120-Mev protons studied by ESR spectroscopy

03 p0372 A69-13485

Trapped radical relationship to inactivation of trypsin exposed to UV by measuring radical concentration and inactivation degree

03 p0372 A69-13486

Substrate and subunit interactions influence of beta 2 protein of Escherichia coli tryptophan synthetase on fluorescence properties of pyridoxal phosphate prosthetic groups

04 p0553 A69-15304

Cellular localization of acetyl-coenzyme A synthetase in yeast, noting enzyme distribution during aerobic growth on glucose

04 p0554 A69-15333

Brain norepinephrine effect on daily rhythmic changes in activity of tyrosine transaminase in livers of starved adrenalectomized rats

05 p0707 A69-15582

Identity between growth hormone degrading activity of pituitary gland and plasmin

06 p0873 A69-17105

Amino acid biosynthesis control in microorganisms by end product /feedback/ inhibition of enzyme action

06 p0876 A69-18238

Escherichia coli WWU multiautotrophic revertants with nonsense suppression, noting role in aberrant morphology and in catabolizing thymidine for energy and carbon

07 p1069 A69-19503

Enzymic decomposition of urea in urine, noting production of ammonia and effect of urea components on hydrolysis rate

08 p1265 A69-19834

Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor

08 p1263 A69-20374

Cation concentration requirement of halophilic NADH dehydrogenase for stability and maximum activity

10 p1651 A69-23127

Repeated blood sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens

10 p1644 A69-23158

Epinephrine forming enzyme phenylethanolamine-N-methyl transferase /PNMT/ in various brain regions of rats, cats, hens and turtles

10 p1644 A69-23303

Acceleration effects on cellular and subcellular structures enzyme activity in humans and animals, noting changes resulting from changed permeability of membranes

10 p1645 A69-23496

Transverse accelerations effect on dogs gastrointestinal tract secretory activity, noting central nervous system role

10 p1645 A69-23498

Rats tolerance to impact accelerations from blood enzyme activity providing safety limits for living organisms

10 p1645 A69-23500

Poly A-poly U synthesized by Azotobacter Vinelandi RNA polymerase in unprimed reaction containing ATP and UTP, following short lag period

10 p1647 A69-24185

DNA replication in vivo as function of temperature sensitive polynucleotide ligase mutant Th, tsA80 in strand synthesis

10 p1647 A69-24188

Tryptic digestion of C terminal tritiated peptides analyzed with Scenedesmus ferredoxin, noting use for protein structural study

10 p1648 A69-24190

Oxidative and dephosphorylating enzymes and esterases in rat and squirrel monkey cerebral cortexes, noting neuron activity

12 p2018 A69-25773

Histochemical studies on nucleus basalis of Meynert of squirrel monkey

12 p2018 A69-25774

Histochemical tests on enzymes distribution in rhesus and squirrel monkeys intrafusal and extrafusal muscle fibers

12 p2018 A69-25777

Lactate dehydrogenase and monoamine oxidase distribution in medulla oblongata and cerebellum of squirrel monkey

12 p2018 A69-25778

NADH stimulation of ATP dependent carbon dioxide fixation in crude extracts of Hydrogenomonas facilis, considering allosteric regulation of phosphoribulokinase activity

15 p2554 A69-30036

Proline residue effects on hydrolysis of peptide bonds by thermolysin

15 p2561 A69-30083

Histological and histochemical studies of dephosphorylating enzyme distribution in muscle spindle capsule of guinea pig thigh muscles and cat calf muscles

15 p2554 A69-30406

High vacuum effects on oxidative processes in bacteria and physiological activities of enzymes

15 p2557 A69-31354

Gas environment effect on catabolic activities and enzymatic reactions of trachoma and meningopneumonitis agents of genus Chlamydia

16 p2747 A69-31865

Hepatic tyrosine transaminase rhythm in rats under various conditions of lighting, food consumption and dietary protein content

17 p2910 A69-33755

Urease activity determined by using C 14 urea in stored, preserved /Permafrost/ and irradiated soils

18 p3095 A69-34543

Salts and organic solvents effect on halophile Halobacterium cutirubrum catalase, noting enzyme activity inhibition by cation and anion

18 p3096 A69-35291

Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH

20 p3484 A69-37101

Substrate specificity of cathepsin C derived from rat liver, describing polymeric structure and behavior as acidic protein

20 p3473 A69-37577

Enzymes distribution in subformal organ in squirrel monkey

20 p3478 A69-37934

Biological experiments on cells with/without suppressors, discussing RNA, DNA, enzymatic and UAA codon activities

20 p3480 A69-38265

Organism growth physiology based on decisive enzyme reactions, considering synthesis of biological proteins from DNA and molecular life processes

21 p3652 A69-38787

Single large X ray dose depressive effect on aminotransferase activity in rabbit blood serum, liver, kidney, heart, spleen, lungs, etc

21 p3657 A69-39051

Nerve tissue oxidation processes relation to nervous system radiation sensitivity in dogs with cerebellum X rayed after enzyme poisons administration

21 p3658 A69-39053

Enzyme activity changes in liver, heart and cerebrum of X ray exposed rats and rabbits, noting individual enzyme differences in same X rayed organ

21 p3658 A69-39054

Single X ray dose effect on alpha-amylase and alpha-glucanophosphorylase in rabbit liver tissues and blood serum

21 p3658 A69-39055

Brain weight and cholesterase activity in rats after exposures to acoustic and light stimuli

21 p3662 A69-39627

Enzyme transitions in RNA polymerase state during unprimed synthesis of r(t/c) copolymer, noting dimer-monomer pattern during lag phase

22 p3895 A69-40050

Sympathetic nerve liberated noradrenaline increasing melatonin synthesis, using C 14 tracer for monitoring

22 p3871 A69-40051

DNA and d(A-T) oligomers enzyme binding to DNA polymerase by sucrose density gradient centrifugation

22 p3898 A69-41075

Electron transport chain of monovalent and divalent cations and of polyamines, studying effects on menadione reductase activity to determine salt dependence

22 p3886 A69-41077

Anoxia effect on succinic dehydrogenase and lactic dehydrogenase activities in digestive glands and organs sensitive to oxygen tension changes

22 p3887 A69-41193

Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats

23 p4080 A69-41404

Enzymatic processes of glucose metabolism in immature rats lymphatic tissues during exercise- induced elevated corticosteroid secretion

23 p4080 A69-41405

Cardiac myosin characteristics obtained from dogs with naturally occurring heart failure, showing reduced adenosinetriphosphatase activity as compared with normal dogs

24 p4258 A69-42630

Experimental myocardial infarction in dogs, examining lysosomal enzymes activity changes in soluble and particle-bound fraction

24 p4259 A69-42636

Chlorella enzymes activity in reducing nitrate to nitrite and nitrite to ammonia

24 p4263 A69-43136

Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C

07 p1065 A69-18974

Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C

20 p3479 A69-38222

Catalytic, physical and chemical properties of enzyme lactate dehydrogenase isolated from lobster tail muscle

22 p3897 A69-41069

DNA polymerase from Escherichia coli, discussing physical and chemical properties of enzyme and polypeptide chain consistency

22 p3898 A69-41070

Chemical modifications effects on Escherichia coli, DNA polymerase, including Hg atom addition to sulfhydryl group of enzyme

22 p3898 A69-41071

Properties, relative magnitudes and relationship of pyrophosphate exchange reactions catalyzed by DNA polymerase from Escherichia coli

22 p3898 A69-41072

Exonuclease function of DNA polymerase from Escherichia coli, discussing hydrolysis of polydeoxyribonucleotides and resistancy of oligonucleotides

22 p3898 A69-41073

Deoxyribonucleoside triphosphate substrate binding to Escherichia coli DNA polymerase, conducting equilibrium dialysis

22 p3898 A69-41074

Amino acid sequence of dogfish lactic dehydrogenase, isolating acylated amino-terminal peptide and arginine residues, indicating four polypeptide chain composition

24 p4280 A69-43051

ENZYMOLGY

Pyridine nucleotide-linked D-lactate dehydrogenase stereospecificity in various species of invertebrates

01 p0018 A69-11198

Ribulose diphosphate carboxylase and phosphoribulokinase activity in chemosynthetic autotrophs Thiobacillus thioarus and Thiobacillus neapolitanus, noting sedimentation and gel filtration characteristics

02 p0199 A69-11866

Lactodehydrogenase activity and LDG isoenzymes ratio in various tissues of rats during exposure to prolonged hypoxia at simulated heights

02 p0199 A69-11982

Uptake, metabolism and enzymatic synthesis of adrenaline in mammalian brain

07 p1066 A69-19260

EOSINOPHILS

Vestibular stimulation effect on human blood composition during rocking test indicating blood eosinophile content as function of hypophysis and adrenal cortex reactions

20 p3473 A69-37268

EPE-D

U EXPLORER 26 SATELLITE

EPHEMERIDES

NT PLANET EPHEMERIDES

Computer program in ALGOL for computing satellite ephemerides applicable to satellites with direct or retrograde motion observed in Northern or Southern Hemispheres

12 p2159 A69-26448

Gauss method for Kepler equation ephemeris computation in nearly parabolic orbits, using expansions suitable for high speed computers

12 p2171 A69-27154

Provisional elliptic orbit computed for asteroid Floirac using Gauss-Encke and least squares method, tabulating residuals and ephemeris

14 p2521 A69-29585

Satellites meridian and extrameridian observations by transit instrument, examining errors in ephemerides of bulletins

16 p2858 A69-32211

Epochs and ephemerides of asteroid Amor for 1916, 1924 and 1972, noting unfavorable observing conditions in future

17 p3038 A69-33723

Book on Messier nebulae and star clusters covering current astronomical ideas, star maps, identification diagrams, telescope illustrations and astronomical data

18 p3206 A69-35471

Orbital elements of visual binaries Don 91 and ADS 9756 derived graphically, tabulating observations with ephemerides

20 p3600 A69-37480

Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction [AIAA PAPER 69-908]

21 p3807 A69-39340

Pluto positions /1930-1965/ from photographic observations, ascribing declination errors to atmospheric dispersions

22 p4025 A69-40612

EPHEMERIS TIME

Ephemeris Time and Atomic Clock Time roles in astronomy, discussing errors in daylength determination for mechanical, Shortt and atomic clocks, UT and Ephemeris Time

01 p0156 A69-10989

Ephemeris of comet Grigg-Skjellerup for reappearance in 1971/72, based on equations of motion integration and perturbations

17 p3044 A69-34183

Lunar occultations analyzed to determine Moon position and ephemeris time, confirming adopted values of node and perigee motions

20 p3601 A69-37494

Bright lunar limb zenith distances measured by equal altitudes method, deriving Ephemeris- Atomic Time A3 and Ephemeris-TU2 time relations

23 p4208 A69-41289

EPIDEMIOLOGY

Epidemiology of aerial application accidents analyzed in groups of high and low wing monoplanes, biplanes and helicopters

09 p1447 A69-22554

EPIDERMIS

Dermal injury predictability for exposure to thermal radiation based on mathematical model using temperature-time histories

06 p0875 A69-17840

EPILEPSY

Epilepsy acquired by 25 year old jet fighter pilot, noting cardiovascular abnormalities

09 p1446 A69-22728

EPINEPHRINE

Uptake, metabolism and enzymatic synthesis of adrenaline in mammalian brain

07 p1066 A69-19260

Sympathetic neurohormones measurement in plasma of race car drivers

07 p1067 A69-19424

Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor

08 p1263 A69-20374

Epinephrine forming enzyme phenylethanolamine-N-methyl transferase /PNMT/ in various brain regions of rats, cats, hens and turtles

10 p1644 A69-23303

Social and visual isolation effect on rat blood pressure, pulse pressure, heart rate, behavior and response to epinephrine

14 p2407 A69-29296

Mammalian brain epinephrine metabolism data after isotonic saline perfusion into cranial vasculature
21 p3650 A69-38323

Aminazine and adrenaline effects on adrenocortical function in patients with diencephalic syndrome
22 p3888 A69-41272

Increased oxygen tension adaptation and effects on adrenocortical and sympatho-adreno-medullary activity in rats, indicating toxic conversion of epinephrine to indoles
23 p4087 A69-41791

EPITAXY

Gallium arsenide single crystal epitaxy with doping/concentrations into semiinsulating microwave circuits
01 p0040 A69-10196

Carrier mobility variation with electric field related to structure of epitaxial field effect transistors
02 p0294 A69-11541

Fundamental microwave oscillations at high frequencies in GaAs epitaxial sandwich layers, using space charge growth control
02 p0297 A69-11941

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission
03 p0488 A69-13887

Power epitaxial GaAs tunnel diodes grown from solution in tin with tellurium
03 p0489 A69-13895

Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system
03 p0489 A69-13896

Relaxation effect in epitaxial silicon MOS structures, formulating differential equation for doping distribution in epitaxial layer
03 p0490 A69-13947

Epitaxial GaAs films with high electron mobility, noting radiation recombination spectra dependence on substrate orientation
03 p0492 A69-14172

Electrical conductivity of high resistance epitaxial semiconducting films measured by three probe method
04 p0597 A69-14538

Red light emitting p-n junctions in GaP fabricated by epitaxial growth
06 p0979 A69-16999

Solution regrowth method to prepare epitaxial GaAs for Gunn effect devices
07 p1197 A69-18451

Epitaxially grown guard rings for GaAs p-n junction and Schottky barrier avalanche diodes
08 p1284 A69-20368

Vapor deposition of high purity epitaxial layers of n-type gallium arsenide, noting resistivity and Hall coefficient measurements [ECS PAPER 62]
08 p1373 A69-21067

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects
09 p1555 A69-21473

Electrical resistivity of epitaxial CdTe films produced by vacuum sublimation on hot orienting mica and single crystal substrates
10 p1742 A69-23001

Hetero-epitaxial germanium films on GaAs by germanium condensation from molecular beams in vacuum, obtaining p-type conductivity
11 p1938 A69-25033

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission
11 p1939 A69-25688

Power epitaxial GaAs tunnel diodes grown from solution in tin with tellurium
11 p1939 A69-25696

Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system
11 p1939 A69-25697

Gallium arsenide materials technology, discussing solution and vapor-phase epitaxy and liquid encapsulation as related to crystal growth and purification
12 p2141 A69-25834

Vapor phase epitaxial production of indium arsenic phosphide crystalline layers, discussing electron mobilities, electrical resistivities and doping
12 p2142 A69-25934

Substructural patterns of epitaxial PbTe films obtained by condensation of vaporized PbTe on NaCl crystal surfaces, discussing formation kinetics and morphology
12 p2144 A69-26675

Vapor phase growth of epitaxial single crystalline GaAs-GaSb alloys using arsine and stibine
12 p2145 A69-26920

Epitaxial layers impurity concentration and resistivity measurements by capacitive and three point probe methods
13 p2233 A69-28641

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects
15 p2669 A69-30718

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface
15 p2670 A69-31046

EPITHELIUM

Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
17 p2907 A69-32944

EPOCHS

U TIME MEASUREMENT

EPOXIDES

U EPOXY COMPOUNDS

EPOXY COMPOUNDS

NT ETHYLENE OXIDE

Susceptibility of high modulus graphite and boron fiber epoxy composites to lightning damage, noting degradation by pulse current
08 p1338 A69-20486

Rotational spectrum of ethylene episulfide to determine molecular structure, particularly orientation of C sub 2 S ring
08 p1268 A69-20535

Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction
19 p3354 A69-35516

EPOXY RESINS

Elastic properties of epoxy resins, deriving relation by considering different shear properties in tension and compression
01 p0103 A69-11268

Mechanical and optical viscoelastic characterization of Hysol 4290 epoxy polymer as function of time and temperature, using creep test data
03 p0524 A69-13064

Phenolic and epoxy adhesives for metal-metal and honeycomb bonding, discussing cold cure adhesives for aircraft structures and aircraft floor sandwich design optimization
04 p0606 A69-14845

Epoxy molding compounds characterization and classification for development and evaluation of raw materials
04 p0620 A69-14954

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
05 p0785 A69-16491

Temperature dependence of dynamic viscoelastic properties of plasticized epoxy resins
06 p0946 A69-17125

Compressive strength of boron fiber-epoxy matrix composite, noting matrix support of fibers against buckling
07 p1170 A69-18713

Anisotropic glass fiber reinforced epoxy resin composite under biaxial and uniaxial loads, noting isochromatics and isoclinics in photoelastic analysis
07 p1170 A69-18715

Multidirectional boron-epoxy laminates shear strengths and elastic moduli, calculating in-plane tension and compression
08 p1337 A69-20484

Loading rate effects on fracture energy in carboxy terminated liquid Hycar toughened cantilever cleaved epoxy resin
08 p1338 A69-20491

Crack propagation in crosslinked glassy polymers, noting effects of added elastomers molecular weight
08 p1338 A69-20492

Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles
08 p1338 A69-20494

Tensile characteristics of discontinuous unidirectional fiber reinforced glass-epoxy composites and filament wound material, discussing alignment and interfacial bonding
08 p1339 A69-20496

Matched metal molding of short graphite fiber composites
08 p1339 A69-20502

Fire retardant brominated epoxy systems for wet filament winding process, noting viscosity, pot life and NOL ring mechanical properties
08 p1340 A69-20507

Mechanical properties of cast epoxy resins correlation with corresponding composites strength under static and dynamic fatigue stressing
08 p1340 A69-20510

Boron-epoxy composites applications and properties, comparing strength to weight and stiffness to weight ratios with aluminum, titanium and beryllium
09 p1529 A69-22068

Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure
09 p1530 A69-22327

Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve
09 p1508 A69-22339

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing
09 p1508 A69-22340

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material
09 p1509 A69-22341

Static and dynamic strength tests and modulus data for graphite fiber/epoxy composite yarn, noting ply winding and dimensions [ASME PAPER 69-GT-114]
09 p1531 A69-22520

Temperature and strain rates effect on delayed yield and failure of plasticized epoxy resin
10 p1717 A69-24218

High temperature organic sealants for repairing small gas leakages in vacuum devices, tabulating test results for alkyd, epoxy, silicone and polyimide resins
11 p1907 A69-24742

Graphite and B filament-epoxy resin composites application to aeroelastic scaled dynamic models, analyzing weight savings, fabrication and component stiffness
11 p1990 A69-25508

Fabrication, machining and contouring of boron-epoxy composite for sandwich type aircraft structure, noting F-5 supersonic fighter main landing gear strut door
12 p2103 A69-26826

Rigid structures high damping without loss of rigidity achieved by epoxy resin dampers, noting moderate cost
13 p2370 A69-28601

Uniaxial compressive stability of rectangular boron-epoxy laminated plates clamped on loaded edges, determining buckling loads by Southwell plots
13 p2287 A69-28669

Short fiber composites flow orientation in system of high volume glass fibers in epoxy resin measured by glass rheometer
13 p2287 A69-28670

Shrinkage stresses in two phase materials, analyzing stress distribution in epoxy inclusions in plasticized matrix during curing by photoelastic method
13 p2371 A69-28675

Epoxy adhesives physical chemistry, curing processes, formulation, surface application methods, testing and health hazards
14 p2468 A69-29339

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement
15 p2642 A69-30312

High temperature structural adhesives at temperatures of 350 F and higher including epoxies, polyimides, amide-imides and polybenzimidazoles
15 p2642 A69-30329

Low endurance fatigue in aluminum, Nylon 66 and epoxy resin compared, considering stress-strain relationships, fatigue damage, failure mechanisms and crack propagation
18 p3155 A69-34633

High modulus graphite epoxy composite material laminates fabricated and tested, correlating filament strength variation effect with composite tensile strength
19 p3354 A69-35518

Thermal and mechanical properties UV of diazadiphenetides, carbodiimides and phosphorus amide epoxies resins composites for use in environmental extremes
19 p3356 A69-35528

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards

19 p3319 A69-35545

Epoxy molding compounds performance on DIP integrated circuits, determining comparative moisture protection provided by encapsulants

19 p3280 A69-35546

Transfer molded epoxy dielectrics, comparing encapsulation rate, pressure and cure times to compression molding

19 p3281 A69-35548

Glass fiber with epoxy resins compared to polyester resins, discussing chemical reactions, bonding and strength relations

19 p3358 A69-35902

Glass fiber laminates based on epoxy organosilicon resins, discussing various hardeners effects on strength, etc

19 p3358 A69-35903

Photochromic panel for flash blindness protection using epoxy plastic plates containing aromatic hydrocarbon compounds excited to triplet states

21 p3668 A69-39783

Photoelastic and micromechanics studies of epoxy resins of varying Young moduli by simultaneous stress analysis of FRP and matrix materials

21 p3846 A69-39796

Epoxy resin materials assessed for model materials for three dimensional photoelasticity

22 p4042 A69-40311

Beta-thiodiglycol effect on hardening of epoxy resin with stoichiometric amounts of maleic anhydride and methyltetrahydrophthalic anhydride

22 p3973 A69-40677

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time

22 p3973 A69-40743

Boron fiber reinforced composite materials in aircraft structures, comparing rigidity with glass fiber plastics and weight gains

23 p4179 A69-42155

Large contoured nozzle fabrication using liquid epoxy as casting material, presenting molding process based on experimental data

24 p4318 A69-42643

Redesigned Al wing structure using B-epoxy composite applied to pressurized fuel carrying section, including material, fabrication and test data

24 p4323 A69-43418

Boron epoxy composites evaluation for use in aircraft dynamic components, considering fatigue failure mechanism identification

24 p4337 A69-43450

Gel permeation chromatography to measure rate of adhesive aging and curing in one shot epoxy tapes, noting handling techniques and space applications

24 p4338 A69-43463

EQUATIONS OF MOTION

NT EULER EQUATIONS OF MOTION
NT HELMHOLTZ VORTICITY EQUATION
NT HYDRODYNAMIC EQUATIONS
NT KINEMATIC EQUATIONS
NT KINETIC EQUATIONS
NT NAVIER-STOKES EQUATION
NT REYNOLDS EQUATION

Equations of motion for kinematics of complex mechanisms, noting methods and relations

01 p0115 A69-10165

Vector potential used to express equations of incompressible fluid motion in form suitable for digital solution, discussing boundary conditions

01 p0058 A69-10228

Natural vibration properties of elastic free-free body obeying Hooke law analysis from equilibrium and motion equations, determining Green tensor

01 p0167 A69-10323

Flexural vibration of unbalanced rotating shaft with nonlinear characteristic of elasticity and damping, using equations of motion

01 p0168 A69-10329

Unsteady laminar boundary layer near thermally insulated rotating disk, establishing solutions describing motion

01 p0059 A69-10361

Equations of motion of point restricted tethered parafoil for investigating longitudinal and lateral dynamic stability

01 p0009 A69-10415

Equations of motion of satellite in rotating coordinate system, noting effects of precession and nutation on transformation of orbital elements

01 p0150 A69-10445

Optimal control system sensitivity definitions, analysis methods and design techniques, discussing equations of motion of dynamical system satisfying vector differential equation

01 p0051 A69-10553

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping

01 p0151 A69-10567

Forced oscillations of unbalanced rotor on elastic bearings with nonlinear characteristics investigated for resultant forces and amplitude using motion equations

01 p0170 A69-10824

Matrix technique for transformation of equation of motion into first order equation in analyzing perturbation forces producing mechanical oscillations

01 p0170 A69-10827

Flight simulator based on analog computer simulating six linearized equations of motion and aircraft model, discussing design and applications

01 p0057 A69-11300

Idealized delta wing free-free oscillations determination by deriving equations of motion for flexibility and rigidity and formulating boundary value problems

01 p0172 A69-11358

Group invariant solutions of differential equation systems applied to quasi-linear partial differential equations of motion of air masses

02 p0274 A69-11444

Motion, field momentum and field kinetic energy equations of concentrated dislocations based on Zorski field theory of defects

02 p0336 A69-11556

Pressure to density ratio to analyze one dimensional high temperature gas flows with heat transfer, considering motion equations

02 p0350 A69-11576

Periodic cubic differential equation of motion solved with special reference to location of fixed points and stability of solutions

02 p0280 A69-11816

Linear integrodifferential motion equations for turbulent flow within Heisenberg statistical turbulence theory

02 p0230 A69-11869

Plane shock wave interaction with elastic shallow spherical shell in compressible fluid, formulating equations of motion

02 p0339 A69-11977

Computer solution of six degrees of freedom flight equations, discussing advantages of using flight path axes for translational equations of motion

02 p0212 A69-11998

Motion stability of two tethered unsymmetrical earth pointing bodies in circular orbit, presenting nine degrees of freedom differential equations of motions

02 p0324 A69-12507

Time dependent tube wall radial displacement during explosive welding as function of distance from initial explosion

02 p0254 A69-12675

Equations of motion for arbitrary first order perturbations around any spherically symmetric metric

02 p0328 A69-12730

Lie groups for equations of motion in quantum mechanics or field theory determined by operator analysis

02 p0282 A69-12840

Differential equations of motion for holonomic system of points with variable mass

03 p0465 A69-12965

Vehicle trajectory motion in transition region of three body problem, noting equations of motion, first order solutions, etc

03 p0505 A69-13001

Cold plasma motion caused by electromagnetic wave pressure propagating along uniform magnetic field

03 p0477 A69-13413

Kinematic parameters for elastic slender body aid in description of motion of body

04 p0668 A69-14271

Steady state plasma flows stability equations, using variational principle for analyzing toroidal plasmas

04 p0635 A69-14556

Beam vibration problems with mixed response-excitation input information solved by recasting equations of motion

[AIAA PAPER 68-319] 04 p0676 A69-14711

Simulation of flight dynamic equations of motion for fixed wing aircraft, using variable analog computer with gimballed and servocontrolled aircraft model

04 p0585 A69-14829

Separation of center of mass and rotational coordinates from N electron diatomic Schroedinger equation

04 p0554 A69-14861

Motion of vapor derived from solid material vaporization and subsequent heating by nonequilibrium continuum radiation, noting continuity equations and energy transfer

04 p0686 A69-14985

Equations of motion derived for incompressible and irrotational viscous fluids in special relativity

05 p0792 A69-15682

Game interception of motions, obtaining proof for extremal aiming scheme

05 p0793 A69-15777

Equations of motion of nonholonomic mechanical systems in Poincare-Chetaev variables

05 p0793 A69-15778

Nonlinear steady state vibration of single degree of freedom system, obtaining relationships between non-dimensional pi parameters of differential equation of motion

[ASME PAPER 68-WA/DE-7] 05 p0839 A69-16172

Integrability of equations for problem of motion of heavy solid body about fixed point

05 p0794 A69-16206

Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis

05 p0827 A69-16476

Integrability of equations of motion of gyrostat about fixed point inertial moments varying identically in time

05 p0764 A69-16504

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation

05 p0759 A69-16641

Energy integral for holonomic system of points of variable mass, transforming Lagrangian form via Hamiltonian function

05 p0794 A69-16685

Equations of motion solved for solid body with ellipsoidal cavity containing ideal incompressible fluid in uniform eddy motion

06 p0957 A69-16823

Equation for charged particle motion in electromagnetic wave field propagated along magnetic field applied to nonlinear wave propagation in plasma near cyclotron resonance

06 p0963 A69-16905

Simple dipolar stresses, noting effect of antisymmetry on equations of motion and energy equation

06 p1022 A69-17239

Nonlinear equations of motion for rendezvous in circular orbits, pursuer using minimum fuel and pursued having no propulsion

06 p1014 A69-17571

Optimality criterion and equations of motion determined for fixed time impulsive trajectory to minimize total characteristic velocity

06 p1007 A69-17575

Gradient method solution for class of optimal control problems, minimizing root mean square value of finite state components of object in motion

06 p0904 A69-17886

Rolling ballistic vehicles mass and aerodynamic characteristics determined from dynamic motion data by performing Fourier analysis on roll axis equation of motion

[AIAA PAPER 69-102] 06 p0862 A69-18039

Computing optimum flight profiles by Balakrishnan epsilon method, including equations of motion constraint in cost function to be minimized

[AIAA PAPER 69-75] 06 p0868 A69-18058

Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angular motion as functions of angle of attack

[AIAA PAPER 69-135] 06 p0863 A69-18120

Aerodynamic coefficients from observed motion of body in flight, eliminating need for closed form solutions by employing numerical solutions to equations of motion

[AIAA PAPER 69-134] 06 p0864 A69-18161

Simplification of equations of two temperature plasma composed of electrons, singly charged ions and neutral atoms, noting effect of viscosity and thermal force

07 p1190 A69-18693

Group analysis of MHD equations, determining group properties of motion equations of compressible fluid, obtaining invariant solutions

07 p1191 A69-18994

Two dimensional flow of conducting fluid in channels with longitudinal transverse magnetic field and Hall effect, discussing gas motion equations linearization

07 p1192 A69-19015

Hydraulic drag coefficient in MHD fluid flows in traveling magnetic field from motion equations for turbulent flows, considering velocity profiles
07 p1192 A69-19017

Pulsation energy balance of turbulent jet of conducting fluid expanding in longitudinal magnetic field
07 p1192 A69-19021

Charged particle motion in electromagnetic field from basic equation of motion for magnetosphere, discussing dipolar magnetic field, Stormer trapped particle theory, etc
07 p1208 A69-19355

Circular cylindrical spinning shells vibrations by gyroscopically induced inertia loads, formulating equations of motion based on shallow shell theory
07 p1236 A69-19459

Traveling waves on elastic spherical shells derived from dynamic equations of motion, including transverse shear and rotatory inertia effects
07 p1236 A69-19460

Composition effect of flight path measurements on correction of space vehicles flight path, discussing single parameter correction of motion in force free field
07 p1178 A69-19607

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion
07 p1183 A69-19678

Hamilton-Jacobi equations of motion for classical electron in presence of traveling pulse of electromagnetic radiation, solving radiation pulse shape orbits
08 p1361 A69-19790

Mathematical theory generalization for smooth materially uniform simple bodies, discussing elastic body structure, material tangent bundle and index bundle, motion equations, etc
08 p1410 A69-19822

Solution of equations of motion of charged particles in constant magnetic field and variable electric field
08 p1361 A69-20213

Stability and instability conditions derived for undisturbed motion of system over finite period of time
08 p1351 A69-20321

Trajectory calculation of unguided meteorological rocket by digital computers and by equations of motion, discussing wind influence on ceiling and horizontal ranges
08 p1409 A69-20457

Dynamic behavior of electrohydraulic servactuators over wide range of loads using differential equations of motion
08 p1256 A69-20718

Numerical integration of motion equations of electrons subject to electrostatic waves, considering turbulent heating
08 p1368 A69-20806

Steady motion through rarefied gas of circular cylinder due to surface temperature difference
08 p1305 A69-20888

Hydromagnetic steady forced flow against porous rotating disk, integrating equations of motion by Karman-Pohlhausen and series methods
08 p1370 A69-21005

Lateral stability of glider towed by cable in steady rectilinear horizontal flight, deriving motion equations as ordinary differential equations
09 p1433 A69-21498

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities
09 p1485 A69-21535

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle
09 p1532 A69-21763

Motion stability over finite interval of time for perturbed mechanical systems
09 p1539 A69-21881

Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems
09 p1540 A69-21882

Bubble spiral path motion toward axis of rotation of liquid rotating at constant angular velocity
09 p1483 A69-22006

Structural damping coefficient for free vibrations of one degree freedom general systems motion
09 p1617 A69-22076

High sensitivity gyroscopic HF angular acceleration sensor using special differentiator, obtaining motion equations and dynamic response
09 p1498 A69-22109

Differential equation for droplet motion along ballistic trajectory in gas flow, noting applicability to solid bodies via computer programming
09 p1483 A69-22222

Gunn effect cavity controlled generator oscillations, noting phase trajectory closing conditions dependence on resonant mode parameters
09 p1468 A69-22596

Relativistically corrected Vlasov equation solved as approximate solution of exact relativistic equations of motion for low density media
10 p1724 A69-22924

Invariant transformation of equations for ideal gas plane steady motions, noting application to gas flows with shock waves and eddies
10 p1680 A69-23709

Rigid body rotational simultaneous equations of motion transformed into explicit form for digital simulation
10 p1661 A69-23855

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade [ASME PAPER 69-VIBR-50]
10 p1804 A69-24148

Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297

Turbulent flow velocity field evolution in presence of random forces using equation of motion
11 p1867 A69-24628

Formula in Prandtl-Batchelor theory describing motion of incompressible fluid in sphere interior verified experimentally
11 p1868 A69-24755

Differential equations for effect of sinusoidal force with slowly varying frequency on dynamic behavior of nonlinear vibrator, using phase surface technique
11 p1916 A69-24760

Dynamic stability of double pendulum with vibrating point of suspension, obtaining differential equations of motion by Lagrange equations application in averaging method
11 p1884 A69-24768

Kowalewski solution for motion of heavy body with fixed point, noting hodographs
11 p1917 A69-24776

Variational equations for rotation of heavy solid body with fixed point about horizontal axis, noting mass distribution
11 p1917 A69-24778

Steady state solutions of differential equations of motion for body with fixed point, considering Kharlamov cone for rotation of heavy gyrost
11 p1917 A69-24780

Distribution of steady state solutions for equations of helical motion of body in infinite fluid, noting coaxial control surfaces
11 p1868 A69-24782

Kinematic equations of motion of body about fixed point, considering Steklov solution
11 p1918 A69-24791

Finite difference solutions for time dependent equations of motion for steady flow around cylinder at large Reynolds numbers
11 p1872 A69-25133

Radial hydrostatic bearing parameters calculated by pressure distribution diagram in bipolar coordinates, obtaining equations of motion
11 p1892 A69-25341

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates
11 p1932 A69-25465

Motion equations for ideal transonic gas flow, applying solutions to flow with incident shock waves of various profiles
11 p1820 A69-25468

Transverse pulsating motion of spherical particle in turbulent flow, considering differential equation of motion transformation
11 p1876 A69-25489

Space vehicle docking dynamics and matrix equations of motion amenable to numerical solution on digital computer, using Hamilton principle and Lagrange multipliers
11 p1967 A69-25501

Elastic free-free body deformation during motion based on equations of motion valid for rigid body, noting dynamic Green tensor
11 p1994 A69-25604

Covariant equations of motion of body of variable mass in general relativity, considering Schwarzschild field, rotating mass field and Einstein static universe
11 p1965 A69-25744

Motion of heavy body with gyroscope, using coordinate system to reduce problem to linear second order differential equation
11 p1920 A69-25746

Equations of motion of body with fixed point, deriving solutions representable as segments of trigonometric series in variable related to time differentially
11 p1920 A69-25748

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem
12 p2027 A69-25882

Jet flows instabilities with vertical and horizontal velocity drifts from numerical integration of atmospheric motion equations linearized with respect to small perturbations
12 p2125 A69-25950

Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
12 p2061 A69-26013

Monograph on rapid rotations of aircraft with fixed controls, covering spin and roll movements differential equations
12 p2013 A69-26118

Linearized steady state equations of motion solved for boundary conditions of fluid lying between horizontal planes with temperature varying horizontally
12 p2066 A69-26134

Electrohydrodynamic equations and transfer coefficients for multicomponent plasma with volumetric charge in electric field, discussing Ohm law and equations for plasma motion
12 p2135 A69-26399

Potential error source in VTOL aircraft dynamics analysis suggested by dual function of symbol used in perturbation equations of motion
12 p2014 A69-26776

Orbit determination from satellite using linear combinations of time of flight measurements and based on expansion of satellite law of motion
12 p2159 A69-26778

Thermomechanical theory for nonreacting binary fluid mixtures, discussing free energy function, entropy flux vector, equations of motion, constraints, etc
12 p2191 A69-26927

Controllable motions of compressible homogeneous isotropic solids, anisotropic solids and fluids with memory under constant body force
12 p2189 A69-27118

Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion
13 p2371 A69-27318

Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation
13 p2244 A69-27327

Equations of motion computerized simulation for attitude stabilization of orbiting telescope coupled to crew compartment
13 p2261 A69-27952

Equations of motion of compressible fluid with non-zero resistivity near thin foil, solving supersonic and subsonic flow by Fredholm integral equations
13 p2200 A69-28360

Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients
13 p2370 A69-28665

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation
14 p2433 A69-28797

Periodic solutions for small nutation angle of quasi-linear autonomous system of equations of motion of heavy solid body moving around fixed point
14 p2445 A69-28896

Rigid obstacle unsteady motion in compressible fluid with load applied to surface layer, deriving numerical solution of pressure expansion
14 p2430 A69-29480

Relativistic behavior of electromagnetic multipolar nongravitating particle, discussing integrability of field equations
14 p2486 A69-29594

Quasi-distribution function differential equation for laser field with nonMarkoffian character derived from density matrix master equation
14 p2486 A69-29633

Soviet book on partially liquid filled solid body dynamics from viewpoint of space and aircraft applications

14 p2530 A69-29815

Plane shock wave interaction with elastic shallow shell in compressible fluid, formulating equations of motion

15 p2704 A69-30262

Master equation in quantum optics phase-space formulation based on Schroedinger equation of motion, noting application to Volterra integral equation and Born approximation

15 p2633 A69-30307

Air masses transformation, solving nonlinear simultaneous system of equations of motion, heat influx and turbulent energy balance

15 p2649 A69-30647

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping

15 p2690 A69-30737

Dynamic stability of elastic bodies with motion described by partial differential equation

15 p2652 A69-30860

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude

15 p2652 A69-30911

Stress distribution in isotropic spherical shell rotating uniformly about diametral axis, deriving equilibrium equations

15 p2712 A69-31005

Integrable cases of equations of motion of solid body around fixed point located in potential field of elastic supports

15 p2653 A69-31194

Magnetothermoelasticity equations, uniqueness and reciprocity theorems and solutions emphasizing moving media

15 p2715 A69-31215

Dynamics of spin stabilized satellite with long crossed dipoles or slender beams, including linearized equations of motion

15 p2703 A69-31332

Equations for gradually changing motion by differentiating momentum and energy equations with respect to abscissa noting wall resistance, viscosity, turbulence and Coriolis coefficients

15 p2593 A69-31489

Eigenvalue bounds for amplification rates, wave speeds and linear stability conditions for Orr-Sommerfeld equation governing parallel flow in boundary layer and round pipes

16 p2768 A69-31591

D-stationary principle to determine optimum hypersurfaces in configuration space containing optimal motion trajectories

16 p2811 A69-31625

Motion equations for dynamics of aircraft control surface controlled by autopilot with rigid feedback

16 p2809 A69-32134

Mechanical systems modeling modification to include mobile coordinates, introducing gyroscopic and pseudogyroscopic terms into motion equations

16 p2875 A69-32246

Motion of two rigid spheroids with mutual gravitational attraction based on Hamilton-Jacobi theory applicable to binary stars

16 p2863 A69-32402

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities

16 p2783 A69-32530

Fluid filled spherical shell axisymmetric nontorsional motion analysis via differential equations obtained by Hamilton principle

17 p3051 A69-32956

Mechanical systems differential equations of motion solution behavior, discussing program constraints

17 p3053 A69-33017

Wave generation in infinite micropolar elastic solid body analyzed by linearized equations of motion

17 p3053 A69-33018

Subsonic thermal convection or internal gravity waves from formal scale analysis of equations of motion in plane parallel atmosphere

17 p2960 A69-33155

Rotational equations of motion for two body spacecraft on common spin axis required for simulated gravity environment or gyroscopic stability augmentation

17 p3047 A69-33227

Stability and instability conditions derived for undisturbed motion of system over finite period of time

17 p3005 A69-33314

Exact similarity solutions of hypersonic small disturbance equations for steady flow, discussing equations of state and motion and dissociating gas flow [AIAA PAPER 69-707]

17 p2953 A69-33448

Lifting rotors with thrust or tilting moment feedback control, deriving blade equations of motion [AHS PAPER 340]

17 p2899 A69-33510

Two dimensional incompressible flow past circular cylinder at moderate Reynolds number, reducing partial differential equations of motion by series truncation for flow field

17 p2896 A69-33600

Gyrocompass differential equations of motion reduced to Volterra integral equation, proposing solution algorithm

17 p2995 A69-33617

Natural frequencies and vibration modal shapes of asymmetrical airfoil blades analyzed by differential equations of motion, noting flexure coordinates center variations effect

17 p3067 A69-34053

Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting inextensibility constraint and equations of motion roles [ASME PAPER 69-APM-26]

18 p3214 A69-34399

Orbit determination for short and long period comets using equations of motion including terms for radial components of nongravitational force

18 p3195 A69-34432

Drift of two connected gyroscopes, discussing equations of motion assuming unperturbed rotation and weightlessness

18 p3135 A69-34561

Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions

18 p3216 A69-34578

Equations of motion of rapidly rotating spacecraft, considering deformations of long elastic booms

18 p3207 A69-34582

Fixed point reaction force in mobile system of solids coupled kinematically, examining zero dynamic components

18 p3172 A69-34590

Equations of motion for plate vibration derived by complementary variational principle, including boundary conditions and thin plate transverse vibrations

18 p3218 A69-34626

Thermal emission and spectral degree of blackness of W derived from electron motion equation

18 p3156 A69-34715

Game interception of motions, obtaining proof for extremal aiming scheme

18 p3173 A69-35030

Periodic solution of boundary value problem involving motion equation of viscous fluid

18 p3123 A69-35053

Spiral disk galaxies stability analysis assuming centrifugal force balancing self gravitation, transforming linearized equations of motion into eigenvalue equations

18 p3200 A69-35131

Quadratic approximation at matrix level of dynamic equations for rotating bodies applied to gravity gradient satellite exhibiting nonlinear resonances

18 p3174 A69-35298

Protosun and solar system angular momentum losses analyzed from equations for convective star rotation change, noting almost total protosun initial momentum loss possibility

18 p3203 A69-35346

Polar coordinates in Euclidean space applied to theory of satellite moving in gravitational field of spherically symmetrical body, introducing equipotential surfaces

19 p3397 A69-35610

Equations of motion for axisymmetric elastic deformation of inhomogeneous body of revolution subjected to torsion and steady oscillations

19 p3436 A69-35845

Linearization of equations of motion for three body problem, emphasizing lunar far side libration point as related to possible landing

19 p3402 A69-35961

Nonlinear free motion of conservative oscillator with one degree of freedom calculated by collocation method

19 p3438 A69-36308

Gas dynamics of material slab under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency

19 p3449 A69-36355

Long term integration of fluid motion equations with finite difference scheme using hexagonal grid system to avoid nonlinear computational instability

19 p3564 A69-36508

Numerical integration of atmospheric motion equations in global domain using hexagonal grid, including sphericity corrections and Coriolis term

19 p3564 A69-36509

Motion equations of holonomic system of elastic bodies subjected to scleronomic, ideal and statically determinate constraints, using Green tensor

19 p3374 A69-36584

Gyrostatt satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostatically stabilized satellite equations of motion

19 p3432 A69-36620

Group properties of adiabatic motion equations of medium in relativistic hydrodynamics, including solutions of subgroups applicable to multiple particle production

19 p3301 A69-36843

Translating Tolman problem of cosmic dust motion into centrally symmetrical reading system, showing relativistic and Newtonian motion laws coincidence

20 p3594 A69-37079

Stability of periodic orbits in elliptic restricted three body problem [AAS PAPER 68-086]

20 p3595 A69-37172

Perturbation matrix derivation in rectangular coordinates using Sitarsky two body variational equation for all motions

20 p3568 A69-37200

Numerical solution of equations of motion of rocket under thrust in inverse square force field, discussing effects of initial acceleration

20 p3595 A69-37203

Asymptotic stability of null solution of matrix differential equation, considering linearized equations of rotational motion for hinged two body gravity gradient satellite orbit

20 p3575 A69-37212

Numerical integration of lunar motion equations to investigate lunar theory for high precision applications and to examine motion departures from gravitational theory

20 p3603 A69-37560

Hydromagnetic waves equations of motion for non-relativistic case, discussing particle and fluid flow models

20 p3616 A69-38317

Equations of motion for optimal attitude of suborbital aircraft regarding time and distance range

21 p3795 A69-38440

Jupiter mass determined by applying Cowell numerical integration to equations of motion for ninth satellite

21 p3795 A69-38468

Literat solution to equations of motion applied to lunar theory using electronic computer with series convergence

21 p3796 A69-38474

Magnetospheric electromagnetic phenomena explained by equations of motion for particle acceleration, forbidden regions and MHD processes

21 p3707 A69-38485

Steady motions stability of gyroscope in Cardan suspension, deriving equations of motions with rectangular coordinate system

21 p3723 A69-38851

Time optimal control for second order automatic system with motion described by differential equations

21 p3770 A69-38856

Near resonant and nonresonant solutions of nonlinear equation describing rotating pendulum motion under periodic disturbance

21 p3771 A69-39004

Reaction forces calculated for system of connected solid bodies of various composition during accomplishment of given motion

21 p3771 A69-39085

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets [AIAA PAPER 69-904]

21 p3806 A69-39336

Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem [AIAA PAPER 69-907]

21 p3807 A69-39339

Inertial motion of body produced by revolving uniformly deformed configuration, showing constant semiaxes without kinetic energy losses

21 p3772 A69-39620

Equation of motion for determining nonlinear vibration of rod pendulum in viscous flow of varying velocity

21 p3773 A69-39679

Equations of motion of elastic dumbbell satellite and two-mass spring-connected satellite in orbit, using energy and Floquet theory to investigate spinning motion stability

21 p3817 A69-39759

Optimal flight regime determination for variable mass body pursuing target by straddling method, presenting motion equations and approximate solutions

21 p3818 A69-39819

General control theory for spacecraft motions, deriving dynamic equations of motion about center of mass for holonomic and nonholonomic control programs

21 p3829 A69-39829

Controlled motion of space vehicle about center of mass analyzed by equation expressing nutation angle invariance

21 p3830 A69-39839

Minimization of motion deviation from prescribed motion analyzed as differential game of converging motions using equations of motion

22 p3980 A69-40105

Equations of motion of holonomic and non-holonomic mechanical systems obtained by displacement operators

22 p3980 A69-40106

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method

22 p3980 A69-40109

Flexible string extraction from bobbin through nozzle, solving equations of motion by neglecting bending rigidity, extensibility, drag, internal friction, etc

22 p3930 A69-40585

Equations of motion of unguided rocket under wind effect, calculating launch angles for wind compensation

22 p4037 A69-40815

Artificial satellite motion analysis and perturbation function, considering disturbances due to second satellite or sun

22 p4030 A69-40906

Positive solutions of parabolic and hyperbolic partial differential equations arising as viscoelastic media equations of motion, noting maximum principle utilization

22 p3976 A69-41035

Nonlinear model including rocket rotary and forward motion inside smoothbore launcher utilizing dynamic friction coefficient

22 p4037 A69-41038

Integral equations of motion for plane steady flow of viscous incompressible electrically conducting fluid around flat plate

22 p3992 A69-41109

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation

22 p4047 A69-41123

Quantum mechanical systems dynamics in diagonal coherent state representation, discussing applications

22 p3983 A69-41259

Metal removal mechanisms during electrochemical milling for moving electrodes, noting equations of motion of point for nonmoving electrodes

23 p4168 A69-41310

Book on porous bodies hydrodynamics covering motion equations for free, filtration, perfect and Newtonian fluids

23 p4150 A69-41501

Differential equations of motion and associated boundary condition for axisymmetric flexural vibration of cylindrically anisotropic circular plate, using variational calculus

23 p4228 A69-41911

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method

23 p4230 A69-42004

Motion equations of quasi-linear nonautonomous systems with many degrees of freedom, obtaining periodic solutions by asymptotic integration

23 p4183 A69-42477

Ballistic equations for mass center movement in vertical plane defined by projectile initial velocity

23 p4183 A69-42482

Mathematical model for ascent and descent of high altitude tethered balloon, developing computer program and deriving differential equations of motion [AIAA PAPER 68-942]

24 p4254 A69-43722

EQUATIONS OF STATE

NT HUGONOT EQUATION OF STATE

High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium

01 p0128 A69-10346

Electrical equation of state of metals determination from density, conductivity, energy and metal vapor velocity measurements in wire explosions

01 p0117 A69-10659

MHD equations describing interactions between gases and magnetic fields solved by finite difference method

01 p0129 A69-10722

Thermodynamics of directed continuous media, discussing kinematics, equations of state, entropy inequality and material objectivity principle

02 p0354 A69-12611

General theory of relativity equations for homogeneous anisotropic three dimensional space with matter, deriving ultrarelativistic equation of state

03 p0466 A69-13423

Active circuit analysis by state variable method, defining state vector as set of voltages between nodes and reference node

03 p0410 A69-13831

Thermodynamic theory of strain rate sensitive plastic material within framework of thermodynamics of materials with internal state variables

05 p0834 A69-15792

Three atom interaction contribution to nonideal dissociating gas state equation, determining quantum correction for third virial coefficient

05 p0796 A69-15893

State variable techniques applied to optimal continuous linear feature extraction for binary Gaussian pattern recognition or detection problem

05 p0740 A69-16577

State variables of ideal gas in two phase region, discussing determination from equations of state and equation for internal energy and Maxwell criterion inapplicability

06 p1030 A69-17170

Continuous time nonlinear dynamical system state variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations

06 p0904 A69-17939

Schwarzschild perfect fluid spheres stability to radial perturbations, noting fluid adiabatic index relation to critical value

07 p1221 A69-19585

Consistency of high temperature equation of state of solids, considering Grüneisen parameter and lattice dynamics

08 p1419 A69-19814

Finite elastic locking medium, discussing equation of state for thermodynamic variables and applications to thermoelasticity [IS-ERI-70]

09 p1612 A69-21561

Thermal models for Jupiter and Saturn corresponding to completely convective structure, using De Marcus state equations

09 p1607 A69-22428

Self similar solutions for collapse of empty cylindrical cavity in gas with given equation of state, describing gas motion past cavity

10 p1679 A69-23367

Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field

11 p1961 A69-25107

Specific isochoric heat capacity of pure fluids, considering thermal equation of state, vapor pressure and boundary conditions at critical point

11 p2001 A69-25201

Ferromagnetic transition in superdense nuclear matter and neutron stars, developing relativistic equation of state

11 p1965 A69-25564

Rational transfer function matrix realization into irreducible Jordan canonical form state equation by nonsingular transformations

12 p2122 A69-26511

Lumped linear system state estimation with optimal linear smoothing instead of filtering, noting smoothing lag and variance

12 p2122 A69-26524

Equations of state for continuous media, using variational principles within framework of relativity theory

12 p2131 A69-26972

Computer determination of symbolic state equations for nonlinear circuits using FORTRAN notation

12 p2055 A69-27097

Polynomial and nonlinear equations of state for solids and liquids analyzed using uncommon statistical and least squares methods

14 p2486 A69-29470

Shock attenuation and equation of state of polyurethane based on aquarium technique and free surface velocity measurement

16 p2828 A69-31810

Exact similarity solutions of hypersonic small disturbance equations for steady flow, discussing equations of state and motion and dissociating gas flow [AIAA PAPER 69-707]

17 p2953 A69-33448

Plate dynamics generalized equations independent of plate theory hypotheses, discussing algorithm and initial and boundary conditions

18 p3226 A69-35376

Nondissociating vibrationally excited dense N₂, analyzing compressibility factor, internal energy, enthalpy, entropy, sound speed and specific heat by state equations

20 p3631 A69-37214

Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model

22 p3984 A69-40186

Equation of state measurements of earth materials by shock wave techniques, applying to olivine for earth mantle constitution problem

22 p3937 A69-40188

Linear partial differential equations derived from thermodynamic identities integrated by method of characteristics for relationships between temperature and pressure incomplete equations of state

23 p4239 A69-41569

Fully dispersed wave reflection from plane wall in stable relaxing gas, obtaining canonical equation of state

24 p4299 A69-42717

Liapunov functionals for time delay systems by path integrals in state space, using convolution equations involving distributions with compact support

24 p4295 A69-43317

EQUATORIAL ELECTROJET

Equatorial and auroral electrojets, discussing origin theories and ionospheric irregularities

02 p0236 A69-11433

Diurnal variation in horizontal magnetic component of South American stations close to electrojet during IGY

02 p0246 A69-12771

Symmetric baroclinic instability role in Jupiter equatorial acceleration

03 p0508 A69-13347

Equatorial hourly storm time part of disturbances field for 1958, discussing magnetic storm effects

07 p1124 A69-18822

Equatorial counter-electrojet and inverse quiet day solar diurnal variation current layers, noting regular diurnal variation horizontal component and latitude effect

08 p1306 A69-19884

Toroidal magnetic fields in ionosphere associated with solar quiet daily variations producing electric current and equatorial auroral electrojets

10 p1681 A69-22805

VHF radar observations of electron density irregularity in nighttime equatorial electrojet, comparing day and night time electron drift rates and directions

10 p1769 A69-23837

Equatorial electrojet role in electromagnetic induction at magnetic dip equator, applying Price theory for space gradients

13 p2252 A69-27519

Equatorial electrojet VHF radar observations indicating nontwo stream electron concentration irregularities related to electron drift velocity

14 p2511 A69-28953

Diurnal change in equatorial electrojet parameters observed by magnetometers on Nike Apache rockets

15 p2598 A69-31320

Equatorial electrojet north-south cross sections in Pacific observed by airborne equipment during magnetically quiet day, moderately disturbed day and solar eclipse

16 p2777 A69-32182

Equatorial electrojet current distribution determined using equivalent circuit method and magnetic force model, noting electron density profile influence on current density

18 p3130 A69-35186

Model equatorial electrojet with meridional current system constructed by spherical harmonic expansion for geomagnetic field, noting current loops

20 p3533 A69-38084

Atmospheric gravity waves amplitude generated in equatorial electrojets and polar regions

20 p3593 A69-38107

Daytime drift velocities and signal fading characteristics of equatorial and blanketing sporadic E layer irregularities, noting independence of electrojet intensity
23 p4160 A69-42429

Ionospheric F region equatorial anomaly in electron density showing high correlation with equatorial electrojet range and poor correlation with Fuquene range
23 p4160 A69-42432

Two stream plasma instability in equatorial electrojet extended to nonlinear domain by nonlinear treatment of ion kinetic equation
24 p4310 A69-43182

EQUATORIAL ORBITS
NT STATIONARY ORBITS

Attitude control system for gravity gradient stabilized satellite in synchronous and near synchronous equatorial orbits, discussing libration damping methods
03 p0504 A69-12857

Magnetic sample-and-hold damping using geomagnetic field for libration damping of gravity gradient stabilized satellite in near synchronous equatorial orbit
07 p1227 A69-18337

Magnetic field at synchronous equatorial orbit by analyzing magnetometer data recorded by ATS 1 satellite during magnetic storms, geomagnetic substorms and quiet times
07 p1123 A69-18343

Earth quadrupole moment effects on precession of gyroscope in satellite in equatorial orbit
17 p2972 A69-33072

Equatorial moderately elliptical satellite orbit perturbations calculated in local invariants, assuming state vector dependence of acceleration
17 p3039 A69-33796

Global communication satellite system with 12 to 16 hour period equatorial orbit, discussing satellite daily switchings, motions relative to earth, etc
20 p3497 A69-38189

F region atmospheric density measurements obtained from aerodynamic drag on San Marco 2 satellite in equatorial orbit, comparing data with San Marco 1
21 p3704 A69-38369

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop
21 p3827 A69-39755

EQUATORS
NT MAGNETIC EQUATOR

Solar eclipse effect on geomagnetic field at and near dip equator observed at Huancayo Observatory, Peru
02 p0241 A69-11727

Hydrodynamic model of atmospheric circulation in equatorial region, using group invariant method
03 p0462 A69-13931

F2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner
09 p1486 A69-21548

Cosmic ray equators from trajectory tracing procedure for computing vertical cut-off rigidities with two different geomagnetic field simulations compared to experimental equators
14 p2511 A69-28961

F 2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner
16 p2784 A69-32543

Equinox and equator corrections of orientation elements of FK3 and FK4 catalogs based on meridian solar observations
17 p3027 A69-32871

Ionization irregularities in equatorial E region observed in various scale sized by rocket-borne Langmuir and plasma-noise probes
23 p4160 A69-42430

Equatorial anomaly during declining solar activity, treating seasonal and daily variations, longitude dependence and geomagnetic storm-time distortions
23 p4161 A69-42436

Equatorial anticyclones over eastern Pacific caused by large scale cross-equatorial flows determined by ATS-1 photographs, noting frictional convergence factor
24 p4342 A69-42895

Equator-to-pole temperature gradient relation with planetary pressure belts, comparing observational data with theoretical circulation criterion
24 p4345 A69-43149

EQUILIBRIUM

Elastic shell nonlinear theory, introducing nonsymmetric stress tensor and principles of virtual work and objectivity
01 p0166 A69-10166

Weakly interacting neutrinos in anisotropic cosmological models with emphasis on equilibrium period, noting energy increment
01 p0123 A69-10348

Equilibrium problem of elastic medium with stress couples in linearized elasticity theory, representing biharmonic function with aid of analytical functions
02 p0340 A69-12035

Asymptotic stability of gyroscopic systems equilibria with partial dissipation used for motion stability analysis
04 p0631 A69-15537

Initial defects influence on equilibrium states of compressed elastoplastic plates
06 p1025 A69-17684

Inhomogeneous half planes equilibrium bonded by elastic layer, noting tangential stresses at interfaces
09 p1611 A69-21482

Holonomic and scleronomic dynamic systems steady state motion stability under effect of generalized forces derived on basis of Liapunov theory
10 p1724 A69-22929

Nonlinear systems of differential equations to free oscillations about equilibrium, obtaining periodic solutions
18 p3172 A69-34591

EQUILIBRIUM DIAGRAMS
U PHASE DIAGRAMS
EQUILIBRIUM EQUATIONS

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure
19 p3438 A69-36203

Equilibrium equations for longitudinally hinged nonshallow cylindrical shells transformed into coupled equations with constant coefficients
19 p3439 A69-36581

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states
19 p3440 A69-36636

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient
20 p3621 A69-37076

Equilibrium equations reduced to single partial differential equation for membrane theory of shells having coefficients of first quadratic form and specified curvature radius
20 p3622 A69-37220

Equilibrium and stability of axisymmetric gaseous polytropes in toroidal magnetic fields, calculating harmonic oscillations by virial tensor method
21 p3797 A69-38534

Stress-strain state of thin spherical shell of variable thickness in elastoplastic equilibrium, using Meissner variables to reduce equilibrium equations
21 p3834 A69-38717

Gaseous mixtures for hypervelocity applications, studying equilibrium conditions and thermodynamic properties for shock and constant volume heating processes
22 p4049 A69-40266

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation
22 p4043 A69-40455

Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations
22 p4043 A69-40456

Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures
22 p4048 A69-41199

Stress analysis in elastic bodies induced by axisymmetric strains in presence of mass forces and temperature gradients, obtaining equilibrium equation
23 p4229 A69-41997

Takeoff indicator design based on solution of equilibrium equation for forces acting on aircraft along drag axis
24 p4253 A69-43085

EQUILIBRIUM FLOW
NT FROZEN EQUILIBRIUM FLOW

Equilibrium turbulent boundary layer prediction for proposed Prandtl mixing length distribution
03 p0419 A69-13992

Steady state plasma flows stability equations, using variational principle for analyzing toroidal plasmas
04 p0635 A69-14556

Numerical solution of chemically reacting boundary layer equations, noting loss of accuracy due to numerical cancellations
04 p0588 A69-14737

Linear theory of equilibrium and nonequilibrium gas flows applied to steady two dimensional nonequilibrium flow of inviscid nonheat-conducting gas
06 p0909 A69-17327

Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field
07 p1119 A69-18746

Laminar boundary layer flow on sphere in hypersonic flow of equilibrium dissociating air
07 p1050 A69-18756

Equilibrium theory of parametric pump using cyclic flow of binary mixture through column with heated and cooled bed of solid absorbent
09 p1481 A69-21910

Axisymmetric flow theory for turbomachine of non-free vortex design in distributed equilibrium state, considering boundary conditions and blade leading edges [ASME PAPER 69-GT-10]
09 p1432 A69-22504

Turbulent boundary layers behavior near flow separation, obtaining equations for equilibrium layers
15 p2591 A69-30638

Adiabatic compressible turbulent equilibrium boundary layer integral method analysis extended to study nonequilibrium laminar flows, deriving dissipation integrals, presenting numerical solutions [AIAA PAPER 69-689]
17 p2955 A69-33481

Fully developed whirls steady state structure, discussing tornadoes maximum azimuthal speed, hurricanes rotational speed, model for mature hurricane and numerical computation [AIAA PAPER 69-671]
17 p2997 A69-33499

Equilibrium Couette flow of ionized multicomponent ideal gas between moving catalytic plates, obtaining thermal flow formulas and thermal conductivity coefficient
19 p3240 A69-36403

Computerized design of potassium vapor turbine with supersaturation effects compared with equilibrium flow turbine design
23 p4187 A69-42251

EQUILIBRIUM METHODS

Natural vibration properties of elastic free-free body obeying Hooke law analysis from equilibrium and motion equations, determining Green tensor
01 p0167 A69-10323

Modified Galerkin method applied to approximate solutions of two dimensional elasticity equations of equilibrium
02 p0338 A69-11748

Stress discontinuity surface of three dimensional rigid plastic body arbitrary yield condition, considering equilibrium of regular four sided pyramid
11 p1996 A69-25738

Equilibrium paths in initial postbuckling of elastic structural systems, discussing stability boundaries and relationships between imperfections and critical loads
13 p2359 A69-27261

Inverse deformation in elastic materials, using variational principle to obtain equilibrium equations properties
13 p2360 A69-27324

Effective tensors of elastic moduli and yielding of composite materials, considering multiparticle interactions and use of equilibrium and incompatibility equations
13 p2360 A69-27382

Love stress function derivation from equilibrium equations
13 p2364 A69-28233

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution
13 p2365 A69-28239

Finite element analysis of flat rectangular panels, developing equilibrium equations based on specified displacement modes
15 p2708 A69-30667

Equilibrium equations for elastic medium with stress couples, presenting first term of asymptotic expansion of solution for disk and simply connected region
16 p2871 A69-31830

Linear theory of elastic stability of structures, discussing deformation kinematics, perturbed and neutral equilibria and solutions for buckling of beams, plate, shells, etc
17 p3054 A69-33042

EQUINOXES

EQUINOXES

Equinox and equator corrections of orientation elements of FK3 and FK4 catalogs based on meridian solar observations

17 p3027 A69-32871

Ionospheric electron temperature profiles for mid-day equinoctial conditions noting protonospheric and conjugate heating effects

22 p3939 A69-40506

EQUIPARTITION THEOREM

Klein theorem kinetic energy corrections taking into account breakdown of equipartition theorem

16 p2823 A69-32469

EQUIPMENT SPECIFICATIONS

Fluidic element design calculations, noting flow characteristic differences

02 p0195 A69-12074

Precision coaxial connectors, giving IEEE standard mechanical, electrical and environmental specifications for general precision connectors using coplanar butt joints

02 p0222 A69-12757

Large area proportional counter for cosmic ray design, construction and specifications

03 p0427 A69-12979

Economic planning of satellite earth station equipment in relation to expected traffic demand, emphasizing specifications for communication via Intelsat 2 and 3 satellites

07 p1117 A69-19347

Avionic systems development, discussing criteria for realization of operational requirement and engineering product satisfying requirement [AGARDOGRAPH-114]

08 p1317 A69-20982

Microminiature system mechanical design for aerospace environment, considering guidelines for implementation of requirements [AGARDOGRAPH-114]

08 p1291 A69-20986

Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation

08 p1293 A69-21110

Maintenance process simulation for engine and major components to provide routine material usage forecast and policies

09 p1503 A69-21802

Environmental requirements of military specifications tabulated according to tests for altitude, temperature, vibration, shock, humidity, temperature/altitude, etc

11 p1862 A69-24331

Equipment life cycle costs computer simulation for design and changes evaluation, including maintenance analysis example

15 p2723 A69-31138

Polish electronic measurement devices operating principles and specifications including vibration, frequency and pressure meters, fatigue testing machines, etc

16 p2790 A69-32076

Light aircraft emergency downed position indicators installation program, discussing transmitter minimum performance standards, listening watch insurance, etc

17 p2931 A69-34102

Physics of Control program for electronic devices reliability, discussing qualified parts, chemical, physical and electrical properties, parameter ranges, specifications and corrective action

18 p3143 A69-34488

Reliability demonstration by MIL-STD-781 for equipment failure and success, proposing useful alternatives

18 p3145 A69-34507

Reliability prediction limited to approximations related to past experience on similar equipment

18 p3147 A69-34517

MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling

20 p3551 A69-38289

High density environment-resistant circular connectors, discussing design, applications, test and performance data compliance with MIL-C-81511 specifications

22 p3910 A69-39947

MIL-STD-781A vibration requirements, using mechanical shakers for AGREE vibration testing

22 p3954 A69-40036

Hungarian-made semiconductor silicon-base strain gages meeting specifications at half world market price

22 p3947 A69-40938

All-equipments reliability test improved by removing usual truncation and extending accept-reject lines of test plan MIL-STD-781

24 p4321 A69-43203

Radiation hard device specifications, comparing data with environmental considerations

24 p4287 A69-43204

Microelectronics test program consisting of four reliability screening levels based on Mil-Std 883

24 p4287 A69-43205

EQUIPOTENTIALS

Earth equipotential surface shape determination from satellite orbit dynamics, obtaining triaxial ellipsoid

09 p1487 A69-21635

Equilibration potentials between dense thrust beam and dilute space plasma measured in wind tunnel [AIAA PAPER 69-263]

09 p1568 A69-21728

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces

20 p3594 A69-37077

Inertial motions, equipotential surfaces and Coriolis forces on earth ellipsoid, discussing pendulum-like oscillations

24 p4346 A69-43156

EQUIVALENCE

Equivalence principle application to gyroscope motion in uniform gravitational field to obtain precessional angular velocity

05 p0764 A69-16367

Space-frequency equivalence between monochromatic correlator interferometer using directional antennas and wideband correlator interferometer using isotropic antennas

07 p1132 A69-18917

Space time structure conditions derived for compatibility with simultaneous fulfillment of causality and equivalence principles

08 p1351 A69-19948

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

10 p1721 A69-23959

Penfield-Haus solution to magnetodynamic effect problem as inertial effect of orbital angular momentum, deriving Bohr magneton formula from Einstein equivalence principle

11 p1919 A69-25098

Thermodynamic equivalence of limit theorems for canonical and grand canonical ensembles, discussing Massieu-Planck function analog relation by Legendre transformation

12 p2191 A69-27148

Sinusoidal or random excitations equivalence from point of view of rupture risks, considering industrial applications

13 p2370 A69-28602

Algorithms for equivalence equation to approximate transient processes in higher order linear system by transient processes of lower order linear models

19 p3286 A69-36191

Two procedures for processing statistical data concerning Gaussian processes made exchangeable by manageable formula

19 p3361 A69-36646

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

21 p3756 A69-39150

Two level systems with overall performance as explicit function of first level performance, defining equivalence condition to prove coordinability for nonadditive case

24 p4294 A69-43308

EQUIVALENT CIRCUITS

DC biased microwave bolometer/barretter/detector, describing small signal dynamic equivalent circuit for output voltage

01 p0044 A69-10626

Semiconductor switching diode, evaluating operation with nonlinear time delay equivalent circuit

01 p0046 A69-10747

Transistor parameters for operation as minority carrier charge controlled device, developing equivalent circuit for computer calculation of transient response

01 p0046 A69-10748

Equivalent circuits for transient characteristics approximation of distributed RC circuits

01 p0046 A69-10779

Shockley theory of field effect transistors, calculating characteristics in miniaturization problems by

removing geometric constraints with aid of electric analog

02 p0215 A69-11781

Working equivalent circuits for fluidic transverse impact modulator in LF and IF range

02 p0196 A69-12082

Diffraction of cylindrical and plane waves in system of two parallel circular cylinders, using equivalent circuit method

02 p0217 A69-12261

Dielectric dispersion in inhomogeneous dielectrics and semiconductors, discussing three layered equivalent circuit

02 p0301 A69-12837

Impedance matching selection for phased array element, using element impedance data and equivalent circuit

04 p0572 A69-14323

Equivalent circuit of varactor with open p-n junction used as frequency multiplier

04 p0575 A69-14465

Varactor Q calculation from impedance vs bias measurements, circumventing circuit loss problem by procedure based on Weissfloch equivalent circuit of lossy two port network

04 p0575 A69-14753

Equivalent generator approach to facilitate scattering matrix analysis of complicated microwave circuit

04 p0582 A69-14755

Equivalent circuit for parallel conductor array based on array capacitance matrix

04 p0576 A69-14756

Small signal field effect transistor model at saturation and Borel equivalent scheme, giving evidence of internal feedback

04 p0579 A69-15226

Equivalent circuit diagrams for impedance of plasma column in low current low pressure glow discharge

05 p0800 A69-15742

Equivalent noise circuit for resonant transistor amplifier, deriving expression for noise factor

05 p0729 A69-16084

Stability of linear passive time variable circuits, discussing validity of circuit elements replacement by gyrator equivalents

05 p0739 A69-16348

Equivalent circuit for microwave point diode noting waveform calculations, frequency dependent elements and recovery phenomena

05 p0735 A69-16605

Composite equivalent circuits method for complex waveguide-resonator couplings based on variational principle for admittance matrices of electromagnetic volume couplings

05 p0736 A69-16785

Silicon double injection diode, discussing HF noise measurement, Nyquist noise equivalent circuit for double injection process and source of LF noise

06 p0898 A69-17762

Electron-electron interaction effect on I-V characteristic and equivalent circuit of metal-semiconductor contact, noting conductivity and rectifying properties

07 p1107 A69-19162

MOS transistor equivalent circuit for computer aided calculations with IMAG I program, noting versatility of model

08 p1280 A69-19978

Equivalent network representation of feedthrough lens array taking into account mutual coupling between elements to predict performance characteristics

08 p1280 A69-20014

Sawtooth generators production based on equivalent circuit theory, calculating linearity errors in voltages

08 p1296 A69-20105

Passive circuit components electrical properties at HF using equivalent circuit

08 p1283 A69-20135

Equivalent circuit synthesis with six reactances-two terminal network bridges

08 p1295 A69-21166

Insertion-loss synthesis of narrow band crystal band-elimination filters, using narrow band approximation and pseudoreactance theory

08 p1300 A69-21173

Transforming equivalent circuits, keeping electrical characteristics defined by network functions within prescribed limits

09 p1472 A69-21784

Steady state operation of atomic hydrogen maser by analogy with electronic circuits, calculating atomic magnetic susceptibility using density matrix and deriving equivalent circuits

09 p1517 A69-22093

HF excess noise and equivalent circuit representation of MOSFET with n-type channel, noting local mobility fluctuations effect

09 p1463 A69-22094

Equivalence and stability for negative impedance converter of bridge circuits by symmetrical amplifier design

09 p1467 A69-22559

Glass covered microwire technology to realize RC element, analyzing equivalent element errors by simulating irrational transfer functions

09 p1476 A69-22677

Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems

10 p1688 A69-23937

Microstripline circuit for stabilizing oscillating frequency of Gunn diodes prepared with GaAs slices

12 p2036 A69-25924

Multivariable automatic control system consisting of similar local subsystems studied by transforming system equations into equivalent diagonal form

12 p2048 A69-26076

Equivalent subsystems for designing multivariable linear automatic control system

12 p2052 A69-26280

Electrical equivalent circuit for piezoelectric generation and detection of transient and sinusoidal ultrasonic waves by interdigital electrodes

12 p2039 A69-26376

Common source and common gate FET connections showing equivalent noise figures

13 p2227 A69-27237

Multiperture waveguide directional couplers analyzed by four port equivalent circuits, discussing synthesis method for optimizing coupling directivity

13 p2228 A69-27669

Delta modulated control system model for determining oscillation modes at sampling instants

13 p2221 A69-27962

Two idler parametric amplifiers bandwidth properties investigated using equivalent circuit, noting role of idler circuit design

13 p2233 A69-28066

Small signal, HF equivalent circuit for intrinsic metal oxide semiconductor field effect transistor, considering nonpinchoff and pinchoff modes

13 p2238 A69-28429

Reactive parameter scatter effect on amplitude frequency characteristics of regenerative reflection amplifiers based on equivalent circuit

13 p2235 A69-28515

Capacitors pi network representation of series gap in center conductor of matched coaxial transmission line

14 p2424 A69-29766

Transit time effects in silicon space charge limited diodes, studying frequency characteristics of small signal equivalent circuit

15 p2575 A69-30181

VHF and uHF MOS tetrode minimum noise factor computed as function of frequency by adding thermal noise sources to resistive parts of equivalent circuit

15 p2577 A69-30603

Equivalent circuit of single winding transformer, using distributed constant theory

15 p2578 A69-30793

Plane electromagnetic wave propagation normal and parallel to magnetic field in plasma analyzed by equivalent circuits and impedances

15 p2659 A69-30799

Equivalent circuits of dielectric loaded and unloaded rectangular waveguide Esaki diode reflection amplifier

15 p2578 A69-30801

Wind effects on ionospheric electric currents, using equivalent circuits to study tidal modes and current patterns

16 p2775 A69-32087

German monograph on theoretical and experimental investigations of tubes and lumped fluidic elements covering equivalent circuit

17 p2903 A69-33573

Superconducting antenna factors and matching circuit equivalents developed for predicting efficiency and Q increase on basis of Pb surface resistance

17 p2937 A69-33784

Fluierics /no moving part fluidics/, discussing diodes, capacitors, logic elements, temperature sensors, systems design, environmental factors, etc

17 p2904 A69-34067

Equatorial electrojet current distribution determined using equivalent circuit method and magnetic force model, noting electron density profile influence on current density

18 p3130 A69-35186

Equivalent circuit demonstrating noise reduction through input transistor integration into passive receiving antenna, stressing circuit loss control and preamplification role

19 p3281 A69-35764

Equivalent circuit for microwave cavity containing active GaAs device applied to waveguide and radial mode cavity design

20 p3508 A69-37900

Generation-recombination noise due to trapped charge fluctuation at impurity centers in Si junction gate field effect transistors transition regions, using lumped equivalent circuit

22 p3911 A69-40009

Equivalent circuit technique for dispersion equation and coupling impedance of slow wave structures of ring-rod systems, noting retardation

23 p4139 A69-41944

ERBIUM

Paramagnetic resonance of Er ion in calcium tungstate single crystal, determining spin-Hamiltonian parameters

04 p0643 A69-15141

Absorption and fluorescent spectra, relaxation times and quantum efficiencies measured for glasses doped with trivalent erbium, reviewing spectroscopic parameters involved with laser effect

22 p3962 A69-40476

ERECTION

U CONSTRUCTION

ERGODIC PROCESS

Delay method of finite ergodic Markov chains, analyzing first moments of state probabilities with aid of asymptotic equation

04 p0624 A69-15002

Time dependent statistical equilibrium equations solutions for describing time development of atomic populations by means of ergodic Markov chain

09 p1542 A69-22218

Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field

10 p1770 A69-24111

Accuracy and variance of nonergodicity estimates for random processes associated with radiophysical applications

15 p2582 A69-30946

ERGOMETERS

Bicycle ergometer combined with induction clutch, investigating effect of eccentric dynamic work with arms and legs

21 p3663 A69-38902

ERGONOMICS

U HUMAN FACTORS ENGINEERING

EROS PROJECT

U EXPERIMENTAL REFLECTOR ORBITAL SHOT PROJ

EROSION

NT WATER EROSION

Erosion damage of bearing alloy lining in thin lubricating oil film, considering Cu-Pb alloy and tin base white metal

01 p0094 A69-10313

Aircraft gas turbine compressor parts erosion tests

01 p0099 A69-11058

Wind tunnel investigation of damage to aircraft radomes by water droplet encounter during cloud passage and gaseous molecule friction in air

07 p1054 A69-19541

Trajectories of particles entrained by gas flow in nozzles for study of erosion damage during passage of gas-particle mixture

11 p1818 A69-25355

Erosion type plasma accelerator using inductive energy storage compared with capacitive energy storage

13 p2311 A69-28110

Hypersonic wind tunnel for erosion test of multiple particle impacts, considering dust on cork, carborazole and silicone rubber

13 p2243 A69-28277

Erosion of contacts under capacitive loads noting cable length, arc duration and battery voltage

13 p2269 A69-28608

Erosion wear of graphitic and mica-ceramic materials used for sealing turbine compressors at high temperatures, including test installation

15 p2643 A69-31186

Solid materials erosion rate as function of cumulative damage generated by liquid droplets impingement

16 p2794 A69-31904

Airborne particle size influence on gas turbine parts erosion, with attempts to relate to filtration and engine life

16 p2794 A69-32026

Ground jet suppression fences for VTOL aircraft prepared pads, investigating erosion reduction and particle entrainment

[AIAA PAPER 68-639] 17 p2902 A69-34028

Tungsten carbide erosion resistant coatings, discussing optimum plasma deposition process and coating characteristics

20 p3561 A69-37373

Lunar surface erosion processes revealed by Lunar Orbiter photographs of boulder concentrations

21 p3794 A69-38378

Crater formation by gas erosion in vent of 4.3 kiloton nuclear explosion detonated at 280 ft depth in layered trachytic volcanic rocks

22 p3937 A69-40409

Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data

23 p4211 A69-41388

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates

23 p4180 A69-42156

Sand erosion behavior of metals and plastics in air blast rig under varying exposure time, angles of impact and tensile stress

24 p4363 A69-42787

ERROR ANALYSIS

Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects

01 p0050 A69-10208

Error and sensitivity analysis of on-line algorithms for fixed point linear smoothing

01 p0050 A69-10238

A priori and a posteriori estimates of direct methods accuracy in solving linear algebraic equations

01 p0105 A69-10727

Electronic device networks periodic structures accuracy estimated by automatic measurement of complete error spectrum of network spacings

01 p0045 A69-10732

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error

01 p0031 A69-10785

Ephemeris Time and Atomic Clock Time roles in astronomy, discussing errors in daylight determination for mechanical, Short and atomic clocks, UT and Ephemeris Time

01 p0156 A69-10989

Multiple light scattering and reflection elimination from observed light brightness indicatrix to obtain true light scattering indicatrix, discussing error analysis

01 p0074 A69-11184

Atmospheric transmission factor and optical stability determination by photometer, estimating error due to solar aureole

01 p0075 A69-11193

Exponential approximation with piecewise linear error criteria for continuous function over interval

01 p0107 A69-11415

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations

02 p0206 A69-11605

Algorithms for error analysis, optimum filtering sensitivity and fixed interval smoothing solutions to linear estimation problems

02 p0224 A69-11961

Errors arising from inaccurate insertion of initial conditions in autonomous determination of coordinates of object moving along surface of spherical earth

02 p0281 A69-12137

Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space

02 p0352 A69-12211

Error reduction in initial azimuth alignment and azimuth and level axis gyro drifts in long range air transport gyro accelerometer inertial systems

02 p0278 A69-12361

Space surveillance radar system sensor missassociation of one space object for another, noting applicability to sonar and optical sensors

02 p0210 A69-12388

Errors in wind data due to wind response of parachute-borne sensor corrected with radar tracking, comparing corrected and uncorrected data

02 p0276 A69-12700

Planetary atmosphere determination error analysis using Kalman filter, noting results of simulated Martian atmosphere entry

02 p0331 A69-12806

Mission capability differences between direct and orbital Mars missions as to launch period selection, targeting capability and error analysis
02 p0331 A69-12821

Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
03 p0463 A69-13214

VOR path course errors, emphasizing effects of propagation and receiver processing
03 p0392 A69-13245

Error analysis of orientation methods for extraterrestrial stereophotogrammetric mapping
[JPL-TR-32-1344] 03 p0429 A69-13299

Chebyshev polynomials maximum property, examining effect of roundoff errors in Horner scheme for floating point arithmetic
03 p0456 A69-13553

Approximation for discretization error of discrete analog of Bergman harmonic kernel, discussing discretization error in Dirichlet and Neumann problems for Laplace equation
03 p0456 A69-13555

Two dimensional flow of incompressible fluid near sharp leading edge of plate at zero incidence, discussing approximation error and friction stress
03 p0415 A69-13651

Upper and lower bounds on mean reduced error of pulse code telemetering systems operating by binary code
03 p0396 A69-13687

Discretization error of Dirichlet problem analyzed in plane region with corners, discussing error in numerical solution of elliptic differential equations
03 p0457 A69-13741

Impulse bandwidth measurement error determination by trapezoidal numerical integration
03 p0398 A69-13902

Errors of wavemeter employing open resonator with spherical mirrors
03 p0407 A69-13983

Circuit for accurate division of attenuation and phase shift changes, noting calculation errors
04 p0573 A69-14337

Daily solar indices monthly averages errors due to evaluation for days presenting favorable weather conditions
04 p0657 A69-14700

Kirchhoff-Love hypothesis error dependence on stressed state variability index in theory of elasticity for closed spherical shell under uniform surface load
04 p0680 A69-14927

Gaussian channels capacity, studying supremum of information transmission rates with small error probability
04 p0558 A69-15006

Error distribution maps for measurements of parameters epsilon, F and E of geomagnetic potential in Northern and Southern Hemispheres
04 p0627 A69-15031

Transistor scattering matrix parameters determination, emphasizing directional coupler errors and impedance mismatches
04 p0582 A69-15067

Boundary condition description effect on numerical accuracy of series solution to boundary value problem by direct method
04 p0681 A69-15283

Errors in amplitudes and phases recorded by earth tide recording equipment determined, using special multiflex galvanometer
04 p0601 A69-15305

Photographic plates based parallax determinations of nearby stars weights, relative and absolute values, probable error and observation interval
04 p0663 A69-15381

Spectroscopic charged particle concentration determination, discussing error and limits of applicability in low temperature plasma
05 p0762 A69-15899

Parameters and relative errors tabulated from IR spectral emittance of Mo, Nb, Zr and Ta near 1400 K
05 p0846 A69-15903

First order linear differential equations having complementary solutions of exponential type to determine effective initial and boundary conditions
05 p0786 A69-15926

Probable errors in FK4 catalog of star positions and proper motions determined by Scott method
05 p0823 A69-16041

IR radiation in upper atmosphere, indicating sources of error in data
05 p0753 A69-16058

Sonic nozzle mass flow measurement errors at high supply pressures and moderate temperatures due to real gas effects
[ASME PAPER 68-WA/FM-4] 05 p0699 A69-16114

Error introduced into total electron content data by changes in ionospheric layer height
05 p0816 A69-16281

Error analysis methods for inherent errors in analog, digital and linkage equipment of typical hybrid computer configuration
05 p0725 A69-16472

Expressions for calculating filtering errors resulting from insufficient information about useful signal and noise characteristics
05 p0740 A69-16668

Meteorological satellites data for quantitative weather forecasts, discussing error effects due to data treatment in adiabatic approximation
06 p0949 A69-17032

Error probability vs SNR and power spectrum of PCM/FM signal with small phase deviation, noting applications in satellite tracking
06 p0889 A69-17656

Error origin and control in high gain operational amplifier in time differentiation of voltage signal used for photoemission studies
06 p0897 A69-17700

Error and noise sources in analog differentiators, discussing signal distortion minimization techniques and augmentation with linear phase filter
06 p0897 A69-17702

Antenna transmission and receiving system effects on radio brightness temperature measurements by airborne equipment
06 p0929 A69-18000

Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics
[AIAA PAPER 69-178] 06 p1037 A69-18100

Bit error probability for noncoherent binary FSK link involving Rician interfering signal
07 p1080 A69-19095

Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver
07 p1082 A69-19109

Bit error probability estimation of NRZ PCM synchronizer and detector operating in presence of fluctuating data frequency source
07 p1083 A69-19121

Waveform distortion resulting from adjacent channel crosstalk and from amplitude and phase nonlinearity in channel filters in DSB/SC telemetry link
07 p1083 A69-19130

Most probable position /MPP/ choosing methods accuracy, investigating relative effects of dead reckoning /DR/ and celestial lines of position /LOP/ errors
07 p1177 A69-19214

Radome induced distortions of radioelectric axis analyzed by sectional phase analysis
07 p1110 A69-19521

Radome axis error due to phase /dielectrics/ and metallic obstacles
07 p1112 A69-19542

Truncation error reducing scheme for balanced forecast models
07 p1176 A69-19629

Errors estimation in determination of radio signal source flux density, position and recorded half power widths
07 p1088 A69-19722

Subjective and objective upper air forecasts for aviation comparison by isobaric pressure height fields, discussing error analysis
08 p1345 A69-19886

Synchronization errors effects on performance of compression-line demodulator, increasing mean-square error in measuring instantaneous frequency and locking probability
08 p1271 A69-19920

Sawtooth generators production based on equivalent circuit theory, calculating linearity errors in voltages
08 p1296 A69-20105

Error in receiver sensitivity calculation using approximate equation for noise power at input
08 p1275 A69-20226

Total error of minimization of differentiable functionals based on gradient projection procedures
08 p1342 A69-20319

Coincidence error between star image and planet edge for entrance pupil and telescope magnification
08 p1314 A69-20383

Error bounds and variational methods for nonlinear boundary value problems for ordinary differential equations
08 p1343 A69-20536

Weather forecasts range and accuracy, outlining procedure for estimating growth rate of atmospheric behavior
08 p1346 A69-20600

Error estimation technique for Chebyshev series solution to ordinary differential equations
08 p1344 A69-20828

Response optimization of feedback control systems with reference to single settlement time-constant ideal determined for error evaluation
08 p1298 A69-20855

Chebyshev error norms of polynomial approximations for ideal filter minimized by emphasizing role of transfer function even and odd parts
08 p1299 A69-21168

Error probability for transmission of one of M orthogonal, equally likely, equal energy signals over generalized incoherent channel
09 p1452 A69-21314

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
09 p1486 A69-21537

Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements
09 p1494 A69-21642

Spacecraft trajectory optimal determination without knowing measurements error distribution function, examining computer solution properties of linear programming
09 p1595 A69-21757

Optimal moments for trajectory parameters measurements determined by linear analysis to minimize error for initial conditions
09 p1495 A69-21758

Coding schemes for memoryless Gaussian channels with feedback considering error probabilities
09 p1454 A69-21794

Digital information transmission error characteristics determining error distribution over time and relation to distribution function of intervals between errors
09 p1454 A69-21795

Atmospheric density profile from satellite measurements of light wave phase and refraction angles, discussing ionospheric, water vapor and diffraction effects on errors
09 p1490 A69-21862

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates
09 p1614 A69-21885

Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
09 p1595 A69-21937

Microwave interferometer circuits errors, considering interferometers with phase detector, logic counting circuits, frequency conversion and amplitude modulation
09 p1496 A69-22029

Refraction errors in plasma density measurement by microwave interferometry
09 p1496 A69-22031

Subjective and objective upper air forecasts compared for error analysis of headwinds, noting influence of geographical location
09 p1536 A69-22074

Error bounds for estimation error covariance matrix of fixed point smoothing and fixed interval smoothing algorithms for optimum linear estimation
09 p1533 A69-22436

Glass covered microwire technology to realize RC element, analyzing equivalent element errors by simulating irrational transfer functions
09 p1476 A69-22677

Saint Venant torsion and flexure of prismatic bars analysis in polar coordinates, discussing boundary errors
09 p1621 A69-22770

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error
10 p1653 A69-23114

Apollo LM and CSM tracking systems boresight shift reducible by decreasing modulation indices or scaling factor alpha
10 p1672 A69-23277

- Mississippi Test Facility /MTF/ hardware data acquisition system error analysis from extensive simulated static firing tests
10 p1673 A69-23287
- Systematic errors caused by planet asphericity in measurements of orientation and motion parameters of orbiting object compensated by scanning navigation system
10 p1693 A69-23320
- Stability and error bounds in numerical integration of ordinary differential equations, determining highest possible degree of stable finite difference form
10 p1719 A69-23518
- Riemann sum definition and development of bounds for error in approximating integral, showing quadrature formulas as Riemann sums
10 p1719 A69-23521
- Multichannel bit error probability for FSK and DPSK obtained for slow nonselective-fading multipath as function of multipath parameters and diversity order
10 p1656 A69-23533
- Error analysis of Hubble galaxies count to resolve contradiction of values for average optical half thickness tau of galactic absorbing layer
10 p1779 A69-23609
- Infinite diameter detonation velocity vs loading density curve for ammonium perchlorate, finding quadratic mean error
11 p1940 A69-24486
- HF measurements by phase and amplification control of signal in impulse oscillography, noting accuracy in nanosecond range and signal distortion
11 p1880 A69-24541
- ELDO satellite command decoder performance in presence of noise, evaluating PDM bit decoder bit error probability and false command probability
11 p1834 A69-24563
- Jittering delay of triggering circuit driven by ramp signals of different finite slopes, noting tunnel diode discriminators and regenerative feedback loop circuits
11 p1858 A69-24568
- Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations
11 p1835 A69-24712
- Shell theory foundations and basic equations, discussing classical shell equations asymptotic nature and errors
11 p1978 A69-24808
- Minimum test error probability test limits for known test equipment and signal tolerances, developing semi-graphically single equation for calculation
11 p1865 A69-25079
- Error analysis in conversion of two port scattering parameters used in microwave transistor characterization
11 p1852 A69-25200
- Comparison of errors obtained by using linearly gliding and rotating strengthening moduli in stress-strain state on basis of linear stepwise approximation
11 p1986 A69-25342
- Inertial navigation systems error analysis based on method of state variables
11 p1914 A69-25434
- Modeling errors in linear discrete stochastic system effects on Kalman filter state estimates
11 p1860 A69-25448
- Numerical prediction for nonlinear transient response of structures, considering geometric and material nonlinearities in systems with line elements
11 p1993 A69-25526
- Numerical computation method for evaluating transition matrix of linear time invariant system, estimating error propagated in transient response
11 p1910 A69-25660
- Computer controlled network analyzer performing automatic microwave measurements of passive and active networks, based on signal splitting and detecting
12 p2037 A69-26048
- Quantization error reduction for stochastic signals processing problems
12 p2051 A69-26201
- Error bounds for orthogonal signals in additive white Gaussian noise channels for class of generalized decision strategies permitting variable-size list decoding
12 p2029 A69-26204
- Atmospheric turbulence effects on detection and resolution of incoherent objects, discussing error probabilities of threshold and maximum-likelihood systems
12 p2029 A69-26252
- Satellite position errors due to atmospheric instability, discussing altitude-temperature relation and stellar scintillation synchronism for stars at small angular distances
12 p2158 A69-26445
- Error due to amplitude quantization and design of digital control systems in discrete time optimum control theory
12 p2053 A69-26507
- Asymptotic sampling error in closed loop hybrid systems, noting dependence on sampling period and execution time
12 p2053 A69-26508
- Potential error source in VTOL aircraft dynamics analysis suggested by dual function of symbol used in perturbation equations of motion
12 p2014 A69-26776
- Satellite positions measurements by laser compared with radar and photographic methods, considering measurement errors
12 p2110 A69-27149
- Errors in Appleton-Baynon equation for skip distance of radio waves in ionosphere
13 p2218 A69-27214
- Numerical methods for time integrating first order differential equations, emphasizing atmospheric oscillations in baroclinic model, evaluating errors
13 p2290 A69-27636
- Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation
13 p2219 A69-27697
- Thermocouples dynamic response attached to thin skinned model under constant heating rate, considering error reduction in temperature measurement
13 p2375 A69-27785
- Automatic processing and error analysis of horizontal, vertical, static and geostrophic wind data by U.S.S.R. Hydrometeorological Service
13 p2292 A69-27839
- Trajectory terminal state error analysis using adjoint-generated sensitivities in nonlinear time-varying systems
13 p2296 A69-27940
- Radar SEP /spherical error probable/ for defining error ellipsoid in three dimensional accuracy and CEP /circular error probable/ for defining two dimensional accuracy
13 p2221 A69-27963
- Error analysis involved in calculating tangent functions defined by nonlinear differential equation solution, using digital differential analyzer
13 p2225 A69-27968
- Ferrite parameters measurement in alternating fields based on continuous analysis of magnetic, magnetizing and measuring circuits for assessing errors
13 p2320 A69-27996
- Variational method used to determine accuracy of approximation technique for dielectric slab on sidewall of rectangular waveguide
13 p2233 A69-28072
- Power spectrum of random process from discrete sequence of instantaneous values, assessing error
13 p2239 A69-28514
- Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects
14 p2424 A69-28744
- High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
14 p2487 A69-29008
- SNR improvement during low level turbulence measurements, examining correlation between hot-wire anemometers, including error analysis
14 p2446 A69-29018
- Semiempirical parameters in streamline division and momentum integral analyses for separated flows, using error function velocity profile and spreading parameter sigma
14 p2389 A69-29028
- Wentzel-Kramers-Brillouin approximation validity determined by sufficiency conditions based on differential equations series solution
14 p2471 A69-29454
- Long distance VLF multirange navigation fix errors as function of angles of cut of position lines and range errors, presenting error isograms
14 p2478 A69-29484
- Ground testing method to evaluate inertial navigation systems dynamic errors by programmed platform drift rates, position output comparisons and error source identification
14 p2479 A69-29490
- Photoelectric observation of passage of stars through meridian, detailing error sources and corrective technique
14 p2521 A69-29507
- Error analysis in efficiency measurement of gas turbines, considering thermodynamics and power output
14 p2509 A69-29509
- Error bounds for covariance matrix used in optimum filtering and smoothing algorithms for control and communications systems operation
14 p2416 A69-29549
- Minimum error criteria for shock wave structure determined by applying Mott-Smith distribution to Boltzmann equations for rigid sphere gas
14 p2431 A69-29579
- Chopper modulated IR detection system error analysis through minimizing mean square error of approximating output function
14 p2450 A69-29639
- Dynamic instrumental errors of quasi-steady state mechanical meters approximated by graph analytical method
14 p2451 A69-29747
- Plasma microwave measurement error allowance for multiple reflection of waves from vacuum chambers dielectric walls
14 p2498 A69-29806
- Variational principle for solving boundary value problems and reciprocal formula for error estimation, discussing applicability to general transport phenomena problems
15 p2716 A69-30022
- Complex load impedance determination by measuring maximum, minimum and load voltages in line, including error analysis
15 p2582 A69-30123
- Algorithm for optimal digital processing of pulse signals during multilevel quantization in Markov noise, including error analysis
15 p2571 A69-30126
- Logarithmic amplifiers amplitude characteristics accuracy obtained by gain variations or successive summation of voltages, plotting curves illustrating error variations vs gain
15 p2574 A69-30128
- Signal phase measurement accuracy by discrete phase technique ensured by using wideband signals and automatic control of input SNR
15 p2574 A69-30130
- Orthogonal signal recognition in set of false signals by resolving devices with limited sensitivity, giving design formulas for error probability
15 p2563 A69-30135
- Instrumental accuracy of discrete filter during measurement of initial phase of signal dependent on phase structure
15 p2574 A69-30139
- Linear distortions effect on signals detection in binary communication channel with fluctuating noise, determining error probability
15 p2564 A69-30146
- Errors in magnitude equation and atmospheric dispersion calculated for 400 mm astrophotograph, emphasizing constant errors due to objective
15 p2646 A69-30162
- Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations
15 p2703 A69-30211
- Bearing errors from radio beacons with rotating or multilobe radiation patterns
15 p2567 A69-30343
- Subtractor performance for processing correlated random signals with different spectral widths in signal delay time indicator, discussing errors
15 p2572 A69-30346
- Spacecraft radar altimetry with application to geodesy, discussing orbital and tracking errors
15 p2609 A69-30460
- Error assessment for 20 May 1966 annular eclipse observation point and observation time determination
15 p2686 A69-30533
- Geopotential determination from gravity force measurements at known surface and error assessment for earth model with aid of spherical harmonic expansion
15 p2689 A69-30567
- Creep rates measurement errors at low stresses in intermediate temperature range, examining log creep rate vs log stress plot in Cr-Mo steel
15 p2639 A69-30599
- Time delay errors compensation methods in analog-digital computation loops, finding digital scheme inferior to analog
15 p2572 A69-30618

Runge-Kutta type method truncation error estimation, discussing validity conditions, evaluation processes and numerical tests

15 p2644 A69-30672

Antenna, frequency converter and automatic spectrum recorder system for closest approach times prediction and satellite identification, discussing errors

15 p2569 A69-30800

Reliability of integrated circuits with emphasis on errors

15 p2626 A69-30831

Initial uncertainties role in weather forecasting, discussing errors as represented by rms deviation of ensemble members from mean

15 p2649 A69-30894

Systematic error pattern in raw data obtained during tracking ROSE balloons by two radar systems, estimating range resolver error

15 p2649 A69-30897

Reflecting or reradiating obstacle proximity as cause of siting errors in azimuth radio measurements, discussing omnidirectional obstacles effect

15 p2651 A69-31090

Algorithm for calculating recognition error by applying pattern vectors having two multivariate Gaussian distribution to optimum Bayes classifier

15 p2572 A69-31113

System estimation methods compared for rational boundaries of lower confidence limit, discussing variables/attributes error propagation

15 p2722 A69-31135

Clevis design for reduced friction errors associated with round hole clevis in plane strain fracture toughness measurements

15 p2612 A69-31150

Satellite trajectory determination and expected errors for OGO 4 and Geos 1 orbits, noting geopotential, aerodynamic drag and integration contributions

15 p2698 A69-31331

Literal algebra /KSPASM/ computer program critical verification of Kozai short period lunar perturbations, discussing errors

15 p2699 A69-31381

Israel research on space data for meteorological purposes, describing automatic picture transmission data and errors in surface temperature determination by satellite radiometry

15 p2650 A69-31422

Carrier lifetime in p-n-u-n diodes, discussing error of forward pulsed diode method by Wilson and alternative model

16 p2757 A69-31615

Microwave power loss and semiconductor conductivity relationship measured for carrier lifetime and mobility, noting nonlinearity and accuracy

16 p2825 A69-31617

Three antenna interferometer angle measurement accuracy dependent on antenna spacing, deriving optimal spacing value

16 p2758 A69-31730

Thermocouple probe measurement error evaluation by parallel plate analytical model

16 p2789 A69-31903

Differential coefficients applied to Izsak-Borchers ballistic trajectory and errors produced by perturbations of initial vectors, applying results to data capsule recovery

16 p2857 A69-32156

Numerical estimates of momentum integral error in applying locally similar solutions to nonsimilar problems, assuming two dimensional or axisymmetric flow

16 p2772 A69-32174

Satellites meridian and extrameridian observations by transit instrument, examining errors in ephemerides of bulletins

16 p2858 A69-32211

Error analysis of one bit autocorrelation method of spectral estimation, noting decrease in spectral variance with increased sampling rate

16 p2752 A69-32390

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field

16 p2783 A69-32532

Interagency Chemical Rocket Propulsion Group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model

[AIAA PAPER 69-734] 16 p2846 A69-32781

System noise parameters derivation, using standard IRE definition as foundation and amplifier noise measurement as example for error analysis

16 p2755 A69-32800

Knife-edge obstacle diffraction of nonisotropic transmitter analyzed via isotropic source model propagation path noting accuracy

17 p2917 A69-32847

Voltage standing wave ratio measurement technique at low power level, including tolerated errors, compared with Roberts-von Hippel method

17 p2918 A69-33031

Equipment- and program-type methods for solving automatic digital control systems synthesis problems, evaluating efficiency based on accuracy

17 p2933 A69-33120

Lunar surface thermal characteristics revised from analysis of error sources in daytime lunar surface temperatures derived from Surveyor 5 compartment data [AIAA PAPER 69-594]

17 p3033 A69-33287

Data inaccuracy used for calculating forecasts of reliability analyzed by Monte Carlo simulation

17 p2937 A69-33389

Nitrogen density measurements up to 4000 atm and 1000 C, examining possible error sources

17 p3073 A69-33393

Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems

17 p3062 A69-33713

Monograph on solar system space flight trajectory calculations covering solutions to differential equations, error analysis and gravitational effects

17 p3039 A69-33798

Ionospheric parameter recording accuracy by vertical sounding, discussing errors in frequency-height curve

17 p2969 A69-34002

Antenna three dimensional radiation patterns, describing error analysis of various pattern measurement techniques

17 p2942 A69-34086

Measurement errors and geometry effects on navigational accuracy, determining maximum allowable error for measuring devices employed

17 p3002 A69-34098

Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling

18 p3134 A69-34442

Vibrations damping coefficient for asymptotic stability of inertial navigation system platform, determining stabilization errors

18 p3134 A69-34555

Inertial characteristics determination error influence of solid body on damping system parameters

18 p3171 A69-34562

Vibration-proof devices obtained by relating variance determination errors in selective filter response, modulating process bandwidth and spectral analyzer passband

18 p3109 A69-34584

Meteorological forecasting as problem in fluid mechanics and thermodynamics, discussing accuracy and electronic computer role in classical or mathematical methods

18 p3166 A69-34694

Range effects on apparent height and frequency biases of radar precipitation echoes determined by regression technique for several stations

18 p3101 A69-34826

Inertial aircraft navigation, describing instruments and error analyses with regard to simulation, error propagation and total system error

18 p3169 A69-34850

Automatic celestial navigation, discussing star trackers design, mathematics of celestial fix and relationship to errors and physical and environmental constraints

18 p3169 A69-34852

Dynamic balance for rotating aerospace vehicles, discussing error in principal axis location between rotor on machine and free body in space

[SAWE PAPER 740] 18 p3137 A69-34887

Weight estimation inaccuracies due to use of quickie equations, discussing error and extrapolation avoidance in wing weight study

[SAWE PAPER 794] 18 p3222 A69-34904

Radiant heat transfer integral equations solutions accuracy determined from differences between geometric and resolving angular emission factors

18 p3230 A69-35119

Venusian cloud layer radius, discussing error in determination of occultation level height of Regulus by Venus

18 p3203 A69-35331

Wind profile data measured by AN/FPS-16 radar/suppression balloon system, noting error sources

18 p3139 A69-35428

Error analysis for pressure measurements in blow-down supersonic tunnel

19 p3292 A69-35728

Error sources in forecasts for heights of isobaric surfaces obtained by numerical integration of prognostic equations of equivalent barotropic models

19 p3361 A69-35770

Ordinary differential equations integration method, presenting algorithm based on double constraint of maximum accuracy and stability

19 p3279 A69-35805

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error

19 p3282 A69-35826

Digital data compression system transmission error statistical analysis, emphasizing addressing schemes effect on compression ratio

19 p3272 A69-36261

Maximum rms error comparison of redundancy reduction techniques, emphasizing limiting slope technique and worst case interpolation error

19 p3273 A69-36264

Digital data transmission by pulse code modulation considered for minimum mean square error

19 p3274 A69-36282

AC technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de Haas effects, noting error reduction

19 p3312 A69-36375

Abnormalities of routine electrocardiograms in medical certification of pilots, indicating errors in screening

19 p3263 A69-36462

High index frequency modulated waveform spectrum analysis including upper bound on approximation error to avoid fallacy of Woodward theorem [IEEE PAPER 68-TP-74-COM1]

19 p3276 A69-36485

Finite difference analogs with increasing error terms applied to simple differential Laplace operator for accuracy determination

19 p3365 A69-36510

Approximation error involved in difference optimal control problem substitution for differential optimal control problem based on functional minimization

20 p3509 A69-36989

Relative displacement spectra analysis illustrating shock spectra errors, comparing real system response with simple single degree of freedom system response

20 p3548 A69-37301

Cramer-Rao and split-beam tracker techniques compared for optimum bearing error attainable with linear passive sonar array in spatially incoherent noise environment

20 p3576 A69-37322

Spectral calculation deformations and errors estimation using Blackman-Tukey spectral formulas

20 p3571 A69-37697

Wind speed and direction determination accuracy of radar or theodolite methods

20 p3572 A69-37698

Pilot balloon observation errors due to inaccurate balloon height determination, relating error determination to wind speed and direction errors

20 p3572 A69-37699

Minimax error technique used with finite difference methods to estimate error in approximations to functions defined by nonlinear differential equations

20 p3568 A69-37832

FM data transmission distortion noise and error rate compared with AM and phase step modulation, noting role of bandwidth

20 p3496 A69-37905

IR radiation in upper atmosphere, indicating sources of error in data

20 p3533 A69-37968

Atmospheric predictability as revealed by naturally occurring analogs, noting superposed error

20 p3573 A69-38057

Inertial navigation systems trajectory parameters errors due to inaccurate initial coordinates input, deriving trigonometric functions for autonomous error determination

21 p3760 A69-38572

Balloon location by low orbit meteorological satellites, discussing balloon movement due to wind and geometric and nongeometric effects on errors

21 p3760 A69-38618

Differential curve-of-growth analysis of late type giant stars yielding chemical compositions, discussing nature and size of uncertainties in estimates

21 p3800 A69-38700

Error function for boundary methods

21 p3755 A69-39008

Residual analysis prior to statistical tests on experimental data
21 p3755 A69-39120

Lunar Orbiter missions pre- and postflight error analyses compared to estimate dispersions from reference trajectory
[AAS PAPER 68-108] 21 p3805 A69-39220

Correlation role in navigation satellite analysis noting reduction in ephemeris error effects
[AAS PAPER 68-145] 21 p3761 A69-39222

Error propagation and tolerance analysis in design and reliability engineering and stress analysis
21 p3842 A69-39303

Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution
[AIAA PAPER 69-911] 21 p3807 A69-39343

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] 21 p3763 A69-39406

Mathematical formulation and error analysis of two rotor gyroorbit used in plotting orbital system of satellite coordinates
21 p3765 A69-39636

Parameter estimation using entropy of error as criterion function compared with mean square error analysis
21 p3757 A69-39664

Handbook of radar measurement covering noise measurement, error analysis, antenna performance, etc
21 p3678 A69-39668

Isoclinic angle errors effects on photoelastic fringe order measurements accuracy
22 p3945 A69-40082

Correction to circuit theory textbooks concerning observable but not controllable modes and stability
22 p3917 A69-40135

Probability characteristics of total error in vertical gyroscope evaluated from component errors along suspension axes
22 p3946 A69-40251

Pluto positions /1930-1965/ from photographic observations, ascribing declination errors to atmospheric dispersions
22 p4025 A69-40612

Mars positions determined from photographic observations by zone astrophot, establishing rms errors and objective centering error
22 p4025 A69-40613

Error probability of Gaussian signal detector in Gaussian noise background determined from quadratic form of probability distribution density
22 p3901 A69-40955

Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
22 p4033 A69-41086

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error
22 p3979 A69-41087

Thermal conductivity measurements of fluids, considering contribution of radiation, convection, temperature jump and experimental arrangement eccentricity to errors
23 p4237 A69-41325

Delay line MTI receivers performance calculation accuracy, discussing error for general and restricted number of pulses from single and double cancellation at IF
23 p4117 A69-41605

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR
23 p4122 A69-41771

Errors due to neutron counter radioactivity in cosmic rays nucleon measurements analyzed in reducing readings to barometric pressure
23 p4206 A69-41855

Integral electron concentration in column of space between earth satellite and ground determined by integral equation, assessing errors minimization methods
23 p4157 A69-41858

Image recognition algorithms estimated for effectiveness by formulas minimizing classification error probability
23 p4134 A69-41954

Statistical analysis of random production errors on phasing section polarization field of antenna with elliptical polarization
23 p4125 A69-42041

Antenna pointing and tracking accuracy by identifying error sources in servo, structural, mechanical and alignment factors
23 p4125 A69-42126

Rigid shaft dynamics in hinged and elastic bearings, eliminating inaccuracy by limiting analysis to forced vibration
23 p4171 A69-42483

Error probability bounds for self synchronized binary PSK communication systems, simulating decision feedback, phase doubling and maximum likelihood systems
23 p4128 A69-42501

Correcting deficiencies in parametric expressions for rate distortion function of Gaussian process under weighted square error criterion
24 p4281 A69-42722

Errors in estimating cardiac function from aortic and peripheral pulses, using cadaver experiments
24 p4262 A69-42728

Osculatory interpolation explicit method demonstration with error terms determination
24 p4341 A69-43230

Atlas/Centaur/Surveyor flights guidance accuracy, discussing postflight analysis of injection errors due to hardware, software and propulsion system
[AIAA PAPER 68-842] 24 p4348 A69-43239

Geodetic and geophysical random uncertainties as fundamental limitations on terrestrial inertial navigation accuracy
[AIAA PAPER 68-847] 24 p4348 A69-43240

Optimization problems solution applied to separable but bounded state variable problem, providing control over commercial errors
24 p4292 A69-43286

Error sources in magnetic field measurements using magnetic probes in high temperature plasmas, discussing detection, correction and elimination
[AIAA PAPER 68-727] 24 p4316 A69-43571

Unmodeled errors detection in recursive flight trajectory estimation, deriving equations for unmodeled parameters
24 p4387 A69-43585

Astatic gyro motion with horizontal rotor axis, defining suspension error with allowance for external force moments
24 p4317 A69-43707

ERROR BAND
U ACCURACY

ERROR CORRECTING DEVICES

Atmospheric temperature corrections for measurements by rocketsonde and balloonsonde with thermistor, noting dissipation factors and thermal time constants
01 p0081 A69-10697

Automatic control systems correction by compensating for nonlinear statistical dynamic characteristics with aid of nonlinear devices
01 p0053 A69-10801

Errors in wind data due to wind response of parachute-borne sensor corrected with radar tracking, comparing corrected and uncorrected data
02 p0276 A69-12700

Error correcting coding on DCSF satellite channels, discussing single access communication through wideband SHF repeaters in synchronous earth orbit
03 p0387 A69-13177

Short baseline radiating satellite interferometer concept for reducing satellite navigation systematic errors for aircraft and ships
03 p0463 A69-13208

Transatlantic aircraft cross-track air navigation error reducible by augmenting Doppler system with satellite ranging system
03 p0464 A69-13237

Topological principles of gate and contact self correcting circuits not using self correcting codes
03 p0410 A69-13421

Dynamic behavior of large steerable radio telescope, showing structural resonance influence on error detection system
03 p0412 A69-14093

Book on information coding and transmission and error detection and correction
04 p0558 A69-15066

Errors in amplitudes and phases recorded by earth tide recording equipment determined, using special multiflex galvanometer
04 p0601 A69-15305

Hybrid computational method for partial differential equations to reduce time of solution and error propagation
04 p0566 A69-15347

Strapdown gyros in back to back connection for reduction of component cross coupling errors
04 p0603 A69-15473

Quasi-optical transmission lines having composite correction devices with/without phasing devices
05 p0723 A69-16784

L-step orthogonalization of Bose-Chaudhuri-Hocquenghem codes
06 p0903 A69-17532

Sectoral hoghorn as line feed for correcting spherical aberration in offset spherical reflector antennas
06 p0898 A69-17823

Error correcting codes - Conference, University of Wisconsin, May 1968
06 p0890 A69-17861

Linear recurring sequences over finite fields, discussing application to error correcting codes
06 p0948 A69-17863

Sequences with small correlation functions as error correcting codes in word separation, synchronization and pulse compression systems
06 p0948 A69-17868

Line reversal temperature measurement technique, calculating error and outlining correction methods for flames with cool boundary layers and flames containing solid particles
06 p1035 A69-17929

Vertistat H gravity gradient configuration prevents elastic deformation, permitting high pointing accuracy at synchronous altitudes
07 p1229 A69-18351

Swept-frequency complex return-gain response of injection locked oscillator over locking bandwidth, detecting and correcting phase errors between injection-locked diode oscillators
07 p1100 A69-18645

FET sample and hold circuit using error corrective feedback
08 p1298 A69-20837

Binary block codes for correction of substitution and synchronization errors
09 p1452 A69-21316

Error control coding noting cyclic codes, binary shift registers, shift register circuits, encoding and decoding
09 p1461 A69-21893

Thrust vectoring system using accelerometer displacement to reduce alignment errors in multiaperture electron bombardment ion engines
[AIAA PAPER 68-543] 09 p1570 A69-21985

Dual inertia magnetic tape recorder/reproducer combining low wideband flutter and low time base errors
10 p1693 A69-23289

Telemetry data channel gain and phase correction with frequency response calibration technique using digital filtering
10 p1654 A69-23291

Spectral baseline instability correction for time of flight mass spectrometer operating at source pressures up to one torr
10 p1693 A69-23345

Error correction of digital data with cyclic codes and probability function set extended to Bose-Chaudhuri-Hocquenghem codes and P super M codes
10 p1655 A69-23529

Tandem interleaved cyclic codes for digital HF communication with improved error rate at reduced decay time
10 p1655 A69-23530

Cyclic vector amplitude error from noisy data corrected for calculating geophysical lunar tidal effects
12 p2033 A69-26956

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
14 p2435 A69-29043

Automatic control circuit zero drift compensation during external disturbance, using algorithm for computer minimizing of losses caused by control and response inaccuracy
14 p2425 A69-29140

Optimum time for telemetry data transmission by system using feedback combined with error correcting codes
14 p2412 A69-29428

Bearing errors reduction in vertical loop HF direction finders for ionospherically propagated signals in dual channel system
14 p2413 A69-29493

Structural influence coefficients from vibration test modes and frequencies, eliminating errors by Gram-Schmidt orthogonalization
16 p2872 A69-31916

Electromagnetic interference correction for airborne telemetry, illustrating actual and simulated data for interfering source signatures identification
16 p2754 A69-32575

Data distortion elimination by improved superimposing of sinusoidal audio frequency signal on DC voltage of automatic Langmuir probe second derivative plot-
17 p2970 A69-32855

Ammonia jet device to stabilize telecommunication satellites consisting of electric heating element, ejection nozzle and thermal screens
17 p3018 A69-33236

Integrated trajectory error display /ITED/ for flight path control of helicopters and VTOL, describing principles governing display synthesis
[AHS PAPER 314] 17 p3001 A69-33541

Analog correction method to suppress pilot maneuver effects during analysis of aircraft accelerations induced by atmospheric turbulence
[ICAS PAPER 68-39] 17 p2901 A69-33590

Temperature correction procedures for line-blanked model atmospheres modified, noting effect on convergence to flux constancy
17 p3039 A69-33730

Observer theory application to hybrid inertial navigation systems, discussing error estimation and correction, real time mechanization, eigenvalues, etc
17 p3003 A69-34099

Computer aided design of machines with custom LSI arrays, describing error detection procedures and MOS logic circuits
17 p2942 A69-34121

Taylor series expansion used in correcting quantized digital coefficient errors in hybrid feedback control system
18 p3111 A69-34687

Controlled vehicle disturbed trajectory multiple correction, considering constrained control or limited accessible coordinates for observations
18 p3174 A69-35316

Meteorological corrections of meson megatelescope data based on hourly ground-level pressures and temperatures, considering vector and regression analyses
19 p3308 A69-35991

Mathematical basis for inertial vertical gyro development, considering Schuler conditions fulfillment with integral position correction
19 p3311 A69-36193

Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error
19 p3312 A69-36284

Surrounding masses gravitational field effect on gravitational constant determination by torsional oscillations method, considering oscillation amplitude stability to eliminate errors
19 p3374 A69-36468

Red leak corrections for UV filter on color UV indices for stars of various spectral types using wintereddened response curve
19 p3426 A69-36566

Contactless correcting devices based on magnetic moments for automatic control
21 p3685 A69-38453

Satellite phase and aberration corrections in processing photographic observations for geodetic purposes
21 p3720 A69-38606

Control system generating compensating reactions for correcting trajectory deviations due to uncontrollable random factors, discussing linear automatic control system optimization
21 p3770 A69-38853

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices
21 p3724 A69-39100

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop
21 p3827 A69-39755

Temperature control instrumentation accuracy in terms of static errors and dynamic errors minimizing costs
22 p3954 A69-40037

Error correction of strain gage/cement combination reading relaxation under prolonged steady loading at elevated temperature
22 p4042 A69-40313

Algebraic decoding techniques, discussing channel models, errors correction, hardware and software, etc
23 p4119 A69-41746

Wideband telemetry recording error compensator for reducing flutter and interchannel time-base error in magnetic tape instrumentation
23 p4137 A69-41775

Surface accuracy of large diameter radio telescopes maintained by uncoupling reflector surface from backup structure, using active compensation
23 p4149 A69-42136

Corrections for eliminating anomalous skin effect on IR emissivity for Ag, Cu, Au and Al
23 p4177 A69-42212

Ionospheric range difference errors after correction for position fixing from satellite, considering elevation angle, latitude, day time, spatial and time electron content correlation
23 p4128 A69-42505

Iterative and vectoral methods for correcting computed direction cosine matrix errors
23 p4134 A69-42543

Correction coefficients for time response of hybrid control systems with digital feedback elements containing quantized coefficients
24 p4293 A69-43302

Scale error correction technique for structural impact modeling using dissimilar materials, involving permanent deformation of spherical caps impacted into liquids
24 p4406 A69-43692

ERROR DETECTION CODES

Book on error detecting logic for digital computers covering error detection codes, logic circuits, checkers in data paths, etc
02 p0212 A69-11453

Book on information coding and transmission and error detection and correction
04 p0558 A69-15066

L-step orthogonalization of Bose-Chaudhuri-Hocquenghem codes
06 p0903 A69-17532

Linear recurring sequences over finite fields, discussing application to error correcting codes
06 p0948 A69-17863

Binary block codes for correction of substitution and synchronization errors
09 p1452 A69-21316

Error control coding noting cyclic codes, binary shift registers, shift register circuits, encoding and decoding
09 p1461 A69-21893

Decoding procedure for error locating binary code indicating location of single subblock containing errors in code word, employing feedback shift registers
11 p1857 A69-24549

Airborne computer controlled data acquisition system for real time fault detection and isolation in avionics
11 p1843 A69-25082

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations
19 p3273 A69-36266

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequences
[AIAA PAPER 69-946] 22 p3974 A69-40329

Tree codes for memoryless time discrete sources with bounded fidelity criterion
24 p4284 A69-42720

Algorithm for constructing random error correcting convolutional codes
24 p4284 A69-42723

ERROR FUNCTIONS

Error reduction in identifying pilot describing function from flight test data by shifting input signal by pilot delay time in simulated computer model
02 p0202 A69-11950

Mean error rates in microwave PCM systems with wave distortion due to multipath propagation
02 p0208 A69-12307

Closed form solution for two input correlator processing gain with error function transfer characteristics and operating in Gaussian environment
03 p0403 A69-13253

Error probability for discriminator detection of wideband PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect
08 p1271 A69-19864

Signal correlation functions measurement errors due to randomly fluctuating delay, investigating additive and multiplicative noise with periodic and random signals
08 p1296 A69-19923

Tabulation of definite and indefinite integrals of products of error function with elementary and transcendental functions
12 p2121 A69-26399

Error function for boundary methods
21 p3755 A69-39008

ERROR SIGNALS

Error reduction in identifying pilot describing function from flight test data by shifting input signal by pilot delay time in simulated computer model
02 p0202 A69-11950

Specifying electrical isolation and error signals suppression due to presence of common mode voltage in passive signal handling and conditioning equipment
10 p1654 A69-23272

Control moment gyro /CMG/ and use in space vehicle attitude control system, emphasizing control laws [AIAA PAPER 67-589]
12 p2129 A69-26777

Nonlinear control systems error signals convergence to steady states in frequency domain, applying step or ramp functions to single feedback system
13 p2237 A69-27188

Received signal phase angle error probability in coherent PSK system in Gaussian noise and interference
13 p2219 A69-27665

Omega/VLF transmission range rate measurements for satellite Doppler navigation to provide velocity and location data, noting propagation error
14 p2479 A69-29857

Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio
17 p2931 A69-34115

Closed loop target tracking system generating error signals for aligning target with tracking axis
19 p3310 A69-36063

ERRORS

NT INSTRUMENT ERRORS
NT PHASE ERROR
NT PILOT ERROR
NT POSITION ERRORS
NT RANDOM ERRORS
NT RANGE ERRORS
NT ROOT-MEAN-SQUARE ERRORS
NT TRUNCATION ERRORS
NT VELOCITY ERRORS

Averaging error of system of nonlinear differential equations with time periodic right-hand sides
04 p0624 A69-15097

Thin foil heat flux sensor for radiative and convective heating rates over wide range and dynamic response, noting error mechanisms, calibration and accuracy
04 p0602 A69-15426

Computer program reliability enhancement, discussing significance of underestimation
08 p1278 A69-19845

Straight line method for boundary problems solutions with errors for partial differential equations
22 p3976 A69-41110

ERYTHROCYTES

NT RETICULOCYTES
In vivo hyperbaric hyperoxia effect on erythrocytes unsaturated fatty acid composition alterations of tocopherol deficient mice
03 p0375 A69-14070

Hemoglobin diffusion influence on oxygen uptake and release by red cells solved by calculus of finite differences
05 p0707 A69-15677

Structural and functional changes in cells as result of freezing of muscular tissue or suspension of erythrocytes
10 p1642 A69-23117

Early disturbances in active migration of potassium 42 ions in irradiated erythrocytes in rats, showing relation between influx and energy exchange in cells
10 p1647 A69-23966

High positive g sub x acceleration effects on red cells destruction rate, measuring endogenous CO production of Gemini astronauts
17 p2908 A69-33176

Pt electrode as detector of red blood cell oxygenation, attempting Fc value dependence on flow velocity determination
20 p3480 A69-38283

Oxygen replacement rate by CO from combination with oxyhemoglobin in cells at various temperatures
21 p3650 A69-38385

Erythroblasts fractionating method based on size, density and resistance of immature erythroblasts which change during maturation
22 p3877 A69-40761

- Oxygen steady state transfer across thin layers of centrifuged erythrocytes at 37 degrees C before and after hemoglobin saturation with CO
23 p4093 A69-42064
- Human blood viscosity measurement over wide range of shear rates, obtaining rheological data, suggesting osmotic red cell crenation role
23 p4095 A69-42078
- Microrheological property of blood measured with microglass fiber viscosimeter, noting sensitivity to intercellular friction of erythrocytes
23 p4098 A69-42100
- ESAKI DIODES**
U TUNNEL DIODES
- ESCAPE CAPSULES**
Three valve manifold for five self righting inflation bags in escape capsule on F-111, providing one directional flow and pressure relief and shutoff
20 p3467 A69-38185
- ESCAPE SYSTEMS**
Emergency escape and personnel recovery systems including F-111 explosive system, midair deployed buoyancy aerostat and fly-away flexible wing rotor
15 p2551 A69-30853
Descent device for emergency egress from jumbo jets based on centrifugal brake, including test data on C-5 fuselage section
19 p3255 A69-36146
Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems [AIAA PAPER 68-967]
24 p4254 A69-43715
- ESCAPE VELOCITY**
Biological systems response to inertial environment, escape from earth gravity, planetary gravity and artificial gravity
06 p0872 A69-17011
Spacecraft range control algorithm during reentry at parabolic velocity into atmosphere with varying parameter distributions
13 p2355 A69-27682
Tabulation of basic solar system data and formulas concerning trajectory length, escape velocity, orbits, etc
16 p2856 A69-32074
Stars kinetic energy and escape rates from isolated cluster with arbitrary stellar mass distributions, assuming spherical symmetry and velocity distribution isotropy
17 p3038 A69-33721
Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918]
21 p3808 A69-39347
- ESCHERICHIA**
Escherichia coli detection and differentiation from other bacteria by direct gas chromatographic analysis of culture media
03 p0382 A69-13550
Substrate and subunit interactions influence of beta 2 protein of Escherichia coli tryptophan synthetase on fluorescence properties of pyridoxal phosphate prosthetic groups
04 p0553 A69-15304
Escherichia coli WWU multiauxotrophic revertants with nonsense suppression, noting role in aberrant morphology and in catabolizing thymidine for energy and carbon
07 p1069 A69-19503
Escherichia coli B/r survival in high vacuum at different temperatures irradiated with UV or X rays tested as colony forming ability
15 p2557 A69-31388
Escherichia coli B/r cells plasmolyzed in sucrose observed under phase contrast, noting plasmolysis reduction in ions presence
19 p3257 A69-35973
DNA polymerase from Escherichia coli, discussing physical and chemical properties of enzyme and polypeptide chain consistency
22 p3898 A69-41070
Chemical modifications effects on Escherichia coli, DNA polymerase, including Hg atom addition to sulfhydryl group of enzyme
22 p3898 A69-41071
Properties, relative magnitudes and relationship of pyrophosphate exchange reactions catalyzed by DNA polymerase from Escherichia coli
22 p3898 A69-41072
Exonuclease function of DNA polymerase from Escherichia coli, discussing hydrolysis of polydeoxyribonucleotides and resistancy of oligonucleotides
22 p3898 A69-41073
- Deoxyribonucleoside triphosphate substrate binding to Escherichia coli DNA polymerase, conducting equilibrium dialysis
22 p3898 A69-41074
- ESG [GYROSCOPES]**
U ELECTROSTATIC GYROSCOPES
- ESOPHAGUS**
Increased gravitational stress effects on esophageal sphincter pressures and gastroesophageal reflux in rhesus monkeys, noting cardia competence
06 p0874 A69-17838
- ESRO 1 SATELLITE**
Esro 1 satellite program management, discussing scientific mission, structure, tracking system and history
13 p2355 A69-27360
Esro 1/Aurorae project for ionospheric phenomena connected with incoming protons and electrons, describing orbit and alignment with geomagnetic field
13 p2356 A69-27747
Auroral phenomena investigation by ESRO 1 satellite, measuring particle flux arriving at auroral height
13 p2381 A69-27748
Esro 1 communication system and telemetering system compared to ESRO 2
13 p2220 A69-27749
Esro 1 project management and organization, discussing cost control, time saving, program evaluation and review system /PERT/, etc
13 p2382 A69-27750
Ground station network and facilities for control of and acquisition and processing data from ESRO 1 satellite
13 p2220 A69-27751
Auroral luminosity determination by two photometers on ESRO 1 satellite
13 p2253 A69-27752
Esro 1/Aurorae scientific satellite for ionospheric phenomena observation, discussing management structure and development process
15 p2702 A69-31080
Esro 1/Aurorae satellite for Arctic ionosphere and aurorae observation, discussing electrons and protons measurements and auroral photometry
15 p2702 A69-31081
Esro 1 satellite design coordination, assembly and tests
15 p2702 A69-31082
Esro 1 satellite centralized control system, discussing housekeeping system responsible for task execution in connection with power supply
15 p2702 A69-31083
Esro 1/Aurorae satellite telemetry system constraints, discussing encoder, pulsed operation and integrated circuit assembly
15 p2702 A69-31085
Esro 1 and 2 satellites onboard remote control system, discussing tone digital standard code and equipment design features
15 p2702 A69-31086
Magnetometers role in Aurorae satellite attitude stabilization, discussing operation principle, characteristics and performances
15 p2611 A69-31087
- ESRO 2 SATELLITE**
International Radiation Investigation Satellite /IRIS/ mission, structural design, power supply and control systems
01 p0162 A69-11101
Scientific mission of ESRO 2/IRIS satellite, study of X rays and particles from sun and galaxy and primary cosmic ray electron measurement
01 p0163 A69-11102
Transmitting systems of ESRO 2/IRIS satellite for ground station contact, discussing telemetry system, mission requirements and telecontrol
01 p0034 A69-11103
Esro 2/IRIS satellite launching checkout, count-down and breakdown of operations
01 p0163 A69-11104
Status of European Space Operations Center /ESOC/ with ESRO 2/IRIS launching
01 p0163 A69-11105
Orbiting ESRO 2/IRIS energy measuring experiments, satellite stabilization, power source, communications and data recovery
01 p0156 A69-11108
Esro 1 and 2 satellites onboard remote control system, discussing tone digital standard code and equipment design features
15 p2702 A69-31086
- ESRO SATELLITES**
NT HEOS A SATELLITE
NT HEOS SATELLITES
- ESRO satellites power supply design, operation and characteristics
05 p0829 A69-15919
Data handling during ESRO satellite testing and launching, describing checkout equipment and programming of satellite computers
05 p0727 A69-16771
European Space Research Organization projects including satellites and sounding rocket launchings for various missions
12 p2175 A69-26922
Power supply subsystem for TD1/TD2 satellites with solar cells, discussing design including standby battery for solar eclipse periods
13 p2209 A69-28481
Short term plan of European electronic component selection for ESRO satellite without established guaranteed failure rate
15 p2624 A69-30823
ESRO Aurorae satellite telecommunication system, detailing information nature, PCM telemetry and remote control system standard
15 p2702 A69-31084
TD-1 astrophysical satellite and future ESRO projects, considering HEOS-0A2 and TD-2
17 p3051 A69-34217
ESRO Large Astronomical Satellite /LAS/ observatory in orbit, discussing operation, design and instrument settings in scientific package
18 p3208 A69-34793
- ESSA SATELLITES**
Satellites in meteorological service, describing TOS, ESSA and Nimbus satellites operation methods
08 p1409 A69-19960
TIROS global weather satellite system performance, reviewing TIROS and ESSA satellites, APT camera and ground stations and projected TIROS M/ITOS satellite
10 p1722 A69-23145
Tiros-ESSA satellite operations, describing first and second generation systems
19 p3433 A69-36909
- ESTERS**
NT ACRYLATES
NT CELLULOSE NITRATE
NT CHLOROFORMATE
NT ISOCYANATES
NT LACTATES
NT LEAD ACETATES
NT NITROGLYCERIN
NT PETN
NT POLYCARBONATES
NT POLYESTERS
NT POLYETHYLENE TEREPHTHALATE
NT URETHANES
Analytical, IR absorption and polarographic analysis of cyclic niobium /V/ and tantalum /V/ esters
11 p1832 A69-24575
Physicochemical and operational properties of trimethylol propane esters as lubricating oils under static and dynamic conditions
12 p2103 A69-27090
Reaction kinetics between hydrazine and esters in benzene solution at 55° C, using amides as catalytic agents
14 p2409 A69-29033
Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
18 p3149 A69-35177
Sequence preparation of protected peptide polymer bond with anion exchange resin using solid phase transesterification
24 p4279 A69-42713
Transesterification of amino acid peptide alkyl and fatty acid esters by treatment with anion-exchange resin
24 p4280 A69-43513
- ESTIMATES**
NT COST ESTIMATES
A priori and a posteriori estimates of direct methods accuracy in solving linear algebraic equations
01 p0105 A69-10727
Continuous time nonlinear dynamical system states variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations
06 p0904 A69-17939
Postselection estimation of component reliability in multicomponent systems, considering cases of binomial and exponential distributions of random variables
08 p1322 A69-21099
Distribution function of SNR from coherent optimal estimate of signal amplitude
15 p2564 A69-30149

ESTIMATING

- Chetaev /A, lambda/ estimates of approximate integrations of system of ordinary differential equations, analyzing stability with aid of Liapunov functions
15 p2644 A69-30664
- Accuracy and variance of nonergodicity estimates for random processes associated with radiophysical applications
15 p2582 A69-30946
- System estimation methods compared for rational boundaries of lower confidence limit, discussing variables/attributes error propagation
15 p2722 A69-31135

ESTIMATION

- Simultaneous estimation of parameters in multiple equation regression model arising from radioactive tracer experiments using compartmental models
01 p1006 A69-10926
- Bayes estimator in decision directed adaptive detection problem, noting allowance for decision errors
05 p0740 A69-16583
- Optimal estimation of sampled stochastic process with finite state unknown parameters
06 p0901 A69-17362
- Optimal estimation of conditional mean of posterior probability density function in multistage nonlinear filters, using Monte Carlo techniques and Bayes theorem
10 p1667 A69-24039
- Adaptive optimal estimation of sampled stochastic process with finite state unknown parameters, using separation technique
11 p1858 A69-24935
- Estimation system distinction from adaptive system, discussing network of adaptive estimation systems
11 p1858 A69-24937
- Runge-Kutta type method truncation error estimation, discussing validity conditions, evaluation processes and numerical tests
15 p2644 A69-30672
- Book on estimation theory and applications covering stochastic processes, linear estimators and recursive formulations
16 p2764 A69-32386
- Automatically controlled dynamic systems reliability estimation; in terms of failure probability illustrated with autopilot-aircraft case
17 p3001 A69-33144
- Ammonium perchlorate melting point estimate taking into account theory of corresponding states encompassing two sets of experimental independent data
20 p3585 A69-37217
- Data acquisition amount estimation technique for vertical panoramic sounding of ionosphere
20 p3492 A69-37692
- Nonlinear estimation with noisy data, considering least squares fit, sequential /Kalman/ estimate and iterated sequential scheme
21 p3686 A69-39370
- Nonlinear filter for optimal estimation of mean, covariance and third central moments of system, noting simulation tests stability for orbital navigation [AIAA PAPER 69-852]
21 p3686 A69-39380
- Gaussian type density estimates by representing unknown density in terms of convolution expansion of Gaussian probability density and arbitrary distribution, discussing convergence rates
21 p3756 A69-39499
- General linear state estimation from algebraic viewpoint without probability theory concepts, establishing least squares parameter estimation
23 p4182 A69-41880

ESTIMATORS

- Orthogonal projection derived equation to optimally estimate state of nonstationary linear discrete systems with time delay, developing Kalman type filter
09 p1473 A69-22437
- Asymptotic stability of discrete homogeneous linear minimum-variance estimation formulas
11 p1860 A69-25449
- Optimal linear recursive estimators for uncertain observation, considering false alarm probability
20 p3485 A69-36922
- Optimal explicit method for parameters estimation not restricted to linear Gaussian problem derived in canonical form [AIAA PAPER 69-947]
22 p3975 A69-40330
- Optimal scheme of combining moment estimators set derived for computational simplicity and asymptotic efficiency
24 p4342 A69-43704

ETCHANTS

- Structural imperfections of CdSb single crystals undoped and doped with tellurium and indium noting etching techniques, grain boundaries and impurities
11 p1938 A69-25030

Nital etchant and sodium bisulfite stain for morphology of quenched dilute alloy Fe-Ni martensite
13 p2282 A69-28166

ETCHING

- Stacking faults in Ge epitaxial layers revealed by etching reagents and X ray diffraction with photographic recording
02 p0297 A69-11880
- Electrolytic marking process for aircraft component identification without use of stamping or engraving
02 p0253 A69-12065
- Etching techniques for revelation and viewing of fossil charged particle tracks in meteoritic and terrestrial minerals
02 p0245 A69-12569
- RF sputter etching of microcircuits and components
04 p0606 A69-14874
- Selective etching process for microminiaturization of special circuits for aerospace
05 p0736 A69-16753
- Selective etching technique in study of dislocations in epitaxial layers of gallium arsenide
06 p0981 A69-17891
- Etch pits behavior during diffusion and rediffusion of copper in low dislocation crystals of gallium arsenide, demonstrating vacancy nature
11 p1937 A69-25029
- Thin foil preparation technique for transmission electron microscopy and selected etch pitting technique for CoO single crystals
12 p2112 A69-25944
- Etching, spray etching and photo-resist methods for producing CrNi steel heating elements for propeller deicing
12 p2102 A69-26370
- Dislocations observations in fracture study of crystals, considering etching, decoration technique, X ray topography and diffraction electron microscopy
13 p2316 A69-27223
- Polishing-etching cell permitting continuous sample surface observation for use with inverted stage microscopes
13 p2281 A69-28156
- Anodic stain etching technique for carbide precipitates of niobium-base alloy Cb 132, noting X ray diffraction
13 p2282 A69-28162
- Tungsten surfaces with high work functions generated by electrochemical etching, discussing effects of heat treatment in vacuum
14 p2506 A69-29267
- Flux grown magnetic garnet crystal internal defects analyzed by etching and Lang X ray transmission topography, revealing tubular structural deviations
16 p2825 A69-31692
- Alpha alumina whiskers grown by vapor reaction examined by X ray microtopography and etching
16 p2802 A69-32341
- Crystallization front topography and stratified structure of melt extracted n-type GaAs single crystals from anodic etching method
20 p3582 A69-37013
- Germanium single crystals etching with water vapor and hydrogen sulfide in hydrogen flow system, studying concentration, pressure and temperature effects on surface reactions
22 p3970 A69-40737

ETHANE

- Molar heat and entropy of adsorption and activity coefficient of adsorbed phase for methane-ethane-silica gel system
10 p1652 A69-23370
- Ethylene oxide and ethane low pressure fuel-rich flames mass spectrometry, analyzing composition and temperature profiles and OH radical role
11 p1831 A69-24478
- Barrier to internal rotation from PMR spectrum for 1, 2-disubstituted ethanes, studying vicinal coupling parameters dependence
12 p2132 A69-25987
- Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations
15 p2671 A69-31118

ETHERS

- NT POLYPHENYL ETHER
- Lewis acidity of alanes, discussing interactions of trimethylalane with amines, ethers and phosphines
07 p1074 A69-18630
- Methyl alcohol, ether and acetone vapors decomposition in microwave discharge, obtaining H and CO in addition to solid polymeric films
22 p3895 A69-40103

ETHYL ALCOHOL

- General aviation accidents and hazards presented by drugs, ethyl alcohol, pesticides and carbon monoxide
07 p1068 A69-19435
- Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate
16 p2747 A69-31808
- Alcohol and drug intake effects on drivers control of motor vehicles, describing postrotatory nystagmus test for toxicity measurement
21 p3652 A69-38791
- Pilots and automobile drivers functional impairment due to alcohol and drugs
21 p3663 A69-38792
- Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties
21 p3696 A69-39101
- Alcoholic hangover effects on human balance system from flying demands viewpoint, discussing ocular-vestibular system disturbances
23 p4089 A69-41817

ETHYLENE

- Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations
15 p2671 A69-31118
- Low pressure ethylene decomposition on high temperature W ribbon surface
19 p3265 A69-36729
- Low pressure ethylene decomposition on high temperature Re ribbon surface
19 p3266 A69-36730
- Oxygen influence on low pressure ethylene decomposition on high temperature tungsten and Re ribbons surface
19 p3266 A69-36732
- Crossed beam apparatus /evatron/ for studying energy spectra of crossed positive ethylene ion beams and neutral ethylene molecule beams
24 p4280 A69-43813

ETHYLENE COMPOUNDS

- Aluminum corrosion and inhibition mechanisms in ethylene glycol/water solutions, using controlled powder immersion tests
02 p0265 A69-11895
- Hypergolic filling materials for solid fuels with hybrid propellant combinations, discussing ignition and combustion of ethyleneimine derivatives
10 p1753 A69-24023
- Flame velocities of stable premixed tetrafluorethylene-oxygen mixture flames measured with bunsen-cone method
11 p1940 A69-24485
- Aluminum corrosion in ethylene glycol-water systems, discussing protection mechanisms of adsorption-type inhibitors and additives effects on corrosion rate
14 p2466 A69-29932

ETHYLENE OXIDE

- Ethylene oxide sterilization rate dependence on temperature, gas concentration, relative humidity and medium surrounding microorganisms
05 p0707 A69-15940
- Formic acid catalytic action on sterilizing effectiveness of ethylene oxide
05 p0713 A69-15945
- Ethylene oxide and ethane low pressure fuel-rich flames mass spectrometry, analyzing composition and temperature profiles and OH radical role
11 p1831 A69-24478
- Fuel resistant elastomers evaluated for seal compounds for low temperature capability, noting epichlorohydrin-ethylene oxide as promising sealant
19 p3356 A69-35534

ETIOLOGY

- Valsalva maneuver produced abrupt onset of ptosis and proptosis caused by ethmoidal air cell rupture, discussing etiologies
17 p2909 A69-33186
- In-flight illnesses in French Air Force, emphasizing psychological failures in etiology
21 p3666 A69-39270

EUCLIDEAN GEOMETRY

- NT ANGLES [GEOMETRY]
NT BRAGG ANGLE
NT BREWSTER ANGLE
NT CARTESIAN COORDINATES
NT CHORDS [GEOMETRY]
NT CIRCLES [GEOMETRY]
NT CYCLOIDS
NT ELLIPSES
NT GREAT CIRCLES
NT HYPERBOLAS

NT LINES [GEOMETRY]
 NT LOCI
 NT MERCATOR PROJECTION
 NT OBLATE SPHEROIDS
 NT OCTAHEDRONS
 NT PARABOLAS
 NT PARALLELEPIPEDS
 NT PARALLELOGRAMS
 NT POINTS [MATHEMATICS]
 NT POLYHEDRONS
 NT PROJECTIVE GEOMETRY
 NT PROLATE SPHEROIDS
 NT RADII
 NT RECTANGLES
 NT S CURVES
 NT SPHEROIDS
 NT SQUARES [MATHEMATICS]
 NT TANGENTS
 NT TETRAHEDRONS
 NT TORUSES
 NT TRIANGLES
 NT TRIGONOMETRY

Bifurcation of closed orbits from equilibrium points of autonomous differential system
 02 p0281 A69-12133

Second order elliptical operator for m-dimensional Euclidean space with open region bounded by closed surface
 03 p0456 A69-13604

Bounded and perfectly conducting object embedded in Euclidean 3-space, discussing electromagnetic inverse scattering problem
 05 p0719 A69-15929

Majority logic decoding of Euclidean or projective geometry codes in two steps
 06 p0891 A69-17867

Boundary value problems solutions for quasi-linear elliptic and parabolic equations of arbitrary order applied to nonlinear differential equations
 10 p1717 A69-22809

Perturbations of Volterra integral equation with vectors in n-dimensional real or complex Euclidean space, comparing solution with linear system solution
 11 p1909 A69-24886

Instability criterion for motion differing from criteria of Liapunov and Chetaev
 18 p3174 A69-35317

Polar coordinates in Euclidean space applied to theory of satellite moving in gravitational field of spherically symmetrical body, introducing equipotential surfaces
 19 p3397 A69-35610

Stability criteria for integral manifold formed by intersection of hypersurfaces in Euclidean n-dimensional space
 21 p3770 A69-38850

Integral transformation applicability to inverse problems concerning interaction potential energy between particle pairs in n-dimensional Euclidean space
 23 p4182 A69-41960

EUGLENA
 Euglena gracilis grown heterotrophically, investigating respiratory physiology as function of glucose, acetate or ethanol growth supporting carbon source
 10 p1647 A69-24186

Continuous culture device for controlled growth of Euglena gracilis
 15 p2555 A69-30445

EULER BUCKLING
 Thin walled channel columns section stability analyzed in terms of overall Euler and local buckling
 13 p2361 A69-27440

EULER EQUATIONS OF MOTION
 Gyroscope with rotational symmetry subjected to random input torques analyzed by Euler equation of motion
 01 p0079 A69-10236

Solid body motion about fixed point representable by two dimensional motion of two points on complex plane
 01 p0116 A69-10356

Euler-Lagrange relationship from equations of motion of tagged particle in turbulent velocity field consisting of random dispersive waves
 01 p0121 A69-11202

Differential equations of rotational motion of systems of rigid bodies in gravitational field derived with Lagrange equation
 06 p0957 A69-17130

Euler rotational equations for bodies with variable inertia tensor subjected to extreme variations of mass distribution and mass loss
 09 p1616 A69-21956

Existence of motions of second type in explicit self similar strong shock solutions of Euler equations when velocity is linear function of coordinate
 10 p1680 A69-23789

Invariant transformation of Euler equations of motion for plane steady flows of perfect compressible fluid
 11 p1877 A69-25739

Dynamic meteorology quasi-stable problems solved using sequential approximations solution for barotropic model of Euler equations
 14 p2476 A69-29821

Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations [ONERA-TP-738]
 19 p3299 A69-36649

Coordinate transformation of Euler equations governing precession and nutation of self gravitating bodies of viscous fluid in inertial coordinates
 21 p3797 A69-38539

Euler equation in variational problems for optimized process described by ordinary differential equations, deriving final extremal relationship
 21 p3829 A69-39825

Spacecraft spherical motion about mass center under inertial force using Euler differential equations
 21 p3830 A69-39838

Eulerian equations for precession and nutation of self gravitating fluid globes of arbitrary structures in inertial coordinates, discussing coplanar case, tidal breathing, etc
 22 p4030 A69-40904

Helicopter rotors trailing vortices by flow visualization, comparing Euler and Runge-Kutta iterative solutions
 23 p4150 A69-41376

Absolute atmospheric kinetic energy, comparing equations deduced from Euler equations with equations deduced from equations of motion for inertial system
 24 p4345 A69-43151

EULER-LAGRANGE EQUATION
 Euler-Lagrange relationship from equations of motion of tagged particle in turbulent velocity field consisting of random dispersive waves
 01 p0121 A69-11202

Particle motion, deriving Lagrangian formalism equivalent to Schroedinger equation for random motion theory
 07 p1182 A69-19455

Electron anomalous magnetic moment effect on nonlinear Lagrangian of electromagnetic field, deriving additional nonlinear corrective term
 08 p1353 A69-19781

Perturbing body influence on motion near triangular Lagrangian solutions of restricted elliptical three body problem applied to earth-moon system under solar perturbations
 10 p1779 A69-23612

Hamilton principle for inviscid compressible fluid in Euler coordinates, analyzing shortcomings found in variational principles and model in Lagrangian coordinates
 11 p1875 A69-25483

Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction [AIAA PAPER 69-908]
 21 p3807 A69-39340

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters [AIAA PAPER 69-919]
 21 p3820 A69-39349

Cylindrical shells vibrations using Lagrangian based on Fluegge system of stress-strain relations
 22 p4039 A69-39924

EUROPA LAUNCH VEHICLES
 Solid, liquid and advanced propulsion techniques in France, discussing Diamant program and Europa booster
 02 p0334 A69-11919

EUROPA 1 LAUNCH VEHICLE
 ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations
 10 p1635 A69-23027

Europa 1 booster supplementing with perigee-apogee system for development of Europa 2, noting payload launching capability into 24-hr circular orbit
 15 p2671 A69-31051

Europa 1 first stage attitude control system adaptation to Europa 2 requirements, discussing design modifications and improvements and inertial guidance system introduction
 16 p2866 A69-31726

Vernier motor for Europa 1 rocket third stage, discussing component design, system performance and fuel composition
 17 p3018 A69-33328

ELDO booster/EUROPA 1/ third stage management and construction problems
 17 p3050 A69-33701

Pyrotechnical gas generator performance tests during Europa 1 rocket second and third stage separation, including generator design, ground and flight tests
 23 p4224 A69-42153

EUROPA 2 LAUNCH VEHICLE
 Satellite communications with emphasis on European programs, discussing synchronous satellites, Europa 2 rocket and Saros and Symphonie projects
 02 p0207 A69-11910

Europa 1 booster supplementing with perigee-apogee system for development of Europa 2, noting payload launching capability into 24-hr circular orbit
 15 p2671 A69-31051

Europa 1 first stage attitude control system adaptation to Europa 2 requirements, discussing design modifications and improvements and inertial guidance system introduction
 16 p2866 A69-31726

Orbital and attitude control tests for PAS /two stage perigee-apogee synchronous satellite/ in conjunction with booster Europa 2, discussing functional configuration
 17 p3048 A69-33238

EUROPA 3 LAUNCH VEHICLE
 Europa 3 rocket design, comparing 2 ton geostationary satellites and 700 kg satellite conceptions
 17 p3045 A69-33095

EUROPE
 Multiengine helicopter scheduled passenger service operations in Europe
 11 p2004 A69-24378

Air transport prediction for West Europe by 1980
 11 p2004 A69-25216

Axial counterweight lateral support system with ternary symmetry for European Southern Observatory telescope mirror
 12 p2058 A69-26419

U.S.-Europe air traffic, attributing European lag to dense air route duplication, load factors, etc
 13 p2381 A69-27338

Spatial geodesy results from European data, discussing accuracy of geodetical European network and geocentric coordinate computation
 15 p2601 A69-31369

Book on competition in North Atlantic commercial air transport covering passengers, freight and mail from supply, demand and market point of view
 16 p2881 A69-31866

Geomagnetic normal field of vertical component for Central Europe, discussing influence of local factors on observational data
 16 p2782 A69-32461

Daily European weather surveys based on meteorological satellite pictures transmitted during third quarter 1967
 17 p3000 A69-33769

Daily European weather surveys based on pictures transmitted by satellite during fourth quarter 1967
 17 p3000 A69-33778

Relative technological standing of U.S. and Europe, discussing meaning and existence of technology gap
 17 p3076 A69-34040

Supersonic transport aircraft impact on air traffic control in Eurocontrol area, discussing climb, acceleration, cruise and descent
 19 p3370 A69-36653

Eurocontrol Experimental Data Processor for automation in air traffic control, discussing system size configuration and environment
 19 p3280 A69-36654

EUROPEAN SPACE PROGRAMS
 British contributions to communication satellite earth station technology covering antennas, low noise amplifiers, traveling wave tubes and threshold extension demodulators [UN PAPER 68-95843]
 01 p0054 A69-10507

San Marco project, discussing Italian Space Commission and NASA cooperation, equatorial range concept and development [UN PAPER 68-95862]
 01 p0180 A69-10518

Diapason satellite geodetic results concerning measurement accuracy, terrestrial potential models and station synchronization
 01 p0065 A69-10543

Status of European Space Operations Center /ESOC/ with ESRO 2/IRIS launching
 01 p0163 A69-11105

Collection of papers on French space effort covering space sciences and applications, vehicles and boosters, launch sites, tracking, international cooperation, etc
02 p0315 A69-11901

French solar research program, emphasizing photosphere-chromosphere transition zone
02 p0316 A69-11905

French radio astronomy, presenting sky background radiation and solar emission results from Rubis 02 and 04 rockets
02 p0316 A69-11908

French applied and basic research in space biology including manned space flight, deep space problems, weightlessness and cosmic heavy ion radiation effects
02 p0199 A69-11909

Satellite communications with emphasis on European programs, discussing synchronous satellites, Europa 2 rocket and Saros and Symphonie projects
02 p0207 A69-11910

Satellites use in French space meteorology, discussing evolution, achievements, Eole project, etc
02 p0275 A69-11911

French geodetic work with aid of artificial satellites, describing equipment, mounting, observation technique and laser telemetry experiments
02 p0228 A69-11913

Balloon, rocket probe and satellite payloads, noting French contributions and CNES role
02 p0333 A69-11914

French /LRBA, ONERA and Sud-Aviation/ sounding rocket design emphasizing meteorological rockets and standard equipment
02 p0333 A69-11916

French satellites structure, power and communications systems, stabilization and detector groups
02 p0333 A69-11917

Solid, liquid and advanced propulsion techniques in France, discussing Diamant program and Europa booster
02 p0334 A69-11919

French space center in Guiana, discussing geographic location advantages for payload, rocket launching, space rendezvous, etc
02 p0228 A69-11920

Temporary launching sites for rocket probes, discussing CNES activity, Dragon and Titus programs and mobile launching units
02 p0228 A69-11921

CNES worldwide network of tracking stations, describing equipment, location, organization and center of operations
02 p0228 A69-11922

Turquoise satellite booster, using stages of SBSBs and MSBS ballistic missiles
02 p0334 A69-12232

Increased payload in orbit capability for future versions of Black Arrow vehicle, discussing propellant
02 p0335 A69-12681

European space programs requirements for satellite launch autonomy/independence from U.S. and U.S.S.R., discussing satellite applications for resource surveys, weather forecasting, etc
02 p0335 A69-12682

Iris satellite experiments in astrophysics including nuclear and solar induced electromagnetic radiation
03 p0427 A69-12849

Angular motion during first stage cut-off of Europa 1 launch vehicle from flight tests compared with theoretical predictions
03 p0519 A69-12856

Economic importance of European communications satellite system development
03 p0535 A69-13583

European space research program, discussing government, science and industry in developing satellites and sounding rockets
03 p0520 A69-13584

European regional satellite communication systems, discussing EUROVISION TV program broadcasting and multiple access telephony
03 p0395 A69-13585

U.S.-European cooperation in space activities, discussing implementation by COSPAR and jointly owned industrial corporations
03 p0535 A69-13586

Application satellites for air traffic control, meteorology and earth resources, considering European participation
03 p0520 A69-13587

Cooperation in developing space programs between Western Europe and U.S.
03 p0535 A69-13588

Cooperation between U.S. and Europe in space programs, discussing contracts and conditions
03 p0535 A69-13590

Cooperation between U.S. and Europe in communication satellite programs
03 p0535 A69-13591

Intelsat application satellites, considering economy and global telecommunication
03 p0535 A69-13592

European launcher program analyzed from point of view of telecommunication and cost
03 p0520 A69-13593

Topics and objectives of Third Eurospace U.S.-European Conference, Munich, June 1968
03 p0535 A69-13594

U.S.-European cooperation, stressing unsatisfactory role of European industry and governments in space projects
03 p0536 A69-13595

French research on electric propulsion dealing with plasma dynamics, discussing traveling wave accelerators, pulsed plasma guns, ion thrusters, etc
[AIAA PAPER 67-740] 03 p0496 A69-13995

Electric space propulsion systems and auxiliary power sources development in West Germany, noting solar cells, isotope generators and reactors with conversion systems
03 p0496 A69-13996

European launch vehicle development program, discussing economic limitations and employment possibilities
04 p0665 A69-14808

Platform system of ELDO launch vehicle and necessary test and alignment equipment, discussing inertial platform system for future space projects
04 p0629 A69-14809

Space research from European point of view, discussing research history and satellite orbit inclination
04 p0658 A69-14882

Facilities at High Down Test Site for testing Black Arrow launch vehicles, discussing mechanical and electrical equipment test procedures
04 p0585 A69-15041

HM 4 rocket motor for second stage of Diogene booster, using LOX and hydrogen propellants
04 p0647 A69-15064

Regulated high voltage DC to DC converter with output voltage programmable numerically, noting application on board HEOS A satellite
04 p0602 A69-15400

Spacecraft propulsion - ELDO Conference, Paris, October 1967
05 p0791 A69-15593

Polonium 210 production for radiothermal propulsion via bismuth irradiation in graphite gas power reactor
05 p0791 A69-15594

Radioisotopic propulsion stage design with liquid hydrogen working fluid, stressing tank insulation and hydrostatic flight behavior
05 p0811 A69-15595

Isotopic propulsion engine development problems, emphasizing single channel thermal power engine with hydrogen working fluid
05 p0811 A69-15596

Thorium 228 production and shaping for radiothermal propulsion, discussing transformation from radium 226, irradiated target processing, etc
05 p0791 A69-15597

ESRO satellites power supply design, operation and characteristics
05 p0829 A69-15919

Data handling during ESRO satellite testing and launching, describing checkout equipment and programming of satellite computers
05 p0727 A69-16771

French and German cooperative program Project Symphonie to develop telecommunications satellite for radio and TV broadcasting
05 p0830 A69-16817

UK space research in 1970s emphasizing solar observations in UN, cosmic X ray astronomy, solar space astronomy and ionospheric investigation
06 p0997 A69-16853

Suborbital probes, discussing UK sounding rockets Skylark, Petrel and Skua configurations, capabilities and performances
06 p1012 A69-16859

German-American interplanetary vehicle to investigate interplanetary space and solar characteristics
06 p1012 A69-16970

French geodetic satellites tracking operations, on-board equipment and ground stations
[UN PAPER 68-95835] 06 p1013 A69-17065

French program of space geodesy, discussing spatial triangulation, telemetry, dynamic geodesy, Diapason and Diademe experiments
[UN PAPER 68-95834] 06 p0917 A69-17071

Project Symphonie, discussing stationary communication satellite, coverage, frequencies and characteristics
06 p0886 A69-17072

Eole meteorological satellite secondary use, discussing cosmic rays monitoring, navigation purposes and oceanographic research
[UN PAPER 68-95833] 06 p1013 A69-17077

Dynamic stability tests of tilt winged V-STOL aircraft model in ultralow speed range, discussing apparatus for stability derivatives
06 p0866 A69-17091

Cloud features produced by European tropospheric low pressure areas observed by meteorological satellite photographs, noting cyclonic systems development
06 p0950 A69-17619

Advanced electrical and nuclear propulsion systems for European launchers, comparing performances with chemical propulsion
06 p0984 A69-17628

West German test facility for simulating artificial satellite rotation about center of mass
07 p1116 A69-18260

Traveling wave tubes for Symphonie Communication Satellite, discussing design, performance and efficiency
07 p1095 A69-18429

Inertial guidance system for ELDO launch vehicles
07 p1176 A69-18491

Satellite communications antenna system at Fucino earth station, describing transmitting and receiving equipment, facilities, power supply, etc
07 p1075 A69-18493

European research on ultrahigh vacuum lubrication in space environments, emphasizing friction of materials under various loadings and temperatures
[IME PAPER 10] 07 p1138 A69-18564

ONERA vertical bench for dynamometric calibration to 20 tons used for engine and rocket thrust measurement
07 p1116 A69-19217

AZUR satellite movement simulator for thermal control tests, describing assembly
08 p1300 A69-20095

NERO thrust power measurement, discussing electromagnetic and strain-gage test stands
08 p1301 A69-20156

Long range HF propagation in equatorial zone observed with San Marco 2 satellite, discussing overall conditions of ionosphere
08 p1276 A69-20593

Nuclear power supply with in-core thermionic reactor for space power source and use in satellite TV, discussing theory, design and components
08 p1350 A69-20871

British electric propulsion research, discussing electron bombardment ion engines, conical theta pinch and rail devices and test facilities
[AIAA PAPER 69-299] 09 p1564 A69-21241

West German activity in field of electrostatic propulsion, discussing ion thrusters, colloid thruster development and mission analysis
[AIAA PAPER 69-288] 09 p1565 A69-21248

Ion thrusters and various microthrusters /electron bombardment ion and pulsed plasma/ for proposed European missions
[AIAA PAPER 69-274] 09 p1565 A69-21250

Auroral French rocket probe in Norway, studying low energy particles, relations between electron showers and high altitude electric fields, etc
09 p1498 A69-22160

Belier rocket launching facilities in Guiana, describing pads, tracking system, telecommunications network, etc
09 p1477 A69-22161

Vacuum engineering problems during booster rocket engine ground tests, simulating flight environment
[TR-781-O] 09 p1570 A69-22300

Automatic flight control system /AOOSY/ for German Azur satellite
09 p1459 A69-22563

Space stage separation qualification of ONERA rocket vehicles based on angular perturbation measurements during variable roll speeds
10 p1669 A69-23005

ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations
10 p1635 A69-23027

Pyrotechnics applications to Skylark upper atmosphere sounding rocket, discussing payload heads, nose cones, sensor covers, etc

10 p1792 A69-23029

Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets /Sud-Aviation/ with RF mass spectrometer

10 p1635 A69-23034

European space research program, discussing government, science and industry in developing satellites and sounding rockets

11 p1966 A69-25102

Type 2 ceramic capacitor manufacture, selection and control in Concerto space program

11 p1853 A69-25393

Calibration and accuracy check of measuring instruments at National Center of Space Studies in France, emphasizing reference instruments

12 p2080 A69-26123

Traveling wave tube for European communication satellite power amplifiers, showing nonlinear distortions dependence on RF input/output power and helix voltage [AIAA PAPER 68-430]

12 p2041 A69-26786

AZUR German research satellite main structure dynamic characteristics, solar panels, yo-yo despin system, electronic ignition devices and magnetometer boom

12 p2175 A69-26875

AZUR satellite structural development static and dynamic considerations, discussing center of gravity, notching technique and test results

12 p2187 A69-26876

European Space Research Organization projects including satellites and sounding rocket launchings for various missions

12 p2175 A69-26922

ESRO 1/Aurora project for ionospheric phenomena connected with incoming protons and electrons, describing orbit and alignment with geomagnetic field

13 p2356 A69-27747

Auroral phenomena investigation by ESRO 1 satellite, measuring particle flux arriving at auroral height

13 p2381 A69-27748

ESRO 1 project management and organization, discussing cost control, time saving, program evaluation and review system /PERT/, etc

13 p2382 A69-27750

Satellite networks for air traffic control and aircraft communications in North Atlantic

13 p2296 A69-27831

European earth resource satellite systems technology, applications and costs

13 p2356 A69-27833

Application satellites effects on European economy

13 p2382 A69-27834

Three meter spherical volume heat balance test facility for space vehicles at European Space Technology Center, describing vacuum system, solar simulation, etc

13 p2241 A69-28080

Scientific aims, optical design, instrument data, control and orbit operation of European Large Astronomical Satellite used in UV observations

13 p2264 A69-28477

European space program developmental and fabrication problems in satellite structure development covering booster constraints, mission constraints, tolerances, etc

13 p2357 A69-28479

Power supply subsystem for TD1/TD2 satellites with solar cells, discussing design including standby battery for solar eclipse periods

13 p2209 A69-28481

German solar and space probe Hora, discussing payload and propellant

13 p2357 A69-28638

Control system design for Black Arrow satellite launch vehicle based on Black Knight test vehicle system

14 p2530 A69-29630

Computer program for STV-F9 satellite communication parameters, using ELDO forecasting values as input data

14 p2530 A69-29689

Communications mission of Symphonie project and satellite communications subsystem design

15 p2562 A69-30084

Short term plan of European electronic component selection for ESRO satellite without established guaranteed failure rate

15 p2624 A69-30823

Ceramic condensers with very high reliability mass produced for Concerto program, describing component characteristics and production methods

15 p2627 A69-30844

Europa 1 booster supplementing with perigee-apogee system for development of Europa 2, noting payload launching capability into 24-hr circular orbit

15 p2671 A69-31051

Photoelectric photometry of artificial satellites noting equipment, Papego satellite observations and light curves from Cosmos 151, 192 and 220

15 p2616 A69-31391

Finnish space research covering satellite tracking and telemetry facilities, different Faraday and Doppler measurements with Explorer 22 signals, etc

15 p2723 A69-31426

Swiss space research report to COSPAR covering upper atmosphere studies, solar wind, etc

15 p2723 A69-31427

Austrian space research covering satellite observation, receiving and evaluating picture transmissions, theoretical investigations, etc

15 p2724 A69-31432

Polish report on space sciences activities to COSPAR covering satellite position observations, geodesy, space physics, mechanics, computations, meteorology, etc

15 p2724 A69-31433

Report on East German space activities to COSPAR covering ionospheric research, geomagnetism, solar activity, solar radio astronomy and international cooperation

15 p2724 A69-31453

Swedish space research report to COSPAR covering organization and publications

15 p2724 A69-31454

Centro Ricerche Aerospaziali objectives, equipment and activities in aerospace research, including space flight simulation facilities and scientific satellite launching range

15 p2724 A69-31456

British rocket and satellite experiments in space research, considering neutral atmosphere, ionosphere and solar radiation, orbital analysis, etc

15 p2724 A69-31463

Netherlands space research covering solar and stellar research, cosmic radiation, photometry and satellite geodesy

15 p2725 A69-31464

Italian space research report to COSPAR covering international cooperation, extrasolar X rays, electron density measurements with San Marco 2 satellite, etc

15 p2725 A69-31465

German space research organizations, rocket ascents and programs including meteorology, aeronomy, ionospheric physics, magnetosphere, solar radiation and solar wind, astronomy, etc

15 p2725 A69-31467

French space program report to COSPAR covering orbiting satellites, rocket launchings, cosmic rays, space biology, geodesy, meteorology, etc

15 p2725 A69-31473

Automatic quantitative checkout equipment for telemetry circuit of Diamant satellite booster before launching

16 p2750 A69-31727

Bipropellant propulsion systems using Aerozine 50 and nitrogen tetroxide for Symphonie telecommunications satellite

16 p2828 A69-31733

Power supplies for balloon-borne instruments, describing light flexible NiCd batteries and solar cells used in EOLE project

16 p2736 A69-31745

French space research center in Toulouse, discussing organization and activities involving satellites, rocket probes, balloons and environmental tests

16 p2765 A69-31758

AZUR research satellite HF communications system, describing telemetry transmitter, command receiver and data transmission

16 p2759 A69-31854

German ground station commercial receiving system for satellite broadcast reception

16 p2766 A69-31855

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System

16 p2759 A69-31856

Reentry flight test vehicle development for West German space program, using hypersonic model to determine controllability and aerodynamic stability

16 p2867 A69-31934

Permanent magnets optimal design and properties for attitude control of German research satellite Azur, considering environmental influences

16 p2868 A69-31936

Project Symphonie German-French communication satellite mission and technical data

16 p2868 A69-32055

D-2 satellite stabilization system design and development, noting mission to determine hydrogen distribution around earth

17 p3046 A69-33223

Numerical integration of Eole satellite attitude equations compared with results obtained by analog simulation or hybrid computation

17 p3048 A69-33232

Orbital and attitude control tests for PAS /two stage perigee-apogee synchronous satellite/ in conjunction with booster Europa 2, discussing functional configuration

17 p3048 A69-33238

German rocket engine industry reliability and performance, discussing solid fuel, two component fuel, single fuel hydrazine, mixed fuel and ramjet engines

17 p3021 A69-33361

French space geodesy since Space Age, detailing Diapason and Diademe satellites program, techniques and results

17 p2961 A69-33382

European highly eccentric orbit satellite /HEOS/ cislunar probe to explore interplanetary space for magnetic fields, cosmic radiation, solar wind and earth shock wave

17 p3050 A69-33397

European launcher system based on modular principle for low orbit, geostationary and space probe missions payload requirements

17 p3050 A69-33428

Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters

17 p3022 A69-33605

International organization and project management procedures in design and construction of Heos 1 satellite for measuring charged particles energy distribution outside geomagnetic field

17 p3050 A69-33699

German research satellite Azur design and production management

17 p3050 A69-33700

TD-1 astrophysical satellite and future ESRO projects, considering HEOS-0A2 and TD-2

17 p3051 A69-34217

European Space Research Program report on HEOS-A satellite, noting planetary physics research particularly in magnetic fields, cosmic radiation and solar wind

18 p3207 A69-34628

TD1/TD2 satellites power supply subsystem, stressing high power requirements and significant design features regarding battery and solar array controls

18 p3093 A69-34791

Cassiopee device for spacecraft or sounding rocket attitude control, describing gyroscopic control unit, sensor element and jet control devices [ONERA-TP-707]

19 p3432 A69-36686

ESRO and legal liability in damage suits concerning satellite protection and environmental control

20 p3635 A69-37108

Swedish satellite onboard computer for particle experiment, discussing functional design based on buffer unit for experimental data

20 p3501 A69-37386

Onboard data processor design for Swedish satellite to study spatial and temporal variations of auroral particles

20 p3501 A69-37387

Onboard satellite computer for project Roseau experiments for magnetosphere study, discussing program switches, monitors and data compilers

20 p3501 A69-37388

Auroral sounding rocket research and instrumentation in Scandinavia, discussing auroral particles, optical measurements, probe experiments and scientific objectives

20 p3542 A69-37794

High quality castings unified standards for European aerospace industry

20 p3551 A69-38029

Magnetic test facilities at ESTEC consisting of system for geomagnetic field compensation and facility for magnetization and demagnetization, testing ESRO satellite models

20 p3512 A69-38279

Monte Cardiga telemetry station associated with sounding rocket range at Salto di Quirra, Sardinia, describing equipment, telemetry system capabilities and flexibility

20 p3512 A69-38280

German ground station radio communications via Intelsat satellites, discussing transmitting facilities, TV picture and sound signals, etc

22 p3902 A69-41249

Aircraft navigation by geostationary satellites, discussing Dioscures project

24 p4280 A69-42568

Spacecraft electric propulsion research in France, Great Britain and Germany

24 p4363 A69-42668

Communication satellites european development, discussing economic and technological problems, stressing color TV and SHF/FM transmission, compared to conventional ground station transmission

24 p4393 A69-43133

EUROPEAN SPACE RESEARCH ORGANIZATION SAT

NT ESRO 1 SATELLITE

NT ESRO 2 SATELLITE

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions

01 p0160 A69-10031

EUROPEAN 1 SPACECRAFT

Europe 1 carrier rocket prelaunch wind load calculations as base for launch or delay decision

01 p0160 A69-10032

In-flight testing of second and third stages of F 7 section of Europa 1 satellite booster, noting third stage explosion

08 p1410 A69-21144

Separation systems in Europa 1 booster vehicle, discussing thrust decay, ignition and control system characteristics

08 p1410 A69-21145

Europa 1 launch clearance procedure based on wind load precalculations from weather balloon determined wind profiles

20 p3619 A69-38281

EUROPIUM

Nonradiative transfer of excitation energy between mixed trinuclear complexes of Tb and Eu ions with lactose in aqueous solution

01 p0023 A69-10288

Meteoritic materials investigated for Sc, Ce and Eu content and distribution in various phases, using neutron activation analysis

01 p0026 A69-11376

EUROPIUM COMPOUNDS

Europium complexes high resolution emission spectra in relation to molecular configuration

01 p0024 A69-10893

Electrical conductivity of sintered polycrystalline cubic and monoclinic europium sesquioxide from DC current-voltage characteristics obtained in air at various pressures

02 p0296 A69-11874

Temperature dependence of semiconductivity of sintered polycrystalline EuO from current-voltage characteristics, measuring activation energy

02 p0296 A69-11875

Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power

19 p3335 A69-36165

EUTECTIC ALLOYS

Plastic deformation in hypoeutectoid and hypereutectoid Ni-Ti alloys studied by compressive stress-strain analysis and transmission electron microscopy

06 p0941 A69-17222

Controlled microstructures of eutectic aluminum-copper aluminides produced for mechanical properties studies

06 p0942 A69-17227

Fatigue characteristics of unidirectionally solidified Al-intermetallic aluminum nickel eutectic alloy consisting of discontinuous Al-Ni intermetallic whiskers in Al matrix

08 p1329 A69-20006

Eutectic anisotropic InSb-NiSb crystals applied to IR detection, noting sensitivity to carbon dioxide lasers

08 p1373 A69-20866

Microstructure and crystallography of lamellar eutectic alloy of Ni and intermetallic Ni-Ti compound

10 p1707 A69-22986

Unidirectionally solidified eutectic composite of Al and Cu-Al intermetallic, noting tensile properties at room and high temperatures

10 p1708 A69-22995

Zirconium-rhenium-carbon ternary system, determining resistivity of melted alloys, discussing eutectic quasi-binary compounds

10 p1715 A69-24055

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes

13 p2276 A69-27402

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide intermetallic eutectic alloy showing dependence on intermetallic constituent

13 p2277 A69-27406

Composition, gamma structure and mechanical properties of three unidirectionally solidified eutectics within Ni-Al-Cb, Ni-Al-Zr and Ni-Al-Ti systems

13 p2277 A69-27407

Eutectoid pearlite growth by pure iron-carbon specimen heat treatment

13 p2281 A69-28158

Turbine blades materials with emphasis on oriented solidification of eutectic alloys, discussing blades cooling by thermosiphons or ducts

17 p2978 A69-33334

Orientation relationships between phases in Co-TaC pseudobinary eutectic alloy, discussing Co fcc-hep allotropic transformation

17 p2988 A69-33395

Directionally solidified Co-Nb eutectic alloys mechanical properties and magnetic performance for elevated temperature space applications

19 p3341 A69-35542

Ni-Cr alloy unidirectionally solidified, grain and eutectic structure and alloy strength

19 p3343 A69-35921

Cu, Ni, Co, Cr and Ti effect on high temperature mechanical properties and stability after prolonged annealing of Al-Si alloy with added 1 percent Mg

22 p3968 A69-40063

EUTECTIC DIAGRAMS

U PHASE DIAGRAMS

EUTECTICS

NT EUTECTIC ALLOYS

Directional solidification of multicomponent metal alloys for matrix in fiber reinforced composites, using monovariant eutectic reactions

07 p1166 A69-19145

TiC-Re phase diagram over wide range of temperatures and chemical compositions

15 p2641 A69-31247

EVACUATING [TRANSPORTATION]

Navigation techniques for emergency helicopter services in medical evacuation and air/sea rescue missions, discussing displays and search patterns

02 p0279 A69-12363

Electronic stethoscopes for use in high background noise environments for patients on air evacuation flights

21 p3667 A69-39444

Patient transportation and evacuation system at disposal of Paris hospital, using short and long haul aircraft, turbojets and helicopters

23 p4105 A69-41785

Helicopter evacuation role in mortality rate among wounded in battle in Korea and Vietnam, discussing air ambulance unit organization

23 p4107 A69-41809

Medical aid, equipment and organization for injured passengers in large aircraft accidents at airports and immediate neighborhood

24 p4270 A69-42602

Air evacuation of maxilla-facially wounded persons from place of accident, noting helicopter use

24 p4270 A69-42603

Algorithm for aeromedical airlift system stop selection and sequencing, minimizing patient in-system time and aircraft flight distance

24 p4251 A69-42804

EVACUATING [VACUUM]

Gas parameters in collisionless region during discharge into vacuum, considering plane and axisymmetric cases and free molecular boundary region

02 p0234 A69-12583

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory

17 p3072 A69-33275

EVALUATION

Central test evaluation group as part of systems engineering of large systems

05 p0742 A69-15803

Evaluation technique for astronautics subsystems in automated spacecraft designed for interplanetary missions, considering operation times, navigation updating and midcourse correction

21 p3764 A69-39408

EVANESCENCE

Resonance frequency behavior of waveguide cavity with evanescent air gap symmetrically loaded with dielectric

22 p3900 A69-40925

EVAPORATION

NT PROPELLANT EVAPORATION

NT TRANSPIRATION

Ion and electron contaminating currents removal in vacuum evaporating devices, using biased field plates

04 p0577 A69-14875

Vacuum equipment for evaporation or sputtering in semiconductor industry

04 p0598 A69-14876

Vaporization of mist of small droplets by intense light beam for droplet extinction rate proportional to absorbed radiant energy

09 p1539 A69-21346

Laser evaporation vapors from refractory materials to produce surface temperature for carrying out reactions in gaseous phase and thin film preparation

09 p1519 A69-22476

Size and velocity measurements of particles suspended in gas expanding from nozzle into vacuum simulating cometary two phase flow with evaporation

10 p1674 A69-23686

Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas

12 p2088 A69-26178

Vacuum evaporation effects on internal macrostresses in deposited metal films based on X ray analysis, showing substrate temperature contribution

12 p2143 A69-26457

Pressure balance and maximum power density at evaporation from heat pipe experiments, deriving maximum heat flux densities

14 p2538 A69-29204

Ion beam sputtering, evaporation and electrical degradation of Al contacted Si solar cells observed in high temperature cyclic tests

19 p3250 A69-35686

Open cycle air evaporation technique selected for water recovery from human urine, based on tradeoff studies

19 p3258 A69-36455

Dynamic electron beam devices for refractory materials evaporation, discussing electron guns and vaporization film data

20 p3551 A69-38131

EVAPORATION RATE

Evaporation rate measurements in fog during carbon dioxide laser radiation, obtaining correlation to describe visibility improvement

02 p0258 A69-12622

Mechanical properties of titanium physically vapor deposited by electron beam high rate evaporation, noting results of tension testing

03 p0443 A69-13117

Condensation-enhanced vaporization rates in nonisothermal systems, noting fume nucleation augmentation of rates into cooler environments

03 p0532 A69-13122

Bulk aerodynamic method for heat and water vapor fluxes from data obtained at Chiba /1966/, introducing modified integral diffusivity

07 p1176 A69-18965

Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems

15 p2687 A69-30548

Test methods for lubricants vapor pressure and flash point determination

15 p2642 A69-30607

Vaporization rates of Ti, Zr, Hf, Nb and Ta carbides at high temperatures measured by Langmuir method

15 p2640 A69-30983

Metal particles evaporation kinetics in plasma arc, determining total and unsteady evaporation time by spectroscopy and absorption radiography

15 p2663 A69-30990

Evaporation rate of liquid sprays involving atomization, droplets ballistics, drop size distribution, turbulence effects, etc

18 p3119 A69-34246

Heat transfer characteristics in evaporative, transpiration cooled porous systems
21 p3851 A69-39037

EVAPORATIVE COOLING
NT FILM COOLING
NT SWEAT COOLING
Ruby laser boring and welding apparatus cooled by evaporated nitrogen gas, suitable for diamond boring
03 p0434 A69-13720
Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage
12 p2191 A69-26793
Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by violent film boiling and conduction through thin vapor layer
15 p2718 A69-31117

EVAPORATORS
Evaporographic converter to test for striations /schlieren/ in materials used in IR
08 p1314 A69-20384

EVASIVE ACTIONS
Tactical aspects of pursuit and evasion, emphasizing analysis of conceptual framework and construction of analytic models
03 p0457 A69-13898
Optimum evasion tactics for aircraft pursued by missile, using steepest ascent method for maximization of distance of closest approach
06 p0866 A69-17401
Policies and controller design for pursuing vehicle developed in terms of pursuit-evasion differential games
24 p4341 A69-43295

EVECTION
U LUNAR ORBITS
U ORBIT PERTURBATION
U SOLAR GRAVITATION

EVOLUTION
Organic matter signals in carbonaceous meteorites, discussing possible relation to extraterrestrial life and origin
11 p1953 A69-24342

EVOLUTION [DEVELOPMENT]
NT ABIOTIC EVOLUTION
NT BIOLOGICAL EVOLUTION
NT GALACTIC EVOLUTION
NT LUNAR EVOLUTION
NT PLANETARY EVOLUTION
NT STELLAR EVOLUTION
Lagrangian evolution criterion for electromagnetic conducting fluid and MHD flow, defining generalized fluxes and forces
10 p1727 A69-22904
Proton flare event of July 1966, summarizing active region birth, evolution of spots, configuration and activity of center and general development
10 p1766 A69-23760
Energy separability method for linear systems in transient evolution using two new identities
13 p2370 A69-28634
Cosmic X rays diffuse component possible origin, discussing galactic gamma ray flux and disagreement with measured isotropy
18 p3185 A69-34275
C3 and C4 carbonaceous chondrites origin, evolution and classification based on mineralogic and petrologic data
19 p3413 A69-36109
Evolution of diffuse nebulae, considering gas dynamic equations, shock and ionization fronts, models and numerical methods, radiation pressure, interstellar magnetic field, etc
21 p3810 A69-39504
Cometary and asteroidal orbital differences and similarities, emphasizing limiting cases to study orbital evolution of meteors
23 p4208 A69-41284

EVOLUTION [LIBERATION]
U GAS EVOLUTION

EXAMINATION
U EYE EXAMINATIONS

EXCHANGING
U CHARGE EXCHANGE
U GAS EXCHANGE
U ION EXCHANGING

EXCITATION
NT ACOUSTIC EXCITATION
NT ATOMIC EXCITATIONS
NT HARMONIC EXCITATION
NT SELF EXCITATION
NT WAVE EXCITATION
Ionization cross sections of excited states of hydrogen atoms and hydrogenoids calculated by Monte Carlo method
01 p0122 A69-10040
Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes
01 p0122 A69-10100
Excitation heating energy pumping mechanism for explaining dynamic equilibrium in C rich arc plasmas with high ion temperature/electron temperature ratio
01 p0126 A69-10276
Preionization of gases by laser beam using theory based on molecular equilibrium concentration and collision excitation
02 p0283 A69-11703
EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
03 p0484 A69-13278
Doublet electronic states of benzyl radical, discussing configuration-interaction calculations and transition predictions
03 p0472 A69-13321
UV induced excited-state properties of DNA using optical emission and electron spin resonance methods
03 p0372 A69-13488
Nanosecond range flash photolysis technique and application to absorption spectra of excited singlet states
05 p0760 A69-15608
Hydrogen ions collision-induced dissociation cross section angular dependence measured, showing qualitative agreement with theoretical predictions
05 p0798 A69-16698
Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion
06 p0961 A69-17135
Polar molecule rotational excitation diffusion cross sections for electron scattering
06 p0961 A69-17139
Vibrational excitation in diatomic gas mixtures by translation to vibration energy conversion in simple collisions and by vibrational energy exchange between components
06 p0962 A69-17821
Gas lasers principles of operation, discussing population mechanism, lifetime conditions, excitation processes, electron velocity distribution and types of discharges
06 p0937 A69-18008
Collisional excitation and ionization rates comparison in statistical equilibrium model atmosphere calculations
08 p1385 A69-20065
Electron-ion collisions during forbidden lines excitation in gaseous nebulae, using Hartree-Fock functions and variational principles
08 p1391 A69-20530
Direct nonresonance excitation of rotational and vibrational states of diatomic molecular ions by electrons in Born-Coulomb approximation
10 p1726 A69-23627
Spontaneous magnetic field excitation in turbulent plasma noting possible instability
10 p1740 A69-23715
Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra
10 p1687 A69-23916
Coupling coefficient and impedance for excitation of isotropic plasma column by ring of magnetic current outside plasma, noting surface wave resonance effect
10 p1659 A69-24064
Damping of solid state laser relaxation oscillations in power output due to diffusion of excitation
10 p1706 A69-24079
Single circuit parametric oscillator excitation by small external narrow band signal, using method of slowly varying amplitudes
11 p1845 A69-24453
Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880
Excitation of plane plasma layer in magnetic field perpendicular to wave vector of excitation wave in gyrotronic waveguide
11 p1927 A69-24916
Excitation coefficients of waves subjected to sudden expansion in radiating waveguide using integral relations, noting convergence
11 p1855 A69-25621

Steady state solution of periodically excited circuit, constructing Green function for use in convolution integral
12 p2036 A69-25918
Optical cross section measurements for electron excitation from ground state of nitrogen
12 p2132 A69-26246
Sinusoidal or random excitations equivalence from point of view of rupture risks, considering industrial applications
13 p2370 A69-28602
EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
14 p2508 A69-29652
Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693
Aurora electron and proton excitation patterns determined spectroscopically, discussing ground based observations of emission geomagnetic latitude-time distribution
15 p2593 A69-30017
Electronic states of semiconductor acceptor centers at forbidden band deep levels, considering inner electron shell excitation in impurity ion
15 p2665 A69-30039
Excited cyanide molecules concentration in arc discharge determined from spectral bands absolute intensities during electron transition
15 p2654 A69-30080
Excitation sources distribution in chromosphere from observed H alpha line contour, considering resonant scattering and internal excitation
15 p2683 A69-30509
Steady state solutions for parametric excitations in various limits in plasmas, allowing for higher order mode coupling
15 p2661 A69-30919
Optimal parameters of cuvette for use with helium-neon laser as excitation source to record combination light scattering spectra of powdery materials
15 p2635 A69-31105
Electron cooling rates due to vibrational excitation of molecular oxygen calculated as function of electron temperature in E region
16 p2774 A69-31982
He-Ne laser plasma behavior, establishing parameters for electron gas, cross sections of formation and annihilation and excited states lifetimes
17 p2982 A69-33390
Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum
17 p2928 A69-33865
Rate coefficients for chemiluminescent reactions of excited He with N, O, carbon monoxide and dioxide determined from spatial dependence of visible emission
20 p3483 A69-36936
Absorption spectrum of diatomic oxygen excited by AC silent discharge photographed with vacuum spectrograph, associating lines with Schumann-Runge band
20 p3581 A69-38276
Diatomic molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation
21 p3775 A69-39665
Population and excitation rates of working levels of carbon dioxide laser calculated on basis of emission power, amplification coefficient and spontaneous emission intensity
22 p3964 A69-40795

EXCITED STATES
U EXCITATION

EXCITONS
Recombination radiation from excitons and free carriers in epitaxial GaAs with impurities at liquid He temperatures
01 p0140 A69-11253
Exciton distribution in semiconductors below Bose condensation temperature differing from diffusion distribution
03 p0486 A69-13415
Exciton spectrum for limiting case of large radius leading to Wannier-Mott equation with static dielectric permeability
03 p0486 A69-13416
Bound excitons spectra in CdS, semiconductor band structure and tabulating positions of lines identified with excitons
03 p0488 A69-13784

Interaction between semiconductor excitons, obtaining formulas for exciton concentrations ground state energy and dispersion, noting association with Pauli statistics
08 p1371 A69-19955

Localized plasmons and optical phonons occurrence on local plasma levels, noting role of impurity atom in localized exciton-plasma resonance
09 p1548 A69-21674

Excitation of ultrathin Cd/Se/Si platelets with mode locked He-Ne laser for excitons formation, discussing time delay
10 p1703 A69-23512

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons
11 p1936 A69-24640

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
12 p2144 A69-26722

Frequency dependence of light absorption by excitons obtained for allowed and forbidden zone transfers in semiconductors
15 p2632 A69-30057

Bound excitons spectra in Cu doped gallium arsenide crystals, analyzing line absorption structure and uniaxial compression effect
16 p2824 A69-31571

CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure
18 p3181 A69-34274

Exciton line broadening in II-VI compound semiconductors, discussing thermal broadening of n equals one exciton associated with LO phonon-induced scattering
19 p3386 A69-36524

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
21 p3781 A69-39135

EXCRETION

Renal effects of moderate hypoxia exposure in mice as reflected in urine volume and electrolyte excretion patterns during four days at simulated altitude
01 p0015 A69-10921

Rapid global transportation effect on circadian rhythmic patterns in human body functions, discussing kidney excretion and pituitary adrenal cortical system
09 p1444 A69-22545

Physical factors affecting proximal and distal tubular sodium reabsorption in dogs undergoing water diuresis
13 p2210 A69-28482

Male patients urine tests during sinusoidal vibration, noting catecholamine excretion as criterion of emotional stress under various environmental conditions
21 p3654 A69-38909

EXECUTIVE AIRCRAFT

U GENERAL AVIATION AIRCRAFT

U PASSENGER AIRCRAFT

EXERCISE [PHYSIOLOGY]

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects
17 p2910 A69-33751

Reticulocyte count comparison on trained and sedentary college male subjects before and after strenuous exercise, noting role in oxygen uptake
21 p3654 A69-38907

Exercise-temperature regulation in men under constant submaximal workload at various simulated altitudes, discussing exercise core temperature equilibrium level setting mechanisms
22 p3891 A69-40219

Enzymatic processes of glucose metabolism in immature rats lymphatic tissues during exercise-induced elevated corticosteroid secretion
23 p4080 A69-41405

EXERTION

U PHYSICAL WORK

EXHAUST DIFFUSERS

Gas turbine exhaust silencer performance correlated in laboratory and in service
[ASME PAPER 68-WA/GT-9]
05 p0812 A69-16144

Ejector-diffuser performance improvement by reduction of backflow with orifice plate installed at inlet of straight diffuser duct
11 p1819 A69-25382

EXHAUST FLOW SIMULATION

Radar backscattering from turbulent rocket exhaust plumes
[AIAA PAPER 69-71] 06 p0891 A69-18071

Ingestion and flow field characteristics of interaction of two heated parallel air jets; discussing VTOL exhaust ingestion tests
[AIAA PAPER 68-79] 12 p2012 A69-26761

Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] 20 p3631 A69-37188

Outer space rocket plumes simulation facility combining low density wind tunnel and molecular sink properties, discussing role of liquid nitrogen cooled diffuser-precooler
22 p3928 A69-40731

EXHAUST GASES

Cylindrical afterbodies at free stream Mach 2 with hot argon gas ejection, discussing flow rate influence on base pressure
02 p0190 A69-12533

Jet engine exhaust composition and methods for reducing smoke emission through burner design changes, noting primary zone fuel and airflow pattern
[SAE PAPER 680348] 03 p0495 A69-13350

Monograph on exhaust gases mixing with cold airstream in ducted fanjet engine, noting thrust and efficiency increase
03 p0496 A69-14048

Soviet book on turbojet engine reverse thrust systems and systems for deflection of jet stream covering aircraft braking efficiency
04 p0647 A69-14934

Nuclear rocket engine exhaust gas cooling by injecting water jet eliminates need for secondary cooling
[AIAA PAPER 68-604] 04 p0591 A69-15516

Control methods and designs for limiting atmospheric pollution emitted by aircraft gas turbine engines
[SAE PAPER 680347] 07 p1204 A69-19729

Real time real temperature exhaust gas reingestion and structural heating test facility for jet lift V/STOL configurations
[AIAA PAPER 69-310] 09 p1479 A69-22388

Gas turbine engines smoke emission, considering smoke measurement, flame structure, carbon production, pressure effects fuel-air ratio, etc
09 p1573 A69-22622

Control methods and designs for limiting atmospheric pollution emitted by aircraft gas turbine engines
12 p2147 A69-26236

Exhaust gas recirculation for VTOL aircraft
[AIAA PAPER 67-439] 12 p2013 A69-26760

Test programs utilizing pitot probes to map exhaust plumes from liquid bipropellant engines in low ambient pressures conducted to verify calculations
[AIAA PAPER 69-575] 16 p2869 A69-32746

Noise abatement and smoke emission reduction from aircraft engines
[AIAA PAPER 69-489] 16 p2746 A69-32764

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor
17 p3020 A69-33344

Density profiles in far field of reaction control system plumes in vacuum obtained by method eliminating difficulties encountered by continuum method
19 p3238 A69-35954

Water injection cooling of exhaust gases during stage testing of NERVA engine, discussing exhaust duct configuration and flow characteristics, spray nozzle geometry, etc
[AIAA PAPER 69-514] 19 p3372 A69-36301

Aerated fuel spray effect on smoke reduction from high pressure ratio aircraft gas turbines engines, including smoke measurement and visibility
19 p3395 A69-36770

Chemical and thermal behavior of materials corrosion in propellant exhaust gases with analysis of reactions involving hydrogen, nitrogen, water, carbon dioxide, etc
21 p3784 A69-39489

Organic Rankine cycle system using heat absorption from turbine exhaust to provide increased electrical output and to power air conditioning
23 p4070 A69-42267

EXHAUST NOZZLES

NT CONVERGENT-DIVERGENT NOZZLES

NT PLUG NOZZLES

Three dimensional scramjet exhaust nozzle flow fields by second order method of characteristics
[AIAA PAPER 69-5] 06 p0862 A69-18048

Collimated nozzle beam for probing low density gas flows, discussing transition from free molecular to isentropic flow and Knudsen numbers
07 p1136 A69-19467

Solid propellant motors nozzle design, analyzing structural and material problems, high temperature exhaust gases effects, thermal insulation, etc
10 p1716 A69-23403

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust minus drag, noting nozzle configurations variations effect
[AIAA PAPER 68-395] 12 p2059 A69-26769

Exhaust nozzle/airframe interference test evaluation for twin engine supersonic fighter
[AIAA PAPER 69-430] 16 p2733 A69-32730

Local external flow variations effect on blow-in-door nozzle performance in transonic flight regime
[AIAA PAPER 69-428] 16 p2733 A69-32731

Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel
[AIAA PAPER 69-427] 16 p2734 A69-32769

Directional thrust control for solid propellant rockets, describing swinging, bent rotating nozzles and secondary injection
17 p3019 A69-33332

Flow field of two dimensional nozzle exhausting to vacuum, describing computer program based on BGK equation and plotting exhaust region density, temperature and velocity
[AIAA PAPER 69-658] 17 p2893 A69-33490

Nitrogen and water vapor effects on hydrogen-oxygen system recombination, using shock tubes for design of exhaust nozzles for hypersonic flow vehicles
21 p3669 A69-38801

EXHAUST SYSTEMS

Flight vehicle cabins ventilation for undesirable gas contaminants removal, discussing contaminant concentration calculation and automatic control
02 p0200 A69-11512

Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect
[AIAA PAPER 69-325] 09 p1479 A69-22390

Exhaust gas reingestion and inlet flow distortion in V/STOL lift engines, discussing static and wind tunnel testing using fighter configuration models
[AIAA PAPER 68-78] 12 p2012 A69-26762

EXHAUST VELOCITY

Axial velocities in ammonia MPD thruster exhaust by measuring Doppler shifts of spectral lines emitted by plasma constituents
16 p2835 A69-31890

EXHAUSTION

Exhaustion time extension in rats by altitude acclimation, noting adaptation loss resulting from physical exercise discontinuation
23 p4086 A69-41787

EXISTENCE

Existence and uniqueness of weak solutions in linear theory of stable equilibrium position for inhomogeneous elastic thin walled shells
02 p0340 A69-12036

Quadratic Liapunov function existence for exponentially stable linear system with varying coefficients described by vector differential equations
19 p3359 A69-35617

EXISTENCE THEOREMS

Boundary value problems for steady, three dimensional MHD flow of viscous incompressible conducting fluid past various bodies, proving existence of solutions
01 p0126 A69-10164

Geometrical existence proof of elastically coupled nonlinear systems normal mode vibrations demonstrated by existence of extremal arcs in Riemann space
01 p0166 A69-10232

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell
02 p0337 A69-11654

Existence of periodic solutions by Whittaker criterion to equations describing motion of satellite of spheroidal planet in planetocentric coordinate system
02 p0317 A69-11959

Existence theorems for solutions to second order ordinary differential equations
02 p0272 A69-12129

Uniqueness and existence theorem concerning stability of solutions of mixed nonlinear boundary value problem, discussing generalized heat transfer phenomena
02 p0352 A69-12255

Bounded solutions for systems of ordinary second order differential equations
03 p0455 A69-13257

Ordinary nonlinear differential equations with linear boundary conditions, discussing formulation and proof of lemma and theorems to demonstrate existence
04 p0621 A69-14416

Boundary value problem of hyperbolic equation with discontinuous boundary conditions
04 p0622 A69-14617

First-kind operator equation solution by reduction to dual extremum problem, proving existence and convergence
04 p0622 A69-14622

Asymptotic oscillation results for solutions to first order nonlinear differential-difference equations, obtaining existence-uniqueness theorems
04 p0624 A69-14950

Existence theorem for periodic solutions of parabolic boundary value problem for infinite space time cylinder
04 p0624 A69-15004

Boundary value problems for second order degenerate elliptic equations, formulating and proving theorems for existence of generalized solutions
05 p0786 A69-16422

Existence and uniqueness theorem for functional equation of optimal control problems, noting stability of solution
06 p0949 A69-17889

Complex variable theory usefulness in investigating existence and uniqueness of solutions for boundary values in partial differential equation
07 p1173 A69-18731

Periodic asymptotically stable MHD motions, proving uniqueness and existence theorems
07 p1194 A69-19437

Existence and uniqueness of Dirichlet problem solutions for elliptic type equations with measurable and bounded coefficients
08 p1343 A69-20659

Almost periodic systems stability criteria derived from differential inequalities and Liapunov function, considering existence and uniqueness
09 p1532 A69-21612

Decrease existence at t approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
09 p1481 A69-21899

Existence and uniqueness to boundary layer continuation problem based on flow equation for steady gas flow
10 p1679 A69-23569

Existence and oscillation of initial and boundary value problems solutions for real scalar second order differential equations
10 p1720 A69-23637

Existence and uniqueness for nonlinear boundary value problems satisfying Lipschitz condition
10 p1721 A69-23640

Solution existence of nonlinear two point boundary value problems from uniqueness
11 p1909 A69-24883

Existence and completeness of eigenfunctions for boundary value problem arising in theory of small amplitude motions of stratified polytropic gas
11 p1868 A69-24884

Existence theorems for hyperbolic genuinely nonlinear systems of conservation laws, studying Cauchy problem
11 p1909 A69-25163

Dirichlet problem solution for Volterra elliptic integrodifferential equation, considering existence theorem hypotheses
12 p2121 A69-26468

Existence theorems for partial differential equations theory for traction boundary value problem of linearized elastostatics
12 p2188 A69-26928

Sufficient conditions for periodic motion existence of autonomous nonlinear feedback systems derived in terms of linear system frequency response
13 p2238 A69-27923

Singularity-free global solutions to nonlinear differential equations associated with variational principles, deriving necessary condition for existence from dilatation invariance considerations
14 p2470 A69-29367

Monograph on Dirichlet problem for quasi-linear elliptic differential equations with many independent variables
14 p2471 A69-29599

Von Karman swirling flow problem differential equations solved by extending Serrin existence theorems
14 p2432 A69-29676

Conduction solution to generalized nonlinear Benard problem showing existence of bifurcation and analyticity of convective motion
14 p2540 A69-29679

Necessary and sufficient conditions for solution existence to second order boundary value problems, considering second order differential equation involving function of three variables
14 p2471 A69-29951

Necessary and sufficient conditions for existence of smooth solution to quasi-linear partial differential equation
17 p2994 A69-32843

Classical solution existence to mixed boundary value problems for second order hyperbolic operators obtained by Laplace transforms
18 p3165 A69-35313

Existence and uniqueness theorems for operator equation in differential equations theory for application to boundary value problem
19 p3360 A69-36373

Fixed point existence in study nonlinear mapping determined on semiordeired Banach space, noting results applicability to integral equations and boundary value problems
19 p3361 A69-36640

Existence theorem for limits of minimizing sequences in optimal control problems, applying results to systems governed by partial differential equations
19 p3287 A69-36724

Heat transfer problem involving temperature determination of body and ambient medium, deriving existence and uniqueness theorems for boundary value problems in curvilinear regions
20 p3631 A69-36991

Method of straight lines applied to two phase Stefan type problem for quasi-linear parabolic equation, obtaining existence and uniqueness of solutions
20 p3567 A69-36992

Continuous optimal control problems, proving direct solutions existence for case of differential equations system linearity in control and state variables
21 p3684 A69-38431

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
22 p3917 A69-40116

Existence conditions of critical points for autonomous differential equations in bounded flows
22 p3975 A69-40571

Existence theorem for Markov chain finite state stochastic games applied to saddle point and optimal strategy or epsilon-optimal strategy pairs
22 p3975 A69-41010

Existence theorem for relation between solutions of systems of ordinary differential equations
23 p4182 A69-41959

Decrease existence at approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
23 p4152 A69-41975

EXO BIOLOGY

Space controlled microbiology, discussing telemetry control of waste material conversion in air and water pollution
[UN PAPER 68-95861] 01 p0014 A69-10456

Space biology, discussing U.S. research program, emphasizing gravity/organism reactions, biochronology and exobiology
[UN PAPER 68-95345] 01 p0014 A69-10486

Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights
01 p0016 A69-10948

Biological life support system based on continuous algae seaweed cultivation as link of closed ecological system, discussing design and performance
01 p0020 A69-11077

Resistance of animal organisms and cells to extreme environmental conditions discussing exobiological implications for extraterrestrial life systems
01 p0017 A69-11083

Mathematical models for Chlorella cell and biomass growth under illumination during space flight, noting ionizing radiation presence
02 p0198 A69-11508

Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
02 p0198 A69-11770

French applied and basic research in space biology including manned space flight, deep space problems, weightlessness and cosmic heavy ion radiation effects
02 p0199 A69-11909

Space radiation biology - NASA Conference, Berkeley, September 1965
03 p0370 A69-13476

Mars biological exploration, discussing life detection, chemical and biological experimental strategy [AIAA PAPER 68-1122] 03 p0375 A69-13700

Biological space research, discussing microecology and weightlessness effects on human space flight [DVL-847] 04 p0553 A69-14811

Microbial contaminants on space hardware, discussing detection and enumeration techniques
05 p0714 A69-15954

Life probability and origin on Milky Way planets with emphasis on solar system, discussing molecular biology role
05 p0707 A69-15966

Animals in weightless state, noting vigilance, attention, sensorial and motor reaction time, muscular tone at rest and muscles electrical activity in movement
09 p1445 A69-22721

Primates for space research, discussing selection, purchase, handling and use as controls in observations of disorders experienced by man
09 p1445 A69-22723

Soviet book on space radiobiology, discussing somatic effects, influence of flight factors, relative biological effectiveness of various radiations and radiation safety
11 p1827 A69-24263

Bioorganic comparative analysis of desert soils, Precambrian shales and meteorites by automated pyrolysis-gas chromatography-mass spectrometry system for future Mars soil analysis [JPL-TR-32-1368] 11 p1832 A69-25640

Space biological tests performed on lower animals and vegetables relating to higher organisms reactions during prolonged manned space flights, reviewing Nasa experiments
12 p2019 A69-26494

Soviet space biology and medicine, discussing ecological physiology, closed system ecology, exobiology and medical tests on cosmonauts
13 p2209 A69-27356

Weightlessness, increased gravitational fields and radiation effects on biological systems at organismal, cellular and subcellular levels, discussing biosatellite experiments
14 p2406 A69-29097

Exobiology, Search for extraterrestrial life - AAS-AAAS Conference, New York, December 1967
17 p2907 A69-32967

Solar system physical environments surveyed from exobiological viewpoint
17 p2907 A69-32968

Origin of microbial life on earth and implications for extraterrestrial forms
17 p2907 A69-32972

UFOs from sociological viewpoint, stressing need for international cooperation in exobiological research
17 p3076 A69-32974

Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions
20 p3476 A69-37617

Insects mutational responses to space flight and associated radiation on biosatellite 2 compared with ground based controls
20 p3476 A69-37618

Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories
22 p3876 A69-40271

Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
23 p4212 A69-41611

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis
23 p4146 A69-41620

Extraterrestrial optical microscopy, discussing experiment, telemetry, data interpretation and instrument characteristics concerning biological, cytochemical and petrographic microscopes
23 p4164 A69-41621

Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection
23 p4213 A69-41622

EXOSPHERE

Exosphere diurnal and latitudinal variations in electron and proton content, ion composition, and electron, proton and positive O ion densities
01 p0063 A69-10422

Venus exospheric temperature for various composition models, discussing carbon dioxide concentration effects
02 p0319 A69-12109

Propagation of long electromagnetic waves in ionosphere and exosphere, discussing thunderstorm noise spectrum
03 p0396 A69-13702

Lateral transport of constituents in planetary exospheres, considering planetary rotation
03 p0515 A69-14010

Transpolar exospheric electron concentration distributions along earth-sun line parallel path of Alouette 1 satellite
03 p0425 A69-14018

Semiannual variations in exospheric density near 1100 km derived from Echo 2 orbit, noting phases during solar cycle
06 p0918 A69-13785

Cyclotron instability of outer radiation belt protons, taking into account data on spatial distribution and ion composition of exospheric plasma
06 p0919 A69-17721

D/H ratio in Venus exosphere, discussing isotopic fractionation mechanisms and Lyman alpha data from Mariner 5
11 p1962 A69-25145

Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause
11 p1879 A69-25284

Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
12 p2155 A69-26020

Unified model for spatial distribution of transpolar exospheric electron density for polar plasma study
12 p2151 A69-26952

Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements
15 p2600 A69-31351

Exospheric temperature variations by Thomson scattering related to solar and geomagnetic activity, discussing seasonal effect on thermospheric variables
15 p2604 A69-31409

Simultaneous middle and low latitude Thomson scatter measurements, comparing electron density, temperature and exospheric temperature data on quiet and disturbed days
15 p2604 A69-31418

Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers
18 p3187 A69-34939

Primitive earth upper atmosphere thermal models, considering roles of exospheric temperature and free hydrogen availability in methane dominated environment
20 p3608 A69-38056

Doppler broadened atomic O emission line measurement providing indication of exospheric temperature storm-time variations
20 p3546 A69-38099

Neutral exosphere model for nonrotating planet permitting barosphere uniform rotation at certain angular velocity, determining velocity distribution and density
22 p4023 A69-40524

H and He atoms escape from atmosphere under MHD waves action at exosphere boundary
23 p4156 A69-41847

EXOTHERMIC REACTIONS

Exothermal effects during sintering of nickel-aluminum powder mixture
02 p0269 A69-12838

Exothermal effects during sintering of nickel-aluminum powder mixture, showing role of liquid phase decomposition and intermetallics
02 p0269 A69-12843

Thermal explosion criterion used for explosion/ignition delay of exothermic material surrounding heated wires having good thermal conductivity
[WSCIPAPER 68-23] 07 p1240 A69-18359

Ammonium perchlorate exothermic decomposition control noting effects of preheating and ammonium fluoroborate additives
[WSCIPAPER 68-25] 07 p1202 A69-18363

Dynamic differential thermal analysis of dried plant and animal specimens and related substances yielding discrete decomposition peaks of exothermic type
15 p2555 A69-31000

Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents
[AIAA PAPER 69-425] 16 p2832 A69-32653

Ammonium and magnesium perchlorate mixture thermal stability study with differential scanning calorimetry, noting exothermic decomposition of AP
[AIAA PAPER 69-500] 16 p2833 A69-32661

Premature exothermic decomposition suppression in propellant grade ammonium perchlorate, using differential thermal analysis
[AIAA PAPER 69-503] 16 p2833 A69-32688

Criteria to predict flow instabilities triggered by exothermic reaction presence in high temperature reaction kinetic shock tube studies
18 p3116 A69-34462

Combustible mixtures flow past bodies, discussing equation for shock polar for exothermal discontinuities at subsonic and supersonic velocities
19 p3241 A69-36780

EXPANDABLE STRUCTURES

NT BALLOONS

NT BEACON SATELLITES

NT BELLOWS

NT EXPLORER 22 SATELLITE

NT HIGH ALTITUDE BALLOONS

NT INFLATABLE STRUCTURES

NT METEOROLOGICAL BALLOONS

NT TETHERED BALLOONS

Expandable D 21 airlock scheduled for testing on NASA Orbital Workshop Flight based on elastic materials technique, noting more complex chemically rigidized concept
[IAF PAPER SD-49] 02 p0334 A69-11949

Foldable tubular connection application to expandable lattice structure, analyzing cross sectional distortions
06 p1024 A69-17608

Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth
19 p3433 A69-35585

Dynamic uniaxial tensile stress-strain data obtained at high rates by measuring kinematics of symmetrically expanding thin ring specimens
24 p4330 A69-42735

EXPANSION

NT GAS EXPANSION

NT PRANDTL-MEYER EXPANSION

Observations indicating slow earth expansion
22 p4018 A69-40179

Earth gravitational potential energy changes in examining expanding earth theory
22 p3936 A69-40180

Graphical method for two dimensional supersonic expansion flow with subsonic reaction front around corner compared to existing iteration method
23 p4061 A69-42411

EXPANSION WAVES

U ELASTIC WAVES

EXPECTANCY HYPOTHESIS

Expected occurrences mathematical model for flight system availability under uncertainty
18 p3210 A69-35083

EXPECTATION

Areas of expectation for single radar automatic tracking of flying objects derived on basis of equation of circle in polar coordinates
01 p0035 A69-11296

EXPERIMENTAL DESIGN

Phased array antenna radiator element design, emphasizing configuration selection and reflection loss for beam steering
04 p0572 A69-14321

Diffraction limited telescope fine guidance experiment to improve pointing stability in space, noting attitude control system and nonmechanical suspension
08 p1317 A69-21072

Thermionic space power reactor design, detailing Critical Experiment problems
09 p1441 A69-21835

Antenna for lunar occultation observations at 81.5 MHz, detailing experimental procedure and data reduction
10 p1779 A69-23606

Einstein second postulate concerning invariability of light vector in vacuum experimented for validity, using earth and moon as light rays launching and reflecting media
13 p2354 A69-28650

Book on integrated circuits covering fabrication techniques, basic semiconductor theory, thin film, monolithic, compatible circuits, packaging, etc
14 p2419 A69-29002

Gas laser design utilizing internal window mirrors deposited with dielectric coating outside resonator
14 p2457 A69-29160

Foil bearings design, fabrication, applications to flexible material transport, rotor support, etc
15 p2618 A69-30327

Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
15 p2586 A69-30383

Microwave strip transmission line, discussing evolutionary improvements, computerized design, materials, semiconductors, packaging, reliability, etc
15 p2721 A69-31074

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion
[AIAA PAPER 69-602] 17 p3070 A69-33260

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment
18 p3112 A69-34235

Molecular beam experiments on moon, noting lunar environmental advantages for studies of beam-beam scattering, beam-surface interactions, beam-field deflection, etc
18 p3113 A69-34240

Space exploitation for experimental research - AAS Conference, Dedham, Mass., May 1968, Volume 24
18 p3193 A69-34367

Semiconductor reliability evaluation program for economical experimental design, noting stress tests
18 p3232 A69-34496

OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results
19 p3284 A69-36675

Fabry-Perot interferometer with Al coating reflecting surface deposited on unbaked thin films
20 p3536 A69-36933

Apollo 11 passive seismic experiment design and objectives, describing seismometer characteristics and lunar interior
20 p3539 A69-37516

Digital data analysis systems role in experimentation and R and D
21 p3843 A69-39315

Interactive experimenter computer system software and hardware design considerations based on astronaut-machine/experimenter question-answer interactions
[AIAA PAPER 69-953] 22 p3904 A69-40335

Troposphere fine scale properties, comparing simultaneous results of five experimental methods
22 p3941 A69-40914

Space experimental design based on manned vs unmanned spacecraft value for multipurpose low cost flexible space station in low earth orbit
23 p4223 A69-42457

Ergonomic study of experimental tests design for comparing equipments efficiency with man
24 p4275 A69-43023

EXPERIMENTAL REFLECTOR ORBITAL SHOT PROJ

Multispectral photographic determination of reflectance of environmental features from aerial spectral photographs, noting EROS program application
11 p1880 A69-24266

EXPIRATION

Sequential lung emptying at varying expiratory flow rates at increasing acceleration levels using expired nitrogen analysis
23 p4083 A69-41448

EXPLODING CONDUCTOR CIRCUITS U CIRCUITS

EXPLODING WIRES

Exploding wire - Conference, Boston, October 1967
01 p0116 A69-10654

Nonlinear circuit equations describing initial phase of exploding wire, noting solution for wire resistance variation with internal energy
01 p0117 A69-10656

Exploding wire discharges similarity with underwater sparks for understanding water breakdown and parallel discharges
01 p0117 A69-10657

Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry
01 p0117 A69-10658

Electrical equation of state of metals determination from density, conductivity, energy and metal vapor velocity measurements in wire explosions
01 p0117 A69-10659

Axial magnetic field effect on exploding wire phenomenon, studying direct interaction
01 p0118 A69-10660

Ministriations in frequency graphs as evidence of standing waves in electrically exploded iron wires
01 p0118 A69-10661

Spectroscopic investigation of high density plasma from Li exploded wires
01 p0129 A69-10662

Faraday rotation of plane polarized microwave beam for measuring precursor ionization from exploding wire discharge in various gases
01 p0129 A69-10663

Continuous and time-resolved absorption and emission spectra studies produced by exploding wires in gases, discussing effects of environment, pressure and electrical energy
01 p0118 A69-10664

Copper exploding wire Kerr-cell time-resolved absorption spectra analysis, considering copper atom transition
01 p0118 A69-10665

Exploding wire heating technique using combination of focused laser beam electric field intensity and pulsed power electric current
01 p0090 A69-10666

High temperature plasmas generation by exploding gold wires in vacuum, using time of flight technique for plasma densities and flow velocities
01 p0129 A69-10667

Adsorbed gas influence on X ray emission from exploding tungsten wires noting ungasged and degassed specimens in vacuum
01 p0118 A69-10668

Current sheath surrounding exploding copper wire in vacuum, plotting current distribution as function of time and radius
01 p0119 A69-10669

Exploding wire phenomenon during early expansion from time correlated X ray and optical streak photographs in vacuum chamber
01 p0119 A69-10670

Time resolved spectroscopy of exploding wire plasmas in visible spectrum of various elements, determining plasma characteristics
01 p0119 A69-10671

Exploding wire detonators noting dependence of threshold burst current on bridgewire length and diameter, explosive surface, density, etc
01 p0119 A69-10672

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting exploding wires role
01 p0119 A69-10673

Thermal model for interaction of exploding wires with methane atmosphere, discussing energy transfer efficiency in high temperature pyrolyses near explosion
01 p0119 A69-10674

Hydrocarbon formation mechanisms under conditions resulting from graphite filament explosions in hydrogen atmospheres, emphasizing stepwise radical formation and methane role
01 p0120 A69-10675

Exploding wire detonators without primary explosive, discussing high precision fabrication, safety aspects and firing circuit
01 p0120 A69-10676

Exploding wire self healing fuse feasibility demonstrated with Hg, noting dynamics of conversion of electric to mechanical energy
01 p0120 A69-10677

Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation
01 p0141 A69-10678

Capacitance-voltage relationships for PETN initiation by various diameter gold exploding bridgewires, noting optimum capacitance dependence on energy transfer efficiency
01 p0141 A69-10679

Chemical phenomena during explosions of wires in various gaseous atmospheres, using apparatus with electronic crowbar for current flow regulation
01 p0081 A69-10680

Wires electrical explosion applications used to study equilibrium characteristics of metals and alloys at high temperatures
02 p0280 A69-11581

Temperature and electron density distribution during late phase of wire explosion, analyzing optically thin plasma column by quantitative spectroscopy
02 p0286 A69-11711

Dense plasma radiation, analyzing spectrographically initial stages of wire explosion in vacuum
03 p0482 A69-14227

Electric propulsion research in Japan, considering cesium ion thruster, plasma acceleration and thrust by electric explosion of fine wires
06 p0984 A69-17629

Gasdynamic flow shock wave phenomena during exploding wire dwell time inside metal vapor cylinder, noting effect on reignition
07 p1188 A69-18275

Thermal explosion criterion used for explosion/ignition delay of exothermic material surrounding heated wires having good thermal conductivity
[WSCJ PAPER 68-23] 07 p1240 A69-18359

Energy characteristics of exploding wires considered as shock wave source
09 p1539 A69-21560

Secondary explosives ignition by primers and other explosive wire devices on missiles, discussing circuitry and resistance to severe climatic and electrical environments
10 p1751 A69-23021

Expansion velocity of discharge plasma in exploding wires measured by X ray flash and streak photography, noting discrepancy
11 p1926 A69-24472

Flash radiography technique using tungsten wire explosion in vacuum to obtain ultrafast reproducible X ray pulse
12 p2092 A69-26480

Optical and spectral properties of dense plasma expanding after exploding electric wire in vacuum using high speed photography
12 p2137 A69-26533

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Pressure behind spherically divergent shock wave produced by explosion of metal wire measured and compared with calculated values
16 p2769 A69-31837

Micrometeorite simulation by wire explosion plasma, discussing energy requirements and simulator performance
16 p2821 A69-31839

Exploding bridgewire /EBW/ systems compared to hot-wire initiators for Mars space probe
17 p2905 A69-34108

Cumulative shock waves in vaporized products of electrical explosion of conical copper wire configuration, discussing atmospheric ionized vertical configuration formation
19 p3372 A69-35823

Stored energy release in exploding wire circuit during divergent detonation wave ignition in propane-oxygen mixture in circular sector
19 p3451 A69-36365

Conductor material thermal conductivity contribution to self similar explosion in strong magnetic field, determining critical field strength
22 p3982 A69-41019

EXPLORATION

U LUNAR EXPLORATION
U SPACE EXPLORATION

EXPLORER SATELLITES

NT IMP
NT MICROMETEOROID EXPLORER SATELLITES
NT RADIO ASTRONOMY EXPLORER SATELLITE

Upper atmospheric models, considering satellite orbital and solar panel torques, prediction, atmospheric density and composition measurements, etc
[AIAA PAPER 69-50] 06 p1011 A69-18085

Magnetopause, magnetosheath, bow shock and adjoining interplanetary domain study by IMP-1 satellite, discussing macroscopic plasma variables and fluid model for solar wind
07 p1129 A69-19374

EXPLORER 1 SATELLITE

Lifetime of artificial satellites by approximate integration method with application to Explorer 1, comparing analytical prediction
22 p4036 A69-39973

EXPLORER 16 SATELLITE

Meteoroid flux measured by Explorer 16 and Lunar Orbiter, analyzing penetration rate, average velocity and consistency with photographic meteors
13 p2349 A69-27820

EXPLORER 18 SATELLITE

IMP-1 experiment, describing design and applications of SDP-3 computer
19 p3280 A69-36265

EXPLORER 20 SATELLITE

Explorer 20 satellite for obtaining fixed frequency pulse soundings of ionospheric topside, discussing transceiver-dipole antenna instrumentation and payload
20 p3618 A69-37857

EXPLORER 22 SATELLITE

Scintillation index variations based on 40 MHz Explorer 22 satellite signals recorded in Germany
12 p2034 A69-27094

Radio signal amplitude changes from Explorer 22 beacon satellite attributed to wave diffraction by tropospheric structures
14 p2411 A69-29107

Explorer 22 observations of ionosphere electron content, describing measuring equipment and data evaluation
22 p3935 A69-39977

EXPLORER 26 SATELLITE

Explorer 26 observations of solar proton penetration inside trapped radiation near geomagnetic equator
01 p0146 A69-11122

EXPLORER 29 SATELLITE

Satellite trajectory determination and expected errors for OGO 4 and Geos 1 orbits, noting geopotential, aerodynamic drag and integration contributions
15 p2698 A69-31331

Optical observations of Geos 1 over North America in short arc reduction to improve tracking stations survey coordinates, discussing dependence on earth gravity and mass
15 p2599 A69-31342

EXPLORER 30 SATELLITE

Solar flux variations in 44-60 A band during ascent of current solar cycle /Number 20/ measured by Solrad 8 satellite
04 p0650 A69-15530

Explorer 30 satellite monitoring of solar X ray emission during July 1-15 1966, noting plage region activation with increasing emission
10 p1763 A69-23736

Geomagnetic storm induced temporary radiation zones located by determining Explorer 30 attitude and spin axis orientation
14 p2514 A69-29384

Anomalous X ray signals from Explorer 30 satellite showing saturation in ionization chamber possibly due to enhanced solar and atmospheric X rays
21 p3792 A69-39808

EXPLORER 31 SATELLITE

Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density
20 p3544 A69-37876

Cylindrical electrostatic probe measurements on Alouette 2 and Explorer 31, considering implications for future missions
20 p3544 A69-37877

Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition
20 p3544 A69-37878

Langmuir plate and spherical ion probe experiments aboard Explorer 31, measuring concentrations and temperatures of thermal electrons and ions
20 p3545 A69-37881

Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
20 p3532 A69-37896

EXPLORER 33 SATELLITE

Explorer 33 and 35 satellites reliability achievement by design via AIMP program
03 p0519 A69-13232

Anisotropic fluxes of energetic particles in and near distant trapping region encountered by Explorer 33 satellite in outer magnetosphere
11 p1950 A69-25146

EXPLORER 35 SATELLITE

Explorer 33 and 35 satellites reliability achievement by design via AIMP program
03 p0519 A69-13232

Lunar magnetic moment and surface field, discussing Explorer 35 field measurements
03 p0514 A69-14005

Picogram dust particle flux in selenocentric space measurement by Lunar Explorer 35, showing enhancement during meteor showers
15 p2699 A69-31396

Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions 21 p3794 A69-38379

EXPLORER 38 SATELLITE

RAE satellite boom deployment to achieve gravity gradient capture 07 p1228 A69-18346

EXPLORER 40 SATELLITE

Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions [SAE PAPER 690202] 07 p1239 A69-18305

EXPLOSIONS

NT AERIAL EXPLOSIONS
NT CHEMICAL EXPLOSIONS
NT GAS EXPLOSIONS
NT NUCLEAR EXPLOSIONS
NT THERMONUCLEAR EXPLOSIONS
NT UNDERGROUND EXPLOSIONS

Centimeter radio wave reflections from explosion region produced by TNT and hexogen charge 02 p0282 A69-12415

Supercooled water drop frozen and observed to undergo explosive shattering and ejection of ice splinters 02 p0275 A69-12693

Medium heating by explosion in presence of allotropic changes and thermochemical reactions concerning temperature field determination 03 p0534 A69-14159

Explosive detonated in external electric field to obtain data on gas state behind shock wave 04 p0634 A69-14430

Deficiencies in two hazard classification system for detonating and fire producing materials from analysis of chemical industry accident fatality statistics 04 p0645 A69-14471

Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration 04 p0645 A69-14474

Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model 04 p0645 A69-14475

Structures response to explosive blast, discussing damage criterion in terms of blast wave impulse and critical time 04 p0671 A69-14476

Thermal explosion criterion used for explosion/ignition delay of exothermic material surrounding heated wires having good thermal conductivity [WSCI PAPER 68-23] 07 p1240 A69-18359

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters 09 p1611 A69-21352

Unsteady gas dynamics of explosions and detonation theory, noting applications to rocket propulsion systems performance 11 p1876 A69-25595

Holographic position and velocity measurement techniques for high speed objects from explosions 12 p2087 A69-26174

Physical and physiological hazards of cryogenic liquids, emphasizing fire and explosion problems associated with storage and handling 17 p3017 A69-33684

Gas dynamics of explosions - IAA Conference, Brussels, September 1967 19 p3448 A69-36351

Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations 19 p3450 A69-36356

Explosions mechanism in radio galaxies and quasars mechanism based on observed phenomena, emphasizing galactic flares 24 p4378 A69-42698

EXPLOSIVE DECOMPRESSION

Invertebrates resistance to explosive decompression and low end pressure, noting hypoxia and freezing as cause of death 07 p1059 A69-18537

EXPLOSIVE DEVICES

NT DETONATORS
NT INITIATORS [EXPLOSIVES]
NT PRIMERS [EXPLOSIVES]
NT SHAPED CHARGES

Explosive devices to sabotage aircraft in flight, discussing evidence of sabotage in aircraft wreckage and detection of explosives before loading 04 p0549 A69-14943

Pyrotechnic and explosive elements in space systems - Conference, Tarbes, France, July 1968 10 p1748 A69-23003

General and classical statistical techniques for cutting effectiveness and operational reliability of cutting fuses 10 p1749 A69-23004

Space vehicle explosive components, discussing identification, screening and final qualification of explosives and severe environment simulation methods 10 p1749 A69-23008

Explosive and pyrotechnical elements for Grillo 1, Grillo 2 and Trigone 1 hot water rockets, detailing nozzle closure and chemical reaction activation 10 p1753 A69-23028

Emergency escape and personnel recovery systems including F-111 explosive system, midair deployed buoyancy aerostat and fly-away flexible wing rotor 15 p2551 A69-30853

EXPLOSIVE FORMING

Time dependent tube wall radial displacement during explosive welding as function of distance from initial explosion 02 p0254 A69-12675

Explosive forming process to shape aircraft structural parts, advantages and potentials [ASM PAPER C7-2.4] 04 p0604 A69-14524

Explosive welding application to dissimilar metals and tube to tube plate welding, noting influence of detonation and sound bulk velocity 04 p0608 A69-15481

Air cushion effect on dimensional accuracy in explosive forming of metal sheet 06 p0930 A69-17001

Air cushion effect in explosive forming of metal sheets, considering simple geometrical shape 06 p0931 A69-17526

Metals structure and mechanical properties after hydroexplosive forming analyzed by X ray diffraction 09 p1503 A69-21851

Explosive forming, discussing optimum parameters for model and prototype parts and subscale forming criteria for aluminum ellipsoidal domes 09 p1512 A69-22371

Explosive fabrication of aircraft components including turbine engine exhaust components, door seals, etc [SAE PAPER 690316] 11 p1890 A69-24510

Fusion and solid state welding of steels, considering electron beam, HF resistance, friction and explosive welding 12 p2100 A69-25830

Explosive compacting of aluminum powder, describing operational and experimental techniques, compacts hardness and density, mass production feasibility, etc 16 p2793 A69-31790

Explosive forming theory and experience including explosives characteristics, dimensional relations, hold-down pressure, economics and applications 24 p4320 A69-43038

EXPLOSIVE GASES

U FLAMMABLE GASES

EXPLOSIVE WELDING

Explosive bonding technique, discussing choice of explosive and geometrical parameters to match material parameters [ASME PAPER 69-DE-47] 14 p2454 A69-28849

Explosives parameters effect on metal sheet velocity during explosive welding, considering load density and explosive force 18 p3149 A69-35279

Explosive welding principles, applications, materials limitations and advantages, stressing safeness and low cost 18 p3151 A69-35479

Tensile data and photomicrographs of explosively bonded metal matrix composites interfaces 24 p4326 A69-43452

EXPLOSIVES

NT CELLULOSE NITRATE

NT RDX

NT TETRYL

Megagauss magnetic field generation methods, discussing high explosives, initial field, flux compression, capacitor discharges and applications 01 p0115 A69-10049

Electrical explosive devices for space applications including explosive bolts, primers and igniters 01 p0141 A69-10544

Powders and explosives - Conference, Brussels, September 1966 02 p0301 A69-11519

Shock sensitivity of solid explosives and propellants, using calibrated gap testing techniques 02 p0302 A69-11520

Remotely controlled explosives processing facility for handling unfamiliar sensitive materials, noting safety aspects and inspection, testing, transporting and destroying techniques 02 p0226 A69-11521

Detonation wave structure in solid cylindrical shell explosive, noting attainment of steady state structure 02 p0349 A69-11526

Detonation generation in granular explosive subjected to different shock wave intensities due to variable impact velocity 02 p0349 A69-11527

Compatibility of inorganic azides with organic explosives from elevated temperature interactions using trinitrobenzene as model 02 p0304 A69-12499

Ultrahigh pressure test vessel for determining pressure vs burning rate characteristics of propellants and explosives 04 p0645 A69-14472

Explosives and propellants sensitivity to fragment impact, establishing threshold detonation velocity 04 p0645 A69-14473

Wedge shaped charge technique for evaluation of detonation hazards of liquid explosives 04 p0646 A69-14479

Explosive containment capsule for nuclear reactor irradiation 04 p0629 A69-14480

Liquid explosive testing from point of view of liquid mobility 04 p0646 A69-14481

Insensitive explosive trigger or initiator consisting of metal/metal oxide powder with low shock sensitivity and high thermal stability 04 p0646 A69-15300

Liquid phase radical oxidation with intermediate and end products in same phase, discussing products, hydroperoxidation and liquid systems explosiveness 06 p1032 A69-17425

Fragments and markings produced on aircraft aluminum by explosion as means of detecting sabotage in crashes 06 p0868 A69-17833

Explosive acrylic polymers properties and preparation methods, noting chemical reactions and structure 08 p1376 A69-21152

Aminotetrazole preparation to obtain tetrazole derivatives and explosive salts 10 p1651 A69-23013

Heat resistant DIPAM and HNS explosives in aerospace applications, considering mild detonating fuse and core loading 10 p1750 A69-23014

Igniferous materials for electrical initiation of explosive in extreme conditions, considering nitrophenol salts and pyrotechnics 10 p1750 A69-23015

Shock initiation and sensitivity of granular explosives, noting heterogeneity effect in ammonium perchlorate 10 p1751 A69-23016

Initiation of priming explosives by electrons, photons, electrical discharges and laser radiation 10 p1751 A69-23017

Combustion mechanism of condensed inflammable systems such as gunpowder and other explosives, discussing combustion stability 11 p2000 A69-25187

Soviet book on combustion, detonation and explosive energy of condensed systems covering stable/unstable processes 12 p2190 A69-26757

Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects 17 p3004 A69-32945

Irregular pressure profiles and pressure-time histories when using octofluorocyclobutane and sulfur hexafluoride in explosive driven shock tube [AIAA PAPER 68-730] 24 p4297 A69-43577

EXPONENTIAL FUNCTIONS

NT LOGARITHMS

Linear ordinary differential equations with exponential coefficients, giving solutions asymptotic behavior for large values of independent variable 01 p0103 A69-10231

Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation 01 p0104 A69-10265

Exponential distributions in Markov chain models for communication channels, considering error free runs of tropospheric systems
01 p0027 A69-10267

Divergent-convergent and convergent-divergent cascaded exponential lines, determining equivalent length of uniform transmission line
01 p0044 A69-10623

Exponential approximation with piecewise linear error criteria for continuous function over interval
01 p0107 A69-11415

First order linear differential equations having complementary solutions of exponential type to determine effective initial and boundary conditions
05 p0786 A69-15926

Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation
05 p0843 A69-16682

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship
07 p1235 A69-19384

Cumulative probability distribution of positive random variable from moment generating function, exemplifying exponential and Poisson functions
12 p2120 A69-25927

Negative exponential solution of matrix Riccati equation associated with linear optimal regulator and filter problems for time invariant plants
12 p2122 A69-26513

Linear difference equations with exponential coefficients for numerical methods of integrating differential equations
13 p2288 A69-27526

Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution
18 p3203 A69-35334

Partial prior information utilization via confidence intervals for mean time to failure of exponential reliability model
19 p3360 A69-36038

Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation
19 p3360 A69-36200

Drag minimization as extremization of products integrals powers, noting application to optimum wings and fuselages
19 p3242 A69-36800

Generalized limit theorem for reliability replacing Drenick exponential theorem
20 p3547 A69-37068

Table of definite and indefinite integrals of products of exponential integrals with elementary or transcendental functions
24 p4341 A69-43324

EXPONENTS
Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution
18 p3203 A69-35334

EXPOSURE
Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners
06 p0883 A69-17841

Hologram storing on photochromic film, obtaining equations for optimal exposure time
[IEEE PAPER F-1]
07 p1133 A69-19053

Electron beam exposure system to photoetch integrated circuit patterns without photomasks, using electronic computer for automatic pattern generation and registration
15 p2579 A69-31039

EXPRESSIONS [MATHEMATICS]
U FORMULAS [MATHEMATICS]

EXPULSION
Damped mass expulsion for space vehicle attitude control reducing propellant consumption and pulsing frequency
[AIAA PAPER 67-535]
09 p1610 A69-21986

Propellant orientation and expulsion methods in space vehicle tankage, discussing ullage rockets system, bladders and diaphragms, dielectrophoretic expulsion, etc
16 p2736 A69-31734

EXTENSIONS
Antisymmetric cross ply and angle ply laminated plates deflection under transverse loading with coupling between bending and middle-plane extension
07 p1231 A69-18711

EXTENSOMETERS
Four specimen vacuum device for simultaneous tensile creep tests at 1200 C, discussing linear and thermal expansion
07 p1116 A69-19318

Capacitance methods for measuring adhesives mechanical properties in thin film bonded joints, noting results for tension, compression and shear loading
09 p1500 A69-22309

Automatic recording inverted dilatometer employing fused quartz vertical pedestal and yoke type pushrod
15 p2607 A69-30153

High temperature capacitance strain gage development, discussing extensometer prototype systems
15 p2614 A69-31278

EXTERNAL COMBUSTION ENGINES
External burning ramjets in supersonic stream noting applications to drag reduction, lift-drag ratio and attitude control
11 p1941 A69-24261

EXTINCTION
Borrmann effect and abnormal transmission and extinction observed by reconstruction of images of holograms recorded in three dimensional photosensitive medium
09 p1494 A69-21492

Atmospheric extinction function in Chile by using photoelectric spectrum scans, observing neutral component, Rayleigh scattering and ozone absorption variations
10 p1777 A69-23386

Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
10 p1781 A69-23679

Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature
13 p2378 A69-28250

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions
13 p2379 A69-28456

Monograph on interstellar extinction computations covering theoretical curves for spherical metal and graphite particles, albedo, optical constants, normalization, temperature dependence, etc
14 p2516 A69-28901

Extinction efficiency of graphite core interstellar grains with solid hydrogen and ice mantles, using theoretical models
14 p2486 A69-29587

Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency
15 p2633 A69-30059

Positively charged diatomic hydrogen molecules interstellar extinction and photodissociation cross section in terms of formation mechanisms
24 p4375 A69-42610

EXTINGUISHERS
U FIRE EXTINGUISHERS

EXTINGUISHING
Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy
17 p3021 A69-33355

Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy
[ONERA-TP-722]
18 p3184 A69-34637

EXTRACTION
NT ION EXTRACTION

Organic compounds /mctabolites/ extracting technique from nutrient media of Chlorella cultures indicate unsaturated amine and phenol composition
08 p1262 A69-19833

Dispersion-strengthened alloys from extraction replicas, determining volume fraction and spacing of dispersed phase particles
13 p2282 A69-28167

Ti determination in presence of Nb or Ta by extraction-photometric method with diantipyryl methane and thiocyanate
20 p3544 A69-37812

EXTRAGALACTIC LIGHT
U EXTRATERRESTRIAL RADIATION
U LIGHT [VISIBLE RADIATION]

EXTRAPOLATION
Extrapolation and interpolation for data compression including polynomial concept
12 p2027 A69-25877

Extrapolation of aperiodic step responses
12 p2051 A69-26237

Technological forecasting by intuitive forecasts, consensus methods, analogy, trend extrapolation and structural models
13 p2382 A69-28040

Unlimited extrapolation into infinity to determine ranges of applicability of theories in relativistic cosmology noting paradoxes
14 p2516 A69-28867

Trajectory models accuracy beyond tracking intervals, studying roles of extrapolation and independent measurements number and accuracy
22 p4032 A69-41015

EXTRATERRESTRIAL ENVIRONMENTS
NT CHROMOSPHERE
NT CISLUNAR SPACE
NT DEEP SPACE
NT INTERPLANETARY SPACE
NT INTERSTELLAR SPACE
NT JUPITER ATMOSPHERE
NT LUNAR ATMOSPHERES
NT LUNAR ENVIRONMENT
NT MARS ATMOSPHERE
NT MARS ENVIRONMENT
NT PLANETARY ATMOSPHERES
NT PLANETARY ENVIRONMENTS
NT SOLAR ATMOSPHERE
NT SOLAR CORONA
NT STELLAR ATMOSPHERES
NT VENUS ATMOSPHERE

Extraterrestrial vestibular research, discussing human otolithic apparatus regulation subjected to change from geocentric to heliocentric orientation
[UN PAPER 68-95389]
01 p0014 A69-10508

Spacecraft sterilization techniques efficiency in terrestrial and extraterrestrial environments noting dry heat, radiation, ethylene oxide, isopropanol and formaldehyde in methanol
05 p0712 A69-15937

Space photography as sedimentological research tool demonstrated by space photographs application to projected Mars mission
09 p1490 A69-21797

Electronic equipment for data acquisition in extraterrestrial experiments including low noise charge amplifiers, discriminator, pulse lengthener, linear gate and logarithmic amplifier
16 p2759 A69-31857

Venusian atmospheric features obtained from Venus 5 and 6 and Mariner 5 observations, indicating extremely high temperatures and pressures
19 p3401 A69-35840

EXTRATERRESTRIAL LIFE
Soviet literature on extraterrestrial life and civilization emphasizing establishment of contact by radio and laser sources
01 p0016 A69-10953

Resistance of animal organisms and cells to extreme environmental conditions discussing exobiological implications for extraterrestrial life systems
01 p0017 A69-11083

Planetary quarantine and biological search strategy, discussing Voyager-Mars mission configuration, sterilization, back contamination and decisions
01 p0021 A69-11090

Soil, moisture and other requirements for microorganism survival in simulated Martian environment
01 p0018 A69-11091

Pedoscope use in soil microbiological studies including ecology, infection susceptibility, etc
01 p0021 A69-11092

Extraterrestrial life detection methods based on soil or atmospheric sampling, discussing enzyme activity, DNA determination, microbial growth, etc
01 p0021 A69-11093

Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
02 p0198 A69-11770

NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
02 p0200 A69-12804

Product assurance role in spacecraft sterilization to maintain planetary biological environments integrity in space programs for extraterrestrial life determination
03 p0379 A69-13400

Mars biological exploration, discussing life detection, chemical and biological experimental strategy
[AIAA PAPER 68-1122]
03 p0375 A69-13700

Life probability and origin on Milky Way planets with emphasis on solar system, discussing molecular biology role
05 p0707 A69-15966

Organic matter signals in carbonaceous meteorites, discussing possible relation to extraterrestrial life and origin
11 p1953 A69-24342

- Hypothesis for intelligent life existence in universe
13 p2353 A69-28435
- Integrated device to detect biological growth and catabolic and anabolic activity in extraterrestrial exploration
15 p2556 A69-31306
- Life detection for space missions based on detecting optical asymmetry in biogenic molecules by gas chromatography involving diastereomeric esters synthesis
15 p2556 A69-31315
- Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics
15 p2556 A69-31325
- Exobiology, Search for extraterrestrial life - AAS-AAAS Conference, New York, December 1967
17 p2907 A69-32967
- Solar system physical environments surveyed from exobiological viewpoint
17 p2907 A69-32968
- Experiments integrated into single automated laboratory to detect extraterrestrial life through measuring metabolism and growth in planetary surface material
17 p2912 A69-32969
- Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
17 p2912 A69-32970
- Interstellar communication in search for extraterrestrial intelligence, discussing radio objects, OH emission regions and pulsating stars
17 p3028 A69-32971
- Origin of microbial life on earth and implications for extraterrestrial forms
17 p2907 A69-32972
- Electron transport initiated by radiant energy absorption or by reducing suitable electron acceptor as source of energy for extraterrestrial life
17 p2908 A69-32973
- Earth ecosystem chemical composition compared with Mars and Venus ecosystems to determine presence of life
18 p3193 A69-34361
- Soviet book on cosmos and microorganism utilization for creating regenerative life support in spacecraft
20 p3467 A69-37230
- Probability of biological development leading to human life on another planet
21 p3652 A69-38786
- Sporopollenin content of Orgueil and Murray meteorites as evidence for extraterrestrial life
21 p3662 A69-39617
- Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites
22 p4008 A69-39889
- Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories
22 p3876 A69-40271
- Ecological foundations of Haldane metalaw and implications of interstellar golden rule, discussing social interaction with alien life forms
23 p4240 A69-41304
- Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
23 p4212 A69-41611
- Life on Mars, past and future missions, possibilities of metabolic system and analysis methods
23 p4212 A69-41612
- Spaceborne planetary UV spectroscopic search for atoms and molecules basic to life, specifically molecular N and water vapor photodissociation products
23 p4113 A69-41616
- Extraterrestrial optical microscopy, discussing experiment, telemetry, data interpretation and instrument characteristics concerning biological, cytochemical and petrographic microscopes
23 p4164 A69-41621
- Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection
23 p4213 A69-41622
- Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
23 p4213 A69-41623
- Human habitation conditions on moon from viewpoint of solar and lunar radiation, vacuum and gravitation effects including solar energy utilization
23 p4111 A69-42213

EXTRATERRESTRIAL MATTER

- NT COSMIC GASES
NT COSMIC PLASMA
NT INTERPLANETARY GAS
NT INTERSTELLAR GAS
- Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis
[UN PAPER 68-95381] 01 p0150 A69-10480
- Methods and conclusions for rate of influx to earth of extraterrestrial material
03 p0511 A69-13467
- Satellite data for reevaluating extraterrestrial particles origin found in polar ice, atmosphere and terrestrial surface collections
04 p0654 A69-14655
- Galaxies classified by matter content of nucleus, discussing evolution
11 p1953 A69-24351
- Black magnetite spherules electromagnetically separated from residue of Permian rock salt, determining content and properties of extraterrestrial material
12 p2154 A69-25821
- Spiral galaxies rotation curve fluctuations attributed to kinematic properties of galactic matter and gas components
12 p2170 A69-27062
- Earth contamination by returned lunar or Martian material, discussing extraterrestrial biota survival on earth
13 p2210 A69-28467
- Noctilucent clouds total or partial extraterrestrial origin, deriving minimum particulate influx from satellite and rocket data
21 p3702 A69-38347
- Universe evolution from hot initial state, discussing element synthesis, quanta, radiation particles, etc
21 p3795 A69-38401
- Extraterrestrial matter - Conference, Argonne, Illinois, March 1968
22 p4011 A69-40083
- Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin
22 p4012 A69-40086
- Lunar regolith from Surveyor Program pictorial data of lunar maria
22 p4012 A69-40087
- Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition
22 p4014 A69-40147
- EXTRATERRESTRIAL RADIATION
NT COSMIC NOISE
NT GALACTIC RADIATION
NT GALACTIC RADIO WAVES
NT GEGENSCHLEIN
NT INTERSTELLAR RADIATION
NT LUNAR RADIATION

NT TYPE 4 BURSTS
NT TYPE 5 BURSTS
NT ZODIACAL LIGHT
- Space X ray background measurements, considering relativistic electrons Compton emission and metagalactic gas bremsstrahlung as possible sources
01 p0147 A69-11310
- Cosmic rays properties and sources, considering origin in supernovae, galaxies, quasars and unknown sources
02 p0308 A69-12158
- Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
03 p0506 A69-13083
- Space radiation biology - NASA Conference, Berkeley, September 1965
03 p0370 A69-13476
- Extraterrestrial background gamma radiation /0.3-2 Mev/ observations used to derive upper limits for

cosmic ray protons and CNO nuclei in interstellar space

03 p0501 A69-13934

Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment

05 p0742 A69-15992

Intergalactic continuum study showing universe behavior like black body with 2.7 K radiation temperature, noting cosmological and cosmogonic importance

05 p0827 A69-16593

Nuclear and space radiation effects - IEEE Conference, University of Montana, July 1968

06 p0973 A69-1686

X ray astronomy use for probing hot regions of outer space and high energy electrons

06 p0991 A69-17307

Space radiation effect on spacecraft components and materials simulated by proton and fast electron bombardment of silicon, glass and skin materials

06 p0906 A69-17612

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field [AIAA PAPER 69-18]

06 p0997 A69-18129

Discrete extragalactic X ray sources model for explanation of diffuse X ray background, noting evolutionary aspects

07 p1206 A69-19255

Compton scattering of microwave radiation on cosmic ray electrons proposed as mechanism generating 100 Mev cosmic gamma rays

09 p1580 A69-22295

Celestial X ray source positions from rotating modulation collimator, predicting performance of collimator

10 p1722 A69-23328

Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications

11 p1946 A69-24466

Calculation of radiation doses in space - Conference, Toulouse, France, February 1968

11 p1947 A69-24854

Space radiation phenomena, discussing auroral precipitations and characteristics and solar flare particle ejection

11 p1948 A69-24859

Extragalactic radio sources parameters analyzed for distinguishing quasars from dominant luminous radio galaxies by radio spectra

13 p2348 A69-27801

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters

14 p2515 A69-28765

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

14 p2446 A69-29047

Extragalactic research to solve problems in cosmological and cosmogonic theory, including relativistic cosmology and observations

15 p2681 A69-30436

Energy transfer during fast electrons and photons interactions, indicating Compton energy losses related to space X ray and gamma radiation sources

15 p2676 A69-30953

Extraterrestrial X ray galactic and extragalactic sources research fields, emphasizing identification with optical objects

15 p2696 A69-31213

Metagalactic electrons inverse Compton effect on relic radiation to interpret cosmic isotropic X radiation entire energy spectrum

16 p2847 A69-31800

600 Mev proton synchrocyclotron at Space Radiation Effects Laboratory for space radiation environment simulation, discussing beam energy spread

16 p2814 A69-32201

Corrections to previous papers on extragalactic gamma rays, discussing effects on various cosmological models

17 p3025 A69-34168

Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time

18 p3188 A69-35006

Instruments for gamma ray astronomy including Ranger low energy detector, howitzer detector and cosmic spark chamber

18 p3138 A69-35135

Radio and radar astronomy with reference to extragalactic sources and solar system, noting astronomical instrumentation
19 p3425 A69-36430

Linear and circular integrated polarization of extragalactic radio sources measured by two element interferometer at Owens Valley Radio Observatory
20 p3610 A69-38139

Soft x ray extragalactic background flux measurements, considering correction for absorption by interstellar medium
21 p3788 A69-38541

Particles integral and differential fluxes spectral distribution calculation for determining radiation load for synchronous satellite
22 p4035 A69-39909

Extragalactic universe major constituents and physical properties of normal, radio and compact galaxies, discussing missing matter existence
23 p4217 A69-42317

High energy astronomical diffuse radiation component properties tabulated, discussing power law and thermal X ray background, gamma rays, etc
23 p4207 A69-42319

EXTRATERRESTRIAL RADIO WAVES

NT COSMIC NOISE

NT GALACTIC RADIO WAVES

NT RADIO BURSTS

NT SOLAR RADIO BURSTS

NT SOLAR RADIO EMISSION

NT TYPE 2 BURSTS

NT TYPE 3 BURSTS

NT TYPE 4 BURSTS

NT TYPE 5 BURSTS

Radiation due to collective effects in plasma physical aspects of astrophysics, discussing synchrotron radiation and bremsstrahlung
02 p0310 A69-12792

Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz
03 p0500 A69-13080

Linear polarization of cosmic radio emission, discussing original measurement method and revised version based on discrimination of useful signal
03 p0501 A69-13705

F cosine i theorem validity for VLF radio wave absorption in ionosphere tested using exponential electron density models, noting Brewster angle influence on reflection coefficient
13 p2222 A69-28473

Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz
14 p2509 A69-28762

Sky cosmic radio emission absolute temperature measured at decimeter wavelengths and at two zenith angles to minimize atmospheric influence
15 p2687 A69-30544

Interstellar radio absorption influence on spatial distribution of cosmic radio emission observations with fixed multiple dipole antenna arrays
15 p2687 A69-30545

EXTRATERRESTRIAL RESOURCES

1967 space Treaty Article 11, discussing provisions concerning private exploitation and supernational body authority
20 p3635 A69-37107

Multiple use doctrines in space law for resource utilization, discussing formation of planning commissions and licensing agencies
20 p3639 A69-37133

Planetary resources control and use from legal and policy standpoints, discussing space treaty effects on international law
20 p3639 A69-37134

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis
23 p4146 A69-41620

Manned facilities design, construction and maintenance on extraterrestrial bodies, discussing astrophysical and lunar surface data requirements [AAS PAPER 69-208]
24 p4296 A69-42875

EXTRAVEHICULAR ACTIVITY

Soviet book on human movements coordination during space flight covering space walks, lunar surface photographs, space docking, weightlessness, etc
01 p0018 A69-11180

Prolonged decompression stress effects on humans in simulated orbital flight or extravehicular activity, investigating endocrine-metabolic disturbance by urinalysis
01 p0022 A69-11336

Voskhod 1 and 2 crew performance, orientation and motor activity analysis indicating time increment for task performance, psychophysiological irregularities and visual analysors impaired functioning
02 p0203 A69-12123

Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility
03 p0379 A69-12993

Portable astronaut life support systems for extravehicular activities [AICHE PAPER 42C]
04 p0554 A69-14511

Soviet astronaut experiences and visual impressions during space walk outside Voskhod 2, noting dominance of optical analyzer in space perception and orientation [UN PAPER 68-95717]
06 p1000 A69-17049

Astronaut extravehicular protection systems, discussing space suit, life support and thermal control subsystems and micrometeoroid protection
06 p0882 A69-17643

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept [AIAA-PAPER-69-366]
13 p2213 A69-28298

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential
15 p2696 A69-31064

Physiological effects on men of 10 hour exposure to nitrogen-oxygen mixture followed by pure oxygen 4 hour exposure, simulating conditions during EVA
17 p2912 A69-32940

Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions [AIAA PAPER 69-617]
17 p2914 A69-33278

Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems [AIAA PAPER 69-620]
17 p2914 A69-33303

Space docking, personnel placement on space stations, rescue stations, etc
18 p3196 A69-34630

Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk
19 p3427 A69-36618

Mathematical model of astronaut motion and spacecraft angular control during tethered reentry, discussing conditions preventing spinning and collisions
21 p3667 A69-39630

Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator [AIAA PAPER 69-992]
22 p3893 A69-40370

Apollo Extravehicular Communication Telemetry System for monitoring astronaut portable life support system, space suit performance and body functions on lunar surface
23 p4121 A69-41767

Orbital EVA, discussing technology associated with Apollo Applications Program [AAS PAPER 69-517]
24 p4272 A69-42841

Two degrees of freedom control moment gyro for astronaut attitude control during EVA, discussing muscle-controlled shoe-mounted stilts and precessional feedback forces [AAS PAPER 69-472]
24 p4272 A69-42846

EVA/IVA fluid umbilical improved stowability and flexibility, discussing cross section development and tests [AAS PAPER 69-470]
24 p4272 A69-42847

Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator [AAS PAPER 69-516]
24 p4272 A69-42850

EXTREMA

U RANGE [EXTREMES]

EXTREMELY HIGH FREQUENCIES

Digital transmission at 35 GHz, noting atmospheric and rainfall effect on terrestrial millimeter wave propagation
03 p0389 A69-13192

CW klystron amplifiers design limitations at Ku and Ka bands, discussing operation characteristics
03 p0405 A69-13724

Temperature dependence of conversion coefficients and sensitivity of n-type InSb detectors in millimeter and submillimeter ranges
07 p1199 A69-18683

High CW power K-band Gunn oscillators attained through control over doping level, profile and GaAs epitaxial layer thickness
12 p2036 A69-25907

Broadband plasma waveguide switch application extended to 26-40 GHz range, discussing isolation, cold loss, switching time, trigger signal and ionized plasma
12 p2036 A69-25938

Zenith atmospheric attenuation in 183-325 GHz region measured by wideband Ge bolometer detector and spectral convolution technique
23 p4115 A69-41586

EXTREMELY LOW RADIO FREQUENCIES

ELF radio wave propagation characteristics using two layered ionospheric model, noting deeper penetration than VLF
03 p0421 A69-13326

Ionospheric LF radio noise cut-off near proton gyrofrequency, discussing satellite ELF and VLF observations
03 p0399 A69-14021

ELF radio waves reflection coefficients calculated from two layer ionospheric model, noting ion collision frequency effect in Schumann resonance frequency band
07 p1124 A69-18820

Magnetospheric ELF noise, discussing OGO 3 spectrum analysis
07 p1124 A69-18834

Scanning Fabry-Perot interferometer with ultralow modulation frequencies, obtaining inverse piezoelectric effect curves of ceramic element
15 p2611 A69-31107

Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum
17 p2928 A69-33865

ELF wave propagation in earth-ionosphere waveguide, considering ionospheric vertical inhomogeneity and models for ambient and disturbed /PCA/ conditions
18 p3101 A69-34949

ELF radio wave propagation characteristics analyzed by two layer ionosphere model
20 p3488 A69-37285

ELF atmospheric propagation, determining slow tail atmospheric group velocity, relating characteristics to spectral characteristics of lightning
23 p4114 A69-41362

EXTREMUM VALUES

NT LIMITS [MATHEMATICS]

NT MINIMA

Book on variational methods in optimum control theory covering necessary and sufficient conditions for extremum and functional constraints
01 p0053 A69-11107

Boundedness theorem for all solutions of class of nonlinear second order differential equations
02 p0271 A69-11549

Extremum problems from functional-analytic point of view, discussing methods of solving and convergence conditions
03 p0456 A69-13403

Ionospheric beam deflection maximum and minimum levels, deriving equations for maximum usable frequency at given ionization conditions and radiation angles
03 p0424 A69-13540

Upper bound for free energy of nonlocal superconductor in magnetic field, using variational method and perturbation theory
03 p0491 A69-13971

First-kind operator equation solution by reduction to dual extremum problem, proving existence and convergence
04 p0622 A69-14622

Optimum control problems solved numerically on computer, noting multivalence of extremal solutions and application to orbital transfer in central gravitational field
06 p0903 A69-17539

Bounds on scattering lengths, phase shifts and other scattering parameters determining cross sections, noting variational bounds for zero incident energy
07 p1186 A69-19657

Optimizer for shaping control signal of hunting type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation
07 p1115 A69-19757

Infinite tree code ensemble upper bound on moments derived for sequential decoding governed by Fano algorithm
09 p1471 A69-21318

Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances

09 p1595 A69-21937

Minimal distance of image boundary from origin and second coefficient of univalent function in unit disk

10 p1718 A69-22860

General extremality for optimal controls with restricted phase coordinates and with unorthodox criterion function, discussing hypotheses for deriving necessary conditions

10 p1721 A69-23864

Extremal controlled plants identification by Chebyshev orthogonal polynomials, comparing results with regression analysis

11 p1861 A69-25713

Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances

13 p2361 A69-27438

Sinusoidal perturbation extremal control system stability, using harmonic balance principle to obtain periodic solutions of system differential equations

15 p2582 A69-30616

Singular and sliding modes/unique extremals/ in calculus of variations for optimal control problems with nonlinear equations and linear control

16 p2764 A69-31629

Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems

17 p2993 A69-32831

Robust detection of binary signal in additive noise, using extreme value theory /EVT/ to estimate probability density function and system error and threshold

17 p2944 A69-33624

Drag minimization as extremization of products integrals powers, noting application to optimum wings and fuselages

19 p3242 A69-36800

Discrete extremum problems solution convergence to optimal control continuous problem as functional optimal value and optimal control

21 p3684 A69-38430

Euler equation in variational problems for optimized process described by ordinary differential equations, deriving final extremal relationship

21 p3829 A69-39825

Monotonic minimization algorithm for nonsmooth extremal problems of mathematical programming, game theory, approximations and optimal control in arbitrary Banach space

23 p4181 A69-51524

Deceleration parameter lower and upper limits for zero pressure big bang cosmological Friedmann models imposed by density parameter, Hubble constant and universe age

23 p4219 A69-42373

Extreme value statistics used to determine minimum acceptable tensile strength of wire command links in TOW antitank missiles

24 p4318 A69-42642

EXTRUDING

Hydroextrusion effect on Mo structure and mechanical properties, noting improved ductility after high temperature annealing

02 p0267 A69-12189

Extrusion processes used for aluminum, magnesium and titanium extrusions, presenting die configurations

04 p0604 A69-14526

Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructure changes

12 p2116 A69-26912

Moire and gridwork methods of plastic strain analysis with application to plane strain and axisymmetric extrusion

13 p2359 A69-27256

Hydrostatic tube extrusion, discussing equipment, techniques and commercial applications

[SAE PAPER 690319] 15 p2617 A69-30093

Hot extrusion process for steel and various metals in U.S. semifinished product industry, considering lubrication problems, research centers and development

15 p2618 A69-30228

Hydroextrusion influence on mechanical properties of powder compacts of sintered Mo rods

16 p2803 A69-32491

Disk type or elastic melt extruders development based on Weissenberg effect permitting near uniform extrusion

18 p3148 A69-34612

Hydraulically extruded Mo properties after annealing, showing reduction in stability and hardness and varying nature of change in plasticity

18 p3156 A69-34719

Wide panel Ti structural extrusions with integral stiffeners, discussing material, sizes, properties and tolerances

19 p3319 A69-35552

Processing variables influence on microstructure of extruded Ti-Al-Sn alloy, noting deformation by slip over temperature range

20 p3557 A69-36955

Extrusion variables influence on microstructure and hardness level of Ti-Al-Sn compared with recrystallization behavior after cold swaging

[ASM PAPER W9-8.2] 21 p3729 A69-38660

Optimal conditions for extrusion compacting of hard alloy mixtures plasticized with paraffin, determining plasticizer content, upsetting, pressure and temperature

22 p3956 A69-40635

Ti alloy aircraft components and equipment production, considering roles of temperature, deformation rate and thermal conductivity in drop forging and extrusion processes

[DGLR-69-003] 23 p4170 A69-42162

EYE [ANATOMY]

NT CHOROID MEMBRANES

NT CORNEA

NT FOVEA

NT OCULOMOTOR NERVES

NT RETINA

Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers

07 p1070 A69-18383

Oculomotor muscular tonus of rabbit during rocket flight acceleration and weightlessness

07 p1062 A69-18590

Classical and differential eyelid conditioning for truth or falsity of visually presented verbal statements

07 p1064 A69-18632

Clinicomorphological changes in rabbit eyes vascular system by exposing transverse accelerations

08 p1262 A69-19832

Pulsed and CW microwave power effects on rabbit eyes, noting lens opacities produced

10 p1648 A69-23185

Ocular injuries during bailout from Vampire aircraft, noting hemorrhages

10 p1649 A69-23380

Photography role in experimental research with applications to flight analysis and comparison with human visual accuracy

11 p1881 A69-24573

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis

11 p1830 A69-24843

Circadian rhythm of optic nerve impulses in isolated eye of sea hare *Aplysia californica* in total darkness

14 p2406 A69-28870

Darkness adaptation, observing relationship between left and right eye

16 p2745 A69-32448

Valsalva maneuver produced abrupt onset of ptosis and proptosis caused by ethmoidal air cell rupture, discussing etiologies

17 p2909 A69-33186

Damage thresholds to ocular tissues from laser radiation, presenting comparative theoretical curves and recommended safe working levels

18 p3097 A69-34312

Eye elemental response to individual frequency jumps in oscillations of light, noting transient effect polarity

21 p3650 A69-38320

Cytoplasmic and ciliary connections between inner and outer segments of mammalian visual receptors

22 p3881 A69-40857

Eye optical system spherical aberration measured by knife-edge method derived from Foucault test, investigating retinal image quality

22 p3882 A69-40873

Blue cone mechanism contribution to mesopic function in producing Purkinje shift with luminance decrease, measuring sensitivity by flicker technique

22 p3883 A69-40880

Human eye modulation transfer function in reflected light by analyzing depolarized and polarized components emerging from eye

22 p3884 A69-40888

Liquid filled adjustable optical analog of human eye for aligning, calibrating and systems testing of automatic IR optometers

22 p3888 A69-41231

Pigeon visual adaptation to flickering light, attributing ERG b-wave postadaptation rebound to retinal bipolar cells inhibition

23 p4084 A69-41465

Senior commercial jet pilots ability to visualize flight instruments

23 p4089 A69-41822

Rod signals elicited by flashes in human eye measured, deriving relation between nerve signal size and rods and flashes energy

23 p4099 A69-42119

EYE DISEASES

NT ASTIGMATISM

NT CATARACTS

NT GLAUCOMA

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems

23 p4111 A69-42216

EYE EXAMINATIONS

Pilots myopia incidence statistical study after initial medical examination, emphasizing skiagram value in prognosis

24 p4267 A69-43400

EYE MOVEMENTS

Cerebral cortical neurons response to visual stimuli during stationary and rapid eye movement

03 p0369 A69-13360

Ocular motor failures in pilots due to convergent and divergent strabismus, discussing low pressure chamber tests and blood pressure effects on cranial nerve

03 p0370 A69-13470

Oculomotor activity of cosmonauts during orbital flight, analyzing electrooculograms taken during vestibular tests

07 p1063 A69-18594

Classical and differential conditioning of eyelid response with correctness of solutions of arithmetic problems as discriminandum

07 p1064 A69-18637

Small eye movements measurement and retinal image stabilization based on tracking edge of blood vessel in optic disk

09 p1446 A69-21908

Electrooculographic method to study eye movements control system for fixation on stationary point of following discretely or continuously moving target

09 p1447 A69-22675

Coriolis effect in rotating spacecraft simulation, discussing optokinetic reflex responses as function of head turning angle with spin axis

14 p2409 A69-29300

Stiles-Crawford effect measurements before and following eye movements to determine retina shearing during eye movements

15 p2555 A69-31035

Apparent movement in peripheral vision induced by sequential flashing of spatially unresolved two dots, studying dynamics of illusion

16 p2746 A69-31556

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature

17 p2906 A69-32934

Cortical auditory-evoked response during eye movement in cats, discussing relation to central mechanism

17 p2911 A69-34171

Phase and tonic activity of oculomotor apparatus of rabbits during vestibular reflexes and postrotational nystagmus

20 p3469 A69-37243

Multilevel mathematical model of oculomotor apparatus using neuron networks and complex activators, including computer analysis

20 p3470 A69-37245

Single flash and rhythmic light stimuli effect on nystagmus of patients with tumoral posterior cranial fossa, recorded electroencephalographically

20 p3470 A69-37250

Threshold variations in caloric nystagmus in pigeons subjected to accelerations in head to tail direction in centrifuge at various temperatures

20 p3471 A69-37252

Otolith apparatus functioning under weightlessness and accelerations in test stand experiments, discussing measuring techniques and nystagmic reaction durations

20 p3471 A69-37253

Combined angular and centrifugal acceleration effects on human and animal eyes motion studied to explain weightlessness effects on humans

20 p3471 A69-37257

Nystagmus reactions in rabbits subjected to rotating vestibular tests, noting decrease following previous adaptation to stimulus

20 p3473 A69-37267

Rapid component of nystagmus using photostagmography, noting dependence on afferent pulse of ampullar apparatus

20 p3481 A69-37272

Electronystagmographic method of eye movement recording, noting applications to vestibular and visual analysis and study of oculomotor nuclei-vegetative centers relations

20 p3481 A69-37273

Isometric tensions of detached lateral rectus muscles measured during strabismus surgery for mechanical components of human eye movements, giving muscle tone range

22 p3872 A69-40200

Target distance and direction monocular estimates with stabilized and nonstabilized retinal images, finding eye movements not improving spatial judgment accuracy

22 p3878 A69-40838

Visual suppression association with smooth following and saccadic eye movements in tracking slow moving target

22 p3879 A69-40842

Horizontal tracking eye movements response to unpredictable constant velocity target motions with or without saccadic position corrections recorded by contact lens optical lever

22 p3881 A69-40856

Visual stimuli initiating horizontal eye vergence movement in human subjects, noting cerebral conditions for convergence

22 p3881 A69-40859

Angular velocity of visual stimulus effect on human torsional eye movements using sectorized disks

22 p3883 A69-40874

Eye movement control mechanisms during binocular fixation used to determine corrective roles of flicks and drifts

22 p3883 A69-40876

EEG alpha activity relationship to laterality of reflective eye movements, indicating physiological correlates of hypnotizability

22 p3887 A69-41213

EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter

23 p4093 A69-42063

Retinal eccentricity effects on horizontal-vertical illusion magnitude, considering eye flattening and astigmatic properties

24 p4263 A69-43117

Lambda waves EEG recording for evaluating eye movements during pattern vision

24 p4268 A69-43401

EYE PROTECTION

Laser radiation hazards due to direct or reflected viewing determined by evaluating output characteristics and environmental factors effects

02 p0204 A69-12497

Laser radar eye hazard for fixed and variable transmitter intensities, considering eye damage magnitude and successful detection magnitude of transmitter intensity

11 p1830 A69-24845

Photochromic panel for flash blindness protection using epoxy plastic plates containing aromatic hydrocarbon compounds excited to triplet states

21 p3668 A69-39783

EYRING THEORY

Failure distribution functions based on Eyring component aging model, including failure probability density function for Weibull and gamma type distributions

08 p1322 A69-21104

F

F CENTERS

U COLOR CENTERS

F REGION

Enhanced 6300 angstrom emission from F region auroral latitudes in terms of reaction between oxygen ions and atoms

01 p0062 A69-10137

Ionospheric irregularities height measurement using spaced receivers for recording satellite signals

01 p0064 A69-10428

Latitudinal variations in auroral and subauroral region F layer diurnal and magnetic storm pattern shown by scintillation measurements

01 p0069 A69-11127

Unusual stratification of F region during solar activities, noting role of traveling inhomogeneities

02 p0237 A69-11663

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values

02 p0239 A69-11682

Algorithm for N/h ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence

02 p0239 A69-11687

Tropical night F layer maintenance mechanism, noting airglow enhancement and ionization source association with plasma drifts

02 p0242 A69-11825

Fading characteristics of radio waves reflected from two different heights in F region over Ahmedabad, India

03 p0385 A69-12915

Latitude variation of time of occurrence of maximum F height and maximum spread F probability

03 p0420 A69-13305

F layer disturbance showing pronounced difference in corpuscular flux effect on day and nighttime ionosphere

03 p0512 A69-13517

Radio waves diffusive and oblique reflections from F region, noting diffusive properties decrease during magnetic storms, especially during maximum solar activity

03 p0423 A69-13529

Electron concentration profile change in ionospheric F region in auroral zone during negative magnetic bay disturbances

03 p0423 A69-13530

Nighttime sporadic E layer occurrence due to ionization redistribution established, noting concurrent F region electron concentration decrease

03 p0423 A69-13536

Electron production and loss rates in F region from measurements of Faraday rotation imposed on VHF telemetry transmissions from geostationary satellite

03 p0503 A69-14016

Nighttime variations of F region electron density profiles at Puerto Rico, discussing seasonal and solar cycle variations in temperature and vertical drift velocity

03 p0503 A69-14017

Mechanism for noon electron concentration maximum in F region at midlatitudes found to be recombination process

05 p0753 A69-16031

Gravity waves observed by ionospheric temperature measurements in F region

05 p0754 A69-16262

Diurnal variations of neutral and charged particle temperatures in equatorial F region

05 p0755 A69-16270

Internal atmospheric gravity waves in F region observed with electron density profiles deduced from vertical incidence ionograms, obtaining phase velocities

05 p0756 A69-16402

F region seasonal and magnetic storm behavior from region daily behavior showing global upper atmospheric circulation

05 p0757 A69-16404

F region equatorial irregularity belt observed from satellite transmission scintillation, noting north-south elongated patches

05 p0758 A69-16418

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate

06 p0919 A69-17724

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave

09 p1484 A69-21528

Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients

09 p1485 A69-21529

Aeronomic parameters effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters

09 p1486 A69-21546

F region response to solar proton flare characterized by two phase ionospheric storm as measured at ground

base stations

10 p1684 A69-23783

Incoherent scatter measurements of F region electron concentrations at solar activity minimum

10 p1684 A69-23825

Ground wave propagation attainment of electron plasma resonance of F region, stressing need of wave vector orientation toward magnetic north

10 p1684 A69-23828

Thomson scatter bistatic sounder data on ionization transports in F region, describing diurnal variations by hourly values of velocities

10 p1685 A69-23830

Nonlinear charge exchange and dissociative recombination effects on night F region decay compared with linear theory

10 p1685 A69-23832

Nighttime ionospheric recombination studies by model reference heights varying diurnally, seasonally and with solar flux and geographic location

10 p1685 A69-23834

Ionospheric slopes and range frequency characteristics obtained from oblique incidence sounding of horizontally nonuniform ionosphere

10 p1686 A69-23914

Hourly N/h profiles of F region calculated from ionograms by normal integral method during magnetic disturbance, measuring region temperature

10 p1687 A69-23928

Nighttime maxima anomaly in electron concentration of ionospheric F layer at midlatitudes, considering diffusion and recombination

12 p2064 A69-26007

Theories for universal time controlled polar F region reevaluated in light of satellite low energy charged particle observations

12 p2065 A69-26103

Autocorrelation and cross correlation analysis of rapid density variations in F region determined from satellite deceleration and geomagnetic data

12 p2069 A69-26436

Vertical ionization drift in F region as function of electron density, ionization coefficient and recombination coefficient

12 p2070 A69-26584

Neutral gas motions causing plasma motions in F region, obtaining vertical plasma velocity component pronounced diurnal variations

12 p2070 A69-26684

Vertical drift velocity of ionospheric F region during eclipse and on control day based on chemical reaction coefficients models, discussing electron density distribution

12 p2077 A69-27109

Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts

13 p2254 A69-28333

Unusual stratification of F region during solar activities, noting role of traveling inhomogeneities

13 p2256 A69-28694

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values

13 p2257 A69-28713

Algorithm for N/h ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence

13 p2258 A69-28718

Ion drag effects on acoustic gravity waves propagation in isothermal F region, discussing indicated wave damping

14 p2434 A69-28944

Vertical motion of ionized formations in ionospheric F region related to sporadic E layer

14 p2437 A69-29074

Zonal drift influence on morning ionization anomaly in F region, noting shifts to West with increasing height and electron production rate

14 p2442 A69-29732

RF mass spectrometric measurements of diurnal variation of thermosphere and ionospheric E and F regions composition, noting oxygen concentration

15 p2601 A69-31371

Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium

16 p2848 A69-31975

Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm

F 1 REGION

behavior

16 p2775 A69-32083

Ion-neutral air motion in F region under time dependent electric and constant magnetic field effect, using partial differential equations

16 p2777 A69-32181

Horizontal magnetic variation peak at eight degree dip latitude, noting F region contribution to magnetic tubes of force integrated transverse conductance

16 p2778 A69-32189

Correlation between F region electrons vertical motion velocity variations and E region electrons horizontal motions in equatorial ionosphere

16 p2779 A69-32193

F 2 critical frequency data at Hawaii for clarifying total electron content data obtained by geostationary satellite measurement of Faraday signal rotation

16 p2779 A69-32196

Electronic collision frequency measurement at F layer peak near ground sunrise time

16 p2779 A69-32197

Ionization density, velocity and temperatures oscillations revealed by Thomson scatter observations of gravity waves in F regions

16 p2779 A69-32198

Pressure gradients and moving ions driven neutral-air winds in F region, using asymmetric pressure model

16 p2779 A69-32302

Atomic oxygen density role in ionospheric E and F region magnetic stability, noting heat loss effect of atomic excitation

16 p2780 A69-32314

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave

16 p2783 A69-32523

Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients

16 p2783 A69-32524

Aeronomical parameter effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters

16 p2783 A69-32541

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects

16 p2784 A69-32613

F region stratification during solar minimum and maximum, discussing regularities of plasma frequencies and diurnal variations

17 p2959 A69-33005

Annual variations of postsunset altitude peak of equatorial F region noting correlation with solar activity

17 p2966 A69-33983

F region during earth passage through solar corpuscular stream, analyzing critical frequencies, virtual height, magnetogram H component and ionospheric storm effects attributed to downward drift

17 p2967 A69-33989

Reflection and ionization heights diurnal variations in F region, obtaining data for sporadic E formation

17 p2968 A69-33995

Vertical ionization displacements in F region as trace distortions on ionograms observed at low, mid and high altitudes during daytime

17 p2969 A69-33998

Space diversity reception and diurnal variations of F region ionospheric motions, comparing IQSY program

17 p2969 A69-33999

Vertical ionospheric perturbations shown responsible for Z component in F region

17 p2969 A69-34000

Radio echo from south showing origin from irregularities in F but not E region, discussing propagation modes for particular record

18 p3125 A69-34252

Reexamination of polar F region electron density diurnal variation data contradicting King-Kohl theory of rotating neutral winds role

18 p3125 A69-34255

Anomaly of F region electron content vs polar geographic latitude and local mean time

18 p3126 A69-34257

Radiative recombination of atomic oxygen ions in nighttime F region UV radiation detected by polar-orbitingOGO 4 satellite

18 p3129 A69-34957

Field aligned ionospheric F layer ion density irregularities, using simultaneous hourly radar echo and spread F data and detailed ray path calculations

18 p3129 A69-34958

Ionospheric radio propagation, considering D and F region theory and ionospheric disturbances

19 p3303 A69-36428

Wind velocity components calculation at F-sphere maximum level, taking into account electrodynamic drift of ionospheric plasma and ion motion

20 p3519 A69-36972

F region electron and ion concentration vertical distribution, discussing various ionization reactions

20 p3520 A69-37030

Nighttime ionospheric F region velocity component and recombination coefficient computer calculation

20 p3521 A69-37049

F zero layer occurrence relation to solar, magnetic and ionospheric activity levels variations from Ashkhabad observations/1958-1964/

20 p3527 A69-37671

Vertically moving disturbances relationship to behavior of E and F layers over Tiflis, noting sporadic E layers formation

20 p3528 A69-37685

F layer penetration frequencies predictions compared with Alouette topside data

20 p3530 A69-37871

Alouette topside ionograms of ionospheric storms at midlatitudes indicating critical frequencies difference between F 1 and F 2 layers

20 p3532 A69-37894

Equilibrium velocity distributions of F region photoelectrons produced by solar ionizing radiation, discussing dayglow as impact result

20 p3591 A69-38061

Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations

20 p3534 A69-38093

F region vertical density profiles for positive ions and neutral molecules of various gases determined from rocket-borne mass spectrometer data

21 p3702 A69-38354

F region atmospheric density measurements obtained from aerodynamic drag on San Marco 2 satellite in equatorial orbit, comparing data with San Marco 1

21 p3704 A69-38369

Ionosphere characteristics in terms of airglow, describing daytime F/D layers formation model provided by photoionization, loss processes and ambipolar diffusion

21 p3712 A69-38517

Nocturnal electron/ion density balance in F region ionosphere from examining 6300 A emission

21 p3712 A69-38518

Nighttime F region nonlinear recombination and variable drift effects, suggesting empirical model

21 p3715 A69-38559

Midlatitude F region continuity equation solutions, including east-west electric field effects on electron density

22 p3941 A69-40917

Lunar semimonthly variations in noon values of F region absorption at Singapore, noting opposite phases of lunar tides in D and F regions

22 p4035 A69-41211

F region dynamic model, including variations in temperature, electron and molecular ion concentrations, etc

23 p4156 A69-41843

Nighttime F region time-altitude variations in aeronomical parameters calculated under conditions close to solar activity maximum

23 p4156 A69-41844

VHF radio propagation over transequatorial circuit related to equatorial anomaly in F layer, suggesting F2/F2 propagation mode role

23 p4127 A69-42431

Ionospheric F region equatorial anomaly in electron density showing high correlation with equatorial electrojet range and poor correlation with Fuquene range

23 p4160 A69-42432

F 1 REGION

Criticism of overlay analysis method for F 1 region ionograms

05 p0757 A69-16403

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station

09 p1486 A69-21544

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations

11 p1950 A69-25160

Overlay technique for analysis of F region transition

into F1 and F2, noting ionization and recombination

12 p2065 A69-26102

F 1 layer formation relationship to height variations in ionic concentrations, determining different ion concentration combinations

12 p2071 A69-26702

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station

16 p2783 A69-32539

F 1 layer observation at 80-87 degree solar zenith angles explained by additional ionization maximum development in presence of temperature gradients

17 p2967 A69-33985

Latitudinal variations in conditions for F 1 layer occurrence probability and stability during solar activity minimum period

20 p3527 A69-37669

Diurnal F 1 layer development over Irkutsk, Siberia, during minimum and maximum solar activity, using semiquantitative method

20 p3527 A69-37670

F 2 REGION

Lunar tidal effects on F 2 critical frequency and height maximum, evaluating variations with altitude

01 p0063 A69-10424

Tropical 6300 angstrom red oxygen nightglow enhancements related to variations in height of nighttime F 2 layer, noting implications for layer structure and physics

01 p0068 A69-11113

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity

02 p0237 A69-11662

Ion formation rate in F 2 layer in southern polar cap, noting effect of season, latitude and solar activity

02 p0238 A69-11679

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers

02 p0238 A69-11680

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point

02 p0238 A69-11681

Statistical characteristics of magnetoionic components of obliquely incident waves, obtaining envelope distribution of signal reflected from F 2 layer

02 p0314 A69-11691

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value

02 p0239 A69-11692

Plasma drift global distribution due to neutral gas motion in F 2 region, noting effect on electron concentration distributions

03 p0422 A69-13513

F 2 layer critical frequencies variation coefficients, analyzing variation and root-mean-square deviations in terms of geomagnetic latitude and Wolf number

03 p0422 A69-13514

F 2 layer equatorial anomaly at local noon, discussing position of trough center in latitudinal distribution of ionization

03 p0422 A69-13515

Diurnal variation of variation coefficient of F 2 critical frequency for steady and unsteady primary ionizing fluxes simulated on computer

03 p0423 A69-13516

Ionospheric F 2 layer following SSC magnetic storm, noting similarity with polar aurora region

03 p0423 A69-13531

Ionospheric parameters variation during SC effect as function of solar and magnetic activities

03 p0423 A69-13534

Time dependence of relation between sunspot number and ionospheric index IF 2, noting hysteresis characteristic and changes for different solar cycles

03 p0424 A69-13632

F 2 layer formation and fast neutral particles ionization source due to charge exchange between solar wind protons and moving interstellar hydrogen

04 p0592 A69-15009

Day and night reversals in NmF2 north-south asymmetry related to neutral wind direction

06 p0918 A69-17384

Synoptic observations of F 2 layer in magnetically conjugate regions, comparing critical frequencies

06 p0919 A69-17723

Optimum length of Fourier time series approximation

ing diurnal F 2 critical frequency variation on planetary scale

06 p0921 A69-17746

Simultaneous solution of time-dependent momentum and continuity equations for ions and neutral air in midlatitude F 2 region conditions

07 p1123 A69-18818

Ionospheric plasma flute instability considered as possible cause of occurrence of elongated small scale inhomogeneities in F 2 layer

08 p1309 A69-20425

Analytical description of planetary distribution of space-time variations of fOF2, deriving Fourier series as function of UT

09 p1486 A69-21545

F2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

09 p1486 A69-21548

F 2 layer drift relation to current systems of dynamo region confirmed at middle and high latitudes

10 p1682 A69-23611

Luni-solar tide interpretation in F2 critical frequency based on sum and difference frequencies production by nonlinear atmospheric response to forces

10 p1685 A69-23829

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies

10 p1687 A69-23927

Overlay technique for analysis of F region transition into F1 and F2, noting ionization and recombination

12 p2065 A69-26102

Diurnal and seasonal variations in drift velocity vector of small scale inhomogeneities in F 2 region

12 p2070 A69-26688

Mean annual characteristics of F 2 layer ionization state, using results of worldwide observation station system

12 p2071 A69-26701

Correlation coefficient between changes in F 2 layer critical frequency and sporadic E layer maximum frequency

13 p2254 A69-28330

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity

13 p2256 A69-28693

Ion formation rate in F 2 layer in southern polar cap noting effect of season, latitude and solar activity

13 p2257 A69-28710

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers

13 p2257 A69-28711

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point

13 p2257 A69-28712

Statistical characteristics of magnetoionic components of obliquely incidence waves, obtaining envelope distribution of signal reflected from F 2 layer

13 p2355 A69-28722

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value

13 p2258 A69-28723

Drift of F 2 layer inhomogeneities compared for IGY and IQSY

14 p2443 A69-29866

F 2 region small scale inhomogeneities drift observations showing seasonal and diurnal velocity and direction changes

14 p2444 A69-29868

Tide dependent variations of critical frequencies of ionospheric layers minimal heights and maximum height of F 2 layer reflection

14 p2444 A69-29871

Spectrometric rocket measurements of ion concentrations between 200 and 630 km

16 p2774 A69-31974

Ionization troughs below F 2 layer maximum due to ionospheric disturbances detected by Antarctica ionograms direction of arrival data

16 p2775 A69-32080

Lunar tidal variations of electron concentration in F 2 region near magnetic equator showing large latitudinal dependence

16 p2776 A69-32090

Nighttime decreases in F 2 layer heights at near conjugate stations in low latitudes, using electron density

profiles

16 p2778 A69-32186

Combined midlatitude neutral air wind and equatorial electrodynamic drift effect on F 2 layer diurnal variations

16 p2781 A69-32316

Analytical description of planetary distribution of space-time variations of fOF2, deriving Fourier series as function of UT

16 p2783 A69-32540

F 2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

16 p2784 A69-32543

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances

16 p2784 A69-32612

Horizontal drifts and anisotropy of irregularities in ionospheric F 2 region by pulse fading drift records

17 p2960 A69-33164

Unsteady model taking into account photoionization, neutralization and diffusion, describing electron concentration diurnal and seasonal variations in ionosphere F 2 region at midlatitudes

17 p2966 A69-33978

Effective rate coefficients of ion-molecular processes, dissipative recombination and ion production in F 2 layer at midlatitudes

17 p2966 A69-33979

Geomagnetic control of geographic distribution of F 2 layer midday ionization based on data from ionospheric vertical sounding stations

17 p2966 A69-33982

Postsunset apparent reflection height and electron density variability in equatorial F 2, discussing singularities of diurnal variation in November-January

17 p2967 A69-33984

Radio wave trajectories for waves emitted at 15, 20 and 25 kHz within spherically stratified ionosphere below F 2 maximum

17 p2969 A69-34001

Magnetic declination effect on F 2 layer critical frequency diurnal variations attributed to vertical ionospheric drift due to neutral air winds

18 p3126 A69-34256

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data

19 p3304 A69-36623

Positive and negative correlations in F 2 layer perturbations observed by network of paired conjugate ionospheric stations at low latitude

20 p3521 A69-37050

Global distribution of F 2 layer critical frequencies by expanding empirical function of diurnal variations into natural orthogonal components

20 p3521 A69-37051

Predawn F 2 layer critical frequency enhancement at Johannesburg, discussing electron density hump from corpuscular ionization increase

20 p3523 A69-37576

Electron-ion gas ambipolar diffusion effect on F 2 layer electron density vertical distribution variations

20 p3525 A69-37655

Temperature effect on electron concentration steady distribution in F 2 layer

20 p3525 A69-37657

F 2 critical frequency meridional cross sections latitude profiles based on global network ionospheric stations observations, confirming daytime Northern Hemisphere ionization maximum

20 p3526 A69-37661

Altitude variations at and near maximum electron concentration in quiet F 2 layer during solar activity maximum from sounding at southern geomagnetic pole

20 p3526 A69-37662

Solar activity effect on F 2 layer geometrical parameters, plotting prognostic maps using nomographic methods

20 p3526 A69-37663

F 2 region critical frequencies obtained during winter at Northern and Southern Hemisphere stations located in auroral and polar zones, correlating changes with ionization

20 p3526 A69-37665

F 2 layer seasonal anomaly, discussing global distribution observed by network of ionospheric stations

20 p3526 A69-37666

Seasonal anomaly of F 2 layer critical frequency in Northern and Southern Hemispheres during high and low solar activity, discussing geomagnetic effect

20 p3526 A69-37667

F 2 layer midlatitude positive disturbances observed

during IGY on quiet and disturbed days, noting positive to negative transition latitudes

20 p3527 A69-37674

Causal and semiphenomenological theories concerning equatorial F 2 region, discussing electrodynamic drift theory and transequatorial winds

20 p3531 A69-37888

Critical frequency variations of F 2 layer and M/3000/F 2 with sunspot number for 19th solar cycle, noting dependence on geomagnetic latitude

21 p3715 A69-38560

Magnetic declination effect on altitude of top of F 2 ionospheric layer at midlatitudes using M/3000/F 2 transmission factor

21 p3717 A69-39577

Electron density decrease in F 2 layer ascribed to 9 July 1962 thermonuclear explosion, noting dissociative recombination role

22 p3942 A69-41098

Diurnal variation of Pc type geomagnetic pulsations correlation with F 2 layers critical frequency diurnal variations

23 p4161 A69-42441

F- 2 AIRCRAFT

Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport

03 p0366 A69-13367

F- 4 AIRCRAFT

Duplex servoactuator package sized for stabilator channel of F-4 aircraft providing compact integrated control surface positioning

19 p3249 A69-35640

F- 5 AIRCRAFT

Northrop F-5-21 fighter design, avionics, performance and operational existence

21 p3646 A69-38732

F- 104 AIRCRAFT

Maintenance system in Germany for F-104-G Starfighter planes noting disassembling, system testing and test flight

17 p2979 A69-33703

F- 106 AIRCRAFT

NF106B-VST model follower flight control system, discussing design criteria/performance index, rigid/elastic math model development, flight test evaluation, hardware design, etc

21 p3764 A69-39412

F- 111 AIRCRAFT

Design and tests of cable assemblies for F-111 aircraft

05 p0731 A69-16246

F-111 interdiction capability, discussing avionics subsystems for low level penetration flying and Vietnam performance

07 p1052 A69-18550

Emergency escape and personnel recovery systems including F-111 explosive system, midair deployed buoyancy aerostat and fly-away flexible wing rotor

15 p2551 A69-30853

Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role

16 p2843 A69-32706

Three valve manifold for five self righting inflation bags in escape capsule on F-111, providing one directional flow and pressure relief and shutoff

20 p3467 A69-38185

Vacuum cured glass-reinforced polyimide laminate tests for use at elevated temperatures on F-111 aircraft

24 p4335 A69-42933

F-111D computer complex to provide selective functional redundancy and flexibility to accommodate mechanization changes

24 p4285 A69-43719

F-J ROCKET ENGINE

Saturn F-1 rocket engine as generator of infrasonic waves and magnetic fluctuations, noting ignition and cut-off signal characteristics

24 p4365 A69-43415

FAB [PROGRAMMING LANGUAGE]

U FORTRAN

FABRICATION

Fabrication of large parts in aircraft and space industry, discussing extrusion, forging, explosive forming and diffusion bonding

01 p0088 A69-11400

Welding with aluminum-zinc-magnesium alloys, discussing stress corrosion, embrittlement, compositions, heat treatment, material production and fabrication

02 p0266 A69-12063

P-i-n structure isolation method for fabricating monolithic integrated circuits

02 p0222 A69-12471

Beam-lead fabrication on dual Schottky barrier diodes for low noise integrated microwave mixers

02 p0222 A69-12474

Fabrication of large arched bottoms for pressure vessels from aluminum alloys, discussing sheet cutting and welding, annealing, machining, etc

02 p0254 A69-12678

Loss factors effects on substrate choice in production of microwave printed circuit components

04 p0578 A69-15199

MOSFET fabrication by ion implantation using gate metal as mask, noting source and drain alignment with gate and low feedback capacitance

05 p0734 A69-16563

Processing techniques for fabrication of ceramic radomes from alumina and silica

07 p1142 A69-19527

Thick film hybrid circuit technology and equipment reviewing conductors, resistors, and insulator inks

09 p1508 A69-22337

Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve

09 p1508 A69-22339

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material

09 p1509 A69-22341

Hollow turbine disks for provision of coolant to high performance aircraft gas turbine engines, fabricating disk in two axial halves

09 p1509 A69-22345

Whisker metal matrix composite fabrication, discussing aligned whisker distribution without degrading strength or fracturing and detailing extrusion process

09 p1511 A69-22361

Laser application to welding, drilling and other processes involving material removal for microelectronic circuits and components fabrication

11 p1846 A69-24600

Fabrication procedure for microwave epitaxial GaAs diodes applicable for switching purposes

12 p2035 A69-25831

Fabrication techniques for plastic insulation in electronics, discussing packaging, low pressure molding, casting, etc

13 p2285 A69-27987

Book on integrated circuits covering fabrication techniques, basic semiconductor theory, thin film, monolithic, compatible circuits, packaging, etc

14 p2419 A69-29002

Boron filament wound composite structures fabrication noting physical properties

14 p2455 A69-29413

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control

15 p2628 A69-30847

JT8D turbofan engine composite fan blades design and fabrication methods using aluminum-Borsic fiber, noting direct and indirect weight reduction

[AIAA PAPER 69-465] 16 p2842 A69-32698

Small penetration aid rocket motors fabrication, discussing axial- and tangential-thrust integral assembly, impulse levels, delay line connection for igniters, production evolution, etc

[AIAA PAPER 69-520] 16 p2795 A69-32779

Be/Al cast duplex alloy with Be embedded as discrete particles in Al matrix, detailing fabrication techniques and mechanical properties

19 p3340 A69-35524

Fabrication effects on high strength Al alloy plate properties, comparing texture, plane strain fracture toughness, yield stress, ultimate tensile stress and elongation

19 p3346 A69-36437

Seam welded Al alloy aircraft structure fabrication problems, emphasizing stress corrosion

[SBAC PAPER 5] 20 p3550 A69-37454

Graphite fiber reinforced graphite composites fabrication, discussing spray forming and physical and mechanical properties

[ASM PAPER W9-20.4] 21 p3730 A69-38671

Economic effectiveness of design and fabrication changes in aircraft construction industry for profitable operation of commercial transport aircraft

21 p3855 A69-38874

Heat pipe development and fabrication in various sizes and shapes for operation over range of temperatures and power levels, noting applications

23 p4074 A69-42296

Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints

24 p4399 A69-42991

Silicon nitride ceramics fabrication technology and dimensional stability during nitridation, discussing applicability to aerospace precision or joined ceramic shapes

24 p4336 A69-43211

FABRICS

NT DACRON [TRADEMARK]

NT GAUZE

NT PARACHUTE FABRICS

Organic and inorganic fabric reinforcements effects on thermal properties of composites noting thermal conductivity, diffusivity, specific heat constants and temperature ranges

15 p2642 A69-30466

FABRY-PEROT INTERFEROMETERS

Plasma density dynamic measurements by Fabry-Perot microwave resonator, discussing resonator and coupling problems

01 p0080 A69-10318

Fabry-Perot etalon for obtaining monochromatic weak solar prominences

02 p0248 A69-11634

Automatic recording of neutral atom temperature and free electron density of partially ionized gas by Fabry-Perot interferometer

03 p0428 A69-13111

Microwave Fabry-Perot resonator for anisotropic plasma diagnostics in presence of static magnetic field

04 p0635 A69-14757

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements

04 p0598 A69-14854

Electron concentration in pulsed plasma measured with Fabry-Perot interferometer and laser radiation source

06 p0963 A69-16911

Strain distribution at crack base measured by Fabry-Perot interferometer and photoelastic coating

06 p1020 A69-17127

Instrument profile of grating spectrograph determined by applying He-Ne laser mode separated in Fabry-Perot interferometer

07 p1131 A69-18405

Multibeam Fabry-Perot interferometers for aerodynamics measurements of rarefied gas flows, determining density distribution, shape, structure and detachment of shock waves

08 p1314 A69-20385

Fabry-Perot fringes maxima in frequency response of laser interferometer, describing passive technique using eight wave plate

09 p1517 A69-21915

Tunable Fabry-Perot interferometer for photoelectric measurements of absorption and emission line contours and line center particle concentrations

10 p1698 A69-24212

Active scanning Fabry-Perot interferometer interaction with mode matched laser resonator, analyzing phase and intensity of reflected wave of active three mirror resonator

11 p1886 A69-25047

Electron concentrations in steady Ar and Ar-He plasma jets measured with microwave Fabry-Perot interferometer and Stark broadening of H beta line

12 p2137 A69-26537

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source

14 p2451 A69-29777

Fabry-Perot interferometer employing gas laser for plasmodion electron concentrations measurement at 3.39 micron wavelength

14 p2451 A69-29778

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements

15 p2608 A69-30246

Filamentary nebula IC 443 observation by Fabry-Perot etalon with image converter, determining radial, expansion velocities and H alpha line half width

15 p2686 A69-30538

Scanning Fabry-Perot interferometer with ultralow modulation frequencies, obtaining inverse piezoelectric effect curves of ceramic element

15 p2611 A69-31107

Aberrations of Fabry-Perot interferometers with small nonuniformities in plate spacing used as spectral and optical filters

17 p2972 A69-33081

Fabry-Perot interferometer with Al coating reflecting surface deposited on unbacked thin films

20 p3536 A69-36933

H alpha auroral activity on Jupiter isolated by using Fabry-Perot etalons, showing photograph reproductions

20 p3598 A69-37414

Birefringent element within Fabry-Perot cavity for identification of direction of electron density change in z-pinch discharge

22 p3946 A69-40438

Coupled Fabry-Perot interferometer for microwave spectra with improved selectivity of interference filter

22 p3947 A69-40800

Recursion formula for multilayer interference derived, with allowance for multiwave interference, to calculate resonant circuit maxima and minima

23 p4165 A69-41729

Scanning Fabry-Perot interferometer interaction with laser source, calculating laser intensity and oscillation frequency changes for weak mode coupling

24 p4329 A69-43756

Thermally scanned Fabry-Perot interferometer in flat-flat resonator configuration, featuring high transmission and large usable apertures, used for spectral analysis

24 p4329 A69-43757

FABRY-PEROT LASERS

U LASERS

FABRY-PEROT SPECTROMETERS

Rapid scanning Fabry-Perot spectrometers, considering time resolution, wavelength resolution, wavelength interval size, aperture diameter and limitations of mechanical components

01 p0082 A69-10837

Carbon dioxide abundance in Mars atmosphere measured with three etalon Fabry-Perot spectrometer

09 p1607 A69-22427

Venus atmosphere radial mass velocities measured spectrographically with Fabry-Perot interferometer, noting retrograde rotation

10 p1778 A69-23409

FACE [ANATOMY]

NT FOREHEAD

Air evacuation of maxilla-facially wounded persons from place of accident, noting helicopter use

24 p4270 A69-42603

FACE CENTERED CUBIC LATTICES

Substructures around fatigue cracks in fcc metals and alloys, noting relation between structural formation and crack propagation

02 p0260 A69-11826

Fatigue mechanism in fcc metals at ultrasonic frequencies, comparing microstructural changes in copper and alpha-brass

04 p0613 A69-14448

Nickel-cobalt fcc alloys rolling and recrystallization textures established with filtered Aco K-alpha radiation, considering stacking fault energy effects

04 p0615 A69-14643

Work hardening of fcc single crystals, emphasizing transmission electron microscopy of thin foils, X ray topography and etch pitting techniques

05 p0778 A69-15753

Dislocation distributions in cold worked fcc, bcc and hcp metals, discussing dislocation structures in deformed single crystals and work hardening theories

05 p0778 A69-15754

Unified theory of stress-strain curve of fcc metal crystals in Stages II and III of work hardening

05 p0778 A69-15755

Structural characteristics of Ni-Mo alloys analyzed using electron microscopy and X ray diffusion scattering

05 p0782 A69-16808

Fatigue hardening in fcc metals, discussing dislocation distribution in unidirectionally deformed single crystals

06 p0944 A69-17503

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Heat treatment effect on Ti-Mn alloy microstructure, discussing fcc martensite transformation into alpha, beta and intermediate phases as function of aging

11 p1906 A69-25578

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe analyzed as function of cooling rate using X ray analysis

15 p2636 A69-30105

- Tungsten influence on morphology and lattice parameter of fcc gamma prime phase in Ni-Cr-Ti-Al alloys
20 p3558 A69-36962
- Impurities effects on single crystal film formation of fcc metals on alkali-halide cleavage planes, stressing stacking fault energy importance
22 p3992 A69-39899
- Fcc metals higher order elastic constants calculated by Morse potential function, considering atomic interactions truncation and pressure derivatives
23 p4233 A69-42337
- FACETS**
U FLAT SURFACES
- FACSIMILE COMMUNICATION**
NT AUTOMATIC PICTURE TRANSMISSION
- TV picture and newspaper pages simultaneous transmission via earth satellite /Orbit/ system, measuring SNR and crosstalk
19 p3277 A69-36567
- FACTOR ANALYSIS**
- Factorizability of Einstein field equations in two dimensional spinor formulation
03 p0468 A69-13759
- Factor analysis applied to identifying extremal plants, presenting regression analysis based on least squares techniques to calculate mathematical model coefficients
05 p0737 A69-15888
- Pattern recognition method dependent on preselection of good variables, discussing SELFIC and relationship to Karhunen-Loeve expansion and factor analysis
07 p1088 A69-18386
- Integral representation for Wiener Hopf factorization of functions of complex variables for numerical processing of radiation problems
11 p1851 A69-24998
- Mathematical index model based on weighted factor analysis to facilitate management and technical decisions concerning achievement of numerous tasks with fixed funds
18 p3232 A69-34504
- Factor analysis of complex perceptual-motor performance of man, measuring speed, flexibility, balance and strength
18 p3098 A69-35085
- FACTORIES**
U INDUSTRIAL PLANTS
- FACULAE**
- Microwave spectra of peak flux of solar radio bursts of March and July 1966, relating plage regions to spectral characteristics
01 p0069 A69-11121
- Turbulent velocity in faculae and photosphere obtained from IR triplet of oxygen analysis
02 p0314 A69-11646
- Longitudinal component of solar facula magnetic field measured by high resolution spectograms
04 p0651 A69-14368
- Solar flares and plages free energy origin in magnetic field dissipation
06 p0996 A69-17446
- Synoptic charts of chromosphere, giving position and magnitude of sunspots, faculae and prominences during synodic revolution of sun
08 p1379 A69-20378
- Alpha hydrogen plage 20934 /McMath no. 8362/ associated with July 1966 proton flare development and configuration along sunspot group axis
10 p1762 A69-23728
- Two component calcium plage associated with proton flare of July 1966, describing initial development in old region periphery and component merging
10 p1763 A69-23729
- Explorer 30 satellite monitoring of solar X ray emission during July 1-15 1966, noting plage region activation with increasing emission
10 p1763 A69-23736
- Variable solar X ray emission from subflare activity in plage region producing polar cap absorption proton flare of July 7, 1966
10 p1764 A69-23745
- Variations in active region around McMath plage 8362 prior to proton flare, noting disk structure and nearby prominence modification
10 p1765 A69-23747
- Solar X ray flare of July 7, 1966 with Explorer 33 satellite attributed to McMath plage region 8362, discussing solar and cosmic radio noise
10 p1766 A69-23754
- Solar polar faculae observations, discussing relation to general solar magnetic field and coronal properties, solar high latitude rotation and susceptibility to atmospheric conditions
12 p2160 A69-26897
- Solar Ca chromospheric plage decay curves obtained from area measurements, showing similarity and exponential mean curve
16 p2859 A69-32222
- Slowly varying component of solar radio emission /S component/, correlating 35 GHz S component flux and corresponding plage, discussing magnetic fields and electron density
17 p3030 A69-33056
- Molecular concentration-optical depth curves for combinations of two photospheric and two facular models, noting lines contrast dependence on dissociation energy
18 p3204 A69-35391
- Magnetic measurements of active regions at various levels of solar atmosphere, discussing chromospheric cold and hot region, faculae magnetic fields, etc
22 p4010 A69-39991
- Core profiles of H alpha, H beta, H and K from spectrograms of plages
22 p4010 A69-39993
- Geomagnetic disturbances and cosmic ray storm of 25-26 May 1967 caused by McMath plage region 8818, noting Forbush decreases and ring current effect
22 p4004 A69-40307
- FADING**
U SELECTIVE FADING
U SIGNAL FADING
U SIGNAL FADING RATE
- FAHRENHEIT TEMPERATURE SCALE**
U TEMPERATURE SCALES
- FAIL-SAFE SYSTEMS**
- Airline pilot incapacitation by death or terminal collapse due to organic causes while on duty, noting incidence and resulting accidents
06 p0883 A69-17849
- Fail-safe design principles and criteria for helicopter structures to prevent operational failure arising from undetected fatigue damage
[AIAA PAPER 69-213] 07 p1054 A69-19549
- Fail-safe goals, design criteria, analytical methods and test procedures to achieve reliable damage tolerant dynamic rotating parts for V/STOL and helicopter transports
[AIAA PAPER 69-215] 07 p1237 A69-19569
- System safety analysis for V/STOL aircraft, discussing fault-tree technique role in fail-safe design
[AIAA PAPER 69-216] 07 p1056 A69-19575
- NASA flight safety research, discussing size effects on aircraft handling and built-in response to failure modes
07 p1057 A69-19764
- On-off multiple tank fuel systems for single and twin engine light aircraft, noting fail-safe design
[SAE PAPER 690334] 11 p1825 A69-24502
- Fatigue crack propagation and fail-safe design for stiffened large Al alloy panels with crack stoppers, using residual strength analysis method
12 p2186 A69-26835
- Trident 2E and 3B structural design and fail-safe tests, noting difference in fuselage length
13 p2202 A69-27972
- NERVA engine cooldown system for emergency shutdowns using high pressure liquid H followed by gaseous H warmup and liquid N cooldown
[AIAA PAPER 69-512] 16 p2810 A69-31846
- V/STOL fatigue design parameters, balancing fail-safe and safe-life design procedures
[AHS PAPER 376] 17 p2900 A69-33512
- Stability augmentation system for CX-84 tilt wing V/STOL aircraft, using redundancy techniques to achieve fail operational performance with two active channels
[AHS PAPER 310] 17 p2901 A69-33545
- Navigation and guidance systems for low altitude aircraft flight safety noting position determination, cockpit environment and fail-safe operation
17 p3002 A69-34080
- Fail-soft operation in array processor with cellular redundancy, discussing cellular autonomy, long life and ultrareliability
[AIAA PAPER 69-965] 22 p3906 A69-40346
- Fatigue collapse probability of fail-safe structure compared to safety factor design
22 p4045 A69-40820
- Two channel electronic system with one redundant channel for automatic replacement in case of failure evaluated for operational preparedness
23 p4136 A69-41559
- L-1011 fail operative automatic landing system design, operational characteristics and test programs [SAE PAPER 690407] 23 p4185 A69-41657
- Automatic, semiautomatic and manually operated parachute release systems used in Switzerland
24 p4252 A69-42911
- FAILURE**
NT ENGINE FAILURE
NT STRUCTURAL FAILURE
NT SYSTEM FAILURES
- Schottky barrier mixer diodes and point contact diodes failure, discussing criterion for degradation of noise figure, 1/f noise and reverse breakdown voltage
04 p0574 A69-14352
- Random variables generation from distribution having given failure rate function
12 p2102 A69-26571
- FAILURE ANALYSIS**
- Airline aircraft maintenance programs, discussing objectives, procedures and failure analysis models
15 p2549 A69-30209
- Space equipment reliability, discussing manufacturing defects, design faults, component failures, maintenance, overloads, accidents and operating errors
15 p2624 A69-30817
- Integrated circuit failure analysis in military and space applications utilizing type-test programs
15 p2624 A69-30820
- Screening techniques for semiconductor devices, considering component classification with respect to population strength distribution
15 p2627 A69-30840
- Arbitrary single gate failures diagnosis in combinational logic circuits not requiring fault table construction
15 p2583 A69-31112
- Electronic hardware optimum quality assurance selected by dynamic programming in terms of failure mechanism detection efficiency per source allocation
15 p2722 A69-31127
- Integrated circuits failure analysis in space program applications, describing electrical analog for notification, fact gathering, part analysis and corrective action functions
15 p2580 A69-31132
- Failure analysis techniques in electronic component reliability laboratory, discussing electrical and physical tests to detect weaknesses in manufacturing and design
15 p2722 A69-31133
- Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion
15 p2630 A69-31137
- Aerodynamic failure investigation of Black Brant 2 single stage sounding rockets
15 p2703 A69-31545
- Device quantity failure kinetics or time dependence effect on time-to-failure distribution resulting from given device degradation coefficients distribution
17 p2936 A69-32895
- Shear stress theory of fatigue failure of ductile materials based on crystallographic orientation and probability of slip of neighboring crystals
18 p3211 A69-34344
- Soviet book on reliability of semiconductor radio devices of flight vehicles covering failures through production errors, power source instability, environment induced changes, etc
18 p3108 A69-34350
- Fault tree for hardware multiple failure safety analysis and reliability analysis for single failure analysis, illustrating comparative advantages
18 p3142 A69-34479
- Spacecraft and aircraft components failure analysis for ensuring high reliability of final products
18 p3143 A69-34483
- Quantitative and qualitative reliability programs for commercial and aerospace products, considering Failure Effect Management System
18 p3143 A69-34486
- Failure mechanisms time and stress dependence relations
18 p3144 A69-34490
- Mechanical failure technology, describing programs of government coordinated Mechanical Failure Working Group /MFWG/
18 p3144 A69-34492
- Beam lead sealed junction transistor and integrated circuits reliability, describing test conditions and failure mechanisms
18 p3145 A69-34497

- Failure analyses of semiconductor devices for military use, suggesting modifications to MIL-STD reliability screen tests
18 p3108 A69-34499
- Flight failure analysis, discussing methods and restrictions due to hardware unavailability, minimum data, urgency and publicity
18 p3145 A69-34502
- Prefailure detection of unreliable electronics parts from random samples of received parts lots, noting cost reductions
18 p3146 A69-34508
- Accelerated temperature tests, calculating temperature behavior of hazard rates and activation energy from failure data using computer simulation
18 p3117 A69-34509
- Failure detection methods, discussing percent checkout, failure sensitivity, undetectable failures, etc
18 p3146 A69-34511
- Hazard plot analysis of incomplete data involving times to failure for failed units and running times on unfailed units
18 p3147 A69-34515
- Failure rate data role in reliability analysis and design optimization
18 p3147 A69-34516
- OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
18 p3207 A69-34519
- Failure mode and effect analysis integrating design and reliability engineering, discussing management controls and interdisciplinary coordination
18 p3147 A69-34526
- Statistical testing techniques using small sample size at low component levels to predict product performance
18 p3117 A69-34528
- Equipment maintainability demonstration technique, discussing simulation, repair time rates mathematical distribution, range and limits
18 p3117 A69-34530
- Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability
18 p3147 A69-34531
- Low endurance fatigue in aluminum, Nylon 66 and epoxy resin compared, considering stress-strain relationships, fatigue damage, failure mechanisms and crack propagation
18 p3155 A69-34633
- Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and straining frequency
18 p3219 A69-34834
- Stochastic failure models based on stress peak distributions, including randomly deteriorating strength model and increasing hazard reliability functions
18 p3148 A69-35079
- Collection of articles on physical nature of plastic deformation and failure of metals
18 p3159 A69-35451
- Low temperature bond failures of room temperature vulcanizing methyl-phenyl adhesive bonds attributed to thermal stress cracking of primer, presenting in-process tests
19 p3321 A69-35563
- Failure analysis - IEEE Conference, Philadelphia, May 1969
19 p3281 A69-35781
- System reliability evaluation based on failure analysis illustrated with examples covering initial requirement through parts production monitoring and control
19 p3454 A69-35782
- Communication equipment reliability improvement through testing and failure analysis
19 p3282 A69-35783
- Closed-loop system for test, failure analysis and corrective action in avionics reliability growth, showing cost effectiveness relationship to test program
19 p3282 A69-35784
- Microwave equipment reliability considered in terms of various subsystems and components, showing carefully formulated and executed test program as essential
19 p3282 A69-35785
- Integrated circuits failure analysis techniques utilizing pin-to-pin curve tracer tests and thermal measurements
19 p3282 A69-35786
- Failure mechanisms and analyses of large scale integrated circuits based on bipolar and MOS transistors, describing measurement and probing techniques
19 p3282 A69-35787
- Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis
19 p3430 A69-36009
- Integrated test program based on mission requirements, failure mode and effects analysis with feedback from testing to design and development functions
19 p3327 A69-36014
- Hydraulic systems incipient failure detection, discussing destructive cavitation, component defects, human error, etc
19 p3255 A69-36018
- Intermediate level mathematical reliability model relating failure mechanism, part strength and interaction of application stresses to parts failure rates, with emphasis on microcircuits
19 p3283 A69-36019
- Reliability study of launch support equipment, presenting failure data for mechanical and electromechanical components
19 p3295 A69-36023
- Computerized system-safety fault trees, discussing drawing, configuration control and simulation program
19 p3280 A69-36029
- Mechanical components life or cycles to failure probability distributions determined by Monte Carlo method, comparing theory with aircraft engine parts field data
19 p3327 A69-36031
- Time-dependent failures of components subjected to fatigue loading analyzed for reliability prediction
19 p3437 A69-36032
- Partial prior information utilization via confidence intervals for mean time to failure of exponential reliability model
19 p3360 A69-36038
- Bayesian reliability demonstration tests for predetermining sample size producer and consumer risks for equipment with exponential and binomial failure distributions
19 p3327 A69-36039
- Sequential Bayes procedure demonstrating mean time to failure exceeding acceptable value with given confidence coefficient
19 p3327 A69-36040
- Nonlinear rotational viscoelastic membranes creep rupture and failure found dependent on function of accumulated energy and power dissipation during deformation
19 p3444 A69-36806
- Integer programming method for optimizing constrained reliability problems with several system failure modes
20 p3504 A69-37069
- Component hazard rate distribution functions from unit time and failure analysis, noting confidence statements and simulation studies
20 p3548 A69-37158
- Failure test algorithm for sequential units with delay lines of control digital computers, detecting replacement of output terminals by sensitive paths
20 p3502 A69-37394
- Weld defect data analysis in relation to aerospace structure performance, emphasizing effect on fatigue behavior and acceptance standard [SBAC PAPER 17]
20 p3550 A69-37450
- Multiply censored data plotting on various type hazard papers for engineering information on time to failure distribution
20 p3567 A69-38288
- MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling
20 p3551 A69-38289
- Flight vehicle motion optimization taking into account random failures of sectioned power plant with limited capacity and independent parallel units
21 p3647 A69-38893
- Deformation rates effect on failure of cast aluminum alloys under various loading rates for tension and compression
21 p3746 A69-38958
- MOS arrays failure mechanisms, discussing oxide defects, contamination and metal migration due to mode of operation and fabrication techniques
21 p3684 A69-39605
- Mean time between failures/MTBF/ for component, equipment or system subjected to total unit test hours at various confidence levels
21 p3684 A69-39700
- Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions
22 p3910 A69-39954
- Failure analysis of corrosion products in hybrid thin film circuits, discussing detection technique, instrumentation and results
22 p3911 A69-39955
- Reliability incentive programs, considering linear and nonlinear curves for mean time before failure/MTBF/ vs incentive dollars and negative MTBF vs penalty dollars
22 p3952 A69-40024
- Metallurgical, chemical and mechanical analyses and high stress tests applied to verification of electronic device reliability, noting failure modes and rate
22 p3953 A69-40030
- Failure analysis on semiconductor devices and integrated circuits, discussing procedure for factual information representing present condition of device
22 p3953 A69-40032
- Continuum fracture concept indicating essential surface energy interpretation difference in otherwise similar adhesive and cohesive failures
22 p3974 A69-40760
- Safety engineering programs for aircraft design, discussing organizational relations, failure and operational safety analyses
22 p3867 A69-41132
- Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc
23 p4070 A69-42271
- Postbuckling analysis by equilibrium solutions of conservative system near critical point, considering stability failure in elastic structure under increasing load
24 p3496 A69-42730
- Safety and failure of components - Conference, Brighton, England, September 1969
24 p3497 A69-42767
- Electron optical techniques for failure analysis involving brittle fracture, corrosion fatigue, stress corrosion, welding and surface phenomenon
24 p3413 A69-42768
- NDT techniques relation to engineering design problems with failure potential, discussing management planning and cost analysis
24 p3418 A69-42769
- Fatigue crack initiation mechanism as used in design to prevent fatigue failures in service
24 p3497 A69-42770
- Structural materials deformation response to loading conditions and stress or strain cycle analysis to predict failure, including creep and stress relaxation
24 p3498 A69-42771
- Diagnosis of service failures and reasons for primary failure isolation from secondary damage
24 p3498 A69-42772
- Gas turbine engine problem causing component failures, considering alternative replacement strategies
24 p3418 A69-42774
- Engineering components service failures involving fatigue crack propagation, analyzing causes
24 p3498 A69-42775
- Component reliability effect on airline operation of VC 10 aircraft, investigating failure modes and maintenance
24 p3418 A69-42776
- Management activities related to economics of failure in aerospace industry
24 p4416 A69-42777
- Management role in ensuring products and components quality and reliability, analyzing failure reasons
24 p4416 A69-42778
- Civil aircraft structural components failure analysis, discussing fatigue failures and fail-safe design for accident prevention
24 p4251 A69-42779
- Automatic system failure sequence statistical analysis, considering randomly time variable external effects
24 p4289 A69-42953
- Static mechanical strength of syntactic foam tested by generating failure conditions based on combined biaxial and triaxial stress [ASME PAPER 69-APMW-24]
24 p3436 A69-43095
- Solid rocket motors failure during static firing, discussing sequence of events
24 p3465 A69-43260
- Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models
24 p3433 A69-43339
- Aerospace systems failures caused by stress corrosion, fatigue, overload, improper designing or inadequate processing control
24 p3432 A69-43428

Boron epoxy composites evaluation for use in aircraft dynamic components, considering fatigue failure mechanism identification
24 p4337 A69-43450

FAIRCHILD-HILLER AIRCRAFT
U JET AIRCRAFT
U XC-142 AIRCRAFT

FAIRCHILD MILITARY AIRCRAFT
U MILITARY AIRCRAFT

FAIRINGS
ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations
10 p1635 A69-23027
Test facility for qualification of satellite fairings jettisoning system, describing accelerating tower and recording and control instrumentation
16 p2765 A69-31739

FALKNER-SKAN EQUATION
Particular solutions and quasi-linearization combined to solve nonlinear two point boundary value problems, illustrating method with Falkner-Skan equation
20 p3515 A69-37532

FALLOUT
Nuclear radiation dose rate and atmospheric ionization from radioactive fallout and natural sources, discussing fallout effect on population
01 p0145 A69-10982
Stratospheric air sampling reliability instrumentation as part of radioactivity fallout detection program
05 p0766 A69-16751
Radioactive debris distribution in space from 9 July 1962 thermocuclear explosion over Johnston island recorded by Cosmos 6 satellite
23 p4205 A69-41836

FAN IN WING AIRCRAFT
Hovering fan powered V/STOL aircraft effects on objects on ground, discussing related dust and debris problems
05 p0701 A69-15565
High bypass ratio compound fan shaft engine design and performance for convertible rotary wing aircraft [ASME PAPER 69-GT-51]
09 p1572 A69-22511

FANLIFT DEVICES
U LIFT FANS

FAR FIELDS
Frequency independent antenna far field radiation approximated for gain, polarization, field amplitude and phase, defining omnidirectional antenna with wide-band goniometry
08 p1295 A69-21149
Two dimensional signal analog correlation in noise background using optical spatial filtering Fraunhofer hologram and input as functions
09 p1499 A69-22276
Antenna array models with different emitters to investigate characteristics of radiation patterns in near and far fields
11 p1844 A69-24451
Fraunhofer hologram as interference pattern between Fraunhofer diffraction pattern and coherent background, noting role of distance in image deterioration
11 p1882 A69-24678
Statistical gain characteristics of radar antennas at very short Fresnel zone ranges compared to Fraunhofer zone
12 p2040 A69-26470
Electromagnetic flux from nonlinear self interaction of electron plasma waves in far field of perturbation under anisotropic electron pressures
12 p2141 A69-27147
Irradiance distribution in far field diffraction patterns of partially coherent light diffracted by annular aperture, using Fourier transformation relationship of Schell
14 p2460 A69-29640
Far field energy radiated by two body system using approximation method in general relativity and Minkowski gravitation theory
16 p2812 A69-31836
Mode patterns and far field distribution for gas lasers operated in lowest order Gaussian transverse mode
17 p2981 A69-33090
Far and near field solutions for one dimensional unsteady flows in general inviscid relaxing gas, obtaining flow field structure by matching techniques
17 p2957 A69-33599
Noise intensity measurements in far field of circular nozzle for jet noise composition
17 p2957 A69-33602

Far field of line source in medium with sinusoidally stratified dielectric constant, studying diffraction effects due to Bragg mechanism
17 p2925 A69-33842
On-course monitoring for instrument landing system glide path operating with far field samples
17 p3003 A69-34105
Far field helicopter rotor noise radiation, analyzing blade slap, rotation noise, vortex noise effects and loading harmonics utilizing computer program
18 p3090 A69-34322
Density profiles in far field of reaction control system plumes in vacuum obtained by method eliminating difficulties encountered by continuum method
19 p3238 A69-35954
Analysis theory of shaped beam doubly curved reflector antenna, computing far field patterns by determining current density distribution on nonanalytic surface
20 p3506 A69-37835
Radiation field produced by parasitic loop counterpoise antenna, obtaining far field from geometrical diffraction theory
20 p3507 A69-37840
Electromagnetic radiation from slot excited ground plane covered by inhomogeneous plasma layer, considering far field radiation pattern
20 p3495 A69-37852
Dornier Do 31 VTOL jet aircraft noise alleviation in far field, discussing shielding, interference, ground attenuation and reflection
22 p3862 A69-39932
Fraunhofer hologram of glass fiber by Be X rays reconstructed using He-Ne laser light
24 p4314 A69-42973

FAR INFRARED RADIATION
Microwave and far IR molecular rotational absorption spectra investigated for measuring concentrations of reacting molecular and atomic species in hypersonic projectile wakes
01 p0006 A69-10961
Far IR rocket observations of night sky background radiation
01 p0121 A69-11249
Very far IR techniques applications in molecular and solid state spectroscopy and relationship with impurity band conduction
02 p0296 A69-11791
Far IR background due to superposition of IR galaxies, noting galaxies contribution to extragalactic radio background
02 p0308 A69-12128
Temperature dependent far IR absorption of ferroelectric sodium nitrite, discussing single and multiphonon processes
03 p0490 A69-13940
Balloon observations of solar far IR spectrum and brightness temperature
04 p0652 A69-14419
Far IR observations of atmospheric molecular lines, using high altitude aircraft platforms
04 p0628 A69-15146
Frequency and stability measurements in far IR laser region
07 p1146 A69-18482
Stimulated Compton scattering for laser action, noting voltage tunability and gain at far IR wavelengths [IEEE PAPER S-9]
07 p1154 A69-19081
High responsivity high speed performance Ge bolometer detector for very far IR region, discussing performance theory and noise equivalent power
08 p1313 A69-20132
Far IR laser pulse shape and duration
09 p1515 A69-21424
Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions
09 p1556 A69-21578
Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
09 p1603 A69-22264
Inverse Compton scattering of far IR background radiation proposed as explanation of high energy gamma ray flux
09 p1580 A69-22296
Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection
11 p1898 A69-25051
Electron cyclotron resonance measurement in n-type indium antimonide using far IR emission from HCN

FAR ULTRAVIOLET RADIATION
and water vapor lasers, noting magnetic field strength effects
13 p2270 A69-27200
Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum
13 p2341 A69-27591
Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights
13 p2342 A69-27599
IR astronomy and cosmology, considering cosmic microwave background and isotropic radiation significance in distant IR
13 p2342 A69-27601
Far IR electronic and vibronic transitions in single crystals of Nd ions in tysonite lanthanide fluorides
13 p2316 A69-27628
Night sky far IR observation by rocket-borne telescope, discussing minimum signal detection and origin
16 p2781 A69-32445
Tunable far IR radiation generated from difference frequency between two Q switched ruby lasers using lithium niobate and quartz as mixing crystals
16 p2798 A69-32603
High energy cosmic ray proton, electron and photon propagation through cosmic microwave background, discussing mean free paths
16 p2852 A69-32819
Sunspot of 28 December 1967 studied by far IR scanning with interference and Reststrahlen filters defining bandpass, obtaining umbral temperature
17 p3029 A69-33050
Long path difference vacuum Michelson interferometer application to far IR and IR laser wavelength measurements compared with 6328 A He-Ne wavelength
17 p3006 A69-33405
Far IR angular scattering observations as diagnostic tool to examine microstructure of high altitude cirrus clouds
18 p3126 A69-34281
Regenerative Josephson effect detector with feedback-narrowed far IR response as tunable millimeter and submillimeter wave radiation detector
19 p3313 A69-36417
Intensities of translational lattice mode absorptions of alpha phase solid molecular nitrogen in far IR, noting temperature dependence
20 p3579 A69-37346
Josephson frequency-voltage relation at microwave and far IR frequencies compared, using radiation induced steps
20 p3583 A69-37418
Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum [AIAA PAPER 69-869]
2 p3763 A69-39395
Construction and components of laboratory water vapor laser emitting coherent radiation in far IR
2 p3738 A69-39446
Grating spectrometer for far IR, discussing light source, reflection gratings, filters, etc
21 p3726 A69-39682
Far IR nightglow emission from atomic oxygen observed by rocket-borne liquid He-cooled telescope
22 p3940 A69-40521
Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators
22 p3982 A69-40669
Far IR gas laser with linearly polarized radiation output obtained by using echelette reflection grating in place of end mirror
23 p4172 A69-41400
Strong IR millimeter wave emission from galactic center due to interstellar dust grains resembling semiconductor structure
23 p4215 A69-42115

FAR ULTRAVIOLET RADIATION
NT LYMAN ALPHA RADIATION
NT LYMAN BETA RADIATION
Far UV spectra of O and B stars in Orion photographed from Aerobee rocket, describing wavelength measurements and line identifications
02 p0327 A69-12712
Solar coronal ion abundance analyses from extreme UV emission lines
02 p0327 A69-12719
EUV emission line radiative lifetime measurement by foil-excitation technique, noting correction for cascading, He II and transition probabilities for N II and O III
03 p0471 A69-13165

Line identification methods in solar extreme UV and X ray regions 03 p0507 A69-13171

Gas phase photolysis of carbon dioxide in far UV, searching for carbon trioxide 03 p0381 A69-13318

Photoelectron counting in extreme UV using windowless photomultiplier detectors as photon counters 04 p0595 A69-14277

Hydrogen molecular action in vacuum UV region during high current discharge 05 p0771 A69-15814

Absolute sensitivity of Soviet UTs-3 photographic emulsion to vacuum UV radiation by method involving absolute calibration of photocathodes 07 p1136 A69-19620

Vacuum UV perturbation spectroscopy compatibility with resonance transitions in Ar ion laser 08 p1324 A69-20161

Transmission and reflection properties of materials for vacuum UV spectroscopy, using LTE plasmas for calibrating UV intensities 08 p1315 A69-20468

Polar auroral far UV spectra using Ebert-Fastie monochromator flanked by photometers with same visual field 08 p1311 A69-21026

Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics 09 p1578 A69-22168

Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions 09 p1578 A69-22169

Fourth positive carbon monoxide system observed in absorption in vacuum UV region, discussing rotational and vibrational band structure 09 p1607 A69-22429

Solar research from rockets and satellites, considering solar instruments including EUV spectrographs 10 p1772 A69-22867

Far UV stellar astronomy, concerning very hot stars and interstellar gas composition studies 10 p1772 A69-22870

Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector 10 p1725 A69-23647

Far UV spectra of zeta Puppis and gamma super two Velorum with 1.6 A resolution photographed with all reflective objective spectrograph on Aerobee rocket 10 p1788 A69-24120

Vacuum spark light source for extreme UV noting mechanical trigger, compatibility with clean vacuum system and magnetic confinement of ions 11 p1885 A69-24839

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations 11 p1950 A69-25160

Forbidden solar corona lines transition probability in vacuum UV region 12 p2157 A69-26334

Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra 13 p2326 A69-27554

Nighttime molecular O densities between 100- 130 km determined from Schumann-Runge absorption data for successive far UV spectra of hot star 14 p2435 A69-28959

Coronal limb enhancement photometric study by spectroheliograms, comparing maximum brightness profiles in lines of different temperature in extreme UV 15 p2693 A69-30781

Magnetically focused electronographic image converters for far UV photography and spectroscopy in space astronomy applications 17 p2972 A69-33084

Solar photography at extreme UV wavelengths using pinhole camera instrumentation on stabilized Skylark rocket 20 p3539 A69-37545

Solar far UV images systematic photometry for thin solar models in terms of quiet sun intensity 20 p3603 A69-37546

Magnetically focused electronographic image converters for far UV photography and spectroscopy from sounding rockets, discussing stellar observations 20 p3543 A69-37801

Solar cycle variation of extreme UV radiation from total solar disk under nonflare conditions by photoelectric measurements 20 p3592 A69-38103

Vacuum UV flux along T type shock tube axis and measurements of He I line precursor emission, indicating ionizing radiation contributions to precursor ionization and excitation 20 p3511 A69-38239

Emissivity of nitrogen, oxygen and air plasmas in vacuum UV region of spectrum by photographic measurement, using He recombination radiation as brightness standard 21 p3774 A69-38944

Rocket measurement of far UV spectral intensity of theta Orionis for far UV interstellar extinction law in Orion nebula region 22 p4030 A69-40770

Diurnal and solar cycle variations of thermospheric density and temperature generated by solar EUV input and tidal wave, using two dimensional model 24 p4367 A69-43003

Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts 24 p4371 A69-43609

Optical design of double monochromator for use in EUV, describing astigmatism and transmission properties 24 p4351 A69-43758

FARADAY DARK SPACE

Faraday dark space geometries in glow discharge, using superposition principle to divide electric field for transition visualization 09 p1540 A69-22099

FARADAY EFFECT

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system 01 p0088 A69-10028

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies 01 p0030 A69-10574

Faraday rotation of plane polarized microwave beam for measuring precursor ionization from exploding wire discharge in various gases 01 p0129 A69-10663

Symmetrical design of short ferrite Faraday rotator using matrix representation, noting matching to rectangular waveguide 01 p0048 A69-11034

Differential Faraday technique to determine electron content latitude dependence in Northern Hemisphere during magnetically disturbed periods in March 1966 01 p0146 A69-11128

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals 02 p0237 A69-11660

Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity 02 p0298 A69-12039

Laser with passive Q switching with Faraday cell switch, studying induced recombination and Mandelsham-Brillouin scattering 03 p0435 A69-12983

Electron concentration in lower ionosphere based on measurement of Faraday rotation of polarization plane of radio waves scattered by meteor trail 03 p0423 A69-13535

Radio waves Faraday rotation measured from pulsars by recording difference in received power 03 p0513 A69-13771

Electron production and loss rates in F region from measurements of Faraday rotation imposed on VHF telemetry transmissions from geostationary satellite 03 p0503 A69-14016

Free carrier Faraday effect in piezoelectric semiconductors investigated for microwave frequencies, low temperatures, mixed deformation potential and piezoelectric scattering 04 p0643 A69-15201

Ionospheric electron content and slab thickness changes during magnetic storm in June 1965 using Faraday rotation and critical frequencies 05 p0759 A69-16420

Faraday effect at free carriers in indium antimonides and gallium arsenides, analyzing frequency dependence of rotation angle 06 p0979 A69-16996

Suppressed rotation reciprocal ferrite phase shifter theory explained in terms of nonreciprocal coupling of cross polarized waveguide modes 06 p0896 A69-17484

Faraday rotation measurements using incoherent scatter to obtain ionospheric electron density profiles 07 p1085 A69-19223

Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements 07 p1201 A69-19464

Linear polarized emission from pulsar CP 0328 dependent on frequency, discussing model for source with constant Faraday rotation 08 p1382 A69-19817

Electrical characteristics of linear Faraday generator using binary mixture of noble gases with nonequilibrium ionization 08 p1359 A69-19880

Orbiter and rotator models of pulsating radio sources, considering relationship between lack of Faraday rotation and similar polarization in decametric radiation from Jupiter 08 p1397 A69-20688

Near IR radiation magneto-optic light modulators using Faraday effect in yttrium-iron garnet and in related compounds 11 p1886 A69-25057

Lead factor role in nonequilibrium ionization process in Faraday-type generator, determining relationship with conductivity 13 p2314 A69-28361

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals 13 p2256 A69-28691

Faraday effect for magnetic properties of chromium tribromide along various isotherms near critical point, confirming scaling laws 15 p2668 A69-30686

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies 15 p2568 A69-30744

Integral charge neutrality effect on local space charge density of MHD generator channel, examining electrode couple for Faraday generators 15 p2664 A69-31055

Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna 15 p2700 A69-31419

Faraday rotation measurements of signals from Explorer 22 analyzed to determine scintillation boundary in auroral ionosphere 15 p2605 A69-31443

Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation 16 p2822 A69-32041

Second order correction to first order Faraday rotation equation for quasi-transverse propagation of ionospheric radio waves obtained from Appleton-Hartree equation 16 p2777 A69-32101

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms 16 p2751 A69-32103

Faraday rotation measurements in ionosphere by geostationary satellite ATS-3 as evidence of considerable nighttime electron transport 17 p2959 A69-32926

Rocket-borne AM radio receiver for Faraday rotation experiments to measure lower ionosphere electron density, giving circuit diagrams 17 p2936 A69-33062

Faraday effect and permittivity of hydrogen plasma measured simultaneously, determining electron density and collision frequency 17 p2919 A69-33394

Quasi-transverse /Q-T/ point time lag on Faraday rotation records at widely spaced frequencies during satellite pass explained by refraction theory 18 p3100 A69-34251

Faraday rotation in NP 0527 and CP 0328, measuring angular velocity and mean longitudinal magnetic fields 18 p3192 A69-34319

Magneto-optical constants and conduction band parameters of GaAs by coherent radiation at high temperatures, measuring Faraday rotation 19 p3386 A69-36522

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect 20 p3486 A69-37027

Polarization ellipse orientation at source from Faraday fringes on Jupiter decametric radio bursts swept frequency records 20 p3594 A69-38169

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field 21 p3649 A69-39027

Ionospheric vertical columnar electron content at midlatitudes near solar cycle minimum based on Faraday rotation data from Explorer 22
22 p3939 A69-40505

Faraday effect measurements by polar orbiting satellites for vertical distribution of ionospheric electron density
22 p3941 A69-40718

Galactic magnetic field existence arguments, discussing general and optical evidences, radio emissions, Faraday rotation from extragalactic sources and from pulsars, etc
23 p4217 A69-42321

Faraday rotation diurnal variation plotted by analyzing radio transmissions from Canary Bird geostationary satellite, considering ionospheric electron density peak
23 p4160 A69-42433

Ionospheric electron content measurement from Faraday fading on satellite BE-B, using computer program for data reduction as function of latitude
23 p4160 A69-42434

Mean and variance of Faraday rotation and pulsar signal dispersion in galactic turbulent structure, applying to statistically homogeneous disk model of Galaxy
24 p4375 A69-42659

Optimization of Faraday MHD generators with nonequilibrium ionization and plasma turbulence, assuming electrons at Saha equilibrium at elevated temperatures
24 p4256 A69-43682

FARM CROPS
NT POTATOES

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery
12 p2075 A69-26989

Remote sensing technology application to improving range resource inventories, discussing aerial photography, optical, IR and radar scanning, etc
12 p2098 A69-26992

Automated crop surveys from integrating observations made at different times /time dimensioning/ during growing season, noting earth resources satellites role
18 p3126 A69-34337

Automated air photo identification of crop types, utilizing stereo height as discriminating variable
23 p4155 A69-41721

FAST NEUTRONS

Fast neutron fluxes at various atmospheric levels and geomagnetic northern midlatitudes measured by proportional counters using boron trifluoride
03 p0501 A69-13528

Radiation tests on Ovonic threshold switches performed with fast neutrons and broadband X rays
06 p0978 A69-16891

MOS and junction transistors damage due to radiation, noting decrease in collector current under fast neutron dose
13 p2227 A69-27514

Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance
13 p2236 A69-28549

Fast atmospheric neutrons flux and spectrum measurement during two balloon flights, tabulating results and evaluating albedo flux during quiet sun period
16 p2851 A69-32616

Fast neutron irradiation effect on niobium nitride current carrying capacity, showing enhancement
17 p3008 A69-33765

Fast neutron spectrum for subcritical section of homogeneous U 235-polyethylene thermionic critical assembly measured by pulsed source time- of-flight method
18 p3170 A69-34313

RBE of fast neutrons on mice, rats and guinea pigs, discussing suppression of mitosis in isolated cells
20 p3478 A69-37629

Fast neutron irradiation effect in Ge crystals, using X ray diffraction and volumetric measurements
20 p3584 A69-38125

Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mcv and reactor fast neutrons
22 p3993 A69-40728

Fast neutron irradiation effect on IR absorption in single crystal GaAs for various fluences
23 p4198 A69-41540

FAST NUCLEAR REACTORS

Safety problems associated with transient boiling of liquid metals in fast nuclear reactors, emphasizing behavioral differences between liquid metals and water
08 p1420 A69-20101

Fast and thermal thermionic reactor systems characteristics including fissile material, components mass, power output and flattening and design features
14 p2480 A69-29182

FASTENERS
NT BOLTS
NT NUTS [FASTENERS]
NT PINS
NT RIVETS
NT SCREWS

Aluminum coatings compared with cadmium coatings for aerospace fasteners, discussing plating methods
[ASM PAPER D8-5.2] 07 p1142 A69-19663

Ultrasonically assisted installation of fasteners for weight savings in aircraft/spacecraft structures
09 p1478 A69-22373

Machined fastened joints for airframe structural parts, discussing fatigue life, strength and fastener hole preparation
19 p3319 A69-35553

Ti-Al-V fasteners heat treated in beta field, showing superior mechanical properties to samples treated in alpha plus beta field
21 p3729 A69-38661

Aircraft fastening systems guidelines based on mechanical strength, weight, cost and joint efficiency, discussing hole preparation and expansion design
22 p3956 A69-40822

Mechanical properties of aircraft fasteners high temperature materials
22 p3956 A69-40823

Titanium alloys for strength and weight saving in aircraft fasteners operating at cryogenic or elevated temperatures, discussing corrosion and notch sensitivity
22 p3956 A69-40824

Galvanic corrosion prevention measures for airframe fasteners, discussing crevice sealants, primers, zinc chromate, cadmium and aluminum coatings
22 p3957 A69-40825

Aircraft fastener fatigue-acceptance criteria compared with actual tests, considering unusual service conditions
22 p4045 A69-40826

Interference fit fasteners role in improving aircraft structure fatigue life through preload barrier against fatigue stresses
22 p3957 A69-40830

Clamping and sealing fastener for single direction installation consisting of pin, collar and sealing collar with insert
22 p3957 A69-40831

Titanium stress pin with headed straight-shank pin and collar for reducing fatigue stress around holes
22 p3957 A69-40832

Structural airframe fasteners, reviewing systems for fatigue critical wing/fuselage structures, honeycomb panel attachments and data on fatigue life
24 p4325 A69-43437

Various fasteners influence on fatigue life of bolted joints, noting high clamping force beneficial effect
24 p4325 A69-43438

Aerospace fastener systems standardization proposal to reduce inventories, simplify design and provide extended structural life
24 p4325 A69-43439

Aerospace fastening system requirements to lower in-place costs, extend service life and reduce weight of aircraft
24 p4325 A69-43440

Fastener materials selection for high temperature aircraft structures, considering various physical properties influence
24 p4325 A69-43441

Aircraft fastener corrosion control with emphasis on surrounding joint and structure, discussing test programs, Al coatings, etc
24 p4334 A69-43442

FATIGUE [BIOLOGY]
NT FLIGHT FATIGUE
NT MUSCULAR FATIGUE

Psychophysical method of studying heart rate as indication of physiological fatigue
17 p2911 A69-34013

Glider pilots fatigue attributed to nutritional habits
23 p4106 A69-41796

Psychophysiological effects of fatigue and correlation with somatic parameters following circadian rhythm
24 p4268 A69-43407

FATIGUE [MATERIALS]
NT BENDING FATIGUE
NT METAL FATIGUE
NT THERMAL FATIGUE

Fatigue-damage evaluation system for transport aircraft, noting use of cumulative strain gauge that stores strain history
01 p0165 A69-10118

Fretting effect on fatigue of press fitted axle assemblies, analyzing relative slip amplitude dependence on size, shape, clamping pressure, nominal stress and cycles
01 p0167 A69-10305

Handbook on fatigue properties for product design covering metals stress conditions, machine parts load and stress determination, cyclic stress, etc
01 p0170 A69-10918

Fatigue properties and failure mechanisms of glass reinforced plastics based on chopped strand mat polyester resin laminates
02 p0269 A69-11795

Fiberglass reinforced plastic laminates failure under biaxial compression due to layer separation with strain energy as endurance criterion
02 p0270 A69-12142

Strain multiplier device for fatigue sensors for totalizing resistance change from aircraft service load parameters
02 p0250 A69-12230

Strain induced deformational instability of aluminum alloys
03 p0447 A69-13818

Cumulative damage theories application to fatigue data for high strength materials, discussing stress levels
04 p0668 A69-14379

Stress variation cycles pattern effects on fatigue strength of materials, discussing results of low- carbon steel tests under sinusoidal loading
04 p0673 A69-14535

General linear theory of isotropic cumulative failure involving phenomenological consideration of fatigue damage accumulation
[ASME PAPER 68-WA/MET-6]
05 p0838 A69-16149

Crack nucleation in high strain fatigue based on plastic instability model
05 p0780 A69-16430

Superimposed stress of higher frequency and rotating bending stress effects on aluminum alloy
06 p0941 A69-17121

Stress direction and mean stress effects on fatigue properties of fiberglass reinforced plastics
06 p0945 A69-17124

Photographic observations of fatigue fracture of heat treated polycarbonate
06 p0946 A69-17205

Polycarbonate surface stiffness increase associated with fatigue induced by repetition of loads
06 p0946 A69-17206

Device for measurement of time to failure of brittle materials in thermal-endurance testing, noting shock wave
06 p0927 A69-17690

Fatigue gauge for plastic deformation based on plastic strain rates, cycles, temperature, etc
07 p1135 A69-19216

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions
07 p1235 A69-19383

Surface environment effects on mode of microcrack formation during fatigue of Al single crystals, noting surface void formation mechanism
07 p1235 A69-19387

Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles
08 p1338 A69-20494

Fatigue behavior of composite disk modified from previously evaluated boron epoxy reinforced titanium compressor disk
09 p1619 A69-22323

Electron fractographic study of fatigue cracks in wrought beryllium sheet, noting transgranular and intergranular modes on fracture surface
09 p1500 A69-22324

Aluminum alloy crack propagation and fracture patterns as function of temperature under high strain amplitude and low strain rate
10 p1709 A69-23071

Fatigue behavior of plastics classified noting temperature rises, crack initiation, etc
10 p1716 A69-23394

Fatigue growth of disk shaped crack in infinite body, noting dependence on fourth power of stress intensity factor
10 p1802 A69-24028

Metals with combined high damping and good mechanical properties for solving fatigue, noise and vibration problems
10 p1715 A69-24044

Polymer fatigue model from low cycle analysis of dynamic and thermal properties in structural plastics
10 p1717 A69-24217

Dynamic IR inspection to detect fatigue cracks in aircraft and missile structure from distance
11 p1861 A69-24262

Hydrostatic pressure-cycling technique for controlled fatigue precracking of spin burst fracture toughness specimens, noting ultrasonic flaw detection
11 p1995 A69-25650

Material selection criteria for low cycle fatigue resistance in components design determined from tensile test and incremental step test curves
[ASME PAPER 69-DE-59] 14 p2461 A69-28852

Book on fatigue strength in construction covering structural strength and stability, load design, metal physical properties, elasticity and plasticity theories, stress concentration, strain buildup, etc
14 p2534 A69-29333

General linear theory of isotropic cumulative failure involving phenomenological consideration of fatigue damage accumulation
[ASME PAPER 68-WA/MET-6] 14 p2535 A69-29436

Fatigue design procedures - Conference Munich, June 1965
15 p2705 A69-30355

Uniaxial stress effects on molecular breakage rate, relating structure-sensitive parameter to elastic modulus
15 p2709 A69-30807

Fatigue cracks growth rate under combined static and cyclic stresses
15 p2709 A69-30808

Fatigue crack propagation caused by cumulative damage due to strain cycling at crack tip, relating resistance to cyclic ductility
15 p2710 A69-30812

Shear stress theory of fatigue failure of ductile materials based on crystallographic orientation and probability of slip of neighboring crystals
18 p3211 A69-34344

Low endurance fatigue in aluminum, Nylon 66 and epoxy resin compared, considering stress-strain relationships, fatigue damage, failure mechanisms and crack propagation
18 p3155 A69-34633

Mechanical machine for fatigue testing flat samples of thin walled structures under tension and at various frequency ranges
18 p3118 A69-34833

Stress-strain state of elastoplastic material subjected to quasi-static uniaxial tension and compression, considering Bauschinger type effects by scalar parameters
18 p3222 A69-34909

Fatigue fracture due to heat generation in polycarbonate subjected to pulsating tensile load, presenting temperature change per unit stress increase
18 p3163 A69-35498

Ultrasonic nondestructive testing technique for fatigue induced damage location and criticality in filament wound fiberglass cylinders, correlating damage to residual life
19 p3322 A69-35577

Reactivity of hydrogen with surface of Ti-Al-V alloy under fatigue cycling at ambient and cryogenic temperatures
20 p3557 A69-36960

Fatigue endurance determined from thermal stresses by balancing elastic strain rates, creep relaxation and mechanical cyclic loading with triangular waveform, discussing nonsteady creep
21 p3843 A69-39310

Fatigue collapse probability of fail-safe structure compared to safety factor design
22 p4045 A69-40820

Scale factor in designing uniform strength structures for dynamic load effects determined by recording fatigue limit and failure location, using variable cross section samples
23 p4225 A69-41422

Nondestructive testing for fatigue cracks, considering X ray, magnetic particle, penetrant, ultrasonic and eddy current inspection techniques
23 p4234 A69-42451

Structural materials deformation response to loading conditions and stress or strain cycle analysis to predict failure, including creep and stress relaxation
24 p4398 A69-42771

FATIGUE DIAGRAMS U S-N DIAGRAMS

FATIGUE LIFE

Low cycle fatigue life of aluminum alloy in reversed biaxial bending
01 p0093 A69-10116

Hollow rolling elements for reducing centrifugal load on high performance bearings, discussing production, fatigue life, etc
01 p0085 A69-10294

Fatigue life, kinematics, dynamics, etc, of thrust loaded ball bearings, considering inertial effects of hollow balls
01 p0087 A69-10908

Stress peak distribution effects on random load fatigue investigated for one and two degree of freedom systems
01 p0172 A69-11355

Shot peening effect on fatigue properties of maraging and Al-Zn-Mg alloy steel welds, using repeated tensile tests
02 p0253 A69-12061

Plastic fatigue life of steel under rotary bending, proposing fracture criterion based on strain amplitude for low cycle stress levels
02 p0346 A69-12421

Notch stress procedure to predict low cycle fatigue life of specimens with fabrication flaws, discussing crack initiation and propagation lives effects
[ASME PAPER 68-PVP-15] 03 p0523 A69-12997

Butt weld fatigue properties improvement in maraging steels, using shot peening and prestretching
03 p0434 A69-13762

Fatigue endurance of structural elements determined from stress rupture strength under high and low loading rates
04 p0673 A69-14536

Random cumulative damage theory for fatigue failure of steel under sinusoidal loading taking into account randomness of time to failure and possession of memory
04 p0680 A69-15154

Fatigue life reduction in Al alloy specimens with stress concentrations due to notches
05 p0843 A69-16696

Superimposed stress of higher frequency and rotating bending stress effects on aluminum alloy
06 p0941 A69-17121

Delamination effects on strength degradation of filament wound composites
06 p0946 A69-17126

Fatigue life in nonstationary cyclic loading above endurance limit, describing methods of shortened fatigue tests for fatigue life
07 p1231 A69-18403

Atmospheric influence on friction endurance of solid powdered lubricants at constant layer thickness
[IME PAPER 3] 07 p1138 A69-18563

Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions
07 p1233 A69-19314

Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures
[AIAA PAPER 69-214] 07 p1237 A69-19576

Matrix properties related to torsional fatigue life of fiberglass reinforced NOL rings, using polyester and epoxy resins as model systems
08 p1339 A69-20495

Aircraft structural aluminum alloy fatigue life, considering atmospheric relative and absolute humidity
09 p1521 A69-21390

Weld discontinuities effects on fatigue strength of Al welds tested to determine unaffected defect size and severity of discontinuities
09 p1527 A69-22372

Fatigue strength research - Conference, Darmstadt, West Germany, May 1968
09 p1619 A69-22570

Fatigue strength and aircraft structural standards based on experimentally determined safety factors
09 p1619 A69-22571

Fatigue strength and stress-time functions obtained by programmed fatigue tests under time variable loads
09 p1620 A69-22572

Fatigue life evaluation by programmed fatigue strength tests, using frequency distribution of load sequence amplitudes
09 p1620 A69-22573

Material selection for structures under vibration loads, analyzing fatigue strength on basis of stress susceptibility and relationship with tensile strength
09 p1620 A69-22574

Elastoplastic stress in notch as cause of decreased lifetime of aircraft components, analyzing stress reversal and displacement during takeoff and landing
09 p1620 A69-22576

Strain fatigue mechanism of crack propagation in ductile metals, considering distribution of plastic cohesive stresses at crack tip
10 p1795 A69-23059

Existing predictive methods for determining high temperature low cycle fatigue life reexamination based on experiments on nickel
10 p1796 A69-23068

Low cycle fatigue of metals under biaxial strain, considering specimen life and strain amplitude correlation
10 p1797 A69-23083

Progressive accelerated fatigue testing for reliability in determining fatigue limits
10 p1800 A69-23349

Potential testing methods for corrosion induced changes in materials, discussing mechanical properties, corrosion fatigue and cracking and creep
10 p1713 A69-23822

Notched members fatigue life prediction from smooth specimen fatigue data and Neuber rule application
10 p1715 A69-23984

Structural fatigue life evaluation as cumulative damage analysis for irregularly varying loads
[DVL-780] 10 p1802 A69-24020

Tresca shear stress fatigue failure criterion and experimental data for combined bending and torsion acting out of phase
11 p1984 A69-25140

Aircraft structures fatigue life determination based on Kordonskii method, comparing steel tests result with linear summation theory
11 p1987 A69-25345

Fatigue strength reduction in Ti alloy in sliding friction contact with metallic materials caused by fretting corrosion
12 p2113 A69-26125

Fatigue life of Al alloy thin laminated sheets, considering cyclic frequency and temperature effects
12 p2180 A69-26359

Fatigue crack propagation laws determined by material yielding at crack tips, stress intensity and exponential crack growth law
12 p2187 A69-26846

Tension-compression fatigued alpha Ti twin formation contribution to fatigue damage during cyclic loading
12 p2116 A69-26913

Oxygen content effect on tension-compression fatigue of alpha Ti alloys, discussing internal damage associated with twin formation
12 p2116 A69-27134

Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
13 p2365 A69-28252

Physical limit model of fatigue in metals and alloys to determine stress producing plastic flow in surface layer
14 p2461 A69-28913

S-N fatigue life small bondable resistance sensor, discussing random response data interpretation with emphasis on use of strain multipliers
15 p2613 A69-31270

Fatigue life gage on operational aircraft providing in situ monitoring of fatigue damage prior to and during propagation of running fatigue cracks
15 p2613 A69-31271

Fatigue data adapted to conditions of specific design part including fatigue limits, S-N curves and various failure diagrams
16 p2794 A69-32433

Secondary fatigue curves slope variation to determine preloaded materials fatigue life under unstationary loading
17 p3052 A69-32976

Fatigue life estimation for irregularly varying loads with emphasis on ground-air-ground stress cycles in aircraft
17 p3052 A69-32977

- Short life fatigue data for metals, noting applications in design
17 p3052 A69-32978
- Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation
17 p3053 A69-32988
- Mechanical and resistance type fatigue life indicator, comparing operating and performance characteristics [AHS PAPER 378]
17 p3059 A69-33511
- V/STOL fatigue design parameters, balancing fail-safe and safe-life design procedures [AHS PAPER 376]
17 p2900 A69-33512
- Maximum helicopter level flight speed loads spectrum shape and severity related to rotor component fatigue design strength [AHS PAPER 372]
17 p3059 A69-33516
- Mean stresses effect on fatigue strength by specimens vibratory/tensile mean stress diagram combining Goodman line and Gerber parabola merits with increased accuracy
17 p3067 A69-34197
- Stress field in elastic contact area vicinity of hollow sphere subjected to normal load through flat plate, noting contact life [ASME PAPER 69-LUBS-5]
18 p3212 A69-34383
- Reinforced plastics static fatigue strength under various loads including thin walled tubes long term tests under constant internal pressure
18 p3162 A69-35353
- Machined fastened joints for aircraft structural parts, discussing fatigue life, strength and fastener hole preparation
19 p3319 A69-35553
- Stress coining methods for improving aircraft structure fatigue life by controlling material yielding inside holes and materials surrounding holes and slots [AIAA PAPER 69-761]
19 p3433 A69-35659
- Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current
19 p3342 A69-35775
- Fatigue life testing apparatus with computerized simulation of random load maxima and minima, describing rotating bend test application
19 p3434 A69-35777
- Electroplating method for local stress concentrations determination, discussing measurement techniques, metal fatigue failure prediction, etc
19 p3441 A69-36751
- Relationship between chronological and fatigue life in airframes, showing fatigue life dependence on operating conditions, pilot techniques and maintenance and inspection quality
20 p3461 A69-36920
- Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives
20 p3620 A69-36997
- S/N fatigue life gage response to constant frequency random amplitude input strain
20 p3537 A69-37007
- Electron beam welding for fabrication of aircraft structures, discussing fatigue strength of Ti and Al alloys and margining and low alloy steels [SBAC PAPER 12]
20 p3550 A69-37456
- Fatigue crack initiation in relation to contact stresses due to fretting, studying causes of strength reduction and crack inclination to surface
20 p3563 A69-38110
- Fatigue resistance of bimetallic sheets of steel and Al alloys by fatigue resonant machine, analyzing lifetime distribution and failure probability
21 p3835 A69-38773
- Stress concentration and surface strain hardening effects on fatigue strength of refractory alloy specimens with and without cut
21 p3745 A69-38875
- Optimum number of test aircraft in test program to predetermine endurance and service life of same aircraft in serial production
21 p3647 A69-39098
- Ti-Al-V forgings macro /prior beta/ grain size and in-process thermal treatment effects on fatigue life [AIME PAPER S69-2]
21 p3732 A69-39470
- Static and fatigue strength of end-closed filament-wound vessels under internal pressure
21 p3846 A69-39797
- Estimation of program fatigue life curves from equivalent load program using Miner law
21 p3846 A69-39810
- Damaging effects of vibration on materials and parts to estimate fatigue life, considering periodic and non-periodic stress vs time relationships
22 p4041 A69-40167
- Large diameter bolts in aircraft structures resisting hydrogen embrittlement and stress corrosion, noting fatigue properties
22 p3957 A69-40827
- Interference fit fasteners role in improving aircraft structure fatigue life through preload barrier against fatigue stresses
22 p3957 A69-40830
- Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life
23 p4176 A69-41504
- Notch effect on corrosion fatigue behavior of high strength Al alloy under bending and direct stresses
24 p4330 A69-42553
- Fatigue crack initiation mechanism as used in design to prevent fatigue failures in service
24 p4397 A69-42770
- Engineering components service failures involving fatigue crack propagation, analyzing causes
24 p4398 A69-42775
- Structural airframe fasteners, reviewing systems for fatigue critical wing/fuselage structures, honeycomb panel attachments and data on fatigue life
24 p4325 A69-43437
- Various fasteners influence on fatigue life of bolted joints, noting high clamping force beneficial effect
24 p4325 A69-43438
- Relative slip effect on fretting fatigue strength, deriving stress initiating fatigue cracks
24 p4404 A69-43628
- Deferred rupture as function of applied load noting test methods
24 p4407 A69-43801
- Rotational bending fatigue strength of plain and notched conventional and maraging steels, evaluating gas nitriding effects
24 p4335 A69-43802
- FATIGUE TESTING MACHINES**
- Torsion bar with two inertia masses attached used to determine damping capacity and torsional fatigue strength
03 p0431 A69-13917
- Fatigue gauge for plastic deformation based on plastic strain rates, cycles, temperature, etc
07 p1135 A69-19216
- Sample changer for metal fatigue studies under ultrahigh vacuum conditions, noting successive testing in same vacuum
08 p1302 A69-20877
- Testing system stiffness effect on sheet fracture, discussing notch strength dependence on stiffness
10 p1796 A69-23075
- Thermal fatigue testing system for martensitic steels using fluidized bed heating and cooling, specimen manipulation means, cycle control, data evaluation, etc
10 p1714 A69-23979
- Mechanical machine for fatigue testing flat samples of thin walled structures under tension and at various frequency ranges
18 p3118 A69-34833
- Fatigue life testing apparatus with computerized simulation of random load maxima and minima, describing rotating bend test application
19 p3434 A69-35777
- FATIGUE TESTS**
- Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
01 p0078 A69-10113
- Crack initiation and propagation in Ti alloys during thermal cyclic heating, noting influence of gas saturation
01 p0094 A69-10215
- Moisture effects on crack propagation in high strength aluminum alloys studied by fatigue tests
01 p0098 A69-10766
- Strain multiplier device for fatigue sensors for totalizing resistance change from aircraft service load parameters
02 p0250 A69-12230
- Stress variation cycles pattern effects on fatigue strength of materials, discussing results of low-carbon steel tests under sinusoidal loading
04 p0673 A69-14535
- Fatigue endurance of structural elements determined from stress rupture strength under high and low loading rates
04 p0673 A69-14536
- Residual gas effect on fatigue behavior of pure iron subjected to alternating bending load in ultrahigh vacuum
04 p0616 A69-14846
- Twin differential calorimeter for measuring heat dissipation by wire specimen under fatigue tests, using semiconductor thermopiles
04 p0618 A69-15205
- Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]
05 p0838 A69-16151
- Device based on stroboscopic effect for observing crack propagation on rotating specimens during fatigue tests
05 p0843 A69-16665
- Fatigue life reduction in Al alloy specimens with stress concentrations due to notches
05 p0843 A69-16696
- Fatigue performance of composites consisting of W or Mo helical coils embedded in Cu matrix, discussing evaluation from microstructural behavior
06 p0940 A69-16951
- Fatigue life in nonstationary cyclic loading above endurance limit, describing methods of shortened fatigue tests for fatigue life
07 p1231 A69-18403
- Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions
07 p1233 A69-19314
- Fatigue tests on steel of various diameters using standard and accelerated methods
07 p1233 A69-19315
- Chromium steel /E1961/ susceptibility to structural damage under cyclic loads by nondestructive inspection of magnetic hysteresis and eddy current losses
07 p1141 A69-19316
- Impact cyclic loading fatigue tests of smooth and notched duralumin, discussing increased impact strength resulting from initial underloading
07 p1167 A69-19317
- Multiloop control plant described by Jacobian transfer matrix to control spectral characteristics of random processes
08 p1296 A69-20233
- Flexural fatigue of glass-reinforced thermoplastics as function of various parameters, discussing test for autogenous dissipative heating
08 p1337 A69-20481
- Mechanical properties of cast epoxy resins correlation with corresponding composites strength under static and dynamic fatigue stressing
08 p1340 A69-20510
- Fatigue strength of gears with integrally forged, cut and ground teeth, discussing pancake forgings [SAE PAPER 680632]
08 p1321 A69-20732
- Crack propagation properties of polymethyl methacrylate during bending and tension, noting temperature and loading time effect on crack size
09 p1529 A69-21854
- Part-through and through-thickness fatigue crack growth observations in glassy plastics, using linear elastic fracture mechanics [SESA PAPER 1348]
09 p1617 A69-22013
- Weld discontinuities effects on fatigue strength of Al welds tested to determine unaffected defect size and severity of discontinuities
09 p1527 A69-22372
- Fatigue strength and stress-time functions obtained by programmed fatigue tests under time variable loads
09 p1620 A69-22572
- Fatigue life evaluation by programmed fatigue strength tests, using frequency distribution of load set amplitudes
09 p1620 A69-22573
- Progressive accelerated fatigue testing for reliability in determining fatigue limits
10 p1800 A69-23349
- Aluminum plates bending fatigue tests, discussing mechanical properties, structural failure, grain size, strain hardening, stress-strain-time relations, heat treatment, etc
10 p1711 A69-23356
- Surface temperature rise of solution treated austenitic steel measured during double repeated rotating bending fatigue tests at room and elevated temperatures
10 p1711 A69-23393
- Fatigue behavior of plastics classified noting temperature rises, crack initiation, etc
10 p1716 A69-23394
- Elastic-plastic deformations /strains/ amplitudes measured at high cycle temperatures in thermal fatigue tests
10 p1801 A69-23844

Aircraft structures fatigue strength determination, discussing test procedures, sample preparation, strength prediction, etc

11 p1970 A69-24525

Rod load capacity changes due to random overloads constituting upper limit of stress probability distribution density function used in programmed fatigue tests

11 p1985 A69-25180

Aircraft structures fatigue life determination based on Kordonskii method, comparing steel tests result with linear summation theory

11 p1987 A69-25345

Inclination effect of fatigue cracks on plane strain fracture toughness of 7075-T651 Al alloy, discussing cantilever bending

12 p2177 A69-25958

Bolt materials selection criteria in design of high strength lightweight joints, showing fatigue curves and temperature effects

13 p2268 A69-27758

Material selection criteria for low cycle fatigue resistance in components design determined from tensile test and incremental step test curves [ASME PAPER 69-DE-59]

14 p2461 A69-28852

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading

14 p2445 A69-28882

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]

14 p2535 A69-29438

Device for elastic-plastic circular bending with constant bending moment and angular strain for low cycle fatigue testing

15 p2583 A69-30207

Device for fatigue testing turbine disk models in unsteady temperature fields with radial and axial nonuniformity produced by HF heating

15 p2583 A69-30208

Titanium alloys fatigue properties at various temperatures using notched and unnotched specimens, considering vibrational fatigue strength and notch sensitivity

15 p2637 A69-30227

Crack initiation and propagation in Ti alloys during thermal cyclic heating noting influence of gas saturation

15 p2637 A69-30271

Structural fatigue-inducing random load spectrum analyzed and computed for laboratory simulation

15 p2705 A69-30363

Thick walled pressurized cylinder fatigue test results compared with axial tension and rotating beam tests on same material

15 p2709 A69-30676

Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields

15 p2631 A69-31505

Rotating bending fatigue tests on aluminum alloys based on statistical analysis for material strength

17 p3052 A69-32979

Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation

17 p3053 A69-32988

Cumulative metal fatigue damage gauges, analyzing resistance change properties by using strain amplitude tests

17 p3053 A69-32989

Aircraft turbines mechanical parts reliability tests, discussing examples of blade fatigue rupture and rotor disk fatigue

17 p3020 A69-33347

Fatigue test loading spectra calculation methods, discussing helicopter rotating and nonrotating components tests [AHS PAPER 373]

17 p2945 A69-33515

Fatigue strength of highly loaded gears and stress measurements by strain gauges [AHS PAPER 371]

17 p3060 A69-33517

Fatigue properties and test procedures for glass reinforced plastic rotor blades used in twin engine helicopter [AHS PAPER 370]

17 p3060 A69-33518

Facility for studying energy dissipation in refractory materials during fatigue tests in vacuum at various temperatures, describing principal components

17 p2947 A69-33926

Statistical characteristics stabilization of random loads in fatigue tests, noting transfer function of testing machine and spring stiffness

18 p3215 A69-34544

Nondestructive eddy current testing of chromium steel for early stage fatigue damage of aircraft components

18 p3136 A69-34777

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties

19 p3355 A69-35521

Ultrasonic nondestructive testing technique for fatigue induced damage location and criticality in filament wound fiberglass cylinders, correlating damage to residual life

19 p3322 A69-35577

Fatigue characteristics of Al alloys by fatigue tests with complex stress patterns, finding secondary stress wave effects

19 p3342 A69-35772

Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current

19 p3342 A69-35775

Multidimensional discrete control systems for spectral characteristics of random processes in vibrational and fatigue strength testing of machines and equipment

19 p3286 A69-35890

Time-dependent failures of components subjected to fatigue loading analyzed for reliability prediction

19 p3437 A69-36032

Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects

19 p3346 A69-36435

Fatigue strength tests of steels simulating boiler installation operating conditions, reproducing corrosion characteristics of water

19 p3347 A69-36741

Supersonic aircraft and power plant structural members operating under cyclic stress at elevated temperatures tested by various methods for interaction between creep and fatigue

20 p3620 A69-37001

Polarizable ions effect on glass fibers strength retention, noting fatigue tests for hydrolytic stress corrosion

20 p3567 A69-37769

Concorde structural tests emphasizing problems associated with thermal cycle, including fatigue test setup on complete airframe [RAES PAPER 16]

22 p4043 A69-40495

Summation methods for multiple damages caused by static fatigue in glass fiber reinforced plastics under stepwise loads

22 p3974 A69-40748

Aircraft fastener fatigue-acceptance criteria compared with actual tests, considering unusual service conditions

22 p4045 A69-40826

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties, derived from fatigue tests

22 p4047 A69-41064

Fatigue tests with cylindrical samples for observation of macrocrack formation and propagation at bottom of notches, discussing kinetics of fatigue failure

23 p4225 A69-41425

Structural changes in subsurface layer and surface microgeometry factors of metal fatigue failure, explaining crack formation and propagation

24 p4395 A69-42559

Civil aircraft structural components failure analysis, discussing fatigue failures and fail-safe design for accident prevention

24 p4251 A69-42779

Long term fatigue tests of wooden gliders, discussing structural materials fatigue strength and glider strain spectra

24 p4398 A69-42912

Static and cyclic tensile fatigue of alumina by ring test method, measuring time to failure

24 p4334 A69-43343

Low cycle fatigue strength tested on notched and unnotched round steel bars, distinguishing between fatigue lives for crack initiation and propagation

24 p4404 A69-43627

FATS

NT CHOLINE

Exercise effects on hepatic cholesterol of rats on diets high in saturated or unsaturated fats

21 p3653 A69-38903

FATTY ACIDS

In vivo hyperbaric hyperoxia effect on erythrocytes unsaturated fatty acid composition alterations of tocopherol deficient mice

03 p0375 A69-14070

Fatty acids in blue-green algae related to phylogenetic position

05 p0707 A69-15751

Glucose, lactate, free fatty acids, hepatic glycogen and endocrine activity in fasting hibernating dormouse and rat in deep hypothermia

10 p1642 A69-23111

Normal, isoprenoid, dicarboxylic, keto and various aromatic acids isolated from controlled stepwise degradation of Green River kerogen by successive chromic acid oxidations

15 p2606 A69-31523

Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed

19 p3257 A69-35970

Sediments and crude oils analyzed for fatty acids considering abiological or bacterial origin of acids

20 p3523 A69-37531

FAULT MECHANICS

U FRACTURE MECHANICS

FAULTS

Masking and standby redundancy approach to fault tolerance in space navigation computers with illustrations, discussing automatic maintenance

19 p3279 A69-35798

FAYALITE

Mossbauer spectra of shocked and unshocked iron meteorite and fayalite

03 p0517 A69-14231

Olivine-bronzite chondrite fragments found near Oshkosh, Wisconsin, in fall of 1961

22 p4021 A69-40413

FBFM [MODULATION]

U FEEDBACK FREQUENCY MODULATION

FCC LATTICES

U FACE CENTERED CUBIC LATTICES

FECES

Integrated Waste Management/Rocket Propulsion System, using human feces as propellant component [SAE PAPER 680717]

03 p0495 A69-13442

FEDERATIONS

U BUREAU [ORGANIZATIONS]

FEED SYSTEMS

Pressure and flow transients in liquid rocket engine feed systems predicted by method of characteristics

03 p0495 A69-12991

LOX prevalue accumulator system with He pressurant for prevention of Pogo effect on Saturn 5

04 p0666 A69-15298

Jet engine intershaft bearing oil feed design, discussing use of nonrotating feed link and improvement of oil scavenging at high altitudes

15 p2671 A69-30702

Rocket engines propellant feed systems dynamics analyzed by model using linear methods with distributed-parameter pipe representation [ASME PAPER 69-FE-6]

20 p3586 A69-37987

Liquid hydrogen pumping for Phoebus reactor, discussing feed systems, nozzles, configurations, design, testing, etc [AIAA PAPER 67-478]

21 p3769 A69-39751

Portable multiunit low pressure chamber with locks, permitting water replenishment, feeding of animals under continuous pressure and gas mixtures

22 p3891 A69-40217

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A

23 p4120 A69-41752

FEEDBACK

NT NEGATIVE FEEDBACK

NT NONLINEAR FEEDBACK

NT POSITIVE FEEDBACK

NT SENSORY FEEDBACK

Sequential signal design for feedback channels, emphasizing single set subject to peak and average power constraints in time continuous transmission

03 p0408 A69-12868

Recirculator with sign variable feedback coefficient for delay line passband increase

04 p0575 A69-14464

Small signal field effect transistor model at saturation and Borel equivalent scheme, giving evidence of internal feedback

04 p0579 A69-15226

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes

06 p0904 A69-17865

Frequency domain stability criterion for pulse width modulated feedback

06 p0904 A69-17942

Nonlinear feedback shift register circuit design by logical sequences

08 p1298 A69-20835

- Decoupling by state variable feedback and determination of inverse extended to linear time varying multivariable system
09 p1472 A69-21680
- DC/AC collectorless step electric motors operation and commutation circuits
09 p1442 A69-21860
- Complete observability in linear time invariant systems decoupled via state-variable feedback, deriving sufficient conditions
12 p2053 A69-26514
- Apollo-Saturn 5 propulsion and structure feedback loop, analyzing Pogo components and Nyquist plot application [AIAA PAPER 69-877]
21 p3824 A69-39403
- Feedback effects and social facilitation of human vigilance performance, evaluating mere coaction vs potential evaluation
24 p4271 A69-42751
- Isolation technique using exploding mirror shutter in multistage high gain laser system to overcome amplified target feedback during pulse lasing of reflective targets
24 p4330 A69-43762
- FEEDBACK AMPLIFIERS**
- Transistorized feedback amplifier for data transmission over high voltage lines in conveyed wave systems
01 p0038 A69-10074
- Partial avoidance of jump resonance in nonlinear feedback system, applying procedure to feedback amplifier circuit
01 p0051 A69-10442
- Frequency domain stability criterion for nonlinear feedback system consisting of nonlinear amplifier, linear dynamical system and transducer with backlash
02 p0225 A69-11968
- RF feedback amplifier analytical design, deriving open and closed loop feedback noise figure expressions by use of equivalent noise model
02 p0217 A69-12150
- Transistorized two stage amplifiers with common feedback operating under steady conditions and for short times
04 p0575 A69-14466
- Admittance between terminals measured for stabilizing single loop negative feedback transistor amplifier
05 p0739 A69-16341
- Noise characteristics of transistorized feedback amplifier stages for application in amplifier design
07 p1090 A69-18284
- Integrated frequency selective amplifier design for radio frequencies based on feedback configuration with positive real zero in loop transmission function
07 p1104 A69-18886
- Feedback amplifier with transfer function poles on parabola, discussing small rise time with small overshoot combined in transient response
08 p1282 A69-20111
- Operational amplifier integrated circuits applications, discussing simple and transducer amplifiers, operational circuits, wave shapers and generators and power supplies
11 p1857 A69-25665
- Wideband inverter operational amplifier frequency response, open and closed loop transfer functions, beta, settling time and slew rate limits, discussing HF performance prediction
11 p1857 A69-25666
- Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams
12 p2051 A69-26244
- Two stage amplifier with two differential feedbacks, investigating tuning sensitivity
14 p2426 A69-29147
- Negative resistance converter with single differential input operational amplifier, discussing input and output signal
15 p2580 A69-31091
- X band avalanche diode oscillator operated as super-regenerative amplifier, noting frequency response characteristics ascribed to diode susceptance modulation
16 p2757 A69-31585
- Regenerative amplifier to counteract cable damping due to narrow bandwidth in PCM systems
16 p2755 A69-31860
- Fluidic feedback oscillator performance from fluid density effects analysis including supply jet, feedback line dynamics and load and control port impedances [ASME PAPER 69-FLCS-39]
20 p3465 A69-37984
- Proportional fluid amplifiers analysis in cascade and with feedback by extended lumped parameter method, discussing dynamic characteristics of analog amplifiers with air
24 p4255 A69-43268
- FEEDBACK CIRCUITS**
- Microwave selective filter using resonant cavity with single coupling component in feedback circuit of amplifier traveling wave tube or klystron
01 p0042 A69-10384
- Partial avoidance of jump resonance in nonlinear feedback system, applying procedure to feedback amplifier circuit
01 p0051 A69-10442
- Broadband null balancing microwave scanning radiometer using diode in feedback loop as reference noise source
02 p0221 A69-12457
- Soviet book on impulse generators in transistors covering multivibrators and pulse generators with timer circuits, crystal controlled frequency and delayed feedback
04 p0578 A69-15053
- Stability of nonlinear time varying feedback systems, using passive operator technique
04 p0583 A69-15110
- Time domain synthesis of multivariable automatic control with predetermined output signal shape, allowing for internal cross coupling effects
05 p0737 A69-15887
- Stability analysis of nonlinear and time varying discrete feedback systems
05 p0740 A69-16600
- Optimum linear feedback code for additive noise systems with average power constraint on transmitter to increase channel capacity
07 p1085 A69-19181
- Feedback systems analysis, considering single phase and polyphase coupled and uncoupled commutation networks in forward loop and linear transfer function feedback loop
08 p1295 A69-19853
- Thermal feedback generation of 1/f-flicker noise in bipolar transistors, deriving formula for flicker noise voltage of emitter junction
08 p1283 A69-20129
- Single purpose analog computer with analog and hybrid elements for calculating Nyquist diagrams for feedback circuits
08 p1278 A69-20397
- Round trip delay effect on probability of error in uncertainty feedback communication systems operating at channel capacity
09 p1453 A69-21322
- Feedback design for monotonically stabilized linear sampled data control system
12 p2045 A69-25961
- Voltage amplitude for combination frequency of small signal transistor amplifier calculated from feedback dependence
13 p2226 A69-27218
- Unsaturation frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum
15 p2635 A69-30967
- Negative resistance converter with single differential input operational amplifier, discussing input and output signal
15 p2580 A69-31091
- Amplitude-frequency characteristic and noise bandwidth of electron tube reflex autodyne operating in over or under voltage mode and including IR feedback
16 p2761 A69-32477
- Linear feedback additive noise communication systems formulated in terms of arbitrary operations at transmitting and receiving points
17 p2944 A69-33626
- Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits
18 p3111 A69-34679
- Noiseless feedback schemes for digital and analog transmission over additive white Gaussian noise channels
21 p3671 A69-38405
- Interaction between modes of radiation field and active medium in laser with nonresonant feedback, discussing amplitude stabilization of total radiation
21 p3735 A69-38581
- Phase-pulse multistable circuit reliability improvement by additional negative feedback increasing parametric variation tolerance, feeding voltages and temperature
23 p4143 A69-42338
- Analog feedback system for digital data transmission, describing feedback channel, error rate and SNR effects
24 p4289 A69-42977
- State variable feedback design of m-input, m-output time invariant linear systems requiring noninertion and exact transfer functions, considering coupled core nuclear reactor
24 p4294 A69-43315
- FEEDBACK CONTROL**
- NT CASCADE CONTROL**
- Integrated operational amplifiers for control systems, noting high stability and linearity through negative feedback
01 p0039 A69-10169
- Monolithic sense amplifier for laminated-ferrite memories including provision for strobing, detecting, pulse forming and internal inversion logic using thermal feedback control
01 p0039 A69-10174
- Nonlinear negative definite feedback control systems governed by parabolic partial differential equation, deriving asymptotic stability
01 p0050 A69-10239
- Computational algorithm for determining piecewise-constant feedback gains for linear system optimal control
02 p0224 A69-11964
- Frequency domain stability criterion for nonlinear feedback system consisting of nonlinear amplifier, linear dynamical system and transducer with backlash
02 p0225 A69-11968
- Off-axis circle criterion for frequency domain stability of feedback systems with single monotonic nonlinearity, noting relation to Popov criterion
02 p0225 A69-11969
- Power advantage of optimum system achieved with suboptimum feedback function for sequential binary detection system
02 p0225 A69-11996
- Correlation of overshoot with gain crossover frequency, phase crossover frequency, phase margin and velocity error constant for linear feedback control systems
02 p0225 A69-12026
- Constant thrust deceleration formula for gravity turn soft landing maneuvers expressed in elementary and trigonometric functions of initial conditions for descent
02 p0335 A69-12531
- Dynamic mode locking of CW He-Ne laser by external regenerative feedback using RF beats between axial modes
02 p0260 A69-12657
- Stability properties of discrete-continuous feedback control systems with signal dependent sampling
02 p0226 A69-12733
- Logarithmic variation criteria for stability of feedback systems with time varying gains
03 p0409 A69-13073
- Stability criteria for closed rigid feedback systems with stable linear part connected in series with parametric quick response nonlinear element
03 p0410 A69-13683
- Global and nonglobal stability of continuous systems with multiplicative feedback
04 p0583 A69-15112
- Dynamics of single loop nonlinear sampled data systems with integrator, deriving equations of periodic motions and stability conditions by means of point transformations
04 p0583 A69-15135
- Servosystems and control, discussing open and closed loops and parallel, decoupling, multivariable and adaptive control
04 p0550 A69-15180
- DC servo system with torque feedback to ensure insensitivity to load variation and provide optimal performance
05 p0736 A69-15659
- Periodic cycles in linear closed loop integral pulse FM systems, discussing existence conditions, periodic formulae and stability criterion
05 p0737 A69-15865
- Minimum sensitivity deadbeat sampled data control system design by frequency domain technique, using two controllers [ASME PAPER 68-WA/AUT-15]
05 p0738 A69-16177
- Sensitivity matrix in multivariable feedback control systems, discussing loop gain matrix design to achieve desired insensitivity to system error sources [ASME PAPER 68-WA/AUT-9]
05 p0738 A69-16179

Optimization of bounded feedback gains with respect to arbitrary integral performance criterion, using nonlinear programming [ASME PAPER 68-WA/AUT-8] 05 p0738 A69-16180

Admittance between terminals measured for stabilizing single loop negative feedback transistor amplifier 05 p0739 A69-16341

Root sensitivity of linear feedback control systems calculated with signal flow graph and transforming circle 05 p0740 A69-16588

Combined neutron degradation and gamma induced effects on closed loop system simulated by SECURE program 06 p0899 A69-16889

Settling time estimation method for class of time varying feedback control systems of linear, nonlinear and multivariable natures 06 p0902 A69-17399

M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations 06 p0902 A69-17402

Optimal control of linear systems with state variables generated by linear feedback from output variables, considering time variance 06 p0903 A69-17406

L super P stability conditions for nonlinear time varying feedback systems derived with transformation technique and small gain theorem 06 p0903 A69-17411

Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator 06 p0897 A69-17708

Rearrangement inequalities for positivity of nonquadratic transformations, discussing stability of nonlinear feedback loop described by difference equations 06 p0904 A69-17943

Linear state variable feedback to obtain asymptotic stabilization of linear dynamic systems 06 p0905 A69-17947

Absolute stability of dynamic control systems with single nonlinear element function of two feedback state variables, giving sufficient conditions 06 p0905 A69-17948

Circle criterion for stability of nonlinear time varying systems, considering integrator and infinite sequence of impulses in impulse response 06 p0905 A69-17949

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error 06 p0905 A69-17950

Closed loop time optimal control achieved by exploiting generalization properties of threshold logic networks [AIAA PAPER 69-77] 06 p0905 A69-18092

Linear equivalent gain matrix of multivariable nonlinearity evaluated with equivalent gain concept for monovariable nonlinear stochastic process 07 p1114 A69-18286

Root-locus curve characterization of dynamic behavior of nonlinear control system, considering effects of changes in perturbing variable or reference input 07 p1114 A69-18290

DC servo system with torque feedback, discussing bang-bang system comparison, analog simulation, damping and quasi-optimum behavior 07 p1059 A69-19229

Closed loop and electronically calibrated radome measurement systems for beam deflection, boresight shift and transmission loss measurements 07 p1109 A69-19517

Book on feedback control theory for engineering and applied physics noting signal theory, servomechanisms, transfer functions, system stability and Nyquist diagrams 08 p1295 A69-19841

Feedback systems analysis, considering single phase and polyphase coupled and uncoupled commutation networks in forward loop and linear transfer function feedback loop 08 p1295 A69-19853

Multiloop control plant described by Jacobian transfer matrix to control spectral characteristics of random processes 08 p1296 A69-20233

Nonlinearities identification in closed loop systems using harmonic balance principle for transforming measured block diagram into diagram of simple form 08 p1297 A69-20302

Response optimization of feedback control systems with reference to single settlement time-constant ideal determined for error evaluation 08 p1298 A69-20855

Fluidic devices for closed loop control of gas turbines [AGARDOGRAPH-118] 08 p1258 A69-20956

Intermittent feedback channel for transmitter using orthogonal signals, noting smaller error probability and improved communication reliability 09 p1452 A69-21315

Optimal closed loop control system for linear time varying system with two independent parameters, noting trajectory sensitivity in large launch booster 09 p1473 A69-22439

Closed loop regulated flyback DC to DC converter using constant frequency generator for duty cycle control 09 p1442 A69-22454

Transient behavior of DC measuring amplifiers with time variable feedback, using matrix method and Laplace transform 09 p1467 A69-22560

Analog multiplier with controlled current splitting devices and feedback technique for stabilization of transfer characteristics, noting implementation in bipolar transistor 09 p1475 A69-22584

Aircraft modal control systems synthesis to improve response characteristics by altering pairs of complex conjugate and real eigenvalues simultaneously 09 p1435 A69-22779

Geometrical stability criterion similar to Popov criterion for single loop time varying nonlinear control systems analysis 09 p1476 A69-22784

Suboptimum decision feedback communications systems incorporating simple digital processing compared with optimum Wald scheme 10 p1656 A69-23534

Time varying linear optimal control system sensitivity obtained by comparing closed loop with open loop sensitivity to parameter variations 10 p1667 A69-24058

Active feedback control of distributed parameter systems including elastic airplane and missile structures, noting feedback loop coupling problem [ASME PAPER 69-VIBR-61] 10 p1668 A69-24145

Active broadband vibration isolation of human subjects from severe vertical dynamic excitations experienced in low level high speed flight [ASME PAPER 69-VIBR-65] 10 p1650 A69-24157

Electrohydraulic vibration isolation systems with feedback, considering band and notch isolation, system stability and adjustable frequency response [ASME PAPER 69-VIBR-40] 10 p1641 A69-24178

Dynamic programming determining optimal feedback control policies for optimal trajectories based on invariant imbedding 11 p1910 A69-25410

Feedback control law preserving optimality for systems with unknown parameters, discussing optimally adaptive performance index 11 p1860 A69-25441

Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier 11 p1860 A69-25450

Optimal controllers analytical design for closed loop systems with pure time delay in actuating mechanism using differential equations 12 p2045 A69-25959

Frequency stability of He-Ne laser with nonresonant feedback, noting spectral line width dependence on number of interacting modes 12 p2105 A69-26049

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming 12 p2046 A69-26060

Computer aided design of linear multivariable control systems applied to VTOL aircraft stability augmentation 12 p2013 A69-26068

Third order multivariable control systems calculation with linear differential equations describing plant for design and digital optimization 12 p2049 A69-26085

Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams 12 p2051 A69-26244

Hydraulic servo actuators load effect included in control loop actuator simulation 12 p2016 A69-26265

Feedback control of linear systems subject to sudden changes in parameter values 12 p2052 A69-26502

Near optimum regulator design technique for high order linear systems, using singular perturbation method to reduce system order 12 p2052 A69-26503

Hysteresis of on-off element with proportional feedback around element, noting autooscillations and results for electromagnetic relay 12 p2053 A69-26506

Asymptotic sampling error in closed loop hybrid systems, noting dependence on sampling period and execution time 12 p2053 A69-26508

Linear, quadratic, optimal control problems solved by sweep method, discussing time role, feedback control law and use of matrix equations 12 p2053 A69-26512

Space vehicle angular velocities reduced to zero through linear and nonlinear optimal feedback control systems 12 p2054 A69-26516

Feedback controller compensator for invariant linear systems having unstable modes 12 p2054 A69-26517

Linear closed loop control systems with periodically varying parameters analyzed by harmonics method using Fourier transforms 12 p2054 A69-26720

Helicopter stabilization systems design using optimal control theory to obtain multivariable feedback controller 12 p2014 A69-26764

Asymptotically stable discrete time closed loop linear systems synthesis, presenting feedback matrix as illustration 13 p2287 A69-27238

Passive adaptive sampled data control system with conditional feedback, discussing transfer function role and minimization of external disturbances and internal parameter variations effects 13 p2238 A69-27394

Stability test for linear unit feedback control system with second order lag and dead time compensated by PIO controller 13 p2238 A69-27395

Delta modulated control system model for determining oscillation modes at sampling instants 13 p2221 A69-27962

Population feedback control in planarians by fission suppression by brain near other planarians 14 p2406 A69-28871

Compensating /feedback/ loops determination method for linear two dimensional control system achieving self regulation 14 p2425 A69-28908

Trajectory sensitivity analysis of open and closed loop optimal control systems, demonstrating previous analysis inaccuracy 14 p2427 A69-29539

Multivariable linear time-variant systems noninteracting control problem, discussing realization by state variable feedback 15 p2582 A69-30024

Hybrid computer system for real time optimum feedback controller using iterative algorithms with rapid convergence, discussing simulation and performance 15 p2582 A69-30071

Time delay errors compensation methods in analog-digital computation loops, finding digital scheme inferior to analog 15 p2572 A69-30618

Turbojet engine open and closed loop boundary control systems performance during maximum penetration of prohibited operating area induced by HF external disturbances [AIAA PAPER 69-543] 16 p2841 A69-32681

Lifting rotor dynamics and undesirable characteristics reduction, discussing feedback control systems for pitch and roll [AHS PAPER 340A] 17 p2899 A69-33509

Lifting rotors with thrust or tilting moment feedback control, deriving blade equations of motion [AHS PAPER 340] 17 p2899 A69-33510

Stability augmentation system for CX-84 tilt wing V/STOL aircraft, using redundancy techniques to achieve full operational performance with two active channels [AHS PAPER 310] 17 p2901 A69-33545

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error incremental covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc 17 p2944 A69-33742

Multiple input and output nonlinear time invariant feedback system under almost constant inputs 17 p2944 A69-33743

Automatic tuning of superconducting cavity resonant frequency using optical feedback, discussing phase error processing and frequency deviation 17 p2937 A69-33781

Solid state single unit digital control computer performing stability augmentation, pilot relief functions and generating minimum fuel flight paths for VTOL landing 17 p2934 A69-34075

Book on elements of optimal control covering methods for deterministic problems including calculus of variations, Pontryagin principle, dynamic programming, feedback control, etc 18 p3109 A69-34532

Filtering and optimal control problems for discrete stochastic dynamical systems, describing various feedback controls and midcourse guidance optimization 18 p3109 A69-34660

Feedback realization of continuous optimal filter applied to designing servomechanisms with stochastic inputs and disturbances 18 p3110 A69-34673

Suboptimal closed loop control of nonlinear systems subject to quadratic performance indices by invariant imbedding concepts and maximum principle 18 p3111 A69-34678

Taylor series expansion used in correcting quantized digital coefficient errors in hybrid feedback control system 18 p3111 A69-34687

Algorithm for minimizing expected value of quadratic performance index in closed loop optimal control of linear time varying systems 18 p3111 A69-34688

Closed-loop system for test, failure analysis and corrective action in avionics reliability growth, showing cost effectiveness relationship to test program 19 p3282 A69-35784

Closed loop target tracking system generating error signals for aligning target with tracking axis 19 p3310 A69-36063

Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error 19 p3312 A69-36284

Servovalves with fluidic and electrical inputs compared for gas servoamplifiers performance, considering use as sensors in closed-loop hydraulic circuit 19 p3255 A69-36711

C-5 aircraft stability augmentation and autopilot development with consideration for unusual design required by takeoff weight, inertia and low approach speed 20 p3461 A69-36927

Trajectory sensitive vector introduction into closed loop linear optimal control, considering linear or nonlinear formulations 20 p3509 A69-37141

Differential synthesis technique application to design of multiaxis stability augmentation systems for aerospace vehicles [AIAA PAPER 68-834] 20 p3616 A69-37156

Stability augmentation system for B-52, noting flight test performance evaluation for structural vibrations and rigid body motions of aircraft [AIAA PAPER 68-1068] 20 p3461 A69-37157

Existence and uniqueness of optimal feedback control proved for autonomous nonlinear differential equations, allowing any finite number of variables 21 p3685 A69-38433

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms 21 p3685 A69-38451

Large parameter variations effect on linear feedback control systems performance, optimal or suboptimal 21 p3685 A69-38726

Time-independent feedback attitude control system for high accuracy earth pointing motion of stable and unstable satellites in elliptic orbits 21 p3804 A69-39020

Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance [AIAA PAPER 69-887] 21 p3647 A69-39413

Neighboring optimum feedback guidance to motivate min-distance lookup parameter determined by minimizing metric function of perturbed state and reference trajectory [AIAA PAPER 69-888] 21 p3765 A69-39414

Optimum filter design for noisy analog feedback system with forward and feedback disturbances, using mean square error criterion between signal and data 21 p3687 A69-39449

Stability of nonlinear systems with state variable feedback applied to fuel valve servomechanism 21 p3687 A69-39460

Second order suboptimal control systems with time varying coefficients, calculating switching curves for quadratic cost functional 21 p3825 A69-39634

Two-pulse limit cycle oscillation stability relation to physical parameters of pulse modulated feedback system used for satellite attitude control 21 p3688 A69-39756

Aperiodic feedback substitution for angular velocity component of control signal in stabilization systems of oriented satellites 21 p3829 A69-39832

Satellite attitude stabilization systems transient response optimization using combined feedback 21 p3830 A69-39833

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems [AIAA PAPER 69-941] 22 p3917 A69-40324

Controllability and linear closed-loop controls in linear periodic systems 22 p3917 A69-40572

Suboptimal linear regulators design method yielding feedback controller for multivariable linear systems subject to parameter variations 22 p3918 A69-41012

Nonlinear time varying feedback control system stability applied to damped Mathieu equation 23 p4146 A69-42473

Frequency condition for ensuring stochastic stability of one dimensional discrete feedback control system containing linear dynamic part and inertialess nonlinear component 24 p4288 A69-42670

Manual vehicle control analysis based on feedback systems analysis and mathematical models for human operators engaged in control tasks 24 p4274 A69-43021

Bellman equation analyzed for higher derivatives, suggesting bounded partial derivatives of optimal feedback control function 24 p4341 A69-43234

Optimal deterministic estimation and feedback control for linear nonstationary process and measurement systems defined by Riccati equations, including Kalman-Bucy filter 24 p4291 A69-43276

Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error 24 p4253 A69-43279

Quasi-optimum control law for aircraft landing control system design based on Friedland technique, evaluating effectiveness by computer simulation 24 p4253 A69-43280

Suboptimal closed loop controller for linear time varying process subject to additive random disturbances and measurement noises 24 p4292 A69-43285

Fluid logic feedback control circuit synthesis using synthesis table, describing procedure to assign memory valves and switching signals 24 p4292 A69-43290

Feedback controller for linear stationary differential systems with time lag and fixed unknown parameters, noting closed loop transfer function role 24 p4293 A69-43293

Correction coefficients for time response of hybrid control systems with digital feedback elements containing quantized coefficients 24 p4293 A69-43302

Minimal time closed loop controller design for linear systems with bounded control amplitudes and rates 24 p4293 A69-43304

General purpose computer program for synthesis of multivariable systems decoupled by state feedback 24 p4294 A69-43307

Stability of linear systems with convolution operator in forward loop and time-varying gain in feedback loop analyzed for frequency- and time- domain conditions 24 p4295 A69-43316

Pulse modulated feedback system for satellite attitude control, analyzing relationship between physical parameters to ensure two pulse limit cycle oscillation stability 24 p4295 A69-43318

Parameter identification algorithm identifying linear dynamic systems by digital computer used to identify human operator characteristics in closed loop control situation 24 p4276 A69-43320

FEEDBACK FREQUENCY MODULATION

Frequency feedback receiver capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system 01 p0034 A69-11141

Phase locked loop demodulators for binary PSK signals compared with and without decision directed feedback in presence of CW interference 03 p0409 A69-13201

Signal/noise performance of frequency locked loop FM threshold extension demodulator compared to phase locked loop demodulator and conventional FM discriminator 06 p0886 A69-16934

Frequency modulation feedback demodulator design procedure for satellite communications, noting importance of nonideal implementation 09 p1457 A69-22464

FEEDING [SUPPLYING]

Aircraft and fuel supply system functional compatibility requirements and analysis noting gasolines, fuel tanks, valves, fuel transfer and metering [SAE PAPER 690308] 11 p1825 A69-24503

Social entrainment of feeding rhythms in Rhesus monkeys with light, temperature and sound held constant 24 p4260 A69-42704

FEEDING DEVICES

U ANTENNA FEEDS

FEEL

U SENSORY FEEDBACK

FELDSPARS

Electron microprobe analysis of potassium feldspar in Weekeroo Station meteorite 04 p0659 A69-14979

Chemical compositions and structural states of feldspar in recrystallized /Type 6/ chondrite meteorites, using electron microprobe analysis and X ray diffraction techniques 05 p0819 A69-15626

Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes 20 p3590 A69-37568

Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications 20 p3590 A69-37569

FELSITE

U IGNEOUS ROCKS

FENCES [BARRIERS]

Pressure fluctuations in separated flow region behind thin fence, determining recombination point position, noise sources and frequency spectra variations 04 p0544 A69-14868

Ground jet suppression fences for VTOL aircraft prepared pads, investigating erosion reduction and particle entrainment [AIAA PAPER 68-639] 17 p2902 A69-34028

FERMI-DIRAC STATISTICS

U QUANTUM STATISTICS

FERMI STATISTICS

U QUANTUM STATISTICS

FERMI SURFACES

Fermi level in n- and p-type Ge after irradiation by 50 Mev electrons determined by temperature dependence of carrier concentration 04 p0640 A69-14444

Surface photovoltaic effect in copper electroplated single crystal CdS solar cells, discussing Fermi level and Hall effect 05 p0704 A69-15958

Incremental conductance of heavily doped n-type Si semiconductor barrier tunneling as function of bias voltage, indicating Fermi level dependence on dopants 05 p0808 A69-16285

Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
05 p0808 A69-16357

Equations for pn junction behavior valid at impurity concentrations beyond nondegenerate range, noting contact potential and carrier density
11 p1938 A69-25306

Fermi surface data of alkali metals interpreted in terms of interaction between conduction electrons and ionic lattice for deducing partial wave phase shifts
13 p2304 A69-28681

X pocket Fermi surface of ferromagnetic Ni, considering magnetic breakdown effects
15 p2668 A69-30687

Field ionization at metal surfaces as rearrangement collision, considering anisotropic electron tunneling probabilities produced by Fermi surface
17 p3015 A69-32821

Amplification coefficient, luminescence power and spacing between Fermi quasi-levels in GaAs diode injection lasers, using spectral absorption dependence
22 p3965 A69-40801

FERMIONS

NT ANTINEUTRINOS

NT BARYONS

NT HYPERONS

NT LEPTONS

NT MESONS

NT NEUTRONS

NT PROTONS

NT THERMAL NEUTRONS

Bogoliubov transformations effect on quasi-free translationally invariant states of fermion fields, using Clifford algebra based on Hilbert space
03 p0455 A69-13364

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, Fermi particles, boson systems, neutron stars, etc
16 p2853 A69-31595

FERRIC ION

Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio [IEEE PAPER C-2]
07 p1150 A69-19049

Excitation cross sections of Fe XIV lines in solar coronal spectra, comparing computations with Coulomb-Born approximation
08 p1392 A69-20563

FERRIMAGNETIC MATERIALS

Tunable ferrimagnetic bandpass filter using magic T configuration to permit low magnetic field strength and retain nonstacked configuration advantages
04 p0573 A69-14343

High pressure synthesis of dense ferrimagnetic perovskite allotropic form of yttrium-iron garnet
08 p1372 A69-20372

FERRIMAGNETISM

YIG single crystal resonator tuning of Gunn diode in coaxial line circuit
01 p0042 A69-10320

Time dependences of retardation effect, reversible magnetic permeability and magnetic viscosity during pulse magnetization of ferrite cores
13 p2319 A69-27993

Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields
13 p2320 A69-27994

Exchange interactions in lithium ferrite aluminates, measuring spontaneous magnetization by ballistic technique from 77 K to Curie point
13 p2320 A69-27995

FERRITES

Hall effect in ferrites, determining classical and spontaneous Hall coefficients, electrical resistance, temperature effects and current carrier properties
01 p0135 A69-10185

Performance characteristics of microstrip ferrite devices for hybrid microwave integrated circuit systems, including meander line phase shifters and YIG elements
01 p0040 A69-10191

Thin ferrite use in microwave integrated circuits including phase shifters, latching circulators, isolators and phase and amplitude modulators
01 p0040 A69-10192

Voltage tunable magnetron used in conjunction with ferrite circulator as phase locked amplifier
01 p0045 A69-10632

Delayed response in threshold switching from reset state in ferrite memory cores consisting of magnesium compounds [IEEE PAPER 16.4]
01 p0045 A69-10719

Procedure accounting for variable thermal conductivity and internal heat generation in temperature distribution prediction for waveguide ferrite slabs
02 p0215 A69-11877

Ferrite and sigma phase formation in austenitic stainless steels with nickel and chromium content
02 p0269 A69-12764

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices
03 p0491 A69-14053

Reciprocal latching ferrite phase shifters application to lightweight scanned phased arrays, noting quasi-circularly polarized modes with lowest insertion loss
04 p0572 A69-14320

Ferrite core temporary storage unit with 500 nsec cycle time
04 p0564 A69-15222

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
05 p0718 A69-15640

Ferrite materials characteristics related to choice for use in waveguide devices, noting importance of low HF magnetic losses and thermal stability
05 p0810 A69-16792

High Q magnetically tunable microwave filters using magnetodynamic modes in ferrite spheres
06 p0892 A69-16831

Scattering matrix for internal diffraction in rectangular waveguide with transversely magnetized ferrite core
06 p0895 A69-17455

Suppressed rotation reciprocal ferrite phase shifter theory explained in terms of nonreciprocal coupling of cross polarized waveguide modes
06 p0896 A69-17484

Ferrite microstrips substrates role in integrated circuits, noting application of hybrid technology
07 p1090 A69-18399

Ferrite Y junction E plane circulator for airborne high power X band radar
07 p1100 A69-18639

Band three port Y junction stripline circulator with triangular ferrite
08 p1286 A69-20838

Reciprocal and nonreciprocal electronically adjustable ferrite phase shifters and application in scanning leaky wave antennas
08 p1290 A69-20979

Dynamic mode electromagnetic surface waves on axially magnetized single crystalline YIG and polycrystalline ferrite rods
10 p1746 A69-23513

Electromagnetic fields in cylindrically symmetrical microwave resonator filled with premagnetized ferrite along cylinder axis
11 p1855 A69-25625

Magnetically selective microwave filters using magnetodynamic natural oscillations in premagnetized ferrite sphere at cavity center
11 p1855 A69-25626

Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops
12 p2142 A69-26259

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals at temperature range measured by ferromagnetic resonance techniques
12 p2144 A69-26721

Control signal correction in microwave ferrite modulators, eliminating losses due to screening effect of feeder
13 p2226 A69-27216

Applied magnetic field effects on longitudinally magnetized reciprocal ferrite phase shifters, showing shift type dependence on guide electrical thickness
13 p2229 A69-27673

High power ferrite latching switch with forced air cooling, discussing nonreciprocal phase shifter materials and configurations
13 p2229 A69-27674

Physical and physicochemical properties of ferrites - Conference, Minsk, Belorussian SSR, 1967
13 p2319 A69-27991

Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment
13 p2319 A69-27992

Time dependences of retardation effect, reversible magnetic permeability and magnetic viscosity during pulse magnetization of ferrite cores
13 p2319 A69-27993

Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields
13 p2320 A69-27994

Exchange interactions in lithium ferrite aluminates measuring spontaneous magnetization by ballistic technique from 77 K to Curie point
13 p2320 A69-27995

Ferrite parameters measurement in alternating fields based on continuous analysis of magnetic, magnetizing and measuring circuits for assessing errors
13 p2320 A69-27996

Artificial aging effect on spinel structure and properties of ferrites using X ray analysis, neutron diffraction and electron microscopy
13 p2320 A69-27997

Bismuth oxide introduction into Y and Y-Al garnets, noting effect on formation and properties
13 p2320 A69-27998

Polycrystalline Ca-V garnets and Mg-Cr ferrites magnetic properties after adding rare earth elements
13 p2320 A69-27999

Substituted lithium ferrites analyzed to obtain materials with small initial magnetic losses at different microwave ranges
13 p2320 A69-28000

Magnetic properties of ferrites with garnet structure, discussing temperature effect on magnetic states of Gd, Li, Y and Lu sublattices
13 p2323 A69-28564

Ferrite core storages characteristics with rectangular hysteresis loop for digital control units, discussing optimal selection method
14 p2418 A69-29145

Tunable band stop filter realization from characteristic equation solution for propagation modes by magnetized ferrite slab placed in rectangular waveguide
14 p2422 A69-29751

Dispersion of electromagnetic wave propagating along ferrite loaded wire, calculating tuning curves and three port waveguide circulator modes
14 p2417 A69-29755

Disaccommodation component of magnetic aftereffect causing dynamic absorption of HF magnetic energy in ferrites
15 p2665 A69-30038

Ferrite frequency mixers used with heterodyne receiver, studying combination and cross noise rejection efficiency
15 p2574 A69-30129

Time logarithmic switching to explain anomalous delay in threshold response of MgMnZn ferrite memory cores
15 p2668 A69-30688

Wave reflection in laser resonators with ferrite end faces, determining oscillation spectra and wave amplitudes
15 p2579 A69-30954

Structural formula of slowly cooled Mg and Al-Mg microwave ferrites, noting ion mobility during cooling
15 p2670 A69-31184

Crystallographic classes of ferrites for microwave devices, discussing magnetic properties, applications and work on polycrystalline yttrium-calcium iron-vanadium-indium garnet
15 p2670 A69-31208

Magnetic anisotropy and porosity from approach to saturation of polycrystalline ferrites based on magnetization measurement
16 p2825 A69-31700

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
16 p2762 A69-32498

Synthetic ferrites and sulfides of Ni and Co sulfated in presence of molten sodium pyrosulfate and sodium bisulfate
16 p2747 A69-32567

Line source excited ferrite layer radiation pattern reduced to one dimensional form by Fourier transform, obtaining angle of maximum leaky wave radiation
17 p2926 A69-33852

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices
18 p3182 A69-35046

Microwave elastic propagation in single crystal specimen of yttrium-iron-garnet ferrite, discussing attenuation
21 p3780 A69-38774

Parametric excitation of spin waves during parallel pumping of rubidium nickel fluoride ferrite, relating relaxation time and temperature
21 p3781 A69-39069

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals measured by ferromagnetic resonance techniques
21 p3781 A69-39134

- Approximate boundary conditions in electrodynamics of stratified tensor media estimated for ferrite layers
21 p3675 A69-39282
- Ultrasonic oscillations effects on magnetic permeability of ferrite circuit components
23 p4138 A69-41873
- Transient processes in microwave quadrupoles with ferrite resonators
23 p4139 A69-41948
- Plane electromagnetic wave diffraction by screened periodic metallic strips array with real ferrite transversely magnetized to saturation
23 p4124 A69-42032

Ferroelectricity

- Symmetrical design of short ferrite Faraday rotator using matrix representation, noting matching to rectangular waveguide
01 p0048 A69-11034
- Ferroelectric strontium barium niobate as sensitive detector of single pulse IR radiation, noting application to Q switched carbon dioxide laser output
02 p0300 A69-12623
- Ferroelectric domain structure in twinband intersections in mechanically deformed lithium niobate
03 p0486 A69-13618
- Temperature dependent far IR absorption of ferroelectric sodium nitrite, discussing single and multiphonon processes
03 p0490 A69-13940
- Electrically controlled broadband microwave phase shifter consisting of coaxial line with varactors or ferroelectrics
03 p0408 A69-13987
- Ferroelectric transition of barium titanates doped in OH or oxygen vacancies, using pyroelectric method
03 p0491 A69-14059
- Electro-optic properties of tungsten-bronze niobate ferroelectric crystals [IEEE PAPER F-7]
05 p0808 A69-16313
- Ferroelectric Li niobate single crystals internal magnetic field analysis by acoustic EPR, establishing field induced hypersound resonance absorption in spin systems
09 p1556 A69-21563
- Quadrupole splitting of Na 23 nuclear magnetic resonance (NMR) to investigate spontaneous polarization, coercive field and domain characteristics in Rochelle salt ferroelectric phase
09 p1559 A69-22283
- Phonons, electrons and protons in ferro-paraelectrics and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric properties
16 p2827 A69-32262
- Ferroelectric transducer for heat transfer rates and flow measurement in gaseous systems with autostabilized temperature, noting film coefficient
19 p3307 A69-35749
- Ferroelectricity - Conference, Riga, May 1968
22 p3994 A69-41155
- Spontaneous polarization onset in perovskite ferroelectrics, analyzing influence of Curie point, Jahn-Teller effect and atomic structure
22 p3995 A69-41159
- Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162
- Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point
22 p3996 A69-41164
- Electric properties and domain structure changes of polycrystalline Ba titanate and other ferroelectrics characterized by high dielectric nonlinearity
22 p3996 A69-41166
- Polycrystalline ferroelectrics dielectric dispersion region in decimeter-centimeter wavelength range using waveguide resonance method employing wideband strip line
22 p3997 A69-41167
- Ferroelectric Films**
- Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique
10 p1706 A69-24007
- Magnetic domain structure in supercritical ferromagnetic films with perpendicular anisotropy
12 p2143 A69-26458

Ferromagnetic Materials

- NT MAGNETITE
NT PERMALLOYS [TRADEMARK]

- Heisenberg ferromagnet dynamics at low temperatures, calculating spectral weight function and other properties with low density expansion
01 p0135 A69-10016
- Magnon density of states of ferromagnetic gadolinium trichloride in magnetic field, using high resolution optical spectroscopy
03 p0494 A69-14257
- Ferromagnetic composite materials for microwave absorption and shielding over frequency band 0.3 to 10.0 GHz
09 p1510 A69-22352
- Nonlinear DC magnetic fields for nonhomogeneous isotropic current free regions in presence of ferromagnetic materials, discussing analytic solutions of boundary value problems
11 p1888 A69-25311
- Horseshoe electromagnet sensors above ferromagnetic plate, analyzing electromagnetic properties of plate and coil impedance
12 p2094 A69-26719
- X pocket Fermi surface of ferromagnetic Ni, considering magnetic breakdown effects
15 p2668 A69-30687
- Narrow band gap alloys and ferromagnetic semiconductors, using transport properties for characterization
19 p3388 A69-36541
- Plane electromagnetic waves penetration into ferromagnetic medium with permeability increasing with magnetic field, showing nonlinearity effect
21 p3771 A69-39109
- Magnetic monopole search using synchrotrons and cosmic radiation to destroy ferromagnetic materials binding in rocks, meteorites and deep sea sediments
22 p3981 A69-40197
- Ferromagnetic Resonance**
- Electromagnetic wave scattering in ferromagnetic crystals with anisotropy, discussing correlation functions of characteristics fluctuations and magnetoacoustic resonance
05 p0809 A69-16547
- Resonators made of YIG single crystals exhibiting lowest linewidth in ferromagnetic resonance at microwave frequencies
11 p1855 A69-25627
- Nonlinear homogeneous uniaxial ferromagnetic resonance, analyzing stationary regime lifetime and vibrational spectrum
14 p2503 A69-28989
- Ferromagnetism**
- Ferromagnetic ordering effect on gadolinium dialuminide thermoelectric power, measuring temperature dependence of power and electrical resistivity
03 p0485 A69-13322
- Lenz-Ising model of ferromagnetism noting mathematical methods used to investigate model properties
03 p0488 A69-13785
- Stainless steel sensitization analyzed using Mossbauer spectroscopy and X ray diffraction, noting ferromagnetic phase
06 p0944 A69-17852
- Induced magnetic fields determination in linear DC MHD generators with ferromagnetic and nonmagnetic walls, using Fredholm equation
10 p1636 A69-23454
- Microwave magnetoelastic wave propagation in ferromagnet subjected to pulsed magnetic field using coupled mode approach
10 p1746 A69-23655
- Ferromagnetic transition in superdense nuclear matter and neutron stars, developing relativistic equation of state
11 p1965 A69-25564
- Electron magnon interaction in ferromagnetic and antiferromagnetic semiconductors, showing conduction band and electron effective mass and magnetic moment dependences on temperature and spin direction
14 p2504 A69-28991
- High field susceptibility in Fe and Ni and high field Mossbauer study in Fe relating results to band structure and models of ferromagnetism
19 p3383 A69-36050
- Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons
21 p3798 A69-38600

Ferry Spacecraft

- Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
13 p2352 A69-27908

- Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology
21 p3827 A69-39691
- Low cost efficient shuttle system for personnel and cargo transport to earth orbit for NASA and DOD needs
21 p3827 A69-39695
- Manned transport into orbit and manned orbital operations systems, considering systems selection factors and mission and cost influences
21 p3857 A69-39696
- NASA programs for space stations and base development, discussing housing and equipment capacity, manned and unmanned stations and shuttlecraft for interstation travel
23 p4224 A69-42456

FET [TRANSISTORS]

U FIELD EFFECT TRANSISTORS

Feynman Diagrams

- Feynman rules for electromagnetic and Yang-Mills fields from gauge independent path dependent field formalism
05 p0794 A69-16363
- Feynman rules for gravitational field from coordinate independent field theoretic formalism, expressing path dependent Green functions in path independent functions
05 p0794 A69-16364
- Dielectric constant of liquid metals emphasizing Green function techniques for Wick theorem, Feynman diagrams, Dyson equation and diagrams in impulse space
07 p1196 A69-18298
- Elastic and inelastic elementary particle collisions described by Feynman diagrams, discussing computer results for high energy particle interactions
13 p2303 A69-28369
- Particle diffusion and wave spectrum in unstable plasma calculated using Feynman diagrams, considering quasi-linear growth, resonant three wave coupling and nonlinear Landau damping
15 p2660 A69-30915

FIAT Aircraft

U G-91 Aircraft

FIAT G-91 Aircraft

U G-91 Aircraft

Fiber Optics

- Glass fiber optical angular displacement noncontacting nonloading transducer suitable for measuring torsional vibrations
06 p0923 A69-16929
- Fiber optics - Conference, Baltimore, April 1968
06 p0958 A69-17674
- Fiber optics evolution, discussing industrial and medical applications
06 p0958 A69-17675
- Fiber optics technology, discussing fabrication and applications involving light carrying (incoherent/ and image carrying/coherent) fibers
06 p0958 A69-17676
- High transmittance long fiber optics, presenting data on special transmission as function of temperature
06 p0958 A69-17677
- Optical commutation to permit multifield monitoring and recording with one sensor by employing high resolution imaging fiber optics elements feeding common focusing lens
06 p0926 A69-17678
- Supersonic aircraft fire detection using coherent fiber bundles
06 p0926 A69-17679
- Fiber optics application to fiberscopes and fused fiber optic plates, noting surface coating for light scattering prevention
12 p2084 A69-26150
- Flame propagation velocity for different gas mixtures enclosed in glass tube determined by fiber optics devices
16 p2789 A69-31764
- Flexible glass fiber optics, discussing total internal reflection, light and image transmission, digit display and waveguide for laser communication
16 p2789 A69-31933
- HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube
23 p4121 A69-41768
- Fiber optics interferometers, analyzing light propagation along dielectric light pipes and wave interference
24 p4315 A69-43162

FIBER STRENGTH

FIBER STRENGTH

Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites

01 p0171 A69-11261

High temperature tensile strengths of uncoated boron filament and filament coated with silicon carbide

02 p0270 A69-12731

NonHookian behavior of stiff strong carbon fibers under stress

03 p0454 A69-13937

Twisted yarns composed of continuous viscoelastic filaments dynamic response under periodic strain effect on dynamic modulus

04 p0619 A69-14686

Fiberglass reinforced plastics modulus of elasticity and Poisson ratio determined by strain gauges and frequency and resistivity measurements

08 p1335 A69-20330

Chemical composition effect on glass fibers strength, discussing reasons for increased surface layer strength

10 p1717 A69-24045

Unidirectional fibrous materials stability, finding characteristic equation in form of infinite determinant by solving three dimensional stability of reinforcing fibers in binder

11 p1985 A69-25172

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement

15 p2642 A69-30312

High strength fibers and composite materials for structural design, considering anisotropy and low ultimate tensile strain

16 p2802 A69-32380

Surface chemistry of plastics-reinforced with strong fibers, stressing need for investigating coupling films, catalysts and metallic ions role in coupling compounds chemisorption

17 p2992 A69-33655

Measuring elastic modulus and tensile strength of high modulus graphite fibers including comparative data, error sources and full strand test

19 p3355 A69-35520

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties

19 p3355 A69-35521

Polymer fibers tensile strength improved using sectional orientation strengthening at controlled temperature and tension conditions

19 p3358 A69-35984

Geometry effects on stresses in discontinuous composite materials, studying fiber spacing, failure and discontinuities size and nature

20 p3565 A69-36942

Strength characteristics of high performance fibers and application to reinforced composite materials noting whiskers, polycrystalline and vitreous fibers

20 p3567 A69-37748

Polarizable ions effect on glass fibers strength retention, noting fatigue tests for hydrolytic stress corrosion

20 p3567 A69-37769

Metal matrix compatibility of metal coated graphitized, silicon carbide and boron fibers, discussing fiber weakening processes

21 p3751 A69-38670

Tensile strength of glass and graphite fibers for fiber reinforced plastics /FRP/ tested with modified balance type and strain gage type tensile testers

21 p3753 A69-39799

Carbon fibers and resin composites used as rocket motor systems ablative liners and structures, noting role in motor weight reduction

24 p4336 A69-43210

FIBERGLASS

U GLASS FIBERS

FIBERS

NT DACRON [TRADEMARK]
NT GLASS FIBERS
NT MICROFIBERS
NT REINFORCING FIBERS
NT SYNTHETIC FIBERS

Fiber-matrix interfacial bond function and bond strength role in fiber composites mechanical behavior

03 p0450 A69-13881

NonHookian behavior of stiff strong carbon fibers under stress

03 p0454 A69-13937

Evaluation tests of fixed frequency variable tension vibroscope for filaments and wires, noting instrument errors and corrections

04 p0599 A69-15018

Equation for analyzing radiation produced by current passing through filament situated over anisotropically conducting plane in flat waveguide

05 p0718 A69-15647

Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph

05 p0761 A69-15657

Crack propagation through layer of viscous fibers joining orthotropic elastic half planes

10 p1803 A69-24029

Book on design procedures for modern fibrous composites emphasizing stiffness properties and calculations, covering laminates orthotropic lamina, etc

12 p2179 A69-26238

Fiber axis distribution resulting from mechanical working deformation of matrix containing initially randomly oriented fibers

12 p2188 A69-26933

Equation for analyzing radiation produced by current passing through filament situated over anisotropically conducting plane in flat waveguide

16 p2762 A69-32504

Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph

16 p2792 A69-32514

Carbon fibers fine structure graphitized at high temperatures studied by X ray diffraction and electron microscopy

16 p2803 A69-32572

Thermal analysis of opacified fibrous insulation systems, discussing heat transmission, heat transfer and thermal conductivity relations to compression load and temperature

17 p3072 A69-33282

Micell type optimum fiber arrangement for transferring torque across annulus, considering single straight, double and multiple annular arrays under single load system

19 p3447 A69-36851

Static theory of fibrous surface media based on continuum mechanics, neighboring fibers noninteraction principle and additivity of mechanical properties

19 p3447 A69-36858

FIBRILLATION

Hypokinesis effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

13 p2212 A69-28616

EKG during electrical defibrillation of heart in immobilized dogs

19 p3257 A69-36168

Corneal stroma collagen fibrils and ground substance refractive indices, discussing corneal transparency and clouding

22 p3884 A69-40886

FIBRINOGEN

Yield stress of normal human blood related to endogenous fibrinogen concentration as function of total protein concentration, proposing fibrinogen adsorption and coupling model

22 p3874 A69-40223

FIBROBLASTS

U COLLAGENS

FIBROSIS

Fibrosis histological patterns of left ventricular papillary muscles from comparison of hearts with myocardial infarction, noting acute and healed mural lesions

24 p4261 A69-42724

FIBROUS MATERIALS

U FIBERS

FICKS EQUATION

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation

01 p0151 A69-10527

FIDELITY

U ACCURACY

FIELD COILS

Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming

11 p1888 A69-25310

FIELD EFFECT TRANSISTORS

Gate current measurement of p-n junction during ultralow current operation of junction field effect transistor /JFET/

01 p0038 A69-10122

MOSFET drivers for low current memory fabricated in 64 unit monolithic strips, discussing driver performance data

01 p0039 A69-10172

Space charge limited operation of insulated gate field effect transistors, discussing maximum transconductance and minimum parasitic capacitances

01 p0042 A69-10322

Carrier mobility variation with electric field related to structure of epitaxial field effect transistors

02 p0294 A69-11541

Thin film transistors prepared from spray deposited cadmium sulfide, discussing carrier mobility and low stability

02 p0214 A69-11596

Heterojunction band model and carrier transport mechanisms emphasizing applications to heterophotodiodes, solar cells and hetero field effect transistors

02 p0294 A69-11598

Shockley theory of field effect transistors, calculating characteristics in miniaturization problems by removing geometric constraints with aid of electric analog

02 p0215 A69-11781

Analog sampled data simulator using field effect transistors and single value of holding capacitor for covering sample frequency variation

03 p0405 A69-13600

Plane of symmetry determination for generalized junction gate field effect transistors extended to include impurity profiles and bias voltage conditions

04 p0574 A69-14344

Small signal field effect transistor model at saturation and Borel equivalent scheme, giving evidence of internal feedback

04 p0579 A69-15226

Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device

05 p0733 A69-16562

MOSFET fabrication by ion implantation using gate metal as mask, noting source and drain alignment with gate and low feedback capacitance

05 p0734 A69-16563

Neutron radiation effects on MOSFET, presenting model for neutron produced ionization in oxide layer

06 p0976 A69-16875

Electron radiation damage in MOSFET devices using bias temperature treatments

06 p0976 A69-16877

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology

06 p0930 A69-17152

Junction gate field effect transistor design covering geometries and impurity profiles

06 p0893 A69-17197

Field effect in Ge and Si, noting relation between dependence of space charge on surface level charge and on surface potential

07 p1199 A69-18682

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum

07 p1199 A69-18686

Direct method determination of pinch-off voltage in depletion mode FET

07 p1102 A69-18861

Monolithic operational amplifier design combining junction FET with n-p-n transistor

07 p1103 A69-18876

Optimized gain control configuration using field effect transistor with broadband control to maintain high signal to noise ratio with low distortion

07 p1115 A69-18889

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing

07 p1135 A69-19197

Adapter circuits for MOSFET electrical properties measurement

07 p1113 A69-19780

FET sample and hold circuit using error corrective feedback

08 p1298 A69-20837

Field effect transistors with Schottky-barrier gates using epitaxial layers of silicon on substrates and gallium arsenide on seminsulating substrates

08 p1286 A69-20863

HF excess noise and equivalent circuit representation of MOSFET with n-type channel, noting local mobility fluctuations effect

09 p1463 A69-22094

FET memory element charge storage two layer model for thin film dielectrics noting charge/discharge times

10 p1742 A69-22947

- Field distribution in insulated gate FET determined by numerical solution of Poisson equation
10 p1662 A69-23170
- Design of 126 channel PCM telemetry unit for C-5 aircraft flight test, discussing FET analog multiplexing
10 p1693 A69-23275
- Device to simultaneously observe integral and differential field effect curves on oscilloscope screen as function of continuously varying field
10 p1698 A69-24210
- Temperature effects on noise levels in field effect transistors, discussing Lorentz spectrum
11 p1853 A69-25391
- LF generation-recombination noise in MOS transistors with depletion region impurity centers, analyzing noise resistance saturation and drain-voltage dependence
12 p2041 A69-26627
- Common source and common gate FET connections showing equivalent noise figures
13 p2227 A69-27237
- MOS and junction transistors damage due to radiation, noting decrease in collector current under fast neutron dose
13 p2227 A69-27514
- Small signal, HF equivalent circuit for intrinsic metal oxide semiconductor field effect transistor, considering nonpinch-off and pinch-off modes
13 p2238 A69-28429
- MOS unitoron switching circuit operation subjected to nonlinear load, using analytic approximations of current-voltage characteristics
13 p2234 A69-28507
- Amplitude modulator with field effect tetrode transistor /FETT/, discussing linear mode operation of modulator circuit
14 p2420 A69-29459
- MOSFET /unitoron/ switching circuits classification in terms of load curve shapes obtained with different output connections of load elements
15 p2574 A69-30122
- Integrated nonvolatile read-write memory with addressing using variable threshold field effect transistor including cell operation, channel shielding and circuit
17 p2942 A69-34120
- Current-voltage characteristics of unitoron with metal-dielectric-semiconductor structure /MOSFET/ taking into account substrate potential effect
19 p3284 A69-36592
- Book on field effect and bipolar junction transistors and microcircuits, covering ideal and practical amplifiers, circuit characteristics, etc
20 p3505 A69-37147
- MOS threshold voltages calculations, considering fixed bulk and oxide charges and difference in work function between metal and semiconductor, considering MOS-FET devices
20 p3506 A69-37779
- Generation-recombination noise due to trapped charge fluctuation at impurity centers in Si junction gate field effect transistors transition regions, using lumped equivalent circuit
22 p3911 A69-40009
- Thin film field effect transistors and integrated microcircuits, investigating active and passive elements fabrication
24 p4419 A69-42908
- FIELD EMISSION**
- Field ion microscope study of imaging solute atoms of dilute Pt-based W, Pd, Co, Ni and Au alloys
01 p0092 A69-10055
- Field distribution and potential drop in semiconducting field emitter, noting nonlinear effects in indium trisulfide, electron mobility and multiplication factor
05 p0806 A69-15630
- Field aligned Birkeland currents generation at auroral latitudes
05 p0755 A69-16266
- Pulse generation in Q switched traveling wave laser, noting effect of field amplification [IEEE PAPER Q-5]
07 p1154 A69-19077
- Lanthanum hexaboride single crystal field emitters for vacuum devices, describing construction and performance
09 p1468 A69-22601
- Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions
12 p2113 A69-26041
- Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
12 p2132 A69-26097
- Cineradiography based on repetitive flashes drawn from single field emission X ray tube energized by high voltage pulse generator
12 p2086 A69-26163
- CO adsorption on tungsten, determining work function changes and Fowler-Nordheim preexponentials on field emitter single crystal faces
14 p2409 A69-29093
- Unsuccessful space charge noise suppression measurements on field emission tubes, obtaining diffusion and shot noise measurements at high currents
16 p2752 A69-32384
- FIELD INTENSITY METERS**
- Calibration of interference measuring instruments, stressing input impedance calibration of field intensity meters
15 p2577 A69-30375
- FIELD MODE THEORY**
- Transient nonlinear mode partially responsible for anomalous operation of IMPATT diodes below transit time cut-off frequency
01 p0043 A69-10559
- Mode coefficients for geometrical optics field expansion at waveguide feed junction of sectoral horn
09 p1468 A69-22590
- FIELD STRENGTH**
- NT ELECTRIC FIELD STRENGTH**
- NT MAGNETIC FLUX**
- Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
02 p0207 A69-11689
- Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point
02 p0317 A69-11978
- Satellite TV transmitter power requirements for adequate direct broadcasting field strength in existing UHF TV bands
03 p0394 A69-13578
- Propagation tests of skywave field strength reduction by orthogonal transmission
03 p0395 A69-13597
- Waveguide field of arbitrary cross section determined on models with quasi-static fields
05 p0717 A69-15635
- Field strength, electron temperature and ion concentration fluctuations in axial direction determined from measurements between homogeneous and stratified plasma columns
05 p0800 A69-15736
- Probability distribution of field strength fluctuations in p-n junctions taking into account impurities distribution
05 p0807 A69-16000
- Electromagnetic field strength of narrow polarized monochromatic light beam, noting spatial curvature and twisting in beam current line
07 p1147 A69-18524
- Geometric optics and polarization properties of spherical reflector for integral representation of focal region fields, discussing stationary phase and field points
08 p1272 A69-20017
- Atmospheric radio noise at 27 kc measured at European stations, showing field strength variations, latitude dependence and amplitude distribution
09 p1491 A69-22163
- Quasi-static modified field distributions in inhomogeneously filled cavities and waveguide tubes, comparing with homogeneously filled cavities and obtaining matrix eigenvalues
09 p1467 A69-22561
- OMEGA VLF navigational transmission phase delay variations and field strength measurements on transatlantic propagation path, noting effect of directional change
09 p1538 A69-22595
- Static ferromagnetic frequency doubler graphic design, considering magnetic field strength and flux density, energy cycle and energy transfer
10 p1663 A69-23566
- Fading velocity short period characteristics and duration and depth of field strength variations over transhorizon path compared with corresponding atmospheric parameters
12 p2028 A69-25897
- Iono-index about hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions
12 p2148 A69-26107
- Microwave propagation in Venusian atmosphere, analyzing refraction angles, attenuation and field strength fluctuations
13 p2223 A69-28567
- Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
13 p2224 A69-28720
- Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point
15 p2680 A69-30260
- UHF propagation in spherically stratified superrefractive troposphere with trapping surface layer, discussing distant field strength dependence on refractivity profile
16 p2752 A69-32388
- Waveguide field of arbitrary cross section determined on models with quasi-static fields
16 p2762 A69-32493
- Field strength determination at reception point for long range short wave paths, taking into account multiple ray paths and antenna radiation patterns
20 p3520 A69-37035
- Ionosphere reflected radio waves field strength measurements, obtaining formula for ground wave discrimination
23 p4123 A69-41861
- FIELD THEORY [ALGEBRA]**

- NT ELECTRIC FIELDS**
- Killing fields applied to nonsymmetric spaces specify coordinate lines with slowest possible metric tensor variation and gravitational radiation
01 p0115 A69-10018
- Einstein-Maxwell equations corresponding to superposed electric and magnetic fields stationary solutions, noting singularities in metric tensor
01 p0115 A69-10020
- Gravitation theory similar to special relativity and Newtonian theories, noting gravitational potential, metric and Newtonian charts
01 p0115 A69-10340
- Field theory of gravitation, discussing consequence of universality of gravitation /space-time geometry determination/
01 p0116 A69-10443
- Motion, field momentum and field kinetic energy equations of concentrated dislocations based on Zorski field theory of defects
02 p0336 A69-11556
- Gaussian type microfield formation in plasma by placing constraints on plasma particles displacements
02 p0285 A69-11568
- General structure of magnetic surfaces of 3-turn helical magnetic field with axial current flow, noting closed magnetic trap production
02 p0288 A69-12168
- Electromagnetic fields in vacuum extended to fields in presence of matter, deriving field equations covariant under Lorentz proper and improper transformations
02 p0281 A69-12196
- N body systems with/without external field, noting galactic field effect on system flattening
02 p0322 A69-12270
- General covariant quantization of gravitation and cosmology
02 p0326 A69-12640
- High energy strong interaction theory in cosmic ray physics, discussing Regge model, fireball production and quark problem
03 p0469 A69-12940
- Bogoliubov transformations effect on quasi-free translationally invariant states of fermion fields, using Clifford algebra based on Hilbert space
03 p0455 A69-13364
- Gravitational field representation based on linear spin-two field without direct self interaction, using divergence free nonlocal projection of matter stress tensor
03 p0466 A69-13388
- Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors
03 p0467 A69-13755
- Conformal change and connection relations in Einstein unified field theory, noting tensor applications
03 p0467 A69-13756
- Factorizability of Einstein field equations in two dimensional spinor formulation
03 p0468 A69-13759
- Shape and stability of interface between liquids subjected to surface tension and mass force field in vessel
03 p0417 A69-13809

Electromagnetic theory of gravitational forces unifying electromagnetic, meson and gravitational fields
03 p0469 A69-14096

Field theories and direct interparticle action theories of classical electrodynamics, establishing general correspondence between formalisms
04 p0631 A69-15189

Nonlinear field theories for continuum mechanics noting heat, kinematics, isotropic materials, viscometric flows, elastic bodies, thermodynamics and wave motion
05 p0792 A69-15768

Asymptotic formulas for field diffracted by conducting wedge illuminated by line source usable for self consistent field analyses
05 p0720 A69-16344

Feynman rules for electromagnetic and Yang-Mills fields from gauge independent path dependent field formalism
05 p0794 A69-16363

Feynman rules for gravitational field from coordinate independent field theoretic formalism, expressing path dependent Green functions in path independent functions
05 p0794 A69-16364

Regularization of perturbed Keplerian motion in three dimensional space by means of Levi-Civita transformation generalized to three dimensions
05 p0827 A69-16602

Satellite orbit evolution under effect of small perturbing force with constant magnitude and direction
05 p0829 A69-16672

Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force field
05 p0765 A69-16684

Vehicle motion parameters in Newtonian central force field determined, using geometrical structures devised from properties of velocity hodograph
05 p0765 A69-16686

Asymptotic wave equation application conditions in describing field behavior near caustic surface, using Airy functions
07 p1076 A69-18520

Finite formulation of field theory applied to quantum electrodynamics, assuming Bogoliubov causality and TCP invariance of S operator
07 p1181 A69-18957

Quantum mechanical perturbation treatment of optical parametric luminescence in nonlinear lithium niobate crystals, noting applications to noncolinear phase matching problems
[IEEE PAPER K-8] 07 p1152 A69-19067

Relativistic systems and relativistic Hamiltonian systems defined by second order equation, discussing canonical transformations conserving vector field Hamiltonian character
07 p1182 A69-19331

Magnetic energy relationships in magnetosphere, discussing confinement energy of magnetic dipole field, energy of transient compression and zero order energy of trapped particles
07 p1128 A69-19359

Gravitational and inertial field equations of Maxwellian form leading to gravitation theory consistent with special relativity
07 p1182 A69-19408

Riemann metric leading to empty flat space from Rainich equations of already unified field theory
07 p1182 A69-19418

Gravitational field in static spherical shell of matter in vacuum, deducing exact junction conditions for thin shell
07 p1182 A69-19453

Radiation pattern solved for antenna enclosed in radome, deriving exact formulas for scalar field
07 p1112 A69-19543

Ray path geometry derived by Poynting vector to calculate surface fields due to creeping waves in sphere planes
08 p1274 A69-20046

Interlocking systems within Galaxy, deducing gravitational theory accounting for galactic spiral patterns
08 p1387 A69-20136

Linear approximation of Moller condition for reference frames interpretable as linear approximation of field equation in tetrad theory of gravitation
08 p1351 A69-20287

General theory of relativity and tensor field equations relating space time characteristics to local properties of matter and vacuum, using Palatini Lagrangian method
09 p1593 A69-21572

Counterexample to Tangherlini argument, discussing inconsistency of postulates leading to Schwarzschild metric without field equations
09 p1540 A69-22100

Einstein cosmological field equations solved after subjecting electromagnetic null field metric tensor to Einstein gravitational field equations, noting coordinates significance
10 p1778 A69-23406

Matrix formulation of electromagnetic field equations and nonlinear conservation laws for measurable quantities
10 p1725 A69-24049

Metal surface distribution of electromagnetic field from striding transducer in eddy current flow detection, calculating magnetic field component
10 p1697 A69-24071

Mechanical model for oscillatory motion of solid body in Newtonian central force field
11 p1919 A69-25179

TEM-WAVE propagation between parallel conducting planes, stressing changes in curved waveguide sections
11 p1841 A69-25619

Conservative system /with two degrees of freedom/ motion in plane harmonic force field with potential satisfying Laplace equation, discussing graphic trajectory construction
11 p1920 A69-25745

Field distribution in HF flame discharges by measuring electrical and geometrical parameters of discharge channel
12 p2140 A69-27128

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures
13 p2339 A69-27566

Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant
13 p2300 A69-28450

Quasi-integral analytic continuation operator applicability to potential field approximated by certain truncated series expansion
14 p2470 A69-29032

Gravitational recoil, showing integration of Einstein equations in axisymmetric case reduced to integration of equations for Fourier coefficients
14 p2485 A69-29358

Energy momentum tensor in Einstein field equations derived from covariant field equations for vector meson
14 p2486 A69-29452

First order approximation to spherically symmetric solution of Einstein equations, noting gravitational and cosmic lambda force potentials
14 p2521 A69-29455

Asymptotic expansions for Einstein-Maxwell field representing gravitational and electromagnetic radiation from finite source of matter and charge
14 p2486 A69-29635

Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
14 p2528 A69-29970

Junction diode field factor, comparing results of dynamic impedance and distortion measurement methods with deduced values of static characteristic
15 p2575 A69-30301

Uniform approximation mathematical theory applied to wave propagation problems, considering cylindrical waves and rainbows and glory scattering
15 p2653 A69-31165

Neutral point theory applied to solar wind and magnetospheric physics, discussing magnetic field reconstructions
16 p2846 A69-31596

Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
16 p2812 A69-32053

Inertial navigation system theory that uses increased numbers of newtonometers /force measuring devices/ in place of gyroscopic sensitive elements
16 p2791 A69-32283

Conservation laws in general relativity, discussing Noether theorem, Bianchi identities, superpotential, Einstein-Klein theorem, momentum method and outgoing radiation
16 p2813 A69-32362

Einstein equations for empty space applied to degenerate gravitational fields with twisting rays, admitting shear-free twisting congruence of null geodesics
17 p3004 A69-32832

Quantum electronics theory, Volume 1, covering radiation-matter interactions, relaxation processes, spontaneous and stimulated emission, etc
17 p2982 A69-33686

Angular spectrum representation of diffracted wave fields expressible by plane wave expansions containing only homogeneous waves
17 p3007 A69-34153

Einstein gravitational field equations series expansion in powers of gravity constant by Bondi method for gravitational waves
18 p3173 A69-35146

Burger condition for distortion field of dislocation lines in continuous medium, considering arbitrary shape in arbitrary motion
19 p3439 A69-36477

Space transitions identified with asymptotic solutions at system field equations transition points
19 p3445 A69-36811

Stationary electromagnetic wave fields LF behavior, discussing integral operators, incident and tangential fields, single valued solutions, etc
20 p3487 A69-37071

Response of pi electrons in large organic molecule to scalar field for coronene, showing oscillator strength enhancement near single particle excitation band
20 p3580 A69-37497

Force fields to establish nature and position of remotely located conditions, discussing radiated power, electromagnetic waves, black body radiation, etc
20 p3494 A69-37747

Atomic sources local multipolar field in anisotropic dielectrics determined from magnetic dipole radiation spatial distribution measurements
21 p3779 A69-38531

Unquantized field calculations extended to include atomic field effect on atom, predicting spontaneous decay rate from excited state and light frequency time dependence
21 p3769 A69-38578

Linear field gravitation theories, discussing spin dynamics
22 p3979 A69-39976

Lagrange formulation of gravitation finite range theory compared with Einstein theory
22 p4027 A69-40656

Natural frequencies of N open dielectric waveguides system, obtaining fields expressions and dispersion equation for propagation constants
22 p3901 A69-40954

Field theories of gravitation and experimental survey of general relativity theory, discussing red shift, Mercury orbit rotation, light deflection, solar oblateness, etc
23 p4192 A69-42330

Gravitational field quantization according to Einstein theory using classical Hamiltonian dynamics and quantum rules for constraints
23 p4192 A69-42332

Particle creation and quantized fields in expanding universe using covariant generalization of special relativistic free field equations, studying zero- and arbitrary-spin particles
24 p4352 A69-43193

General relativity uniqueness established by postulating derivability of equations of motion from gravitational field equations
[AIAA PAPER 67-481] 24 p4365 A69-43668

FIGHTER AIRCRAFT

NT F-2 AIRCRAFT

NT F-4 AIRCRAFT

NT F-104 AIRCRAFT

NT F-106 AIRCRAFT

NT F-111 AIRCRAFT

NT G-91 AIRCRAFT

NT JAGUAR AIRCRAFT

NT P-1127 AIRCRAFT

NT SAAB 37 AIRCRAFT

VFX fighter aircraft, discussing U.S. Navy requirements influence in VFX-1 and VFX-2 design
03 p0367 A69-13675

Airframe/propulsion blending in high performance fighter aircraft, discussing thrust augmentation, fuel consumption, induction system and exhaust nozzle balance with airframe
03 p0364 A69-13676

Swing wings on combat aircraft and SST, discussing suitability for aircraft carriers and problems in aerodynamic balance
03 p0367 A69-13677

Tactical support aircraft size, economy and flexibility requirements based on Vietnam experience
04 p0549 A69-15486

Engine air intake for operational Harrier V/STOL strike/reconnaissance fighter, describing intake instrumentation ring, temperature and pressure probe development and pressure recording
05 p0767 A69-16773

First flight test phase of multipurpose Viggen aircraft designed as basic platform for attack, trainer, reconnaissance and fighter versions
06 p0867 A69-17662

Mass distribution and inertia characteristics influence on spin susceptibility and spin recovery characteristics for eight current fighter aircraft [AIAA PAPER 69-188]
06 p0868 A69-18057

Military applications of VTOL aircraft, discussing role in battle area with restricted surface transportation [AIAA PAPER 69-326]
07 p1055 A69-19556

Fighter aircraft design and performance criteria including acceleration, maneuvering, interception and turning combat capabilities
14 p2393 A69-29700

Frequency hopping technique applied to multiple access air-to-air/ground communication for tactical fighters, noting additive recognition
17 p2931 A69-34117

Tactical fighter aircraft avionics technical risk and integration, considering initial and operating costs, combat sequence and weapon control
17 p2902 A69-34128

Gross weight and aircraft size estimates for configuration design of fighter aircraft [SAWE PAPER 760]
18 p3220 A69-34880

Design iteration loop calculations related to fighter aircraft weight growth factor, noting asymptotic aircraft performance and strength [SAWE PAPER 732]
18 p3221 A69-34893

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat/Fort Worth [AIAA PAPER 69-811]
19 p3289 A69-35629

Fighter aircraft higher order control system dynamics effects on longitudinal handling qualities evaluated by in-flight simulator for role of pilot induced oscillations tendencies [AIAA PAPER 69-768]
19 p3245 A69-35655

System engineering to select hydraulics subsystem for advanced fighter aircraft by cost effectiveness analysis, noting maintainability and reliability
19 p3254 A69-36012

Wind tunnel tests of swept wing fighter aircraft for transonic buffet onset lift coefficient resulting from camber and leading and trailing edge deflection [AIAA PAPER 69-793]
19 p3238 A69-36297

Onboard radar for light interceptor aircraft /Aida II/, discussing navigation, low altitude penetration and air to air missile interception
19 p3278 A69-36701

Northrop F-5-21 fighter design, avionics, performance and operational existence
21 p3646 A69-38732

Fighter pilot teeth loss prevention and curative treatments, describing various suitable dentures
21 p3661 A69-39277

Background flying experience of tactical fighter aircraft pilots accident potential, comparing accident and nonaccident groups
23 p4103 A69-41685

MIG-21 fighter aircraft development, characteristics and technical and operational data
24 p4251 A69-42795

FIGURE OF MERIT

Figures of merit for polycrystalline uniaxial antiferromagnetic materials, for nonreciprocal devices at millimeter and submillimeter wavelengths, calculated from perturbation theory [IEEE PAPER 17.11]
01 p0045 A69-10720

Undetected defects and false alarm probabilities for automatic test equipment, emphasizing quality and confidence limits
03 p0428 A69-13187

Single mode intensity measured for 0.6328 micron He-Ne laser as function of cavity Q, using Lamb semiclassical theory
07 p1157 A69-19414

Wideband 4 GHz Esaki diode injection locked oscillator, noting locking figure of merit and locking bandwidth
09 p1470 A69-22785

Telemetry system sensitivity as function of noise figure, noting SNR and noise and bandwidth effects on system information handling capability
11 p1840 A69-25300

Analog correlator performance interpreted as output SNR dependence on input signals and integrating

system characteristics, covering filters and finite time integrators
14 p2413 A69-29485

Plasma thermionic diode figure of merit based on Hatsopoulos model altered to include thermal conduction and electrical resistance
22 p3869 A69-40134

FILAMENT WINDING

Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels
05 p0785 A69-16488

Delamination effects on strength degradation of filament wound composites
06 p0946 A69-17126

Axial loading of unidirectional composite with hexagonal array of isotropic circular filaments generalized for filament anisotropy, discussing matrix elastic modulus and Poisson ratio
07 p1170 A69-18724

Filament winding process variables effect on carbon or fiberglass reinforced composites, determining mechanical properties
08 p1338 A69-20489

Tensile characteristics of discontinuous unidirectional fiber reinforced glass-epoxy composites and filament wound material, discussing alignment and interfacial bonding
08 p1339 A69-20496

Laminates and filament wound structures using carbon fibers with silicon carbide whiskerized surfaces, noting compositing and laminating techniques
08 p1339 A69-20501

Fire retardant brominated epoxy systems for wet filament winding process, noting viscosity, pot life and NOL ring mechanical properties
08 p1340 A69-20507

Planar ribbon winding for buildup control of material near polar openings of filament wound vessels, discussing ribbon width and density
09 p1507 A69-22328

Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve
09 p1508 A69-22339

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing
09 p1508 A69-22340

Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites
11 p1890 A69-24337

Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating
11 p1907 A69-25679

Glass finish and glass resin chemical bond adhesion roles in filament wound structures response, failure and filament strength
14 p2468 A69-29345

Boron filament wound composite structures fabrication noting physical properties
14 p2455 A69-29413

Nondestructive tests for glass filament wound composites void content, considering test methods and mechanical properties prediction role
17 p2979 A69-33656

High modulus filament wound composites used for propellant and pressurization tanks, discussing overwrap and liner permeability, porosity, weight, etc
19 p3354 A69-35513

Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels
19 p3321 A69-35567

Axially symmetric distribution of residual strain in multilayered filament wound ring analyzed and compared with experimental results
20 p3628 A69-37774

Filament wound composites for structures, discussing fabrication, properties and aerospace applications
21 p3753 A69-39496

Fracture strength of glass fiber-reinforced cylinders made by unidirectional filament winding predicted by analyzing three dimensional stress distributions
21 p3846 A69-39795

Static and fatigue strength of end-closed filament-wound vessels under internal pressure
21 p3846 A69-39797

Ultrasonic method for detecting strength defects in filament wound materials
21 p3733 A69-39798

Initial stress dependence on tensile load in glass fiber reinforced plastic rings during winding
22 p4045 A69-40749

FILAMENTS

Crystal structure of boron filaments vapor deposited on tungsten wire substrate, using X ray diffraction and transmission-electron microscopy
02 p0268 A69-12405

Very thin short metallic filament scattering and absorption cross sections for various values of filament conductivity
03 p0395 A69-13623

Boron carbide continuous filaments preparation and properties, discussing use in resin and metal composites [ECS PAPER 210]
05 p0783 A69-16236

Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines
17 p3025 A69-34224

Macrostructural differences between filaments of B and SiC vapor deposited onto small diameter W wire, discussing radial cracks due to dilatation
18 p3160 A69-34266

Random arrays representing random filament packing of actual composite materials, discussing effects on transverse stiffness
20 p3626 A69-37758

B composite materials in helicopter development, including B and C filament production and B filament applications
22 p3971 A69-40899

Cassiopeia A luminous filaments motion study noting stellar remnant magnitude
24 p4389 A69-43746

FILLERS

Filler metals for HY steels, discussing tensile and yield strength, elongation and area reduction of butt welds deposited
08 p1320 A69-20406

Bulk weld filler metals, discussing granular compositions, electrodes and iron, nickel and cobalt base deposits
11 p1891 A69-24931

Dielectric constants of nonconducting composite suspensions of spheres and parallel cylinders in terms of filler particles, matrix and volume fraction
13 p2287 A69-28677

Transverse bending of asymmetric sandwich plates with rigid filler taking into account stresses and strains in filler
17 p3055 A69-33129

Damping constant of sandwich samples with foam plastic filler subjected to torsional and flexural vibrations determined for aircraft design applications
17 p2993 A69-33942

Hollow thin walled carbon spheres developed as filler material for resins in low weight high temperature applications
19 p3355 A69-35522

Dual filler metals for increasing joint efficiency by changing fusion zone composition, discussing mechanical properties in Ti and Al plates welding
22 p3956 A69-40462

FILM BOILING

Silicon carbide deposition from liquid organic compounds using film boiling applied on heated tungsten wire substrate
02 p0252 A69-11804

Liquid nitrogen dispersed flow film boiling data accounting for droplet breakup by vapor acceleration, drag coefficient and heat transfer from wall [ASME PAPER 68-HT-44]
02 p0351 A69-12203

Heat release during boiling of downward flowing liquid oxygen film
04 p0687 A69-15161

Film boiling of subcooled liquid nitrogen in turbulent flow tubes, using one dimensional mathematical model of rod-flow regime
07 p1243 A69-19737

Film and transition boiling as functions of critical temperature, discussing role of heat transfer and vapor production
11 p1997 A69-24458

Heat transfer and skin friction in convective and stagnation flow laminar film boiling in boundary layer flows with appreciable radiation
11 p1873 A69-25242

Creeping flow model of Leidenfrost boiling with moving surface, discussing vaporization time for equivalent drop film boiling on stationary surface [AIChE PAPER 20]
15 p2718 A69-31116

Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by

FILM CONDENSATION

violent film boiling and conduction through thin vapor layer

15 p2718 A69-31117

Film vaporization of fuel in combustion chambers of aircraft turbines, determining concentration and velocity distributions of fuel and air

20 p3633 A69-37921

Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections [ASME PAPER 69-HT-27]

24 p4412 A69-43541

Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment

[ASME PAPER 69-HT-26]

24 p4412 A69-43542

FILM CONDENSATION

Outgassed condensation effects in vacuum on magnesium difluoride overcoated UV irradiated Al mirrors, including temperature effects, Lyman alpha reflectance and IR analysis of deposits

13 p2299 A69-28015

Condensation dynamics of atom by solid body model consisting of one dimensional chain of harmonic oscillators

21 p3775 A69-39557

FILM COOLING

Film cooling by subsonic gas injection of air through porous flat plate into 2.9 Mach air flow, noting wall temperatures

03 p0413 A69-12994

Gaseous film cooling at various hot gas acceleration rates and free stream turbulence levels

06 p1033 A69-17557

Film cooling design criteria for small rocket engines [AIAA PAPER 68-617]

09 p1570 A69-21978

Film cooling injection slots number and position over flame tube and minimum cooling airflow in aircraft gas turbines

09 p1625 A69-22623

Velocity and temperature profiles in gaseous turbulent boundary layer above liquid surface used to study liquid film cooling heat transfer

13 p2375 A69-27792

Mass transfer cooling data correlation for estimating mass injection effect on slender cone drag

13 p2199 A69-28224

Thermal shielding effectiveness of flat wall behind tangential blowing slit, considering case of quasi-isothermal homogeneous turbulent boundary layer

14 p2537 A69-28971

Injection film cooling effect on surface heat transfer downstream of flush nontangential injection holes and slots in turbine applications [AIAA PAPER 69-523]

16 p2843 A69-32703

Film cooling slot adiabatic wall effectiveness measurement in two dimensional constant property flow, showing role of lip thickness and injection angle

20 p3585 A69-37082

Flat surfaces downstream of heated section and porous strip, determining film cooling effectiveness and heat flux from heat transfer coefficients ratios

20 p3631 A69-37096

Foamed liquid as potential coolants in rocket engine to overcome low efficiency and streaky coverage of conventional liquid film cooling

24 p4408 A69-43127

FILM THICKNESS

Erosion damage of bearing alloy lining in thin lubricating oil film, considering Cu-Pb alloy and tin base white metal

01 p0094 A69-10313

Radial face seals lubricating mechanism noting surface waviness effect on film thickness fluctuations

01 p0087 A69-10910

Elastohydrodynamic lubrication, discussing film thickness and dependence on fluid hydrodynamics and contact zone deformation

01 p0088 A69-11324

Surface layer effects on conductivity of vacuum deposited gold films, studying resistance variations with film thickness

02 p0300 A69-12625

Photoelectric effect of thin gold films on silver and quartz substrates, analyzing work function dependence on thickness of deposited metal

02 p0300 A69-12630

Photoelectric effect of thin gold film under electric field, noting work function dependence on film thickness exhibits extremum

02 p0300 A69-12631

Nondestructive measurement of thin transparent film thickness by interference method, noting diffusion profiles

03 p0430 A69-13634

Space charge layer thickness determination in plasma filled capacitor by capacitance measurement, noting thickness dependence on plasma potential

03 p0477 A69-13714

Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication

04 p0605 A69-14587

Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness

06 p0981 A69-17892

Film thickness effect on wear life of resin bonded solid lubricant film compared for various load test conditions

[ASLE PREPRINT 68AM 7C-4]

07 p1139 A69-18624

X ray fluorescence and electron microprobe for determining thin film thickness

07 p1113 A69-19582

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals

08 p1294 A69-21118

Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation

09 p1622 A69-21904

Photocell base thickness for optimal power to weight ratio, noting photons spectral distribution and absorption coefficient dependence on frequency

09 p1443 A69-22719

Thin film thickness and composition determination through scattered electron and characteristic X ray radiation recording

10 p1747 A69-23847

Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas

12 p2088 A69-26178

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection

12 p2143 A69-26459

Gases effect on electrical conductivity of vacuum deposited thin films of Cr, Be, Ni, Au and Ge at different thickness and low pressure

12 p2143 A69-26460

Electrical properties of electron beam evaporated Ti, Zr and Hf films as function of substrate temperature, material and film thickness

13 p2321 A69-28010

Light sensitivity dependence of semiconductor-metal systems on layer thickness

14 p2508 A69-29666

Absorption band edge position in p type indium antimonide thin films after heating, showing forbidden bandwidth function relationship to film thickness

15 p2666 A69-30044

Thin film thickness determined by weighing film and substrate in liquid having same density as substrate material

15 p2607 A69-30239

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness

[ASLE FICFS PREPRINT 15B]

15 p2620 A69-30484

Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films

[ASLE FICFS PREPRINT 21]

15 p2622 A69-30500

Electrical resistivity of aluminum oxide films deposited on tubular substrates by plasma and gas flame spraying, noting dependence on film thickness and substrate

15 p2630 A69-31179

Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation

17 p2935 A69-32889

Elastohydrodynamic lubrication film thickness in finite elliptical contact determined by two dimensional Reynolds equation in inlet region, using finite difference approximation

[ASME PAPER 69-LUBS-17]

18 p3120 A69-34379

Silicon carbide compact coatings deposition on graphite by silicon tetrachloride, H and benzene gaseous mixture, relating layer thickness to temperature and process duration

20 p3566 A69-37368

Chalcogenide semiconductor film switches time parameters, showing delay time decrement with thickness decrease and voltage increase

21 p3780 A69-39045

Film thickness and normal load effect in thin films solid friction, noting dependence on deformation at contact

22 p3955 A69-40407

F-111 sandwich structure adhesive joints glue lines, describing thickness measurement techniques and acceptance criteria

24 p4403 A69-43461

Centrifugal forces effect on stability of inviscid liquid film over rotating cylinder away from stagnation region, noting film thickness stabilization effect

24 p4305 A69-43597

FILMS

Convective heat transfer across fluid film limited by right sections of two parallel circular hollow steel cylinders

01 p0176 A69-11135

FILTERING

U FILTRATION

FILTERS

Frequency selective mechanical filter and LCR circuits and applications, noting inductances in solid state and thin film technology

09 p1467 A69-22558

Filter network synthesis for realization of rational functions, discussing numerator polynomial inclusion by choice of divisor polynomial and branch introduction and parallel systems

10 p1667 A69-24038

Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters

16 p2784 A69-32576

Acoustic filters performance determination, standing wave tube and anechoic termination methods

20 p3464 A69-37321

Isotropic ideal bidimensional filter in interpretation of anomalous gravity fields, especially for separating local and regional effects

21 p3724 A69-39246

FILTRATION

NT SPATIAL FILTERING

Algorithms for error analysis, optimum filtering sensitivity and fixed interval smoothing solutions to linear estimation problems

02 p0224 A69-11961

Singularities of optimal filtration for random signals given by differential equations with variable coefficients and white noise

13 p2218 A69-27251

Airborne particle size influence on gas turbine parts erosion, with attempts to relate to filtration and engine life

16 p2794 A69-32026

On-board digital filtering applied to spectral estimation and data compression, discussing theory, techniques, computerized implementation and prototype design

[AIAA PAPER 69-969]

24 p4285 A69-43510

FIN STABILIZERS

U FIN

U STABILIZERS [FLUID DYNAMICS]

FINE STRUCTURE

Fine structure of vibrational spectra of molecular H and O, water and deuterium oxide, using molecular photoelectron spectrometer

01 p0023 A69-10141

Spectral fine structure in emission from pulsars, noting correlation between fading and spectral change

01 p0150 A69-10273

Polar aurorae fine scale structure interpretation based on plasma instabilities characteristics

02 p0239 A69-11693

Interactions of moving solar plasmas and solar magnetic fields, discussing solar velocity fields and fine structure observations

02 p0329 A69-12784

Turbulent mixing of scalar fields such as temperature or concentration noting fine structure, number and distribution of zero gradient points and minimal gradient surfaces

03 p0414 A69-13134

Solar chromosphere dark mottles size, shape and evolution, using high resolution photography near solar disk center

03 p0515 A69-14038

Chromosphere fine structure in Lyman alpha intensity, compiling isophote map

03 p0515 A69-14039

Effective slip systems in hexagonal close packed magnesium alloy under static and hydroexplosive loading, examining flow mechanism for fine structure formation

04 p0615 A69-14639

Atmospheric fine structure studied by amplitude distribution and autocorrelation functions for different heights of scatter volume in microwave range

04 p0628 A69-15306

Bright streaks in H alpha disk chromosphere, noting predominantly horizontal loop structures

04 p0664 A69-15525

Fine structure and geology of lunar surface from Luna, Ranger, Surveyor and Orbiter data

07 p1212 A69-18547

Three dimensional Fourier synthesis at low resolution for calculating ribosome electron density distribution in chromatoid bodies

07 p1074 A69-19394

Diffuse interstellar absorption bands and doublet line, noting large intensities of forbidden transitions

08 p1395 A69-20639

Galactic and intergalactic ionic fine structure transitions effect on background microwave radiation intensity

09 p1590 A69-21445

Interplanetary scintillation of radio sources to determine size and motion of plasma irregularities in solar wind for fine structure

09 p1594 A69-21658

Fine structure of absorption lines of circumstellar Ca ejected from Nova Delphini 1967, determining ejection dates and photospheric radius

13 p2346 A69-27709

E layer fine scale structure, F1 reactions and F2 reflected signals analysis during 20 May 1966 solar eclipse

13 p2255 A69-28541

Polar aurorae fine scale structure interpretation based on plasma instabilities characteristics

13 p2258 A69-28724

Partial wave description for calculating cross sections of fine structure transitions of Na in collision with He, discussing shape resonances

15 p2655 A69-30198

Ca XV spectrum in vacuum UV under laboratory conditions, discussing fine structure of ground level of Ca XV and coronal lines

15 p2688 A69-30553

Collision free earth shock wave gross and fine structure deduced from OGO 5 plasma diagnostics [AIAA PAPER 69-676]

17 p2961 A69-33452

Solar radio bursts spectra fine structure, discussing observations of fast drift storm, drift pair and split pair bursts

17 p3024 A69-33607

Fine structure of 9 June 1968 solar flare related to nonflare chromosphere in active regions

17 p3024 A69-33802

CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure

18 p3181 A69-34274

Transition probabilities of N I far UV multiplets, comparing experimental and theoretical results

18 p3178 A69-35413

Spectral lines due to magnetic dipole transitions in fine structure levels in collisionally excited neutral H clouds, discussing theoretical difficulties in interpretation

19 p3379 A69-36225

Abrasion and corrosion resistant Cr-Co-B cast alloys in aggressive media, concluding resistance is due to chromium boride and fine dendritic structure

19 p3347 A69-36742

4 October 1965 type IV solar burst, studying acceleration mechanisms for fast electrons by comparing fine structure at various frequencies

22 p4001 A69-39983

Solar magnetic field measurements for fine structure of magnetic asymmetry at different heights and within sunspots, discussing asymmetry for corona and interplanetary space

22 p4010 A69-39990

Emission dynamics and fine pulse structure in GaAs injection lasers, determining pulse duration and amplitude dependence on current and resonator length

22 p3963 A69-40603

V contents influence on high temperature strength and fine structure interrelation in low alloy CrMoWV steels

22 p3972 A69-41083

FINENESS RATIO

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models

[AIAA PAPER 69-350] 13 p2243 A69-28284

FINES

Lunar rocks and fines samples physical, chemical, mineralogical and biological preliminary analysis at Lunar Receiving Laboratory

24 p4382 A69-42935

FINISHES

U GLAZES

FINITE DIFFERENCE THEORY

Boundary value bending problem for anisotropic shells of revolution under asymmetrical loading solved by finite difference technique

01 p0165 A69-10088

Finite difference method for boundary value problem for second order differential equation, demonstrating convergence

01 p0105 A69-10721

MHD equations describing interactions between gases and magnetic fields solved by finite difference method

01 p0129 A69-10722

N dimensional extensions of finite difference scheme for solution of differential heat conduction equation, noting practical limit by truncation error considerations

01 p0107 A69-11365

Eigenvalue problem for Laplace operator for two dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method

02 p0271 A69-11650

Finite difference schemes for axisymmetric oscillations of shells of revolution filled with liquid

03 p0523 A69-12951

Finite difference solution of time dependent Navier-Stokes equation for incompressible fluids, using velocities and pressure as variables

03 p0415 A69-13369

Finite difference method for symmetric positive linear differential equations, discussing methods to solve finite difference equations generated

03 p0455 A69-13370

Finite element solution of Helmholtz equation and application to waveguides with complicated boundaries

03 p0404 A69-13598

Analysis of solution of Navier-Stokes equations describing two dimensional flow of viscous incompressible fluid by finite difference techniques and introduction of curl

03 p0416 A69-13652

Finite difference schemes to solve fundamental equations in boundary layer flow theory

03 p0416 A69-13655

Implicit finite difference scheme to integrate unsteady boundary layer equations for compressible gas

03 p0416 A69-13656

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques

03 p0363 A69-13657

Finite difference methods to solve Cauchy problem for three dimensional Laplace equation

03 p0424 A69-13661

Slow nonNewtonian flow in separation zone analyzed using finite difference scheme

04 p0587 A69-14594

Boundary value problem of hyperbolic equation with discontinuous boundary conditions

04 p0622 A69-14617

Difference approximation with second order accuracy of numerical solution for parabolic type equations

04 p0622 A69-14618

Transformations useful for finite difference solution of differential equations with infinite regions, considering flow problems application

04 p0588 A69-14717

Finite difference approximation for numerical solution of periodic parabolic problem subject to nonlinear boundary condition

04 p0625 A69-15131

Difference schemes implementation through fractional time step and phase error methods reduce dispersion

04 p0591 A69-15282

Finite differences for identifying partial differential equations and associated boundary conditions of distributed parameter system [ASME PAPER 68-WA/AUT-1]

05 p0738 A69-16185

Three dimensional boundary layer problems analyzed by exact numerical method [AIAA PAPER 69-138]

06 p0911 A69-18041

Chemical kinetic model for hydrocarbon fuels combustion and application to multidimensional finite difference mixing analyses in hypersonic engines and nozzles [AIAA PAPER 69-86]

06 p1037 A69-18119

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations [AIAA PAPER 69-89]

06 p1028 A69-18133

Finite difference computations for calculating two dimensional natural convection, deriving requirements for numerical stability

07 p1242 A69-19397

Stability of cylindrical shells under concentrated annular loads using finite difference method, discussing critical loads, moments and errors

07 p1238 A69-19688

Axisymmetric jet impingement against solid plane from tube at finite distance, using nonlinear partial differential equation in finite difference form [AICHE PAPER 31F]

08 p1302 A69-19847

Finite difference numerical solutions to free streamline axisymmetric potential fluid flow, noting independent and dependent variables consideration in boundary value problem

09 p1481 A69-21920

Constant property turbulent boundary layer flow, developing finite difference solution for prediction of velocity profiles and skin friction coefficient

09 p1482 A69-21950

Validity of finite difference approximations for barotropic instability of zonal currents

09 p1537 A69-22298

Requirements for numerical solution of Navier-Stokes equations by finite difference method found limited to Re values with no turbulence

10 p1678 A69-22917

Finite difference schemes of high order of accuracy for Strum-Liouville and boundary value problems with regular singularity

10 p1719 A69-23365

Finite difference approximation to degenerate Dirichlet problem, obtaining a priori estimate to prove convergence

10 p1719 A69-23517

Stability and error bounds in numerical integration of ordinary differential equations, determining highest possible degree of stable finite difference form

10 p1719 A69-23518

Finite difference technique for numerical computation of steady supersonic two dimensional gas flows, with or without diffusion normal to mean flow streamlines

10 p1679 A69-23595

Finite difference method for transient and steady state response of vibrating plates, considering explicit and implicit formulas

11 p1983 A69-25020

Finite difference solutions for time dependent equations of motion for steady flow around cylinder at large Reynolds numbers

11 p1872 A69-25133

Finite difference method for heat transfer for developing laminar flow at inlet of circular uniformly heated and isothermal tube, determining Nusselt number

12 p2062 A69-26242

Waveguide higher order modes solved by finite difference method, employing successive overrelaxation to compute field potentials at discrete points in arbitrary guide shapes

13 p2228 A69-27670

Parameter identification in linear dynamical systems with transport lags, discussing linear differential-difference equations and finite difference theory

13 p2289 A69-27945

Finite difference solution to TEM mode transmission line cross section for defining continuous potential function leading to capacitance upper bound

13 p2221 A69-28064

Laminar boundary layer studies by finite difference computer program for Mach numbers up to 15

13 p2248 A69-28173

Finite difference Newton-Raphson algorithm extension to solve variational equations for simultaneous optimization of trajectories and associated parameters [AIAA PAPER 68-115]

13 p2353 A69-28203

Differential equation with finite jump type discontinuities

14 p2424 A69-28811

Finite difference treatment of mixed boundary value problems in two dimensional elastostatics, using first derivatives of displacement components at grid points
15 p2706 A69-30432

Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of nonlinear structural systems using finite differences or elements
15 p2711 A69-30871

Godunov finite difference method modified for steady or unsteady flowfields about planar axisymmetric blunt bodies, presenting body pressures and shock shapes
16 p2732 A69-31886

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations
16 p2871 A69-31897

Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods
16 p2771 A69-32003

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem
[AIAA PAPER 68-318] 16 p2874 A69-32158

Generalized finite difference approximations of linear partial differential operators in space based on functional approximations
16 p2756 A69-32552

Mixed supersonic/subsonic type steady wake flow fields in flat based slender bodies, using finite difference method
[AIAA PAPER 69-649] 17 p2892 A69-33468

Finite difference schemes for barotropic fluid free surface model primitive equations tested for numerical integration stability and accuracy
17 p2997 A69-33691

Natural longitudinal oscillations of variable cross section straight rods, assessing errors due to use of finite difference schemes
18 p3217 A69-34581

Convergence properties of finite difference approximations to solutions of Dirichlet problem for Poisson equation
18 p3164 A69-34840

Finite difference scheme for primitive equation model, emphasizing two grid internal noise suppression to improve gradient force expression accuracy
19 p3364 A69-36507

Long term integration of fluid motion equations with finite difference scheme using hexagonal grid system to avoid nonlinear computational instability
19 p3364 A69-36508

Finite difference analogs with increasing error terms applied to simple differential Laplace operator for accuracy determination
19 p3365 A69-36510

Plane elastic deformation in isotropic homogeneous medium using displacement vector, discussing finite difference equations and application to rectangular boundary
19 p3441 A69-36719

Rectangular plate bending element corresponding to finite difference method use, deriving stiffness matrix from strain energy approximation
20 p3619 A69-36949

Radiation absorption and emission problem for material of unit density at rest solved by finite difference scheme
21 p3773 A69-39666

Natural convection in rectangular cavity with nonuniform lateral surfaces temperature, using finite difference scheme with numerical analysis
21 p3855 A69-39853

Radial and tangential stress analysis of rotating disk during steady state creep, using equations solved by finite difference method
22 p4043 A69-40458

Finite-difference grid procedure for predicting friction heat and mass transfer in two dimensional boundary layers
22 p3932 A69-40939

Boundary layer separation and free mixing phenomena between streams behind thin flat plate by finite difference methods and Prandtl exchange coefficient
23 p4060 A69-41912

Boundary conditions for Tricomi equation in symmetric positive form, showing analytical and finite difference solutions
24 p4339 A69-42792

Iterative finite difference method for initial value problems applied to hyperbolic system representing

one dimensional time dependent flow of compressible polytropic gas
24 p4340 A69-43226

FINITE ELEMENT METHOD

Finite element method in stress analysis for axisymmetric rotors design, describing computer program and applications
19 p3445 A69-36826

Finite element displacement method using elastic analogy applied to viscoelastic materials plane stress analysis
19 p3445 A69-36830

Finite elements general theory applied to wave propagation, gas kinetics, nonlinear partial differential equations, continuum mechanics and fluid dynamics
20 p3567 A69-36948

Stiffness matrices in plane elasticity problems by Galerkin method, leading to simultaneous expressions related to finite element method
20 p3619 A69-36951

Finite element discretization technique extended to time dependent processes emphasizing dynamics and heat conduction, discussing applications to aircraft transient response
20 p3575 A69-37204

Transverse stiffness and strength of unidirectional fiber-reinforced composites determined as function of fiber volume content, using finite element method and stress functions
20 p3623 A69-37354

Finite element analysis and strain gage results to verify end constraint on off-axis tensile coupons and to design test specimen
20 p3628 A69-37775

Computerized aircraft structural analysis system, adopting finite element technique /direct stiffness method/ based on COSMOS system
21 p3842 A69-39307

Finite element relaxation method for computing stress distribution in thin walled structure, considering computer program, storage and solving time
21 p3843 A69-39313

Isoparametric finite element system for stress analysis, with examples for arch dam, impeller and cellular structure, illustrating shells of revolution
21 p3732 A69-39314

Finite element method application to minimum principle for incompressible lubrication problem, noting flow boundary conditions and squeeze film effects
22 p3955 A69-40406

Cylindrical shells bending by finite element /cylindrical strips/ method, considering shells of arbitrary shape and variable thickness
22 p4046 A69-40968

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending
22 p4046 A69-40969

Natural coordinates in finite element method, giving formulas for straight or curved element analysis and polynomial integration
23 p4182 A69-41901

ASTRA /advanced structural analyzer/ based on stiffness approach to finite element method, generating mathematical model for stresses and deflections
23 p4232 A69-42144

Triangular plate bending element using Herrmann variational method, deriving matrices for finite elements
24 p4404 A69-43591

FINITE-STATE MACHINES

U TURING MACHINES

FINLAND

Finnish space research covering satellite tracking and telemetry facilities, different Faraday and Doppler measurements with Explorer 22 signals, etc
15 p2723 A69-31426

FINNED BODIES

Finned tube radiators optimum design for waste heat removal from space power plants
02 p0354 A69-12664

Finned radiation emitter tube unsteady state temperature field as function of working body temperature and emitter geometry
05 p0846 A69-15898

Local film heat transfer coefficients variations effect on longitudinal constant area fin surface under turbulent flow
[ASME PAPER 68-HT-20] 13 p2373 A69-27770

Finned tube radiators with constant longitudinal specific heat flow, determining thermal efficiency and optimal thermal and structural parameters
20 p3631 A69-36978

FINS

NT COOLING FINS

Constant thickness fin with arbitrarily distributed heat sources optimized using approximate physical model and closed form solution of field equation
[SAE PAPER 690198] 07 p1239 A69-18302

Temperature variation and heat transfer in fins and relations between heat-flux-density and temperature difference
12 p2190 A69-25763

FIRE CONTROL

Military rotor blade radar antennas for all-weather low level flight and fire control
04 p0559 A69-15197

Airborne IR line scanning systems for latent forest fire detection, discussing discrimination module for automatic identification of hot targets
12 p2193 A69-26994

Airborne IR remote sensing techniques for fire detection, considering marginal and submarginal targets
12 p2098 A69-26995

Multifunction helicopter rotor blade radar for navigation, IFR approach and fire control, including flight test results
[AHS PAPER 315] 17 p2920 A69-33535

Helicopter fire control systems evaluation by computer model for hit probability and impact point sensitivity to various parameters
[AHS PAPER 316] 17 p2933 A69-33540

AH-56A Cheyenne integrated avionics, armament and fire control system for precise weapons delivery and navigation
[AHS PAPER 312] 17 p2903 A69-33542

Onboard hybrid computer for helicopter fire control system, generating turret pointing angles and corrections
17 p2934 A69-34074

FIRE EXTINGUISHERS

Flame extinguishing potential of various substances for low pressure premixed and diffusion flames
13 p2380 A69-28460

Halon 1301 fire extinguisher for burning spilled hypergol on Apollo/Saturn LM adapter, discussing concentration requirements and exposure hazards
18 p3094 A69-35062

Halon 1301 /bromotrifluoromethane/ concentration for inerting Aerozine-50 spills or extinguishing fires, noting joint use of carbon dioxide and water
18 p3094 A69-35090

Manual extinguisher using bromochlorodifluoromethane /BCF/ for aircraft cabin fire protection, discussing design and low toxicity, corrosiveness and cost
19 p3256 A69-36863

FIRE FIGHTING

Concorde SST fire protection equipment, discussing fire and overheat detectors, fire extinguisher, crash fire protection, explosion suppression equipment, etc
19 p3256 A69-36864

FIRE PREVENTION

Flammability handbook for plastics noting characteristics, behavior under fire conditions and various fire hazard reduction mechanisms, tables, drawings, manufacturers, suppliers, etc
04 p0620 A69-14952

Supersonic aircraft fire detection using coherent fiber bundles
06 p0926 A69-17679

Apollo spacecraft fire, presenting recommendations for power supply, cabin atmosphere and safety measures
07 p1071 A69-18970

FAA regulations for improvements on crashworthiness and emergency evacuation from viewpoint of plastic applications and fire safety in aircraft
08 p1254 A69-20497

Foam carpet and airport equipment to prevent fires and explosions from retracted gear landings
10 p1674 A69-23708

Polyurethane with additives for fuel fire control in aircraft structures, achieving desired protection without impairing foams mechanical properties
15 p2561 A69-30311

Physical and physiological hazards of cryogenic liquids, emphasizing fire and explosion problems associated with storage and handling
17 p3017 A69-33684

Fire-retardant thermoplastic and thermosetting materials for electronics industry use including blending of fire-retardant additives into plastics
18 p3162 A69-35273

Ignition hazards in electrical circuits contaminated by glycol fluids, describing hazard detection by RF

- methods, decontamination procedures, safety checks, etc
19 p3359 A69-36028
- Manual extinguisher using bromochlorodifluoromethane /BCF/ for aircraft cabin fire protection, discussing design and low toxicity, corrosiveness and cost
19 p3256 A69-36863
- Concorde SST fire protection equipment, discussing fire and overheat detectors, fire extinguisher, crash fire protection, explosion suppression equipment, etc
19 p3256 A69-36864
- Fire hazard in closed chamber associated with intestinal hydrogen and methane formed by space diets, comparing Gemini-type and bland diets
20 p3482 A69-37622
- Apollo spacecraft fire, presenting recommendations for power supply, cabin atmosphere and safety measures
20 p3483 A69-38218
- Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation
22 p3890 A69-40212
- Ignition of aircraft fluids leaked onto hot turbofan engine surfaces, considering cooling air direction, surface temperature, nacelle engine compartment ventilation, engine power, etc [SAE PAPER 690436]
23 p4200 A69-41653
- Flame resistant organic fiber in cross linked polymer structure, discussing properties and aerospace applications
24 p4337 A69-43424
- FIREBALLS**
Bolide fireball radiation maximum efficiency from observed spectra, using monochromatic radiation efficiency data for rarefied atoms and ions in meteor comas
03 p0512 A69-13692
- Nuclear explosions electromagnetic effects on electronic systems, considering signals emitted from fireball and signal attenuation by changed atmospheric propagation
13 p2234 A69-28344
- Fireball events, isobars and meson resonances in very high energy nuclear interactions, discussing dispersion and four momenta transfer methods
13 p2303 A69-28380
- Meteorite orbits analysis with emphasis on recovered meteorites, noting fireballs and hyperbolic orbits
19 p3414 A69-36115
- Photographic networks for meteors orbits and trajectories and meteorites impact points during nighttime, discussing fireball occurrence
19 p3415 A69-36120
- Network for fireball trajectories rapid analysis to recover meteorites and obtain orbital elements data, noting role of planetariums
19 p3295 A69-36121
- Transverse momentum of fireball particles emitted in high energy inelastic collision related to emission angle and energy in accelerators
19 p3396 A69-36644
- FIREBEE 2 TARGET DRONE AIRCRAFT**
Firebee 2 /BQM-34E/ turbojet-propelled recoverable supersonic aerial target construction, performance prediction and missions
09 p1434 A69-21901
- FIRES**
Deficiencies in two hazard classification system for detonating and fire producing materials from analysis of chemical industry accident fatality statistics
04 p0645 A69-14471
- Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire [AIAA PAPER 69-618]
17 p3074 A69-33704
- FIREFORKS**
U PYROTECHNICS
- FIRING [IGNITING]**
NT RETROFIRING
NT ROCKET FIRING
NT STATIC FIRING
NT TEST FIRING
- Exploding wire detonators without primary explosive, discussing high precision fabrication, safety aspects and firing circuit
01 p0120 A69-10676
- Initiation of detonation by incident shock waves in hydrogen-oxygen-argon mixtures
02 p0304 A69-12313
- Igniter formulations characteristics, discussing desirable properties
10 p1750 A69-23009
- Simplified model of ignition tests with liquid propellant rocket engines under high vacuum conditions, giving possible parameter for evaluation of simulation of real conditions [DVL-831]
10 p1754 A69-24022
- FIRING TIME**
U BURNING TIME
- FIRST AID**
Medical aid organization after aircraft accidents at airports, examining injury probability by statistical methods
23 p4107 A69-41812
- Medical aid, equipment and organization for injured passengers in large aircraft accidents at airports and immediate neighborhood

18 p3091 A69-34902
- Schweikhard method for measuring changes in lift, drag and pitching moment of fixed wing aircraft as function of distance from ground
20 p3462 A69-37423
- FLAGELLATA**
Photoinhibition of cell division and growth in Euglenoid flagellates by fluorescent and incandescent visible light
01 p0014 A69-10903
- FLAME HOLDERS**
Flame stabilization by jet flame holders for case of different composition of jets and incident flow
03 p0531 A69-12956
- Nitrogen dilution low pressure simulation technique for subsonic flow flame stabilization of bluff bodies
09 p1624 A69-22614
- Hydrogen diffusion flames stabilization by flame holders in supersonic flow at low stagnation temperature, measuring burning limits [DVL-813]
09 p1624 A69-22615

Turbulent premixed ammonia-air flame stabilization on flameholders, discussing secondary oxygen injection into circulation zone at blowoff limits
21 p3849 A69-38808

FLAME INTERACTION

U CHEMICAL REACTIONS

FLAME IONIZATION

Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium
01 p0176 A69-10385

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber
02 p0353 A69-12324

Chemiluminescence and chemionization in flames, considering electrically conducting properties and spectral analysis
06 p1032 A69-17423

Flame inhibition with electron attachment observed using halogenated hydrocarbons
06 p1034 A69-17926

Positive ion concentration in subsonic high velocity laminar flames determined by interpreting kinetic and diffusion factors of adding cesium to flame
13 p2380 A69-28463

Major ions in chemi-ionization of hydrocarbon flames determined for heats of formation by photoionization mass spectrometer
22 p3896 A69-40727

FLAME PROBES

Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium
01 p0176 A69-10385

Chemiluminescence and chemionization in flames, considering electrically conducting properties and spectral analysis
06 p1032 A69-17423

Heat transfer from unseeded DC augmented propane air flame to water cooled probe placed beyond discharge zone
06 p1035 A69-17934

Thermocouple and optical methods for temperature profile measurement in slow burning flat hydrogen-nitrogen-oxygen flame at atmospheric pressure
07 p1242 A69-19489

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra
16 p2877 A69-31768

Plasma parameters relationship with double electrostatic probe volt-ampere characteristics, applying corrected formulas for temperature, ion density, etc, to flame diagnostics
18 p3137 A69-34932

FLAME PROPAGATION

Gas combustion stability with respect to one dimensional perturbations, considering flow compressibility stabilizing effect
01 p0174 A69-10107

Detonation wave initiation in gaseous media, noting transition process for flames accelerating to detonation and explosions behind reflected shock wave
02 p0350 A69-11530

Flame zone development of monopropellant droplets during heat-up period
02 p0352 A69-12310

Hydrogen bromide, HI and HCl effects on hydrogen-air mixtures flammability, discussing flame propagation inhibition efficiency
02 p0304 A69-12315

Spherical flames of spark-ignited dust clouds, discussing streak film photographs, flame propagation, particle burnout time and burning velocities
02 p0353 A69-12323

Chemical reaction scheme effect on hot zone structure of hydrogen-oxygen diffusion flame, considering influence of hydroxyl radical
03 p0531 A69-12895

Inflammable gas mixtures and deflagrations noting self ignition temperature, flame propagation, flame front structure and flame stability
06 p1031 A69-17417

Flame establishment and propagation in gas phase taking into account aerodynamic and chemical kinetics
06 p1031 A69-17418

Reciprocal interaction of combustion wave and field of turbulence, discussing aerodynamic principles, turbulence effect on flame propagation speed and measuring methods
06 p1032 A69-17420

Laminar and turbulent regimes of flame propagation studied by blowing explosive gas mixture through porous wall, determining Reynolds number by hot-wire anemometer
06 p1034 A69-17626

Impinging jet flames on furnace hearth, analyzing thermal boundary layer characteristics and convective heat transfer rates
06 p1035 A69-17933

Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation
07 p1241 A69-18708

Chemical reactions in boundary layer on porous plate in oxygen stream, discussing similar solution of laminar boundary layer equations with flame front
07 p1119 A69-18735

Homogeneous turbulent gas flame front location as function of caloric value of mixture and flow velocity
08 p1420 A69-19998

Flame front instability in air-propane mixtures established by motion picture study
08 p1421 A69-20344

Thermal approach to pulsating combustion, determining temperature-time variation, frequency and pressure from mathematical model
09 p1625 A69-22694

Flame propagation normal velocity evaluated with heat transfer equation at flame front taking into account temperature, pressure and inert gas percentage
09 p1625 A69-22695

Steady flames transition into spherical detonation in various gas mixtures using high speed photography in sealed volumes
10 p1810 A69-23897

Turbulent flame propagation velocity in homogeneous premixed combustible gas, using one dimensional inviscid flame model
11 p1998 A69-24473

Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization
11 p1940 A69-24477

Turbulent flame propagation described by turbulence intensity and integral scale and fuel properties including laminar flame velocity and equivalence ratio
11 p1999 A69-24482

Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water
11 p1999 A69-24484

Flame velocities of stable premixed tetrafluoroethylene-oxygen mixture flames measured with bunsen-cone method
11 p1940 A69-24485

Steady propagation of flame front initiated by local ignitor /spark/ in gas mixture, discussing critical requirements, boundary conditions, etc
11 p2001 A69-25190

Flame front propagation over solid fuel surface with hot igniting material injected into end-to-end cavity, discussing heat transfer by convection and radiation
11 p2001 A69-25193

Electric fields effect on flame front propagation structure and velocity, obtaining color toepolograms by high speed photography
12 p2190 A69-26192

Steel cylinder wall materials effects on flame propagation at constant volume of propane-air mixtures
13 p2379 A69-28363

Turbulent burning velocity definition for one dimensional turbulent flow and average flame orientation perpendicular to flow direction, discussing transient flames in turbulent environment
13 p2379 A69-28452

Thermal ignition of methane-oxygen mixture, observing flame propagation
13 p2380 A69-28459

Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front
15 p2548 A69-31007

Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction
16 p2876 A69-31711

Flame propagation velocity for different gas mixtures enclosed in glass tube determined by fiber optics devices
16 p2789 A69-31764

Initial temperature effects on flame propagation velocity in turbulent flow of homogeneous gasoline-air mixture under realistic conditions
16 p2837 A69-32138

Two phase detonations of fuel in liquid layer on shock tube wall with gaseous oxidizer, presenting one dimensional approximation for film detonation propagation
16 p2879 A69-32151

Additives effect on flame propagation velocity and stability in N diluted hydrogen-chlorine propellants, noting entrained air role [WSC1 PAPER 69-13]
16 p2831 A69-32353

Flame propagation in narrow slit and fine hole of solid propellant grain [AIAA PAPER 69-561]
16 p2833 A69-32680

Monograph on turbulent isothermal swirl-free jets and turbulent swirling flames, studying mixture and propagation in free space
17 p3068 A69-32996

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight
17 p3069 A69-33136

Normal flame speed during gas combustion in calorimetric bomb with constant combustion volume calculated by approximate equations
17 p3069 A69-33137

Computer calculation of kinetic characteristics of normal flame propagation during gas combustion, constructing physical model and differential equation system
17 p3069 A69-33138

Temperature and pressure effects on flame propagation rates, burning time and combustion zone length in turbulent flows of homogeneous gas mixtures
17 p3069 A69-33140

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and at different initial fuel temperatures, discussing safety and ignition problems
17 p3074 A69-33662

Turbulent velocity of flame propagation in supersonic stream of hydrogen-air mixture determined by velocity distribution, exchange coefficient and burning time
19 p3448 A69-35854

Flame and pressure /or velocity/ oscillations interaction in unstable combustion regimes, considering tubes with propane-air mixtures
19 p3450 A69-36357

Flame acceleration data applied to unburnt gas boundary layer analysis, discussing velocity and temperature profiles, layer thickness variation and expansion phase backflow
19 p3450 A69-36359

Transverse and longitudinal velocity components of detonation waves in stoichiometric hydrogen-oxygen propagating in fundamental mode in square section tube
19 p3451 A69-36367

Flow induced by plane flame traveling supersonically or subsonically at constant speed through long tube studied for flow field steadiness in flame fixed coordinates [ASME PAPER 69-FE-33]
20 p3460 A69-37993

Propagation characteristics of steady adiabatic one dimensional laminar flames in premixed gases, considering activation energy and Lewis number
21 p3849 A69-38802

Flame pressure drop and burning velocity related, discussing stream tube area expansion error
21 p3849 A69-38806

Ammonia addition effect on laminar flame speeds of propane-air mixtures
21 p3849 A69-38809

Combustion turbulence effect on flame propagation velocity taking into account flame-generated pulsation velocity as function of temperature and flame velocity
21 p3850 A69-38861

Interferometric study of cool flame propagation in equimolar propane-oxygen mixtures, observing refractive index and temperature distribution changes
21 p3852 A69-39595

Book on rate constants of chemical reactions from flames covering flame propagation, mass spectroscopy, electron spin resonance, particles diffusion, combustion physics, etc
22 p3895 A69-40318

Aircraft fuel vent line sensitivity to lightning hazards, using flame propagation and arrester experiments with high voltage and high current facilities [SAE PAPER 690434]
23 p4062 A69-41651

FLAME QUENCHING

U EXTINGUISHING

U QUENCHING [COOLING]

FLAME SPRAYING

- Alumina radomes manufacture by flame spraying process, discussing raw materials quality control, spraying operation, sintering and final inspection
07 p1142 A69-19528
- Electrical resistivity of aluminum oxide films deposited on tubular substrates by plasma and gas flame spraying, noting dependence on film thickness and substrate
15 p2630 A69-31179
- Metal or ceramic layers application to substrate by flame spraying process
21 p3731 A69-38938

FLAME STABILITY

- Gas combustion hydrodynamic stability using feedback equation and theorems for variations in mass and momentum vector
01 p0173 A69-10087
- Stabilized low temperature ignition of cyclohexane using vertical flow reactor
02 p0304 A69-12314
- Flame stabilization on rectangular burners, discussing blow-off limits correlation by velocity gradients close to corners
02 p0353 A69-12320
- Combustion and flame stabilization in axisymmetric laminar or turbulent H flows, noting combustion rates and flame breakdown conditions
02 p0355 A69-12673
- Flame stabilization by jet flame holders for case of different composition of jets and incident flow
03 p0531 A69-12956
- Air jet high temperature and low pressure influence on combustion stability in ramjet engine
03 p0531 A69-12968
- Unsteady motions of diffusion flame sheet due to perturbations of reactant concentration, approximating species and energy conservation requirements
03 p0532 A69-13014
- Inflammable gas mixtures and deflagrations noting self ignition temperature, flame propagation, flame front structure and flame stability
06 p1031 A69-17417
- Activation energies in baffle stabilized flame deduced from reaction zone using gas chromatography
06 p1035 A69-17930
- Turbulent premixed flames stabilization, determining gas flow velocity, turbulence intensity, flame thickness and burning velocity relation to intensity
06 p1035 A69-17931
- Flame front instability in air-propane mixtures established by motion picture study
08 p1421 A69-20344
- Nitrogen dilution low pressure simulation technique for subsonic flow flame stabilization of bluff bodies
09 p1624 A69-22614
- Hydrogen diffusion flames stabilization by flame holders in supersonic flow at low stagnation temperature, measuring burning limits
09 p1624 A69-22615
- Ethylene oxide and ethane low pressure fuel-rich flames mass spectrometry, analyzing composition and temperature profiles and OH radical role
11 p1831 A69-24478
- Stability of slow combustion in viscous gas mixture, showing viscosity as principal stabilizing factor
11 p1999 A69-24554
- Hydrodynamic instability of normal flame and turbulent combustion of gas mixtures, considering surface and volume combustion models
11 p2000 A69-25186
- Electrodynamic model applicability to HF flame discharge for case of flame discharge stabilization by axial air injection
12 p2140 A69-27126
- Flame extinguishing potential of various substances for low pressure premixed and diffusion flames
13 p2380 A69-28460
- Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers
16 p2879 A69-32141
- Sound effects on turbulent flame in gasoline-air mixture jet in Toepfer device with pulsed light source, measuring ionization in combustion zone
17 p3069 A69-33141
- Diffusion flame stability at inlet of fuel stream into oxidizer, showing ignition coordinates dependence on fuel, oxidizer and ratio of burning flow rate
19 p3448 A69-35855
- Detonation in unbounded gas mixture starting from spherical flame, discussing stability of gasdynamic discontinuities and cellular structure
19 p3450 A69-36358

- Propagation characteristics of steady adiabatic one dimensional laminar flames in premixed gases, considering activation energy and Lewis number
21 p3849 A69-38802
- Temperature and concentration measurements of H radical in hydrogen flames
21 p3669 A69-38807
- Turbulent premixed ammonia-air flame stabilization on flameholders, discussing secondary oxygen injection into circulation zone at blowoff limits
21 p3849 A69-38808
- Temperature influence of homogeneous kerosene-air mixture on flame stabilization by mechanical and gas dynamic baffle systems
21 p3850 A69-38859
- Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest
21 p3851 A69-39092
- Monograph on electrically heated turbulent flames in cylindrical combustion chamber, investigating temperature distribution and stability
21 p3853 A69-39707
- Turbulence characteristics of flow influence on critical flameout conditions of disk shaped flame stabilizer, circulation zone length and combustion efficiency by bluff body
24 p4408 A69-43078

FLAME TEMPERATURE

- Electric field effects on flame temperature variation, suggesting electrons active role in flame combustion reactions
01 p0176 A69-10389
- Line reversal and excitation temperatures in low pressure flames
02 p0350 A69-11709
- Line reversal temperature measurement technique, calculating error and outlining correction methods for flames with cool boundary layers and flames containing solid particles
06 p1035 A69-17929
- Heat transfer from unseeded DC augmented propane air flame to water cooled probe placed beyond discharge zone
06 p1035 A69-17934
- Solid propellant burning rate behavior during abrupt environmental pressure excursions, using transient combustion model
[AIAA PAPER 69-172] 06 p1036 A69-18046
- Thermocouple and optical methods for temperature profile measurement in slow burning flat hydrogen-nitrogen-oxygen flame at atmospheric pressure
07 p1242 A69-19489
- Isothermal theory of cool flames, discussing oscillations-fuel consumption relations, kinetics, etc
11 p1970 A69-24476
- Chemical mechanism of two stage spontaneous ignition controlled by cool flames of alkane-air mixtures under engine conditions to avoid knocking
11 p1998 A69-24479
- Monograph on comparison of various methods for experimental determination of temperature fields in laminar burner flames
11 p1999 A69-24635
- Interferometric study of cool flame propagation in equimolar propane-oxygen mixtures, observing refractive index and temperature distribution changes
21 p3852 A69-39595
- Monograph on electrically heated turbulent flames in cylindrical combustion chamber, investigating temperature distribution and stability
21 p3853 A69-39707

FLAMEOUT

- Extinction by depressurization of AP composite solid propellants theory to predict rate of pressure decrease required to achieve flameout
[AIAA PAPER 69-176] 06 p0983 A69-18102
- Flame burnout of atomized hydrocarbon fuel in gas turbine combustion chambers as function of ratio of time to total burnout time
08 p1420 A69-19999

FLAMES

- NT DIFFUSION FLAMES
- NT PREMIXED FLAMES
- Diffusional, thermal diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics
01 p0175 A69-10144
- Microcalorimetric measurement of radiation flux of flames of condensed burning material, noting surface temperature distribution
02 p0355 A69-12671

- Equilibrium between H and OH radicals in turbulent H flames, noting component concentrations in H-O-N flames of different composition
11 p1999 A69-24487
- HO₂ radical detection in rarefied H flame produced by HF discharges, recording high amplitude signals
15 p2716 A69-30054
- Monograph on static pressure and turbulence in free jets and jet flames covering radial velocity oscillations with and without chemical reactions, confined jets turbulence, etc
15 p2719 A69-31190
- Spectroscopic quantitative analytical method for measuring atomic absorption in flame based on determining integral absorption magnitude during evaporation
20 p3539 A69-37605

FLAMMABILITY

- Burning ability and inflammability of mixtures of powdered Mg, Al, Mg alloys or Al alloys and C-H-O organic compounds
02 p0355 A69-12669
- Detonation capacity of mixture of ammonium perchlorate base and polymethyl methacrylate and polystyrene, noting critical particle size dependence on composition
02 p0305 A69-12674
- Flammability handbook for plastics noting characteristics, behavior under fire conditions and various fire hazard reduction mechanisms, tables, drawings, manufacturers, suppliers, etc
04 p0620 A69-14952
- Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation
04 p0621 A69-14957
- Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation
08 p1335 A69-20114
- Flammability control for aerospace avionics systems safety, considering risk, test method, acceptability criteria, confidence level and ignition source
24 p4336 A69-43422
- Hazard rating for flammability of aerospace materials in air and oxygen environments applied to J-2 rocket engine insulation
24 p4336 A69-43423
- Flame resistant organic fiber in cross linked polymer structure, discussing properties and aerospace applications
24 p4337 A69-43424

FLAMMABLE GASES

- One dimensional unsteady flows of combustible gas mixture with finite chemical reaction rates, considering piston motion, igniting shock wave propagation and point explosion
06 p0909 A69-17325
- Inflammable gas mixtures and deflagrations noting self ignition temperature, flame propagation, flame front structure and flame stability
06 p1031 A69-17417
- Gas dynamics effects of hot spot in explosive gas mixture using kinetic rate equations, discussing composition, enthalpy and time dependence
[WSCI PAPER 68-53] 07 p1240 A69-18322
- Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas
07 p1119 A69-18705
- Turbulent flame propagation velocity in homogeneous premixed combustible gas, using one dimensional inviscid flame model
11 p1998 A69-24473
- Hydrodynamic instability of normal flame and turbulent combustion of gas mixtures, considering surface and volume combustion models
11 p2000 A69-25186
- Flame acceleration data applied to unburnt gas boundary layer analysis, discussing velocity and temperature profiles, layer thickness variation and expansion phase backflow
19 p3450 A69-36359

FLANGES

- Symmetric and asymmetric metal flanges effects on radiation patterns of H plane sectoral horns, noting theoretical explanation and applications
02 p0216 A69-12027
- Asymmetric excitation of conducting flanges by primary aperture antenna and consequent radiation pattern
02 p0217 A69-12246

FLAP CONTROL

Rectangular shock tube for use with pressure and vacuum, discussing sealing of circular end flanges to buildup tube
06 p0906 A69-16928

Metal flanges position effect on radiation patterns of H-plane sectoral horn radiators
08 p1285 A69-20554

Gyromotor flanges axial rigidity measuring methods based on axial deflection of flange or natural frequency of oscillating system
09 p1513 A69-22704

Conducting flanges effects on H plane radiation patterns of E plane sectoral horns, noting improved beam width and gain and H plane beam tilting
10 p1665 A69-24063

Flanges flexural rigidity effect on load carrying capacity, failure mechanism and postbuckling behavior of webs in shear, noting permissible load
18 p3227 A69-35492

Asymmetric metal flanges effect on beam tilt of aperture antennas
24 p4288 A69-43765

FLAP CONTROL

U AIRCRAFT CONTROL
U FLAPS [CONTROL SURFACES]

FLAPPING

Hingeless fiberglass rotary wings dynamics, discussing effects of in-plane bending to flapping frequency ratio
[AIAA PAPER 69-204] 07 p1054 A69-19548

Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes
[AIAA PAPER 69-206] 07 p1057 A69-19577

Flapper valves in high pressure hydraulic aircraft systems, with hydrodynamic equations and charts for design and performance characteristics
09 p1435 A69-21296

FLAPS [CONTROL SURFACES]

NT JET FLAPS
NT LEADING EDGE SLATS
NT TRAILING-EDGE FLAPS
NT WING FLAPS

Aerodynamics of flap balanced swivel airfoils, discussing lift curve slope, incidence change response and application of control forces and movements
03 p0364 A69-13908

Lifting reentry dynamic stability of flare stabilizers and flap controls
[AIAA PAPER 69-182] 06 p1017 A69-18053

Hypersonic laminar boundary layers on compression corner model, studying flap lengths effects and mass transfer
[AIAA PAPER 69-36] 06 p0866 A69-18214

Lift augmentation by lateral blowing over lifting surface, discussing wind tunnel pressure tests on wings, flaps and stabilizers
[AIAA PAPER 69-193] 07 p1051 A69-19554

Spoiler effect on aerodynamic characteristics of airfoil with hinged flap in inviscid fluid plane flow
15 p2549 A69-31223

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor
17 p3020 A69-33344

FLARED BODIES

Unsteady aerodynamics of ablating flared reentry body, noting complications due to blunted nose shear flow and entropy gradient effects
02 p0189 A69-12524

Lift efficiency of and stabilization by square flare on high speed missile, comparing wind tunnel measurements with circular conical flare
02 p0190 A69-12544

Wind tunnel tests for static stability of Black Brant 4 vehicle second stage with flare and two fin flare combinations at supersonic speed
17 p2948 A69-34212

Supersonic aerodynamic characteristics of flared cones with various flare angles studied by schlieren photography, showing geometrical parameters influence on flow patterns
19 p3239 A69-36387

Supersonic flow past segmented and blunt bodies, investigating flow characteristics
19 p3242 A69-36783

FLARES

YZ Canis Minoris red dwarf star flare event observation record, noting optical spectrum energy output and slow decay
17 p3043 A69-34165

Meteor flakes nature and statistics from studying 318 meteors characterized by irregular brightness curve
18 p3203 A69-35333

Mayeda flare observed on Mars on 4 June 1937, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature
20 p3608 A69-38049

FLASH

Physiological effects of intermittent light stimulation during helicopter flight, discussing visual and electric cortical functions at critical frequency threshold of subjective fusion
13 p2211 A69-28595

Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations
22 p3872 A69-40198

Psychophysical threshold changes during subliminal monocular and interocular stimulation, studying conditioning flash size effects on temporal summation
22 p3881 A69-40860

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina
22 p3883 A69-40882

FLASH BLINDNESS

Electroretinogram a-wave relationship to early inhibition and excitation of retinal ganglion cells produced by flash superimposition in rabbits
22 p3878 A69-40836

FLASH LAMPS

High repetition rate pulsed illuminator using electrodeless halogen discharge for rapid light extinction
04 p0599 A69-15021

Approach light efficiency, discussing Calvert bar system and strobe flash on basis of pilot questionnaire polling
06 p0884 A69-18029

Xenon flash lamps with electrolytic capacitors designed for photographic studies of laminar flows of viscous fluids
07 p1116 A69-18259

High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences
07 p1065 A69-18976

Stroboscopic generator of trains of high brightness light flashes for hydrodynamic and gas dynamic research, noting electronic control and thyatron circuits
11 p1879 A69-24235

Flash radiography technique using tungsten wire explosion in vacuum to obtain ultrafast reproducible X ray pulse
12 p2092 A69-26480

Kr and Ar flash lamps pumping efficiencies compared for Nd-doped YAG and glass lasers
17 p2980 A69-32958

High speed photography for hypervelocity aerobalistic ranges, using giant pulse ruby laser for front lighting
19 p3306 A69-35732

High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences
20 p3479 A69-38224

Flashlamp-excited organic dye lasers capable of tunable emission throughout most of visible spectrum
22 p3966 A69-41219

Monte Carlo method for energy transfer efficiency of ruby laser pumping cavities by helical flash lamps, noting dependence on ruby parameters
23 p4173 A69-41630

Flash lamp for biological applications, discussing control unit circuitry, pulse duration, frequency and color, flash-dark ratio, etc
23 p4110 A69-42054

FLASH POINT

Test methods for lubricants vapor pressure and flash point determination
[ASLE PAPER 68-LC-23] 15 p2642 A69-30607

FLASHBACK

Flame stabilization on rectangular burners, discussing blow-off limits correlation by velocity gradients close to corners
02 p0353 A69-12320

FLASHING [VAPORIZING]

Laser produced Sb and Te vaporization near critical point, using time of flight mass spectrometer
22 p3993 A69-40719

FLAT LAYERS

Gases emissivity at high temperatures calculated for different gas layer thicknesses and atmospheric pressures, giving results in tabular form
02 p0285 A69-11567

Radiative-conductive heat transfer in plane layer of gray heat conducting medium, solving energy equation
09 p1621 A69-21433

Diffuse reflection of monochromatic radiation by semiinfinite plane layer in case of isotropic scattering, reducing problem to power series
11 p1960 A69-24732

Brightness coefficients for isotropic scattering of homogeneous plane layer in turbid medium, using Legendre polynomials
11 p1960 A69-24733

FLAT PLATES

Viscous electrically conducting fluid with aligned magnetic field flowing past flat plate at nonzero angle of attack
01 p0126 A69-10163

Free convection from partially uniformly heated and partially insulated vertical flat plate, discussing dimensionless velocity, temperature, heat flux and axial length parameters
01 p0175 A69-10331

Time history of unsteady heat transfer in laminar boundary layer over semiinfinite flat plate due to step change in wall temperature or wall flow
01 p0177 A69-11401

Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate
02 p0288 A69-12143

Transient laminar boundary layer development on flat plate following impulsive start of surrounding fluid motion, obtaining temperature and velocity distribution relationship
[ASME PAPER 68-HT-10] 02 p0232 A69-12208

Accelerated plate motion effect on flow of electrically conducting viscous incompressible fluid past infinite flat plate in uniform magnetic field
02 p0289 A69-12237

Surface temperature of flat plate cooled convectively and insulated by circular spot, determining effects of spot radius and Biot number
03 p0531 A69-12863

Transpiration cooling of porous flat plate by injection of carbon dioxide or air into carbon dioxide and air free streams
03 p0413 A69-12996

Boundary layer equations for uniform motion of semiinfinite flat plate through incompressible conducting fluid at rest and in magnetic field, using numerical method
03 p0477 A69-13794

Laminar two dimensional viscous wake behind finite flat plate, investigating upstream and downstream flow field of trailing edge region for high Reynolds numbers
[ASME PAPER 68-WA/APM-20] 04 p0541 A69-14387

Conically bent plate cross section distortion analysis employing von Karman large deflection theory, noting effect of tapering
[ASME PAPER 68-APM/Y] 04 p0670 A69-14402

Unsteady compressible laminar boundary layer flow over insulated or isothermal flat plate moving with arbitrary time variant velocity in viscous fluid
04 p0588 A69-14715

Thermal and ablative lag induced by periodic heat input to oscillating flat plate in high velocity flow, showing crossover from dynamically stabilizing to destabilizing condition as oscillation frequency increases
[AIAA PAPER 67-336] 04 p0685 A69-14720

Hypersonic boundary layer on flat plate with strong hypersonic viscous interaction and uniform surface blowing distribution
04 p0588 A69-14722

Rarefied hypersonic flow model for sharp flat plate in strong interaction regimes, discussing inviscid and viscous shock and merged layers subregimes
04 p0589 A69-14747

Transverse normal waves excitation in flat plate by applying piezoelectric plate or comb shaped emitter to surface or end face
04 p0678 A69-14901

Natural convection heat transfer through enclosed horizontal layer of supercritical carbon dioxide, discussing flat plate configuration data
04 p0688 A69-15398

Stability functions for local buckling of long thin flat walled structures loaded for longitudinal compression and shear
05 p0833 A69-15709

Laminar flow of stably stratified fluid with uniform upstream velocity and density gradient past thin flat plate, discussing upstream wake and boundary layer
05 p0745 A69-15724

Time dependent two dimensional incompressible laminar boundary layers analysis, discussing application to transient flow over semiinfinite flat plate
[ASME PAPER 68-FE-10] 05 p0748 A69-16076

Counter rotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions
[ASME PAPER WA/HT-9] 05 p0846 A69-16117

Elastic-plastic analysis of flat plates in membrane stretching and flexure, using method of initial strains
[ASME PAPER 68-WA/PVP-10] 05 p0840 A69-16191

Circular inclusion effect on stresses around line crack in sheet under tension based on elasticity theory
05 p0841 A69-16432

Boundary layer on flat plate with homogeneous suction, discussing dimensionless displacement/ momentum thickness and wall shearing stress
05 p0752 A69-16744

Heat and mass transfer by catalytic effect at wall, noting interaction of laminar boundary layer on flat plate
06 p1030 A69-17115

Boundary layer transition detection at supersonic speeds, using thin film gages to infer local laminar and turbulent supersonic skin friction
[AIAA PAPER 69-9] 06 p0912 A69-18075

Radiation profiles in ablating flat plate air- Teflon laminar boundary layer, discussing visible, UV and IR wavelengths
[AIAA PAPER 69-99] 06 p1037 A69-18086

Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection
[AIAA PAPER 69-162] 06 p0864 A69-18138

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation
[AIAA PAPER 69-141] 06 p0866 A69-18208

Differential equations governing free convection boundary layer flow past isothermal semiinfinite vertical flat plate solved for large Prandtl numbers by matched asymptotic expansions
07 p1239 A69-18266

Plane anisotropic rectangular plates with various boundary conditions, analyzing stability, natural frequencies, mode shapes and displacement under lateral loads
07 p1232 A69-18719

Discontinuity effect on Ekman layer development at leading edge of flat plate
07 p1120 A69-19044

Transition boundary layer on flat plate in subsonic wind tunnel measured by hot-wire method, obtaining velocity fluctuation distribution and turbulence intensity
07 p1121 A69-19329

Analytical solution for plate velocity statistics of turbulent-flow-excited rectangular flat plate, discussing vibration excitation
07 p1236 A69-19461

Circular turbulent air jet from flat plate into deflecting stream analyzed with potential flow model, noting applicability to V/STOL aircraft technology
[AIAA PAPER 69-223] 07 p1051 A69-19557

Numerical method for three dimensional boundary layer equations, applying perturbation technique and independence principle to rotating flat blade
[AIAA PAPER 69-227] 07 p1051 A69-19560

Liquid flow field about oscillating flat plate, comparing visualization results with numerical solution of Navier-Stokes equations
[AIAA PAPER 69-226] 07 p1121 A69-19565

Dynamic stability of thin flat plates and applications in ship and aircraft deck construction, studying dynamic buckling for rectangular plate
08 p1415 A69-20665

Supersonic jet impingement on flat plate, showing shock wave profiles and slipstream surface at stations parallel to nozzle axis
08 p1252 A69-20841

Transient free convection laminar boundary layer equations for heat transfer from vertical semiinfinite flat plate
08 p1305 A69-20842

Hot air open circuit wind tunnel for testing vaporized fuel films heat and mass transfer over flat plates
08 p1302 A69-20878

Power series solutions of MHD boundary layer equations for flat plate with transverse magnetic field and arbitrary pressure gradient, discussing skin friction
09 p1545 A69-21396

Free transverse vibrations of rectangular flat plate simply supported along periphery and rigidly connected to interior columns
[ASCE PAPER 739] 09 p1616 A69-21928

Local heat transfer coefficients in oscillating turbulent boundary layer over flat plate
[ASME PAPER 69-GT-34] 09 p1623 A69-22490

Wall temperature and Prandtl number effects on turbulent boundary layer thicknesses and shape factors for subsonic compressible gas flow over flat plate
[ASME PAPER 69-GT-55] 09 p1432 A69-22513

Thermal shock stresses in flat plates, solids and hollow cylinders, noting geometry, wall thickness, heat transfer characteristics and material properties effects
[ASME PAPER 69-GT-107] 09 p1619 A69-22523

Large amplitude free vibration of isosceles right angled triangular plate with simply supported edges
10 p1800 A69-23236

Heat transfer at plate in hydrodynamically stabilized turbulent boundary layer region, obtaining formulas for calculating transfer coefficients
10 p1809 A69-23427

Temperature field calculation in infinite plate with heat transfer coefficient and ambient temperature arbitrary functions of time
10 p1809 A69-23430

Laminar flow stream containing periodic fluctuation of mass fraction of chemical species over flat plate with reactive surface
11 p1831 A69-24284

Elastic unbounded isotropic plate weakened by doubly periodic system of identical holes, noting solution involving Cauchy type integral
11 p1972 A69-24652

Turbulent boundary layer velocity distributions in uniform/accelerated compressible flow over flat plate, using change of variables based on mixing length formula
[ONERA-TP-693] 11 p1867 A69-24752

Shock induced boundary layer flow establishment on semiinfinite flat plate, measuring heat transfer rates and transition to turbulence
11 p1869 A69-24890

Velocity profiles in unsteady laminar incompressible boundary layer over flat plate in shock tube by two parameter integral method
11 p1871 A69-25026

Velocity distributions and skin friction coefficients in turbulent boundary layers over flat plate with injection or suction through porous wall
11 p1871 A69-25027

Buckling of long flat panel in combined compression and shear with sinusoidal edge moments and support on two edges and on point supports
11 p1984 A69-25138

Elastic bending moments and shear forces uniformly loaded flat plate structures with rectangular symmetry, using collocation technique and complex variable methods
11 p1986 A69-25241

Free convection boundary layer flow past vertical flat plate analyzed for nonlinear wall temperature distributions using series solutions
11 p2002 A69-25243

Buoyancy effect on boundary layer flow over semiinfinite vertical plate heated to constant temperature in uniform free stream
11 p1874 A69-25352

Free vibration frequencies of simply supported parallelogrammic plates, noting skew angle splitting of degenerate frequencies and frequency crossing of modes
11 p1987 A69-25379

Flat plate in two dimensional low density hypersonic flow wind tunnel tested for aerodynamic effects on spacecraft reentry
11 p1819 A69-25424

Aerodynamic characteristics of flat plate in viscous hypersonic flow incident at zero or small angle of attack, using numerical integration
11 p1820 A69-25471

Viscous flow-induced vibrations of elastically restrained flat plates in narrow channel, considering one dimensional viscous flow theory
11 p1991 A69-25515

Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion
11 p1992 A69-25523

Heat and mass transfer in laminar boundary layer on porous flat plate with variable suction or injection velocity and constant wall temperature
12 p2061 A69-25947

Fracture surfaces of thermally toughened glass plates using Crazz-Schardin spark camera, confirming internal front lead over front in surface layers
12 p2118 A69-26194

Transverse normal waves excitation in flat plate by applying piezoelectric plate or comb shaped emitter to surface or end face
12 p2182 A69-26654

Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
12 p2190 A69-26781

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations
12 p2186 A69-26841

Thermal stability of power transistor plates calculation using equivalent body with equivalent heat source at upper surface
12 p2042 A69-26881

Thermal stability of complex transistorized structures determined by extending method of single heat source equivalence to several interacting sources
12 p2042 A69-26882

Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases
[ASME PAPER 68-HT-43] 13 p2373 A69-27772

Free convection heat transfer from heated inclined flat plate in air, studying effects of angular positions
13 p2375 A69-27794

Incompressible uniform shear flows merging behind trailing edge of semiinfinite flat plate, using inner-outer expansion method based on Navier-Stokes equation
13 p2248 A69-28223

Numerical solutions of equations for high Prandtl number boundary layers in two dimensional flat plate incompressible flow with mass injection
13 p2249 A69-28238

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past circular cylinder
13 p2249 A69-28247

Angle of attack and blunting effect on aerodynamic lift and drag coefficients of flat plates in hypersonic flow at low Reynolds number
13 p2200 A69-28358

Temperature factor effect on transition from laminar to turbulent flow in boundary layer of plate
13 p2251 A69-28558

Flat plate turbulent boundary layer, noting Navier-Stokes equations solutions and formation of rotations to determine velocity field
13 p2251 A69-28632

Flow structure in conical shock wave-sharp flat plate interaction zone in supersonic flow, noting turbulent boundary layer before separation
14 p2428 A69-28897

Three dimensional laminar boundary layer on semiinfinite permeable flat plate in viscous incompressible fluid flow, calculating velocity profiles and skin friction components
14 p2433 A69-29898

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient
15 p2589 A69-30002

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect
15 p2703 A69-30050

Heat and mass transfer interaction at wall for laminar boundary layer on flat plate, considering catalytic effect of wall in atomic nitrogen recombination
15 p2716 A69-30415

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces
[AIAA PAPER 69-386] 15 p2590 A69-30476

Uncoupled dynamic thermal stresses and displacements by heat generation in infinite flat plates, using classical thermoelasticity theory for infinitesimal displacements
15 p2709 A69-30669

Exact static exterior and interior solution of Einstein equations for thick plane plate, discussing surface energy-momentum tensor
15 p2654 A69-31477

Vortex shedding and wake formation behind inclined flat plate at low Reynolds number, using dye injector method for streak line observation
16 p2768 A69-31767

Boundary layer over impulsively started flat plate, describing flow transition from unsteady /Rayleigh/ to steady /Blasius/ state by iterative methods
16 p2769 A69-31812

Stress waves analysis in laminates design, assuming one dimensional linear elastic response to plane stress pulse on flat laminated plate surface
16 p2872 A69-31923

Temperature field in plate heated at one end and situated in solidifying gas, leading to gas layer formation by sublimation
16 p2878 A69-31957

Heat transfer in laminar separated flows with flat plate segment connections, indicating correlation between local heat transfer rates for successive regions
16 p2879 A69-32169

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate
[AIAA PAPER 69-568] 16 p2842 A69-32693

Two dimensional plate theory with moment stress considerations derived from three dimensional elasticity theory, discussing reduction of equilibrium and compatibility equations
16 p2876 A69-32786

Monograph on Navier-Stokes equations with integral relations approximate solution and application to flow around flat plate of finite length
17 p2949 A69-32993

Blockage effects of flat plates and solid bluff bodies in closed wind tunnels compared concerning drag coefficient values
17 p2890 A69-33245

Temperature determination of thick flat plate rotating in space in solar flux with one surface insulated compared with Apollo heat shield results
[AIAA PAPER 69-614] 17 p3071 A69-33266

Air resistance effect on transverse vibration damping of flat specimens of heat resistant alloy, duraluminum, Ti, Mo and Nb
17 p2991 A69-33947

Discrete element displacement method applied to buckling analysis of flat rectangular plates under arbitrary membrane loading, calculating critical load intensities
17 p3066 A69-34048

Stress field in elastic contact area vicinity of hollow sphere subjected to normal load through flat plate, noting contact life
[ASME PAPER 69-LUBS-5] 18 p3212 A69-34383

Three dimensional incompressible wake behind blunt obstacle at leading edge of flat plate compared with mathematical model by Oseen linearization
18 p3083 A69-34403

Boundary layer transition from laminar to turbulent flow on flat plate, considering supersonic and hypersonic flow, pressure gradients, surface curvature and roughness, etc
18 p3123 A69-34920

Standing twin vortices in wake behind thin flat plate normal to flow visualized by Al dust, noting Karman vortex street
18 p3086 A69-35167

Boundary layer equation for steady incompressible flow past flat plate with parabolic leading edge, obtaining series solution in inverse powers of Reynolds number
18 p3124 A69-35270

Accelerometer force balance method for measuring aerodynamic rocket plume forces acting on flat plate model in short duration shock tunnel test environments
19 p3292 A69-35737

Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction
19 p3294 A69-35755

Boundary conditions of incompressible fluid viscous flow on semiinfinite plate edge defined using difference methods for Navier-Stokes equations
19 p3299 A69-36394

Heat flux densities and Reynolds potentials in turbulent boundary layer on heated flat plate with wall suction
19 p3452 A69-36722

Incompressible fluid flow of given density and kinematic viscosity near trailing edge of flat plate
20 p3458 A69-37098

Surface pressure, skin friction and heat transfer measurements on sharp flat plates and wedges in low density hypersonic flow, noting slip velocity
20 p3458 A69-37186

Monte Carlo simulation for studying rarefied hypersonic gas flow about slender cones and flat plates
20 p3459 A69-37902

Unsteady boundary layer flows of compressible fluid over semiinfinite flat plate, discussing heat transfer rate
20 p3518 A69-38318

Momentum and energy equations for fluctuating flow of viscous incompressible conducting fluid past flat plate with time dependent suction under transverse magnetic field
21 p3691 A69-38445

Turbulent skin friction coefficients of compliant surfaces on flat plates determined as function of speed for different materials
21 p3695 A69-39039

Velocity and temperature profiles at Prandtl number values obtained for unsteady laminar free convection on infinite vertical plate with stepwise varying temperature
21 p3853 A69-39681

Thermal boundary layer formed during laminar jet flow over flat porous plate, discussing temperature distribution and mass transfer at plate surface
21 p3854 A69-39846

Velocity profile and skin friction in boundary layer on flat plate with periodic vorticity near leading edge
22 p3929 A69-40015

Laminar viscous flow and skin friction near trailing edge of flat plate analyzed by modified Oseen approximation, noting accuracy for high Reynolds numbers
22 p3930 A69-40683

Unsteady viscous flow past flat plate based on Stokes approximation, calculating shear stress
22 p3931 A69-40684

Forced convection liquid flow past heated flat plate with variable viscosity and thermal conductivity, analyzing velocity and temperature distribution in boundary layer
22 p4051 A69-40685

Strong interaction between hypersonic boundary layer over flat plate and associated inviscid flow, discussing heating and vorticity effects, boundary layer edge, etc
22 p3860 A69-40896

Space-time behavior of random pressure field of turbulent boundary layer on plane plate surface
22 p3933 A69-41027

Nonlinear random vibrations excitation in rectangular flat plate with initial imperfection by white noise, assuming clamped boundary conditions
22 p4048 A69-41183

Unsteady periodic boundary layer stability on flat plate, presenting model for disturbance wave packet propagation streamwise pressure gradients effects in transition flow
23 p4152 A69-41888

Hypersonic turbulent flow heat transfer and pressure data for flat plate containing steps and cavities obtained in hypersonic wind tunnel
[AIAA PAPER 68-673] 23 p4060 A69-41902

Boundary layer separation and free mixing phenomena between streams behind thin flat plate by finite difference methods and Prandtl exchange coefficient
23 p4060 A69-41912

Natural vibrational frequencies of uniform thin elastic isotropic flat plates, investigating rectangular and parallelogram plates with various edge conditions
23 p4233 A69-42348

Flat square plates loaded along two opposite straight edges, analyzing postbuckling behavior and geometric imperfections effects
23 p4234 A69-42395

Hypersonic viscous interaction, studying axisymmetric flow over slender sharp nose cones at zero angle of attack and three dimensional flow over sharp flat plate
24 p4248 A69-43579

Mean velocity and pressure fields in turbulent boundary layer on flat plate at Mach 2 investigated for ratios of mass flow
[AIAA PAPER 68-129] 24 p4304 A69-43581

Compressible laminar boundary layer behind shock or thin expansion wave past moving flat plate solved by transforming governing equations into Blasius equation
24 p4305 A69-43596

Quasi-steady laminar flat plate boundary layer in shock tube determined by reducing boundary layer equations to linear differential equations
24 p4305 A69-43632

Wake development from turbulent boundary layers on both sides of thin flat plate
24 p4249 A69-43694

Jet dynamic characteristics injected into supersonic air slipstream incident on flat body, calculating configuration, shock wave geometry and parameters distribution in flow field
24 p4250 A69-43710

FLAT SURFACES

Directly backscattered light /echoes/ from dielectric plane surface with roughness and volume scattering, comparing indicatrices with moon echo
06 p0887 A69-17173

Electromagnetic wave propagation over constant impedance flat earth, using electromagnetic compensation theorem
10 p1655 A69-23422

Plane contact problems in elasticity theory allowing for cohesive forces solved by integral and differential equations
15 p2706 A69-30578

Flat surfaces downstream of heated section and porous strip, determining film cooling effectiveness and heat flux from heat transfer coefficients ratios
20 p3631 A69-37096

Circular liquid jet oblique impingement on flat surface, noting dry zone occurrence at small angles due to lateral flow deflection
21 p3691 A69-38551

Three dimensional turbulent boundary layer over flat surface in incompressible flow calculated by finite difference method based on time averaged motion equations integration
21 p3693 A69-38767

FLATTENING

Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity
09 p1487 A69-21633

Plastic bending of thin walled pipes taking into account cross section flattening
21 p3835 A69-38868

FLATWORMS

Population feedback control in planarians by fission suppression by brain near other planarians
14 p2406 A69-28871

FLAW DETECTION

U NONDESTRUCTIVE TESTS

FLAWS

U DEFECTS

FLEXIBILITY

Spacecraft control system and flexible structures interactions, discussing transient phenomena, limit-cycle oscillations and instabilities
[AIAA PAPER 69-116] 06 p1019 A69-18187

Field approach for stress and deflection analysis in rectangular plates reinforced by straight ribs, noting kernel function
11 p1983 A69-25019

Linearized theory for stability of self acting gas journal bearings with noncircular members and elements of flexibility and damping, noting three lobed rotor
[ASME PAPER 68-LUBS-45] 13 p2266 A69-27277

Flanges flexural rigidity effect on load carrying capacity, failure mechanism and postbuckling behavior of webs in shear, noting permissible load
18 p3227 A69-35492

Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
19 p3356 A69-35529

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards
19 p3319 A69-35545

Flexible circuitry for reliable spaceborne data processing equipment electronic packaging
22 p3903 A69-39951

FLEXIBLE BODIES

Flexible finite cylindrical shell undergoing arbitrary temporal and spatial motion, determining fluid /aerodynamic/ forces acting on shell
01 p0005 A69-10229

Structural designs for minimum flexibility or weight using energy intensity per unit mass parameter
02 p0345 A69-12380

Flexible vehicle control, using cybernetic model for system design and response
[AIAA PAPER 69-115] 06 p1018 A69-18088

Nonlinear large amplitude vibrations of flexible beam with pinned ends supported simply on rigid base noting frequencies, modes, waveforms and stress distribution
[ASME PAPER 69-VIBR-43] 10 p1807 A69-24181

Flexible cylinder vibration in nominally axial flow, discussing length, mass, flexural rigidity and diameter variation effects on vibration amplitude
11 p1984 A69-25166

- Dynamic modeling for spin stability of satellites with flexible parts, noting torques induced by attitude control
11 p1994 A69-25533
- Flexible skirt design for air cushion vehicle consisting of semicylindrical elements and permitting horse power and cost reductions
13 p2203 A69-28179
- Linear analysis of damped flexibly mounted rolling element bearings influence on dynamic rotor unbalance response, including optimum support characteristics
[ASME PAPER 69-LUBS-8]
18 p3212 A69-34382
- Lumped parameter simulation model, based on vector mechanics for flexible spinning bodies, to study spin stabilized spacecraft or turbine rotors
19 p3280 A69-35990
- Liapunov stability theory for motion of spacecraft with flexible and moving parts in force free space
[AAS PAPER 68-125]
20 p3617 A69-37180
- Peristaltic pumping in circular cylindrical tube, discussing viscous fluid flow induced by axisymmetric traveling sinusoidal wave imposed on flexible tube wall
[ASME PAPER 69-APMW-3]
24 p4275 A69-43108
- FLEXIBLE WINGS**
NT PARAWINGS
- Velocity field generated by vibrations propagating at finite velocity over elastic wing surface
02 p0190 A69-12571
- Root locus method applied to longitudinal and lateral stability of aircraft with flexible fuselage and wing
04 p0677 A69-14835
- NASA research on flexible and stiffened flexible wings, discussing range of applicability, aerodynamic characteristics and wind tunnel results
05 p0701 A69-15568
- FLEXING**
- Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings
04 p0678 A69-14902
- Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency
04 p0679 A69-14903
- Anodizing effect on flexural properties of Al-aluminum oxide sandwich composites, emphasizing properties of oxide coatings as function of thickness
07 p1159 A69-18723
- Conformal mapping method for flexure function determination, discussing shear coefficients for arbitrary cross section beams in Timoshenko beam theory
09 p1612 A69-21611
- Four point flexure, ring flexure and NOL ring tension tests for evaluation of composite material mechanical properties
09 p1499 A69-22308
- Electric analogy technique for torsion and flexure functions of uniform beams with terminal loads, considering Neumann boundary value problem
11 p1195 A69-25649
- Elastic mirror flexure and distortion patterns, considering periodic nature of load in polar coordinates, second flexure mode avoidance and friction elimination
12 p2056 A69-26407
- Antiflexure cylinder for large astronomical mirror, noting support by astatic counterpoint levers and simple flanges
12 p2056 A69-26409
- Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings
12 p2182 A69-26655
- Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency
12 p2182 A69-26656
- Woven roving construction and fill/warp ratio effects on flexural strengths of four ply laminates
14 p2469 A69-29414
- Membrane analogy for flexure of prismatical beams with square cross section and longitudinal cavities, employing Saint-Venant solution
15 p2704 A69-30288
- Flexure of Ta and Nb thin rectangular specimens during high temperature oxidation, showing stress generation due to O dissolution into metal surface
[ECS PAPER 87]
15 p2641 A69-31541
- Flexure functions of triangular sections under terminal loads, using electric analogy to study function effect on section shape and material Poisson ratio
17 p3066 A69-34050
- Structural flexure center position from shear stress analysis showing nondependence on Poisson ratio
20 p3622 A69-37213
- Deformation tractions in undeformed and curved cuboid flexure and inverse flexure determined by stress-strain relations for homogeneous isotropic compressible materials
23 p4226 A69-41521
- FLEXURE**
U FLEXING
- FLICKER**
- Ohz intensity variation in bright homogeneous auroras prior to and during breakup observed visually and with image orthicon TV systems
04 p0594 A69-15129
- Painted helicopter rotor blades ruled out as cause of flicker induced vertigo, reporting pilots psychophysiological responses to formation flying
17 p2913 A69-33175
- Flicker characteristics of eye color receptive systems by measuring modulation thresholds for sinusoidal flicker of color superimposed on complementary color background
22 p3880 A69-40851
- Hue shift and brightness enhancement of flickering light measured as function of illuminance, wavelength and target size
22 p3882 A69-40871
- FLICKER FUSION FREQUENCY**
U CRITICAL FLICKER FUSION
- FLIGHT ALTITUDE**
- Optimum cruise altitude, block time and fuel relations for Convair 600/640 aircraft for various temperatures, segment distances and weight
08 p1255 A69-21007
- Fast and slow neutron latitude variation at aircraft altitudes during solar minimum, noting environment effects on measurement
09 p1574 A69-21402
- Supersonic flight altitude stability, studying effects of velocity, lift-drag ratio, thrust law, wind direction, engine unstarts, etc
[AIAA PAPER 69-813]
19 p3366 A69-35627
- STOL takeoff optimal trajectory maximizing altitude at given runway distance, using aircraft models
[AIAA PAPER 69-935]
21 p3649 A69-39427
- Flight altitude effects on pilot performance with comparison of sensory and mental functions, considering oxygen use and flight safety
23 p4106 A69-41794
- Atmospheric variability at proposed flight levels, analyzing meteorological requirements of SST operations, discussing annual cycles in stratospheric circulation
24 p4251 A69-42711
- FLIGHT CHARACTERISTICS**
- Boeing 747 characteristics for passenger and cargo service noting economic gain, operational performance, control cabin, engine, etc
[AIAA PAPER 67-397]
01 p0010 A69-10636
- Flight vehicle dynamics, discussing classical mechanics, fluid dynamics, structural dynamics and thermodynamics
02 p0193 A69-11985
- Flying qualities considerations in design and development of Huey Cobra for helicopter attack mission, describing stability and control augmentation systems
[AHS PAPER 217]
07 p1053 A69-18871
- Coaxial multipurpose KA-26 helicopter design, discussing cruising speed, passenger capacity, range, flight ceiling, gross weight and piston engines
07 p1053 A69-18969
- Bow shock wave position and shape in rectilinear flight with constant acceleration
09 p1433 A69-21386
- Schleicher glider AS-W15 prototype tests, discussing balsa sandwich structure and flight characteristics
10 p1633 A69-22872
- Approximation formula for calculating descent speed and lift-drag ratio
10 p1633 A69-22873
- VTOL aircraft flight control systems, considering computerization and automation approach with human pilot serving as monitor and emergency system
11 p1823 A69-25387
- Digital computerized analysis and characteristics of variable stability aircraft, examining digital control system
15 p2549 A69-30229
- Bow shock wave during rectilinear flight with varying acceleration, describing sonic boom loop mechanism
16 p2734 A69-32005
- Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine
[AIAA PAPER 69-452]
16 p2841 A69-32690
- Running test facility for study of aerodynamics and flight dynamics of V/STOL aircraft models
17 p2944 A69-32851
- Military V/STOL aircraft flying qualities specification, considering structure, hover and low speed requirements, forward flight, transition maneuverability and control
[AHS PAPER 363]
17 p2900 A69-33520
- Mission task performance oriented approach to winged helicopters flying and handling qualities, considering wings and horizontal stabilizers influence
[AHS PAPER 360]
17 p2900 A69-33522
- Interim revision of military flying qualities specifications according to experimental data and characteristics of existing aircraft
[AIAA PAPER 68-245]
17 p2902 A69-34026
- Performance capabilities and handling quality characteristics of aircraft equipped for in-flight thrust reversing
[AIAA PAPER 68-880]
17 p2902 A69-34031
- Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742]
18 p3084 A69-34407
- Flight performance analysis of space systems, discussing preparation, implementation and communication
18 p3206 A69-34501
- Longitudinal flying qualities evaluation by pilots in carrier approach flight simulation, describing experiment apparatus, procedures and results
[AIAA PAPER 69-895]
21 p3648 A69-39419
- Aircraft flying qualities research program, discussing Navy test pilot evaluations and longitudinal handling characteristics for simulated carrier landing task
[AIAA PAPER 69-897]
21 p3648 A69-39421
- Longitudinal flying qualities of aircraft, comparing attitude and altitude control data
[AIAA PAPER 69-898]
21 p3648 A69-39422
- Wind tunnel tests determining propeller slipstream effect on roll-damping derivative in transitional flight region, estimating STOL aircraft characteristics
22 p3863 A69-40145
- Flight range and fuel consumption formulas of power gliders used for transportation compared with automobiles
24 p4253 A69-43142
- Measurement methods for quantitative character of aircraft pilot rating scales for vehicle flying qualities, considering wording ambiguity, dual mission character, etc
24 p4276 A69-43326
- FLIGHT CLOTHING**
- Liquid fluidic amplifiers combined into controller for modulating coolant temperature to control flight suit temperature automatically
02 p0202 A69-11923
- Quality assurance impact energy attenuation testing of U.S. Army flyer protective helmet, considering combined interaction of shell, foam liner and plastic pads
15 p2559 A69-30851
- FLIGHT CONDITIONS**
- Weightlessness effects on organism in space flight along parabolic trajectories, discussing interaction between analysts
02 p0197 A69-11499
- Mission requirements influence on aerothermodynamic environment for vehicle entering Venus atmosphere, considering different entry modes
02 p0332 A69-12823
- Aircraft reports of high level turbulence on European and Atlantic routes, noting rapid changes in large scale flow pattern occurring locally
12 p2127 A69-26901
- Flight and piloting influence on morbidity of civil aviation personnel, noting incidence of enteric, hemorrhoidal and respiratory diseases
18 p3098 A69-35303
- Illumination effect on air navigation chart reading during flight, using questionnaire data
24 p4271 A69-42605
- Human circulatory reactions to cumulative flight vegetative stimuli evaluated by cumulative stress simulation method
24 p4266 A69-43375
- FLIGHT CONTROL**
NT AUTOMATIC FLIGHT CONTROL

NT AUTOMATIC LANDING CONTROL NT THRUST VECTOR CONTROL

Airline area navigation system functions for developing map type pictorial display system including digital computer, cockpit control unit and microfilm charts
01 p0112 A69-10453

Hydraulic powered flight control system for Jaguar supersonic military training aircraft
01 p0012 A69-10634

Optimal flight stabilization of VTOL aircraft in hovering mode based on linear rotation dampers system
05 p0702 A69-16024

Variable properties aircraft for flying simulator, discussing flight control system and stability behavior
07 p1052 A69-18254

Direction changing of large solid propellant motors by changing jets angle or gas injection
07 p1230 A69-19291

Rocket vehicle inertial attitude reference system, discussing flight control
09 p1609 A69-21618

Helicopter all-weather flight control system, using autostabilization and artificial horizon
09 p1435 A69-22778

Astronautics - Conference Braunschweig, West Germany, October 1968, Volume 1, Flight control and electronics
12 p2127 A69-25870

Hypersonic vehicles multivariable flight control systems, analyzing flight path in terms of equation of motion of longitudinal mode
12 p2128 A69-26066

Dynamic analysis methods for airframe flight control design noting equations of motion, system criteria and analysis and synthesis methods
[AIAA PAPER 68-832] 12 p2174 A69-26758

Helicopter stabilization systems design using optimal control theory to obtain multivariable feedback controller
12 p2014 A69-26764

GHOST Balloon Project, emphasizing launch and ascent control and location and life expectancy of superpressurized balloons in tropical stratosphere
15 p2551 A69-31361

Flight and space mechanics problems from engineer standpoint, discussing flight path calculation, stability and control characteristics and experimental techniques for high reliability
17 p3076 A69-33041

VTOL variable stability system /VSS/ for XV-4B lift jet for flight control and handling verification
17 p2902 A69-34066

Solid state single unit digital control computer performing stability augmentation, pilot relief functions and generating minimum fuel flight paths for VTOL landing
17 p2934 A69-34075

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios
18 p3090 A69-34656

Flight control systems influence on military aircraft design and performance, discussing static stability, ride quality, flutter margin and maneuver load controls
[AIAA PAPER 68-767] 19 p3245 A69-35656

Mars autonomous entry navigation, discussing flight path angle control with onboard sensors using realistic sun, Canopus and planet line of sight tracker accuracies
19 p3368 A69-35790

Computerized clock sequenced ATC system, area navigation /R Nav/ systems and STOL flight control
19 p3370 A69-36317

Flight control and stability of STOL transport aircraft with powered-lift boundary layer control system augmented lift
20 p3462 A69-37513

Design concepts and principles of systems for monitoring of Concorde flight control actuators, considering servo control, control interconnections and control input system
20 p3467 A69-38190

Titan 3C launch vehicle digital flight control system using flight equations time-shared with guidance equations
[AIAA PAPER 69-878] 21 p3824 A69-39404

Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems
[AIAA PAPER 69-885] 21 p3764 A69-39410

NF106B-VST model follower flight control system, discussing design criteria/performance index,

rigid/elastic math model development, flight test evaluation, hardware design, etc
[AIAA PAPER 69-886] 21 p3764 A69-39412

Real time operating system /RTOS/ 360 for spaceflight control, describing hardware, applications, task management and capacity, etc
21 p3679 A69-39602

Design criteria for Concorde SST servoflight control system reliability and safety
21 p3650 A69-39697

Atlas/Centaur/Surveyor flights guidance accuracy, discussing postflight analysis of injection errors due to hardware, software and propulsion system
[AIAA PAPER 68-842] 24 p4348 A69-43239

Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error
24 p4253 A69-43279

FLIGHT CREWS

Airline crew training, requalification, recurrent, upgrading and aircraft transition training for crew and pilot
01 p0019 A69-10450

Psychological aspects of crew members resistance to eject from aircraft in trouble
06 p0877 A69-16956

Survival of aircrew after successful ejection over water and boarding life raft
06 p0878 A69-16958

Psychophysiologic factors in USAF aircraft mishaps involving ground egress
06 p0878 A69-16959

Clinical analysis of combat and noncombat ejection experience of USAF
06 p0878 A69-16960

Hand operated visual signaling devices, discussing Mini Signals and cartridge load aerial signals
06 p0878 A69-16962

Cardiovascular disease incidence among airline flight deck personnel in relation to increase in average age of personnel
06 p0875 A69-17848

Psychological study of stewardesses for depressive, neurotic and psychosomatic episodes, discussing psychopathological structures corresponding to etiological sequences
07 p1067 A69-19434

Head injuries evaluation in aircrew, noting motor cycle accidents
10 p1649 A69-23378

Aircrew incapacitation during high altitude flying following partial gastrectomy, discussing aeromedical evaluation
10 p1645 A69-23381

Traditional flight crew organization relevance to current and developing flight systems, discussing inadequacies, anachronisms and safety threats
12 p2023 A69-26555

Computer simulation models for prediction of individual and crew performance in man machine environments
12 p2026 A69-27087

Psychophysiologic factors in USAF aircraft mishaps involving ground egress
15 p2558 A69-30462

Problems connected with rescue of crew members ejected over water
15 p2551 A69-30866

Concorde aircrew seats design for electric operated tracking and lift, vertical movement accommodation seat and back tilt
15 p2553 A69-31167

Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence
17 p2906 A69-32935

Optimized flight crew training, evaluating safety, flight simulator efficiency, takeoff/landing practice and line experience based on test results
[AIAA PAPER 69-771] 19 p3245 A69-35653

Flight surgeon observations of stress and fatigue effects on aircrew of first nonstop transatlantic helicopter flight, discussing fatigue ratings, sleep patterns, etc
19 p3262 A69-36450

Electrocardiographic and heart rate data recording of crew members during transatlantic helicopter flight and normal daily routine
19 p3263 A69-36451

Urinalysis of crew members of first transatlantic helicopter flight indicating interindividual endocrine-metabolic variability and circadian trends modification
19 p3263 A69-36452

Vestibular function tested with angular acceleration, applying semicircular canal reflexes for flight crew selection and appraisal
20 p3481 A69-37271

Cabin personnel occupational strain in civil aviation, relating heart rate to aerobic power while working during flight
21 p3665 A69-39180

Statistics on airline flight crew members grounding due to psychic disorders
21 p3665 A69-39181

Mandrax and barbiturates effects on aircrew reaction time, response time and tracking ability
21 p3661 A69-39274

Cosmic radiation exposure of passengers and crew in supersonic transport at high altitude
22 p4002 A69-40093

Computerized crewstation geometry evaluation and design optimization using 23-pin-joint man-model
[AIAA PAPER 69-977] 22 p3892 A69-40357

Pilots and flight crews screening and training by supplemental air carriers
22 p4054 A69-41148

Air traffic safety enhanced through flight crew awareness of hazards, clear air turbulence detection and avoidance, collision avoidance, etc
22 p3868 A69-41151

Flying effects on air hostesses, considering questionnaire data for various psychophysiological factors and flight modes
23 p4086 A69-41688

Psychotherapeutic treatment of depressions and neuroses in flight crews, noting face to face method effectiveness
23 p4086 A69-41690

SST flight crew operational requirements to achieve maximum human efficiency and man/machine compatibility, discussing pilot role, advanced flight instrumentation, etc
23 p4107 A69-41820

Renal calculus incidence among aircrews of long and short haul airlines, considering effects of dry cabin environment and dehydration
23 p4108 A69-41826

Flight personnel hearing tests per ICAO recommendations and flight safety requirements, using tonal audiogram and vocal audiometric test
24 p4277 A69-43377

Psychiatric morbidity as absenteeism cause among ground and flight personnel in civil aviation, recommending psychotherapy and chemotherapy
24 p4266 A69-43378

In-flight medical disorders sustained by crew members of various aircraft in French Air Force correlated with aircraft accidents, flight experience and age
24 p4277 A69-43383

Airline pilots simulated incapacitation involving myocardial infarction or cerebrovascular accident, discussing effect on crew behavior during flight task performance
24 p4277 A69-43386

Medical wastage of military and civil aviators in Great Britain /1963-1968/, discussing cardiovascular disease, fatal flying accidents and psychiatric disease
24 p4277 A69-43391

Hyperventilation effect on flight personnel, discussing oxygen and carbon dioxide partial pressures, symptoms and clinical signs
24 p4269 A69-43410

FLIGHT FATIGUE

Helicopter flight loads spectra data compared on statistical basis to establish component service lives
[AHS PAPER 301] 17 p2901 A69-33548

Flight surgeon observations of stress and fatigue effects on aircrew of first nonstop transatlantic helicopter flight, discussing fatigue ratings, sleep patterns, etc
19 p3262 A69-36450

Aircrew fatigue and sleep loss factors, discussing transition through various time zones and flying through normal sleeping times
21 p3666 A69-39275

FLIGHT FITNESS

Cardiovascular disease incidence among airline flight deck personnel in relation to increase in average age of personnel
06 p0875 A69-17848

Airline pilot incapacitation by death or terminal collapse due to organic causes while on duty, noting incidence and resulting accidents
06 p0883 A69-17849

Standards for EEG in pilot fitness examinations, analyzing effects of total flying hours
06 p0875 A69-18021

Blood pressure fluctuations in multiple extra systoles during tilt table studies for flying fitness of pilot
10 p1645 A69-23379

Aircrew incapacitation during high altitude flying following partial gastrectomy, discussing aeromedical evaluation
10 p1645 A69-23381

Passenger aircraft flight readiness verification, discussing flaw and corrosion detection and rivet joint inspection methods
11 p1822 A69-24526

Astronauts physical training for space flight requirements
13 p2215 A69-28611

Visual, auditory and reaction-time responses in aging pilots, determining continuing capacity for choice and discrimination with advancing age
14 p2408 A69-29307

Physical exercises to increase cosmonaut space environment tolerance, discussing effects of acceleration, altitude and hypoxia
15 p2560 A69-31460

Pilots mental and physical welfare, discussing roles of mental hygiene and preventive medicine in flight surgeons programs
18 p3097 A69-35301

Boeing 747 design, fitting to operation, airline planning for flight training, airport facilities, ground equipment, service functions, etc
[RAES PAPER 12]
22 p3864 A69-40621

Serial ECG change from normal conduction to right bundle branch block in 59 patients without overt cardiac disease
23 p4085 A69-41677

Civil pilots medical certification after head trauma, evaluating current methods efficiency
23 p4086 A69-41687

Senior commercial jet pilots ability to visualize flight instruments
23 p4089 A69-41829

Flight personnel hearing tests per ICAO recommendations and flight safety requirements, using tonal audiogram and vocal audiometric test
24 p4277 A69-43377

FLIGHT HAZARDS
NT METEOROID HAZARDS

Flight accident rate of U.S. physician pilots noting relation to number of takeoffs and landings
01 p0022 A69-11344

Physiological effects of space cabin environment variables during long and hazardous space missions with regard to engineering constraints and radiobiology
03 p0380 A69-13504

Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220]
04 p0549 A69-14930

Explosive devices to sabotage aircraft in flight, discussing evidence of sabotage in aircraft wreckage and detection of explosives before loading
04 p0549 A69-14943

Frequencies and natural oscillation modes in sporting gliders, demonstrating horizontal oscillation induced aileron suspension brackets destruction
04 p0549 A69-15416

Concorde and Boeing supersonic transport overland sonic booms, discussing social, political and legal reactions
06 p0868 A69-17899

Aircraft safety hazards due to birds, discussing radar role in plotting bird migrations
11 p1837 A69-25247

Physiological effects of intermittent light stimulation during helicopter flight, discussing visual and electric cortical functions at critical frequency threshold of subjective fusion
13 p2211 A69-28595

Interspecific synthetic signals research for effective bioacoustic bird scaring techniques including optical signals
17 p2914 A69-33364

Airfield bird scaring methods including Very pistol shell cracker firing and broadcast calls on civilian and military airfields
17 p2915 A69-33365

Radar cross section of bird represented as unit density dielectric spheroid for bird hazard monitoring, discussing meteorological, insect and bird echoes
17 p2919 A69-33366

Bird warning and forecast systems based on radar data covering 50 mile radius from airport
17 p2899 A69-33367

Radiation exposure during orbital flight assessed for adverse effect on space stations and laboratories personnel, discussing shielding and dose rate tables
20 p3481 A69-37339

Infectious diseases in space flight, considering environment role in infection transmission, occurrence and severity
20 p3479 A69-37973

Flying effects on air hostesses, considering questionnaire data for various psychophysiological factors and flight modes
23 p4086 A69-41688

Military pilots cervical spine dynamic X ray studies, comparing spine curvature and rectitude of jet and nonjet pilots and nonflying personnel
23 p4087 A69-41798

Contact lenses hazards during high altitude aircraft piloting analyzed via bubble development
23 p4106 A69-41806

FLIGHT INSTRUMENTS
NT APPROACH INDICATORS
NT ATTITUDE INDICATORS
NT AUTOMATIC PILOTS
NT HORIZON SCANNERS
NT RADIO ALTIMETERS

Head-Up Display /HUD/ flight information applied to civil aviation, noting operational safety improvement and pilot work load reduction
01 p0020 A69-10635

In-flight measurement of shock and vibration effects on aircraft and propulsion systems
01 p0084 A69-11051

Aircraft cockpit displays design for flight control and navigation, discussing integration, pictorial realism, moving part, pursuit tracking, frequency separation and optimum scaling
02 p0203 A69-12213

Engine air intake for operational Harrier V/STOL strike/reconnaissance fighter, describing intake instrumentation ring, temperature and pressure probe development and pressure recording
05 p0767 A69-16773

Flight deck equipment guidelines in aircraft, discussing pilots natural senses, visual information, displays, logic and memory capable computers and ground controller
08 p1266 A69-20450

Air data system consisting of aerodynamic and thermodynamic sensors and computer calculating flight parameters for automatic flight control
18 p3169 A69-34854

Situation displays and flight instrument development including head-up, vertical tape and map systems
18 p3170 A69-34858

Cumulative error in flight vehicle position determination by inertial navigation system, showing dependence on constant acceleration components
22 p3978 A69-40252

Flight indicators monitoring by pilots, describing physiological and psychotechnical criteria for dials and clocks arrangement to improve efficiency
23 p4108 A69-41827

FLIGHT LOAD RECORDERS

Aircraft reliability under cyclic loads in flight taking into account stress fluctuations
08 p1322 A69-21106

Strain gages to measure flight loads in high temperature environment, discussing selection, calibration techniques and performance characteristics
15 p2614 A69-31277

Helicopter flight loads spectra data compared on statistical basis to establish component service lives
[AHS PAPER 301]
17 p2901 A69-33548

FLIGHT MECHANICS
Hydrodynamics-electrodynamics analogies for electromagnetic flight
01 p0121 A69-11134

Atmospheric turbulence effects on aircraft flight noting causes of turbulence
11 p1911 A69-24527

Book on aerodynamics of aircraft flight covering air flow, wing geometry, forces on wings, etc
11 p1817 A69-24583

Monograph on flight mechanics and control technology of low flight vehicles at high flight velocities, discussing altitude control design, power spectra, etc
11 p1823 A69-24638

Flight dynamics problems, determining extremum of functional by graph-analytical method and with aid of Pontryagin maximum principle
11 p1823 A69-25343

Mechanical engineering applications to aerospace flight, discussing stability and piloting problems and experimental methods
11 p1824 A69-25672

Flight and space mechanics problems from engineer standpoint, discussing flight path calculation, stability and control characteristics and experimental techniques for high reliability
17 p3076 A69-33041

Book on flight mechanics of aircraft and missiles covering mass, propulsion and aerodynamic forces, TOL problems, optimization problems, etc
17 p2898 A69-33319

Torque calculations about joints of rigidly chain-like arranged clusters of flying bodies
18 p3208 A69-34776

Nervous system relations to insect flight musculature of lift and thrust mechanism
21 p3651 A69-38780

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories
[AIAA PAPER 69-890]
21 p3678 A69-39415

Collection of papers on space flight mechanics covering trajectories, motion about center of mass, optimization, control systems
21 p3828 A69-39816

Flight dynamics boundary value problem for spacecraft trajectories optimization, using variational method
21 p3817 A69-39817

Variational problem involving winged flight vehicles ascending and descending flight optimal program determination, considering necessary extremal conditions
21 p3767 A69-39823

Optimal gain theory for input vector and application to regulator problem describing aircraft dynamics
24 p4293 A69-43305

FLIGHT OPTIMIZATION

Aircraft and engine parameters for maximum theoretical range of turbojet for given cruising speed
03 p0366 A69-12950

Optimal circular satellite orbits for planetary surface mapping mission minimizing overlap
03 p0518 A69-14247

Computing optimum flight profiles by Balakrishnan epsilon method, including equations of motion constraint in cost function to be minimized
[AIAA PAPER 69-75]
06 p0868 A69-18058

Air navigation and economics, discussing air traffic control and traffic density effects on fuel consumption and engine life
07 p1052 A69-18661

Optimum cruise altitude, block time and fuel relations for Convaiv 600/640 aircraft for various temperatures, segment distances and weight
08 p1255 A69-21007

Optimal control-computation technique and application to minimal time flight profile optimization and isoperimetric problem of Lagrange with equality constraints
09 p1595 A69-21798

Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion
19 p3427 A69-36612

Flight vehicle motion optimization taking into account random failures of sectioned power plant with limited capacity and independent parallel units
21 p3647 A69-38893

Jet aircraft quasi-level flight above flat earth, deriving equation of path minimizing linear combination of fuel consumption and flight time
21 p3647 A69-39006

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar
21 p3766 A69-39646

FLIGHT PATHS
NT GLIDE PATHS

Vertical flight path navigation requirements for supersonic aircraft based on computer simulated flights of Mach 2 Concorde
02 p0277 A69-11590

Computer solution of six degrees of freedom flight equations, discussing advantages of using flight path axes for translational equations of motion
02 p0212 A69-11998

Relative weight of fuel required for flight along prescribed flight trajectory
03 p0519 A69-12964

FLIGHT PLANS

OMEGA radio navigation system optimization, emphasizing implementation of phase modulation to ensure lane identification 03 p0463 A69-13212

Navigation computer utilizing current integrators and step motors to record flight path 03 p0404 A69-13431

Air density fluctuation effects on aircraft dynamic stability around center of gravity during climbing and diving maneuvers, discussing atmospheric pressure and flight path angle 04 p0548 A69-14825

Computing optimum flight profiles by Balakrishnan epsilon method, including equations of motion constraint in cost function to be minimized [AIAA PAPER 69-75] 06 p0868 A69-18058

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints [AIAA PAPER 69-209] 07 p1178 A69-19570

Composition effect of flight path measurements on correction of space vehicles flight path, discussing single parameter correction of motion in force free field 07 p1178 A69-19607

Air traffic lateral separation assurance over North Atlantic for increased routes capacity without safety reduction 08 p1349 A69-21200

Scientific report of Rockwell polar flight, November 14-17, 1965 09 p1484 A69-21401

Polar flight navigation charts showing feasibility of three dimensional celestial positioning 09 p1538 A69-21406

Meteorological data for flight path climatologies, analyzing annual frequency distribution of maximum wind velocities 09 p1535 A69-21519

Black arrow rocket vehicle flight path computer programming, discussing geographical restrictions on design 09 p1593 A69-21616

Discrete variable approximation for computation of flight path optimization, discussing constrained and unconstrained minimizations 09 p1538 A69-22090

Hypersonic vehicles multivariable flight control systems, analyzing flight path in terms of equation of motion of longitudinal mode 12 p2128 A69-26066

Conjugate gradient methods for optimization problems with terminal constraints, noting minimum time paths for V/STOL aircraft climb phase 12 p2013 A69-26763

Complex climatological cloud profiles structural characteristics along given air traffic routes prepared for practical aviation problems 12 p2127 A69-26899

Multiple drone aircraft automatic control system, discussing preprogrammed mission path and controls of altitude, plan position and velocity 14 p2392 A69-29495

Position determination from radio bearings using complex numbers, noting application to reconnaissance flight path 14 p2479 A69-29499

Air lane longitudinal separation distance reduction for accommodating increased traffic using airborne computers for single file system 15 p2651 A69-30293

Aircraft constant altitude-pressure flight navigation attained using Bellamy formula and loxodromic route for drift compensation 15 p2651 A69-30294

Statistical correlation of temperature and tail-wind data for London-New York route at 50 mb for SST operation 15 p2651 A69-30690

Flight and space mechanics problems from engineer standpoint, discussing flight path calculation, stability and control characteristics and experimental techniques for high reliability 17 p3076 A69-33041

Integrated trajectory error display /ITED/ for flight path control of helicopters and VTOL, describing principles governing display synthesis [AHS PAPER 314] 17 p3001 A69-33541

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc [AIAA PAPER 69-798] 19 p3367 A69-35632

Airborne astatic vertical gyro motion found dependent on aircraft motion along trajectory 19 p3311 A69-36194

Terminal air traffic management in future noting transition airspace, approach and departure paths and airport capacity [AIAA PAPER 68-1101] 20 p3573 A69-37160

Jet aircraft quasi-level flight above flat earth, deriving equation of path minimizing linear combination of fuel consumption and flight time 21 p3647 A69-39006

Aircraft navigation system requiring computer and display for approach guidance to circular orbit over fixed ground area [AIAA PAPER 69-986] 22 p3978 A69-40366

Optimal control computing method applied to minimal time flight profile optimization 24 p4383 A69-42954

FLIGHT PLANS

Great circle route determination based on celestial spherical triangulation 02 p0278 A69-12360

Soviet book on aeronautical climatologies covering methodology of climatologic indices useful for airfields, pilots and flight routes evaluation 04 p0627 A69-14935

Subjective and objective upper air forecasts for aviation comparison by isobaric pressure height fields, discussing error analysis 08 p1345 A69-19886

Optimal control computation technique and application to minimal time flight profile optimization and isoperimetric problem of Lagrange with equality constraints 09 p1595 A69-21798

Computer uses for air traffic control in Germany including flight plans and weather report data processing 15 p2650 A69-30230

Weights study of V/STOL aircraft types for similar mission and payload requirements with different propulsion systems and flight profiles [SAWE PAPER 783] 18 p3091 A69-34869

Expected occurrences mathematical model for flight system availability under uncertainty 18 p3210 A69-35083

Subsonic civil air transport navigation systems, discussing flight routes redistribution across North Atlantic to meet increased traffic 20 p3574 A69-37417

FLIGHT RECORDERS

Navigation computer utilizing current integrators and step motors to record flight path 03 p0404 A69-13431

Digital adaptive recording system /DARS/ 12 channel flight recorder 05 p0766 A69-16754

Government flight recorder regulations, detailing approved systems 10 p1691 A69-23246

Flight data recorders history and regulations, discussing parameters and design of systems 10 p1691 A69-23247

Crash protection of flight data recorders, aircraft accident investigation, systems analysis, environment and enclosures 10 p1691 A69-23248

Onboard flight data recorder as integrated system for investigating aircraft accidents, describing German LEADS 200 model 17 p2974 A69-33429

Flight performance analysis of airline pilot group related to flight recording monitoring system 22 p3868 A69-41145

FLIGHT RULES

U INSTRUMENT FLIGHT RULES

FLIGHT SAFETY

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors 01 p0014 A69-10583

Light aircraft all-weather flight feasibility, discussing storm and clear air turbulence detection and icing prevention 01 p0111 A69-11049

Correlation between CAT and thermal gradient increase at standard isobaric levels found to be potential forecasting tool 02 p0275 A69-11818

Alpha numerical and symbolic information combined for head up display /HUD/ systems, providing pilot with takeoff director 03 p0379 A69-12885

Aircraft flight safety, discussing structural and aerodynamic concepts, maintenance and operations 03 p0365 A69-12886

Air safety - Conference, Dallas, April 1968 06 p1040 A69-16834

Government role in air transportation policy, considering growing demands on air traffic control 06 p1040 A69-16835

Air safety, emphasizing misunderstandings or unresolved problems in accident prevention connected with law/safety interface 06 p1040 A69-16837

FAA aviation safety program design standards, maintenance and inspection procedures and assessment of accidents 06 p1041 A69-16839

Airline safety programs focused on developing reliable automatic landing system, realistic pilot training and airborne monitoring/recording system 06 p1041 A69-16840

Aviation safety information dissemination to improve accident and incident prevention 06 p1041 A69-16841

Manned space flight safety, discussing astronaut exposure to danger on ground, in training and in space mission 06 p0882 A69-17650

Flying safety and human factors relationships from job classification survey oriented toward social psychology 06 p0884 A69-18035

Apollo spacecraft fire, presenting recommendations for power supply, cabin atmosphere and safety measures 07 p1071 A69-18970

System reliability influence on air accidents resulting from pilot errors, unforeseen obstacles, breakdowns and atmospheric effects 07 p1054 A69-19288

Helicopter flight safety as function of service duration, performance limitations and propulsion failure 07 p1054 A69-19313

Pilot protection against laser hazards, discussing protective eyeglasses, fireproof clothing and materials 07 p1072 A69-19436

Permissible irradiation doses established for spacecraft crews making short and long flights, considering roles of life span, somatic effects, leukemia and genetics 07 p1069 A69-19618

NASA flight safety research, discussing size effects on aircraft handling and built-in response to failure modes 07 p1057 A69-19764

STOL and V/STOL role in eliminating air traffic congestion at U.S. and West European airports and in short haul and municipal routes 08 p1254 A69-20093

Analog video processor in omnidirectional radar system for flight safety, discussing construction, transistorization and circuitry 08 p1276 A69-20605

Aircraft reliability under cyclic loads in flight taking into account stress fluctuations 08 p1322 A69-21106

Howell engine hot section analyzer /HSA/ developed to improve maintenance, flight safety and costs of jet aircraft engines 10 p1671 A69-23263

Cockpit TV-radar for providing pilots with navigation, weather and traffic data, discussing safety factor and radar picture transmission quality [SAE PAPER 690327] 11 p1833 A69-24506

Collision avoidance system for air traffic, discussing false signal discrimination via electronic measurement of light pulse duration from aircraft Xenon discharge beacon lamp 12 p2129 A69-26772

Air Canada flight safety system including company philosophy, safety activities, incident and accident handling and information schemes 13 p2201 A69-27541

Flight regularity and safety in complex meteorological situations, noting synoptic forecasting advantages over inertial forecasting 14 p2475 A69-29740

Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections 15 p2576 A69-30362

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors 15 p2555 A69-30753

Flying offenses committed by private and professional pilots in Great Britain, discussing role of authorities involved 17 p3077 A69-34202

Aviation health service for flight safety problems with emphasis on accident prevention, emphasizing physician role in man-machine relationship of personnel surveillance

18 p3098 A69-35305

Manual extinguisher using bromochlorodifluoromethane (BCF) for aircraft cabin fire protection, discussing design and low toxicity, corrosiveness and cost

19 p3256 A69-36863

Apollo spacecraft fire, presenting recommendations for power supply, cabin atmosphere and safety measures

20 p3483 A69-38218

System analysis in aerospace software including ground checkout software, command and control software and onboard programs

[AIAA PAPER 69-962] 22 p3905 A69-40343

Air safety - Conference, Anaheim, October 1968

22 p3866 A69-41127

Accident prevention program of Bureau of Aviation Safety, discussing probable cause analysis and function in feedback loop, hazard analysis and accident data center

22 p3867 A69-41140

SST stratospheric environment problems, discussing temperature effects on fuel consumption and convective turbulence effect on flight safety and efficiency

22 p3867 A69-41141

Aircraft pilots medical disabilities as potential flight safety hazard, discussing aerospace medical specialist role and pilot education in symptoms evaluation

22 p3894 A69-41146

Air traffic control transoceanic satellite system for minimizing navigation errors forcing wide separations, providing VHF voice communication and position surveillance

22 p3901 A69-41147

Airline management service to cockpit team for safe operation providing safety information sources and transmission channels and undesirable trend detection and correction

22 p4054 A69-41149

Air traffic safety enhanced through flight crew awareness of hazards, clear air turbulence detection and avoidance, collision avoidance, etc

22 p3868 A69-41151

Orbital biomedical laboratory for in-flight measurement to assure human safety and optimize astronauts performance in extended space mission

23 p4223 A69-41801

Space station safety, discussing damage containment and control, escape and rescue, etc

[AAS PAPER 69-518] 24 p4392 A69-42842

Crew survival ensurance under emergency situations during manned space flight, discussing Apollo abort system refinements

24 p4272 A69-42848

Systems safety for unmanned spacecraft, considering power supply, equipment operation, trajectory correction, etc

[AAS PAPER 69-520] 24 p4392 A69-42849

Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence

24 p4418 A69-42851

FLIGHT SIMULATION

NT ATMOSPHERIC ENTRY SIMULATION

Vitiated inlet air effects on J60-P-6 turbojet engine performance at sea level for various simulated flight Mach numbers

01 p0143 A69-11063

Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity

01 p0022 A69-11337

Vertical flight path navigation requirements for supersonic aircraft based on computer simulated flights of Mach 2 Concorde

02 p0277 A69-11590

Validation study of pilots visual sampling behavior, using queueing model based on instrument and eye movement data from Link trainer mission flights

02 p0202 A69-11954

Computer solution of six degrees of freedom flight equations, discussing advantages of using flight path axes for translational equations of motion

02 p0212 A69-11998

Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis

04 p0652 A69-14519

Large subsonic wind tunnels for correct simulation of V/STOL powered flight by minimizing wall constraint effects on flow field

05 p0741 A69-15573

Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance

05 p0741 A69-15575

Digital simulation of vehicle motion and control for six degree of freedom simulations of Gemini reentry and aircraft, missile control, etc

05 p0725 A69-16477

Simulation in design of automated flight test data system

05 p0743 A69-16759

Electrohydraulic attitude servomechanism for controlling movements of pilot training cabin, describing hydraulic system and electric control circuit

06 p0906 A69-16966

High enthalpy, Mach and Reynolds number flight studies on ballistic ranges, describing launchers, flight simulation, measuring and recording techniques

06 p0860 A69-17632

AZUR satellite movement simulator for thermal control tests, describing assembly

08 p1300 A69-20095

Spacecraft electric propulsion parameters and launching vehicle characteristics in low thrust mission simulation, discussing spacecraft path

09 p1584 A69-21202

Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thrustor efficiency

09 p1584 A69-21204

Interplanetary low thrust mission analysis model, discussing major elements interactions

09 p1585 A69-21206

Man in loop computer facility for programmers to check out flight programs in simulated space flight environment

[AIAA PAPER 69-324] 09 p1479 A69-22384

Turbine engine in-flight operating conditions simulated on test stand

11 p1942 A69-24528

Complex piloting simulation including fatigue for optimizing man machine synergy, emphasizing human adaptability and computer precision and speed

12 p2025 A69-27083

Concorde thermal fatigue resistance tested by alternate heating and cooling cycles simulating supersonic flight profile

13 p2241 A69-28102

Selectively pumped thermal vacuum test chamber for orbital heat transfer and environment simulation for flight vehicle performance prediction

15 p2587 A69-30392

Air transport industry safety record and variable stability research planes to simulate aircraft airborne behavior and handling qualities

15 p2558 A69-30453

Supersonic combustion for high Mach number high altitude flight, discussing laboratory simulation for actual flight condition and chamber design

[AIAA PAPER 69-458] 16 p2880 A69-32743

CH-46 helicopter flight simulation program for pilot response to large perturbation maneuvers, using six degrees of freedom mathematical models

[AHS PAPER 361] 17 p2946 A69-33521

AH-56A helicopter manual and automatic terrain following and manual terrain avoidance systems, discussing nap-of-earth flight, design and simulation

[AHS PAPER 311] 17 p3002 A69-33544

Computer graphics engineering applications in line drawing displays for industry, including design programs and color TV flight simulation

18 p3106 A69-34659

Autopilot for flight simulation of stability and control of pilot-airframe combined performance on reentry missions, using airborne analog computer for vehicle response

18 p3208 A69-35000

Aircraft terrain-following algorithm for use with airborne general purpose digital computer, discussing simulation techniques and test results

[AIAA PAPER 69-817] 19 p3366 A69-35625

Tilt wing V/STOL aircraft spray circulation characteristics in overwater operation, examining forces, moments and generated environmental conditions

[AIAA PAPER 69-791] 19 p3243 A69-35638

Aircraft wing aerodynamic forces and moments due to lifting engine air intake simulated by wind tunnel experiment

19 p3239 A69-36400

Aircraft simulation, discussing flight simulation, real time computer assembly operation, computer-auxiliary interfaces, etc

19 p3296 A69-36707

Apollo translunar injection burn simulation, analyzing polynomial solutions of optimum geometry and characteristic velocity

[AAS PAPER 68-150] 21 p3820 A69-39225

Mission analysis and trajectory simulation (MATS) program, discussing computer controls, modular design, integration evaluation

[AIAA PAPER 69-939] 22 p3904 A69-40322

Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters

[AIAA PAPER 69-991] 22 p3920 A69-40369

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references

[AIAA PAPER 69-1029] 22 p3924 A69-40398

Molecular beams for simulating orbital flight through planetary atmospheres, considering various nozzle beam systems

[AIAA PAPER 69-1031] 22 p3926 A69-40437

Flight simulation requirements for reducing aircraft training flight time, discussing control system and instrument motion characteristics, visual simulation and critical maneuvers motion

22 p3928 A69-41139

Decreasing barometric pressure effects on abdominal gas volume in military men under simulated flight conditions, noting abdominal fullness and pain

23 p4076 A69-41291

Decompression sickness in simulated zoom flights, discussing bubble formation probability and instantaneous surface tension effect on bends resistance

23 p4077 A69-41292

Central nervous, cardiovascular and metabolic data of Macaca nemestrina during simulated Biosatellite flight, testing data acquisitions systems

24 p4260 A69-42703

Space and missile guidance performance analysis through automatic generation of mission performance sensitivity with respect to error sources from Monte Carlo simulation

[AAS PAPER 69-404] 24 p4347 A69-42836

Airline pilots simulated incapacitation involving myocardial infarction or cerebrovascular accident, discussing effect on crew behavior during flight task performance

24 p4277 A69-43386

FLIGHT SIMULATORS

NT COCKPIT SIMULATORS

Flight simulator based on analog computer simulating six linearized equations of motion and aircraft model, discussing design and applications

01 p0057 A69-11300

Dynamic flight simulators fidelity assessment, discussing hybrid method based on pilot psychomotor responses

02 p0203 A69-12215

Business jet aircraft use for air transport pilot training instead of simulating devices, noting pilot cabins

03 p0366 A69-13643

Simulation of flight dynamic equations of motion for fixed wing aircraft, using variable analog computer with gimbal and servocontrolled aircraft model

04 p0585 A69-14829

Digitally controlled flight systems simulators, noting design improvements over conventional trainers

05 p0742 A69-15884

West German test facility for simulating artificial satellite rotation about center of mass

07 p1116 A69-18260

Test techniques for X-22A VTOL research aircraft during ground simulator work and actual flight test, describing stability and control characteristics

[AIAA PAPER 69-319] 10 p1633 A69-23044

Flight testing and preflight simulated testing of Lockheed C-5 Galaxy transport aircraft

10 p1634 A69-23599

Human pilot adaptation in simulated multiloop VTOL hovering task with series loop closure model

10 p1650 A69-23878

Intermittent flow facilities for ballistic and lifting reentry flight simulation including shock tubes, ballistic ranges and shock and gun tunnels

11 p1863 A69-25016

NASA manned aerospace simulation techniques and equipment as used at Ames Research Center, noting applications to various types of manned vehicles

[ASME PAPER 69-DE-56] 14 p2427 A69-28844

Centro Ricerche Aerospaziali objectives, equipment and activities in aerospace research, including space flight simulation facilities and scientific satellite launching range

15 p2724 A69-31456

Ground simulations data of jet lift V/STOL compared with visual flight results, studying hover, lateral quick start and stop maneuver
[AHS PAPER 362] 17 p2946 A69-33519

Artificial horizon indicator design modifications to facilitate maintaining horizontal aircraft position, discussing automatic pilot advantages in turbulence and flight simulators
17 p2903 A69-34214

Air Transport Total In-Flight Simulator-707/AT/TIFS-707/ concept for pilot training, stressing airframe and major flight systems
[SAWE PAPER 747] 18 p3118 A69-34884

Optimized flight crew training, evaluating safety, flight simulator efficiency, takeoff/landing practice and line experience based on test results
[AIAA PAPER 69-771] 19 p3245 A69-35653

Manned aircraft air to air combat capabilities evaluated by simulator using two cockpits, digital computer and collimated displays
[AIAA PAPER 68-253] 20 p3510 A69-37159

Rotary actuator to create realistic control effects in hydraulic loading system of jet flight- training simulators
20 p3511 A69-38182

Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation
[AIAA PAPER 69-856] 21 p3823 A69-39384

Piloted ground-based flight simulators role in tactical and VTOL aircraft design, describing simulation devices, computer programs and design information
[RAES PAPER 10] 22 p3927 A69-40490

Flight training using digital simulators, including maneuver analysis for TWA 707 program
22 p3928 A69-41137

Human factors methods importance in nonmilitary flight simulation training, discussing cost factors and skills evaluation
22 p3894 A69-41138

Flight simulators role in airline pilot training, discussing skilled learning, performance measurements and future developments
23 p4112 A69-42366

Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss
24 p4297 A69-43044

FLIGHT STABILITY TESTS

Strip method for prediction of subcritical frequency and damping characteristics for subsonic wind tunnel and flight flutter tests
11 p1987 A69-25368

Jet influence and aerodynamic force changes on V/STOL aircraft in transitional and high speed flight investigated in wind tunnel tests for fighter aircraft
16 p2734 A69-31937

Stratospheric balloon vertical oscillations and gondola attitude during long flights
19 p3248 A69-36689

FLIGHT STRESS

Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetric examination of heart and circulatory systems
11 p1829 A69-24347

F-102 pilot anticipatory and flight stress, noting endocrine-metabolic hyperactivity
12 p2023 A69-26552

FLIGHT STRESS [BIOLOGY]

NT SPACE FLIGHT STRESS

Respiratory disturbances relationship to experience and attitudes toward gas anesthesia and response to different types of face mask
03 p0378 A69-12884

Electrocardiographic tests to study changes in electropotentials of heart in flying personnel after flight, noting changes in myocardium
03 p0378 A69-14207

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine
05 p0710 A69-16525

Asthmatic attacks in military air crews, discussing flight stress factors including altitude, ventilation and insecurity as possible causes
05 p0710 A69-16624

Telemetric system for in-flight measurements of jet pilot heart and circulatory system to determine flight stresses leading to pilot failure
05 p0715 A69-16707

Predictive scale of aircraft emergencies, analyzing human error rate under stress
06 p0880 A69-17208

Blood glucose measured before, during and after high performance aircraft flight for occurrence of fasting hypoglycemia
09 p1445 A69-22555

EEG and pilots flight performance relations, discussing in-flight telemetric measurements from ground station
15 p2560 A69-31233

Long distance air flights through different time zones, discussing circadian physiological cycles, light-dark ratio shifts effects and methods of lessening desynchronization effects
16 p2745 A69-32444

Inflight spontaneous pneumothorax case of civilian pilot lung collapse experience during exposure to reduced ambient pressure, discussing etiology, incidence, treatment and disposition
17 p2909 A69-33183

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine
18 p3096 A69-34744

Flight surgeon observations of stress and fatigue effects on aircrew of first nonstop transatlantic helicopter flight, discussing fatigue ratings, sleep patterns, etc
19 p3262 A69-36450

Cabin personnel occupational strain in civil aviation, relating heart rate to aerobic power while working during flight
21 p3665 A69-39180

Jet flying effects on air hostess menstrual function, considering cycle length, duration, regularity, dysmenorrhoea and flow severity
23 p4103 A69-41689

Flight altitude effects on pilot performance with comparison of sensory and mental functions, considering oxygen use and flight safety
23 p4106 A69-41794

Adrenosympathetic reaction in flight, studying contributions of physical and nervous stresses in physically trained and untrained persons
23 p4099 A69-42363

Urine sampling conditions for kidney function circadian rhythm during global flight, considering food and water intake, sampling intervals and body position
24 p4266 A69-43374

Stillbirth and neonatal death in stressed rats exposed to mild and acute gravitational loads in automobile ride and aircraft flight
24 p4266 A69-43381

Urinary excretion of hormonal metabolites in intercontinentally flown test subjects, using gas chromatographic procedure for steroid identification
24 p4268 A69-43404

FLIGHT SURGEONS

Pilots mental and physical welfare, discussing roles of mental hygiene and preventive medicine in flight surgeons programs
18 p3097 A69-35301

Aviation health service for flight safety problems with emphasis on accident prevention, emphasizing physician role in man-machine relationship of personnel surveillance
18 p3098 A69-35305

Flight surgeon observations of stress and fatigue effects on aircrew of first nonstop transatlantic helicopter flight, discussing fatigue ratings, sleep patterns, etc
19 p3262 A69-36450

Vestibulometric test program for flight surgeon appraisal of flying personnel, emphasizing singling out persons prone to illusory sensations
20 p3473 A69-37277

Vestibulometric tests for flight surgeon appraisal of applicants in flying profession, comparing Coriolis forces cumulative load tests with conventional tests
20 p3481 A69-37278

FLIGHT TEST INSTRUMENTS

Cloud instrumentation for measurement of icing conditions of airplane flight tests
01 p0055 A69-11044

FLIGHT TEST VEHICLES

Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] 02 p0229 A69-12379

Procedures and facilities applicable to sonic environmental testing of flight vehicles, discussing sonic energy sources in vehicles and potential failure modes
12 p2060 A69-26939

Rentry flight test vehicle development for West German space program, using hypersonic model to determine controllability and aerodynamic stability
16 p2867 A69-31934

FLIGHT TESTS

Aircraft flight testing for determining airframe, engine and pilot degradation, examining flutter, handling characteristics, water ballast, propulsion, etc
01 p0054 A69-10292

T63 regenerative helicopter engine program, noting operational performance and engine-aircraft compatibility
[AHS PAPER 212] 01 p0143 A69-10410

Paraglider as recoverable sounding rocket dropped from helicopter, describing system design and flight tests
[UN PAPER 68-95445] 01 p0161 A69-10465

Error reduction in identifying pilot describing function from flight test data by shifting input signal by pilot delay time in simulated computer model
02 p0202 A69-11950

Angular motion during first stage cut-off of Europa 1 launch vehicle from flight tests compared with theoretical predictions
03 p0519 A69-12856

Soviet book on aircraft flight tests, discussing determination of maximum speed, climbing rate, flying range, takeoff and landing, controllability, maneuverability and recovery
03 p0365 A69-12900

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose
[AIAA PAPER 68-1152] 03 p0362 A69-13648

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients
[AIAA PAPER 68-1145] 03 p0521 A69-13668

Lifting body entry vehicles in low speed flight test program for determining handling qualities, discussing M2-F2 glide flights
05 p0702 A69-15571

Factors influencing development of both wind tunnel and flight test technology for determining aerodynamic derivatives of aircraft motions
05 p0741 A69-15572

Flight test support design, developing measure of performance of test environments stated in weapon or space system terms
05 p0742 A69-15804

On-line ground flight test data processing system
05 p0725 A69-16757

Flight test data reduction on time sharing general purpose computer, noting hardware link between airborne equipment and computer
05 p0726 A69-16758

Simulation in design of automated flight test data system
05 p0743 A69-16759

Army engineering flight testing of OH-6A helicopter, presenting test program and results
06 p0867 A69-17659

First flight test phase of multipurpose Vigen aircraft designed as basic platform for attack, trainer, reconnaissance and fighter versions
06 p0867 A69-17662

C-5A transport flight test and progress report, discussing taxi runs, first flights and flight-flutter program
06 p0867 A69-17665

Flight evaluation of direct lift control on DC-8 super 63 jet transport
06 p0867 A69-17666

General aviation flight testing philosophy and origin
06 p1043 A69-17667

LR-1 prototype design criteria and flight testing, discussing Model 99 airliners for commuter airlines
06 p0867 A69-17668

Lifting Body Test Program at Edwards AFB compared with flight testing standards of high performance aircraft, discussing testing philosophy
06 p1017 A69-17671

Mass distribution and inertia characteristics influence on spin susceptibility and spin recovery characteristics for eight current fighter aircraft
[AIAA PAPER 69-188] 06 p0868 A69-18057

Atmospheric entry testing in terms of velocity-altitude duplication, suggesting multistage rocket propelled aeroballistic range type testing
[AIAA PAPER 69-166] 06 p0907 A69-18189

Naval Research Laboratory experience with two and three axis gravity gradient satellites stabilization systems
07 p1228 A69-18344

Self excited rotor blade oscillation at high subsonic Mach numbers during flight tests of Sikorsky NH-3A compound helicopter
07 p1053 A69-18870

UHF telemetry flight tests at White Sands Missile Range, discussing multipath and target scintillation problems

07 p1082 A69-19116

Wind tunnel rain erosion testing of components of aircraft or missiles flying at high speed

07 p1117 A69-19534

Engineering testing of aerodynamic efficiency of helicopter rotors during hovering with and without ground effect

08 p1254 A69-20169

STOL aircraft intercity test flights emphasizing curved ILS approach, using onboard computer for altitude and distance data

08 p1347 A69-20602

Optical design of Wolter type 1 glancing incidence X ray telescope for 6-100 Å wavelength region, describing results of laboratory and rocket flight tests of prototype

08 p1318 A69-21087

In-flight testing of second and third stages of F 7 section of Europa 1 satellite booster, noting third stage explosion

08 p1410 A69-21144

Flight test performance of airborne Omega radio navigation system capable of worldwide coverage, discussing diurnal variations effects in phase velocity

08 p1348 A69-21191

Ammonia resistojet stationkeeping subsystem on-board ATS 4 satellite, noting flight test data agreement with ground tests

[AIAA PAPER 69-296] 09 p1560 A69-21212

Newton-Raphson technique development for determining stability derivatives from flight data, noting use of a priori wind tunnel information

[AIAA PAPER 69-315] 09 p1434 A69-22379

Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating

[AIAA PAPER 69-318] 09 p1611 A69-22383

Flight test evaluation program for airborne multisensor electro-optical display systems performance in TV mode under variety of optical conditions

[AIAA PAPER 69-317] 09 p1500 A69-22387

Onboard test and fault isolation design for airborne systems considering tradeoff parameters for optimum reliability, performance and cost

[AIAA PAPER 69-306] 09 p1434 A69-22389

Schleicher glider AS-W15 prototype tests, discussing balsa sandwich structure and flight characteristics

10 p1633 A69-22872

Test techniques for X-22A VTOL research aircraft during ground simulator work and actual flight test, describing stability and control characteristics

[AIAA PAPER 69-319] 10 p1633 A69-23044

Flight test telemetry data processing system designed for C-5

10 p1660 A69-23269

Ground station integrated flight test data system with interactive data input terminals, on-line assembly and responsive program development

10 p1633 A69-23271

Design of 126 channel PCM telemetry unit for C-5 aircraft flight test, discussing FET analog multiplexing

10 p1693 A69-23275

Lockheed XV-4B Hummingbird 2 VTOL aircraft propulsion, control, escape systems, with tests

10 p1634 A69-23597

Flight testing and preflight simulated testing of Lockheed C-5 Galaxy transport aircraft

10 p1634 A69-23599

Hypersonic flight test data of Berenice missile compared to wind tunnel test data, discussing in-flight flow separation, Mach-Reynolds torque, etc

10 p1632 A69-23842

Flight tests of deployment of 20 ft diam ribbon parachute at high dynamic pressures and supersonic speeds

11 p1823 A69-25383

Engineering assessment and flight testing of aircraft systems in UK, discussing operational reliability, etc

13 p2201 A69-27539

X-22A VSTOL aircraft testing, discussing control sensitivity, dutch roll mode period and performance test planning based on characteristics prediction

14 p2392 A69-29699

Multiple shaker ground vibration test system for confidence in helicopter designs before flight testing and evaluation of force balancers

15 p2585 A69-30357

Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel

[AIAA PAPER 69-427] 16 p2734 A69-32769

Rotary wing aircraft height-velocity testing, analyzing engine-out landing by combining flight tests with mathematical simulation model

[AHS PAPER 353] 17 p2900 A69-33524

Canadair CL-84 two propeller V/STOL utility tilt wing vehicle development program and flight tests to assess military potential of aircraft

17 p3077 A69-34065

Aerodynamic characteristics of ballistic reentry vehicles from flight test dynamic measurements, illustrating results

18 p3085 A69-34670

Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity

18 p3210 A69-35094

Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation

18 p3103 A69-35097

V/STOL wind tunnel data at low forward speeds, discussing test limit dependence on model size, downwash angle and tunnel geometry

18 p3119 A69-35229

Operational flight tests of IR atmospheric turbulence detection system

[AIAA PAPER 69-799] 19 p3367 A69-35631

Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint

19 p3267 A69-35996

Apollo spacecraft equipment qualification program for margin assurance, discussing ground and flight tests

19 p3430 A69-36015

C-5 air force logistic transport, discussing structural design, configuration, payload, aerodynamics and flight testing

[AIAA PAPER 69-758] 19 p3248 A69-36295

Gust absorber system configuration flight tests and analysis, emphasizing application to delta wing aircraft

[ONERA-TP-698] 20 p3462 A69-37753

STOL airline operation test programs involving aircraft, navigation equipment, systems and ATC

21 p3646 A69-38731

Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance

[AIAA PAPER 69-887] 21 p3647 A69-39413

In-flight test to determine variation effects in bank angle control parameters on cruise flight handling qualities, considering spiral stability

[AIAA PAPER 69-893] 21 p3648 A69-39425

Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid

[AIAA PAPER 69-842] 21 p3765 A69-39429

Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data

23 p4131 A69-42522

V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results

[AAS PAPER 69-401] 24 p4252 A69-42831

Training missions and military exercises to field test weapons system models

[AAS PAPER 69-478] 24 p4296 A69-42884

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients

[AIAA PAPER 68-1145] 24 p4394 A69-43250

High speed compound helicopter rotor loads flight test program, discussing measured parametric effects

[AIAA PAPER 68-980] 24 p4250 A69-43712

FLIGHT TIME

Variational calculus applied to time optimal trajectories between two points in range altitude space, discussing aircraft thrust and drag laws

01 p0009 A69-10414

Circadian rhythms disruption during long distance flights, discussing adverse effects on pilot and passenger performance

03 p0378 A69-14260

Radar round trip time of flight measurements to Venus for three month interval about inferior conjunction of August 1968

04 p0663 A69-15384

Conjugate gradient methods for optimization problems with terminal constraints, noting minimum time paths for V/STOL aircraft climb phase

12 p2013 A69-26763

Orbit determination from satellite using linear combinations of time of flight measurements and based on expansion of satellite law of motion

12 p2159 A69-26778

Time of flight measurement for velocity of micron sized particles in two phase flow by light transmission method

13 p2263 A69-28243

Minimum fuel multiple impulse orbital rendezvous for fixed transfer time near circular orbits

16 p2857 A69-32161

Flight times compared for intercept and pure pursuit missile trajectories

20 p3618 A69-37716

Flight simulation requirements for reducing aircraft training flight time, discussing control system and instrument motion characteristics, visual simulation and critical maneuvers motion

22 p3928 A69-41139

FLIGHT TRAINING

NT SPACE FLIGHT TRAINING

Airline crew training, requalification, recurrent, upgrading and aircraft transition training for crew and pilot

01 p0019 A69-10450

Annual general aviation aircraft accident rate variation related to annual variations in pilot flight training activity

19 p3262 A69-36448

Human factors methods importance in nonmilitary flight simulation training, discussing cost factors and skills evaluation

22 p3894 A69-41138

Flight simulation requirements for reducing aircraft training flight time, discussing control system and instrument motion characteristics, visual simulation and critical maneuvers motion

22 p3928 A69-41139

Annual general aviation accident rate prediction from annual flight training variations

23 p4062 A69-41793

Algorithm minimizing personnel number and training costs to meet uncertain skill requirements, applying to army aviation contingency force training composition

[AAS PAPER 69-116] 24 p4271 A69-42818

FLIGHT VEHICLES

Flight vehicle dynamics, discussing classical mechanics, fluid dynamics, structural dynamics and thermodynamics

02 p0193 A69-11985

Book on flight structure theory and analysis covering methods for digital computers, differential equations for equilibrium boundary value problems, etc

03 p0525 A69-13266

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control

08 p1348 A69-21066

Soviet book on radio navigation of flight vehicles covering systems classification, operational characteristics, satellite navigation, etc

12 p2129 A69-27076

Fracture design for aircraft vehicles, discussing crack strength requirements and method for serviceability prediction

17 p3060 A69-33563

Soviet book on flight vehicles astronaut navigation covering automatic equipment accuracy, changes in spherical coordinates, time measuring, etc

18 p3168 A69-34355

Optimal control of flight vehicle consisting of long thin elastic body under torsional deformations, solving by method of successive approximations

21 p3760 A69-38852

Optimal control of rotational and transversal motions of elastic flight vehicles, considering torsional and flexural deformations

21 p3760 A69-38890

Time optimal control for torsional vibrations of flight vehicle for limited energy case, illustrating uniform wing of constant rigidity

21 p3686 A69-38891

Soviet book on flight vehicle design dynamics, discussing lift effectiveness and rigidity as function of internal stresses during ground and flight operations

21 p3825 A69-39533

Flight vehicle motion in high density medium reacting with static, vortex and dynamic forces analyzed for optimal regime via Lagrange-Euler equation

21 p3768 A69-39824

Flow stability regions at surface of flight vehicle, considering boundary layer flow of incompressible fluid

21 p3645 A69-39827

FLIP-FLOPS

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control
22 p3977 A69-39874

Cumulative error in flight vehicle position determination by inertial navigation system, showing dependence on constant acceleration components
22 p3978 A69-40252

HF vibrations effect on motion of gyroscopic linear acceleration integrator, showing additional error in flight vehicle acceleration measurements
22 p3946 A69-40253

Digital computer program for determining flight vehicle telemetry antenna performance from ground test readings
23 p4133 A69-41754

FLIP-FLOPS

Performance characteristics of variable geometry bistable fluid amplifiers
[ASME PAPER 68-WA/FE-18]
05 p0748 A69-16094

Temperature, acoustic, vibration and shock environment effects on pure fluid bistable and proportional amplifiers
[ASME PAPER 68-WA/FE-31]
05 p0705 A69-16104

Flip-flops built with complementary symmetry MOS, discussing power, noise and load stability due to n and p channel series transistors
07 p1113 A69-19766

Nonlinear discrete on-off system phase plane system analysis by motion separation method
16 p2763 A69-31628

Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio
17 p2931 A69-34115

Current mode gates and flip-flops with subnanosecond propagation delay for integrated logic circuits, discussing memories dimensions, LSI arrays, etc
20 p3505 A69-37342

Classification of switching process in bistable fluid amplifiers with illustration of fluid oscillator, discussing capacitor and bleeds
[ASME PAPER 69-FLCS-28]
20 p3465 A69-37977

Integrated TTL flip-flop circuits, describing functional principles of circuits with DC and capacitive coupling
24 p4287 A69-43130

FLOATS

Magnetic masses of differentiating or integrating floating gyroscope effect on gyro moment sensor performance, examining utilization of multiple permanent magnet
09 p1497 A69-22102

Operational errors of floating gyroscopes with hydrostatic unloading of bearings, establishing eccentricity tolerances, axes misalignment and temperature field nonuniformity
09 p1497 A69-22103

Centering force and initial rigidity of magnetically suspended bearings of integrating floating gyroscope with allowance for mutual inductance of exciting coils
09 p1497 A69-22104

Channel wall effect on gain of apparent mass of cylindrical and elliptical bodies floating in channel and subject to vertical impact
11 p1875 A69-25487

Floating body attitude and stability analysis based on system potential energy balance, considering Archimedes principle, torques, equilibrium conditions, body shape, etc
[SAWE PAPER 773]
18 p3172 A69-34874

FLOQUET THEOREM

Determining transfer matrix and comparing solution of homogeneous differential equation to Floquet theory results
10 p1666 A69-22928

Unforced periodically varying systems, developing approximate solutions with Floquet theory
11 p1909 A69-25289

Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions
14 p2534 A69-29318

Driving point admittance of radiating aperture in infinite periodic phased array, determining Floquet series and coefficients of waveguide modal expansion
17 p2938 A69-33876

FLORA

U PLANTS [BOTANY]

FLOTATION

Flotation technique for laboratory calibration of low level accelerometers, noting accuracy dependence on flotation fluid density stability
[AIAA PAPER 68-874]
24 p4315 A69-43242

FLOTATION SYSTEMS

U FLOATS

FLOW CHAMBERS

Coaxial flow jet chamber flow patterns dependence on inlet gas velocity, density and length/diameter ratio
[AICHE PAPER 25B]
04 p0587 A69-14509

Flow velocity, density, temperature, dryness and pressure in mixing chamber of MHD vaporizer
06 p0871 A69-17919

FLOW CHARACTERISTICS

NT BOUNDARY LAYER STABILITY

NT FLAME STABILITY

NT MAGNETOHYDRODYNAMIC STABILITY

Steady three dimensional flow through impeller of turbines with small number of blades and with edge cut hub, noting inefficiency of flow without impact
01 p0142 A69-10309

Steady state three dimensional MHD flow in variable profile channels calculated by reducing problem to two dimensional approximation using curvilinear coordinate system
01 p0131 A69-10776

Electromagnetic fields effect on turbulent boundary layer characteristics of compressible fluid on insulating wall of MGD channel
01 p0131 A69-10777

Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes
01 p0176 A69-11146

Expression derived for flow characteristics in smooth pipe for entire Reynolds number range
02 p0230 A69-11870

Fluidic element design calculations, noting flow characteristic differences
02 p0195 A69-12074

Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm
02 p0232 A69-12354

Strain rate and temperature effect on flow stress of 7075 aluminum bars
03 p0443 A69-13120

Heat input influence on hypersonic flows past sphere and circular cylinder
[DVL-844]
03 p0364 A69-13663

Slow nonNewtonian flow in separation zone analyzed using finite difference scheme
04 p0587 A69-14594

Flow characteristics and sound velocity in two temperature plasma
05 p0802 A69-15796

Flow characteristics about curved lateral jet, discussing effect of pitot tube nozzle shape and turbulence
05 p0746 A69-16017

Circular cylinder near wake in cross flow measured with hot-wire anemometry for various Reynolds numbers, noting data processing on digital computer
[ASME PAPER 68-FE-5]
05 p0747 A69-16068

Liquid flow systems dynamic response to periodic disturbances of system structural supports
05 p0747 A69-16073

Turbulent free shear layers in isoenergetic flow, correlating theory and experiment
[ASME PAPER 68-FE-9]
05 p0748 A69-16077

Shock tube investigation of formation and flow characteristics of impulsively generated vortex street recorded interferometrically, using high speed framing camera
[ASME PAPER 68-FE-32]
05 p0748 A69-16079

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes
[ASME PAPER 68-WA/FE-9]
05 p0698 A69-16089

Filtration and flow characteristics of wire cloths used in hydraulic systems described by expressions from measured properties
[ASME PAPER 68-WA/FE-39]
05 p0750 A69-16111

Smith correlation of turbine stage efficiency for relating achievable efficiency to stage loading and flow factors used for total pressure loss coefficient data
[ASME PAPER 68-WA/GT-5]
05 p0812 A69-16140

Quasi-method of characteristics with application to fluid lines with frequency dependent wall shear and heat transfer
[ASME PAPER 68-WA/AUT-7]
05 p0750 A69-16181

Fluctuation velocity, apparent kinematic viscosity and turbulent shear stress in isothermal homogeneous free jets
06 p0909 A69-17169

Flow velocity, density, temperature, dryness and pressure in mixing chamber of MHD vaporizer
06 p0871 A69-17919

Electromagnetic field induced energy and momentum changes effects on pressure, temperature and particle velocity of flows behind propagating gaseous detonation waves
[AIAA PAPER 69-44]
06 p0970 A69-18084

Mathematical model for flow within external target type thrust reverser, assuming inviscid incompressible two dimensional flow
[AIAA PAPER 69-3]
06 p0985 A69-18124

Steady flow circuit characteristics in square cross section channels of planar geometry fluid control elements in case of laminar flow
07 p1118 A69-18293

Flow in impellers of mixed and radial flow compressors for jet engines, turbochargers and automotive gas turbines, discussing velocity, load distribution, etc
[SAE PAPER 690033]
07 p1049 A69-18312

Nonstationary flow past spheres and cylinders in electromagnetic shock tube, determining time required for flow to become stationary
07 p1119 A69-18744

MHD flow in channels with abruptly widening sections and finned walls under transverse magnetic field, discussing effects on drag
07 p1192 A69-19016

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K
07 p1166 A69-19264

Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals
08 p1333 A69-20446

Transonic flow around airfoils with constant curvature in uniform asymptotic stream, studying leading edges in exact form
09 p1429 A69-21606

Characteristic equation obtained by considering world line vector, basic thermodynamic variables and metric tensor as functions of Lichnerowicz class
09 p1480 A69-21614

Stationary shock wave formation onset in Meyer-Prandtl flow, obtaining Marchal number for plane flow
09 p1429 A69-21688

Expansion tube modification incorporating nozzle plate at secondary diaphragm for reducing flow nonuniformity and contamination
[AIAA PAPER 68-371]
09 p1477 A69-21960

Diagnostic techniques to identify flow regimes of high enthalpy shock tunnel
[AIAA PAPER 68-729]
09 p1477 A69-21970

Thin jet-flapped airfoil flow analysis in ground proximity at small angle of incidence, assuming inviscid incompressible flow
09 p1431 A69-22275

Incompressible fluid flow engine spiral casing, considering flow as potential flow
10 p1632 A69-22914

Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation
11 p1867 A69-24375

Convection heat transfer and flow in rotating bodies, discussing laminar, turbulent and mixed flow in cones and disks, spheres and cylinders
11 p1998 A69-24459

Viscous effects of wall boundary layer behind primary shock wave on flow in shock tube, noting pressure and temperature changes
11 p1870 A69-25010

Intermittent flow facilities for ballistic and lifting reentry flight simulation including shock tubes, ballistic ranges and shock and gun tunnels
11 p1863 A69-25016

Hot wire sensitivity to velocity, temperature and density fluctuations of temperature varying flow field, discussing calibration curves and special cases
11 p1886 A69-25088

Friction coefficients for turbulent flow through smooth pipes, considering average and friction velocity relations, fluid velocity measurements and flow Reynolds number
11 p1874 A69-25429

Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate
[ASME PAPER 68-LUBS-2] 13 p2267 A69-27285

Discontinuity coefficient on boundaries of mixing zone of plane jet, observing homogeneity of thermal and kinematic structures 13 p2247 A69-27978

Gas-liquid critical flows, considering compressibility, rate of momentum, mass and heat transfer, etc 13 p2376 A69-28144

Combined free and forced convection flows in parallel channel systems and in single channels, discussing metastable flow regimes, single phase laminar flows, etc 13 p2377 A69-28152

Stationary radial source flow of liquid particles into vacuum, discussing boundary value problem equations, parameters effects on flow structure and flow field characteristics 13 p2248 A69-28210

Boundary layer characteristics of incompressible flow in wind tunnel with asymmetric two dimensional contraction, discussing flow profiles 13 p2249 A69-28235

Small disturbances distribution in flow parameters along two dimensional combustion zone of finite width using thermal diffusion theory 14 p2537 A69-28986

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes
[ASME PAPER 68-WA/FE-9] 14 p2390 A69-29445

Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics 14 p2431 A69-29607

Shock wave velocity and gas flow parameters in shock tube with noninstantaneously opening diaphragm calculated by method of characteristics 14 p2432 A69-29623

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle 15 p2590 A69-30048

Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm 15 p2590 A69-30263

Turbulent boundary layers behavior near flow separation, obtaining equations for equilibrium layers 15 p2591 A69-30638

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties 15 p2717 A69-30908

Two dimensional laminar convection cells asymptotic behavior for high Rayleigh number, discussing Robinson and Pillow models for fluid between horizontal plates heated from below 16 p2767 A69-31588

Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes 16 p2843 A69-32711

Local external flow variations effect on blow-in-door nozzle performance in transonic flight regime
[AIAA PAPER 69-428] 16 p2733 A69-32731

Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics 17 p3010 A69-32865

Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funnelling and fuel-driver gas interface stability
[AIAA PAPER 69-678] 17 p3021 A69-33444

Flow simulation on wind tunnel test models for aerodynamic characteristics of aircraft design, discussing boundary layer and external flow coupling
[AIAA PAPER 69-660] 17 p2945 A69-33471

Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy
[AIAA PAPER 69-726] 17 p3011 A69-33472

Shock tube calibration for aerodynamic loading, determining flow parameters by observing particle trajectories with high speed photography of smoke tracers 18 p3085 A69-34469

Statistical dynamics and structure of turbulent shear flows in incompressible fluids of constant density, discussing Reynolds stress at critical layers 18 p3123 A69-34922

Optimum efficiency of turbines with small volumetric flow rate, determining height of air-gas flow, partial admittance and flow angle in clearance 18 p3184 A69-34983

Working fluid flow parameters compensation by expelled cooling air in air-gas flow area of turbine stage 18 p3184 A69-34985

Double knife-edged double-crossing schlieren apparatus analyzed for operation principle and applied to measure hypersonic wake characteristics in hotshot tunnel 19 p3293 A69-35740

Servovalve orifice characteristics described by discharge, flow or loss coefficients for laminar and turbulent flow, noting use of Mises model 19 p3256 A69-36712

Boundary layer formed in miniature nozzle studied for effect on jet spreading discharged into space at high Mach numbers 19 p3395 A69-36760

Gas ionizing shock waves structure in arbitrary magnetic field, considering greater magnetic viscosity than dissipative coefficients 19 p3381 A69-36773

Supersonic flow past segmented and blunt bodies, investigating flow characteristics 19 p3242 A69-36783

Statistical equations for compressible gas, discussing turbulent quantities separated into fluctuating and macroscopic parts 19 p3300 A69-36784

Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities 20 p3513 A69-37063

Film cooling slot adiabatic wall effectiveness measurement in two dimensional constant property flow, showing role of lip thickness and injection angle 20 p3585 A69-37082

Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature
[AIAA PAPER 68-672] 20 p3458 A69-37185

Electromagnetic effects on pressure, temperature and particle velocity in flow behind propagating gaseous detonation waves based on one dimensional flow field model 20 p3514 A69-37190

Rarefied molecular gas flow past permeable surface, determining reflection law and flow parameters 20 p3459 A69-37438

Simultaneous lateral skewing regions existence in low speed three dimensional turbulent incompressible boundary layer flow
[ASME PAPER 69-FE-24] 20 p3517 A69-37998

Compressible fluid flow characteristics in turbomachine stage, discussing simplified radial equilibrium method as basis for design 21 p3643 A69-38457

Computational method for nonlinear two and three dimensional disturbances in plane parallel flows applied to transverse disturbances in plane Poiseuille flow 21 p3691 A69-38464

Gas flow characteristics in shrouded and unshrouded turbine wheel assemblies, emphasizing radial flow role in efficiency 21 p3785 A69-38865

Membrane vibration problems for combined free and forced laminar convection through vertical ducts, obtaining expressions for velocity, temperature and Nusselt numbers 21 p3851 A69-38974

Circular baffle mounted above flat-bottomed cylindrical tank outlet, discussing effect on remaining tank fluid volume and flow behavior under low gravity conditions 21 p3696 A69-39232

Skin friction results from free stream velocity boundary layers with varying injection and suction wall conditions, describing flow characteristics 21 p3696 A69-39431

Free stream dispersion without permeation using nonporous glass beads and solutes, examining flow rate, particle size distribution, solute diffusivity, etc 22 p3894 A69-39873

Arc-heated plasma jet wind tunnel flow properties in plenum chamber by spectroscopic techniques, measuring electron excitation, temperature and densities 22 p3990 A69-40596

Cooldown of vacuum insulated transfer lines using liquid N and H, discussing flow characteristics reproduction by digital computer program
[NAS-NRC PAPER I-1] 22 p4050 A69-40625

Liquid solid mixtures of parahydrogen flow characteristics in pipe, globe valve, orifices and venturi, determining pressure loss
[NAS-NRC PAPER F-5] 22 p3998 A69-40626

Pulsatile blood flow physical characteristics in short vascular segments 22 p3878 A69-40785

Pulsed energy balance expressions for turbulent characteristics of incompressible circular flow in channel with inserted rotating cylinder 22 p3933 A69-41028

Ionized He and Ar plasmas nonequilibrium nozzle flows, noting temperature difference between electron gas and atom-ion gas, calculating flow parameters 22 p3861 A69-41047

Flow and thermodynamic variables of Ar-Cs mixture behind normal shock in shock tube at various temperatures and pressures 23 p4150 A69-41335

Mean flow properties of incompressible turbulent three dimensional jets and wakes, treating flow within boundary layer theory context 23 p4060 A69-41908

Serrated flow characteristics in gold-indium solid solutions at various strain rates and temperatures 24 p4361 A69-43028

Wiener-Hermite truncated stochastic expansion used for velocity and concentration fields in turbulent flow convecting passive scalar, determining diffusivity and spectrum function 24 p4302 A69-43359

Flow discharge characteristics of nozzle during swirling shock flow ejection, considering isentropic and isothermal limiting cases 24 p4247 A69-43499

Bubble flow evolution at various pressures up to critical value
[ASME PAPER 69-HT-30] 24 p4411 A69-43529

Air flow laminarizing turbulent boundary layer, determining velocity, turbulence intensity, temperature profiles and local heat transfer coefficients
[ASME PAPER 69-HT-10] 24 p4413 A69-43558

Physical flow characteristics with self similar laminar boundary layers, performing inverse transformation of Falkner-Skan equation 24 p4304 A69-43586

FLOW CHARTS

Computer systems definition, terminology and functional description, discussing engineering problems, flow charts, programming and techniques 04 p0563 A69-14515

Space-time evolution of one Petrov type into another, obtaining algorithm, flow diagram and discontinuous hypersurfaces results 08 p1350 A69-19789

Minimal representation in state variables for multivariable control system, discussing algorithms, identification methods and flow graph techniques 12 p2047 A69-26070

Procurement procedures in management planning, discussing document flow charts, contract negotiation, etc 15 p2719 A69-30314

Programming aspects of computer uses in civil engineering, stressing engineer-coder communication via flow diagrams 22 p3903 A69-40138

FLOW COEFFICIENTS

NT DISCHARGE COEFFICIENT

Boundary layer effect on flow coefficient of fluid amplifier feed nozzle, noting flow uniformity, incompressibility, velocity and velocity distribution assumptions 07 p1059 A69-19320

Current flow coefficient of high pervance three electrode electron guns with longitudinal compression 11 p1849 A69-24911

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers 11 p1873 A69-25228

Two phase two dimensional turbulent jet analysis for predicting uncertainty in measured value of mixing coefficient 13 p2247 A69-27787

Discontinuity coefficient on boundaries of mixing zone of plane jet, observing homogeneity of thermal and kinematic structures 13 p2247 A69-27978

Turbulent gas coaxial mixing theory, deriving eddy viscosity model and semiempirical expressions for velocity, temperature and density fluctuations [AIAA PAPER 69-682] 17 p2952 A69-33434

Anisotropy of derivatives of transverse velocity fluctuations in grid turbulence subjected to plane deformation, determining dimensionless coefficient 19 p3299 A69-36647

FLOW DEFLECTION

Soviet book on turbojet engine reverse thrust systems and systems for deflection of jet stream covering aircraft braking efficiency 04 p0647 A69-14934

Axial deviation of gas flow resulting from mixing turbulent gas jets 04 p0591 A69-15411

Base pressure calculation in initial turbulent boundary layer of supersonic flow about two dimensional backward facing step, using mass conservation conditions 07 p1119 A69-18747

Supersonic flows past slender bodies, calculating pressure by means of moving singularities 08 p1252 A69-20721

Fluidic jet beam deflection amplifier, discussing basic principles, operating characteristics and design criteria 10 p1638 A69-23554

Oblique shock wave properties with free stream Mach number and flow deflection angle as independent variables, noting explicit solution 11 p1819 A69-25378

Different pressure and deflection measurements coherence in vortex flows verified assuming radial equilibrium conditions 12 p2012 A69-26362

Electrically driven thin fluid jet stability in longitudinal field between two plate electrodes, discussing role of Ohm law in calculating jet potential 12 p2136 A69-26402

Displaced layer thickness dependence on air injection parameters measured in wind tunnel 13 p2245 A69-27385

Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics 14 p2431 A69-29607

Extension of Helmholtz classical problem of flows with discontinuous surfaces, considering two sources and transverse plane 14 p2433 A69-29683

Gas flow deflection at centrifugal pump wheel outlet for wheels having different inlet and outlet vane angles 15 p2547 A69-30571

Alpine effects on wind field at synoptic scale using potential-vorticity equation, discussing deflection angle dependence on potential temperature distribution 15 p2650 A69-31445

Pressure distribution in wake produced by obstacle with secondary fluids injection into boundary layer, obtaining coefficient governing resistance of obstacle to forward motion 16 p2768 A69-31604

Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics 17 p3010 A69-32865

Hydraulic tank for visualizing flows around stationary models, noting absence of wall effects [ONERA-TP-708] 17 p2956 A69-33588

Viscous electrically conducting fluid flow around thin profiles for equal Reynolds and magnetic Reynolds numbers, using Oseen method to linearize equations 18 p3124 A69-35285

Linearly elastic medium supersonic flow past rigid wedge, considering longitudinal and transverse perturbations interactions, dry friction, adhesion, slip and wedge physicochemical properties 20 p3515 A69-37439

Circular liquid jet oblique impingement on flat surface, noting dry zone occurrence at small angles due to lateral flow deflection 21 p3691 A69-38551

Forces on stationary cylinder under sinusoidal flow, considering symmetrically located vortex pairs and flowfield [ASME PAPER 69-FE-13] 21 p3643 A69-38601

LF switching in wall attachment type digital fluid amplifiers, studying visual and quantitative values for switch pressure and flow as function of geometric variables [ASME PAPER 69-FLCS-31] 21 p3649 A69-38604

Fluidic angular rate sensor, obtaining rate information by sensing laminar jet flow deflection from nozzle, discussing advantages over mechanical rate sensors 21 p3722 A69-38766

Incompressible viscous fluid flow past sphere at low Reynolds number, evaluating stream function and drag on sphere 21 p3694 A69-38771

Jet deflection in drifting subsonic gas flow 21 p3644 A69-39096

Axisymmetric and two dimensional flows over blunt bodies at high Mach numbers by integral relations method 21 p3645 A69-39790

Shock wave detachment distance in front of spheres and cylinders in hypersonic flow, using magnetic shock tubes and Mach 5 and 18 wind tunnels 22 p3931 A69-40710

Transient flow resulting from plane shock diffraction by analytic blunt body, basing analysis on Taylor series expansions in space and time variables 22 p3860 A69-40895

Supercavitating flow past thin hydrofoils, determining flow velocity or acceleration potential near free surface 22 p3933 A69-41023

Integral equations of motion for plane steady flow of viscous incompressible electrically conducting fluid around flat plate 22 p3992 A69-41109

Asymptotic description of laminar hypersonic boundary layer acceleration approaching sharp corner, assuming small interaction with outer inviscid flow [AIAA PAPER 68-67] 23 p4059 A69-41883

Two dimensional diverging flow of ideal compressible fluid past slender profile, using Prandtl-Glauert rule and linearized equation 24 p4243 A69-42584

Supersonic rarefied gas flow past circular cylinder, studying flow and shock parameters by multiple wave interferometry 24 p4244 A69-43070

Boundary layer separation zones in laminar, transition and turbulent fluid flows past conical bodies with widening skirts 24 p4245 A69-43481

Hydrogen-air combustion in supersonic flow past sphere determined with allowance for chemical reactions nonequilibrium rates at high pressure and temperature 24 p4408 A69-43488

Supersonic viscous flow around sharp corner at various expansion angles, giving pressure distributions and velocity profiles role [ASME PAPER 69-HT-14] 24 p4247 A69-43555

FLOW DIRECTION INDICATORS
NT WIND VANES

Heat transfer dependence on direction of heat flow in stainless steel/aluminum interfaces, showing surface roughness and flatness influence 01 p0177 A69-11406

Fixed position pressure probe for measuring subsonic flow direction over range of Reynolds number, Mach number and flow angle 17 p2973 A69-33107

FLOW DISTORTION

Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings 04 p0678 A69-14902

Acoustic streaming near small spherical obstacles, obtaining stream functions 04 p0631 A69-14904

Two dimensional supersonic rotational flow around convex corner solved using coordinate system consisting of left running characteristics and streamlines 05 p0697 A69-15722

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models 05 p0803 A69-16048

Oblique shock wave propagation through two dimensional steady nonuniform inflow, discussing higher order theory via irrotational or rotational disturbances of arbitrary amplitude [AIAA PAPER 69-39] 06 p0913 A69-18103

Exact partial solutions to transonic gas flow equations used to describe flow around shape streamlined by supersonic flow with additional shock wave 07 p1118 A69-18698

Steady conical compressed flows in nonaxisymmetric ring nozzles characterized by discontinuities 07 p1120 A69-18989

Wake deformation for horizontal and vertical cylinders present in wake of hovering rotor, using flow visualization technique [AIAA PAPER 69-228] 07 p1051 A69-19551

Helicopter rotor wake distorted geometry prediction by analytical method, noting experimental results for rotor in forward flight [AIAA PAPER 69-196] 07 p1051 A69-19553

Large amplitude waves in inviscid flows of stably stratified fluids over barriers with constant density upstream constructed from vortex pairs and doublets 08 p1346 A69-20313

Rotor downwash in ground effect in presence of step, using two dimensional analysis for flow field calculation [AIAA PAPER 69-225] 08 p1253 A69-21032

Lift engine model compressor response to inlet pressure distortion to determine nature and extent of critical area of spoiling for axial flow compressors [ASME PAPER 69-GT-29] 09 p1571 A69-22493

Two dimensional stratified flow over obstacle in finite height channel, noting lee waves and drag increase with decreasing speed 11 p1869 A69-24892

Interference between bodies of revolution and wings in supersonic flow, using Volterra method for calculation 11 p1820 A69-25476

Thin deformable body motion in disturbed potential flow of ideal incompressible fluid 11 p1876 A69-25488

Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings 12 p2182 A69-26655

Acoustic streaming near small spherical obstacles, obtaining stream functions 12 p2131 A69-26657

Subsonic wind tunnel solid and ventilated wall interference on air flow around aerodynamic models, discussing data corrections and slotted wall tests [AIAA PAPER 68-360] 12 p2059 A69-26766

Ideal compressible fluid motion and heat transfer, noting convective heat transfer intensification with increased twisting velocity of flow 13 p2251 A69-28559

Hypersonic wakes interference effects induced by facility instrumentation, discussing results of wind/shock tunnel investigations 15 p2588 A69-30475

Flow disturbances in supersonic rocket nozzles due to secondary injection analyzed by effective body approximation, including side forces [AIAA PAPER 69-443] 16 p2839 A69-32666

Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests [AIAA PAPER 69-487] 16 p2840 A69-32676

Velocity and static pressure redistribution in distorted flow field upstream of axial flow compressors [AIAA PAPER 69-485] 16 p2842 A69-32694

Subsonic diffuser design, discussing flow distortion and turbulence levels and pressure loss characteristics [AIAA PAPER 69-449] 16 p2843 A69-32700

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows [AIAA PAPER 69-704] 17 p2953 A69-33453

Velocities and pressure in twisted jet in unbounded space containing same fluid as jet 19 p3298 A69-36388

Nonuniform supersonic flow of ideal inviscid gas impinging on plane obstacle, discussing flowfields and shock wave production in impact 19 p3239 A69-36397

Stratified fluid flow past obstacle, considering steady inviscid flow with nonlinear convection and vertical acceleration 19 p3240 A69-36474

Anisotropy of derivatives of transverse velocity fluctuations in grid turbulence subjected to plane deformation, determining dimensionless coefficient 19 p3299 A69-36647

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models 20 p3581 A69-37957

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, rarefaction coefficient for air between jets, etc 21 p3696 A69-39095

Boundary value problem solution for inviscid fluid flow past compliant body with analytical behavior of flow discontinued at points 23 p4151 A69-41525

- Turbomachinery periodic structures design to improve tolerance to inflow distortion and resonant oscillatory flows, considering large amplitude pressure waves propagation
[SAE PAPER 690388] 23 p4201 A69-41666
- Supersonic flows around slender bodies calculated by method of moving singularities
23 p4061 A69-42407
- Transonic flow around profiles with heat input, showing drag reduction in supersonic part of flow field
23 p4061 A69-42414
- Aerodynamics of twisted jet propagating in same fluid by asymptotic expansion, analyzing twist influence on heat transfer
24 p4244 A69-43057

FLOW DISTRIBUTION

- Kernel function applied to compressible fluid flow computation for linear procedure to determine subsonic flow patterns
01 p0058 A69-10225
- Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder
01 p0059 A69-10307
- Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection
01 p0005 A69-10357
- Vortex method within slender body theory for aerodynamic interference between missile in both captive and dropped positions and carrying aircraft
01 p0007 A69-11026
- Laminar flow of anisotropic Erickson fluid near wall at large Reynolds numbers, discussing Newtonian behavior, viscosity coefficient and particle orientation
02 p0231 A69-12141
- Ground simulation of reentry observables with ablation, studying ablation products interaction with flow field of wave superheater hypersonic tunnel
02 p0229 A69-12502
- Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime
[AIAA PAPER 68-2] 02 p0189 A69-12520
- Hypersonic flow distribution and separation types over highly swept delta wings with trailing edge flaps at Mach 6
[AIAA PAPER 68-97] 02 p0189 A69-12522
- Three dimensional wakes and jets, discussing centerline velocity, half width growth and velocity irregularities
02 p0190 A69-12549
- Self similar solutions uniqueness of three dimensional laminar boundary layer equations for conical flow determined by supplementary conditions derived from flow pattern
02 p0233 A69-12572
- Hypersonic flow past delta wings with attached shock wave, analysis leads to determination of closed flow pattern
02 p0191 A69-12577
- Photographic flow patterns of separated flows with vortex formation obtained in wind tunnel for different aerodynamic configurations of revolution
02 p0191 A69-12586
- Velocity measurement and flow pattern determination of plane shock waves during passage through channel diaphragm
02 p0234 A69-12589
- Nonlinear weak shock wave diffraction around convex angled corners in polytropic inviscid thermally nonconducting gas
03 p0412 A69-12848
- Circumferential inhomogeneity of flow through impeller blades of axial flow compressor
03 p0361 A69-12954
- Pressure and flow transients in liquid rocket engine feed systems predicted by method of characteristics
03 p0495 A69-12991
- Jet engine exhaust composition and methods for reducing smoke emission through burner design changes, noting primary zone fuel and airflow pattern
[SAE PAPER 680348] 03 p0495 A69-13350
- Flow rate effect on flow pattern of gas escaping through lateral hole of arbitrary depth
04 p0586 A69-14274
- Laminar two dimensional viscous wake behind finite flat plate, investigating upstream and downstream flow field of trailing edge region for high Reynolds numbers
[ASME PAPER 68-WA/APM-20] 04 p0541 A69-14387
- Coaxial flow jet chamber flow patterns dependence on inlet gas velocity, density and length/diameter ratio
[AIChE PAPER 25B] 04 p0587 A69-14509

- Rarefied flow past sphere, analyzing collisionless flowfield structure and development as density increases
04 p0542 A69-14731
- Flow field of impulsively started circular cylinder, noting drag due to nonlinear convection
04 p0544 A69-14897
- Boundary layer flow of viscous incompressible liquid past wedge embedded circular cylinder
04 p0590 A69-15276
- Flow pattern induced by oscillatory point source in rotating inviscid liquid
04 p0591 A69-15279
- Static and dynamic performance of pancake vortex flow field and application to signal amplification
05 p0704 A69-16001
- Suction effect on incompressible flow through step expansion in circular pipe through sudden enlargement, considering inlet flow with thin boundary layer
[ASME PAPER 68-FE-11] 05 p0748 A69-16074
- Flow field in fluidic temperature sensor using schlieren and shadowgraph techniques
[ASME PAPER 68-WA/FE-29] 05 p0763 A69-16102
- Mach number effects on pattern of vortex flow past delta wing and circular cones at various Reynolds numbers
06 p0858 A69-17339
- Visual investigation of flow field at swept wing, measuring pressure distribution at stall fence and vortices formation
06 p0858 A69-17341
- Flow fields about upswept rear fuselages of rear loading cargo transport aircraft
06 p0859 A69-17492
- Kinetic theory of sharp leading edge parallel to supersonic flow using Boltzmann equation, determining flow field
06 p0861 A69-17637
- Laminar constant pressure gradient flow of viscous incompressible conducting fluid through rotating straight circular pipe with perpendicular magnetic field
06 p0967 A69-17718
- Three dimensional scramjet exhaust nozzle flow fields by second order method of characteristics
[AIAA PAPER 69-5] 06 p0862 A69-18048
- Mixing and combustion of gaseous and particle laden jets in air stream, analyzing turbulent, coaxial and jet mixing flows
[AIAA PAPER 69-33] 06 p1038 A69-18146
- Flow field for single or multiple jets firing forward into oncoming supersonic free stream, noting effect of forward extending cylindrical body
[AIAA PAPER 69-69] 06 p0864 A69-18164
- Method of characteristics for nonequilibrium internal flow fields in propulsion systems, discussing focusing, shock wave and accuracy
06 p0915 A69-18170
- Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in compressible gas
07 p1119 A69-18738
- Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect
07 p1050 A69-18753
- Mach number distribution along axes of underexpanded supersonic jets measured in wind tunnel experiments
07 p1050 A69-18922
- Similarity of mean flow patterns of natural local wind to model wind in wind tunnel
07 p1176 A69-18964
- Viscous hydrodynamical equations for flow field exterior to obstacle moving with constant velocity, discussing force relationships, drag invariance and integral representations
07 p1121 A69-19298
- Magnetospheric and high latitude ionospheric disturbances, bulk motion/convection flow pattern and electric field distribution
07 p1128 A69-19370
- Wake deformation for horizontal and vertical cylinders present in wake of hovering rotor, using flow visualization technique
[AIAA PAPER 69-228] 07 p1051 A69-19551
- Computer programmed momentum theory for induced flow field of helicopter rotor in forward flight
[AIAA PAPER 69-224] 07 p1052 A69-19562
- Liquid flow field about oscillating flat plate, comparing visualization results with numerical solution of Navier-Stokes equations
[AIAA PAPER 69-226] 07 p1121 A69-19565

- Shockload on axial intake fan leading edge of radial flow compressor, calculating flow field
08 p1251 A69-20604
- Displacement effect due to subsonic reaction heat front behind shock wave in two dimensional supersonic flows
08 p1252 A69-20691
- Rotor downwash in ground effect in presence of step, using two dimensional analysis for flow field calculation
[AIAA PAPER 69-225] 08 p1253 A69-21032
- Three dimensional flow field of incompressible fluid with purely axial development in conical ducts and turbomachines
09 p1480 A69-21597
- Diagnostic techniques to identify flow regimes of high enthalpy shock tunnel
[AIAA PAPER 68-729] 09 p1477 A69-21970
- Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate
09 p1430 A69-21973
- Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method
[ASME PAPER 69-GT-35] 09 p1432 A69-22489
- Turbulent circular wall air jet trajectory and spreading in perpendicular crossflow of constant and varying velocities
[ASME PAPER 69-GT-33] 09 p1483 A69-22491
- Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine
[ASME PAPER 69-GT-48] 09 p1432 A69-22495
- Mach wave and anisotropic supersonic flow interaction, considering constant entropy along streamline and layer of entropy discontinuities/interfaces
10 p1631 A69-22906
- Noninterfering instrumentation techniques to measure hypersonic flowfield parameters in wind tunnels, measuring flight time of pulsed laser generated spark for velocity
10 p1672 A69-23266
- Thin wall flow of circular jets in bounded transverse flow, showing hydrodynamical parameter of mixture effect on jets dimensionless path
10 p1679 A69-23567
- Singular integral equation for velocity in linearized Rayleigh problem in rarefied gas flow field solved by applying Luke weight coefficients
10 p1679 A69-23596
- Air flow distribution and wind velocities in cyclones constructed from Cosmos 122 TV cloud images
11 p1912 A69-24825
- Hot wire sensitivity to velocity, temperature and density fluctuations of temperature varying flow field, discussing calibration curves and special cases
11 p1886 A69-25088
- Spherically blunted 15 degree semivertex angle cone flow field parameters at Mach 8.6, measuring pitot pressure and shock shape
11 p1818 A69-25143
- Asymptotic theory for obtaining nearly free molecular flow solutions uniformly valid throughout flow field based on linearized Boltzmann equation
11 p1818 A69-25283
- Wing geometry and wing lower surface boundary layer effects on rolled-up tip vortices geometry and strength
11 p1819 A69-25372
- Aerodynamic heating of ELDO-A booster rocket, calculating flow field, heat transfer and conduction by method of characteristics and thermal models
11 p1966 A69-25433
- Supersonic nozzle design ensuring desirable flow field in inviscid core of viscous gas flow, using boundary layer equations
11 p1820 A69-25473
- Steady flow field for viscous incompressible fluid in rotating pipe with porous walls determined from Navier-Stokes equations
11 p1875 A69-25481
- Flow field structure involving supersonic secondary jet interactions and separated regions in thrust vector control system
11 p1944 A69-25594
- Spool valve flow patterns within hysteresis region, discussing effects of valve geometry, Reynolds and cavitation numbers
11 p1827 A69-25645
- Flow field over plain or complex bodies with pressure density changes, using high speed schlieren apparatus with color strip filter
12 p2088 A69-26183

FLOW DISTRIBUTION

Aerodynamic field around symmetric profile two dimensional plates, visualizing velocity fields with Al particles

12 p2011 A69-26288

Steady state flow of viscous conducting liquid in inlet of channel with or without transverse magnetic field, emphasizing approach to Hartmann- Poiseuille patterns downstream

12 p2138 A69-26626

Exhaust gas recirculation for VTOL aircraft [AIAA PAPER 67-439]

12 p2013 A69-26760

Ingestion and flow field characteristics of interaction of two heated parallel air jets, discussing VTOL exhaust ingestion tests [AIAA PAPER 68-79]

12 p2012 A69-26761

Imaging for flowfield of nonuniform parallel streams with thin airfoil represented by vorticity distribution, noting change of lift and moment

12 p2012 A69-26775

Aircraft reports of high level turbulence on European and Atlantic routes, noting rapid changes in large scale flow pattern occurring locally

12 p2127 A69-26901

Nonuniform flowfield from supersonic penetration of plane shock by three dimensional pointed planar wing, using integral transform method to study field perturbation pressure

13 p2199 A69-27323

Flow field instability over concave bodies in supersonic free stream computed by integration of gasdynamic equations, noting application to supersonic parachutes [AIAA PAPER 68-946]

13 p2199 A69-28228

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347]

13 p2263 A69-28282

Characteristics method for stress waves from hypervelocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields [AIAA PAPER 69-355]

13 p2365 A69-28287

Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects [AIAA PAPER 69-354]

13 p2366 A69-28288

Analytical model for free convection heat transfer from vertical plates with nonhorizontal leading edges, discussing flow field

13 p2379 A69-28342

Plasma rotation by Lorentz force in homopolar gas discharge device, considering centrifugal forces effect on flow pattern

13 p2315 A69-28556

Short fiber composites flow orientation in system of high volume glass fibers in epoxy resin measured by glass rheometer

13 p2287 A69-28670

Spherical symmetric unsteady conservation equations describing transient burning of volatile fuel droplets, obtaining time dependent fuel and heat distribution in flow field

14 p2537 A69-29016

Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy

14 p2390 A69-29616

Air mass analysis, discussing homogeneity, quasi-barotropic fluids, noise elimination to arrive at smooth flow pattern, etc

15 p2647 A69-30193

Flow and pressure fields for spiral grooved pumping seal with specified groove dimensions and Reynolds number [ASLE FICFS PREPRINT 30]

15 p2619 A69-30481

Supersonic flow past cone in presence of blowing normal to cone surface, calculating flow field parameters behind conical shock wave

15 p2548 A69-31175

Solid rocket propellants tests, considering propulsion performance measurements, altitude simulation problems, internal flow patterns, nozzle geometry, etc

16 p2765 A69-31751

Two dimensional analysis of isentropic perfect gas flow fields in axisymmetric nozzles for transonic two phase flow initial values, calculating particle trajectories [AIAA PAPER 69-572]

16 p2731 A69-31847

Water vapor recondensation effect on structure of liquid particle flow into vacuum

16 p2769 A69-31869

Godunov finite difference method modified for steady or unsteady flowfields about planar axisymmet-

ric blunt bodies, presenting body pressures and shock shapes

16 p2732 A69-31886

Flow field around sharp slender cones with surface mass transfer at zero angle of attack in low density supersonic and hypersonic flow [AIAA PAPER 68-66]

16 p2732 A69-31887

Plasma flow pattern in twilight regions of earth magnetosheath from positive ion observations of twin Vela 3 satellites

16 p2773 A69-31961

Flow field of highly ionized arc heated supersonic free jet, using continuous flow test facility [AIAA PAPER 68-135]

16 p2772 A69-32153

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568]

16 p2842 A69-32693

Velocity and static pressure redistribution in distorted flow field upstream of axial flow compressors [AIAA PAPER 69-485]

16 p2842 A69-32694

Rocket exhaust plume flow fields studied for vehicle effects taking into account nozzle boundary layer, coalescence shock and nonisentropic flow [AIAA PAPER 69-569]

16 p2842 A69-32696

Three dimensional supersonic nozzle flow field calculations using second order numerical method of characteristics and computer programmed for internal flows [AIAA PAPER 69-463]

16 p2734 A69-32766

Deflection effect on flow and mixing process in flames covering enclosed turbulent diffusion flames in combustion chamber

17 p3068 A69-32966

Monograph on interaction between flow and sound fields as singular perturbation problem, using matched asymptotic expansion

17 p2949 A69-32998

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess

17 p2949 A69-33124

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions

17 p2951 A69-33257

Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing [AIAA PAPER 69-637]

17 p2891 A69-33290

Flow field pressure distribution due to plane shock wave impinging by thin wing moving in opposite direction, discussing mathematical formulation, analytic solution and applications [AIAA PAPER 69-647]

17 p2891 A69-33459

Supersonic leading edge problem using nonlinear Boltzmann equation with clipsoidal model, calculating molecular distribution functions for flow field [AIAA PAPER 69-652]

17 p2892 A69-33464

Mixed supersonic/subsonic type steady wake flow fields in flat based slender bodies, using finite difference method [AIAA PAPER 69-649]

17 p2892 A69-33468

Flow field of two dimensional nozzle exhausting to vacuum, describing computer program based on BGK equation and plotting exhaust region density, temperature and velocity [AIAA PAPER 69-658]

17 p2893 A69-33490

Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream [AIAA PAPER 69-656]

17 p2893 A69-33498

Flow measurements about high Mach number low Reynolds number laminar wake behind spherically blunted cones, including surface and wake flow field data, radial wake profiles, etc [AIAA PAPER 69-714]

17 p2894 A69-33500

Far and near field solutions for one dimensional unsteady flows in general inviscid relaxing gas, obtaining flow field structure by matching techniques

17 p2957 A69-33599

Two dimensional incompressible flow past circular cylinder at moderate Reynolds number, reducing partial differential equations of motion by series truncation for flow field

17 p2896 A69-33600

Flow structure in wake of blunt bodies placed perpendicular in parallel airstream determined from hot-wire anemometry [AIAA PAPER 69-746]

18 p3084 A69-34409

Laminar recompression behavior downstream of stagnation point behind hypersonic slender body, obtaining finite difference numerical solutions for near wake flow field [AIAA PAPER 69-713]

18 p3085 A69-34417

Mean patterns of meridional interhemispheric flow for 40 degree equatorial sector, calculating mean air mass transport in lower troposphere over western Indian Ocean

18 p3166 A69-34420

Turbomachinery aerodynamics, discussing secondary flow in blading and digital computer applications to annulus flow field

18 p3086 A69-34925

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial

18 p3124 A69-35170

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity

18 p3171 A69-35181

Rotating static thrust propeller or hovering rotor flow field study by schlieren photography, considering vortex field, tip flow and shock wake formation

18 p3087 A69-35218

Flow field throughout wind tunnel containing rotor with sharply deflected blades, noting reversed flow effect in front of wake

18 p3119 A69-35228

Systematic mathematical ordering of knowledge concerning three dimensional flow patterns around blunt bodies, emphasizing high speed computers role

18 p3089 A69-35269

Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram

18 p3149 A69-35289

Secondary flow consisting of longitudinal vortices superposed on convection flow on inclined plate, obtaining flow pattern through flow visualization

18 p3124 A69-35383

Ion collecting cylindrical electrostatic probes as flow field tracing instruments in low density slightly ionized flows

19 p3291 A69-35718

Fraunhofer holography for measurement of three dimensional flowfield velocity components, investigating rectangular channel flow

19 p3305 A69-35729

Holographic velocimetry data reduction applicable to flow field holograms, using singlet interference pattern for spherical and plane wave illumination

19 p3305 A69-35730

Static temperature measurement in arc-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer

19 p3294 A69-35752

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection

19 p3298 A69-36385

Supersonic aerodynamic characteristics of flared cones with various flare angles studied by schlieren photography, showing geometrical parameters influence on flow patterns

19 p3239 A69-36387

Hydrogen jet structure ejected into vacuum from Laval nozzle at supersonic velocity, considering separation point from diffuser wall

19 p3240 A69-36601

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes

19 p3381 A69-36772

Ordered sets of Massieu thermodynamic characteristic speeds for reacting gas mixtures relevant to nonequilibrium flow fields compared to Laplacian and Newtonian speeds

19 p3452 A69-36802

Heat transfer coefficient and flow patterns of horizontal circular plate for various Rayleigh numbers, noting surface temperature

20 p3632 A69-37523

Flow induced by plane flame traveling supersonically or subsonically at constant speed through long tube studied for flow field steadiness in flame fixed coordinates [ASME PAPER 69-FE-33]

20 p3460 A69-37993

N strip algorithm of integral relations to analyze flow around circular cone at incidence in supersonic flow

20 p3460 A69-38128

Computer solutions for nonlinear partial differential equations governing compressible flow patterns with shocks, using Lagrange coordinates

20 p3569 A69-38212

Forces on stationary cylinder under sinusoidal flow, considering symmetrically located vortex pairs and flowfield [ASME PAPER 69-FE-13]

21 p3643 A69-38601

Flow field induced by spiral vortex sheet, noting existence of radial velocity component
21 p3692 A69-38610

Laminar free convection from horizontal infinite strip with downward facing thermally insulated vertical walls at edges, noting boundary layer thickness and flow pattern
21 p3853 A69-39672

Small particle holography technique extended for dynamic properties of particle fields, determining velocity and density field, size distribution, flow structure and diffusion rate
21 p3726 A69-39776

Flow structure in wake behind cylinder in plane channel, discussing circulation zone variation and velocity and turbulence distribution at various channel cross sections
21 p3698 A69-39850

Mach 8 flow field effects and forces on small delta tail surfaces mounted on body of revolution at various angles of attack
[AIAA PAPER 68-891] 22 p3859 A69-40539

Base pressure of peripheral jet ground effect machines in heaving motion, discussing flow patterns
22 p3866 A69-40817

Flowfield properties of two dimensional supersonic jet near sonic nozzle exit by numerical method of characteristics
22 p3860 A69-40920

Stratified blood flow distribution in lung lobe from analyzing breath-holding changes on expired Ar and nitrous oxide tension plateaus during rest and exercise
23 p4078 A69-41315

Alaska sled dogs cardiovascular performance and flow distribution during cross country runs
24 p4256 A69-42624

Fluid mechanical structure of laminar hypersonic wake behind sharp circular cone, investigating flow field at zero angle of attack and adiabatic wall temperature
24 p4247 A69-43576

Reverse flow profiles in turbulent free jet mixing with streamwise pressure gradient
24 p4306 A69-43684

LF approximation in predicting unsteady aerodynamic forces affecting large aircraft stability, analyzing velocity potential of oscillating wings
24 p4250 A69-43729

FLOW EQUATIONS
NT HELMHOLTZ VORTICITY EQUATION
NT VON KARMAN EQUATION
NT VORTICITY EQUATIONS

Lossy and lossless fluidic transmission line theory to estimate downstream conditions having known upstream system
01 p0012 A69-10153

Asymptotic solution of Orr-Sommerfeld equation by multiple scales method for linear and general velocity profile
01 p0059 A69-10332

MHD boundary layer equations in Blasius problem reduced to differential equations and solved by Laplace transform
01 p0127 A69-10337

Indeformable gravity waves in horizontal cylindrical channel, using first and second order approximations for nearly uniform flow equations solutions
01 p0060 A69-10392

Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations
01 p0007 A69-11070

General theory of constitutive equations for rational mechanics of deformation and flow
02 p0341 A69-12251

Meksyn method application to problems of jet mixing and jet reattachment
02 p0233 A69-12530

Unsteady incompressible boundary layer flow over leading edge boundary layer calculated by three dimensional time dependent equations
02 p0233 A69-12543

Self similar solutions uniqueness of three dimensional laminar boundary layer equations for conical flow determined by supplementary conditions derived from flow pattern
02 p0233 A69-12572

Geostrophic wind direct computation from grid point analysis of observed winds, using balance equation
04 p0626 A69-14913

Variable energy blast waves analysis with reference to cylindrical spark channel formation, noting shock front velocity approximation
04 p0590 A69-15203

Flow of two conducting immiscible liquids between parallel porous moving plates under transverse magnetic field
05 p0743 A69-15600

Source and sink method application to direct axisymmetric problems of hydrodynamics
05 p0747 A69-16039

Model kinetic integral equation for describing flow in transition region at leading edge of tapered body in rarefied gas
05 p0697 A69-16040

Simulation of two and three dimensional fluid transients by use of one dimensional equations in lattice-work of piping elements
05 p0747 A69-16071

Interaction between supersonic jet and counterflow of ideal compressible fluid
05 p0751 A69-16501

Two dimensional aligned field MGD flows analyzed using corresponding basic equations
05 p0806 A69-16735

Magnetoplasticity induced in metal by high magnetic fields, examining stationary flow in two dimensional deformation
05 p0844 A69-16804

Approximate solution of equations for boundary layer flow of conducting medium on insulating and electrode walls of MHD generator channel
06 p0871 A69-17914

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients
[AIAA PAPER 69-83] 06 p1037 A69-18109

Computer solution of incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries
[AIAA PAPER 69-185] 06 p0914 A69-18135

Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas
07 p1118 A69-18317

Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities
07 p1120 A69-18754

Three dimensional vector fields and flows geometry, discussing vector lines as geodesics on surfaces of normal congruence and flat vector fields
08 p1302 A69-19823

Clebsch transformation application to equations describing viscous fluid, deducing canonical equations equivalent to Navier-Stokes equations
08 p1303 A69-20125

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution
08 p1251 A69-20322

Transformation of laminar stationary incompressible boundary layer equations for body of revolution in incident flow, using difference method
08 p1252 A69-20703

Frequency response from linearized dynamic equations for viscous incompressible fluid flow in viscoelastic tubes, discussing transfer gain
08 p1304 A69-20704

Gas kinetics application to various flow problems by solving Boltzmann equation for monoatomic single component gas
08 p1351 A69-20708

Singular perturbation problem for elliptic linear partial differential equation, studying asymptotic expansion of solution in vicinity of singular points in nonconvex domain
08 p1352 A69-20751

Fluid equations for collisionless plasma including finite ion Larmor radius and finite beta effects
08 p1368 A69-20802

Flow equations of rheological media derived using thermodynamics, assuming nonlinear stress-strain relation in incompressible medium
08 p1419 A69-21074

Rarefied gases back diffusion between parallel plates used for studying diffusion in capillaries, deriving volume flow equation valid for any density
10 p1677 A69-22903

MHD first order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium
10 p1727 A69-23090

Optimum operation modes of MHD converter
10 p1636 A69-23095

Three dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two dimensional flow
10 p1727 A69-23100

Similarity solutions of laminar boundary layer equations for three dimensional flows of incompressible power law fluids
10 p1678 A69-23235

Existence and uniqueness to boundary layer continuation problem based on flow equation for steady gas flow
10 p1679 A69-23569

Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation
11 p1867 A69-24375

Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow
11 p1961 A69-25106

Iterative solutions of nonlinear integrodifferential dynamical equation for two point velocity correlation tensor in incompressible fluid turbulence studies
12 p2062 A69-26602

Nonlinear periodic wave propagation at angle to magnetic field in collisionless plasma studied by two fluid plasma equations
13 p2304 A69-27297

Unique solution proven for laminar boundary layer equations of flow of revolution in unsteady state
13 p2248 A69-28195

Stationary radial source flow of liquid particles into vacuum, discussing boundary value problem equations, parameters effects on flow structure and flow field characteristics
13 p2248 A69-28210

Boundary layer equation of viscous incompressible fluid with moment stresses, noting flow around thin plate and submerged jet problems
14 p2428 A69-28815

Model equation for Reynolds stress in turbulent two dimensional shear flow
14 p2428 A69-29000

Unsteady pressure on oscillating slender cone in hypersonic flow derived by expanding flow equations in powers of shock density parameter
14 p2389 A69-29020

Kelvin-Helmholtz instability noting effects of oblique magnetic field and rotation, deriving dispersion relation
14 p2491 A69-29335

MHD equations system in intrinsic form, establishing conditions of integrability
14 p2492 A69-29593

Radiating gray gas laminar jet in thermodynamic equilibrium ejected from plane nozzle into wake analyzed using boundary layer, divergence and transfer equations
14 p2432 A69-29612

Von Karman swirling flow problem differential equations solved by extending Serrin existence theorems
14 p2432 A69-29676

Riemann problem with arbitrary jump data for extended hyperbolic systems of equations, showing conditions for unique solution
14 p2433 A69-29678

Extension of Helmholtz classical problem of flows with discontinuous surfaces, considering two sources and transverse plane
14 p2433 A69-29683

Cosmic shock waves simulation through correlations between shock equations in classical and relativistic fluid dynamics, using shock tube tests
14 p2433 A69-29981

Boundary value problem for quasi-linear equation of unsteady transonic gas flows, including linear model and operators for group of transformations
15 p2590 A69-30049

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] 15 p2591 A69-30478

Rate equation for effective turbulent viscosity variations, considering effects of generation, convection, diffusion and decay in quasi-parallel shear flows
15 p2591 A69-30905

Pressure fluctuation relaxation model to close turbulent distribution function equations at one point level, solving equation for rectilinear flows and periodic wake decay
15 p2591 A69-30906

Similarity solutions for laminar compressible boundary layer with reverse flow, considering various wall/stagnation temperature ratios
15 p2591 A69-30907

Hamiltonian variational principle for stationary bounded MHD flows, choosing suitable functions and rigid conducting boundary location
15 p2660 A69-30910

Laminar boundary layer equation solution representing velocity profile by fourth degree polynomial
15 p2593 A69-31263

Two phase flow mixing shocks, obtaining expressions for pressure and entropy changes, discussing shock stability and gas entrapment mechanism
16 p2768 A69-31589

Eigenvalue bounds for amplification rates, wave speeds and linear stability conditions for Orr-Sommerfeld equation governing parallel flow in boundary layer and round pipes
16 p2768 A69-31591

Mean velocity distribution prediction in turbulent shear flows of variable density by coordinate stretching method
[AIAA PAPER 68-41] 16 p2770 A69-31888

Monograph on solutions to equations for unsteady flow of ideal gases, with applications to hypersonic flows, based on three space coordinates and time
16 p2773 A69-32428

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct
[AIAA PAPER 69-484] 16 p2841 A69-32682

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution
17 p2891 A69-33312

Adiabatic compressible turbulent boundary layer equations for two dimensional and axisymmetric flows, discussing methods of solution based on eddy viscosity formulation
[AIAA PAPER 69-687] 17 p2955 A69-33470

Flow field of two dimensional nozzle exhausting to vacuum, describing computer program based on BGK equation and plotting exhaust region density, temperature and velocity
[AIAA PAPER 69-658] 17 p2893 A69-33490

Elastoplastic flow equations formulation, inverting flow rule to relate stress rates to strain rates and instantaneous stresses, noting Navier equations
18 p3219 A69-34666

Similarity solutions of viscous transonic equation describing spiral and radial flows, containing shock-like transitions of corresponding inviscid solutions
18 p3121 A69-34787

Magnetic fields and electrically conducting fluids interaction with emphasis on magnetodynamics equations, investigating rectilinear flows in pipes and nozzles, shock waves, etc
19 p3379 A69-35804

Gas dynamics equations solution applied to Cauchy problem
19 p3297 A69-35861

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces
19 p3298 A69-36143

Finite difference scheme for primitive equation model, emphasizing two grid internal noise suppression to improve gradient force expression accuracy
19 p3364 A69-36507

Series expansion for exponent of singularity of Laplace equation for flow near apex of plane delta wing
19 p3240 A69-36590

Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations
[ONERA-TP-738] 19 p3299 A69-36649

Momentum and energy equations for fluctuating flow of viscous incompressible conducting fluid past flat plate with time dependent suction under transverse magnetic field
21 p3691 A69-38445

Boundary layer flow past permeable surface, generalizing integral equations for case with suction
21 p3691 A69-38573

Sedov canonic equations for supersonic gas flow solved by applying Chaplygin function to determination of Riemann function for potential and stream function equations
21 p3643 A69-38637

Blast angle effect on fanjet gas dynamics in crosswind, using equations for free lateral flow trajectories and reverse flow regions
21 p3850 A69-38863

Equations governing steady diabatic gas flows in Crocco velocity vector field, discussing changes in total pressure
21 p3695 A69-39007

Existence conditions of critical points for autonomous differential equations in bounded flows
22 p3975 A69-40571

Friction, heat transfer and mass transfer theory of flow represented by two dimensional parabolic boundary layer equations
22 p3933 A69-40940

Second order differential equations of supersonic flows past bodies at small angles of attack, showing linearized characteristics method applicability for conical nose
24 p4243 A69-42581

Two dimensional diverging flow of ideal compressible fluid past slender profile, using Prandtl-Glauert rule and linearized equation
24 p4243 A69-42584

Book on flow equations for composite gases derived from Boltzmann equation, BGK approximation application, etc
24 p4299 A69-42766

Unsteady axisymmetric potential flow of ideal incompressible fluid with free surfaces, deriving differential equations for gas bubble dynamics and surface geometry
24 p4302 A69-43500

Numerical program solving partial differential equations parabolic system for internal turbulent gas flow extended to flows undergoing circular tube laminarization by heating
[ASME PAPER 69-HT-52] 24 p4409 A69-43520

FLOW GEOMETRY

Flow in square to rectangular constant area transition piece having straight walls with outlet aspect ratio of 5 fitted with exit duct
02 p0189 A69-12412

Surface geometry of three dimensional inviscid hypersonic flows, developing tensor equations for geodesic, steepest descent and pressure approximations
04 p0542 A69-14718

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system
[AIAA PAPER 69-85] 06 p0984 A69-18082

Heat transfer coefficients for supersonic open cavity flow recompression steps noting influence of step and flow shapes
13 p2375 A69-27786

Gas turbine areas calculation of through flow cross sections for temperature deformations and blades elongation
18 p3184 A69-34987

Hydrodynamic equations of laminar plane flow of incompressible viscous fluid in rectangular region, calculating velocity field by equivalent network and integration
19 p3297 A69-35853

Divergence losses of noncircular C-D nozzles based on approximation by spherical source flows
19 p3238 A69-35960

Multistep axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock
21 p3785 A69-39104

Secondary flow occurrence and geometry in viscous turbulent flow in square channel, using iterative solution
24 p4303 A69-43501

Local Nusselt number beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid
[ASME PAPER 69-HT-35] 24 p4411 A69-43532

FLOW GRAPHS

Compressible fluid two dimensional supersonic and one dimensional unsteady flows similarities shown graphically, discussing hodograph-speedgraph relationship
19 p3300 A69-36777

Mathematical flow graphs application in analysis and design of elastomechanical structural systems
[AAS PAPER 69-151] 24 p4339 A69-42816

FLOW MEASUREMENT

Leak flow rates of nitrogen and helium at various pressure gradients measured by gas chromatography and mass spectroscopy
01 p0079 A69-10297

Discharge coefficient nondependence on Reynolds number demonstrated by measurement at orifices with sharp edges
01 p0006 A69-10362

Flow nonuniformity measured in shock tubes by determining heat transfer rate to fine wire probes
01 p0062 A69-11219

Pressure gain estimates in analog jet amplifier based on total pressure measurements in main jet interaction region
02 p0195 A69-12076

Discharge coefficients for Herschel type smooth venturimeters, analyzing influence of transport coefficients, convergence angles and contraction ratios
02 p0250 A69-12414

Wind tunnel and test equipment for studying flow in straight airfoil lattices at Reynolds numbers 50,000-1,200,000 and Mach numbers 0.1-1.0
03 p0412 A69-13789

Laminar and turbulent flow measurement in variety of tube diameters, using ring laser without insertion of mechanical probe
04 p0596 A69-14281

Open circuit wind tunnel experiment to measure properties of two dimensional plane turbulent wall jet in moving stream
[ASME PAPER 68-WA/APM-13] 04 p0586 A69-14390

Inclined hot-wire and hot-film anemometers parameter dependent on length-to-diameter ratio used to describe deviations from cosine law
[ASME PAPER 68-WA/APM-16] 04 p0596 A69-14391

Current mode amplifier circuit used with carbon resistors for measuring low flow rates of liquid hydrogen from small containers
04 p0577 A69-15025

Primary flow measuring element based on Chebyshev principle, noting differential pressure output loss and resistance to accumulation of contaminants
04 p0600 A69-15030

Nondirectional probe for mean velocity measurement in turbulent flow, determining reduced velocity profiles in interior of free flow
04 p0600 A69-15056

Sonic nozzle mass flow measurement errors at high supply pressures and moderate temperatures due to real gas effects
[ASME PAPER 68-WA/FM-4] 05 p0699 A69-16114

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency
[ASME PAPER 68-WA/FM-2] 05 p0763 A69-16135

Flow measurements in near wake of 7 degree half angle cone at free stream Mach number 4.3, noting pressure measurements
[AIAA PAPER 69-186] 06 p0863 A69-18068

Turbulent density fluctuations in near wake of hypersonic axisymmetric slender body measured photometrically with near UV absorption of sulfur dioxide in flow
[AIAA PAPER 69-70] 06 p0864 A69-18158

Book on fundamentals of temperature, pressure and flow measurements covering standards, calibration, moving fluid effects, transient effects and installations in fluids and solids
07 p1131 A69-18410

Flow diagnostics for high enthalpy nonequilibrium gas flows in shock tubes using long pulse ionized Ar gas laser
08 p1323 A69-1979

Multibeam Fabry-Perot interferometers for aerodynamics measurements of rarefied gas flows, determining density distribution, shape, structure and detachment of shock waves
08 p1314 A69-20385

Highly turbulent boundary layers on walls in channels using laser light sources
09 p1515 A69-21434

Spatial distribution of velocity, spatial correlation and ergodicity of turbulent flow, using spectrum of intensity fluctuations of scattered laser light
09 p1493 A69-21491

Impurity concentrations in expansion tube flow, measuring radiation intensities
[AIAA PAPER 68-371] 09 p1477 A69-21961

Diagnostic techniques to identify flow regimes of high enthalpy shock tunnel
[AIAA PAPER 68-729] 09 p1477 A69-21970

Bloodless heart flow measurement methods, noting simultaneous external recording of carotid and femoral pulses and impedance plethysmography
09 p1448 A69-22730

Flow and heat transfer measurements for heated air in subsonic flow through contraction section connecting tube to conical section
[JPL-TR-32-1348] 10 p1809 A69-23194

Mean flow measurements in supersonic wake of slender two dimensional body at zero incidence and heat transfer rate, noting predictability from similarity analysis
11 p1817 A69-24281

Nonorientable five channel adapter with spherical measuring head for three dimensional gas flow mea-

surement, noting sensitivity to mechanical disturbances in calibration

11 p1888 A69-25340

Laser Doppler flowmeter for heterodyne detection of laser light scattered from moving fluid applied to fluid velocity and velocity distribution measurements

12 p2093 A69-26546

Radial liquid flow between flat annular rings /face seals/, discussing film cavitation

13 p2267 A69-27365

Shock wave gas flow density behind shock tube calculated by shadows measurements using interferometric techniques

13 p2245 A69-27384

Effective electrical conductivity of two phase vapor-potassium flow in flat duct at flow temperature 800 C, showing dependence on volumetric vapor content

13 p2306 A69-27480

Construction and calibration of combined temperature and pressure probe for compressible flow

13 p2242 A69-28226

Monograph on velocity distribution function in turbulent boundary layer, discussing hot wire anemometer for mean velocity, turbulence intensity and higher order moments determination

13 p2250 A69-28336

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency
[ASME PAPER 68-WA/FM-2]

14 p2447 A69-29447

Axial and radial turbulence intensities for flow through smooth round tubes, measuring velocity profiles and drag coefficients

15 p2590 A69-30003

Thermistor thermometer with low energy dissipation for flow measurements, discussing design considerations

15 p2608 A69-30296

Shock tube hot flow duration, contact surface configuration and boundary layer thickness

15 p2590 A69-30297

Fluid flow velocity measurements by Doppler shift of laser light scattered from moving fluid, determining beat frequencies

15 p2616 A69-31291

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers

16 p2821 A69-31953

Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr

16 p2791 A69-32326

Temperature and flow measurements in jet engine combustion chamber, discussing design and calibration of gasdynamic thermometer, double thermocouple and flow probe

17 p2945 A69-32947

Flow measurements about high Mach number low Reynolds number laminar wake behind spherically blunted cones, including surface and wake flow field data, radial wake profiles, etc
[AIAA PAPER 69-714]

17 p2894 A69-33500

Constant pressure adiabatic turbulent boundary layer characteristics measurements correlated in incompressible reference frame, using modified Mager compressibility transformation

17 p2958 A69-34051

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field

18 p3124 A69-35384

Ferroelectric transducer for heat transfer rates and flow measurement in gaseous systems with autostabilized temperature, noting film coefficient

19 p3307 A69-35749

High energy recovery pressure and enthalpy sensor /HERPES/ for flow measurements in aerospace simulation facilities

19 p3307 A69-35750

Book on flow measurement techniques, considering forces, pressures, temperatures, boundary layers, wakes, turbulence, streamlines, etc

19 p3313 A69-36381

Liquid mercury flow turbulent intensity measured by quartz insulated Pt hot-film sensors, discussing calibration equation and measurement techniques

21 p3722 A69-38769

Monograph on hot wire anemometer measurements of velocity and temperature turbulence, discussing flow characteristics, calibration, etc

22 p3951 A69-41256

Gilson cuvette densitometer used for blood flow measurement in canine forelimb and human forearm and hand during constant intrabrachial arterial dye infusion

23 p4077 A69-41294

Pump system to obtain indocyanine green dye dilution curves without blood loss in small animals and infants

23 p4101 A69-41450

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory

23 p4058 A69-41727

Internal flow measurements in transonic region of supersonic nozzle with small throat radius of curvature compared with prediction data

23 p4060 A69-41900

Stewart-Hamilton formula for cardiac output measurements and regional blood flow determination

24 p4271 A69-42784

Two dimensional incompressible inviscid fluid flow problems solution by conducting-paper analog with electrical equipotentials tracing, based on Laplace equation applicability

24 p4299 A69-43024

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc
[ASME PAPER 69-APMW-26]

24 p4245 A69-43093

Transition from turbulent to laminar regime as consequence of high heating rates for internal convective flow, noting roles of Nusselt numbers and friction factors

24 p4304 A69-43559

FLOW REGULATORS

NT FUEL FLOW REGULATORS

Ejector-diffuser performance improvement by reduction of backflow with orifice plate installed at inlet of straight diffuser duct

11 p1819 A69-25382

Spiral grooved turbulent screw seal /viscoseal/ analysis, combining results of spiral grooved journal bearing study with turbulent fluid film theory
[ASLE FICFS PREPRINT 32]

15 p2619 A69-30482

Distributed boundary layer suction effectiveness for controlling supersonic transitional flow separation

16 p2772 A69-32149

Pt wire detector for flow regulation of atomic hydrogen beam, noting hydrogen maser application

22 p3950 A69-41232

FLOW RESISTANCE

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

NT VISCOUS DRAG

Energy dissipation at rounded pipe entrance in viscous fluid, showing relation between entrance loss and radius of roundness

01 p0059 A69-10308

Laval nozzle resistance as result of friction and under expansion of gas, noting flow and pressure recovery coefficients

03 p0361 A69-12967

Incompressible turbulent boundary layer with near zero wall friction at circular cylinder situated longitudinally in flow

03 p0416 A69-13664

Ellipsoids of revolution in viscous flow at very low Reynolds number, determining optimum shapes and minimum resistance values

06 p0911 A69-17780

Approximate solution for turbulent jet expansion in opposing stream, discussing hydraulic drag coefficient formula derivation

07 p1118 A69-18396

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006

07 p1050 A69-18703

Wall friction influence on three dimensional flow in axial flow turbomachines, introducing shear stresses between flow planes

08 p1252 A69-20724

Equilibrium dissociating gas laminar flow in circular tube calculated for heat transfer and hydraulic resistance, using boundary layer equations

10 p1679 A69-23426

Plenum chamber obstructions influence on hovercraft lift fan performance, discussing tests and losses due to flat plate at impeller outlet

13 p2202 A69-27546

Heat flow resistance between solid bodies in contact in vacuum

13 p2378 A69-28338

Diffuser inlet geometry, studying effects of straight section length on flow pattern and diffuser resistance

14 p2391 A69-29899

Gas ducted flow at subsonic inlet velocity and critical outlet Reynolds numbers, proposing surface friction relation to Mach number

16 p2771 A69-31956

Hydrogen check valve with low cracking pressure and flow pressure drop for hydrogen vent system at Saturn launch pad
[AIAA PAPER 69-578]

16 p2845 A69-32738

Heat transfer and hydrodynamic resistance for turbulent gas flow in longitudinal positive and negative pressure gradients analyzed using Reynolds number data

21 p3848 A69-38635

Hydraulic resistance of pipes with flow vorticity produced by helical swirlers

21 p3695 A69-38862

Turbulent Hartmann flow between rough walls in transverse magnetic field, determining field influence on resistance coefficient

22 p3989 A69-40255

Wave processes in pipelines during fluid filling, studying effects of flow resistance due to pumps and nozzles

24 p4300 A69-43075

Choking and shock in flashing single component two phase flow in tube, including vibrational effects, predicting minimum stagnation pressure loss
[ASME PAPER 69-HT-61]

24 p4303 A69-43535

Heat transfer and fluid friction of hydrogen and helium gas flows undergoing turbulent to laminar flow transition in heated pipe
[ASME PAPER 69-HT-54]

24 p4303 A69-43539

FLOW SEPARATION

U BOUNDARY LAYER SEPARATION

U SEPARATED FLOW

FLOW STABILITY

NT BOUNDARY LAYER STABILITY

NT FLAME STABILITY

NT MAGNETOHYDRODYNAMIC STABILITY

Couette flow stability in axial magnetic field, considering time bounded perturbation energy during increasing angular velocity in radial direction

01 p0059 A69-10233

Linear stability of steady and time dependent plane Poiseuille flow

01 p0175 A69-10333

Stabilization of plane parallel MHD flow at inlet and outlet of flat rectangular tube with transverse magnetic field

01 p0130 A69-10770

Linear stability of parallel flow in concentric annulus for infinitesimal axisymmetric disturbances

01 p0061 A69-11201

Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields

01 p0062 A69-11208

Coaxial jet mixing regimes in jet engines, determining requirements for compatibility by applying aerodynamic theory of ejectors
[ONERA-TP-599]

02 p0187 A69-11619

Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm

02 p0232 A69-12354

Algorithm for Orr-Sommerfeld equation applied to stability of laminar flow, noting profile resembling mean velocity profile of turbulent flow in flat tube

02 p0233 A69-12573

Barotropic instability analyses by method of jet stream like fields and energy transport from zonal current to wave disturbances based on vorticity equation

02 p0276 A69-12758

Viscous liquid layer flow down inclined plane under boundary conditions, taking into account drag and penetration at porous bed surface

02 p0234 A69-12774

Plane Couette flow stability in heated nonlinear viscous fluid flowing between horizontal plates heated to different temperatures

02 p0235 A69-12828

Solute vertical stabilizing gradient inhibition of thermal convection of fluid layer under temperature gradient, discussing effects on two dimensional flows motion

03 p0532 A69-13012

Cylindrical jet stability of perfectly conducting, incompressible and inviscid fluid in presence of axial magnetic field

03 p0474 A69-13142

Neutrally stable disturbances for nonplanar parallel shear flow with continuously varying mean velocity
03 p0415 A69-13155

Eigenvalues for Orr-Sommerfeld equation by difference technique for Reynolds number range 5780-729000, determining Poiseuille flow stability in plane channel
03 p0416 A69-13654

Sufficient conditions for stability of compressible atmospheric flows for rigid lid types of upper boundary condition
03 p0417 A69-13796

Instability and disturbance amplification in external laminar natural convection boundary layer over vertical flat surface with uniform heat flux
03 p0533 A69-13951

Stability of nondissipative stratified rotating flows with constant density to axisymmetric disturbances
04 p0588 A69-14740

Stabilizing influence of axial magnetic field on confined vortex flow of aqueous electrolytic conductor generated by two dimensional wall jets
05 p0798 A69-15611

Coanda nozzle entrainment and flow augmentation approximating numerical stability by finite differences
05 p0746 A69-16021

Laminar flow stability parameter presenting coupling ratio between angular momentum change and loss rate by frictional drag
05 p0750 A69-16187

Laminar flow stability along flexible boundary, using broken linear velocity profile instead of boundary layer profile
06 p0909 A69-17207

Secular equation for Couette flow stability in incompressible viscoelastic fluid
06 p0909 A69-17240

Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder
06 p0910 A69-17332

Physical mechanism of stability loss in nonvortical flows of uniformly dense ideal fluids, discussing entropy production
06 p0911 A69-17498

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators
[AIAA PAPER 69-112] 06 p0971 A69-18140
Natural frequency of fluid oscillations in complex pipelines
07 p1119 A69-18745

Stability of rotating liquid mass held together by surface tension
07 p1121 A69-19268

Combined effect of short wavelengths associated Kelvin-Helmholtz instability and long wavelengths associated gravitational instability on self gravitating fluid layer, discussing kinetic energy
07 p1182 A69-19276

Corrected stability limit for Poiseuille flow in pipes, annuli and channels, discussing flow between cylinders
07 p1121 A69-19475

Stability of plane vortex sheet in magnetic fields, noting stabilization effect of compressibility for nonmagnetic case
08 p1358 A69-19797

Electroconvective instability produced by uniform electric field in poorly conducting fluid under stabilizing vertical temperature gradient, noting heat flow increase
08 p1352 A69-20791

Nonlinear behavior of two stream instability between cold electron and ion streams
08 p1367 A69-20800

Stability of unsymmetrical plane flow noting velocity profile effect
08 p1304 A69-20812

Stability of inviscid swirling flow with finite axial velocity components and nonvanishing radial density gradients, noting criterion for infinitesimal disturbances
08 p1305 A69-20851

Hydrodynamic stability and entropy decrease in flow in three dimensional space, using irreversible thermodynamics principles
10 p1808 A69-22892

Incompressible Newtonian flow between two parallel planes, noting marginal stability condition, mean velocity profile and turbulence
10 p1673 A69-22909

Weak discontinuities in wave propagation, studying ionized gas nonsteady flow having electrical conductivity in magnetic field
10 p1727 A69-22916

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field
10 p1798 A69-23094

Laminar turbulent transition conditions in MHD channel flow
10 p1727 A69-23097

Long and ultralong waves in baroclinic zonal current, investigating current stability and wave perturbation characteristics by applying linearized perturbation equations to multilayer model
10 p1682 A69-23325

MHD boundary layer nonlinear instability, treating laminar to turbulent flow transition as reversible process
10 p1734 A69-23452

Dynamics of conducting fluid stream coupled to elastic medium by transverse electric or parallel magnetic field, considering stability of system
11 p1923 A69-24289

Viscosity and electrical conductivity effects on axisymmetric instabilities of current carrying annular cylinder of mercury
11 p1923 A69-24292

Parallel flow of viscous liquid film with free surface down inclined plane, noting growth of initially infinitesimal amplitude waves and finite amplitude wave stability
11 p1869 A69-24891

Charge bunching approach for gravitational hydrodynamic instability of infinite uniform self gravitating system in translational motion, using conservation laws
11 p1961 A69-25105

Gravitational stability of spheroidal expansions of rotating gas masses in astronomy, noting mechanism for fragmentation in cosmology
11 p1962 A69-25112

Viscous flow stability in rotating pipe, giving velocity components in cylindrical polar coordinates
11 p1871 A69-25125

Degree of knottedness of tangled vortex lines, discussing vorticity distribution for inviscid flow and MHD invariants
11 p1872 A69-25126

Low Reynolds number stability of incompressible fluid half jet flow, investigating free laminar boundary layer instability
11 p1874 A69-25280

Thin spherical layer flow stability with respect to small disturbances, showing unsteady motion above critical Reynolds numbers and secondary flow features
11 p1875 A69-25486

Buoyancy-driven system instability mechanism, showing Prandtl number increment effect and relation to Coriolis-driven instability of rotating fluids
11 p1876 A69-25559

Two dimensional convective flow stability for arbitrary Rayleigh numbers in horizontal layer, assuming large Prandtl number and free boundary conditions
11 p2003 A69-25657

Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas
12 p2088 A69-26178

Electrohydrodynamic instability of incompressible conducting cylindrical viscous jet in external magnetic field, noting viscosity role in oscillation modes and growth rate
12 p2136 A69-26403

Flow stability of axisymmetric jet with parabolic velocity profile in fluid at rest, calculating critical Reynolds numbers
13 p2244 A69-27300

Rayleigh-Taylor instability in synchronous liquid metal MHD generators, showing stabilization by channel positioning and threshold power rating
13 p2307 A69-27508

Perturbations stabilization in electrically conducting fluid by distributed automatic control system, determining feedback operators via boundary value problem
13 p2311 A69-28105

Flow field instability over concave bodies in supersonic free stream computed by integration of gasdynamic equations, noting application to supersonic parachutes
[AIAA PAPER 68-946] 13 p2199 A69-28228

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques
[AIAA PAPER 69-331] 13 p2242 A69-28267

Two dimensional Couette flow analysis showing stability at Reynolds number tending to infinity
14 p2428 A69-28802

Flow stability of one dimensional Cartesian and cylindrical incompressible inviscid flows with no body forces and interfaces
14 p2429 A69-29013

Energy transport between vortices in turbulent flow calculated from vortex stability study
14 p2430 A69-29508

Ideal fluid unsteady rectilinear plane-parallel flow stability, calculating shear layers before breakdown by using modified Rayleigh method
14 p2431 A69-29606

General atmospheric circulation instability factors for statistical weather forecasting, considering atmosphere as nonlinear oscillating system, analyzing relaxation time
14 p2476 A69-29820

Convective and nonconvective two stream instability for hot plasmas, approximating equilibrium distribution function for given temperature by resonance functions
14 p2499 A69-29844

Two piston flow stability separated by thin wall in traveling magnetic field, finding piston inertia centers velocity equal to field velocity
14 p2500 A69-29903

Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm
15 p2590 A69-30263

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region
15 p2548 A69-31065

Eigenvalues for class of nonself adjoint differential equations system treated as small perturbation of norm epsilon, assuming perturbation expansion
16 p2812 A69-31811

Linear amplification, nonlinear limiting and secondary instability induced by unsteady effects illustrated for various transitional flows, including roughness and streamwise vorticity
17 p2950 A69-33248

Turbulence origin and structure in stably stratified media for finite disturbance instability in sloping flows experimentally observed with visualization techniques
17 p2999 A69-33735

Minimum Reynolds number and Malkus theory of turbulent channel flow, discussing stability, equilibrium flow, and stationary turbulence via variational theorem
17 p2957 A69-33764

Asymptotic theory of Orr-Sommerfeld problem for symmetric channel flow stability
17 p2958 A69-34151

Criteria to predict flow instabilities triggered by exothermic reaction presence in high temperature reaction kinetic shock tube studies
18 p3116 A69-34462

Shock tunnel steady flow starting process in two dimensional reflection nozzle, using multiple shadowgraphs and interferograms, noting nozzle geometry influences
18 p3085 A69-34471

Hydrodynamic stability of solid fuel combustion in presence of acoustic disturbances in gas phase, considering material erosion and particle dispersion
18 p3231 A69-35150

Flow breakdown in wind tunnel tests of high disk loading systems at low forward speeds, investigating downwash distribution effect using disk loading and airfoil models
18 p3119 A69-35230

Atmospheric flow with respect to mesoscale disturbances, examining conditions for hydrodynamic stability
18 p3167 A69-35343

Hydrodynamic stability of incompressible fluid boundary layer flow during blowing or suction through porous surface, determining Reynolds number lower bounds
18 p3124 A69-35381

Viscous fluid secondary flow stability between coaxial rotating cylinders, using nonlinear differential equations derived from equations of motion
19 p3299 A69-36391

Energy losses due to drag in unstable laminar fluid flow in tube
20 p3513 A69-36973

Stability theory formulation for evaluation of boundary layer transition from laminar to turbulent states
[AIAA PAPER 68-669] 20 p3514 A69-37184

External natural convection flows, studying laminar instability, transition and turbulence in boundary layer flow
20 p3633 A69-37718

Flow induced by plane flame traveling supersonically or subsonically at constant speed through long tube studied for flow field steadiness in flame fixed coordinates [ASME PAPER 69-FE-33] 20 p3460 A69-37993

Unsteady boundary layer flows of compressible fluid over semiinfinite flat plate, discussing heat transfer rate 20 p3518 A69-38318

Naimark theorem extended to class of nonself-adjoint eigenvalue problems in hydrodynamic stability, considering Orr-Sommerfeld equation and Taylor stability problem 21 p3754 A69-38426

Fluid motion in free falling partially filled cylindrical vessel due to sudden vertical velocity change, considering free surface disturbances 21 p3692 A69-38684

Small amplitude acoustic waves propagating in compressible fluid with parallel shear flow and within constant gravitational field 21 p3772 A69-39241

Channel flows energy stability, discussing Couette and plane Poiseuille flows, velocity profiles, vorticity maxima, etc 21 p3697 A69-39675

Parallel shear flow equilibrium in inviscid nonheat-conducting incompressible fluid with density varying as function of vertical coordinate 21 p3697 A69-39743

Flow stability regions at surface of flight vehicle, considering boundary layer flow of incompressible fluid 21 p3645 A69-39827

Interaction between boundary layer and external vortex flows and stability transitions of heated rotating fluid annulus 21 p3698 A69-39869

Linear normal mode instability of three dimensional laminar and turbulent shear layers, analyzing relations between velocity profile, eddy viscosity and oscillations 22 p3932 A69-40893

Linear stability criteria for two dimensional wave perturbations effects on nonNewtonian fluid flow between parallel plates 22 p3933 A69-41108

Turbulence theory in laminar-turbulent flow transition, nonlinear stability for flows with Reynolds number higher than critical and fully developed turbulence 23 p4152 A69-42313

Parallel magnetic field effect on free boundary layer type flows stability of low Reynolds number between parallel streams of viscous incompressible conducting fluid 24 p4298 A69-42596

Tristable fluid amplifiers, analyzing J functions of staticized variable, ternary logical characteristics, input equations, flow stability and switching measurements 24 p4255 A69-43298

Nonlinear finite-amplitude instability of two dimensional compressible laminar wake flows, using Fourier expansion and Landau equation 24 p4245 A69-43357

Solution stability and secondary solutions growth beyond critical points investigation for Burgers equations for laminar-turbulent transition 24 p4302 A69-43360

Natural convection flow, discussing initial instability of laminar flow, disturbance amplification and transition to turbulent flow [ASME PAPER 69-HT-29] 24 p4411 A69-43531

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces [ASME PAPER 69-HT-37] 24 p4411 A69-43533

Supersonic flow stability with energy input applied to reaction kinetics of processes in aircraft and rocket combustion chambers 24 p4248 A69-43642

FLOW THEORY

NT MIXING LENGTH FLOW THEORY

Gravity waves train propagation in cylindrical channel, discussing derivation by three dimensional flow analysis method 01 p0059 A69-10382

Semiempirical theory of turbulent MHD tube flow at small Reynolds numbers taking into account magnetic field presence 01 p0130 A69-10769

Turbulent flow between parallel plates, discussing turbulence generation by energy addition 01 p0061 A69-10993

Turbulent boundary layer theory, discussing effective viscosity, numerical integration, mixing length flow theory and wall jets 02 p0231 A69-11987

Statistical model of turbulent flow confirms Kolmogoroff hypothesis of equilibrium zone at large Reynolds numbers 03 p0413 A69-12949

Unperturbed tube flow theory extended to flow through short axisymmetric tube 03 p0419 A69-13969

Second order difference scheme for calculation of plane or rotational compressible flow, investigating stationary flow as asymptotic limit of unsteady flow [ONERA-TP-652] 03 p0419 A69-14111

Transformations useful for finite difference solution of differential equations with infinite regions, considering flow problems application 04 p0588 A69-14717

Stationary velocity profile near jet driven vortex tube outer wall calculated by laminar boundary layer flow theory, neglecting wall curvature effects 05 p0798 A69-15610

NonNewtonian hydrodynamics equations for non-linearly viscous and viscoelastic media, analyzing dependence on rheological model 05 p0745 A69-15786

Time dependent two dimensional incompressible laminar boundary layers analysis, discussing application to transient flow over semiinfinite flat plate [ASME PAPER 68-FE-10] 05 p0748 A69-16076

Pressure distribution across short vortex chamber to exit radius with known inlet geometry based on incompressible flow model and visualization photographs [ASME PAPER 68-WA/FE-17] 05 p0748 A69-16093

Flow theories of fluids with elastic deformation of substructure, treating suspensions of irregularly shaped deformable particles 05 p0752 A69-16738

Linear theory of equilibrium and nonequilibrium gas flows applied to steady two dimensional nonequilibrium flow of inviscid nonheat-conducting gas 06 p0909 A69-17327

Universal equations for three dimensional laminar boundary layer of incompressible fluid on walls of axisymmetric channel with vortical external flow 06 p0909 A69-17328

Isoenergetic two dimensional supersonic turbulent base flow, noting boundary layer separation properties upstream and downstream [AIAA PAPER 69-68] 06 p0864 A69-18137

Theory of unsteady one dimensional motion of ideal compressible fluid, discussing equation of state 07 p1119 A69-18750

Green function in closed form for energy transport equation solution in axisymmetric Oseen flow 08 p1305 A69-20850

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence 09 p1577 A69-21768

Axisymmetric flow theory for turbomachine of non-free vortex design in distributed equilibrium state, considering boundary conditions and blade leading edges [ASME PAPER 69-GT-10] 09 p1432 A69-22504

Unrippled space-charge flow in dense axially symmetric electron beams as basis for electron gun design 11 p1846 A69-24598

Formula in Prandtl-Batchelor theory describing motion of incompressible fluid in sphere interior verified experimentally 11 p1868 A69-24755

Asymptotic theory for obtaining nearly free molecular flow solutions uniformly valid throughout flow field based on linearized Boltzmann equation 11 p1818 A69-25283

Universal laminar boundary layer equations, analyzing form of Prandtl equations not containing external flow velocity 11 p1876 A69-25490

Viscous flow-induced vibrations of elastically restrained flat plates in narrow channel, considering one dimensional viscous flow theory 11 p1991 A69-25515

Similarity solutions for incompressible, steady hydrodynamic and thermal boundary layers on longitudinally curved walls, allowing for displacement and curvature effects 12 p2060 A69-25761

Book on negative turbulent viscosity theory covering laboratory analysis and applications to earth and solar atmospheres, oceanic circulations, spiral galaxies and solar nebula 12 p2131 A69-26868

Smooth solutions to Navier-Stokes equation obtained by imposing bound on associated pressure pertaining to weak solution 12 p2124 A69-26971

Wall pressure fluctuations due to turbulent boundary layer flow, calculating statistical properties [AIAA PAPER 68-642] 13 p2244 A69-27246

Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion 13 p2371 A69-27318

Two dimensional flow through nonuniform gauze by computerized analysis based on linearized theory 13 p2248 A69-28174

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past circular cylinder 13 p2249 A69-28247

Rate equation for effective turbulent viscosity variations, considering effects of generation, convection, diffusion and decay in quasi-parallel shear flows 15 p2591 A69-30905

Compressible shear flow linear theory applied to transonic flow past thin airfoil, determining pressure distribution, discussing compressibility effects of nonuniform Mach number 16 p2731 A69-31593

Molecular flow network theory applicable to volumes interconnected by small orifices or porous membranes for transient pressure measurements 16 p2813 A69-32325

Monograph on Navier-Stokes equations with integral relations approximate solution and application to flow around flat plate of finite length 17 p2949 A69-32993

Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model 17 p2951 A69-33255

Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction 17 p2951 A69-33256

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions 17 p2951 A69-33257

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory [AIAA PAPER 69-608] 17 p3072 A69-33275

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions [AIAA PAPER 69-710] 17 p2955 A69-33467

Aerodynamic control surface/trim tab coupling coefficients in subsonic two dimensional unsteady flow using matrix method valid for motion involving harmonic oscillations 17 p2895 A69-33597

Kim-Anderson flux flow theory for materials with kappa nearly equal to 1, discussing pinning forces and sites 17 p3016 A69-33754

Flow mechanics applications to medicine, discussing vascular and technical systems and measuring equipment adaptation to human organisms 17 p2915 A69-33771

Leading edge vortices and shock detachment flow over delta wings, discussing drag reduction due to lift 17 p2896 A69-34025

Constant pressure adiabatic turbulent boundary layer characteristics measurements correlated in incompressible reference frame, using modified Mager compressibility transformation 17 p2958 A69-34051

Galerkin-Kantorovich-Dorodnitsyn/GKD/ multimoment integral method improved reversed flow formulation for lower branch similar flows 17 p2958 A69-34054

Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory [AIAA PAPER 69-737] 18 p3083 A69-34402

Micropolar liquid basic flows, considering case with coupling constant relating microstructure to macroscopic flow greater than viscosity coefficient 18 p3121 A69-34786

Transformed Navier-Stokes equations for incompressible fluids flow, deriving forces acting on surface of bounded region 18 p3122 A69-34830

Higher order boundary layer theory development from Prandtl simplification of Navier-Stokes equations to successive approximations for incompressible and compressible flows 18 p3123 A69-34923

FLOW VELOCITY

Turbulent wake and ambient flow interaction analysis based on integral methods in boundary layer theory
19 p3299 A69-36390

Mean parameters calculation between widening of turbulent flow and point of reattachment, including similarity hypothesis concerning velocity profile
19 p3299 A69-36648

Reducibility conditions of flow theory for smooth and piecewise smooth yield surfaces to relations of small elastoplastic deformations
19 p3443 A69-36794

Heuristic process for constructing similarity parameters approximation solution of laminar and turbulent boundary layers equations
19 p3301 A69-36799

Second order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thickness
[AIAA PAPER 68-75] 20 p3458 A69-37182

Reynolds analogy factor approximate calculation for turbulent boundary layer with pressure gradient
20 p3514 A69-37183

Potential flow theory applied to determination of airfoil separated vortex flow and maximum lift and Reynolds number dependence
20 p3459 A69-37421

Laminar jet mixing of incompressible viscous fluid issuing from rectangular nozzle into uniform stream, considering various boundary conditions
[ASME PAPER 69-FLCS-22] 20 p3516 A69-37976

Slip ratios in annular two phase flow for case of laminar flow in film and no entrainment of liquid in vapor
[ASME PAPER 69-FE-43] 20 p3517 A69-37995

Computational method for nonlinear two and three dimensional disturbances in plane parallel flows applied to transverse disturbances in plane Poiseuille flow
21 p3691 A69-38464

Nonlinear incompressible potential flow with unbounded free surfaces, analyzing singularities in finite part of space
21 p3696 A69-39295

Soviet book on hydrodynamic cascade theory covering mathematical methods and numerical solutions for ideal fluid flow problems
21 p3696 A69-39527

Prandtl boundary layer theory problems, considering solution uniqueness and stability, unsteady flow, boundary layer separation, existence conditions, etc
21 p3697 A69-39698

Rumanian book on MHD covering electromagnetic field theory, motion equations, laminar flow, MHD generators, fluid motion past thin airfoils, shock waves, etc
23 p4195 A69-41363

Forced flow against infinite rotating disk, showing von Karman similarity equations solution for axial flow at large distances toward disk
24 p4244 A69-42718

Slot type jet interaction flow tests at free stream Mach 4 and 5, describing equipment, procedure and results
24 p4249 A69-43686

FLOW VELOCITY

Leak flow rates of nitrogen and helium at various pressure gradients measured by gas chromatography and mass spectroscopy
01 p0079 A69-10297

Laser Doppler velocity profile measurement at localized points in flow stream without disturbing flow
01 p0090 A69-10298

Confined vortex in air tangential and axial velocity distribution based on smoke profile pictures
01 p0060 A69-10413

Steady state circular motion of fluid with variable rheological characteristics between coaxial cylindrical surfaces, obtaining velocity distribution
01 p0061 A69-10733

Condensing injector cycles internal efficiency for high velocity liquid metal flows in closed cycle MHD power plants
02 p0194 A69-11582

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate
02 p0297 A69-11994

Two dimensional unsteady Rayleigh flow velocity of conducting and nonconducting viscous fluid past porous plate, analyzing suction and magnetic field effects
02 p0232 A69-12156

Cylindrical afterbodies at free stream Mach 2 with hot argon gas ejection, discussing flow rate influence on base pressure
02 p0190 A69-12533

Discrete vortices in two dimensional subsonic and supersonic wake, determining Strouhal numbers, frequencies and flow velocities with aid of HF cinematography
02 p0191 A69-12587

Similarity law for channel wall influence in wind tunnels valid for all flow velocities
02 p0192 A69-12830

Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma conductivity and flow velocity for electron temperature and density
[ONERA-TP-649] 03 p0473 A69-12877

Fluid flow velocity measurements by optical device having trigonal rectangular glass prisms and microscope objective
03 p0427 A69-12969

Similar solutions of boundary layer equations for compressible model fluid adjacent to wall, discussing velocity overshoot dependence on wall temperature
03 p0413 A69-13013

Flow rate effect on flow pattern of gas escaping through lateral hole of arbitrary depth
04 p0586 A69-14274

Reynolds number similarity argument, establishing relation between mean velocity at pipe or channel center and shear stress at wall
04 p0589 A69-14895

Optical signal frequency method for measuring velocity of fluid flow
04 p0598 A69-14995

Current mode amplifier circuit used with carbon resistors for measuring low flow rates of liquid hydrogen from small containers
04 p0577 A69-15025

Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity
04 p0688 A69-15410

Round air jet projected parallel to wall, analyzing velocity profiles, decay and growth rate
04 p0591 A69-15487

Entry region flow and convective heat transfer prediction in cooled vertical pipe open at both ends, considering wall temperature
05 p0845 A69-15717

Micro and macroturbulent motions velocity in solar photosphere based on Fraunhofer lines analysis
05 p0823 A69-16014

Coanda nozzle entrainment and flow augmentation approximating numerical stability by finite differences
05 p0746 A69-16021

Two dimensional incompressible laminar boundary layer on curved wall for potential velocity inversely proportional to distance along origin
[ASME PAPER 68-WA/FE-20] 05 p0749 A69-16096

Gas flow rate predictions for long and short tubes and annuli and at densities between laminar-continuum and free molecular regimes
[ASME PAPER 68-WA/PID-5] 05 p0750 A69-16166

Rotating hot wire and five hole pressure probes for determining complete velocity vector in subsonic flow
05 p0764 A69-16398

Turbulence hypothesis for velocity of laminar fluid flow at dividing line, considering base pressure and adiabatic mixing zones
06 p0910 A69-17330

Stability of tangential velocity discontinuity between two media with different densities situated in acoustic field
06 p0910 A69-17344

Gaseous film cooling at various hot gas acceleration rates and free stream turbulence levels
06 p1033 A69-17557

Turbulent premixed flames stabilization, determining gas flow velocity, turbulence intensity, flame thickness and burning velocity relation to intensity
06 p1035 A69-17931

Transformation theory for compressible turbulent boundary layer with arbitrary pressure gradient
[AIAA PAPER 69-160] 06 p0912 A69-18073

Velocities of neutral and ionic species in MPD flow determined from Doppler shift of selected spectral lines
[AIAA PAPER 69-109] 06 p0971 A69-18116

Initial stage of motion in Rayleigh problem, calculating time variable velocity of tangential stress on and velocity of gas near plate
07 p1118 A69-18701

High velocity subsonic flow past wedge in wind tunnel with perforated walls, applying solution to optimum parameter determination of suction system
07 p1050 A69-18741

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters
07 p1050 A69-18752

One dimensional flow of conducting inviscid compressible fluid in channel in presence of transverse fields, discussing steady velocity flows
07 p1191 A69-19014

Hydraulic drag coefficient in MHD fluid flows in traveling magnetic field from motion equations for turbulent flows, considering velocity profiles
07 p1192 A69-19017

Unsteady conducting incompressible viscous fluid flow past plate in magnetic field, analyzing surface friction reduction
07 p1192 A69-19018

Magnetic knots /intergranular space strong small scale magnetic fields near sunspot/, longitudinal and transversal fields and radial velocities
07 p1217 A69-19244

Boundary layer effect on flow coefficient of fluid amplifier feed nozzle, noting flow uniformity, incompressibility, velocity and velocity distribution assumptions
07 p1059 A69-19320

Solution velocity and turbulence effects on solvent cleaning of corrosion resistant steel tubing, discussing fluidity forces and cleaning formulation
08 p1318 A69-19807

Semilogarithmic law of velocity and temperature for turbulent flow in circular channel, examining analogy between momentum and energy transfer
08 p1420 A69-19877

Homogeneous turbulent gas flame front location as function of caloric value of mixture and flow velocity
08 p1420 A69-19998

Flow rates characteristic of trapezoidal geometries encountered after schematization of noncylindrical ducts involving irrotational flow, leakage, heat exchanges and electrical conduction phenomena
08 p1303 A69-20270

Stability of unsymmetrical plane flow noting velocity profile effect
08 p1304 A69-20812

Jet engine gas flow, temperature, velocity and pressure measurements by analog and digital systems
08 p1316 A69-20869

Convective MHD channel flow in vertical channel, subjected to temperature and pressure gradients, discussing wall conductances effects on flow rate and heat transfer
09 p1545 A69-21441

Spatial distribution of velocity, spatial correlation and ergodicity of turbulent flow, using spectrum of intensity fluctuations of scattered laser light
09 p1493 A69-21491

MHD oscillatory flow along infinite plane porous wall with variable suction velocity, obtaining expressions for velocity and magnetic fields in boundary layer
09 p1547 A69-21607

Velocity and temperature fields in Newtonian fluid in motion past stationary obstacle in gravitational field, noting similarity parameters reduction
09 p1429 A69-21686

Turbulent circular wall air jet trajectory and spreading in perpendicular crossflow of constant and varying velocities
[ASME PAPER 69-GT-33] 09 p1483 A69-22491

Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine
[ASME PAPER 69-GT-48] 09 p1432 A69-22495

Bloodless heart flow measurement methods, noting simultaneous external recording of carotid and femoral pulses and impedance plethysmography
09 p1448 A69-22730

Impulse induction MHD generator with cylindrical channel, finding differential equations for velocity and current
10 p1638 A69-23484

Vortex incompressible flow in thin cylindrical chamber, analyzing outer and inner region and interface tangential velocity, shear and static pressures
10 p1679 A69-23557

Excess velocity and temperature decay laws in axisymmetric jet in transverse flow obtained via jet momentum and heat conservation equations
10 p1679 A69-23568

Finite difference method for calculating lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature
10 p1722 A69-23967

Velocity profiles of turbulent plasma flow in circular tube during application of longitudinal homogeneous magnetic field
11 p1922 A69-24234

Turbulent flame propagation described by turbulence length and integral scale and fuel properties including laminar flame velocity and equivalence ratio
11 p1999 A69-24482

Turbulent flow velocity field evolution in presence of random forces using equation of motion
11 p1867 A69-24628

Holographic recording of three dimensional flow field velocities, applying theory of particle size assessment via Fraunhofer holography
11 p1884 A69-24691

Viscous flow stability in rotating pipe, giving velocity components in cylindrical polar coordinates
11 p1871 A69-25125

Pressure and flow rate variations at any point of manifold with control units calculated using transfer functions
11 p1942 A69-25335

Neutral gas flow transport velocity and Mach number effects on critical electric field strength and direction in formation of self sustained discharge
11 p1933 A69-25545

Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution
11 p1933 A69-25556

Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate
12 p2148 A69-26806

Incompressible conducting fluid turbulent flow velocity distribution in transverse magnetic field at small magnetic Reynolds numbers and constant MHD interaction frequency
13 p2246 A69-27498

Variable fluid and field velocity HF induction generator, determining interaction between fluid dynamic forces and magnetic field and kinetic energy
13 p2207 A69-27502

Velocity potential function for flow over disk shaped wing near screen, noting aerodynamic lift and drag
13 p2199 A69-27524

Vibrating camera for photographic measurement of flow velocities and trajectories of bodies marked by light spots
13 p2261 A69-27913

Monograph on return currents produced by confined jet of incompressible fluid with low initial ambient fluid velocity
13 p2250 A69-28335

Plane shock layer structure in pseudoMaxwellian monatomic gas, integrating Krook equation for gas molecule velocity
14 p2432 A69-29613

Turbulent Hartmann flow between planes in perpendicular magnetic field including flow velocity profile measurements
14 p2500 A69-29908

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient
15 p2589 A69-30002

Longitudinal internal cracks in deformed Al alloys initiated by elastic stress concentration in areas of highest flow rate gradient
15 p2638 A69-30277

Fluid flow velocity measurements by Doppler shift of laser light scattered from moving fluid, determining beat frequencies
15 p2616 A69-31291

Mean velocity distribution prediction in turbulent shear flows of variable density by coordinate stretching method
[AIAA PAPER 68-41] 16 p2770 A69-31888

Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data
16 p2770 A69-31908

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components
16 p2732 A69-32126

Velocity field in turbulent flow based on momentum transfer, determining velocity distribution for flow near solid surface
16 p2772 A69-32128

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P
16 p2747 A69-32312

Hot-wire anemometers calibration technique providing accurate and direct velocity measurements in slow moving liquids
17 p2971 A69-32901

Transverse turbulent pipe flow, obtaining limiting behavior of time averaged velocity gradient at wall
17 p2949 A69-33013

Liquid draining motion from transversely moving cylindrical tank in time varying gravity field with outlet pipe at bottom, discussing flow rate and free surface
[AIAA PAPER 69-679] 17 p2953 A69-33440

Turbulent velocity distribution and wall friction calculated from eddy viscosity distribution for concentric annulus
17 p2956 A69-33575

Flow rate in ascending aorta, stroke volume and cardiac output determination by ballistocardiography, calculations based on Hagen-Poiseuille theory
17 p2915 A69-33772

Microturbulence velocity estimation method for solar type stars using low dispersion spectra of narrow band photometry
17 p3044 A69-34178

Flow rate effect of oxygen-argon mixture on Zr oxidation studied to determine exclusion as factor in Zr weight increase
18 p3154 A69-34272

Fluidic sensor for measuring gas and liquid velocities, describing design and principles of operation
18 p3133 A69-34308

Static and impact pressure distributions for Mach number and velocity profiles of supersonic to subsonic flow transition in tube at low Reynolds numbers
[ASME PAPER 69-APM-23] 18 p3120 A69-34397

Conservation theorems for energy and mean circulation in inviscid rotating fluid, noting inertial wave spectrum continuity
18 p3121 A69-34550

Fluid velocities at earth core surface inferred from magnetic data, considering velocity constraints and diffusion contributions to secular change
18 p3129 A69-34951

Ducted fan engine turbine air flow rate and frontal gas temperature determined from air temperature/pressure measurements behind compressor and engine fuel flow
18 p3086 A69-34986

Static temperature measurement in air-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer
19 p3294 A69-35752

Flow rate of ideal fluid ejected from swirl injector taking into account radial component of flow velocity at nozzle exit
19 p3297 A69-35820

Thermoanemometer filament frequency response measured by generator of velocity pulsations compared with conventional methods
19 p3308 A69-35856

High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962

Flow velocity, flow Mach number and weak disturbance velocity behind shock wave measured for nitrogen, oxygen and carbon dioxide
19 p3298 A69-36362

Velocities and pressure in twisted jet in unbounded space containing same fluid as jet
19 p3298 A69-36388

Tangential and radial velocities in vortex boundary layer flow, relating diminishing amplitudes to increasing height using iterative method
19 p3363 A69-36499

Anisotropy of derivatives of transverse velocity fluctuations in grid turbulence subjected to plane deformation, determining dimensionless coefficient
19 p3299 A69-36647

Mean parameters calculation between widening of turbulent flow and point of reattachment, including similarity hypothesis concerning velocity profile
19 p3299 A69-36648

Sedov formula for complex velocity of arbitrary circulation in two dimensional theory of small curvature thin wings
19 p3242 A69-36795

Boundary layer velocity distribution in turbulent swirling pipe flow produced by twisted tape inserts
[ASME PAPER 69-FE-14] 20 p3516 A69-37990

Simultaneous lateral skewing regions existence in low speed three dimensional turbulent incompressible boundary layer flow
[ASME PAPER 69-FE-24] 20 p3517 A69-37998

Axial velocity and static pressure for incompressible fluid flow through straight smooth porous tube
[ASME PAPER 69-FE-44] 20 p3517 A69-38000

Flow field induced by spiral vortex sheet, noting existence of radial velocity component
21 p3692 A69-38610

Continuous cavitation model for incompressible fluid one dimensional unsteady motion
21 p3693 A69-38752

Shaft speed limitations on close clearance seals, using test data on changes in fluid viscosity causing contact and damage
[ASLE PAPER 68-LC-13] 21 p3731 A69-38763

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field
21 p3649 A69-39027

Finite difference method for calculating Lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature
21 p3759 A69-39653

Channel flows energy stability, discussing Couette and plane Poiseuille flows, velocity profiles, vorticity maxima, etc
21 p3697 A69-39675

Equation of motion for determining nonlinear vibration of rod pendulum in viscous flow of varying velocity
21 p3773 A69-39679

Fluid velocity in starting flow in circular tube using Laplace transform
22 p3931 A69-40688

Skin friction and mean velocity profiles measured for fully developed 1000-10,000 Reynolds number flows in pipes and channels
22 p3932 A69-40897

Supercavitating flow past thin hydrofoils, determining flow velocity or acceleration potential near free surface
22 p3933 A69-41023

Distributed suction effect on boundary layer structure of water flow from turbulence measurements, determining velocity and pulsation intensity distributions
22 p3933 A69-41029

Stroboscope method for measuring pulsating flow transient velocity based on hot-wire chromometric recording of small ion clouds emitted during pulsation
22 p3951 A69-41257

Constant temperature thermoanemometer design and subsystem operation applied to measurements of turbulent flow velocity and pulse characteristics
24 p3311 A69-42558

Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically
24 p4244 A69-42716

Air bubbles rise velocity and path in water based on time measurement of bubble traversing two light beams, describing electronic recording system
24 p4299 A69-42918

Turbine rotors temperature reducible by increasing air cooling system flow rate
24 p4364 A69-43081

Total load factor static vertical component and lubricant flow rate square related to pocketed hydrostatic journal bearing revolutions
24 p4321 A69-43091

Hot-wire anemometer calibration technique for measuring velocity of very slowly moving liquids
[ASME PAPER 69-HT-A] 24 p4316 A69-43527

Heat transfer capability and startup behavior of sodium heat pipes, studying heat transfer limit due to vapor velocity at evaporator end
[ASME PAPER 69-HT-21] 24 p4412 A69-43547

Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes
24 p4359 A69-43693

FLOW VISUALIZATION

Schlieren method for studying rotating sphere heat transfer during natural convection
01 p0174 A69-10095

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves
02 p0189 A69-12182

Photographic flow patterns of separated flows with vortex formation obtained in wind tunnel for different aerodynamic configurations of revolution
02 p0191 A69-12586

Boundary layer effects on shadow deformation, emphasizing two dimensional flow with image projected by parallel light beams perpendicular to flow plane
03 p0364 A69-13787

Pressure distribution across short vortex chamber to exit radius with known inlet geometry based on incompressible flow model and visualization photographs [ASME PAPER 68-WA/FE-17]

05 p0748 A69-16093

Visual investigation of flow field at swept wing, measuring pressure distribution at stall fence and vortices formation

06 p0858 A69-17341

High speed streak camera synchronization with shock tube process involving nonreacting gases or mixtures in pressure chamber

06 p0926 A69-17499

Xenon flash lamps with electrolytic capacitors designed for photographic studies of laminar flows of viscous fluids

07 p1116 A69-18259

Kine films of gas flows within highly luminous transient arc taken by laser schlieren technique

08 p1316 A69-20615

Flow visualization tracer for quantitative measurements for laminar and turbulent flow, discussing mean velocity and shear stress

09 p1495 A69-21911

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35]

09 p1432 A69-22489

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body

12 p2088 A69-26177

Quantitative analysis of differential interferometer photographs using Wollaston prism with beam separation, applying method to sphere in low density hypersonic flow

12 p2089 A69-26187

Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations

12 p2011 A69-26191

Aerodynamic field around symmetric profile two dimensional plates, visualizing velocity fields with Al particles

12 p2011 A69-26288

Imaging for flowfield of nonuniform parallel streams with thin airfoil represented by vorticity distribution, noting change of lift and moment

12 p2012 A69-26775

Shadow, schlieren and interferometric methods for study of transonic, supersonic and hypersonic fields of aerodynamics, using refractivity variations in heterogeneous medium

12 p2060 A69-26934

Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines [AIAA PAPER 69-346]

13 p2200 A69-28281

Laminar to turbulence transition in submerged and bounded jets, using schlieren visualization for compressible flow and birefringent visualization for incompressible flow

14 p2428 A69-28876

Direct simulation Monte Carlo method for hypersonic rarefied gas flow past solids, modeling on digital computer

14 p2390 A69-29580

Hydraulic tank for visualizing flows around stationary models, noting absence of wall effects [ONERA-TP-708]

17 p2956 A69-33588

Visual observation of pipe wall regions in turbulent flow by suspending colloidal size particles and photographing with high speed motion picture camera

17 p2956 A69-33598

Turbulence origin and structure in stably stratified media for finite disturbance instability in sloping flows experimentally observed with visualization techniques

17 p2999 A69-33735

Flow structure in wake of blunt bodies placed perpendicular in parallel airstream determined from hot-wire anemometry

18 p3084 A69-34409

Streak photographs by differential interferometer to study head wave standoff in shock tubes as function of time

18 p3085 A69-34473

Secondary flow consisting of longitudinal vortices superposed on convection flow on inclined plate, obtaining flow pattern through flow visualization

18 p3124 A69-35383

Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure

19 p3291 A69-35722

Quantitative photographs of low density flowfields during shock tunnel tests using electron beam excitation with image intensifier tube detector

19 p3292 A69-35723

Karman vortex street formation indicated by smoke visualization method study of laminar wake behind single cylinder

21 p3644 A69-38687

One dimensional spectra of turbulent wakes behind circular cylinders, discussing isotropy, anisotropy and Reynolds number

21 p3693 A69-38705

Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber

23 p4057 A69-41372

Helicopter rotors trailing vortices by flow visualization, comparing Euler and Runge-Kutta iterative solutions

23 p4150 A69-41376

Axisymmetric separated flow in Chapman model shown nonexistent by flow visualization technique

23 p4060 A69-41905

Low Reynolds number unsteady wake flows, using hydrogen bubble flow visualization in high concentration glycerine mixtures

24 p4298 A69-43691

FLOWMETERS

NT HOT-WIRE FLOWMETERS

NT RHEOMETERS

Primary flow measuring element based on Chebyshev principle, noting differential pressure output loss and resistance to accumulation of contaminants

04 p0600 A69-15030

Nondirectional probe for mean velocity measurement in turbulent flow, determining reduced velocity profiles in interior of free flow

04 p0600 A69-15056

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency

[ASME PAPER 68-WA/FM-2]

05 p0763 A69-16135

Venturi meter design, discussing effects of turbulent velocity fluctuations, hole size and internal geometry on differential pressure measurement

11 p1880 A69-24468

Induction flowmeters design, discussing materials and structural details of sensor and transducer elements

11 p1887 A69-25208

Laser Doppler flowmeter for heterodyne detection of laser light scattered from moving fluid applied to fluid velocity and velocity distribution measurements

12 p2093 A69-26546

Dynamic gas flowmeter for ultrahigh vacuum based on transmission characteristics of diffuser screens and associated pressure drops

13 p2263 A69-28087

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency

[ASME PAPER 68-WA/FM-2]

14 p2447 A69-29447

Inlet shape and Reynolds number effects on entrance flow development, using laser flowmeter based on Doppler effect to obtain laminar velocity profiles

15 p2589 A69-30001

Nuclear magnetic resonance flowmeter operating from outside pipe walls, discussing operating principles and applications

15 p2616 A69-31290

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec

15 p2616 A69-31292

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps

16 p2772 A69-32145

Decompression gas emboli detection while moving in flow streams of arteries and veins using ultrasonic Doppler shift principle and square-wave electromagnetic flowmeter

21 p3663 A69-38914

Ultrasonic Doppler flowmeter for detection of circulating gas emboli of animal blood vessels during decompression

21 p3663 A69-38915

Electromagnetic catheter flowmeter with flexible sensor suitable for branch and artery application to minimize surgical intervention

22 p3889 A69-40058

Venturi low resistance flowmeter for ventilatory measurements during rest and exercise on humans, noting suitability for analog integrator computation of tidal volumes

22 p3894 A69-40979

Flow profile effect on signal of Doppler ultrasonic flowmeter, noting limited application to quantitative blood circulation measurements

23 p4166 A69-42085

FLOX

Safety planning for use of reactive cryogenics in large volume, noting FLOX and liquid fluorine

04 p0645 A69-14468

Space storable regenerative cooling with FLOX/methane under conditions for small pump fed engine, describing injector and chamber design [AIAA PAPER 69-509]

16 p2844 A69-32718

Flox/methane pump fed engine, discussing RL-10-1-A engine tests and optimized 5000 lb thrust engine design [AIAA PAPER 69-510]

16 p2741 A69-32720

Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution [AIAA PAPER 69-507]

16 p2835 A69-32772

High energy oxygen-free hybrid propulsion system using polyethylene propellant and F oxygen mixture as oxidizer [DGLR-69-017]

23 p4202 A69-41930

FLUCTUATION

U VARIATIONS

FLUCTUATION THEORY

Variational methods for nonequilibrium thermodynamic processes noting fluctuation theory introduction

04 p0551 A69-15314

Quasi-periodic variations of solar radio emission intensity related to solar activity variations

07 p1211 A69-18516

Period fluctuations in ionospheric plasma resonance amplitude, proposing hypothesis in terms of quasi-electrostatic surface waves guided by antenna wire

07 p1125 A69-18847

Intensity fluctuations of single frequency gas laser at 3.39 microns, discussing fluctuation minimization methods

11 p1900 A69-25750

Cosmic radiation origin in terms of sudden injection of particles in time, momentum and space, considering statistical fluctuations role in observed spectrum

12 p2148 A69-26206

Linear extrapolation of stationary stochastic process predicting fluctuations of minimum and maximum periods in solar cycle

12 p2149 A69-26221

Velocity fluctuation amplitude in potential cone of plane jet compared to properties of irrotational fluctuations induced by flow boundaries

13 p2247 A69-27736

Kinetic theory of fluctuations in turbulent plasmas based on construction of many particle distribution functions

14 p2502 A69-29989

Fluctuation spectra of monatomic gases, using two time probability distributions for distribution function autocorrelations

16 p2817 A69-31669

Source requirements for cosmic radiation origin model, noting fluctuations in momentum changing process

18 p3188 A69-35005

Microwave background angular fluctuations investigated for relationship between whirl motion velocity and temperature dispersion, noting role of scattering by moving plasma

18 p3188 A69-35208

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field

18 p3124 A69-35384

Scalar waves propagation in bounded randomly fluctuating media, emphasizing interface effects on coherent wave motion

21 p3675 A69-39283

Einstein development of theory of fluctuations applied to homogeneous nucleation, calculating activation energy, liquid drop-vapor system equilibrium state peculiarity, etc

22 p3938 A69-40448

Transverse spectra and structural functions of fluctuations for plane waves of different frequencies propagating in isotropic turbulent medium

23 p4117 A69-41728

Fluctuations in 3K radiation, considering scattering effect on gravitational fields of galactic clusters and large coherence or wavelength scattering by gravitational radiation

23 p4222 A69-42401

**FLUID AMPLIFIERS
NT JET AMPLIFIERS**

Liquid fluidic amplifiers combined into controller for modulating coolant temperature to control flight suit temperature automatically

02 p0202 A69-11923

Switching action mechanism in wall attachment fluid amplifier, outlining theory based on turbulent jet entrainment

02 p0195 A69-12073

Fluid amplifier signal noise sources, using large scale model for investigating jet-knife edge interaction

02 p0195 A69-12078

Vortex controlled fluid amplifiers, discussing static and dynamic performance characteristics

02 p0195 A69-12081

Curved wall fluid amplifier performance under high or low supply pressure

02 p0196 A69-12083

Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems

02 p0249 A69-12088

Static and dynamic performance of pancake vortex flow field and application to signal amplification

05 p0704 A69-16001

Fluid amplifiers, discussing digital and proportional jet-interaction devices and circuits

05 p0704 A69-16004

Vortex value and angular rate sensor based on amplification of tangential velocity component of swirl achieved by control jet or rotation

05 p0746 A69-16006

Beam deflection fluid amplifiers dynamic properties determined by random signal testing

05 p0705 A69-16010

Turbulent free jet at miniature nozzle exit, analyzing wall attachment fluid amplifier and flow characteristics

05 p0746 A69-16012

Performance characteristics of variable geometry bistable fluid amplifiers
[ASME PAPER 68-WA/FE-18]

05 p0748 A69-16094

Temperature, acoustic, vibration and shock environment effects on pure fluid bistable and proportional amplifiers
[ASME PAPER 68-WA/FE-31]

05 p0705 A69-16104

Fluid amplifier linear transfer functions at signal levels on order of internal noise identified by random signal testing method
[ASME PAPER 68-WA/AUT-2]

05 p0706 A69-16184

Boundary layer effect on flow coefficient of fluid amplifier feed nozzle, noting flow uniformity, incompressibility, velocity and velocity distribution assumptions

07 p0159 A69-19320

Fluidic power control switch for supersonic fluid amplifier, presenting performance data and possible industrial applications

08 p1256 A69-20304

Pure fluid amplifying logic and energy converting elements, discussing parameters, characteristics and working principles
[AGARDOGRAPH-118]

08 p1257 A69-20951

Vortex valves and amplifiers small signal analysis using mathematical model to describe quantitative effects of vortex parameter changes
[AGARDOGRAPH-118]

08 p1257 A69-20953

Peripheral fluidic devices for sequencing and monitoring machinery in hazardous areas, describing circuits
[AGARDOGRAPH-118]

08 p1257 A69-20954

Fluidic devices, including amplifiers, bistable elements, modulators, gates, etc

09 p1443 A69-22535

Discontinuous vortex power amplifier and diode design, noting supply regulator effects and load matching

09 p1443 A69-22737

Vortex amplifiers small signal analysis based on mathematical model and network theory

09 p1443 A69-22739

Vortex amplifiers design and performance, noting nonvented and vented amplifiers and fluid valving applications

09 p1443 A69-22741

Fluidic jet beam deflection amplifier, discussing basic principles, operating characteristics and design criteria

10 p1638 A69-23554

High gain proportional and bistable fluidic amplifier design, noting high impedance role in pressure sensing and computer circuits in aircraft engine control

10 p1638 A69-23555

Vortex amplifier as active element in analog circuits

10 p1639 A69-23556

Large signal vortex amplifier analysis using load lines to evaluate series orifice and vortex flow control valve characteristics

10 p1639 A69-23558

Hybrid fluidic pressure regulator combining vortex amplifier and confined-jet amplifier with performance upgrading moving metering element, noting greater efficiency and reliability

10 p1639 A69-23560

Sound amplification role in increasing spread of bounded two dimensional smoke jet studied for application to fluid amplifiers
[ASME PAPER 69-VIBR-3]

10 p1640 A69-24161

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics of fluid jet amplifiers

12 p2016 A69-25879

Attachment and separation of free jet from wall, discussing model equations for wall attachment fluid amplifier

14 p2428 A69-28877

Counter for decimal counting and numeric display applications using integrated fluid logic elements

15 p2616 A69-31295

Linear fluid amplifier with beam-deflection proportional active element, discussing optimum maximally flat frequency response

15 p2553 A69-31299

Fluidic operational amplifier design and applications

15 p2554 A69-31300

Fluidic digital position sensor consisting of fluidic monostable amplifier, analyzing operation by characteristics method

15 p2554 A69-31301

Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range

15 p2554 A69-31303

Fluid amplifier with sudden widening applied to various computer tasks, utilizing for detection and measurement of viscosity, temperature and sonic or rotational velocity

17 p2903 A69-33010

Switching time of transient two dimensional fluidic bistable wall attachment amplifiers based on mathematical model and separation bubble control

17 p2904 A69-34068

Servovalves with fluidic and electrical inputs compared for gas servoamplifiers performance, considering use as sensors in closed-loop hydraulic circuit

19 p3255 A69-36711

Fluid amplifiers for gas turbojet engines control, discussing hydraulic control and relationship between turbine rpm, fuel consumption and operating temperature

20 p3585 A69-36944

Classification of switching process in bistable fluid amplifiers with illustration of fluid oscillator, discussing capacitor and bleeds
[ASME PAPER 69-FLCS-28]

20 p3465 A69-37977

Model predicting steady state input-output characteristics of vortex amplifiers operating in incompressible flow regime, correlating model with experimental data
[ASME PAPER 69-FLCS-20]

20 p3465 A69-37980

Fluidic feedback oscillator performance from fluid density effects analysis including supply jet, feedback line dynamics and load and control port impedances
[ASME PAPER 69-FLCS-39]

20 p3465 A69-37984

LF switching in wall attachment type digital fluid amplifiers, studying visual and quantitative values for switch pressure and flow as function of geometric variables
[ASME PAPER 69-FLCS-31]

21 p3649 A69-38604

Fluidic amplifiers development and logic applications, describing various elements and circuits

22 p3870 A69-41239

Proportional fluid amplifiers analysis in cascade and with feedback by extended lumped parameter method,

discussing dynamic characteristics of analog amplifiers with air

24 p4255 A69-43268

Tristable fluid amplifiers, analyzing J functions of staticized variable, ternary logical characteristics, input equations, flow stability and switching measurements

24 p4255 A69-43298

Design of vortex fluid amplifiers operating in incompressible flow regime, based on fluid properties and geometry effects on amplifier behavior

24 p4256 A69-43299

FLUID BOUNDARIES

NT GAS-SOLID INTERFACES

NT JET BOUNDARIES

NT LIQUID-LIQUID INTERFACES

NT LIQUID-SOLID INTERFACES

NT LIQUID-VAPOR INTERFACES

Transonic flow around profile in blocked plane channel and in free jet, noting channel wall and jet edge effects on flow along profile

03 p0361 A69-13018

Laminar flow stability along flexible boundary, using broken linear velocity profile instead of boundary layer profile

06 p0909 A69-17207

Kelvin-Helmholtz instability for interface between two uniform superposed fluids with constant densities and velocities in horizontal motion in oblique magnetic field

07 p1182 A69-19274

Continuum flow boundary in freely expanding jet estimated from molecular mean free path and modulus of random motion mean velocity

10 p1679 A69-23425

Free periods of oscillation of incompressible rotating fluid bounded by rigid concentric spheres, using Longuet-Higgins solution of Laplace tidal equation

11 p1876 A69-25558

Linearized steady state equations of motion solved for boundary conditions of fluid lying between horizontal planes with temperature varying horizontally

12 p2066 A69-26134

Surface equilibrium configurations and bifurcation points for rotating homogeneous right fluid cylinder confined by surface tension forces

14 p2428 A69-28816

Small amplitude motions of plane interface between fluids stressed by initially perpendicular electric field, modeling fluids as ohmic conductors

16 p2811 A69-31667

Shear layer effect on plane sound waves, discussing reflection and refraction at velocity discontinuity between two regions of fluid

17 p3005 A69-32954

Thermal convection in horizontal fluid layer heated from below, with zero shear boundaries above and below, noting critical Rayleigh number measured value

20 p3518 A69-38234

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions

22 p3929 A69-40110

FLUID DYNAMICS

NT AERODYNAMICS

NT AEROTHERMODYNAMICS

NT ELASTOHYDRODYNAMICS

NT ELECTROHYDRODYNAMICS

NT GAS DYNAMICS

NT HYDRODYNAMICS

NT HYPERSONICS

NT MAGNETOHYDRODYNAMICS

NT RAREFIED GAS DYNAMICS

NT ROTOR AERODYNAMICS

Collection of papers on computational fluid dynamics

01 p0061 A69-10916

Turbulent flow between parallel plates, discussing turbulence generation by energy addition

01 p0061 A69-10993

Two dimensional compressible inviscid laminar gas flows unsteady processes studied by extending method of characteristics

01 p0008 A69-11360

Heat conduction in viscous fluid flows with large concentration of suspended solid particles

02 p0351 A69-12052

Noninstantaneous, nonlocal nonlinear responses of momentum and energy flows to thermodynamic forces in single component simple fluid with memory

03 p0413 A69-12921

Finite difference solution of time dependent Navier-Stokes equation for incompressible fluids, using velocities and pressure as variables

03 p0415 A69-13369

Bubble motion inside liquid in spherical cavity, allowing for bubble surface deformation
03 p0418 A69-13813

Axisymmetric vortex free motion of ideal fluid in conical container with spherical bottom under axial acceleration
06 p0910 A69-17335

Superlayer structure in turbulent boundary layer without pressure gradient, using constant temperature linearized hot wire anemometers
07 p1118 A69-18299

Flow in impellers of mixed and radial flow compressors for jet engines, turbochargers and automotive gas turbines, discussing velocity, load distribution, etc [SAE PAPER 690033]
07 p1049 A69-18312

NonNewtonian effects in axisymmetric rotational flows of elastico-viscous liquids
07 p1180 A69-18815

Combined effect of short wavelengths associated Kelvin-Helmholtz instability and long wavelengths associated gravitational instability on self gravitating fluid layer, discussing kinetic energy
07 p1182 A69-19276

Schlieren optics study of omega wave in water filled cuvette, noting propagation by wall reflected water wave
08 p1350 A69-19889

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
08 p1303 A69-20323

Frequency response from linearized dynamic equations for viscous incompressible fluid flow in viscoelastic tubes, discussing transfer gain
08 p1304 A69-20704

Fluid equations for collisionless plasma including finite ion Larmor radius and finite beta effects
08 p1368 A69-20802

Fluid flow induced by horizontally moving bodies in stratified and rotating fluids determined by matched asymptotic expansion theory
08 p1253 A69-20997

Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying irrotational motions in compressible and incompressible ideal fluids
09 p1613 A69-21720

Draining liquid surface dip formation in tanks of arbitrary shapes and drain hole positions
09 p1483 A69-21999

Fluid dynamical aspect of Schrodinger quantum mechanics and thermal equilibrium
09 p1541 A69-22394

Circle theorem extensions and applications to mechanics of continua, noting supersonic and subsonic compressible fluid flow
10 p1723 A69-22877

Incompressible fluid flow engine spiral casing, considering flow as potential flow
10 p1632 A69-22914

Dynamics of conducting fluid stream coupled to elastic medium by transverse electric or parallel magnetic field, considering stability of system
11 p1923 A69-24289

Numerical method for coupled moments of inertia and integral equations of boundary value problems for fluid in moving cavities
11 p1868 A69-24774

Motion of body with cavity containing liquid based on Kharlamov solution, noting gyrostatic moment and liquid sloshing effect
11 p1868 A69-24775

Distribution of steady state solutions for equations of helical motion of body in infinite fluid, noting coaxial control surfaces
11 p1868 A69-24782

Friction coefficients for turbulent flow through smooth pipes, considering average and friction velocity relations, fluid velocity measurements and flow Reynolds number
11 p1874 A69-25429

Flow field structure involving supersonic secondary jet interactions and separated regions in thrust vector control system
11 p1944 A69-25594

Iterative solutions of nonlinear integrodifferential dynamical equation for two point velocity correlation tensor in incompressible fluid turbulence studies
12 p2062 A69-26602

Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion
13 p2371 A69-27318

Monograph on return currents produced by confined jet of incompressible fluid with low initial ambient fluid velocity
13 p2250 A69-28335

Diffusion characteristics of turbulent flow produced by square mesh grid in low speed wind tunnel
13 p2250 A69-28496

Eddy diffusivities ratio for heat and momentum by mixing length theory, using Mach-Zehnder interferometer for temperature profiles
13 p2380 A69-28497

Dissipative fluid sphere motion due to impulsive point source calculated by finite difference scheme, assuming Voigt and Maxwell type internal friction mechanisms limitations
14 p2485 A69-29026

Parametric resonance motion in viscous fluid column in communicating vessels during vertical oscillations, calculating critical accelerations over viscosity range
14 p2432 A69-29628

Cosmic shock waves simulation through correlations between shock equations in classical and relativistic fluid dynamics, using shock tube tests
14 p2433 A69-29981

Noncontacting minimum leakage dynamic seal requiring liquid-vapor interface with leakage tolerance [ASLE FICFS PREPRINT 40]
15 p2620 A69-30485

Fluid filled spherical shell axisymmetric nontorsional motion analysis via differential equations obtained by Hamilton principle
17 p3051 A69-32956

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
17 p2952 A69-33313

Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow [AIAA PAPER 69-727]
17 p3004 A69-33483

Computer simulation of numerical fluid dynamic problems for compressible and incompressible flows, noting Marker and Cell method
18 p3106 A69-34665

Fluid-shell interactions, using piston theory and cylindrical-wave approximations
18 p3223 A69-35174

Finite elements general theory applied to wave propagation, gas kinetics, nonlinear partial differential equations, continuum mechanics and fluid dynamics
20 p3567 A69-36948

Turbomachine blade thickness effect on meridional flow disturbances analyzed through blade geometry using differential equations
20 p3457 A69-37084

Rocket engines propellant feed systems dynamics analyzed by model using linear methods with distributed-parameter pipe representation [ASME PAPER 69-FE-6]
20 p3586 A69-37987

Differential equations for variable mass solid body motion about fixed point having cavities filled with ideal fluid
21 p3771 A69-39106

Homogeneous dynamo in cylindrically symmetric volume with symmetrically moving fluid and large magnetic Reynolds number, demonstrating first and second approximations using Braginskii method
22 p3989 A69-40192

Eulerian equations for precession and nutation of self gravitating fluid globes of arbitrary structures in inertial coordinates, discussing coplanar case, tidal breathing, etc
22 p4030 A69-40904

Friction, heat transfer and mass transfer theory of flow represented by two dimensional parabolic boundary layer equations
22 p3933 A69-40940

Anisotropic porous media model for fluid motion in rectangular fuel cell cavities, analyzing pressure, velocity, stream functions and purge time
23 p4075 A69-42300

Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields
24 p4344 A69-43066

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc [ASME PAPER 69-APMW-26]
24 p4245 A69-43093

Dynamic models for viscous fluid transmission lines using distributed parameter for accuracy and rational approximate form to avoid computational difficulty
24 p4301 A69-43289

FLUID FILTERS

NT AIR FILTERS

Filtration and flow characteristics of wire cloths used in hydraulic systems described by expressions from measured properties [ASME PAPER 68-WA/FE-39]
05 p0750 A69-16111

Aircraft hydraulic equipment ultrafine filters effect on component life and system reliability
15 p2552 A69-30069

Liquid filter cells design with emphasis on filters usable for inorganic and organic liquids
21 p3770 A69-38679

Protective layer material for high sludge capacity filters for fine purification of liquids used in aircraft hydraulic system
22 p3869 A69-40637

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations

01 p0173 A69-10094

Immersion depth influence on hydrofoil for flow of arbitrary depth with bottom consisting of free surface or solid wall

01 p0007 A69-11132

Hall effect in unperturbed flow of fluids near thin profiles at infinity

01 p0132 A69-11133

Collection of Soviet articles on computer methods and programming covering fluid flow by numerical methods

03 p0362 A69-13649

Kinematic and dynamic relations determined for vortex flow of ideal incompressible fluid past circular cylinder, noting use for calibrating cylindrical adapters

04 p0541 A69-14484

Optical signal frequency method for measuring velocity of fluid flow

04 p0598 A69-14995

Ideal plane incompressible fluid flow past airfoil noting hydrodynamic effects, assuming presence of constant eddy

04 p0589 A69-14996

Induced flow determination in pulsejet ejector, solving momentum and continuity equations by method of characteristics and mathematical model
 [ASME PAPER 68-WA/FE-33]

05 p0812 A69-16106

Stagnation pressure losses of adiabatic flow of compressible fluids through abrupt area expansion and contraction in subsonic range, discussing base pressure
 [ASME PAPER 68-WA/FE-46]

05 p0750 A69-16113

Flow theories of fluids with elastic deformation of substructure, treating suspensions of irregularly shaped deformable particles

05 p0752 A69-16738

Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder

06 p0910 A69-17332

Laminar natural convection in enclosed rectangular cavity, discussing temperature gradient effects

06 p1033 A69-17556

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program
 [AIAA PAPER 69-30]

06 p1038 A69-18174

AC fluidics for pressure pulse frequency control and monitoring in flow, discussing design and application to steam turbine speed control

07 p1058 A69-18938

Nondimensional Jeffreys number as ratio of Reynolds to Froude number for gravitational motion of viscous masses, with application to lunar maria and plastic ice

07 p1218 A69-19262

Fluid motion and MHD disturbances in viscous incompressible fluid of finite electrical conductivity, studying axis of oscillating dipole perpendicular to exciting field

07 p1195 A69-19451

Large amplitude waves in inviscid flows of stably stratified fluids over barriers with constant density upstream constructed from vortex pairs and doublets

08 p1346 A69-20313

Fluid flow induced by horizontally moving bodies in stratified and rotating fluids determined by matched asymptotic expansion theory

08 p1253 A69-20997

Turbulent diffusion from point source in boundary layer, discussing horizontal and vertical effects

09 p1535 A69-21513

Equilibrium theory of parametric pump using cyclic flow of binary mixture through column with heated and cooled bed of solid absorbent

09 p1481 A69-21910

Viscous fluids rotational flow in cylindrically symmetrical vessels, circumventing Navier-Stokes equations of motion by Wedemeyer approximation

10 p1677 A69-22896

Test stand final control element for fluid flow application, noting analog control valve with digital to analog conversion and digital actuator

10 p1671 A69-23259

Network rupture hypothesis and molecular structure considerations used in obtaining constitutive equations for flow of polymer melts and solutions
 [AICHE PAPER 42C]

10 p1800 A69-23369

Finite difference method for calculating lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature

10 p1722 A69-23967

Longitudinal vibrations induced by internal flow in metal bellows resembling vortex shedding excitations of elastically restrained cylinders, discussing spring mass mechanical model
 [ASME PAPER 69-VIBR-5]

10 p1805 A69-24163

Similarity solution for flow of fluid-particle suspension over disk rotating at constant velocity, solving differential equations for flow velocity distributions

11 p1867 A69-24280

Diffusive flow with isopycnic lateral boundaries in porous medium and density distribution of diffusive motion, noting exact solution equivalence to previous solution

11 p1869 A69-24887

Model evolution of flow in fluid layer suddenly heated from below at Rayleigh number convection sufficient for turbulence

11 p1874 A69-25351

Flow control valve for hydraulic motor speed regulation operated by remote pressure signal

11 p1827 A69-25646

Linearized steady state equations of motion solved for boundary conditions of fluid lying between horizontal planes with temperature varying horizontally

12 p2066 A69-26134

Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas

12 p2088 A69-26178

Ray tracing techniques applied to internal gravity waves in fluid with spatially varying mean flows

12 p2067 A69-26345

Aerospace applications of electric discharge interaction with fluid motion including sonic boom reduction, high lift devices, reentry vehicle pitch control, etc

12 p2136 A69-26405

Self controlled vibration of elastically supported cylinder in fluid stream due to von Karman shedding, considering fluidelastic interaction, structural deformation and natural frequency

13 p2360 A69-27437

Variable fluid and field velocity HF induction generator, determining interaction between fluid dynamic forces and magnetic field and kinetic energy

13 p2207 A69-27502

Heat transfer coefficient deterioration between fluid and tube wall at supercritical pressure and high heat fluxes
 [ASME PAPER 68-HT-39]

13 p2373 A69-27771

Heat transfer involving particulate suspension, discussing characteristics of flowing suspension, inertia effects, impingement, deposition, radiation and electric charges

13 p2377 A69-28151

Computer program for compressible fluid flows with space and time dependent variables, discussing hypervelocity impact
 [AIAA PAPER 69-353]

13 p2365 A69-28286

Ideal compressible fluid motion and heat transfer, noting convective heat transfer intensification with increased twisting velocity of flow

13 p2251 A69-28559

Boundary layer equation of viscous incompressible fluid with moment stresses, noting flow around thin plate and submerged jet problems

14 p2428 A69-28815

Axial and radial turbulence intensities for flow through smooth round tubes, measuring velocity profiles and drag coefficients

15 p2590 A69-30003

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle

15 p2590 A69-30048

Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range

15 p2554 A69-31303

Bubble boiling onset in forced fluid flow, deriving equations for calculating minimum temperature difference between wall and fluid, discussing applicability range

16 p2878 A69-31954

Fluid flow problems during orbital refueling vehicle maneuvers and system operations in propellant transfer, including disturbances, liquid-vapor interface instability, vapor ingestion, etc
 [AIAA PAPER 69-567]

16 p2868 A69-32721

Fluid transfer in orbit under low or zero g, stressing orientation
 [AIAA PAPER 69-565]

16 p2865 A69-32770

Book on gas dynamics of two phase media for thermal power engineering equipment, discussing phase transformations, condensation in high velocity flows, etc

17 p2948 A69-32951

Monograph on interaction between flow and sound fields as singular perturbation problem, using matched asymptotic expansion

17 p2949 A69-32998

Model calculations for movement of barotropic and initially symmetric vortices in rotating fluids with Coriolis parameter or fluid depth varying horizontally

17 p3000 A69-33761

Computer implementation of Bergman solution to initial value problem for partial differential equation of compressible fluid flow

18 p3164 A69-34614

Transformed Navier-Stokes equations for incompressible fluids flow, deriving forces acting on surface of bounded region

18 p3122 A69-34830

Axissymmetric laminar and turbulent wakes of body in flow with streamline pressure gradient, discussing velocity defects and profiles

19 p3296 A69-35762

Least squares method application to boundary value problem approximate solution for plane, axisymmetric, creeping and incompressible irrotational flows

19 p3299 A69-36475

Long term integration of fluid motion equations with finite difference scheme using hexagonal grid system to avoid nonlinear computational instability

19 p3364 A69-36508

Static and dynamic characteristics of pressure compensated oil-hydraulic flow control valves and relief valves with emphasis on linearized effects

19 p3256 A69-36713

Laser Doppler velocimeter (LDV) for fluid velocity measurements, noting advantages

20 p3552 A69-37004

Pressure increment due to inertia of rotating fluid film at journal bearing periphery theoretically estimated and measured

20 p3548 A69-37085

Incompressible fluid flow of given density and kinematic viscosity near trailing edge of flat plate

20 p3458 A69-37098

Hydromagnetic waves equations of motion for non-relativistic case, discussing particle and fluid flow models

20 p3616 A69-38317

Compressible fluid flow characteristics in turbomachine stage, discussing simplified radial equilibrium method as basis for design

21 p3643 A69-38457

Finite difference method for calculating Lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature

21 p3759 A69-39653

Temperature-vorticity analogy for viscous two dimensional fluid flow extended to compressible flows, noting enthalpy and shear stress analogy

22 p3929 A69-39892

MHD dynamo construction with emphasis on fluid motion effect on magnetic field, considering spatially periodic dynamo derivation from kinematic considerations

22 p3989 A69-40196

Fluid velocity in starting flow in circular tube using Laplace transform

22 p3911 A69-40688

EVA/IVA fluid umbilical improved stowability and flexibility, discussing cross section development and tests

24 p4272 A69-42847

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc
 [ASME PAPER 69-APMW-26]

24 p4245 A69-43093

FLUID INJECTION
 NT GAS INJECTION

NT LIQUID INJECTION NT WATER INJECTION

Plane MHD jets with variable conductivity, showing effective mixing length as function of distance

01 p0130 A69-10773

Structure of shock waves from MHD jet injected into zero viscosity, finite thermal and electrical conductivity medium analyzed by nonlinear differential equation system

01 p0130 A69-10774

Steady laminar flow in two dimensional channel with different permeability porous walls and large injection at both walls

03 p0417 A69-13795

Plasma transverse injection into toroidal magnetic field created by linear current leads to plasma confinement along magnetic force lines

03 p0478 A69-13837

Electric potential distribution in coaxial quasi-stationary plasma injector

03 p0478 A69-13838

Secondary injection effect on supersonic parallel diffuser, analyzing flow patterns, pressure distribution and recovery and heat transfer

03 p0365 A69-13991

Mean temperature distribution through inner and outer regions of turbulent boundary layer with injection through heated porous wall

04 p0685 A69-14729

Heat transfer, suction and injection in plane Couette flow analyzed for Rivlin-Ericksen fluid, using perturbation method

04 p0589 A69-14970

Source and sink method application to direct axisymmetric problems of hydrodynamics

05 p0747 A69-16039

Uniform hot fluid injection effect on heat transfer in constant property turbulent boundary layer [ASME PAPER 68-WA/HT-24]

05 p0847 A69-16126

Pressurized fluid journal bearing with fluid fed into space between shaft and shell from plenum chamber in bearing housing through circumferential slots

06 p0931 A69-17529

Impurity elimination from hydrogen plasma jets injected from coaxial source normal to octupole magnetic field

08 p1370 A69-21016

Experimental and theoretical investigation of mass injection effect on high current MPD arc [AIAA PAPER 69-266]

09 p1564 A69-21242

Krause numerical solution applied to normal injection in three dimensional incompressible laminar boundary layer [DVL-902]

09 p1482 A69-21971

Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate

09 p1430 A69-21973

Static pressure measurements at surface of sharp plate in supersonic flow during gas/liquid jet injection

11 p1821 A69-25479

Liquid metal multistage injection efficiency with sodium and potassium working fluids, noting preheating

13 p2372 A69-27483

Steam-water convergent condensing injector with supersonic inlet vapor, discussing axial pressure profiles and discharge pressure

13 p2372 A69-27486

Thermodynamic efficiency of MHD cycles for liquid Na with multistage injection and injection condensation

13 p2205 A69-27487

Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates

13 p2246 A69-27490

Numerical solutions of equations for high Prandtl number boundary layers in two dimensional flat plate incompressible flow with mass injection

13 p2249 A69-28238

Pressure distribution in wake produced by obstacle with secondary fluids injection into boundary layer, obtaining coefficient governing resistance of obstacle to forward motion

16 p2768 A69-31604

Two dimensional turbulent mixing with surface mass injection at supersonic and hypersonic speeds, noting velocity and temperature distributions [AIAA PAPER 68-130]

16 p2170 A69-31883

Compressible flow over finite porous plate in supersonic stream with massive injection over surface analyzed using inviscid vortical flow model

16 p2770 A69-31884

Incompressible attached wall jet/Coanda flow/over circular cylinder with finite incompressible injection normal to surface

16 p2772 A69-32148

Injection film cooling effect on surface heat transfer downstream of flush nontangential injection holes and slots in turbine applications [AIAA PAPER 69-523]

16 p2843 A69-32703

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chilldown, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs [AIAA PAPER 69-564]

16 p2869 A69-32733

Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles

17 p2951 A69-33254

Jet injection into free circular cross section cross wind using curvilinear dynamic model, assuming negligible Archimedean forces effect

18 p3124 A69-35149

Flow rate of ideal fluid ejected from swirl injector taking into account radial component of flow velocity at nozzle exit

19 p3297 A69-35820

Laminar flow in porous circular pipe with constant suction or injection applied at wall

24 p4298 A69-42618

Turbulent flow in circular porous tube laminarized by uniform mass injection through tube wall, measuring velocity and turbulence intensity by impact probe [ASME PAPER 69-HT-57]

24 p4303 A69-43537

FLUID JET AMPLIFIERS

U JET AMPLIFIERS

FLUID JETS

NT AIR JETS

NT FREE JETS

NT GAS JETS

NT HYDRAULIC JETS

NT VAPOR JETS

Jet line in rotational incompressible plane flows around shrouded propeller blade, using electrical analog

01 p0058 A69-10037

Growth rate of wave instability in conducting liquid jet in perpendicular electric field and accelerating under gravity

01 p0062 A69-11207

Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields

01 p0062 A69-11208

Pressure gain estimates in analog jet amplifier based on total pressure measurements in main jet interaction region

02 p0195 A69-12076

Cylindrical jet stability of perfectly conducting, incompressible and inviscid fluid in presence of axial magnetic field

03 p0474 A69-13142

Flow characteristics about curved lateral jet, discussing effect of pitot tube nozzle shape and turbulence

05 p0746 A69-16017

Wall attachment phenomenon/Coanda effect/ basis for jet elements in digital and/or pulse-mode systems

10 p1638 A69-23553

Hybrid fluidic pressure regulator combining vortex amplifier and confined-jet amplifier with performance upgrading moving metering element, noting greater efficiency and reliability

10 p1639 A69-23560

Fuel jet shape in air stream/mechanical atomization calculated as function of stream and fuel injection parameters

11 p2002 A69-25336

Electrically driven thin fluid jet stability in longitudinal field between two plate electrodes, discussing role of Ohm law in calculating jet potential

12 p2136 A69-26402

Electrohydrodynamic instability of incompressible conducting cylindrical viscous jet in external magnetic field, noting viscosity role in oscillation modes and growth rate

12 p2136 A69-26403

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field

14 p2501 A69-29917

Vortex ring production in liquid jet by vibration induced pressure pulses at orifice, discussing plates formed under high g vibration [AIAA PAPER 68-132]

16 p2770 A69-31880

Cylindrical viscous jet transition points from stable to unstable modes of oscillation found same as for inviscid jet

16 p2773 A69-32570

Evaporation rate of liquid sprays involving atomization, droplets ballistics, drop size distribution, turbulence effects, etc

18 p3119 A69-34246

Jet injection into free circular cross section cross wind using curvilinear dynamic model, assuming negligible Archimedean forces effect

18 p3124 A69-35149

Aerodynamic characteristics of plane inviscid fluid jets expanding over curvilinear surface, deriving force equations for surfaces in jet and rocket engines

19 p3296 A69-35815

Velocities and pressure in twisted jet in unbounded space containing same fluid as jet

19 p3298 A69-36388

Circular liquid jet oblique impingement on flat surface, noting dry zone occurrence at small angles due to lateral flow deflection

21 p3691 A69-38551

Jet efflux from two dimensional symmetric nozzles of arbitrary shape determined using conformal mapping and Riemann-Hilbert solution to mixed boundary value problem

21 p3692 A69-38686

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, refraction coefficient for air between jets, etc

21 p3696 A69-39095

FLUID LOGIC

Variable time delay achievement in fluid logic circuits based on Coanda effect devices

02 p0196 A69-12085

Wall attachment type fluidic logic devices with low power consumption requirements, noting monostable and bistable devices

05 p0704 A69-16002

Fluidic logic elements using suction to influence main jet, outlining operation principles

16 p2736 A69-31835

Fluidic logic for high speed pneumatic stepping motor for high radiation environments, discussing bellows pressure sequencing by open-loop counter, signal conversions and performance

18 p3092 A69-34310

Fluid logic feedback control circuit synthesis using synthesis table, describing procedure to assign memory valves and switching signals

24 p4292 A69-43290

NT RAREFIED GAS DYNAMICS

NT ROTOR AERODYNAMICS

Asymptotic solution of Orr-Sommerfeld equation by multiple scales method for linear and general velocity profile

01 p0059 A69-10332

Equation of characteristic functional for Burgers one dimensional model fluid turbulence using logarithmic expansion method, discussing change in time of energy spectrum

01 p0059 A69-10338

Fluid mechanics of one stage momentum flueric diode

02 p0195 A69-12071

Fluid mechanics of supersonic flow separation and reattachment in fluidic devices

02 p0231 A69-12077

Equilibrium problem for fluid subjected to gravitational forces and surface tension, proposing algorithm for numerical solution

03 p0417 A69-13810

Inviscid cavity and wake flows behind submerged bodies, analyzing mathematical and theoretical models

04 p0587 A69-14608

Difference schemes implementation through fractional time step and phase error methods reduce dispersion

04 p0591 A69-15282

Laminar compressible viscous boundary layer with arbitrary external pressure distribution, using implicit multiple difference method

04 p0591 A69-15294

Viscous incompressible fluid motion in two or more dimensions and with zero fluid velocity on domain boundary, determining lower bounds and uniqueness for solutions

04 p0626 A69-15311

Ornstein-Zernike relation for homogeneous fluid relating direct and indirect correlation functions

04 p0591 A69-15435

Laminar flow of nonNewtonian fluids described via rheological three parameter model

05 p0744 A69-15678

Analog simulation of water hammer type phenomena governed by linear constant coefficient partial differential equations

05 p0751 A69-16475

Class of uniform motions of continuous media and rarefied gases

05 p0751 A69-16677

Asymptotic solutions of Grad system of kinetic moments

05 p0752 A69-16678

Book on continuum mechanics covering elasticity, fluid mechanics, plasticity and viscoelasticity, emphasizing basic concepts

05 p0843 A69-16713

Thermodynamics of fluid materials and characterization of thermodynamics of irreversible processes, using constitutive equations

06 p0959 A69-18222

Book on fluid mechanics fundamentals and applications covering incompressibility and compressibility effects, viscosity, hydrostatics, aerostatics, one dimensional, potential, turbulent flow and boundary conditions

07 p1121 A69-19376

Statistical theory of fluids in equilibrium based on correlation functions for pair interactions between constituent molecules, invoking superposition closure approximation

08 p1350 A69-19868

Computer study of analytical model of boundary layer transition from laminar to turbulent flow [AIAA PAPER 68-38]

09 p1482 A69-21945

Turbulent transport processes mathematical model, determining upper and lower bounds

10 p1677 A69-22895

Short memory elasticoviscous fluid motion in and around oscillating spherical shell

10 p1800 A69-23240

Simple fluids viscosity dependence on density analyzed by molecular theory, exemplifying with liquid argon

13 p2299 A69-28036

Fluids structural relaxation analyzed by nonequilibrium thermodynamics and molecular kinetic theory, considering Brownian motion

13 p2299 A69-28037

Horizontal shear flow effect on linear geostrophic adjustment in unbounded barotropic fluid, discussing gravity waves, vorticity equations, available energy, etc

15 p2648 A69-30217

Leakage prediction through mechanical seal by theoretical equation developed from basic fluid mechanics [ASLE FICFS PREPRINT 17]

15 p2621 A69-30499

Kovaszny spectral theory of turbulence, discussing energy spectrum decrease in viscous subrange

16 p2768 A69-31686

Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate [AIAA PAPER 69-477]

16 p2811 A69-32728

Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids

16 p2813 A69-32789

Switching time of transient two dimensional fluidic bistable wall attachment amplifiers based on mathematical model and separation bubble control

17 p2904 A69-34068

State space procedure for mixed boundary value problems applied to structural analysis, fluid mechanics and eigenvalues for deformable bodies

18 p3164 A69-34685

Meteorological forecasting as problem in fluid mechanics and thermodynamics, discussing accuracy and electronic computer role in classical or mathematical methods

18 p3166 A69-34694

Collection of papers on fluid mechanics, Volume 1, covering buoyant plumes and thermals, laminar separation, electrohydrodynamics, boundary layer transition, hydrodynamic noise, etc

18 p3122 A69-34916

Applied mechanics - Conference, Waterloo, Ontario, Canada, May 1969

19 p3374 A69-36655

Thomas wave equation in fluid mechanics, examining coordinates system with normal hyperbolic metric of universe tube having given signature

20 p3598 A69-37430

Continuum mechanics of micropolar fluids and solids, discussing thermodynamical restrictions on elasticity and viscosity coefficients, deriving field equations and boundary conditions

20 p3624 A69-37582

One dimensional model and equation of energy spectrum function solved in studying turbulent diffusion in fluid at rest

21 p3693 A69-38749

Interaction between boundary layer and external vortex flows and stability transitions of heated rotating fluid annulus

21 p3698 A69-39869

Volterra problem with given singularities for exterior of circle applied to fluid mechanics

24 p4339 A69-42679

FLUID POWER

Compact hydraulic power transfer units in aircraft with common connecting shaft for pump/motor elements, discussing integrated power package

06 p0930 A69-17168

Fluid power - Conference, London, September 1968

19 p3255 A69-36710

Pneumatic control circuits design based on logic functions and truth tables, noting fluid logic application

19 p3256 A69-36714

FLUID ROTOR GYROSCOPES

Unconventional two axis gyroscopes using fluids, determining precession moments and gyroscopic effects of medium [DVL-848]

04 p0597 A69-14831

FLUID SWITCHING ELEMENTS

Fluid mechanics of one stage momentum fluric diode

02 p0195 A69-12071

Switching action mechanism in wall attachment fluid amplifier, outlining theory based on turbulent jet entrainment

02 p0195 A69-12073

Fluidic element design calculations, noting flow characteristic differences

02 p0195 A69-12074

Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems

02 p0249 A69-12088

Wall attachment type fluidic logic devices with low power consumption requirements, noting monostable and bistable devices

05 p0704 A69-16002

Fluidics research and development of control elements and components

05 p0704 A69-16003

Vortex devices and turbulence amplifiers, describing circuits, operating principles and performance

05 p0705 A69-16005

Fluidic power control switch for supersonic fluid amplifier, presenting performance data and possible industrial applications

08 p1256 A69-20304

Design criteria for pneumatic servo controls with fluidic elements stressing final transient, pilot circuits and amplifier elements

08 p1256 A69-20305

Fluidic devices, including amplifiers, bistable elements, modulators, gates, etc

09 p1443 A69-22535

Switching time of transient two dimensional fluidic bistable wall attachment amplifiers based on mathematical model and separation bubble control

17 p2904 A69-34068

Discharge coefficient and opening time of pneumatic and hydraulic systems incorporating disks, nozzles and valves

18 p3094 A69-34981

Classification of switching process in bistable fluid amplifiers with illustration of fluid oscillator, discussing capacitor and bleeds [ASME PAPER 69-FLCS-28]

20 p3465 A69-37977

Fluidic amplifiers development and logic applications, describing various elements and circuits

22 p3870 A69-41239

FLUID TRANSMISSION LINES

Lossy and lossless fluidic transmission line theory to estimate downstream conditions having known upstream system

01 p0012 A69-10153

Liquid flow systems dynamic response to periodic disturbances of system structural supports

05 p0747 A69-16073

Natural frequency of fluid oscillations in complex pipelines

07 p1119 A69-18745

Reliable fluid transmission systems by brazed joints, noting base and filler metals, fitting designs and various processes

09 p1507 A69-22333

Cerebral circulation arterial system pulsatile flow flexible vessel digital simulation models distribution

19 p3264 A69-36867

Acoustic frequency response of unsteady turbulent flow in transmission lines, considering effects of small amplitude disturbances and heat transfer [ASME PAPER 69-FE-11]

20 p3516 A69-37988

Dynamic models for viscous fluid transmission lines using distributed parameter for accuracy and rational approximate form to avoid computational difficulty

24 p4301 A69-43289

FLUID TRANSPIRATION

U TRANSPARATION

FLUIDICS

Lossy and lossless fluidic transmission line theory to estimate downstream conditions having known upstream system

01 p0012 A69-10153

Fluidic display systems, discussing thermochromic modules and decoder with miniature components

01 p0078 A69-10155

Fluidics - Conference, London, November 1968

02 p0194 A69-12070

Fluidic element design calculations, noting flow characteristic differences

02 p0195 A69-12074

Fluid mechanics of supersonic flow separation and reattachment in fluidic devices

02 p0231 A69-12077

Vortex valve characteristics, noting Reynolds number and geometry effects on flow and turndown ratio

02 p0195 A69-12079

Malfunction elimination in asynchronous fluidic switching circuit by locating static hazards

02 p0195 A69-12080

Working equivalent circuits for fluidic transverse impact modulator in LF and IF range

02 p0196 A69-12082

Fluid logic circuits miniaturization for flow in straight and curved channels of various cross sections

02 p0196 A69-12084

Fluidic pulse time modulated angular position sensor for two axis hydrostatically supported gyroscope

02 p0249 A69-12087

Fluid temperature sensor generating output differential pressure proportional to temperature of fluid entering device

02 p0249 A69-12089

Fluidic acceleration sensor based on vibrating string principle, discussing design, suspension system, driving-oscillator circuit, beat frequency circuit and detection circuits

02 p0249 A69-12091

Pneumatic elements, discussing development from process control via modules systems to logic elements and fluid sensors

02 p0197 A69-12795

Fluidic numerical controls of linear or rotating motors, discussing pneumatic, hydraulic, hybrid logic components and amplifiers

04 p0550 A69-15082

Comparison of electric, electronic and fluidic logic circuits

04 p0583 A69-15083

Fluidics research and development of control elements and components

05 p0704 A69-16003

Vortex devices and turbulence amplifiers, describing circuits, operating principles and performance

05 p0705 A69-16005

Fluidic component descriptions and systems synthesis, discussing mathematical, graphical and linear models

05 p0705 A69-16007

Breadboard technique and interconnection for fluidic circuits in large systems

05 p0705 A69-16009

Theory of capillary flow for fluidic resistor design
05 p0705 A69-16011

Wall jet type fluidic elements subjected to hydroacoustic dynamic effects, discussing use of boundary layer flow properties
05 p0705 A69-16016

Bistable fluid device utilizing Coanda effect along convex surface for wall attachment
[ASME PAPER 68-WA/FE-27] 05 p0749 A69-16101

Flow field in fluidic temperature sensor using schlieren and shadowgraph techniques
[ASME PAPER 68-WA/FE-29] 05 p0763 A69-16102

Synthesis of simulated aircraft cabin pure fluidic temperature control system
[ASME PAPER 68-WA/FE-30] 05 p0705 A69-16103

Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] 05 p0763 A69-16105

Hazards in pneumatic fluidic sequential circuits caused by delays in pneumatic tubing
[ASME PAPER 68-WA/AUT-18] 05 p0706 A69-16174

Fluidic systems with long lines simulated by transmission lines of OR/NOR oscillator
[ASME PAPER 68-WA/AUT-12] 05 p0706 A69-16178

Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere
05 p0766 A69-16755

Book on fluidics applications analyzing world literature dealing with fluidic devices
06 p0869 A69-17171

Fluidic vortex valve warm gas flow control for rocket application
[AIAA PAPER 69-118] 06 p0872 A69-18147

Steady flow circuit characteristics in square cross section channels of planar geometry fluid control elements in case of laminar flow
07 p1118 A69-18293

AC fluidics for pressure pulse frequency control and monitoring in flow, discussing design and application to steam turbine speed control
07 p1058 A69-18938

Fluidic devices application to attitude and guidance control of satellites, rockets and space probes
07 p1230 A69-19292

Sensor suspension, damping and signal readout through use of fluids with applications to rate and acceleration sensors
[AGARDOGRAPH-118] 08 p1257 A69-20949

Gas servo design utilizing floating flapper disk switching valves and pulse-length modulated pressure waves to actuate on-off switch
[AGARDOGRAPH-118] 08 p1257 A69-20950

Fluidics in UK, discussing digital control elements and systems and transmission lines in alternating flow hydraulics
[AGARDOGRAPH-118] 08 p1257 A69-20952

Peripheral fluidic devices for sequencing and monitoring machinery in hazardous areas, describing circuits
[AGARDOGRAPH-118] 08 p1257 A69-20954

Fluidic devices for closed loop control of gas turbines
[AGARDOGRAPH-118] 08 p1258 A69-20956

Fluidic component application to propellant tank pressurization and controller design
[AIAA PAPER 68-629] 09 p1442 A69-21980

Fluic light-off detector (FLOD) for sensing and indicating minimum light-off or blow out conditions in turbojet engine afterburner
[ASME PAPER 69-GT-36] 09 p1501 A69-22488

Air powered fluid jet engine compressor bleed control stressing closing, reset and override operations
[ASME PAPER 69-GT-19] 09 p1571 A69-22498

Fluidic overspeed sensor for small turboshaft power turbine, discussing requirements, circuit and system design, packaging, reliability and maintainability
[ASME PAPER 69-GT-17] 09 p1571 A69-22500

Miniature fluidic oscillator temperature sensors evaluated in gas turbine engine nozzle, discussing temperature control and related signal error compensation and temperature averaging
[ASME PAPER 69-GT-70] 09 p1572 A69-22512

Fluidic devices, including amplifiers, bistable elements, modulators, gates, etc
09 p1443 A69-22535

Vortex fluidic devices - Conference, Philadelphia, January-February, 1967
09 p1443 A69-22736

Vortex valve pure fluid modulators steady state characteristics, analyzing geometry of exit, control and supply areas and chamber
09 p1443 A69-22738

Vortex fluid devices in control systems, considering electrical, mechanical and hydraulic systems
09 p1443 A69-22740

Fluidics technology including applications, construction and mountings
10 p1636 A69-23401

Fluidic control technology compared to other control modes, describing fluidic functions and devices
10 p1636 A69-23402

Wall attachment phenomenon /Coanda effect/ basis for jet elements in digital and/or pulse-mode systems
10 p1638 A69-23553

Fluidic jet beam deflection amplifier, discussing basic principles, operating characteristics and design criteria
10 p1638 A69-23554

Fluidic compressor bleed control unit for TF-30 jet engine to prevent stall at low rpm operation
10 p1753 A69-23559

Fluidic secondary injection thrust vector control systems for solid propellant and hydrogen-oxygen rocket engines
10 p1753 A69-23561

Jet fluidic differential amplifier transfer function determination, describing interconnection dynamics
11 p1824 A69-24350

Passive structural units in fluidic circuits, discussing tesla diode and proportional amplifier
11 p1825 A69-24542

Fluidic quantities analogous to electrical properties of lumped circuit elements in DC networks, noting validity of Kirchhoff node and mesh theorems
11 p1861 A69-25676

Analog jet elements of pneumonics operating on direct interaction between streams, calculating static characteristics for analog jet amplifying element
14 p2393 A69-28746

Fluidic systems for automatic control of fuel supply to ramjet engine combustor, coolant rationing and distribution to engine structure and performance efficiency maintenance
14 p2508 A69-28875

Hydraulic resistance, capacitance and inductance of fluidic element derived by analogy with electric circuits
15 p2552 A69-31060

Optimizing control system design using fluidic digital circuitry and FM type transducers
15 p2583 A69-31296

Fluidic control systems for industrial applications, discussing fluidic solutions to process problems
15 p2553 A69-31297

Acoustic fluidic sensor /sonicell/ combining sonic generator based on edgetone principles with sensor dependent on laminar stream acoustic disturbance
15 p2616 A69-31302

Fluidic temperature sensors for measuring turbine inlet temperature on large turbine engine
[AIAA PAPER 69-544] 16 p2792 A69-32692

Fluidic sensors for jet engine control, analyzing convergent divergent nozzles, vortex and acoustic oscillators for pressure and gas temperature measurements
[AIAA PAPER 69-542] 16 p2843 A69-32699

Fluidics for satellite and rocket attitude control and guidance, discussing computing block function and components, system reliability and resistance to aging, etc
17 p3049 A69-33243

Fluidic thrust reversal control system for turbojet achieving cost and weight reduction, illustrating fluidic circuit and noting circuit reliability
17 p3018 A69-33329

German monograph on theoretical and experimental investigations of tubes and lumped fluidic elements covering equivalent circuit
17 p2903 A69-33573

Fluidics /no moving part fluidics/, discussing diodes, capacitors, logic elements, temperature sensors, systems design, environmental factors, etc
17 p2904 A69-34067

Fluidic attitude control systems performance prediction from conventional control analysis emphasizing steady state positioning accuracy
17 p2904 A69-34069

Fluidic system applications to turbojet propulsion control, thrust stabilization control, temperature sensing, normal shock sensing, pressure ratio sensing, supersonic air inlet control and flight control
17 p2904 A69-34070

Fluidic sensor for measuring gas and liquid velocities, describing design and principles of operation
18 p1313 A69-34308

Fluidic pressure ratio computing device based on two free jets interaction principle, describing prototype system design and analysis, electronics and overall error
18 p3133 A69-34309

Servovalves with fluidic and electrical inputs compared for gas servoamplifiers performance, considering use as sensors in closed-loop hydraulic circuit
19 p3255 A69-36711

Coanda effect of separated jets reattachment to wall at high Knudsen number in pneumatic fluidic devices, discussing Reynolds and Mach numbers effect
[ASME PAPER 69-FLCS-37] 21 p3692 A69-38602

Fluidic pressure signal generator for use in fluidic system frequency response studies, considering design and performance
[ASME PAPER 69-FLCS-40] 21 p3649 A69-38603

Fluidic angular rate sensor, obtaining rate information by sensing laminar jet flow deflection from nozzle, discussing advantages over mechanical rate sensors
21 p3722 A69-38766

Fluidic proportional level control and density control systems, discussing advantages of low initial and maintenance cost, long life and temperature, shock, radiation resistance, etc
22 p3870 A69-41241

Fluidic servoactuator controlled by hydraulic vortex valves using mechanical signals for helicopter stability augmentation system
24 p4255 A69-42800

Mechanization of analog electrical-to-fluidic transducer using carrier circuit techniques and piezoelectric bender drive assembly
24 p4315 A69-43026

Parallel wire array fluidic sun sensor for solar pointing fluidic attitude control, discussing design and breadboard test
24 p4348 A69-43297

Static and dynamic characteristics of fluid pressure signal transmitter between members with relative rotary motion
24 p4256 A69-43300

FLUIDIZED BED PROCESSORS

Hydrodynamics of turbulent gas flow through powder layer for vapor phase coating of particles, noting fluidized bed
20 p3548 A69-37363

Heat transfer mechanisms between fluidized beds and wall surfaces by application of film penetration theory of mass transfer, noting bubbling bed model
20 p3632 A69-37519

FLUIDS

Heat transfer coefficients for free convection from single horizontal cylinder to fluids computed from empirical correlation
09 p1625 A69-22693

Specific isochoric heat capacity of pure fluids, considering thermal equation of state, vapor pressure and boundary conditions at critical point
11 p2001 A69-25201

Thermal conductivity measurements of fluids, considering contribution of radiation, convection, temperature jump and experimental arrangement eccentricity to errors
23 p4237 A69-41325

FLUORESCENCE

NT PHOSPHORESCENCE

NT X RAY FLUORESCENCE

Fluorescence spectroscopy of proteins, analyzing polarity, distances between groups, flexibility and conformational transitions
01 p0023 A69-10291

Interactions between intermediate fluorescence quenching trapping center and associated electron acceptor of oxygen evolving photosynthetic spinach chloroplast photosystem
01 p0024 A69-10928

Fluorescence efficiency of air under electron bombardment measured at low pressure
02 p0284 A69-12734

Fluorescence and phosphorescence from tryptophan powders stimulated at low temperatures with UV, vacuum UV, fast electrons and X rays
03 p0372 A69-13487

Substrate and subunit interactions influence of beta 2 protein of Escherichia coli tryptophan synthetase on fluorescence properties of pyridoxal phosphate prosthetic groups
04 p0553 A69-15304

Hydrogen adaptation effect on fluorescence of normal and Mn deficient algae, noting system II photosynthesis
04 p0554 A69-15325

Upper limit of nonradiative relaxation time between specific states of absorption bands and fluorescence state emitting R lines in ruby laser

05 p0777 A69-16335

Mechanism for laser surface damage of glasses working through optical absorption, fluorescence, chemical reaction by quenching and breakdown

06 p0935 A69-17771

Laser excited vibrational fluorescence for determining vibrational energy transfer rates in HCl-carbon dioxide, HCL-HI and HI-carbon dioxide

07 p1144 A69-18289

Hydrogen molecule spectroscopy in vicinity of ionization limit, determining absorption and ionization cross sections and fluorescence

07 p1184 A69-18490

Fluorescent light polarization of neon atoms subjected to gas discharge, static magnetic field and laser beam [IEEE PAPER T-9]

07 p1155 A69-19084

Iodine fluorescence spectra excited by krypton ion laser, analyzing spectral series and vibrational rotational levels

07 p1156 A69-19304

Ruby absorption, fluorescence and lasing properties, calculating polarization effect on relative intensities and forms of R1 and R2 bands in macroscopic theory

07 p1201 A69-19646

Ce activated garnet crystals optical properties, noting IR and near UV absorption spectra and room and low temperature fluorescence

07 p1201 A69-19647

Cometary magnetic fields by measuring depolarization of molecular resonance fluorescence

09 p1603 A69-22234

Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions

10 p1705 A69-23811

Mode locked lasers for measuring fast radiative decay in fluorescent systems

12 p2105 A69-26310

Intense ultrashort pulse widths determination by two photon fluorescence patterns, using model of partial laser mode locking

13 p2270 A69-27198

Neodymium laser emission of organic molecules in UV region noting molecular absorptivity and fluorescence

13 p2271 A69-27657

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows

13 p2302 A69-28265

Radiative decay of polyatomic molecules, applying Green function form for transition probability to decay of manifold of closely spaced coupled levels

14 p2488 A69-29924

Fluorescence noise in Q switched ruby laser at-mospheric backscattering experiments, noting relation to optical radar spurious and enhanced returns

16 p2777 A69-32183

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section

16 p2850 A69-32315

Mossbauer spectroscopy, discussing nuclear resonance fluorescence and equipment

18 p3099 A69-34622

GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime

19 p3339 A69-36696

Luminous efficiency for electron induced molecular nitrogen bands, discussing thick- and thin-target measurements of fluorescent efficiencies

21 p3774 A69-38521

Density, ion temperature, electron temperature and ion drifts in Ba or Ba doped plasmas determined by resonance fluorescence and optical pumping

22 p3962 A69-40532

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength

22 p3898 A69-41078

Detection and spectral examination of trace porphyrin complexes by demetalation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry

24 p4279 A69-42557

Laser cavity modes phase equality demonstrated by oscilloscope trace in two photon fluorescent method

24 p4327 A69-42981

Optical properties of neodymium-doped YAG and glass laser materials including fluorescence lifetime and conversion efficiency, absorption spectra, sensitization effects, etc

24 p4329 A69-43751

FLUORESCENT EMISSION U FLUORESCENCE

FLUORIDES

NT BERYLLIUM FLUORIDES
NT BORON FLUORIDES
NT CALCIUM FLUORIDES
NT CHLORINE FLUORIDES
NT CRYOLITE
NT HYDROFLUORIC ACID
NT LANTHANUM FLUORIDES
NT LITHIUM FLUORIDES
NT NICKEL FLUORIDES
NT NITROGEN FLUORIDES
NT OXYFLUORIDES
NT OXYGEN FLUORIDES
NT SULFUR FLUORIDES
NT URANIUM FLUORIDES

Chemical vapor deposition of W-Mo-Re ternary alloys from hydrogen reduction of fluorides on Cu or Mo substrates

01 p0096 A69-10642

Pressure properties of fluorides and silicofluorides as cutting and grinding lubricants for titanium [ASLE PAPER 68-LC-20]

07 p1141 A69-19311

Metal fluoride compounds as cathodes for use with mixed fluoride electrolyte /LiF-NaF-KF eutectic/ in thermal batteries

10 p1640 A69-23997

Far IR electronic and vibronic transitions in single crystals of Nd ions in tysonite lanthanide fluorides

13 p2316 A69-27628

Fluorides or AMOX increased concentrations effect on thyroid growth rate, uptake and adrenal weight in rats

14 p2406 A69-29291

Emission band intensities of carbonyl fluoride in 2.0-6.0 micron region with scanning spectrometer, comparing results for room and shock temperature with theoretical data

21 p3669 A69-38759

FLUORINATION

Remotely operated open-cup impact tester for studying impact initiation of reaction of various liquid fluorinating agents with metals and plastics

06 p0907 A69-17876

Elemental fluorine reactions with Ni, Cu, Fe, Ti, Be, Al, Zr and Ag, giving reaction rate constants, activation energies, etc

21 p3670 A69-39706

FLUORINE

Solubility of helium in liquid fluorine increases with temperature exhibiting reverse order

01 p0142 A69-11258

High thrust fluorine engines and propellants

03 p0494 A69-12889

Safety planning for use of reactive cryogenics in large volume, noting FLOX and liquid fluorine

04 p0645 A69-14468

Galvanic corrosion couples of metals and alloys tested in liquid fluorine, determining corrosion rates for possible missile components application

06 p0944 A69-17854

Bellows sealed valve for measurement of fluorine thermodynamic properties at moderately high pressures

09 p1493 A69-21428

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft

15 p2676 A69-30886

Analytical model for liquid fluorine non-vent loading operations noting application to flightweight upper stage systems [AIAA PAPER 69-579]

16 p2767 A69-32715

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing [AIAA PAPER 69-528]

16 p2767 A69-32717

Mean lives of 1s super 2 2p super 2 super 1D level in F VI and O V measured by beam foil technique

17 p3009 A69-34188

Beryllium fluoride heat of formation from heat of combustion of Be-polytetrafluoroethylene mixture in fluorine

21 p3853 A69-39703

Vapor pressure measurements on liquid fluorine from triple to critical point at one degree K intervals [NAS-NRC PAPER H-2]

22 p3998 A69-40624

FLUORINE COMPOUNDS

NT BERYLLIUM FLUORIDES

NT BORON FLUORIDES

NT LITHIUM FLUORIDES
NT NICKEL FLUORIDES
NT NITROGEN FLUORIDES
NT OXYFLUORIDES
NT OXYGEN FLUORIDES
NT POLYTETRAFLUOROETHYLENE
NT SULFUR FLUORIDES
NT TETRAFLUOROHYDRAZINE
NT URANIUM FLUORIDES

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium

12 p2104 A69-25986

Fluosilicic acid in chemical milling of Ti and Ti alloys

21 p3669 A69-38966

Impurities effect-on corrosion of fluorine containing propellant oxidizer systems, noting aqueous and anhydrous hydrogen fluoride corrosion

21 p3784 A69-39487

FLUORINE-LIQUID OXYGEN U FLOX

FLUORINE ORGANIC COMPOUNDS

NT FLUOROCARBONS
NT FLUOROHYDROCARBONS

Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility

05 p0717 A69-16498

Organic fluorine chemistry, discussing synthesis reactions and reaction of polyfluorocycloalkenes with various nucleophiles

08 p1269 A69-21129

Flame velocities of stable premixed tetrafluoroethylene-oxygen mixture flames measured with bunsen-cone method

11 p1940 A69-24485

Sugars identification as trifluoroethylacetyl polyol derivatives by gas-liquid chromatography

15 p2558 A69-31539

FLUORITE

CW lasers based on composite yttrifluorite type crystals, noting large number of emission bands

13 p2273 A69-28316

Fluorite crystal laser activated by divalent samarium, discussing characteristics in pulsed operation mode

14 p2458 A69-29328

FLUORO COMPOUNDS

NT CRYOLITE
NT FLUORINE ORGANIC COMPOUNDS
NT FLUOROCARBONS
NT FLUOROHYDROCARBONS
NT POLYTETRAFLUOROETHYLENE

Wear resistance of briquetted lubricants from fluoroplast and molybdenum disulfide under pressure

21 p3733 A69-39805

FLUOROCARBONS

Fracture process in composite films of stressed tetrafluoroethylene and fluorinated ethylene propylene

02 p0270 A69-12368

Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and ions, calculating ionic heats of formation and bond dissociation energies

02 p0205 A69-12464

Shock tube and samples of fluoroethylene, difluorodichloroethylene and fluoromethane in argon diluent used to prepare carbon difluoride, discussing electronic oscillator strengths

04 p0632 A69-14944

Combustion bomb testing of propellants containing fluorocarbon binder and ammonium perchlorate, noting unique ignition, combustion and extinction properties [WSCI PAPER 69-9]

16 p2831 A69-32349

Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether [ASME PAPER 69-LUBS-18]

18 p3140 A69-34378

Low molecular weight fluorocarbons pyrolysis and oxidation in single pulse shock tubes, using vapor phase chromatography and mass spectral analyses

18 p3099 A69-34467

FLUOROHYDROCARBONS

Perfluorocyclobutane-oxygen mixture combustion, measuring burning velocities and adiabatic equilibrium flame temperatures 21 p3852 A69-39594

FLUOROHYDROCARBONS

Polyfluoroethylene resin breakdown under uniaxial tension, considering continuity disruption 13 p2286 A69-28321

Halon 1301 /bromotrifluoromethane/ concentration for inerting Aerozine-50 spills or extinguishing fires, noting joint use of carbon dioxide and water 18 p3094 A69-35090

Integral fuel tank sealant based on various hydrofluorocarbon polymers prepared, tested and compared for physical properties 19 p3356 A69-35533

FLUOROMICA

U MICA

FLUOROSCOPY

Dynamic roentgenology of cervical spine noting ease of use in neutral profile, hyperflexion and hyperextension for aeronautical medicine 23 p4087 A69-41797

Military pilots cervical spine dynamic X ray studies, comparing spine curvature and rectitude of jet and nonjet pilots and nonflying personnel 23 p4087 A69-41798

FLUSHING

Ram recovery of flush intake for air cushion vehicles noting influence of intake geometry, placement and incidence angle 01 p0005 A69-10026

FLUTING

U GROOVING

FLUTTER

NT PANEL FLUTTER
NT SUBSONIC FLUTTER
NT SUPERSONIC FLUTTER

Pseudorandom scanned TV signal distortion due to flutter and skew introduced by tape recorder, computing system SNR for distortion as additive random noise 01 p0033 A69-10999

Spadoryc slide rule for damping determination from vibration decay traces, noting use in flight flutter tests 01 p0087 A69-11029

Dual inertia magnetic tape recorder/reproducer combining low wideband flutter and low time base errors 10 p1693 A69-23289

Servocontrol to delay flutter onset of aeroelastic structures, discussing rapid amplitude and phase changes near instability point, wind tunnel models, instrumentation, analog simulation 11 p1992 A69-25518

Self excited vibration of flowing medium and infinite cylindrical duct wall in primary magnetic field, discussing vibration stability and critical speeds 18 p3226 A69-35462

Aeroelasticity of supersonic aircraft in flight, discussing buffeting, wing flutter and control surface flutter 22 p3862 A69-40003

FLUTTER ANALYSIS

Supercritical flow effects on unsteady aerodynamic coefficients used for subsonic aircraft flutter analysis, emphasizing changes due to shock and flow separation 01 p0007 A69-11020

Flutter vibration of sails fixed along edge and single wing weather vanes in supersonic flows 02 p0192 A69-12824

Flutter vibration in subsonic flows, analyzing critical velocity for membrane and damping destabilizing effects in nonconservative system 02 p0192 A69-12825

Eigenvectors utilized in flutter computation for couplings [ONERA-TP-650] 03 p0522 A69-12878

Energy transfer in circulatory force fields, noting mechanism changes for simultaneously operative original field and adjoint field energy sources 04 p0671 A69-14415

Early design stage flutter analysis for variable sweep aircraft, using subsonic flutter model 04 p0677 A69-14834

Boom flutter effects on attitude dynamics of OV1-10 satellite, noting introduction of angular momentum by tip mass elliptical vibration 04 p0666 A69-15520

Stability of three layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear 05 p0843 A69-16683

Unsteady supersonic flow around thin circular cylinder representing rocket stage, calculating flutter and response to random environment 06 p0857 A69-17098 [ONERA-TP-666]

Tandem airfoils wing-tail interaction flutter analysis, using three dimensional vortex lattice aerodynamic theory [AIAA PAPER 69-57] 06 p1028 A69-18105

Thermally induced vibration and flutter of flexible spacecraft boom, discussing stability by considering boom as cantilever beam [AIAA PAPER 69-21] 06 p0869 A69-18144

Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures 07 p1231 A69-18331

Effects, measurement and analysis of flutter in instrumentation recorders 07 p1133 A69-19118

Tape flutter and additive noise time base errors in coherent demodulation of suppressed carrier AM multiplex 07 p1082 A69-19119

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium 08 p1412 A69-20324

Hydrofoil vehicle flutter investigations including simple foils and struts, geometrical parameters, finite span, cavitation, etc 09 p1614 A69-21898

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field 10 p1798 A69-23094

Semiautuator disk method for boundary layers and velocity of stall flutter cascade blades vibrating in transient mode, considering nonstall flutter 11 p1818 A69-25028

Strip method for prediction of subcritical frequency and damping characteristics for subsonic wind tunnel and flight flutter tests 11 p1987 A69-25368

Aircraft structure geometry design for minimizing total mass concerning flutter requirements 11 p1989 A69-25493

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference 11 p1991 A69-25517

Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion 11 p1992 A69-25523

Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping 11 p1992 A69-25524

Collection of papers on aerodynamic flutter covering airfoils, flow theory, aircraft structures, etc 13 p2358 A69-27234

Numerical procedure to optimize complex structures by determining relative proportions of selected elements attaining flutter speed with minimum total mass 16 p2874 A69-32163

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium 17 p3058 A69-33317

Spacecraft booms thermally induced vibration and flutter, considering damping and solar exposure effects 22 p4043 A69-40545

Semiempirical stability boundary for flutter of simply supported cylinders for various length- radius and radius-thickness ratios 23 p4228 A69-41914

FLUX [RATE]

NT HEAT FLUX
NT MAGNETIC FLUX
NT SOLAR FLUX

Intensity ratio of first negative nitrogen band and oxygen line varies in auroral displays 02 p0235 A69-11425

Linear analysis of operation of multistage magnetron amplifiers using injected electron flux and stepwise varying dimensions of interaction space 03 p0407 A69-13977

Mixing effect on solar neutrino fluxes, assuming solar convective core with rapid thorough mixing 06 p1001 A69-17192

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays [IEEE PAPER 3C-4] 07 p1135 A69-19198

Electron flux parameters determination from ionograms and reflected signal amplitudes between 120-130 km, considering electron collision frequencies 10 p1688 A69-23931

Two beam electron flux instability in crossed magnetic and inhomogeneous electric fields using linearized hydrodynamic and Lagrangian formalism approximation 12 p2133 A69-26714

Simultaneous particle flux and VLF noise spectrum measurements by rocket sounding, discussing equipment, telemetry and calibration systems and experimental data 15 p2605 A69-31423

Kim-Anderson flux flow theory for materials with kappa nearly equal to 1, discussing pinning forces and sites 17 p3016 A69-33754

Diurnal variations of electron flux based on balloon observations near polar cap consistent with geomagnetic cut-off variations of magnetospheric models 22 p4005 A69-40511

Reentrant albedo flux and singly charged particles directional asymmetry in upper atmosphere estimated from oriented telescope observations over Hyderabad 22 p4005 A69-40519

FLUX DENSITY

NT CURRENT DENSITY

NT RADIANCE
NT RADIANT FLUX DENSITY
NT SOLAR CONSTANT
NT SOLAR FLUX DENSITY
NT SOUND INTENSITY

Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements 01 p0147 A69-11227

Free convective heat transfer in liquid filled spherical volume with constant thermal flux density at boundary 04 p0686 A69-14992

Flux equivalences of reflected and transmitted radiation among Rayleigh, isotropic and other scattering models 04 p0687 A69-15281

Acoustoelectric domain propagation in N-type GaAs, noting flux influence on peak acoustic density 05 p0806 A69-15815

High energy density lithium/dichloroisocyanuric acid battery system discharging under constant voltage and load conditions [ECS PAPER 15] 05 p0706 A69-16231

Energy flux into earth atmosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H 05 p0817 A69-16654

Frequency structure of pulse energy or pulsar intensity, emphasizing total energy density received per pulse 05 p0828 A69-16660

Lunar occultations of radio source Sagittarius A observed at various frequencies between 230 and 2400 MHz, obtaining diameter, position and decimeter band flux densities 06 p1009 A69-17960

Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air 07 p1150 A69-18937

Radio sources flux densities from fan beam survey using Molongo radio telescope compared to flux densities of Parkes catalog, presenting revised spectra 07 p1218 A69-19278

Errors estimation in determination of radio signal source flux density, position and recorded half power widths 07 p1088 A69-19722

Radio spectra of normal galaxies noting transition in spectrum 08 p1398 A69-20777

Fluorescer-photomultiplier mobile telescope for measurement of vertical cosmic ray intensity and equator points in atmosphere 09 p1493 A69-21420

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously
09 p1591 A69-21450

Cross-spectral density of pressure induced on lifting surface by isotropic atmospheric turbulence, solving integral equation
[ONERA-TP-681] 09 p1613 A69-21689

Corpuscular radiation contributions to D layer ionization determined from intensity measurements
09 p1577 A69-21770

Gamma ray luminosity of typical type I supernovae remnant computed by assuming Ni 56 radioactive decay energy origin of optical luminosity
09 p1581 A69-22409

Constant envelope threshold detection for establishing signal energy in presence of input noise power density variations
09 p1459 A69-22474

Anomalous Forbush decrease observations in November 1960 demonstrating cosmic ray flux anisotropy near earth
09 p1582 A69-22753

Satellite data on relative flux and group composition of heavy nuclei in primary cosmic rays
10 p1756 A69-22820

Absolute flux density of five radio sources and relative flux densities of 37 sources defining absolute flux density scale for Southern Hemisphere
10 p1772 A69-22857

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator
10 p1636 A69-23103

Earth currents and magnetic field variations recording in period range 10-200 sec, computing power density spectra on analog computer
10 p1682 A69-23593

Sagittarius A occultation by moon, determining peak brightness and flux density of radio source
11 p1958 A69-24592

Sound field generation by isotropic turbulence through finite strength shock, estimating acoustic energy flux from supersonic jet containing shock waves
11 p1872 A69-25130

Temperature variation and heat transfer in fins and relations between heat-flux-density and temperature difference
12 p2190 A69-25763

IR radiative temperature changes as function of latitude, season and height in region 30-110 km
12 p2064 A69-26008

Charged particles influx from cusp shaped regions of stagnant plasma trapped in vicinity of two magnetic cusps on polar magnetopause
12 p2151 A69-26945

Quasar spectra changes observed from 1962 to 1966 including flux density and antenna temperature for 3C 279 at cm wavelengths
12 p2167 A69-27043

Hydrogen to He ratio effect on stellar atmospheric structure, considering flux relations, UVB color indices, H line profiles, electron and gas pressures
13 p2339 A69-27562

Model atmosphere source function, mean intensity and flux by matrix methods
13 p2288 A69-27564

Night sky background observation by near IR radiation flux, using rocket-borne telescope and ground based equipment
13 p2342 A69-27600

Molecular gas flows in containers for space environment simulation, discussing flux distribution
13 p2241 A69-28081

Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity
13 p2314 A69-28446

Riometric data processing method for radio wave absorption measurement, considering nighttime cosmic radio emission intensity
14 p2436 A69-29056

Pulsar dispersion-removing technique, discussing pulsar mean flux density decrease with age
14 p2517 A69-29091

Pressure balance and maximum power density at evaporation from heat pipe experiments, deriving maximum heat flux densities
14 p2538 A69-29204

Radio observations of emission nebulae for flux densities, deriving electron temperature
[ASME PAPER 69-DE-46] 14 p2527 A69-29941

High energy gamma rays detection by balloon near geomagnetic equator, observing enhanced flux from galactic disk
15 p2675 A69-30695

Radiative energy transfer through nongray absorbing and emitting medium generating heat with graphical presentation of temperature distribution and flux
15 p2718 A69-31153

Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity
15 p2657 A69-31160

Solar wind speed transverse variation effect on cosmic ray intensity at earth analyzed using mathematical model
16 p2849 A69-32088

Aircraft measurements and computer calculations of downward and upward solar radiation fluxes related to albedo, altitude and sun angle
17 p3023 A69-33158

Shock waves propagation in inhomogeneous gases, considering time development and energy flux during point explosion in plane layers by quasi-stationary approximation
17 p2952 A69-33383

Saturn emission peak and flux density at 408 MHz determined by cross telescope, discussing mechanism for enhanced radiation at long wavelengths
17 p3041 A69-33813

Monochromatic energy flux measurement in H and forbidden lines of planetary nebulae indicating ionization level and optical depth
19 p3423 A69-36223

Heat flux densities and Reynolds potentials in turbulent boundary layer on heated flat plate with wall suction
19 p3452 A69-36722

Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves
20 p3582 A69-38242

Primary H nuclei flux and spectrum near geomagnetic equator, discussing emulsion stack exposure
22 p4005 A69-40520

Radio source Cassiopeia A flux density in terms of expanding radio source theory, noting frequency and time correlation with flux density changes
23 p4215 A69-42112

Extragalactic radio sources flux densities at 5009 MHz tabulated, ascribing accuracy variations to uncertainty in receiver gain and dish efficiency
24 p4382 A69-42922

Average meteorite flux at Martian surface estimated by generating flux distribution for Martian atmosphere top and adjusting for mass loss and deceleration
24 p4387 A69-43351

FLUX MAPPING

U MAPPING

FLUX QUANTIZATION

Methods and conclusions for rate of influx to earth of extraterrestrial material
03 p0511 A69-13467

FLUXES

Oxygen free fluxes for fusion welding titanium alloys, discussing weld structure and properties
06 p0930 A69-17093

Step cathodic flux cleaning of furnace brazed Al assemblies used in combination with ultrasonic and chemical conversion coating techniques
24 p4319 A69-42938

FLUXMETERS

U MAGNETIC MEASUREMENT

U MEASURING INSTRUMENTS

FLYBY MISSIONS

NT SWINGBY TECHNIQUE

Ebert spectrometric experiment during Mars flyby aimed at detecting upper atmosphere atoms, ions and molecules in 1100-4300 angstrom spectral range
[AAS PAPER 68-184] 02 p0311 A69-11469

Benefits accruing from swingby operation, considering space flights past Jupiter, Saturn and other planets
02 p0326 A69-12663

Planetary swingby theory mechanics and applications for optimization of interplanetary trajectories
02 p0331 A69-12818

Interplanetary transportation network involving numerous spacecraft on various planetary flyby trajectories, discussing integration of gravity thrust, braking and scramjet concept
03 p0511 A69-13402

Aeroshell structural development for Mars flyby and entry landing mission compatible with Atlas/Centaur launch vehicle
[AIAA PAPER 68-1159] 03 p0521 A69-13667

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet
05 p0823 A69-16042

Optimum low thrust interplanetary transfers involving swingby trajectory past intermediate planet analyzed, assuming impulsive velocity change at planet
06 p1006 A69-17572

Jupiter unmanned flyby probes trajectory and mission analysis, considering planetary gravitational field role for trajectory shaping and flight times
06 p1007 A69-17598

Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
13 p2354 A69-28504

Mars exploration by 1969 Mariner 6 and 7 flyby, discussing mission and instrumentation
18 p3201 A69-35141

Narrow angle high resolution TV camera design and testing for Mariner 6 and 7 Mars flyby missions, noting computer drawn spot diagrams
19 p3307 A69-35808

Mission windows for single and multiple planet swingbys past Jupiter to outer planets
[AAS PAPER 68-115] 19 p3402 A69-35936

Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data
19 p3267 A69-35940

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet
20 p3606 A69-37951

Spacecraft guidance analysis of multiple outer planet mission utilizing gravity assist swingbys to achieve planetary flybys with single spacecraft
[AAS PAPER 68-109] 21 p3761 A69-39205

Triple planet ballistic flybys, discussing mission opportunities and launch windows
[AAS PAPER 68-114] 21 p3805 A69-39206

Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets
[AAS PAPER 68-105] 21 p3805 A69-39221

Interplanetary periodic orbits and flyby dates for multiple Earth-Venus swingby missions, describing various iterative solutions for trajectory
[AIAA PAPER 69-931] 21 p3809 A69-39359

Halley Comet rendezvous mission, comparing low thrust mode with ballistic Jupiter or Saturn swingby mode
[AIAA PAPER 69-933] 21 p3809 A69-39360

Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] 21 p3809 A69-39361

Manned flyby/orbiter of Mars providing scientific information at low incremental cost
[AAS PAPER 69-180] 24 p4379 A69-42813

Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions
[AAS PAPER 69-258] 24 p4380 A69-42860

Reconnaissance missions for outer planets exploration, discussing spacecraft design constraints, multiple planet fly-by, planetary orbiter, etc
[AAS PAPER 69-291] 24 p4381 A69-42864

Space mission opportunities selection from analysis of short period comet perihelia, discussing flyby and rendezvous mission payloads
[AAS PAPER 69-320] 24 p4381 A69-42866

Mars and Venus flyby missions and Mercury planetary exploration plans, discussing future conditions permitting Jupiter, Saturn, Uranus, Neptune, Pluto flybys
24 p4384 A69-43137

FLYING PERSONNEL

NT AIRCRAFT PILOTS

NT ASTRONAUTS

NT COSMONAUTS

NT FLIGHT CREWS

NT SPACECREWS

NT TEST PILOTS

Electrocardiographic tests to study changes in electropotentials of heart in flying personnel after flight, noting changes in myocardium
03 p0378 A69-14207

Asthmatic attacks in military air crews, discussing flight stress factors including altitude, ventilation and insecurity as possible causes
05 p0710 A69-16624

Pulmonary mouth pressure and heart rate in Flack test for flight personnel by simultaneous double recordings
05 p0710 A69-16626

Corneal greyish opaque arc as warning of atherosclerosis in flight crews
05 p0711 A69-16631

Convective heat exchange coefficients for human organism in aircraft surroundings under homogeneous temperature conditions, deriving acclimatization equations [AGARDOGRAPH-111]
08 p1266 A69-20673

Amplitude variations in ULF ballistocardiograms of young normal airline stewardesses and applicants, discussing cardiovascular reactivity
09 p1444 A69-22544

Systolic murmurs and flight personnel evaluation, noting phonocardiographic definition and tracings of specific systolic murmurs
09 p1445 A69-22726

Parasitic calcifications of soft parts in flight personnel studied radiologically, noting filariasis, bilharziasis and worms
09 p1446 A69-22729

Aeronautical health service problems relating to efficiency of military and civil aviation personnel of all nations
12 p2023 A69-26490

Body composition of USAF flying personnel, evaluating obesity by using radioactive potassium /K-40/ method
14 p2409 A69-29295

Clinical data on ambulant airmen with complete left bundle branch block discovered on electrocardiogram, finding majority with evidence of organic heart disease
19 p3263 A69-36463

Vestibulometric test program for flight surgeon appraisal of flying personnel, emphasizing singling out persons prone to illusory sensations
20 p3473 A69-37277

Vestibulometric tests for flight surgeon appraisal of applicants in flying profession, comparing Coriolis forces cumulative load tests with conventional tests
20 p3481 A69-37278

In-flight illnesses in French Air Force, emphasizing psychological failures in etiology
21 p3666 A69-39270

Cardiovascular illnesses incidence among airline flight personnel, discussing coronary insufficiency detection
21 p3661 A69-39271

Aircrew fatigue and sleep loss factors, discussing transition through various time zones and flying through normal sleeping times
21 p3666 A69-39275

Jet flying effects on air hostess menstrual function, considering cycle length, duration, regularity, dysmenorrhea and flow severity
23 p4103 A69-41689

Aircrew Arctic survival situation simulation experiments with survivors staying close to aircraft and walking across difficult terrain from emergency location
23 p4088 A69-41810

Brain atrophy clinical diagnosis aided by biochemical analyses, including age frequencies and symptoms to control incidence among aviation personnel
23 p4089 A69-41816

Urinary lithiasis frequency among aircrews, reviewing etiology, symptomatology, therapeutics and prevention
24 p4267 A69-43388

Norms for quantitative vectorcardiography derived from statistical analysis of results from healthy young subjects, emphasizing medical evaluation of flying personnel
24 p4277 A69-43390

FLYING PLATFORM STABILITY
U AERODYNAMIC STABILITY

FLYING PLATFORMS

Remote sensing platform requirements for oceanographic and meteorologic observations, discussing orbital and aircraft platforms [AIAA PAPER 69-154]
06 p1044 A69-18122

Atmospheric measurements and experiments using aircraft as platforms, noting aircraft operation in severe weather, electrical supply problem and aircraft wake problem [AIAA PAPER 69-157]
06 p0869 A69-18153

FLYING QUALITIES

U FLIGHT CHARACTERISTICS

FLYWHEELS

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion
07 p1183 A69-19678

Numerical solution for changing satellite orientation within circular orbit plane by applying force of onboard flywheel
10 p1792 A69-24194

Space vehicle attitude stabilization based on rotating flywheel resistance to changes in rotation axis attitude, noting grease lubricated hydrodynamic bearing system
12 p2175 A69-26893

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization
13 p2357 A69-28476

Satellite three axis attitude control analysis showing rolling and longitudinal stabilization possibility by flywheel, with validity tested by analog simulation
17 p3048 A69-33240

Flywheels desaturated by magnetic action for optimizing stabilization system of satellite in circular orbit [ONERA-TP-732]
17 p3049 A69-33241

Satellite attitude stabilization synthesis by flywheels allowing independent control of angular motions, assessing perturbation type influence
21 p3768 A69-39831

FOAMS

Uniaxial strain static and gas gun compression tests result compared for syntactic foam
02 p0345 A69-12295

Inhomogeneous dielectric filling to simulate curvature in model earth-ionosphere waveguide
05 p0732 A69-16346

Foam carpet and airport equipment to prevent fires and explosions from retracted gear landings
10 p1674 A69-23708

Local failure of axially loaded plastic foam core sandwich panels, using face wrinkling analysis procedures
13 p2357 A69-27207

Syntactic foam low density thermoplastic microspheres as hollow spherical filler in polyester matrix, noting applications
14 p2467 A69-29285

Damping constant of sandwich samples with foam plastic filler subjected to torsional and flexural vibrations determined for aircraft design applications
17 p2993 A69-33942

Syntactic foam prepreg for low density laminate construction, presenting design and mechanical test data
19 p3353 A69-35512

Static mechanical strength of syntactic foam tested by generating failure conditions based on combined biaxial and triaxial stress [ASME PAPER 69-APMW-24]
24 p4336 A69-43095

Foamed liquid as potential coolants in rocket engine to overcome low efficiency and streaky coverage of conventional liquid film cooling
24 p4408 A69-43127

FOCUSING

NT DEFOCUSING

NT SELF FOCUSING

Ruby laser light beam self focusing in sodium chloride and potassium bromide crystals
03 p0438 A69-13051

Horizon focusing gain for radio waves reflected obliquely from ionosphere, noting effects of transmitter location and ionosphere geometry
03 p0395 A69-13627

Focusing of relativistic cylindrical electron beam in static axial electric and magnetic fields, using least action principle to derive trajectory differential equation
05 p0796 A69-15715

Astronomical two mirror telescope with aplanatic secondary focus, describing prime and secondary focus field correctors
05 p0761 A69-15733

Molecular and atomic beam focusing in electric and magnetic fields with helical symmetry of specified type
06 p0959 A69-16917

Directional mirror antenna parameters measurement by finite focusing of radiating element
06 p0895 A69-17453

Periodic electrostatic focusing structures in microwave tubes, evaluating properties by action function method
07 p1102 A69-18659

Focusing effect on far field directional pattern shifting of array normal, noting electronic scanning properties
08 p1285 A69-20400

Analog study of periodic permanent magnet focusing, considering ray equation, beam radius dependence on distance, amplitude variations, etc
08 p1285 A69-20555

Charged liquid droplets generator and acceleration through electric field for thrust vectoring, analyzing beam focusing and deflection [AIAA PAPER 69-283]
09 p1563 A69-21230

Double focus lens holography for diffusely reflecting surface deformation recording, discussing gas lasers, Polaroid photographic materials, etc
11 p1880 A69-24467

Power transmission efficiency between arbitrarily focused circular antennas with Gaussian amplitude illumination in Fresnel region for various phase illuminations and Fresnel numbers
11 p1851 A69-24991

Neutron emission anisotropies in capacitor discharge produced plasma focus, detailing coaxial plasma gun energy spectrum and flux measurement
11 p1930 A69-25321

Ruby laser light scattered at 90 degrees by dense plasma focus, analyzing signal detection
11 p1899 A69-25324

Holographic in-focus projection of images on three dimensional focal planes of arbitrary shape, noting moire pattern strain analysis
11 p1889 A69-25653

Double focalization in atomic hydrogen maser by hexapolar magnets selecting hyperfine energy transitions
12 p2105 A69-26050

Focusing factor in stratified medium with refractive index depending exponentially on height
12 p2029 A69-26100

Diode type image shutter tube with proximity focusing for high speed photography
12 p2083 A69-26145

Focusing power of hyperbolic gas lens for light beam waveguides, noting temperature distribution measurements and pole separation
12 p2107 A69-26392

Plasma lens device for focusing ion or plasma beams with closed electron drift
13 p2307 A69-27658

Forward and backscatter soundings compared to verify focusing mechanism of HF sky waves
14 p2435 A69-28967

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability
15 p2662 A69-30964

Angular structure of second optical harmonic for cylindrical lens focusing of ND laser beam into negative KDP crystal
17 p2981 A69-33110

Laser emission spatial structure transformation determined from ratio between focused spot radius and distance between lens and output mirror
17 p2981 A69-33111

Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
18 p3200 A69-34994

Spherical aberration effect on atomic beam focusing in six pole magnetic system
19 p3380 A69-36602

Perturbed ionospheric regions acting as radio wave focusing lens, discussing frequency, power and pattern selection
20 p3486 A69-37048

Directional mirror antenna parameters measurement by finite focusing of radiating element
20 p3508 A69-37938

Coherent light focusing by helicoidal guide- extension to particle focusing, discussing analogy between index distribution for classical optics and potential distribution for electronic optics
22 p3981 A69-40475

Focus broadening by astigmatism of large microwave parabolic antennas, discussing large span surface deformations caused by astigmatic aberration
23 p4140 A69-42188

FOG

Airport warm fog dispersal, discussing full scale aircraft seeding of polyelectrolyte materials, noting ground dispenser
01 p0054 A69-10149

Visibility improvement in warm fog by seeding with micron size hygroscopic particles, noting results for NaCl
01 p0111 A69-10696

Thermodynamics in homogeneous steady state fog over rough terrain representing absolutely absorbing surface

02 p0274 A69-11442

Evaporation rate measurements in fog during carbon dioxide laser radiation, obtaining correlation to describe visibility improvement

02 p0258 A69-12622

Polarization of laser radiation scattered forward and back in artificial fog and smoke

03 p0393 A69-13275

Temperature change and fog forecasting diagram modified by Swinbank relation in place of Brunt formula

03 p0462 A69-13965

Liquefied propane fog dispersal at Medford- Jackson airport, Oregon

04 p0585 A69-14918

Cloud and fog droplet spectra due to condensation of water vapor on nuclei solved by partial differential equation

12 p2126 A69-26017

Polarization of laser radiation scattered forward and back in artificial fog and smoke

14 p2410 A69-28783

Short laser pulses reflection from artificial fog and smoke, showing dependence on reflecting medium attenuation coefficient

15 p2562 A69-30077

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways [AIAA PAPER 69-670]

17 p2945 A69-33449

Visibility changes in fog at London airport determined by transmissometer records

18 p3167 A69-35266

He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns

21 p3738 A69-39118

F-5 cockpit fogging during low flights and dive bombing in South Vietnam attributed to hot humid weather, recommending cockpit temperature control and pilot diet

24 p4277 A69-43376

Angular distribution of He-Ne laser beam scattered by artificial fog from data by light detection devices at various angles

24 p4328 A69-43503

Electrical and optical properties correlation of air in fog, discussing droplets distribution with regard to dimensions

24 p4347 A69-43506

Air electrical conductivity reduction in fog ascribed to small ions concentration, increase in droplets capture efficiency and particle concentration

24 p4347 A69-43509

FOIL BEARINGS

Foil bearings design, fabrication, applications to flexible material transport, rotor support, etc

15 p2618 A69-30327

High speed rotors with air lubricated foil bearings, studying motion in pressurized and self acting modes

22 p3955 A69-40405

FOILS

Arbitrary stationary foil in perfect incompressible fluid moving at constant velocity at infinity assuming plane, steady and irrotational flow

08 p1303 A69-20272

FOILS [MATERIALS]

NT METAL FOILS

Beam-foil spectroscopy - NASA Conference, University of Arizona, November 1968, Volume I

03 p0470 A69-13160

Beam-foil spectroscopy problems noting light collection, spectrograph design, broadening of spectral lines by Doppler effect and other complications

03 p0470 A69-13161

Beam-foil spectroscopy above 5.5 Mev for multiply ionized atoms, noting use of Tandem accelerator, spectral resolution, beam intensity and Doppler effect

03 p0471 A69-13163

Beam foil spectroscopy for measuring wavelengths and spectral line intensities

04 p0595 A69-14276

Mean life measurement of excited ions electronic levels using beam foil light source, emphasizing beam particle monitoring and theoretical equations

04 p0595 A69-14278

Static beam deflection in beam foil spectroscopy for determining parent ionization stage of emitting ions

04 p0595 A69-14279

Surface density of carbon foils measured accurately by determining trapped carbon dioxide pressure after burning in pure oxygen

10 p1746 A69-23663

Outgassing rates of multifoil insulation materials for sealed vacuum systems measured over temperature range as function of pumping time

13 p2299 A69-28016

Circular curved foil steady oscillations near screen in semiinfinite space filled with incompressible fluid transformed into equivalent linearized problem

15 p2547 A69-30576

Electrostatically accelerated iron spheres interaction with thin metal and nitrocellulose foils to develop detectors for cosmic dust collection and recording

21 p3719 A69-38344

FOKKER BOND TESTERS

U ADHESION TESTS

FOKKER-PLANCK EQUATION

Random motion of particle with nonlinear damping, obtaining velocity spectrum by solving associated nonstationary Fokker-Planck equation and using equivalent linearization technique

04 p0561 A69-15454

Normal multimode laser action with and without phase locking, using exact steady state solution of Fokker-Planck equation

08 p1325 A69-20291

Density functions analytic solution for Fokker-Planck equation representing cascaded phase locked loops

09 p1474 A69-22450

Asymptotic solution for Fokker-Planck equation at low collision frequency, studying electron-ion collisions effect on universal instability in inhomogeneous plasma

11 p1930 A69-25358

Approximate solution of boundary value problems for Fokker-Planck equation to determine probability of exceeding limits in nonlinear automatic control systems

12 p2054 A69-26653

Mathematical model of mechanical wear in surface friction based on approximation of cross section profiles, using Fokker-Planck equation for distribution function

14 p2455 A69-29331

Galactic cosmic rays and Alfvén waves interaction, considering gyration frequency resonance, wave growth, Fokker-Planck equation and diffusion model

15 p2675 A69-30761

Elastic collision operator for relativistic Lorentz gas converted to differential form using Fokker-Planck limit for anisotropy segments

16 p2817 A69-31668

Fokker-Planck equation applied to probability density for finding rays larger than correlation distance during propagation in random medium

17 p2926 A69-33854

Kinetic equations for fully ionized plasmas and approximate derivation method for generalized Fokker-Planck equation including nonadiabatic effect

23 p4195 A69-41515

Fokker-Planck plasma collision equation derived from Boltzmann equation, Markov process and Liouville equation

23 p4195 A69-41516

FOLDING

Crimping method for preventing nuts loosening, discussing elliptical deformation and point crimp for obtaining maximum interference fits

22 p3957 A69-40828

FOLDING STRUCTURES

Testing program using electrical measurements for determining adequacy of erectable parabolic reflector for space missions

02 p0223 A69-12812

Foldable tubular connection application to expandable lattice structure, analyzing cross sectional distortions

06 p1024 A69-17608

Folding propotor VTOL aircraft configuration analytical and experimental investigations to study design requirements for cruise speeds to Mach 0-75 [AIAA PAPER 69-220]

10 p1635 A69-24087

Aluminum models of single cell simply supported folded plates to study instability phenomena possibly occurring in actual structure

15 p2709 A69-30679

Folding propotor V/STOL aircraft characteristics, showing configuration effects on performance and optimization of rotor, wing and propulsion systems [AHS PAPER 302]

17 p2901 A69-33547

Elastic stiffness, kinematically equivalent loads and initial loads due to initial strains of FUGA 6 element, describing program for matrices generation

19 p3447 A69-36852

FOLIAGE

Previsual detection of vigor loss and mortality signs in ponderosa pine trees subject to bark beetle attack

12 p2098 A69-26993

FOOD

Hydrogenomonas eutropha as means of protein food source independent of conventional agriculture for animal feed supplement

10 p1644 A69-23306

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months

13 p2212 A69-28624

Food-borne diseases prevention in civil aviation, reporting gastroenteritis cases during flight

24 p4278 A69-43392

FOOD INTAKE

Short latency antidiuresis following initiation of food ingestion by food deprived rats, noting possible signaling factor

01 p0014 A69-10860

Fiddler crab absorption of DDT residues from organic detritus in estuaries, discussing DDT residue entrance into diverse food chains

14 p2406 A69-28872

Space flight food evaluation by metabolic balance techniques during space flight simulation, considering food consumption during weightlessness

15 p2560 A69-31470

Human performance assessed by pulse rate increment at onset of exercise on bicycle ergometer and decrement during recovery after fasting

21 p3655 A69-38910

Pigeon accelerated performance patterns as function of contiguity of brief visual stimuli and food reinforcement, noting pattern absence during stimuli omission

23 p4081 A69-41436

Cerebrospinal fluid /CSF/ formation in male monkeys as function of fluid pressure at third ventricle level following temperature stress and feeding

23 p4084 A69-41469

Constant illumination intensity effects fixed ratio lever pressing behavior for appetitive reinforcement with chimpanzee in temperature and humidity controlled environment

24 p4260 A69-42702

FORBIDDEN BANDS

Astronomical needs for atomic spectra, discussing emissions in Wolf-Rayet lines and O-F stars and forbidden lines in absorption in sun and F-K stars

03 p0508 A69-13172

Electrical resistivity of sintered high melting point metal oxides, noting width of semiconductor forbidden band

03 p0445 A69-13570

Energy structure parameters for ZnTe-CdTe and ZnSe-ZnTe crystals, obtaining forbidden bandwidth dependence on composition

03 p0492 A69-14173

Forbidden resonance line of Ca II in Arcturus from spectrograms at widely different times of year

08 p1392 A69-20558

Continuum emission and forbidden lines in helium plasma in linear Z-pinch tube, noting plasma electron density

08 p1369 A69-20887

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation

10 p1769 A69-23901

Resonances in cross sections for electron impact excitation of forbidden lines in oxygen molecular ion at near threshold energies for astrophysical applications

11 p1921 A69-24417

Ca II forbidden lines in photospheric spectrum identified with weak Fraunhofer line by photoelectric spectrometer scans

14 p2528 A69-29962

Electronic states of semiconductor acceptor centers at forbidden band deep levels, considering inner electron shell excitation in impurity ion

15 p2665 A69-30039

Absorption band edge position in p type indium antimonide thin films after heating, showing forbidden bandwidth function relationship to film thickness

15 p2666 A69-30044

Frequency dependence of light absorption by excitons obtained for allowed and forbidden zone transfers in semiconductors

15 p2632 A69-30057

- GaAs zinc gallium selenide solid solutions properties, analyzing lattice constant, microhardness, forbidden zone and concentration relationships
15 p2670 A69-31050
- Fe II forbidden lines profiles and equivalent widths prediction for solar photospheric spectrum, deducing photospheric Fe abundance
16 p2854 A69-31652
- Vertical wind effects in atmosphere on 5577 A radiance, showing dependence on atomic oxygen density
16 p2778 A69-32185
- ZnS-CdS crystals luminescence during varied forbidden bandwidth, discussing two photon and ruby laser excitation and temperature dependence
19 p3331 A69-35866
- Forbidden lines in solar corona, discussing ionization equilibrium and excitation of levels in highly ionized atoms
19 p3422 A69-36216
- Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines
19 p3422 A69-36220
- Collisional excitation of forbidden lines in planetary nebulae from 5537/5517 intensity ratio measurements, noting density and intensity relationship
19 p3422 A69-36221
- Forbidden lines of O I, O II, S II, N II and A III in red and near IR spectra of NGC 1976, IC 418 and IC 4997
19 p3422 A69-36222
- Monochromatic energy flux measurement in H and forbidden lines of planetary nebulae indicating ionization level and optical depth
19 p3423 A69-36223
- Forbidden emissions in CH Cygni and VV Cephei noting symbiotic star
19 p3423 A69-36228
- Forbidden lines in slow nova RR Tel spectrum, comparing ionization rate with RR Pic
19 p3423 A69-36230
- Forbidden emission lines used to study interstellar gas, discussing gas ionization, neutral hydrogen, calcium lines, etc
19 p3424 A69-36235
- Forbidden emission lines in spectra of normal, radio and Seyfert galaxies and quasars, giving information about quasi-stellar mean densities, temperatures, ionization, etc
19 p3424 A69-36236
- WY Gem star spectroscopic observation showing peculiarity about forbidden and absorption spectra superposition
20 p3598 A69-37464
- Invalidity of Pagel method for intrinsic and interstellar reddening for peculiar objects, discussing excitation mechanism for forbidden lines of ionized Fe for Eta Carinae
21 p3815 A69-39616
- Power per unit volume of UV and forbidden lines emitted by ionized C, N, O and Ne as function of electron temperature and density
22 p3984 A69-40157
- Forbidden absorption bands of diatomic O in Ar continuum region, determining rotational constants of upper electronic states
22 p3896 A69-40479
- Photoionization model of Seyfert galaxy extended to calculate temperatures, luminosities and sizes of zones emitting forbidden Fe X /6374 A/ and Fe XIV /5303 A/
22 p4024 A69-40581
- Forbidden O I 5577 A dayglow emission equatorial measurements with rocket photometer, discussing altitude profiles and excitation mechanism
24 p4314 A69-43005

FORBIDDEN TRANSITIONS

- Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions
01 p0123 A69-10620
- Solar Fe abundance from photospheric permitted Fe and forbidden Fe II lines, noting equivalent widths of two Fe II lines
03 p0515 A69-14036
- Planetary nebulae NGC 7662 and IC 418 forbidden line spectra compared with computer model predictions, noting evidence for dynamical effects and filamentary structure
06 p1009 A69-17963
- Forbidden S I lines due to transitions within ground configuration identified in Fraunhofer spectrum of sun, noting photospheric abundance of S
07 p1217 A69-19237
- Hartree-Fock calculations of coronal forbidden transition lines in Ar I isoelectronic sequence, obtaining

wavelengths, magnetic dipole and electric quadrupole transition probabilities
08 p1385 A69-20071

Diffuse interstellar absorption bands and doublet line, noting large intensities of forbidden transitions
08 p1395 A69-20639

Present state of abundance determination in solar corona, discussing forbidden and UV lines analysis
08 p1402 A69-20907

Physical conditions in nuclei of various Seyfert galaxies deduced from line intensities, noting permitted and forbidden lines formation in different regions
09 p1596 A69-22056

Helium I line profiles including forbidden component, discussing electron and ion Stark broadening and thermal Doppler broadening
09 p1601 A69-22209

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions
09 p1559 A69-22648

Forbidden solar corona lines transition probability in vacuum UV region
12 p2157 A69-26334

Forbidden NI transitions in nighttime upper atmosphere observed with Fabry-Perot spectrometer
14 p2440 A69-29120

Forbidden transition probabilities of solar corona lines in vacuum UV range
14 p2519 A69-29355

Forbidden transitions in stellar spectra - Conference, Liege, Belgium, June 1968
19 p3420 A69-36211

Celestial spectra forbidden lines tabulated by element and ionization stages, describing laboratory spectrum analysis programs
19 p3421 A69-36212

Forbidden transitions in diatomic molecules with nonzero spin and zero orbital angular momentum, stressing application in outer planets and M stars hydrogen spectra
19 p3421 A69-36213

Forbidden atomic transitions involving metastable species in upper atmosphere, tabulating permitted and forbidden molecular band systems
19 p3421 A69-36214

Forbidden transitions in absorption spectra of sun and normal and peculiar stars
19 p3422 A69-36215

Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
19 p3422 A69-36219

Electron density and electron temperatures determination in planetary nebulae, using maximum number of observed forbidden transitions
19 p3423 A69-36224

Forbidden emission transition probabilities in high excitation symbiotic stars, novae, Cygni stars and peculiar binaries
19 p3423 A69-36227

Forbidden transitions in emission line spectra of variables near minimum light, finding origin in hot chromosphere
19 p3424 A69-36232

MH alpha 328-116 spectral characteristics noting weak continuum, emission lines from forbidden transitions and absence of absorption
19 p3424 A69-36233

Helium sequence ions spin forbidden transitions electric dipole oscillator strengths and transition probabilities evaluated by variational procedure
20 p3577 A69-38171

Electron and ion Stark broadening of allowed and forbidden, triplet and singlet transitions in neutral He at low electron densities, noting Doppler broadening
22 p3985 A69-40665

FORBUSH DECREASES

- March 1966 Forbush decrease observed in underground meson component at 70 mwe compared with neutron and sea level meson intensity variations
01 p0146 A69-11129
- Anisotropies in Forbush decreases in March 1966, noting dependence on interplanetary magnetic field structure
06 p0990 A69-17290
- Recurrent Forbush decrease association with proton enhancement, discussing energetic storm particle events
09 p1582 A69-22752
- Anomalous Forbush decrease observations in November 1960 demonstrating cosmic ray flux anisotropy near earth
09 p1582 A69-22753

Satellite data on galactic cosmic ray variations near magnetosphere and in interplanetary space, discussing Forbush decreases
10 p1756 A69-22819

Forbush decreases spectra in low energy region from satellite measurements of neutron and hard component of cosmic rays
10 p1758 A69-22829

Forbush effects energy spectra and cosmic ray anisotropy beyond magnetosphere analyzed during solar activity minimum, using data from neutron monitors global network
10 p1758 A69-22835

Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration
10 p1759 A69-22840

Time dependence, anisotropy and spectral composition of cosmic radiation generated during series of flares during July 5-20, 1966 by Pioneer 6 observations
10 p1768 A69-23769

Forbush decrease associated with July 7 1966 proton event from cosmic ray intensity variation measurements by neutron monitors
10 p1768 A69-23774

Muonic component diurnal wave trains at 70 mwe during cosmic ray decreases, discussing Forbush decay as result of shock front advance
14 p2511 A69-28962

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity
14 p2512 A69-29044

Frequency distribution of sudden cosmic ray intensity increases, considering Forbush phenomenon
14 p2514 A69-29773

Geomagnetic storms and Forbush decreases accounted for by interplanetary solar corpuscular streams effects described by interplanetary magnetic field structure, noting independence of flares
18 p1817 A69-34937

Stream structure in interplanetary magnetic field during 1966, analyzing geomagnetic activity and solar particles and Forbush decrease anisotropy
18 p3199 A69-34938

Charged particle acceleration in interplanetary plasma from analysis of cosmic ray intensity increases accompanied by SC magnetic storms and Forbush effects
21 p3788 A69-38587

Short lived Forbush decreases, discussing phase differences between stations due to asymptotic directions changed by geomagnetic field and spatial anisotropy
23 p4204 A69-41480

Geomagnetic disturbances relations to cosmic ray diurnal variation phase and amplitude, including Forbush decreases
23 p4204 A69-41483

FORCE

- Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants
17 p3068 A69-34230
- Force maintaining rigid inclusion embedded in elastic plate with rigid boundaries
23 p4235 A69-42465

FORCE DISTRIBUTION

- Forced oscillations of unbalanced rotor on elastic bearings with nonlinear characteristics investigated for resultant forces and amplitude using motion equations
01 p0170 A69-10824
- Stress transfer from loaded matrix to single fiber in composite materials determined by series and step formulations
01 p0172 A69-11271
- Electric field influence on fluid oscillation modes for Korteweg-Helmholtz force density on incompressible dielectric liquid immersed in electric field
04 p0591 A69-15504
- Accuracy of deformation theory in case of simple loading, analyzing external forces under conditions not satisfying loading theorem
07 p1237 A69-19684
- Multicomponent force transducer for measuring track generated forces acting on rocket sled, discussing combined load and vibration tests [ASME PAPER 69-VIBR-21]
10 p1698 A69-24168
- Bending of weightless thin elastic beams clamped to circular template by external force
12 p2181 A69-26572

Macroscopic crack extension force, critical flaw size and minimum fracture strength calculated from microscopic quantities

13 p2275 A69-27227

Galactic force law from observed stellar velocity and space density distribution

13 p2348 A69-27802

Accelerated boundary layers classified in terms of integral balance of pressure, inertia, wall friction forces and entrainment momenta [AIAA PAPER 69-666]

17 p2955 A69-33462

Forced oscillations of resonance machine elements represented by truss of concentrated masses and external forces, taking into account aerodynamic energy dissipation

17 p3064 A69-33916

Side force problem for shallow helicoidal shell, shown as static geometric analog of pure bending problem, solved by applying duality [ASME PAPER 69-APM-11]

18 p3213 A69-34387

Force on circular plate near screen due to incident potential incompressible jet flow

19 p3297 A69-35816

Monograph on forces exerted by air during yawing motion of sharp cones in supersonic and hypersonic flows by semilinear method

20 p3460 A69-37919

Forces on stationary cylinder under sinusoidal flow, considering symmetrically located vortex pairs and flowfield [ASME PAPER 69-FE-13]

21 p3643 A69-38601

Forces on aircraft during ground roll with slick runway surface and cross wind for deceleration and control on ground [SAE PAPER 690375]

23 p4062 A69-41652

Force acting on multipole in external magnetic field, noting dependence on multipole axes

23 p4158 A69-42172

Gas concentration liberated during each revolution in atmospheres of short period comets to explain impulsive forces upon nuclei, noting diatomic carbon density

23 p4221 A69-42387

FORCE FIELDS

U FIELD THEORY [PHYSICS]

FORCE-FREE MAGNETIC FIELDS

Force free magnetic fields and solar filaments, describing model for explaining filament characteristics

02 p0329 A69-12787

Composition effect of flight path measurements on correction of space vehicles flight path, discussing single parameter correction of motion in force free field

07 p1178 A69-19607

Force-free magnetic field integral properties, obtaining rate of decrease limitation via virial theorem

11 p1951 A69-24239

FORCED CONVECTION

Heat transfer rates from high temperature spheres into subcooled liquid sodium during forced convection, noting surface vapor formation [ASME PAPER 67-WA/HT-32]

02 p0351 A69-12202

Turbulent transport of energy in atmospheric boundary layer near earth surface resulting from forced convection

04 p0627 A69-15087

Forced convection heat transfer coefficient invariance to flow reversal in Stokes and potential streaming flows past isothermal particles of arbitrary shape

04 p0590 A69-15274

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number [ASME PAPER 68-WA/HT-5]

05 p0846 A69-16116

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20]

05 p0847 A69-16123

Simultaneous natural and forced convection flow around wall, analyzing perturbations of hydrodynamic elements due to obstacle

06 p1030 A69-17095

Heat exchangers in cryogenic fluids in free and forced convection, discussing measurements in liquid H, D, Ne and N

08 p1420 A69-19914

Acceleration effects on forced convection in turbulent boundary layer, noting heat transfer history and rates prediction

09 p1480 A69-21480

Horizontal surface heat transfer coefficient under simultaneous free and forced convection calculated as function of temperature head, air flow velocity and area

10 p1810 A69-24085

Forced heat convection in steady turbulent air flow in circular cross sectioned tubes, noting laminar sublayer in wall regions

11 p2000 A69-25096

Oxygen effects in Type 316 stainless steel, Nb-Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates

12 p2112 A69-25943

Forced convection in atmospheric boundary layer above nonuniformly heated earth surface, noting roles of wind and stratification parameters

12 p2126 A69-26579

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number [ASME PAPER 68-WA/HT-5]

13 p2374 A69-27781

Liquid fuel droplets combustion under free and forced convection noting combustion rate

15 p2719 A69-31174

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20]

17 p3068 A69-32902

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel

19 p3380 A69-36304

Forced convection liquid flow past heated flat plate with variable viscosity and thermal conductivity, analyzing velocity and temperature distribution in boundary layer

22 p4051 A69-40685

Forced convection heat transfer coefficient for fully developed turbulent flow in circular tube with time-varying circumferential heat flux

22 p4051 A69-40921

Gaseous absorption cell variable attenuator for carbon dioxide laser radiation at specific wavelength, using forced convection to eliminate thermal defocusing effects

23 p4172 A69-41396

Induced convection effect on peak pool-boiling heat flux under variable gravity, pressure and size conditions and various boiled liquids

24 p4409 A69-43516

Laminar flow in horizontal circular tubes with uniform heat flux, analyzing combined free and forced convection effects on secondary flow

24 p4409 A69-43519

24 p4409 A69-43519

24 p4409 A69-43519

24 p4409 A69-43519

24 p4409 A69-43519

24 p4409 A69-43519

Dynamic response of anisotropic circular cylinders to uniformly distributed pressure varying periodically with time analyzed using Laplace transformation

09 p1611 A69-21440

Generalized orthogonality principles and expansion schemes for forced response of partial differential equations, noting applicability to rodlike structures

09 p1533 A69-21975

Forced vibrations in semibounded elastic bar with various moduli of elasticity, discussing reversing longitudinal force and elastic waves propagation

10 p1799 A69-23155

Forced vibrations of elastic beam covered by viscoelastic layer subjected to transverse harmonic excitation

10 p1800 A69-23241

Forced torsional vibrations of turbine blades calculated by computer using mathematical models for resonance frequencies and tangential stresses

10 p1803 A69-24076

Longitudinal vibrations induced by internal flow in metal bellows resembling vortex shedding excitations of elastically restrained cylinders, discussing spring mass mechanical model [ASME PAPER 69-VIBR-5]

10 p1805 A69-24163

Superimposed tool vibration function in deep drawing, ironing and cold forging, discussing equipment instrumentation, emphasizing dynamic force measurement [ASME PAPER 69-VIBR-8]

10 p1700 A69-24164

Mechanical model for oscillatory motion of solid body in Newtonian central force field

11 p1919 A69-25179

Amplitudes of forced bending vibrations of frames with superfluous elastohysteretic couplings by dynamic compliances method

11 p1986 A69-25333

Forced discontinuous vibrations of liquid in conduit experimentally analyzed, discussing test devices and procedures

11 p1875 A69-25485

Viscous flow-induced vibrations of elastically restrained flat plates in narrow channel, considering one dimensional viscous flow theory

11 p1991 A69-25515

Zero Gaussian curvature rib reinforced shells free oscillations reduced to nonreinforced shell forced oscillations under cyclic loads

12 p2177 A69-25996

Self and forced oscillations in multivariable relay control system, considering relays with hysteresis and dead band and stability of periodic states

12 p2049 A69-26084

Monograph on nonlinear servosystems covering nonlinearity with/without inertia, self oscillations, linearization by forced oscillations, stability theorems and Liapunov function choice

12 p2054 A69-26966

Torsional oscillation of cylindrical shell of non-homogeneous material under periodic shearing force

13 p2361 A69-27462

Vibrating camera for photographic measurement of flow velocities and trajectories of bodies marked by light spots

13 p2261 A69-27913

Free and forced vibrations of elastic layer, using iteration procedure based on asymptotic integration of linear theory of elasticity dynamic equations

13 p2363 A69-28126

Differential equations of single loop parametric amplifier response, analyzing forced oscillations

13 p2234 A69-28329

Bladed disk assemblies vibrational properties, discussing dynamic characteristics of system with pairs of close natural frequency modes under forced vibration

15 p2704 A69-30304

Finite integral transform determination for solving circular plates forced vibrations with time dependent conditions

15 p2704 A69-30306

Laminar thin orthotropic cylindrical shells natural and forced oscillations and dynamic deflection coefficient

15 p2715 A69-31202

Boundedness in mean square of solutions derived for linear differential equations forced oscillations with nonwhite Gaussian random functions parameters

16 p2873 A69-32058

Forced oscillations of three layer plate used as vibration dampers for engine components

16 p2873 A69-32143

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system
16 p2813 A69-32284

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency
16 p2813 A69-32285

Amplitude maxima for nonstationary oscillations of dynamic system with multiple degrees of freedom
16 p2876 A69-32296

Forced oscillations of resonance machine elements represented by truss of concentrated masses and external forces, taking into account aerodynamic energy dissipation
17 p3064 A69-33916

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem
17 p3064 A69-33917

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization
[AIAA PAPER 69-755] 18 p3084 A69-34411

Forced vibration testing of complex continuous systems, demonstrating suppression of certain resonant frequencies due to laboratory techniques
18 p3114 A69-34422

Periodic motions in single mass impact vibration system by point transformations method, noting complexity characteristics
18 p3172 A69-34565

Parametric and forced oscillations analogy for analyzing dynamic behavior of oscillatory systems with time dependent parameters
18 p3175 A69-35322

Linear oscillations of sphere in compressible viscous fluid with slip at surface, noting drag variation
19 p3297 A69-35836

Vibrational displacement phase measurement by Michelson interferometer with laser source
20 p3538 A69-37320

Monograph on frequency response characteristics of mechanical oscillator chains, calculating forced vibrations in linear systems
20 p3577 A69-37920

Tensional and torsional forced vibration tester for viscoelastic plastic materials under tensile strain
21 p3720 A69-38591

Combination resonance and instability regions of second type for parametrically excited oscillations with nonlinear/cubic/damping
23 p4230 A69-42107

Rigid shaft dynamics in hinged and elastic bearings, eliminating inaccuracy by limiting analysis to forced vibration
23 p4171 A69-42483

Real space-time Green functions applied to turbulence induced infinite thin elastic plate vibration, analyzing mechanical dissipation effects
24 p4395 A69-42597

Forced symmetrical vibrations of circular elastic plate analyzed by applying Gaussian hypergeometric, Legendre functions and Jacobi polynomial
24 p4397 A69-42746

Asymmetric dynamic response to free and forced vibrations of thin membrane shells at given stress state due to previous loads
24 p4399 A69-42990

Cylindrical shell with supersonic nozzle end, describing axisymmetric oscillations forced by burning filler in gas stream
24 p4300 A69-43073

Forced parametrically excited periodic vibration of finite length plate in plane supersonic flow, considering periodic forces applied at edges
24 p4407 A69-43733

FOREARM

Rheography of blood circulation of forearm after tightening with pneumatic cuff, analyzing amplitude increase and information about vascular system
21 p3653 A69-38838

Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber
22 p3878 A69-40834

Forearm skin capacity vessels tonus as function of intrapulmonary pressure during positive and negative pressure breathing
23 p4093 A69-42068

FOREBODIES

NT ABLATIVE NOSE CONES
NT NOSE CONES

NT NOSES [FOREBODIES]
NT ROCKET NOSE CONES

Flow field for single or multiple jets firing forward into oncoming supersonic free stream, noting effect of forward extending cylindrical body
[AIAA PAPER 69-69] 06 p0864 A69-18164

C-5 engine inlet development, presenting two phase nacelle forebody and five phase model tests, scale corrections inlet/cowl optimization and prototype tests
[ASME PAPER 69-GT-52] 09 p1570 A69-22481

FORECASTING

NT LONG RANGE WEATHER FORECASTING
NT NUMERICAL WEATHER FORECASTING
NT PERFORMANCE PREDICTION
NT STATISTICAL WEATHER FORECASTING
NT WEATHER FORECASTING

Geomagnetic disturbance activity forecasting method using solar coronal streams, noting reliability of test forecasts
01 p0150 A69-10372

Long range management forecasting by Delphi technique, describing expert panel selection, composite group replies and successive revisions
01 p0180 A69-11250

Technological forecasting role in company growth planning via Delphi technique
06 p1044 A69-17871

Gravity gradient stabilization role in space missions in 1970s and 1980s
07 p1229 A69-18348

Solar activity forecasting methods
10 p1777 A69-23312

Design management in next century covering computer methods, market needs, etc
11 p2004 A69-24371

Technological forecasting by intuitive forecasts, consensus methods, analogy, trend extrapolation and structural models
13 p2382 A69-28040

Solar activity forecasting methods based on sunspots and flares
13 p2333 A69-28657

Delphi technique of technological forecasting used for R and D planning
20 p3639 A69-37353

Top-down initiating technique for forecasting future decade major systems requirements based on information progression
[AAS PAPER 69-409] 24 p4417 A69-42803

Air traffic growth forecasting, describing various mathematical econometric models
[AAS PAPER 69-329] 24 p4417 A69-42807

Technological forecasting as aid to aerospace planner in optimizing R and D resources allocation
[AAS PAPER 69-105] 24 p4417 A69-42819

Solar activity long term forecasts determined from comparison between Mount Wilson magnetic field synoptic chart latitude zones and sunspot groups
24 p4374 A69-43625

Interplanetary and geophysical conditions forecast- ing based on repetitions of low latitude photospheric background magnetic field patterns during solar activity cycles
24 p4387 A69-43626

FORECASTS

U FORECASTING

FOREHEAD

Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer
[AGARDOGRAPH-111] 08 p1266 A69-20677

FOREIGN POLICY

U INTERNATIONAL COOPERATION

FORESTS

Avionics in forest resource inventories management, noting design of radar altimeter for low level aerial photography
01 p0080 A69-10352

Aerospace research applications in agriculture and forestry, discussing information acquisition for worldwide coverage
[UN PAPER 68-95393] 01 p0065 A69-10504

Remote sensing and forest survey sampling designs, discussing nonstereo stratification, conventional photography and IR or radar imagery
12 p2097 A69-26991

Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra
12 p2131 A69-27072

Agricultural and forestry applications of tethered balloons, discussing observation angle effect on spectral signature response and signal preprocessing
22 p4053 A69-40805

Earth orbital remote sensing applications to forest and range resources management, discussing conventional aerial photography
[AAS PAPER 69-059] 24 p4307 A69-42823

FORGING

Cold drawing workability of Nb, Mo and Ta using dies with lubrication for metal sheets
03 p0452 A69-14124

Large hydraulic press forgings for light metals, discussing 50,000 ton machine used for Al alloys, tooling and die considerations
[ASM PAPER C7-5.1] 04 p0604 A69-14521

Hydraulic press large closed die forging of various alloys and refractory materials, evaluating mechanical and metallurgical problems
[ASM PAPER C7-5.4] 04 p0604 A69-14521

Closed die development for forging very large and complex parts to meet needs of high Mach aircraft
04 p0604 A69-14523

Fatigue strength of gears with integrally forged, cut and ground teeth, discussing pancake forgings
[SAE PAPER 680632] 08 p1321 A69-20732

Forging techniques for forming Be into cylinders, rings, shafts and disks, investigating controlled texture forging for turbine engine components
09 p1504 A69-22073

Structural inhomogeneity of Ti alloys cause increased susceptibility to production of sheets, forgings and drop forgings
11 p1902 A69-24276

Cast and forged steel mechanical properties noting starting materials and production methods roles in cast steel improvement
11 p1904 A69-24644

Ti alloy forgings production for optimal mechanical properties by cross section and structural condition selection and avoidance of oxygen, nitrogen and hydrogen pickup
16 p2801 A69-31785

Forge to determine refractory metals formability and ductility at high temperature in protective pressure
17 p2945 A69-33419

Plane strain forging of pure Al and Al-Cu alloy at low strain rates and elevated temperatures, in constant velocity compression test
17 p2979 A69-34137

Ti structural components for forgings, noting problems facing die-forging industry and machining equipment
21 p3728 A69-38459

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc
[ASM PAPER GG-8-3-3] 21 p3745 A69-38929

Ti-Al-V forgings macro/prior beta/ grain size and in-process thermal treatment effects on fatigue life
[AIME PAPER S69-2] 21 p3732 A69-39470

Ti alloy aircraft components and equipment production, considering roles of temperature, deformation rate and thermal conductivity in drop forging and extrusion processes
[DGLR-69-003] 23 p4170 A69-42162

FORM

U SHAPES

FORM PERCEPTION

U SPACE PERCEPTION

FORMALDEHYDE

Sterilization without damage by mixing steam and formaldehyde at 80 C under subatmospheric pressure, noting thorough penetration
05 p0713 A69-15946

Molecule reorientation and transition probability in molecular beam maser using formaldehyde
07 p1158 A69-19760

Aluminum effect on ammonium percholate/ polyformaldehyde mixtures combustion properties noting heat transfer decrease into k phase
08 p1375 A69-20338

Interstellar formaldehyde detection in absorption against galactic and extragalactic radio sources, discussing chemical evolution
10 p1786 A69-24108

Total gasification heat measurement during pyrolysis of polymethyl methacrylate and paraformaldehyde, discussing method and calorimetric equipment
17 p3069 A69-33133

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud
22 p4029 A69-40768

Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis,
22 p4029 A69-40768

- discussing spectrum analysis of radio astronomical telescope observations
23 p4220 A69-42376
- FORMAT**
Flexible format generator for manned spacecraft data management system designed with memory for data sampling formats, emphasizing software counters and power strobing
23 p4133 A69-41762
- FORMATES**
U CHLOROFORMATE
- FORMATION HEAT**
U HEAT OF FORMATION
- FORMIC ACID**
Formic acid catalytic action on sterilizing effectiveness of ethylene oxide
05 p0713 A69-15945
- FORMING TECHNIQUES**
NT AUSFORMING
NT BLANKING [CUTTING]
NT CASTING
NT COINING
NT COLD ROLLING
NT COLD WORKING
NT ELECTROFORMING
NT EXPLOSIVE FORMING
NT EXTRUDING
NT FORGING
NT HOT WORKING
NT INVESTMENT CASTING
NT MAGNETIC FORMING
NT METAL DRAWING
NT PRESSING [FORMING]
NT PROPELLANT CASTING
NT ROLL FORMING
NT SLIP CASTING
Fabrication of large parts in aircraft and space industry, discussing extrusion, forging, explosive forming and diffusion bonding
01 p0088 A69-11400
Shot impact shaping of parts made of monolithic panels, relating curvature of profile to parameters of process
03 p0433 A69-12963
Tubular metal parts and assemblies, discussing flaring, forming, beading, tapering and step drawing
03 p0435 A69-13918
Diffusion bonding and forming of large and complex Ti structures, noting advantages in freedom of design and in economy
[ASM PAPER C7-2.3] 04 p0604 A69-14525
Titanium hot forming and sizing die fabrication concepts for aircraft structures
[ASM PAPER D8-26.1] 07 p1143 A69-19671
Pressure formed parabolic reflectors for millimeter waves, discussing electrical measurements at 30 GHz
08 p1282 A69-20039
Glass science and technology noting optical, electrical and mechanical properties, forming techniques, structure, ionic properties, high pressure effects and glass ceramics
08 p1341 A69-21126
Metal castings around ceramic cores for economic manufacture of jet engines
09 p1503 A69-21907
Forging techniques for forming Be into cylinders, rings, shafts and disks, investigating controlled texture forging for turbine engine components
09 p1504 A69-22073
Whisker metal matrix composite fabrication, discussing aligned whisker distribution without degrading strength or fracturing and detailing extrusion process
09 p1511 A69-22361
Superimposed tool vibration function in deep drawing, ironing and cold forging, discussing equipment instrumentation, emphasizing dynamic force measurement
[ASME PAPER 69-VIBR-8] 10 p1700 A69-24164
Aspherical surfaces formation from spherical by removing part of substrate by means of tool mask for lapping nonuniform wear of surface
12 p2102 A69-26597
Slow forming forging and extrusion required for Ti alloys, discussing mechanical properties as function of beta transformation temperature
16 p2793 A69-31786
Forge to determine refractory metals formability and ductility at high temperature in protective pressure
17 p2945 A69-33419
Forming and heat treatment process for stainless steel pressure containers using liquid N, discussing austenite-martensite transformation role
18 p3161 A69-34605
- Stiffened integrally formed panel stability evaluation based on compression structural efficiency and manufacturing costs
[AIAA PAPER 69-760] 19 p3434 A69-35660
Electrochemical dimensional machining of metals and alloys with rotating cathode in parts manufacture from mechanically intractable materials
23 p4168 A69-41309
Forming techniques to overcome pressing behavior of maraging steels, noting tendency to thin during stretching and reluctance to stretch
23 p4170 A69-42157
Explosive forming theory and experience including explosives characteristics, dimensional relations, hold-down pressure, economics and applications
24 p4320 A69-43038
- FORMULAS [MATHEMATICS]**
Transposition formula for finite displacements of solid body having fixed point relative to fixed axes
18 p3172 A69-34589
Natural coordinates in finite element method, giving formulas for straight or curved element analysis and polynomial integration
23 p4182 A69-41901
Formulas for discriminant and regressive weather analysis for computer calculations under operational weather forecasting conditions
23 p4184 A69-42490
- FORTRAN**
JFIP computer language /Jet Propulsion Laboratory FORTRAN language with Intervals Preprocessor/ for extending FORTRAN 4 to utilize subroutines performing interval arithmetic
01 p0036 A69-10710
FORTRAN Deductive System to find solutions to theorem proving problems, discussing computer implementation
01 p0037 A69-10806
System/360 Continuous Modeling Program, detailing input language, user-defined functions and documentation
05 p0723 A69-16196
Book on FORTRAN computer programming language
06 p0891 A69-17364
Argon plasma composition in Saha equilibrium, using FORTRAN 4 program
07 p1193 A69-19168
Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures
08 p1278 A69-20154
Numerical methods for solving steady state and transient heat transfer problems suitable for high speed digital computer
13 p2376 A69-28141
Polygonal approximation to functional equation solution by using search algorithms, listing FORTRAN IV programs
15 p2644 A69-30424
FORTRAN program for calculation of magnitude and phase of digital filter transfer functions and power spectra of periodic waveforms
15 p2567 A69-30612
FORTRAN computer program for quality control and calculation of total ozone measurements and lamp tests for Dobson ozone spectrophotometer
16 p2787 A69-32644
Man-computer interactive Terminal Interface System /TITS/ compatible for programming graphics, character scopes and typewriter using FORTRAN
[AIAA PAPER 69-955] 22 p3905 A69-40337
- FORWARD SCATTERING**
Forward and backward scattered modes over frequency range in multimode nonuniform waveguide, transforming coupled modes telegraphist equations into Volterra equations
01 p0043 A69-10621
Polarization of laser radiation scattered forward and back in artificial fog and smoke
03 p0393 A69-13275
Hologram form of forward scatter bistatic radar or sonar
07 p1078 A69-18866
Forward scattering of metastable and ground state argon atoms after argon ion-atom charge transferring collisions, discussing excitation resonances
08 p1354 A69-19809
Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity
09 p1453 A69-21525
Polarization of laser radiation scattered forward and back in artificial fog and smoke
14 p2410 A69-28783
- Forward and backscatter soundings compared to verify focusing mechanism of HF sky waves
14 p2435 A69-28967
Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity
16 p2754 A69-32520
Two polarization light interference scattered by moving and fixed atoms, obtaining forward scattered light intensity
17 p3005 A69-33109
Plane wave scattering by semiinfinite turbulent dielectric slab, using Born approximation to develop asymptotic series for stochastic components of forward scattered field
[OSA PAPER WH-16] 18 p3174 A69-35245
- FOSSIL METEORITE CRATERS**
U FOSSILS
U METEORITE CRATERS
- FOSSILS**
Etching techniques for revelation and viewing of fossil charged particle tracks in meteoritic and terrestrial minerals
02 p0245 A69-12569
Energy spectrum of Fe group heavy nuclei from fossil track densities depth variation in hypersthene and oligoclase crystals from meteorite Saint-Severin, noting ablation
19 p3410 A69-36095
Densities and angular distributions of fossil tracks in meteorites produced by slowing down heavy primary cosmic ray nuclei
19 p3410 A69-36096
Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes
20 p3590 A69-37568
Paleozoic plant fossils carbohydrate content
21 p3669 A69-39333
Carbohydrate analyses of upper carboniferous plant fossils in England, noting monosaccharides separation
21 p3661 A69-39534
Amino acid components in paleozoic plant fossils and rock samples noting glycine, serine and glutamic acid
21 p3662 A69-39535
Prokaryotic and eucaryotic nanofossils localized in prePaleozoic microflora, noting radiometric age and association with stromatolites
22 p3935 A69-40052
Microstructure of Proterozoic nanofossils bracketed by dated granitic events compared with living Eucapsis of blue green Chroococcaceae algal family
22 p3936 A69-40059
Early Precambrian Onverwacht microstructures studied in petrographic thin sections and powdered preparations for possibility of oldest terrestrial fossils
24 p4263 A69-43221
- FOUNDATIONS**
Undamped rigid rotor critical speed analysis for firm and flexible foundations, discussing effect of center of gravity and rotor shapes
[ASME PAPER 69-VIBR-49] 10 p1808 A69-24184
- FOUR BODY PROBLEM**
Numerical solution on UNIVAC 1107 for model describing symmetrical gravitational collision of two four body systems
02 p0322 A69-12269
Hill surfaces in triangular restricted four body problem, deriving equation of surface of zero relative velocity
04 p0660 A69-15038
- FOURIER ANALYSIS**
Output power of Gunn effect microwave diode using equal area analysis and Fourier transforms
01 p0049 A69-11195
Fourier synthesis procedure optimized to design of large time bandwidth product dispersive filters employing nondispersive tapped delay lines
03 p0403 A69-13217
Infrasonic waves recordings from Saturn 5 vehicle, observing signal reversal occurrence
03 p0509 A69-13358
Impacting oscillatory devices for use as mechanical frequency dividers
07 p1136 A69-19458
Real time Fourier spectroscopic system for synthesis of spectrum of interferogram, noting polystyrene IR transmission spectra
11 p1884 A69-24837

FOURIER SERIES

Book on random signal analysis covering Fourier analysis, circuit analysis, Fourier transform theory, operators, probability, random variables, stochastic processes

12 p2031 A69-26632

Fourier analysis of pseudorandom binary sequences, noting relation of sequence sampling properties to interchange of phase angles of sequence harmonic components

13 p2287 A69-27245

Fourier analysis of ionospheric wave reflection pulses for frequency contents and relative phase angles

14 p2440 A69-29351

Generalized Fourier analysis for satellite motion deviations from arbitrarily chosen reference orbit generated analytically or numerically, determining equations for potential coefficients

15 p2697 A69-31323

Interdependent behavior of Fourier solutions to sets of partial differential equations with variable coefficients

16 p2804 A69-32252

Modulation transfer function based on Fourier techniques, discussing nonlinear film development process

17 p3005 A69-33080

Orbit parameters identification method based on given tracking data span applied to lunar orbiter tracking using Fourier analysis

19 p3401 A69-35916

Fourier spectrum analysis of solar line oscillation sequences, discussing power spectra and lifetime of oscillation phase

22 p4019 A69-40286

ELF atmospherics excitation, discussing cloud to ground and intracloud lightning discharges Fourier integration and current moment spectrum

23 p4115 A69-41562

FOURIER SERIES

Incompressible fluid steady motion in curved tube investigated by Fourier series, solving coupled nonlinear equations numerically

01 p0058 A69-10142

Fast Fourier transform, discussing algorithms for sampled Fourier spectra and FORTRAN programs

04 p0625 A69-15223

One to one mappings of Fourier series of analytic almost periodic functions and Dirichlet series, discussing satisfaction of functional equation

05 p0786 A69-15882

Optimum length of Fourier time series approximating diurnal F 2 critical frequency variation on planetary scale

06 p0921 A69-17746

Nonaxisymmetric temperature field of unbounded hollow cylinder with moving heating boundary, expanding surface temperature into Fourier series

07 p1241 A69-18924

NERVA transfer functions evaluation by computer data processing, using Fourier algorithm [IEEE PAPER 2B-2]

07 p1179 A69-19187

Analytical description of planetary distribution of space-time variations of f_0F_2 , deriving Fourier series as function of UT

09 p1486 A69-21545

Single and double transformed Fourier series reduced to forms satisfying certain definite conditions, even with finite number of terms series

09 p1533 A69-22258

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair

13 p2208 A69-27613

Stationary vibration modes of systems subject to nonlinearities using finite sums of Fourier series

13 p2361 A69-27615

Localization and convergence of Fourier series for fundamental systems of functions of Laplace operator, including eigenfunctions and trigonometric systems

15 p2644 A69-30287

Relativistic generalization for polar Sommerfeld rosette of Fourier series expansions by Lagrange and Bessel for particle motion in Keplerian field

16 p2811 A69-31607

Analytical description of planetary distribution of space-time variations of f_0F_2 , deriving Fourier series as function of UT

16 p2783 A69-32540

Recurrence formulas for calculating Fourier expansions in elliptic motion in terms of eccentric and mean anomaly [AIAA PAPER 69-910]

21 p3807 A69-39342

Fourier series solution of finite range Wiener Hopf equation, determining coefficients from Wiener Hopf procedure

23 p4181 A69-41608

Self consistent fields in waveguides containing thin conductors, expanding induced field into Fourier series in normal waves for series coefficients

23 p4123 A69-41942

FOURIER TRANSFORMATION

Holtmark plasma microfield, discussing neglect of term comparable to dipole moment during Fourier transform development for long range Coulomb field

02 p0287 A69-11871

Fourier transformation method for current distribution and driving point admittance of coupled antennas in dissipative medium

02 p0215 A69-11946

Digital modified discrete Fourier transform Doppler radar processor for tactical aircraft

03 p0389 A69-13196

Fast Fourier-Hadamard transform for digitized signal representation, classification, discrimination and efficiency

03 p0392 A69-13249

Optical imaging systems achieving aperture synthesis by lensless Fourier transform holography, noting X ray astronomy, ultrasonic and space applications

03 p0430 A69-13324

Fourier transform solution for cylindrical antennas of arbitrary length, discussing simplification and applications to solid antennas and antenna in conducting media

03 p0405 A69-13624

Fourier transform method to measure two point correlations in grid generated turbulence

03 p0419 A69-13950

Fourier coding method for coding images for digital transmission, achieving bandwidth reduction for televised images

04 p0556 A69-14429

Fast Fourier transform, discussing algorithms for sampled Fourier spectra and FORTRAN programs

04 p0625 A69-15223

Algorithm for calculating discrete Fourier transform by computer

04 p0565 A69-15336

Arbitrary factor technique to derive fast Fourier transform, evaluating recursive properties of trigonometric functions

04 p0565 A69-15337

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra

05 p0722 A69-16762

Optical Fourier transform applied to structural analysis of catalase crystalline media by gas laser

06 p0928 A69-17890

Fourier transform algorithm introduction leading to image coding technique with image transformed by Hadamard matrix operator

07 p1078 A69-18859

Adaptive primary feed system for wide angle beam scanning from parabolic reflector antenna, using Fourier transformation to obtain uniform power distribution

08 p1279 A69-19908

Interferometric measurement of polarization distributions in Crab Nebula and 3C 315 radio sources by Fourier synthesis, discussing complex brightness

08 p1390 A69-20389

Kinetic theory for weak shock generation by impulsive piston, using Fourier and Laplace transforms to solve BGK equation

08 p1304 A69-20783

Book on communication theory principles covering Fourier transformation, signal transmission, electromagnetic noise, amplitude, phase, frequency and pulse modulation, etc

09 p1454 A69-21801

Power spectrum of nonstationary processes with periodicity in two dimensional autocorrelation function based on Fourier transform

09 p1455 A69-21847

Complex spatial filtering by holographic Fourier transform subtraction

10 p1690 A69-22953

Optoelectronic spectrum analyzer with raster illuminator for producing two dimensional Fourier transform to analyze two dimensional functions

10 p1725 A69-23301

Discrete Fourier transforms, discrete linear filters and spectrum weighting for purpose of sidelobe reductions

10 p1666 A69-23888

Cepstrum /Fourier transform of log-spectrum of signal/ as model for prediction of perception of pitches in harmonic residue /ambiguity of pitch/

11 p1834 A69-24571

Fourier transform holography lensless recording using spherical wave as reference beam

11 p1882 A69-24677

Fourier transform holograms by Fresnel zone-plate fringe interferometer, discussing source size and bandwidth

12 p2090 A69-26249

Electromagnetic step-function plane waves propagation in ionosphere using Fourier transform and Bessel functions

12 p2034 A69-27132

Fast Fourier transform algorithm for low storage capacity computer programs

15 p2572 A69-31092

Langevin equation for interacting molecule system derived by Fourier transformation of Hamiltonian, noting physical correspondence to equation for shear viscosity in monatomic liquids

16 p2815 A69-32370

Multiple reference sources to improve field of view of lensless Fourier transform holography limitation due to modulation transfer function of film and turbulence

17 p2971 A69-32920

Numerical Fourier transform and inversion in random vibration performed on computer, noting use for stochastic structural dynamic analysis of complex structures

17 p2996 A69-33710

Transient vibration linear analysis using Duhamel integral and Fourier and Laplace transformations, deriving receptances and application to aeroelastic systems

18 p3211 A69-34326

Fourier transform laboratory spectroscopy for absorption near earth atmosphere millimeter wave spectrum, discussing integrated absorption strength and dimeric effect

18 p3177 A69-35240

Elastic oscillations of inhomogeneous orthotropic ring under time-variable axisymmetrical load analyzed by Fourier method

19 p3434 A69-35828

Fourier transform techniques applications in optics, converting optical signal amplitude and phase information into electrical signal information

19 p3374 A69-36737

Fourier transform methods in elasticity problems, considering three dimensional equilibrium equations in elastostatics in terms of displacements

20 p3622 A69-37282

Linear radar system theory including Fourier transforms, linear superposition and input/output ratio for deterministic and random signals, discussing filter and sampling theory

20 p3489 A69-37633

Soviet book on antenna synthesis theory for application to antenna radiation patterns with allowance for Fourier transforms limitations

20 p3508 A69-38208

Image deblurring and aperture synthesis using a posteriori processing by Fourier transform holographic spatial filtering

21 p3722 A69-38793

Cosserat theory on couple stresses applied to stress distribution in semiinfinite plate, using Fourier transform method

22 p4038 A69-39902

Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy

22 p3943 A69-40019

Motion-distorted photograph deblurring method using extended range holographic Fourier transform division

22 p3944 A69-40020

Holographic storage of electric signals in wideband pulsed carrier radar communications, noting Fourier transform in ultrasonic light modulator

23 p4164 A69-41626

Fast Fourier Transform connection with circulant and permutation matrices for case with discrete time sample number equal to discrete frequency samples

23 p4182 A69-41761

Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities

23 p4222 A69-42404

FOVEA

High oxygen concentration breathing effect on foveal thresholds, using sea level tests on trained observers

02 p0203 A69-12216

Foveal luminances for chromatic and absolute thresholds for hue identification in case of small targets
07 p1183 A69-19649

Tritanope and trichromat experiments for parafoveal visual response of tritanope, measuring spectral sensitivity and absolute threshold values
22 p3882 A69-40869

FRACTIONATION

Lead isotope composition and concentrations of U, Th, Ra, total Pb and Pb 210 in recent volcanic rocks, noting disequilibrium due to chemical fractionations
04 p0593 A69-15011

Discrete fractional steps method for approximate solution to Navier-Stokes equations, noting perturbation
18 p3165 A69-35278

Eclogite fractionation role in creation and spreading of suboceanic lithospheric plate, discussing density determination at 100 km depth
18 p3132 A69-35434

Meteorite and primordial matter composition related to possible fractionation processes influence, discussing nuclear species abundance
19 p3406 A69-36073

Fractionation of abundant lithophile element ratios of Si, Mg, Ca, Al and Ti in carbonaceous, common and enstatite chondrites
19 p3409 A69-36087

Erythroblasts fractionating method based on size, density and resistance of immature erythroblasts which change during maturation
22 p3877 A69-40761

FRACTOGRAPHY

Fracture surface topography and applications to fracture analysis of laboratory and service failures, describing fracture models
04 p0619 A69-15394

Electron fractography techniques and fracture modes in metallic materials interpretation, giving special attenuation to classical fracture replication and shadowing techniques
04 p0619 A69-15395

Electron fractographic study of fatigue cracks in wrought beryllium sheet, noting transgranular and intergranular modes on fracture surface
09 p1500 A69-22324

Electron fractography of aluminum alloy fatigue for intermetallic particles and inclusions effects on crack growth
10 p1795 A69-23065

Electron microscope fractographic studies to determine service failure causes, detecting grinding and quench cracks, hydrogen flakes and embrittlement fractures, etc
13 p2269 A69-28181

Electron fractography used in machine parts failure analysis to detect internal and surface cracks, forging defects, stress corrosion, fluid leakage sources, etc
13 p2269 A69-28182

Interferometric technique for studying fracture specimens plastic zone using laser holography
15 p2609 A69-30681

Titanium alloy tensile specimens tests in air, methanol and anhydrous methanol environments at known stress-strain-time relations examined by fractography and high resolution electron diffraction
16 p2799 A69-31718

Microfractographic observations of Al, Al alloy, Nimonic 90 and austenitic steel 18/10 after creep rupture
17 p2986 A69-32910

Fracture surfaces of stress corrosion cracks in Fe-Cr-Ni alloys studied by electron microfractography, noting cleavage fracture
19 p3350 A69-36891

Fractography of compact fracture toughness specimens failure, noting stress at fracture origin and crack growth rate
20 p3557 A69-36957

Spherulite boundaries and interspherulite breakdown in polyethylene, considering structure control by varying macromolecular microstructure
22 p3973 A69-40740

Room temperature tensile tests determining failure modes and defect influence on diffusion welds of unalloyed Ti, using electron microscopy and fractography
24 p4331 A69-42939

FRACTURE MECHANICS

Bursts of high speed rotor occurring at diametric cross section and around hub as function of hub size
01 p0142 A69-10306

Natural aging effects on fracture characteristics of aluminum weldments, investigating precracked Charpy impact toughness
01 p0086 A69-10537

Strain distribution for fracture initiation and steady state crack propagation in plane strain tension of plastic materials
01 p0169 A69-10764

Low stress fracture criteria for large elastic structures and small brittle laboratory specimens below transition temperature
01 p0169 A69-10768

Dynamic mechanical behavior of metal at tip of plain strain crack, discussing fracture strength relation to triaxial plastic stability
02 p0343 A69-12284

Fracture process in composite films of stressed tetrafluoroethylene and fluorinated ethylene propylene
02 p0270 A69-12368

Spin tests to determine brittle fracture under plane strain, using cyclic thermal stress or hydrostatic pressure to generate fatigue crack in rotor blank
03 p0524 A69-13060

Plane strain yielding, stresses and fracture about notches and cracks in terms of flow and fracture stresses and crack tip radii
03 p0528 A69-13876

Fatigue endurance of structural elements determined from stress rupture strength under high and low loading rates
04 p0673 A69-14536

Shear type fracture formation mechanism in tensile test specimens of Ti alloys, noting transition in macrogeometry
04 p0617 A69-15076

Fracture surface topography and applications to fracture analysis of laboratory and service failures, describing fracture models
04 p0619 A69-15394

Griffith biaxial fracture criterion for porous brittle materials based on continuum model with random infinitely sharp cracks
[ASME PAPER 68-WA/MET-12]
05 p0838 A69-16152

Fracture propagation in organic glasses, considering density of hyperbolic markings in polymethyl methacrylate and Dugdale model
05 p0784 A69-16429

Fracture mechanics and data from instrumented Charpy impact test
05 p0780 A69-16431

Simulated crack experiment illustrating Griffith energy balance fracture criterion
05 p0842 A69-16438

Photographic observations of fatigue fracture of heat treated polycarbonate
06 p0946 A69-17205

Stresses and displacement around crack under various conditions using two dimensional elasticity theory, deriving complex potentials for various loading types
07 p1231 A69-18269

Crack front and zone in brittle elastic body under high pressure at wall inside body
07 p1231 A69-18699

Laminated composite fracture statistical theory with stress enhancements in elements next to primary fracture, comparing elastic and plastic matrices
07 p1170 A69-18712

Fracture mechanics for predicting crack propagation rate in rotor spars
07 p1053 A69-18872

Flow fracture and rheological properties of viscoelastic material under biaxial loading
07 p1202 A69-19386

Prandtl brittle fracture model modified for semi-infinite crack in infinite body, discussing microscopic and macroscopic relation and crack propagation kinetics
07 p1237 A69-19682

Brittle crack theory analyzed to justify Irwin criterion at crack ends, dismissing Kristianovich-Barenblatt assumption and solutions for elastic problems
07 p1238 A69-19689

Critical analysis of Sedov contention of infinite stress development at ends of brittle cracks
07 p1238 A69-19690

Unstable elastoplastic brittle fracture criterion based on energy balance considerations
07 p1238 A69-19693

Loading rate effects on fracture energy in carboxy terminated liquid Hycar toughened cantilever cleaved epoxy resin
08 p1338 A69-20491

Fracture energy of unidirectional laminated composites related to diameter, debonding energy and strength of reinforcing filaments
08 p1414 A69-20493

Ductile fracture behavior of two phase stainless steel examined by straining smoothed and notched tensile and Charpy impact specimens
08 p1333 A69-20574

Failure causes for planetary reduction gear tooth for adjustment of radio telescopic antennas, studying fracture characteristics, working conditions and loading moments
08 p1321 A69-20853

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters
09 p1611 A69-21352

Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge
09 p1503 A69-21392

Crystallographic fracture path of stress corrosion cracks in austenitic stainless steels using scanning electron microscopy
09 p1522 A69-21486

Polymethyl methacrylate rupture time under stress determined from short and long time strength tests, noting relation to crack propagation time
09 p1528 A69-21853

Crack propagation properties of polymethyl methacrylate during bending and tension, noting temperature and loading time effect on crack size
09 p1529 A69-21854

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain
09 p1614 A69-21883

Part-through and through-thickness fatigue crack growth observations in glassy plastics, using linear elastic fracture mechanics
[SESA PAPER 1348]
09 p1617 A69-22013

Crack stability under mechanical and thermal stresses, noting critical tensile stress and thermal insulating character of crack
10 p1794 A69-22890

Crack propagation velocity in titanium alloys over varying stress intensities under adverse environment
10 p1709 A69-23058

Substructural changes during fatigue due to stacking fault energy variations related to morphology of fracture surface in solid solution Ni-Co alloys
10 p1795 A69-23060

Nonwork hardening elastic plastic material fracture criteria for antiplane strain, noting plastic zone shape effect on zone size and crack opening
10 p1795 A69-23064

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids
10 p1796 A69-23067

Aluminum alloy crack propagation and fracture patterns as function of temperature under high strain amplitude and low strain rate
10 p1709 A69-23071

High temperature effect on fatigue deformation and fracture of nickel base superalloy in single crystal and columnar grained forms
10 p1709 A69-23073

Testing system stiffness effect on sheet fracture, discussing notch strength dependence on stiffness
10 p1796 A69-23075

Plastic crack propagation in nonstrain hardening doubly grooved bending specimens with two surface slip, discussing crack angles, crack ductilities and fatigue striations
10 p1797 A69-23077

Low cycle fatigue fracture behavior at high temperatures, noting fatigue crack behavior and crack density concept
10 p1797 A69-23081

Fracture surfaces of Ti and Ti-Sn alloys for stress corrosion cracking in methanol with HCl and in aqueous chloride solutions
10 p1710 A69-23085

Composition and sintering temperature cooling effects on fracture properties of W-Ni-Fe alloys, using electron microscope fractography
10 p1711 A69-23333

Integral transform solutions for Griffith cracks in brittle fracture theory, discussing disk and penny shaped cracks in cylinders and thick plates
10 p1801 A69-23688

Beta parameter in exponential stress dependences of high temperature steady state creep rate and time to rupture of creep resistant alloys
10 p1712 A69-23719

Potential functions for three dimensional problems of elliptical crack in elastic solid
10 p1802 A69-24026

Time dependence criterion in dynamic fracture determined by spall stress relation to stress pulse duration during plate impact

10 p1803 A69-24032

Brittle fracture of steel analyzed using statistical model, attributing occurrence to coalescence of arrested cracks initiated at different points

10 p1803 A69-24033

Collection of papers on fracture, Volume 2, Mathematical fundamentals

11 p1974 A69-24667

Mathematical theory of equilibrium cracks in stressed bodies with minimum loading for crack extension, analyzing crack tip zone and force transmission

11 p1974 A69-24668

Strain energy for two and three dimensional crack systems subjected to varying loads, detailing loading and crack geometry effects on fracture criterion

11 p1974 A69-24669

Continuum mechanics analysis of fractures and crack extension, discussing solids elasticity, plasticity, boundary value problems, etc

11 p1974 A69-24670

Macroscopic states of stress criteria for plastic flow initial yielding, plastic flow and brittle fracture of ductile and brittle metals

11 p1975 A69-24671

Dynamic and fatigue crack propagation theories for brittle and quasi-brittle solids and plates

11 p1975 A69-24672

Probability models used in statistical approach to fracture mechanics, noting role of weakest link model in representing brittle fracture

11 p1975 A69-24673

Fractures in refractory metals surface layers due to Q switched laser pulses

11 p1899 A69-25402

High speed photography of W strip fracture, considering electric current effects and electric circuit interruption by fracture

12 p2113 A69-26195

Fatigue crack propagation laws determined by material yielding at crack tips, stress intensity and exponential crack growth law

12 p2187 A69-26846

Fracture mechanics of polymers and fiberglass reinforced plastics, indicating microcracking under static and cyclic loading due to resin phase brittleness and low strength

12 p2120 A69-26849

Crack growth and crack initiation in cylindrical specimens subject to low cycle strain controlled tension-compression induced fatigue, noting measurement techniques

12 p2188 A69-26914

Crack opening displacements of stationary and running cracks and of inclined stationary cracks in centrally notched plates, noting normal strain fields

12 p2189 A69-27163

Book on microscopic and macroscopic fundamentals of fracture of solids covering structural, metallographic and physical aspects, dislocations, brittle fracture, etc

13 p2274 A69-27220

Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics

13 p2316 A69-27221

Fracture and equilibrium position of dislocations in discrete and continuously distributed dislocations arrays including stress due to crack, energy considerations and crack initiation

13 p2358 A69-27222

Dislocations observations in fracture study of crystals, considering etching, decoration technique, X ray topography and diffraction electron microscopy

13 p2316 A69-27223

Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation

13 p2274 A69-27224

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition

13 p2274 A69-27225

Structural modes of fracture, analyzing brittle, ductile, fatigue and stress corrosion fractures using fractography

13 p2274 A69-27226

Stress waves analysis of brittle fractures, considering loading time role and cavitation of viscous fluids relation to fracture incipience

13 p2275 A69-27229

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks

13 p2359 A69-27290

Fracture of bumper protected fuel tanks subjected to hypervelocity meteoroid impact, applying method of characteristics to stress wave propagation in tank walls [AIAA PAPER 69-369]

13 p2367 A69-28301

Sinusoidal or random excitations equivalence from point of view of rupture risks, considering industrial applications

13 p2370 A69-28602

Fracture mechanics based on linear elasticity for evaluating crack propagation resistance, presenting plane strain fracture toughness test results for high strength alloys [ASME PAPER 69-DE-10]

14 p2461 A69-28842

Rolling direction tensile tests of alloy steel plate displaying various fracture configurations over distinct temperature ranges, noting stress state, void formation and anisotropy [ASME PAPER 68-WA/MET-1]

14 p2464 A69-29440

Three dimensional problem in crack theory for brittle body, determining stress concentration and critical loads

15 p2708 A69-30658

Uniaxial stress effects on molecular breakage rate, relating structure-sensitive parameter to elastic modulus

15 p2709 A69-30807

Griffith crack in thin plate opened by uniform tension at infinity, discussing effect of ties on stress intensity factor

15 p2710 A69-30809

Pop-in mode of fracture obtained during investigation of fracture strength of glassy plastics, discussing mechanics

15 p2642 A69-30814

Thomas fracture theory and compatibility conditions for fracture surface of elastic-plastic rotating hollow shaft, discussing plastic equilibrium

15 p2712 A69-31017

Cost effective pressure vessel design using fracture mechanics, discussing fabrication costs, service life requirements, etc

16 p2870 A69-31740

Unstable metal deformation, discussing volume displacement in necking leading to fracture, homogeneous total deformation and torsion

17 p3053 A69-32987

Alloying elements effects on low temperature metal fracture, considering changes in ductile-brittle transition flow due to solute

17 p2988 A69-33551

Fracture processes in high strength materials, considering effect of stored elastic energy, component geometry, fracture toughness and environment

17 p2988 A69-33553

Fracture strength of Al alloys, discussing tests for tensile properties, linear elastic fracture mechanics techniques, yield strength, corrosive media, etc

17 p2989 A69-33555

Refractory metals fracture, discussing interstitial impurity addition effects in Group 5a and 6a metals

17 p2989 A69-33556

Arrest mechanisms to halt crack before gross failure, involving material toughness exploitation and subduing stress by structural configuration

17 p3060 A69-33560

Rotating machinery fracture and design approach based on effect of detailed stress and strain duty on imperfect materials metallurgical behavior

17 p3060 A69-33561

Fracture safe design practices for pressure vessels and piping, stressing transition temperature and proof testing roles

17 p3060 A69-33562

Fracture design for aircraft vehicles, discussing crack strength requirements and method for serviceability prediction

17 p3060 A69-33563

Engineering fracture design noting temperature effects, brittleness, plane strain fracture toughness, fracture test evaluation

17 p2989 A69-33564

Fracture tests evaluated for transition temperature welding procedures, residual stress, flaws and instrumentation

17 p2989 A69-33565

Fracture kinetics of biaxial oriented polymethyl methacrylate, discussing crack development and propagation as compared to unoriented polymer

18 p3162 A69-35354

Ti-6Al-4V alloy general and stress corrosion behavior in Freon environments, discussing fracture mechanics

18 p3150 A69-35411

High speed brittle fracture of polycarbonate resin subjected to static bending in liquid nitrogen determined from crack propagation speed of surface coating

19 p3358 A69-35776

Fracture mechanics application to pressure vessel design and analysis, reviewing nondestructive inspection techniques

19 p3439 A69-36438

Fracture mechanics applied to cylindrical pressure vessels containing longitudinal defects for fracture behavior prediction from fracture toughness or stress intensity factor

19 p3439 A69-36439

Stress corrosion cracking mechanisms in liquid-solid metal combinations and solvent exposed plastics, discussing adsorption processes and cathodic polarization inhibition

19 p3349 A69-36887

Linear-elastic fracture mechanics applied to environment enhanced crack growth /stress corrosion cracking/

19 p3349 A69-36888

Computed and experimental displacement distribution curves compared for anisotropic material concerning creep rate enhancement by small cracks

20 p3620 A69-36965

Al alloys properties evaluated to determine tensile and static fracture behavior

21 p3743 A69-38668

Fracture mechanics concepts for cost effective booster pressure vessel design and fabrication from commercial steels using boiler plate techniques and minimal NDT quality control

21 p3837 A69-39028

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem

21 p3717 A69-39656

Mohr tensor representation and Mohr theorem proof developed for general problem in structural engineering

22 p4038 A69-39903

Metal fatigue crack nucleation at stresses below static fracture strength, determining local plastic strain under cyclic loading

22 p4041 A69-40053

Anodic Al oxide films mechanical and fracture properties, studying roles of environmental water vapor and film thickness [ECS PAPER 81]

22 p3973 A69-40736

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time

22 p3973 A69-40743

Continuum fracture concept indicating essential surface energy interpretation difference in otherwise similar adhesive and cohesive failures

22 p3974 A69-40760

Loading rate effects on fracture characteristics of unidirectional fiber reinforced materials, discussing fiber-resin interface strength

22 p3974 A69-41212

Stressed state of thin plate with circular hole under normal and breaking force applied over hole perimeter

23 p4233 A69-42341

Time and plasticity effects on fracture determining solids strength as function of crack dimension

23 p4236 A69-42530

Electron optical techniques for failure analysis involving brittle fracture, corrosion fatigue, stress corrosion, welding and surface phenomenon

24 p4313 A69-42768

Stress analysis in design techniques taking into account failure of flawed structures, discussing fracture mechanics

24 p4398 A69-42773

Model for estimating creep life of material containing wedge crack growth

24 p4399 A69-43032

Soviet book on resistance of materials to deformation and fracture in complex stress states covering elasticity, mechanical theories of limiting stress state, experimental verification, etc

24 p4402 A69-43233

FRACTURE STRENGTH
Fracture toughness concept in predicting failure of materials due to sharp notches or cracks

02 p0336 A69-11431

Dynamic mechanical behavior of metal at tip of plain strain crack, discussing fracture strength relation to triaxial plastic stability
02 p0343 A69-12284

Pre-cracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc
02 p0334 A69-12369

Plane strain yielding, stresses and fracture about notches and cracks in terms of flow and fracture stresses and crack tip radii
03 p0528 A69-13876

Fracture toughness of Ni maraging steel weldments, using bending tests
[AIAA PAPER 68-507] 03 p0450 A69-13910

Brittle fracture resistance of low carbon maraging and martensitic steels with cracks established by crack growth measurements during tensile and impact tests
04 p0615 A69-14647

Long term strength of Ni-Cr-Al-Ti alloys, studying gamma particles size and distribution effect
04 p0616 A69-14651

Fracture toughness measurements by means of dimensionless fracture toughness parameters, noting results for materials with very different elastic moduli
05 p0780 A69-16080

Statistical model for tensile fracture of parallel fiber composites based on stress criterion for crack propagation
[ASME PAPER 68-WA-RP-7] 05 p0783 A69-16159

Fracture mechanics and data from instrumented Charpy impact test
05 p0780 A69-16431

Elastic displacements for edge cracked plate specimens used as crack extension indicator in plane strain fracture toughness measurements
05 p0841 A69-16433

Deformation and fracture of Be bicrystals grown by seeding and floating zone melting method from Be single crystal
06 p0942 A69-17225

Ultrahigh strength steel susceptibility to brittle fracture, describing methods of testing rupture toughness and stress intensity factor
07 p1158 A69-18402

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K
07 p1166 A69-19264

Brittle fracture models compared with experimental stress analysis results, noting plane strain and plane stress fracture toughness
07 p1234 A69-19379

TIG welding introduced residual stresses amplitude and distribution in Ti sheets, studying effects on mechanical properties
[ASM PAPER GG8-6.2] 07 p1169 A69-19674

Brittle fracture criterion for small steel specimens based on interaction between stress concentration of initial crack and nearby slip band
07 p1238 A69-19694

Cr-Ni-Mo steel toughness with strain induced austenite to martensite transformation by TRIP /transformation induced plasticity/
08 p1330 A69-20012

Temperature dependence of polymethylmethacrylate deformation, yield and fracture in constant strain rate compressive and tensile tests
08 p1335 A69-20215

Crack propagation in crosslinked glassy polymers, noting effects of added elastomers molecular weight
08 p1338 A69-20492

Liquid surface active media /kerosene, water, castor oil/ effect on strength of V notched polymethyl methacrylate specimens
09 p1528 A69-21852

Fracture toughness of laminated adhesive bonded structures and monolithic aluminum, considering fracture stresses and ductile and brittle failure
09 p1526 A69-22318

Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests
10 p1795 A69-23057

Stress intensity magnification factors in surface flawed tension plates and notched round tension bars, evaluating fracture toughness
10 p1797 A69-23080

Ceramics strength and fracture behavior in terms of modified Griffith equation, discussing effective surface energy and initial crack size
11 p1907 A69-25238

Hydrostatic pressure-cycling technique for controlled fatigue precracking of spin burst fracture toughness specimens, noting ultrasonic flaw detection
11 p1995 A69-25650

Tensile strength and failure loading evaluation for structure, discussing stresses in neighborhood of crack, crack toughness measurement and fracture mechanics
12 p2176 A69-25861

Inclination effect of fatigue cracks on plane strain fracture toughness of 7075-T651 Al alloy, discussing cantilever bending
12 p2177 A69-25958

Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions
12 p2114 A69-26496

Tempered glass plates strength nondestructive testing by scattered light photoelastic method, discussing application to aircraft windshield sandwich structures
[AIAA PAPER 68-323] 12 p2118 A69-26768

Macroscopic crack extension force, critical flaw size and minimum fracture strength calculated from microscopic quantities
13 p2275 A69-27227

Fracture mechanics based on linear elasticity for evaluating crack propagation resistance, presenting plane strain fracture toughness test results for high strength alloys
[ASME PAPER 69-DE-10] 14 p2461 A69-28842

Pop-in mode of fracture obtained during investigation of fracture strength of glassy plastics, discussing mechanics
15 p2642 A69-30814

Crack growth monitoring and recording techniques during fracture testing, using foil gauge, potential flow and acoustic pickup methods
15 p2713 A69-31109

Clevis design for reduced friction errors associated with round hole clevis in plane strain fracture toughness measurements
15 p2612 A69-31150

Fracture toughness of AlZnMgCu alloys, employing sharp notch tension, tear and precracked Charpy impact tests
16 p2800 A69-31780

Biaxial stress strain properties of graphite base refractory composites noting fracture strength predictions
[AIAA PAPER 68-337] 16 p2803 A69-32150

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation
16 p2795 A69-32796

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation
17 p3052 A69-32984

Fracture strength of Al alloy in biaxial stress field, considering strain rate influence on material toughness
17 p2986 A69-32985

Microstructural factors role in metal fracture toughness, considering effects of deformation processing and heat treatment, grain size, structural refinement, fibering, etc
17 p2988 A69-33552

Fracture processes in high strength materials, considering effect of stored elastic energy, component geometry, fracture toughness and environment
17 p2988 A69-33553

Fracture toughness of structural steels, discussing evaluation methods for brittle fracture resistance, toughness values and ratings correlation, etc
17 p2989 A69-33554

Fracture strength of Al alloys, discussing tests for tensile properties, linear elastic fracture mechanics techniques, yield strength, corrosive media, etc
17 p2989 A69-33555

Plane strain fracture toughness determined for crack notched bend specimens using standard test procedure for specific metallic material property
17 p2989 A69-33566

Temperature effects on fracture of various alloys, presenting strength and toughness values tested at cryogenic temperatures
17 p2990 A69-33567

Nickel maraging steel weld metal impact strength and fracture toughness improved by heat treatment
18 p3151 A69-35430

Minimum cost design /MCD/ of space launch vehicle, discussing material and process selection based on fracture-safe conditions
19 p3433 A69-35587

Plane strain fracture toughness of high strength steels and Ti alloy from precracked notched bend test method
19 p3346 A69-36436

Fabrication effects on high strength Al alloy plate properties, comparing texture, plane strain fracture toughness, yield stress, ultimate tensile stress and elongation
19 p3346 A69-36437

Multiaxial stress effect at room temperature on fracture strength of silicon carbide tubular specimens
20 p3565 A69-36939

Alloying elements effect on low temperature notch-bend fracture toughness of martensitic high strength steels, noting transition temperature
20 p3556 A69-36952

Phase transformations and strengthening mechanisms in Ti-Al-V alloy
20 p3556 A69-36954

Fractography of compact fracture toughness specimens failure, noting stress at fracture origin and crack growth rate
20 p3557 A69-36957

Yield strength, deformation modes and fracture characteristics of Ti-Al alloys, examining strength and fracture characteristics as function of structure and chemical composition
20 p3557 A69-36959

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
[ASM PAPER W9-13.3] 21 p3833 A69-38658

Inconel and aluminum tested in pressurized hydrogen at room temperature, using surface flawed fracture toughness specimens and preflawed pressure vessels
21 p3730 A69-38666

Al alloys sheet, plate and weldments crack behavior and fracture toughness at cryogenic temperatures, using notched and surface flawed plane strain specimens
[ASM PAPER W9-19.3] 21 p3743 A69-38669

Alpha-beta Ti-Al-V-Mo-Zr alloy with high strength, fracture toughness and crack propagation resistance, low density and adequate ductility, discussing test results
[AIME PAPER S69-3] 21 p3747 A69-39472

Stress corrosion cracking in aerospace situations, discussing corrective measures emphasizing fracture toughness criteria
21 p3748 A69-39491

Fracture strength of glass fiber-reinforced cylinders made by unidirectional filament winding predicted by analyzing three dimensional stress distributions
21 p3846 A69-39795

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
22 p4046 A69-41040

Aluminum alloys fracture strength tabulated data showing trends regarding yield strength, specimen orientation effects and product size
23 p4175 A69-41476

Fracture toughness and crack propagation in annealed aircraft titanium alloys tested per ASTM procedure, comparing results with high strength steels and aluminum alloys
23 p4177 A69-42165

Plane strain fracture toughness of S-200 grade Be for 77-533 K temperature range, noting effects of loading, heat treatment and neutron irradiation
23 p4178 A69-42450

Traction stresses distribution over contact surfaces using photoelastic frozen stress model
23 p4235 A69-42461

Fracture and tensile properties of electron beam welded Al alloy for pressure vessels compared to gas tungsten arc welding results
24 p4319 A69-42941

Beryllium R and D emphasizing brittleness and fracture toughness for safe working stress levels of structurally loaded components
24 p4332 A69-43208

Al-B composites fracture toughness obtained by comparing notched tensile data with unnotched specimens
24 p4335 A69-43451

Deferred rupture as function of applied load noting test methods
24 p4407 A69-43801

FRACTURES [MATERIALS]

Heavy titanium carbide precipitation on fatigue slip zones of stainless steel, noting rupture produced crystallographic facets
03 p0447 A69-13605

FRACTURING

Plastic fractures of age hardened aluminum alloys analyzed by tensile tests and electron fractography, considering stresses, surface and intergranular effects
07 p1166 A69-18961

Liquid crystal coatings for determining fracture initiation flaws in material structures, considering stress concentration and hysteresis heating
10 p1699 A69-23053

Micromechanism of crack propagation in brittle fracture, considering kinematics for steady state crack in plane strain and energy dissipation
10 p1796 A69-23070

Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction
10 p1713 A69-23823

Temperature effect on tensile brittle fracture stress of polycrystalline tungsten
12 p2116 A69-27135

Continuum mechanics for brittle fracture analysis in metal structures, discussing plastic limit loads
13 p2275 A69-27228

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide intermetallic eutectic alloy showing dependence on intermetallic constituent
13 p2277 A69-27406

Electron microscope fractographic studies to determine service failure causes, detecting grinding and quench cracks, hydrogen flakes and embrittlement fractures, etc
13 p2269 A69-28181

Materials and structural failures under short time compressive loadings, showing structural response to tensile stresses produced by rarefaction waves
15 p2639 A69-30364

Collection of papers on fracture, Volume 6, Fracture of metals
17 p2988 A69-33550

Laser technology and effects on materials fracture
17 p2989 A69-33557

Materials fracture electrically induced including arc and spark discharges, dielectric breakdown, electrolysis, etc
17 p2989 A69-33558

Papers on fracture, Volume 5, Fracture design of structures
17 p3060 A69-33559

Glass encased electronic components with conformal coatings, considering glass breakage at low temperature
19 p3281 A69-35547

Microbial contamination release from impact-fractured solids, examining bacterial spores growth in fractured methyl methacrylate plastic for application to space exploration
20 p3475 A69-37614

Stress rupture parameters for refractory metals and alloys from Larson-Miller, Dorn and Manson-Haferd constants, noting optimization procedure
[ASM PAPER D8-3.4] 20 p3564 A69-38135

Polymer films damage due to supersonic plasma jets, comparing fracture relief of oriented and unoriented polymers
21 p3752 A69-39081

Damping effects of vibration on materials and parts to estimate fatigue life, considering periodic and non-periodic stress vs time relationships
22 p4041 A69-40167

Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models
24 p4333 A69-43339

FRACTURING

EPR investigation of free radicals formed during mechanical fracture and gamma irradiation, discussing recombination rate and reaction rate with oxygen
03 p0434 A69-13871

Snap through in thin shells with initial irregularities during creep, determining critical time to failure by analyzing undisturbed buckling process
21 p3838 A69-39188

FRAGMENTATION

Frequency occurrence of small particles in meteor showers, discussing fragmentation and cosmic erosion as primary effects in small particle development
01 p0154 A69-10872

Supercooled water drop frozen and observed to undergo explosive shattering and ejection of ice splinters
02 p0275 A69-12693

Electron impact induced fragmentation of ring D in steroids involving loss of carbon atoms analyzed by mass spectrometry
07 p1069 A69-19497

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters
09 p1611 A69-21352

High velocity gas stream induced shattering of liquid drops, disintegration rate and breakup time
[AIAA PAPER 68-83] 09 p1482 A69-21947

Mass spectral fragmentation of substituted aliphatic glycols and hydroxylated carbon-carbon bond
09 p1448 A69-22551

Statistical analysis of photometric curves for meteors undergoing fragmentation at onset of vaporization
12 p2154 A69-25819

Freezing of water droplets in thermal equilibrium with gas mixtures, considering droplet shattering and gas volume
12 p2126 A69-26018

Mass spectra peaks of N-Acyl-2-indolinols fragmentation processes upon electron impact, noting compounds predominance in open chain tautomer gas phase
15 p2561 A69-30407

Hybrid propulsion chemical and technical problems, discussing solid fuel fragmentation and defining typical combustion modes
17 p3021 A69-33358

Meteor dynamical and photometrical analyses compared quantitatively, determining mass loss value from fragmentation model
17 p3045 A69-34223

Ion cyclotron double resonance technique to identify collision-induced ion fragmentation pathways illustrated with p-chloroethylbenzene
19 p3265 A69-36292

Data on mass distribution of terrestrial fragmented rocks to interpret lunar rock samples, noting origin of asteroids and meteorites
20 p3613 A69-38250

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
21 p3814 A69-39584

FRAGMENTS

Explosives and propellants sensitivity to fragment impact, establishing threshold detonation velocity
04 p0645 A69-14473

Fragments and markings produced on aircraft aluminum by explosion as means of detecting sabotage in crashes
06 p0868 A69-17833

Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments
12 p2133 A69-26298

FRAME PHOTOGRAPHY

Electronically controlled spark gap system for HF optical frame separation based on Cranz-Schardin principle
05 p0763 A69-15985

Nanosecond electron-optical image converter multiframe camera designed for reducing frame exposure time
12 p2083 A69-26141

Multiframe image converter registration of space-time ruby laser spot structure changes in Q switched regime prior to giant pulse formation
12 p2083 A69-26142

Rotating mirror framing camera with continuous access at f/18 aperture, discussing image transfer system, frame rate and capacity, etc
12 p2085 A69-26157

High speed continuous access framing camera design noting velocity doubler, parallax free aperture stop and polaroid film capability
12 p2085 A69-26158

Multiple lens high speed camera with mechanical shutter for investigating AC arc in circuit breaker during zero current, noting framing rate and capacity
12 p2085 A69-26159

Selective stroboscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method
12 p2086 A69-26162

Shadow and schlieren photography, interferometry and quantitative data treatment obtainable by high speed multiframe photographic arrangement, using laser beam
12 p2086 A69-26165

Ultrahigh speed multiple framing photography system using sequentially modulated ruby laser and smear type camera applied to dynamic photoelasticity
12 p2086 A69-26166

FRAMES

NT AIRFRAMES

NT UNDERCARRIAGES

Amplitudes of forced bending vibrations of frames with superfluous elastohysteretic couplings by dynamic compliances method
11 p1986 A69-25333

Optimal design of rectangular frames for stability
13 p2358 A69-27209

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method
17 p3055 A69-33131

Thin walled rods for girder and frame systems designed by matrix method, solving differential equations for tension, compression, bending and torsion
23 p4230 A69-42005

Metal space frame radome design, considering electromagnetic performance, structural integrity, cost, membrane structures stability, etc
23 p4231 A69-42139

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods
23 p4232 A69-42142

Space frame radome model elastic buckling tests for load deflection and maximum load predictions, considering individual beam failure and complex instability
23 p4232 A69-42143

FRAMING CAMERAS

Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air
12 p2082 A69-26137

Multiple frame camera with image compensation as ballistic phototheodolite
12 p2084 A69-26153

Rotating mirror turbine with air cushion floating shaft for use in streak and framing cameras, noting framing rate
12 p2085 A69-26156

Rotating mirror framing camera with continuous access at f/18 aperture, discussing image transfer system, frame rate and capacity, etc
12 p2085 A69-26157

Framing device capable of producing four pictures within 5 nsec, using Q switch laser for light source
12 p2086 A69-26168

Ultrahigh speed cinematographic materials, discussing mirror turbines, streak and synchronized framing cameras
12 p2090 A69-26197

FRANCE

Preparation of refractory alloys in powders, fibers and sintered billets by thermochemical method
[ONERA-TP-636] 02 p0251 A69-11625

Collection of papers on French space effort covering space sciences and applications, vehicles and boosters, launch sites, tracking, international cooperation, etc
02 p0315 A69-11901

Satellites use in French space meteorology, discussing evolution, achievements, Eole project, etc
02 p0275 A69-11911

French geodetic work with aid of artificial satellites, describing equipment, mounting, observation technique and laser telemetry experiments
02 p0228 A69-11913

French/LRBA, ONERA and Sud-Aviation/ sounding rocket design emphasizing meteorological rockets and standard equipment
02 p0333 A69-11916

French air transport and airports covering aviation enterprises, air traffic density, airport activities, traffic flow, etc
04 p0689 A69-15479

French geodetic satellites tracking operations, on-board equipment and ground stations
[UN PAPER 68-95835] 06 p1013 A69-17065

Dynamic stability tests of tilt winged V/STOL aircraft model in ultralow speed range, discussing apparatus for stability derivatives
06 p0866 A69-17091

French air cushion vehicle technology for water and land, outlining principles of lift, propulsion and control and specifications of several craft
08 p1254 A69-20198

Laser control of French rocket head guidance system, discussing gyroscopic master, stellar or solar detectors, etc
09 p1518 A69-22162

French space program report to COSPAR covering orbiting satellites, rocket launchings, cosmic rays, space biology, geodesy, meteorology, etc
15 p2725 A69-31473

French space research center in Toulouse, discussing organization and activities involving satellites, rocket probes, balloons and environmental tests
16 p2765 A69-31758

French helicopter industry projected development for existing types, production models or final development and long range design programs
19 p3248 A69-36848

European cooperation in aircraft industry and application to Anglo-French helicopter program
19 p3456 A69-36849

In-flight medical disorders sustained by crew members of various aircraft in French Air Force correlated with aircraft accidents, flight experience and age
24 p4277 A69-43383

FRANCK-CONDON PRINCIPLE

Franck-Condon factors in radiative, excitation and ionization molecular transitions of oxygen, carbon monoxide, nitric oxide, etc
05 p0795 A69-15664

Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics
07 p1185 A69-19169

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part I
15 p2656 A69-31156

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part II
15 p2656 A69-31157

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for each electronic state by numerical solutions of radial Schroedinger equation
21 p3774 A69-38758

FRAUNHOFER LINES

Time compression system with ultrasonic diffraction cell allows coherent light optical spectrum analyzer to function at audiofrequencies
01 p0035 A69-11283

Fraunhofer lines hyperfine structure effect on solar abundances of V, Mn, Co, Cu and Ba, calculating equivalent line widths by ALGOL program
02 p0311 A69-11458

Fraunhofer lines in solar spectrum in 2950-8770 A wavelength region, noting 8000 additional unidentified lines
03 p0507 A69-13170

Submicron particles spatial location in three dimensional volume detected by Fraunhofer holography
04 p0596 A69-14292

Inner corona Fraunhofer lines invisibility at solar eclipses, emphasizing uncertainty of photospheric absorption lines appearance as electron scattering
04 p0654 A69-14628

Photospheric network obtained by spectroheliograms, discussing Fraunhofer lines weakening, nonsunspot magnetic fields and Zeeman sensitivity
04 p0664 A69-15523

Micro and macroturbulent motions velocity in solar photosphere based on Fraunhofer lines analysis
05 p0823 A69-16014

Local solar magnetic fields longitudinal component correlation with central intensities in various Fraunhofer lines, noting chromospheric levels effect
07 p1219 A69-19285

Central Fraunhofer line intensities near solar minimum compared to Soviet results for possible solar cycle variation
08 p1386 A69-20075

Fraunhofer line distortion on scattering from zodiacal dust cloud for various particle density and size distributions, discussing Keplerian orbits
08 p1308 A69-20391

Solar photosphere abundances of various heavy elements from photoelectric spectrometer measurements of equivalent width of known Fraunhofer lines
08 p1390 A69-20393

Rotational Raman scattering in planetary atmospheres, analyzing spectra of deep solar Fraunhofer lines
09 p1601 A69-22207

Source functions of IR Fraunhofer lines obtained using solar disk equivalent width method, noting LTE role
14 p2528 A69-29961

Ca II forbidden lines in photospheric spectrum identified with weak Fraunhofer line by photoelectric spectrometer scans
14 p2528 A69-29962

Photoelectric photometric stellar spectroscopy for calculating metal abundance from Fraunhofer absorption lines, relating results to star age
17 p3043 A69-34140

Fraunhofer holography for measurement of three dimensional flowfield velocity components, investigating rectangular channel flow
19 p3305 A69-35729

Limb effect of solar Fraunhofer lines determined by telescope equipped with autocollimated type diffraction spectrograph
20 p3607 A69-38044

Solar Fraunhofer spectrum, observing Fe 5576 and 6678, K 7699 and Ni 5436, 6129, 5847 and 6130 A lines
20 p3615 A69-38297

Neutral titanium Fraunhofer lines 4534, 4562, 5210 and 5238 A, investigating profiles and asymmetries using spectrophotoelectrical methods
21 p3795 A69-38467

Sunspot penumbra model in hydrostatic equilibrium accounting for continuum and Fraunhofer lines observations
22 p4019 A69-40290

Sunspot spectra near solar limb for difference between Fraunhofer line continuum and line core formation levels, finding geometrical height scale and pressure equilibrium
22 p4019 A69-40292

FRAUNHOFER REGION
U FAR FIELDS

FREDHOLM EQUATIONS

Initial value method applied to Fredholm integral equation for radiative transfer, neutron transport and multiple scattering, verifying invariant imbedding method
01 p0103 A69-10002

Unstable Volterra integral equation reduced to finding solutions for Fredholm integral equation by restricting solutions to closed ball in Hilbert space
01 p0103 A69-10004

Three dimensional stress concentration around cylindrical hole in semiinfinite elastic body loaded at infinity, using Fredholm integral equation
01 p0172 A69-11332

Arbitrary phase shift vibrations of airfoil profiles in incompressible flow reduced to Fredholm equations, allowing for trailing vortices influence
02 p0190 A69-12574

Lift from unsteady flow past cascade of slender profiles with stagger angle reduced to solution of Fredholm integral equation
02 p0190 A69-12575

Linear differential system with boundary conditions, obtaining equivalent Fredholm integral equation and perturbation theorem
07 p1173 A69-18729

Fredholm equations from dual integral equations for studying penny shaped crack response to incident harmonic shear wave in elastic medium
07 p1233 A69-19175

Problems using Fredholm integral equations providing unique solution
08 p1418 A69-21004

Induced magnetic fields determination in linear DC MHD generators with ferromagnetic and nonmagnetic walls, using Fredholm equation
10 p1636 A69-23454

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors
10 p1689 A69-23969

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc
12 p2182 A69-26726

Equations of motion of compressible fluid with non-zero resistivity near thin foil, solving supersonic and subsonic flow by Fredholm integral equations
13 p2200 A69-28360

Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia
17 p3033 A69-33291

Fredholm integral equation solution of circularly axisymmetric stress state for bodies of revolution
18 p3226 A69-35375

Variational principle for Fredholm integral equations applied to inclusion and indentation problems in elasticity
19 p3440 A69-36589

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors
21 p3717 A69-39655

Fredholm integral equation for source function of Greenhouse effect and finite atmospheres solved by computational algorithm
23 p4239 A69-41607

FREDHOLM OPERATORS
U OPERATORS [MATHEMATICS]

FREE ATMOSPHERE

Boundary layer effect on large scale atmospheric processes from analyzing two layer free atmosphere model, plotting weather forecast charts
02 p0273 A69-11435

Free atmospheric turbulence theory extended to include ionosphere, deriving equations for horizontal ionospheric wind together with turbulence coefficient
02 p0274 A69-11678

Horizontal wind velocity energy spectra, attributing free atmosphere meso and microscale turbulence to meso and micrometeorological processes
12 p2070 A69-26575

Soviet book on temperature regime of free atmosphere above Northern Hemisphere covering aerological data processing, statistical estimates, latitudinal and seasonal variations
13 p2294 A69-27934

Free atmospheric turbulence theory extended to include ionosphere, deriving equations for horizontal ionospheric wind and turbulence coefficient
13 p2295 A69-28709

Atmospheric motions equations in mesometeorology prognostic problems taking into account free atmosphere and boundary layer interactions
15 p2646 A69-30107

Lagrangian solution for air mass element trajectory in free atmosphere using vortex invariant, noting application to atmospheric transport of contamination
16 p2805 A69-31611

Soviet monograph on turbulence in free atmosphere covering measurement and statistical techniques, tropospheric and stratospheric disturbances, wind pulsations, effects on aircraft flights, etc
18 p3165 A69-34351

Turbulence energy spectra in free atmosphere with convective layer surmounted by inversion layer, noting power law followed by velocity components
19 p3362 A69-36406

Energy density distribution in power spectra of turbulence in long wave region in free atmosphere
24 p4346 A69-43155

FREE BOUNDARIES

Free surface in supercritical regime downstream of valve submerged in MHD flow, noting effects of horizontal and vertical magnetic induction fields
15 p2659 A69-30299

Nonlinear free surface effects in low gravity tank draining, finding domains of validity for linearized and nonlinear analyses
17 p2953 A69-33450

FREE CONVECTION

Schlieren method for studying rotating sphere heat transfer during natural convection
01 p0174 A69-10095

Free convection from partially uniformly heated and partially insulated vertical flat plate, discussing dimensionless velocity, temperature, heat flux and axial length parameters
01 p0175 A69-10331

Laminar natural convection of electrically conducting fluid under magnetic field, noting temperature profiles
01 p0134 A69-11407

Transverse pressure gradient and streamwise derivatives effect on free convection laminar heat transfer on isothermal vertical plate at low Prandtl numbers
01 p0177 A69-11409

Natural convection boundary layer stability on heated isothermal vertical plane wall, discussing Grashof number as laminar to turbulent flow transition criterion
02 p0188 A69-12038

Solute vertical stabilizing gradient inhibition of thermal convection of fluid layer under temperature gradient, discussing effects on two dimensional flows motion
03 p0532 A69-13012

Thermal convection in rotating fluid annulus, discussing suppression of frictional constraint on lateral boundary

03 p0460 A69-13339

Environmental temperature and water vapor increases associated with ascending thermals estimated by penetrative convection

03 p0460 A69-13340

Instability and disturbance amplification in external laminar natural convection boundary layer over vertical flat surface with uniform heat flux

03 p0533 A69-13951

Pressure induced variations in stability constant characterizing bubble structure in two phase boundary layer of several liquids during boiling with natural convection

03 p0534 A69-14149

Approximate method for finding solution of weak free convection in partially filled vessel in gravitational field

04 p0685 A69-14619

Free convective heat transfer in liquid filled spherical volume with constant thermal flux density at boundary

04 p0686 A69-14992

Natural convection heat transfer through enclosed horizontal layer of supercritical carbon dioxide, discussing flat plate configuration data

04 p0688 A69-15398

Stability of laminar natural convection boundary layer flow, discussing thermal capacity coupling between fluid and wall and Prandtl number

05 p0744 A69-15719

Free convective heat transfer of cylinder in rarefied gas yielding Nusselt number as function of Grashof, Prandtl and Knudsen numbers

05 p0846 A69-15904

Heat transfer through vertical plane layer for various Prandtl numbers, discussing velocity and temperature profiles and effects of aspect ratio, Grashof and Rayleigh numbers [ASME PAPER 68-WA/HT-4]

05 p0846 A69-16115

Counter rotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions [ASME PAPER WA/HT-9]

05 p0846 A69-16117

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20]

05 p0847 A69-16123

Natural convection heat transfer for incipient vapor formation in liquid H and N and for nucleate boiling of liquid H [ASME PAPER 68-WA/PID-4]

05 p0848 A69-16165

Simultaneous natural and forced convection flow around wall, analyzing perturbations of hydrodynamic elements due to obstacle

06 p1030 A69-17095

Laminar natural convection in enclosed rectangular cavity, discussing temperature gradient effects

06 p1033 A69-17556

Modified schlieren interferometer for quantitative investigation of free convection boundary layer temperature profiles

07 p1130 A69-18263

Differential equations governing free convection boundary layer flow past isothermal semiinfinite vertical flat plate solved for large Prandtl numbers by matched asymptotic expansions

07 p1239 A69-18266

Convection in planetary interiors produced by combined thermal and nonthermal mechanisms, noting self gravitating homogeneous nonrotating compressible fluid spheres

07 p1214 A69-18613

Convection in conducting fluid filled cavities with variable wall temperature due to magnetic field, with results applicable to rheological systems

07 p1241 A69-18921

Heat convection coefficient for wires enclosed in cylindrical tubes filled with water or ethanol, showing dependence on inclination angle

07 p1242 A69-18926

Finite difference computations for calculating two dimensional natural convection, deriving requirements for numerical stability

07 p1242 A69-19397

Heat exchangers in cryogenic fluids in free and forced convection, discussing measurements in liquid H, D, Ne and N

08 p1420 A69-19914

Transient free convection laminar boundary layer equations for heat transfer from vertical semiinfinite flat plate

08 p1305 A69-20842

Unsteady free convection in incompressible viscous fluid having internal thermal source contained in bounded volume

09 p1621 A69-21792

Heat transfer coefficients for free convection from single horizontal cylinder to fluids computed from empirical correlation

09 p1625 A69-22693

Thermal convection in earth mantle with temperature and pressure dependent viscosity, considering mechanisms for fluid-like mantle

10 p1682 A69-23412

Thermal diffusion and free thermal convection in fluids by diffraction interferometer, using laser for light source

10 p1702 A69-23431

Horizontal surface heat transfer coefficient under simultaneous free and forced convection calculated as function of temperature head, air flow velocity and area

10 p1810 A69-24085

Free convection boundary layer flow past vertical flat plate analyzed for nonlinear wall temperature distributions using series solutions

11 p2002 A69-25243

MHD free convection from horizontal isothermal plate in vertical uniform magnetic field, considering boundary layer thickness

11 p1930 A69-25277

Oxygen effects in Type 316 stainless steel, Nb-Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates

12 p2112 A69-25943

RR Lyrae gap stellar model atmospheres including radiation spectra, temperature radiation and convection, etc

13 p2338 A69-27561

Planetary interior convection analysis extended to include variable viscosity, heat source distribution, thermal expansion and diffusivity, etc

13 p2344 A69-27646

Free convection heat transfer from heated inclined flat plate in air, studying effects of angular positions

13 p2375 A69-27794

Analytical model for free convection heat transfer from vertical plates with nonhorizontal leading edges, discussing flow field

13 p2379 A69-28342

Similar solution for free convective flow past vertical porous wall and unsteady flow past porous wall with dissipation term, using group transforms

15 p2592 A69-31010

Liquid fuel droplets combustion under free and forced convection noting combustion rate

15 p2719 A69-31174

Magnetic field effect on thermal convection onset in compressible polytropic atmosphere compared with results from thin layer approximation

16 p2855 A69-31658

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20]

17 p3068 A69-32902

Two term expansion for Nusselt number for laminar natural convection about isothermal horizontal cylinder in fluid with vanishingly small Prandtl number

17 p3068 A69-33014

Subsonic thermal convection or internal gravity waves from formal scale analysis of equations of motion in plane parallel atmosphere

17 p2960 A69-33155

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel

19 p3380 A69-36304

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions

19 p3452 A69-36392

Thermal convection in horizontal fluid layer heated from below, with zero shear boundaries above and below, noting critical Rayleigh number measured value

20 p3518 A69-38234

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection obtained with integral equations and Karman-Pohlhausen method

21 p3848 A69-38633

Heat transfer coefficients, boundary layer thicknesses and temperature and velocity distributions in free convection boundary layer in closed axisymmetric volumes

21 p3848 A69-38634

Free convection boundary layer singular character at low Prandtl numbers, deriving expression for Nusselt-Grashof relation

21 p3849 A69-38772

Simultaneous equations for natural convection from horizontal cylinder at moderate Grashof numbers, using iteration digital computer method for boundary values

21 p3851 A69-38975

Velocity and temperature distribution curves in turbulent boundary layer formed by natural convection on isothermal vertical plate, using Prandtl and Nusselt numbers

21 p3852 A69-39430

Laminar free convection from horizontal infinite strip with downward facing thermally insulated vertical walls at edges, noting boundary layer thickness and flow pattern

21 p3853 A69-39672

Velocity and temperature profiles at Prandtl number values obtained for unsteady laminar free convection on infinite vertical plate with stepwise varying temperature

21 p3853 A69-39681

Free convection of capillary fluid at vertical plate, allowing for temperature dependence of viscosity coefficient

21 p3854 A69-39843

Natural convection in rectangular cavity with nonuniform lateral surfaces temperature, using finite difference scheme with numerical analysis

21 p3855 A69-39853

Dynamic processes in upper earth mantle, discussing thermal convection currents and stress propagation

22 p3937 A69-40184

Free convection from vertical surface using perturbation method

24 p4407 A69-42916

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects [ASME PAPER 69-HT-44]

24 p4409 A69-43517

Laminar flow in horizontal circular tubes with uniform heat flux, analyzing combined free and forced convection effects on secondary flow

24 p4409 A69-43519

Transverse curvature effect on laminar free convection heat transfer from vertical isothermal cylinders [ASME PAPER 69-HT-G]

24 p4410 A69-43522

Heat transfer data for laminar, transition and turbulent natural convection boundary layers from water experiment on constant heat flux vertical plate [ASME PAPER 69-HT-D]

24 p4410 A69-43525

FREE ELECTRONS

Critical values of laser formed solid angle determined in plasma diagnostics of scattering spectrum density distribution

02 p0251 A69-12416

Radiative transfer equations solved for electron scattering stellar atmosphere, using transformation of integrodifferential transfer equations into singular integral equations

03 p0466 A69-13351

Free electron kinetic equation including inelastic electron-atom collisions derived for nonequilibrium low temperature plasma, showing interrelated electronic and atomic energy distribution

05 p0802 A69-15889

Highly ionized plasma acceleration by intrinsic radiation achieved by deep cooling of free electrons

07 p1195 A69-19595

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal

08 p1374 A69-21189

Electron injection into ZnO from aqueous solutions of stable substances, correlating injection with oxidation potential of substance

10 p1651 A69-22940

Cold electron emitters and operational principles, discussing thin film tunnel emitter, Schottky barrier emitters, MgO type emitter, etc

11 p1846 A69-24597

Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field

11 p1961 A69-25107

Free electron density upper limits in plasma attributed to negative ion formation, noting effect on

ionization equilibrium calculations for stellar atmospheres

11 p1928 A69-25255

Free electron model for electron work functions and number density distributions and surface potentials in metals

14 p2504 A69-29009

Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels

15 p2666 A69-30060

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field

15 p2666 A69-30061

Free electron concentrations and dispersion in H I regions noting ionized interstellar gas components role

15 p2681 A69-30420

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal

18 p3183 A69-35158

Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model

19 p3382 A69-36045

Free electrons influence on reflection coefficient of semiconductor in IR spectra, showing selective modulation with change in carrier concentration

20 p3583 A69-37610

Holographic interferometry for determining total free electrons in plasma produced by irradiating solid hydrogen foils with giant pulse ruby laser

24 p4314 A69-42980

FREE ENERGY

Stability of weakly inhomogeneous plasmas with free energy available for nonlinear resonant three wave interactions

01 p0133 A69-11212

Thermodynamic analysis of refractory compounds vapor transport conditions, illustrating integral free energy diagrams

03 p0453 A69-13619

Upper bound for free energy of nonlocal superconductor in magnetic field, using variational method and perturbation theory

03 p0491 A69-13971

Wagon rolling toward piston executing HF oscillations, discussing periodic solutions of equations of motion corresponding to piston phase at collision

04 p0630 A69-14893

Free energy of low density quantum plasmas derived statistically from exact two particle scattering phase shifts

05 p0799 A69-15629

Free energy in linear viscoelastic solids

06 p1022 A69-17241

Solar flares and plagues free energy origin in magnetic field dissipation

06 p0996 A69-17446

Rhenium effect on lattice solid solubility of oxygen in tungsten, calculating rhenium-oxygen cluster minimum binding free energy

08 p1329 A69-20007

Relative free energies of crystal zones of tungsten using field electron microscope, determining surface energy anisotropy from Wulff construction

08 p1330 A69-20139

Correlation between interfacial tension in binary and ternary systems and reciprocal solubility of bulk phases, assuming concentration as function of thickness

09 p1448 A69-21909

Lame problem for elastic isotropic medium having free energy dependent on medium deformation and deformation gradients, estimating minimum surface curvature

11 p1970 A69-24632

High temperature plasma quasi-classical pseudopotential, binary function and free energy derived, using displacement and collective variable methods

11 p1934 A69-25701

Isoperimetric plasma thermodynamics problems, including plasma free energy and relativistic plasma density fluctuations energy

12 p2138 A69-26603

Thermomechanical theory for nonreacting binary fluid mixtures, discussing free energy function, entropy flux vector, equations of motion, constraints, etc

12 p2191 A69-26927

Surface free energy of solid Mo measured by Udin zero-creep method at high temperatures, noting low value due to residual impurity adsorption

12 p2117 A69-27137

Dielectric polarization of barium titanate and barium strontium titanate in pulsed fields in paraelectric phase, analyzing coefficient B in free energy function and equilibrium state

22 p3996 A69-41165

FREE FALL

Gravitational force measurement on electrons and positrons in free fall through vertical metal tubes at low temperatures

01 p0125 A69-10979

Self balancing single degree of freedom free fall space environment simulator, discussing coincidence of mass and rotation centers

04 p0586 A69-15468

Free fall vehicle dynamics for wind tunnel measurements of research shapes used in computer simulation of vehicle trajectories

[AIAA PAPER 69-229] 06 p0864 A69-18130

Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes

13 p2380 A69-28462

Laser ignited Zr droplet free fall combustion in oxygen, analyzing metal conservation and luminosity correlation assuming reflux action from fog layer

[WSCI PAPER 69-1] 16 p2830 A69-32342

Fluctuations evolution in density perturbations analyzed to obtain free fall and free expansion universe models, showing no difference between expanding and static Newtonian universes

18 p3203 A69-35347

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat

19 p3259 A69-36832

Fluid motion in free falling partially filled cylindrical vessel due to sudden vertical velocity change, considering free surface disturbances

21 p3692 A69-38684

FREE FLIGHT

Multichannel telemetering device for magnetically suspended or free flight wind tunnel models noting strain gage pickups, switching and auxiliary circuits

[ONERA-TP-643] 02 p0226 A69-11623

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers

[AIAA PAPER 69-133] 06 p0862 A69-18050

Autorotation characteristics of various shapes in subsonic and hypersonic flows for mechanics of free flight reentry to earth impact

[AIAA PAPER 69-132] 06 p0863 A69-18062

Free flight sharp cone drag measurements in rarefied hypersonic flow

13 p2199 A69-28244

Dynamic plasticity of nonsymmetrical free flight collision impact of crystalline solids, using linear temperature dependent stress-strain function and finite amplitude wave expansion

21 p3840 A69-39298

Free flight telemetry base pressure measurements on slender cones and domed afterbodies in hypersonic laminar flow, using shock tunnel test facility

[AIAA PAPER 68-698] 24 p4249 A69-43675

FREE FLIGHT TEST APPARATUS

Free flight telemetered base pressure test data correlation for high Mach numbers, noting facilities and instrumentation

20 p3458 A69-37196

FREE FLOW

Hydromagnetic stability of free boundary layer between two uniform streams in presence of aligned uniform magnetic field at large Reynolds number

02 p0287 A69-11832

Gray radiation and conductive heat transfer in Oseen-like free mixing flow, computing temperature distribution by inversion integral

02 p0354 A69-12504

Turbulent free shear layers in isoenergetic flow, correlating theory and experiment

[ASME PAPER 68-FE-9] 05 p0748 A69-16077

Gaseous film cooling at various hot gas acceleration rates and free stream turbulence levels

06 p1033 A69-17557

Free stream turbulence influence on stagnation zone heating in arc heated hypersonic facilities, obtaining stagnation point heating rates

[AIAA PAPER 69-167] 06 p1039 A69-18198

Free turbulent mixing, emphasizing flowing gas mixtures with and without chemical reaction

[AIAA PAPER 69-31] 06 p0915 A69-18223

Stagnation point heat transfer sensitivity to free stream turbulence attributed to external vorticity, noting correlation with Prandtl number

09 p1622 A69-21905

Buoyancy effect on boundary layer flow over semi-infinite vertical plate heated to constant temperature in uniform free stream

11 p1874 A69-25352

Free transonic gas flow incident on symmetrical profile at angle of attack with given velocity at infinity calculated using difference scheme

11 p1820 A69-25469

Laminar temperature and velocity profiles near plane rectangular surface for free supersonic flow, solving partial differential equations for mass, momentum and energy conservation

13 p2309 A69-28025

Flow field instability over concave bodies in supersonic free stream computed by integration of gasdynamic equations, noting application to supersonic parachutes

[AIAA PAPER 68-946] 13 p2199 A69-28228

Extension of Helmholtz classical problem of flows with discontinuous surfaces, considering two sources and transverse plane

14 p2433 A69-29683

Transport properties interrelationship in turbulent pipe flow and free turbulence

15 p2591 A69-30792

One dimensional free expansion of collisionless plasma tested as function of thermal equilibrium and confinement, using Vlasov equations and computer

16 p2819 A69-31685

Shock tunnel facility generating short duration high velocity high density air flow with equilibrium chemical simulation of free stream flight conditions

[AIAA PAPER 68-17] 16 p2766 A69-32167

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate

[AIAA PAPER 69-568] 16 p2842 A69-32693

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface

[AIAA PAPER 69-724] 17 p2952 A69-33436

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows

[AIAA PAPER 69-704] 17 p2953 A69-33453

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

[AIAA PAPER 69-683] 17 p2956 A69-33492

Transport properties of free turbulent mixing of subsonic coaxial streams by introducing environmental distributions in integrals of momentum, energy and species continuity equations

[AIAA PAPER 69-681] 17 p2956 A69-33495

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation

[AIAA PAPER 69-708] 17 p2894 A69-33501

Jet injection into free circular cross section cross wind using curvilinear dynamic model, assuming negligible Archimedean forces effect

18 p3124 A69-35149

Gas dynamics in transition regime between continuum motion at high gas density and free particle motion at low density limit

19 p3300 A69-36658

Fluid motion in free falling partially filled cylindrical vessel due to sudden vertical velocity change, considering free surface disturbances

21 p3692 A69-38684

Nonlinear incompressible potential flow with unbounded free surfaces, analyzing singularities in finite part of space

21 p3696 A69-39295

Reentry Vehicle Altitude-Velocity Sensor for continuously measuring hypersonic vehicles free stream density and velocity in atmosphere at low angle of attack

[AIAA PAPER 69-866] 21 p3725 A69-39392

Heat transfer from spheres in free finite width flow, determining heat transfer coefficient distribution as function of flow width and Reynolds number

21 p3855 A69-39849

Free stream dispersion without permeation using nonporous glass beads and solutes, examining flow rate, particle size distribution, solute diffusivity, etc

22 p3894 A69-39873

FREE JETS

- Free stream velocity in high enthalpy arc heated wind tunnel by measuring imposed temperature modulation apparent phase shift, describing circuit diagrams 22 p3926 A69-40444
- Supersonic free stream flow past finite conical body with subsonic surface gas injection 23 p4059 A69-41884
- Slot type jet interaction flow tests at free stream Mach 4 and 5, describing equipment, procedure and results 24 p4249 A69-43686
- Free convection flows about inclined infinite cylinders with isothermal surfaces 24 p4416 A69-43687

FREE JETS

- Viscous effects on impact pressure measurements in free jet low density gas flows at high Mach numbers 02 p0234 A69-12633
- Transonic flow around profile in blocked plane channel and in free jet, noting channel wall and jet edge effects on flow along profile 03 p0361 A69-13018
- Laminar two dimensional free jet outflow of incompressible nonNewtonian pseudoplastic fluid from orifice into mass of same fluid 04 p0586 A69-14406
- Turbulent free jet at miniature nozzle exit, analyzing wall attachment fluid amplifier and flow characteristics 05 p0746 A69-16012
- Heat transfer, temperature and velocity profiles in circular free jet can be described by heat conduction type equations 05 p0747 A69-16032
- Fluctuation velocity, apparent kinematic viscosity and turbulent shear stress in isothermal homogeneous free jets 06 p0909 A69-17169
- Stream function for plane free sonic gas jet flowing past profile 07 p1050 A69-18740
- Nongray radiation effects on compressible turbulent free jet mixing of nonsimilar gases, using stepwise spectral absorption coefficient and Beer law 08 p1253 A69-20844
- Closed form solution for boundary shape of underexpanded axisymmetric jet in still air 09 p1482 A69-21968
- Supersonic free jet with real gas effects and chemical reactions calculated by approximation 10 p1631 A69-22898
- Continuum flow boundary in freely expanding jet estimated from molecular mean free path and modulus of random motion mean velocity 10 p1679 A69-23425
- Attachment and separation of free jet from wall, discussing model equations for wall attachment fluid amplifier 14 p2428 A69-28877
- One dimensional approximation for free jet nozzle flow in perpendicular magnetic field, calculating velocity distributions 14 p2501 A69-29910
- Numerical analysis for spreading of free turbulent gas jets with arbitrary uneven initial distribution of momentum and heat and mass fluxes 15 p2590 A69-30157
- Monograph on static pressure and turbulence in free jets and jet flames covering radial velocity oscillations with and without chemical reactions, confined jets turbulence, etc 15 p2719 A69-31190
- Flow field of highly ionized arc heated supersonic free jet, using continuous flow test facility [AIAA PAPER 68-135] 16 p2772 A69-32153
- Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures [AIAA PAPER 69-538] 16 p2843 A69-32705
- German monograph on turbulence in isothermal free jets and free jet flames covering local flow variations, Reynolds number effects, exchange processes, etc 17 p3068 A69-32991
- Fluidic pressure ratio computing device based on two free jets interaction principle, describing prototype system design and analysis, electronics and overall error 18 p3133 A69-34309
- Free jet shock wave structure penetrated by surrounding pure gas molecules 18 p3086 A69-34819
- Rarified gas dynamics of blunt and sharp-pointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum 18 p3123 A69-34924

- Pure gas suction through free jet shock structure, analyzing aerodynamic effect of molecular separation 19 p3240 A69-36650
- Free jet boundary layer in mixing zone of hypersonic gas flow past body 20 p3513 A69-37094
- Low density free jet properties, discussing velocity distribution perpendicular to axis and correlation of all terminal parallel Mach numbers for monatomic gases 20 p3514 A69-37206
- Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method 22 p4000 A69-40594
- Mixing spread of hydrogen plumes and air pollutants exhausted into open atmosphere, predicting subsonic free round jets air entrainment 24 p4300 A69-43257
- Reverse flow profiles in turbulent free jet mixing with streamwise pressure gradient 24 p4306 A69-43684

FREE MOLECULAR FLOW

- Monte Carlo direct simulation for treating rarefied supersonic flows about bodies in transitional regime between continuum and free molecular flow 02 p0189 A69-12523
- Closed form solution of convective heat transfer to yawed concave hemisphere in free molecule flow 02 p0354 A69-12529
- Gas parameters in collisionless region during discharge into vacuum, considering plane and axisymmetric cases and free molecular boundary region 02 p0234 A69-12583
- Time independent flow of highly rarefied neutral gas past finite cone at zero angle of attack with freestream, noting molecular distribution function 04 p0541 A69-14712
- Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9] 05 p0698 A69-16089
- Weakly ionized wakes study in free quasi-molecular regime of supersonic flow, using Langmuir probe in wind tunnels, discussing ion density distribution 06 p0966 A69-17639
- Transmission and reflection coefficients of cylindrical tubes moving in free molecular gas flow determined by Monte Carlo method 06 p0911 A69-17877
- Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 07 p1050 A69-18707
- Complex bodies aerodynamic characteristics in free molecular gas flow by applying Monte Carlo method 09 p1430 A69-21793
- Asymptotic theory for obtaining nearly free molecular flow solutions uniformly valid throughout flow field based on linearized Boltzmann equation 11 p1818 A69-25283
- Mass flow rates for nearly free molecular flow through two dimensional slit for several tank pressure ratios 11 p1874 A69-25357
- Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9] 14 p2390 A69-29445
- Effective heat transfer coefficient lambda for microscopic Fe particles traversing rarefied air, oxygen and Ar target gases 16 p2769 A69-31870
- Thermal accommodation coefficients determination, comparing techniques based on free molecule flow heat flux data 18 p3230 A69-35071
- Homogeneous deformations of space and Cauchy problem for homogeneous free molecular motions, considering velocity fields and accelerations 19 p3444 A69-36803
- Density field surrounding leaking circular hatch of spacecraft treated as free molecular flow from annulus, superposing far field of effusive orifice flow 21 p3695 A69-39035
- Aerodynamic characteristics of moving and rotating bodies of revolution in free molecular rarefied gas flow, assuming Maxwellian thermal velocity distribution and diffuse specular interaction 24 p4243 A69-42583
- Varying ratio between mean free path and spherical particle radius at 0-10 km, discussing free molecular flow effects in cloud physics 24 p4345 A69-43145

- Monte Carlo calculation of free molecular flow over concave spherical surface, considering partial diffuse reflection and imperfect energy accommodation 24 p4248 A69-43592
- Electron temperature and density of inviscid free molecular nozzle flow of shock tunnel measured with thin wire Langmuir probes 24 p4317 A69-43648
- Shear stress and free molecular drag for gas flow along concave cylindrical surface oriented at angle of attack, analyzing multiple surface collisions effect 24 p4249 A69-43660

FREE RADICALS

- Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure 01 p0024 A69-10683
- Radio signals from hydroxyl radicals by maser action in early stars, noting emission magnitude and intensity spectrum dissimilarity at different frequencies 02 p0324 A69-12493
- Doublet electronic states of benzyl radical, discussing configuration-interaction calculations and transition predictions 03 p0472 A69-13321
- Free radicals produced in ribonuclease, lysozyme and trypsin during exposure in vacuum and various temperatures to electron and heavy ion irradiation 03 p0372 A69-13484
- Long lived radicals produced in crystalline ribonuclease and lysozyme by 120-Mev protons studied by ESR spectroscopy 03 p0372 A69-13485
- Trapped radical relationship to inactivation of trypsin exposed to UV by measuring radical concentration and inactivation degree 03 p0372 A69-13486
- EPR investigation of free radicals formed during mechanical fracture and gamma irradiation, discussing recombination rate and reaction rate with oxygen 03 p0434 A69-13871
- Photometric methods for determination of H atom and hydroxyl radical concentrations in hot gases in convergent-divergent nozzles, noting Li/LiOH lithium hydroxide absorption 09 p1496 A69-21952
- Equilibrium between H and OH radicals in turbulent H flames, noting component concentrations in H-O-N flames of different composition 11 p1999 A69-24487
- Kinetics of combustion promotion of hydrogen-hydrocarbon mixtures by active particles, free atoms and free radicals using differential equations 17 p3069 A69-33139
- Electric quadrupole coupling for N 14 in aminedissulfonate studied by observation of second order transitions in electron spin resonance spectra 18 p3178 A69-35474
- Electron spin resonance spectra of gamma irradiated single crystals of 9-methyladenine, analyzing H abstraction radical and temperature effects 19 p3264 A69-35974
- Free radicals destruction rates by gamma irradiation at 77 K measured as first order function of dosage, using electron spin resonance spectroscopy 19 p3265 A69-36376
- Temperature and concentration measurements of H radical in hydrogen flames 21 p3669 A69-38807
- Cometary nuclei composition as last samples of early solar system composition, discussing dirty snowball model and radical lifetime problem 22 p4013 A69-40097

FREE VIBRATION

- Simultaneous partial integro-differential equations governing natural vibrations of arbitrary cross section cylindrical tubes, suggesting Fourier series solution 01 p0164 A69-10065
- Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence 01 p0161 A69-10205
- Idealized delta wing free-free oscillations determination by deriving equations of motion for flexibility and rigidity and formulating boundary value problems 01 p0172 A69-11358
- Ultraspherical potential approximation in nonlinear symmetric free oscillations applied to systems with hardening and softening cubic nonlinearities 01 p0107 A69-11418
- Modal substitution method for free vibration analysis of large discrete undamped dynamic systems 02 p0338 A69-11747

- Spectral peaks for torsional oscillations of earth, estimating free periods from observations at six stations around earth
02 p0243 A69-12007
- Longitudinal stress pulse propagation in finite length free-free bar with variable cross section, noting stresses in projectile impacting plane target
04 p0671 A69-14412
- Natural vibrations of cylindrical panels analyzed on basis of Lamé parameters, shell equations and energy method
04 p0674 A69-14592
- Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells
04 p0675 A69-14704
- Asymptotic solutions of linear difference equations, discussing applications to eigenvalue problems of free oscillations of model galaxies
04 p0623 A69-14946
- Frequencies and natural oscillation modes in sporting gliders, demonstrating horizontal oscillation induced aileron suspension brackets destruction
04 p0549 A69-15416
- Free vibration of thin laminated orthotropic cylindrical shells
06 p1020 A69-17145
- Natural frequencies and modes of skew membranes obtained by Rayleigh-Ritz method
06 p1021 A69-17146
- Ritz method for natural oscillations of ideal liquid in spherical vessel with various filling levels, considering vertical perturbing force
06 p0910 A69-17333
- Plate theories of linearly elastic materials under free undamped vibration, giving 500 references
[AIAA PAPER 69-24] 06 p1027 A69-18061
- Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia
[AIAA PAPER 69-55] 06 p1027 A69-18070
- Radial vibrations of thin cylindrical shells subjected to thermal loadings, discussing temperature distributions, thermal stresses and natural frequencies
[AIAA PAPER 69-59] 06 p1028 A69-18143
- Dynamic tests of mechanical properties of polyamide Tarlon X-A using free and resonant vibrations methods
09 p1528 A69-21496
- Free vibration frequencies and mode shapes for thin orthotropic oblate spheroidal shells, noting isotropic oblate spheroidal shell and isotropic spherical shell
09 p1613 A69-21719
- Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying irrotational motions in compressible and incompressible ideal fluids
09 p1613 A69-21720
- Self gravitating incompressible fluid sphere free oscillations, deriving characteristic equations for arbitrary viscosities
09 p1481 A69-21790
- Self excited aeroelastic galloping oscillations of long prismatic bodies subjected to wind velocity, noting effect of aerodynamically unstable cross sections
09 p1615 A69-21923
- Free transverse vibrations of rectangular flat plate simply supported along periphery and rigidly connected to interior columns
[ASCE PAPER 739] 09 p1616 A69-21928
- Structural damping coefficient for free vibrations of one degree freedom general systems motion
09 p1617 A69-22076
- Large amplitude free vibration of isosceles right angled triangular plate with simply supported edges
10 p1800 A69-23236
- Natural frequencies and associated composite loss factor for laminated plate with alternate elastic and viscoelastic layers, deriving partial differential equations
[ASME PAPER 69-VIBR-68] 10 p1805 A69-24158
- Free vibrations in axisymmetrically loaded orthotropic circular conical shells with longitudinal and circumferential stiffening based on linearized theory, considering shear deformation and inertia
11 p1969 A69-24327
- Transverse beam natural vibration frequency evaluation method from Timoshenko theory
11 p1970 A69-24581
- Numerical analysis of natural oscillations of three layer sandwich plates of rectangular planform, considering end conditions
11 p1976 A69-24773
- Free vibration modes of infinite uniform plate in linear coupled theory of thermoelasticity, considering heat transfer conditions
11 p1976 A69-24793
- Nonlinear free vibration of beams with clamped and supported ends subjected to axial load, considering symmetric and antisymmetric modes
11 p1983 A69-25024
- Energy dissipation in freely oscillating bodies under static stresses described by differential equation, assuming elliptical hysteresis loop
11 p1919 A69-25092
- Unforced periodically varying systems, developing approximate solutions with Floquet theory
11 p1909 A69-25289
- Free vibration frequencies of simply supported parallelogramic plates, noting skew angle splitting of degenerate frequencies and frequency crossing of modes
11 p1987 A69-25379
- Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings
11 p1992 A69-25520
- Free vibration of discretely stiffened cylindrical shells with arbitrary end conditions programmed for digital computer, considering flexure, extension, torsion and nonsymmetric stiffener cross section
11 p1992 A69-25521
- Free periods of oscillation of incompressible rotating fluid bounded by rigid concentric spheres, using Longuet-Higgins solution of Laplace tidal equation
11 p1876 A69-25558
- Magnetically selective microwave filters using magnetodynamic natural oscillations in premagnetized ferrite sphere at cavity center
11 p1855 A69-25626
- Zero Gaussian curvature rib reinforced shells free oscillations reduced to nonreinforced shell forced oscillations under cyclic loads
12 p2177 A69-25996
- Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses
12 p2089 A69-26190
- Free vibration fundamental natural frequency of shallow shell or dished plate with simply supported square boundary
12 p2179 A69-26211
- Natural vibration modes of linearly tapered rectangular plates, approximating plate characteristic shapes with series of products of beam characteristic shapes
13 p2358 A69-27211
- Vibration modes in four lowest natural frequencies of clamped rectangular plates with linear thickness variation, using Ritz method
13 p2361 A69-27442
- Free and forced vibrations of elastic layer, using iteration procedure based on asymptotic integration of linear theory of elasticity dynamic equations
13 p2363 A69-28126
- Sine series solution for flexural vibration of rectangular isotropic plates applied to free vibration of orthotropic plates
13 p2363 A69-28128
- Free vibrations of laminated anisotropic rectangular plates with clamped edges analyzed by Rayleigh-Ritz energy method
13 p2371 A69-28673
- Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence
14 p2530 A69-28741
- Uncoupled field equations for free large amplitude axisymmetric transverse vibrations of spinning membrane disks
15 p2704 A69-30303
- Oscillations of freely supported cylindrical shell of arbitrary cross section with breaks along generatrix, determining eigenvalue of infinite matrix with normal determinant
15 p2707 A69-30581
- Laminar thin orthotropic cylindrical shells natural and forced oscillations and dynamic deflection coefficient
15 p2715 A69-31202
- Natural vibration of isotropic plates in temperature field with nonuniform distribution over plate
16 p2871 A69-31891
- Transverse free vibration of slender cantilever subjected to compressive follower force
16 p2871 A69-31899
- Calculation of natural twisting and bending vibrations of beam with characteristics varying along length
16 p2873 A69-32130
- Anisotropic conical shells free vibrations analyzed by Galerkin and operator-matrix methods, neglecting transverse shear deformation and rotatory inertia effects
16 p2874 A69-32165
- Free vibrations of thin truncated circular conical shell and reinforcing rings and stringers, determining resonant frequencies for stiffened and unstiffened configurations
17 p3051 A69-32955
- Free-free transverse vibration damping phenomena, calculating strain amplitude dependence of internal friction at various frequencies
17 p3051 A69-32961
- Planetary free vibrations, discussing models for earth, moon, Venus and Mars, rotation and ellipticity effects and measurement on seismometers, gravimeters and magnetometers
17 p3031 A69-33097
- Frequency and mode shapes of conical shell free oscillations related to shell parameters and boundary conditions
17 p3058 A69-33201
- Test stand for free oscillations frequencies and mode shapes of truncated conical shells of revolution with clamped edges and one free edge
17 p3058 A69-33202
- Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates
[ASME PAPER 69-APM-10] 18 p3213 A69-34386
- Supported shafts natural vibration frequencies determined by averaging shaft parameters, noting suitability in HF ranges
18 p3147 A69-34546
- Natural longitudinal oscillations of variable cross section straight rods, assessing errors due to use of finite difference schemes
18 p3217 A69-34581
- Nonlinear systems of differential equations to free oscillations about equilibrium, obtaining periodic solutions
18 p3172 A69-34591
- Free oscillations of rigidly clamped circular plate carrying concentrated masses, deriving frequency equation and value of lower roots
18 p3226 A69-35377
- Plane LF oscillations of eccentric cylinder under harmonic pressure applied to lateral surfaces, noting natural oscillations
18 p3226 A69-35380
- Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc
19 p3437 A69-36201
- Nonlinear free motion of conservative oscillator with one degree of freedom calculated by collocation method
19 p3438 A69-36308
- Free oscillation period of nonlinear oscillators with one degree of freedom, discussing approximation method
19 p3373 A69-36310
- Coupled dilatational and equivoluminal modes of free vibration for elastic prisms and polygonal plates, using Poisson ratio and wave path construction
19 p3444 A69-36801
- Free vibrational characteristics of thin walled circular cylindrical shells with layers of anisotropic elastic material laminated about middle surface
20 p3627 A69-37767
- Cold disk galactic models free short wavelength oscillations, obtaining asymptotic approximations for eigenfrequencies and eigenfunctions of bending and planar modes
20 p3611 A69-38151
- Natural oscillations of loaded strings, membranes and geometric bodies with distributed loads treated as material discontinuities
20 p3578 A69-38292
- Natural oscillations of end-hinged solid beam with variable parameters and concentrated masses, determining natural frequencies
21 p3833 A69-38575
- Natural oscillations of free surface liquid and elastic bottom of cylindrical cavity determined by integrodifferential equations based on liquid level
21 p3693 A69-38720

Free vibration of thin cylindrical shells with thickness discontinuity, considering natural frequencies and mode shapes dependence on thick/thin ratio
21 p3836 A69-38984

Curvilinear planform plates natural oscillations, assuming small elastic bending strain obeying Hookes law
22 p4038 A69-39912

Harmonic linearization for analyzing dry friction effect on gyroscopic stability with free play in mechanical couplings, showing effective damping of natural oscillations
23 p4163 A69-41554

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method
23 p4230 A69-42004

Rectangular waveguide with periodic array of infinitely thin metallic strips, studying intrinsic oscillations critical frequencies and amplitude spectrum
23 p4124 A69-42036

Time dependent natural oscillations of plane open resonators infinite periodic sequence, considering electromagnetic energy transfer into ambient medium
23 p4139 A69-42039

Density model for free oscillations of earth, noting dependence on core radius and S wave velocity at top and bottom of D layer
23 p4158 A69-42117

Asymmetric dynamic response to free and forced vibrations of thin membrane shells at given stress state due to previous loads
24 p4399 A69-42990

FREEDOM FIGHTER AIRCRAFT U F-5 AIRCRAFT

FREEZING NT ZONE MELTING

Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink [AIAA PAPER 69-95]
06 p1038 A69-18126

Invertebrates resistance to explosive decompression and low end pressure, noting hypoxia and freezing as cause of death
07 p1059 A69-18537

Vacuum, radiation and freeze drying effects on survival rate of microorganisms, noting influence of protective materials on extent of damage
07 p1064 A69-18943

Structural and functional changes in cells as result of freezing of muscular tissue or suspension of erythrocytes
10 p1642 A69-23117

Freezing of water droplets in thermal equilibrium with gas mixtures, considering droplet shattering and gas volume
12 p2126 A69-26018

FREEZING POINTS U MELTING POINTS

FREIGHT U CARGO

FREIGHT COSTS

Air cargo traffic increase, discussing technical and economical prospects, use of intermodal containers and transportation automation tendency
01 p0008 A69-10030

Legal consequences of discrepancies between freight rates for airline tickets and bills of lading and actual invoices, discussing liability areas and regulated tariff
07 p1244 A69-19232

Handling and processing function in air freight transportation, discussing system design approaches, cargo terminals, materials handling systems and containerization
22 p4053 A69-40483

FRENCH GUIANA

French space center in Guiana, discussing geographic location advantages for payload, rocket launching, space rendezvous, etc
02 p0228 A69-11920

FRENCH SATELLITE NT DIADEME SATELLITE

French satellites structure, power and communications systems, stabilization and detector groups
02 p0333 A69-11917

D-2 satellite radiation dose based on upper atmosphere electron and proton distribution model, simulating electron bombardment and aging of materials and subsystems
11 p1949 A69-24869

FRENKEL DEFECTS

Poole-Frenkel model for internal field assisted thermal emission with compensation for relative densities of donor and acceptor sites
04 p0640 A69-14450

Approximate solution to differential equations describing primary radiation defects transformation into secondary defects in semiconductors
07 p1199 A69-18679

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies
13 p2318 A69-27885

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies
21 p3782 A69-39144

FREON

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect
08 p1341 A69-20513

Freons applications to radiation detector cooling, calculating specific volumes and compressibility factors for Freon 14
14 p2447 A69-29330

Toxic effects of Freon R FE 1301 on animals and human beings at different concentrations, assessing judgement, alertness and neuromuscular skill
18 p3098 A69-35061

Ti-6Al-4V alloy general and stress corrosion behavior in Freon environments, discussing fracture mechanics
18 p3150 A69-35411

Freon boiler designed for Rankine cycle heater fired on hydrocarbons with over 2000 F flame front temperature, considering radiant/convective heat transfer
23 p4068 A69-42239

NT VERY HIGH FREQUENCIES

NT VERY LOW FREQUENCIES

Small signal characteristics and frequency response of diode-stabilized integrated linear circuits, discussing feedback, impedance, bias-diode, etc
01 p0041 A69-10204

Dynamic polarizability at imaginary frequencies, deriving upper and lower variational bounds with functionals containing trial functions
01 p0122 A69-10284

Second order nonlinear coefficient measurement for optical generation of millimeter wave difference frequencies in GaAs waveguide, using carbon dioxide laser
06 p0928 A69-17903

Frequency dependence of input impedance of voltage controlled bootstrap amplifier stages
07 p1090 A69-18294

Two and three frequency techniques for measuring group delay time of communication channels
07 p1076 A69-18557

Dielectric radome designs for operation at harmonically unrelated frequencies in C and K bands, discussing sandwich structure of A and B types
07 p1110 A69-19523

Ionospheric plasma density vertical profile by measuring reflected radio waves phase frequency characteristics
12 p2070 A69-26685

Pulse frequency integral estimate devices with integrating chemotron tetrodes for automatic systems metering applications
13 p2227 A69-27522

Reactive parameter scatter effect on amplitude frequency characteristics of regenerative reflection amplifiers based on equivalent circuit
13 p2235 A69-28515

Frequency time dispersion of storm sudden commencement micropulsations, noting polarization effects
14 p2440 A69-29129

FREQUENCY AMPLIFIERS U AMPLIFIERS

FREQUENCY ANALYZERS

Computer analysis of linear active nontime varying circuits by two graph topological approach based on Binet-Cauchy theorem
01 p0037 A69-11349

Filter uncertainty for time or frequency resolution in analysis of waveform, decomposing characteristic functions and determining least uncertain realizable filter
02 p0226 A69-12306

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
04 p0556 A69-14462

Transistorized frequency detector for sensing system load changes affects speeds of control valves of prime movers
06 p0896 A69-17478

Multichannel HF resolution spectral analyzer of pulses reflected from ionosphere applied to dependence of cross correlation coefficient on frequency separation
06 p0897 A69-17740

High speed photodetector frequency characteristics using multimode gas laser and Kerr cell
10 p1707 A69-24211

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
14 p2410 A69-28833

Ferrite frequency mixers used with heterodyne receiver, studying combination and cross noise rejection efficiency
15 p2574 A69-30129

Oscillators frequency instability theories emphasizing difference between concepts of frequency instability and spectral purity
22 p3900 A69-40930

Frequency response of control systems analyzed by digital computer using operational arrays, noting extensions to time response and root locus computation
22 p3909 A69-41255

FREQUENCY ASSIGNMENT

Signal interference criteria in considering frequency sharing between communication satellite systems and terrestrial radio services
09 p1449 A69-21273

Coordination distances and interference probabilities to control interference in frequency sharing between communication satellite systems and terrestrial radio services
09 p1450 A69-21280

Frequency bands allocations for space research and radio astronomy development, noting Inter Union Commission of Frequency Allocations recommendations
18 p3100 A69-34376

Satellite systems for air traffic control, navigation, communications and telemetry in view of regulations of frequency allocations
18 p3103 A69-35089

ITU space communication projects, discussing frequency registration, progress reports from member countries and committees, UN resolutions, communication satellites, etc
19 p3456 A69-36821

Frequency assignment methods for Intelsat 2 and 3 communication satellites [AIAA PAPER 68-454]
21 p3674 A69-39226

Three phase DC-AC inverter with low harmonic distortion, good efficiency and packaging capability, stabilizing frequency by crystal controlled clock oscillator
23 p4074 A69-42294

NASA program for radio spectrum utilization in aerospace communication systems
23 p4128 A69-42502

FREQUENCY BANDS U FREQUENCIES

FREQUENCY COMPRESSION DEMODULATORS

Synchronization errors effects on performance of compression-line demodulator, increasing mean-square error in measuring instantaneous frequency and locking probability
08 p1271 A69-19920

FREQUENCY CONTROL

NT AUTOMATIC FREQUENCY CONTROL

Frequency dependences of induced HF and high pressure discharge parameters, noting optimal frequency

cy range independence from particular gas and gas flow rate
03 p0481 A69-14144

Harmonic balance method to investigate phase locked oscillator stationary modes
04 p0559 A69-15138

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
04 p0612 A69-15372

Frequency controlled time delay network for broadband phased array antenna steering
04 p0580 A69-15469

Gas laser frequency stabilization, considering electromechanical control systems
05 p0773 A69-16230

Frequency and polarization selection of neodymium glass laser oscillators by directing secondary radiation into laser cavity and duplicating spectral properties [IEEE PAPER P-3]
05 p0775 A69-16324

Selective resonators for laser emission spectral structure control, proposing dispersion power increase by inserting telescopic system
05 p0777 A69-16371

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
07 p1148 A69-18803

Multistage amplifier design with frequency compensation by eliminating stages in HF region
07 p1103 A69-18877

Carbon dioxide laser radiation frequency controlled by varying boron trichloride pressure in cell inserted in resonator
08 p1323 A69-19804

Center feed system for broadening frequency bandwidth in X-band edge slotted waveguide array antenna
08 p1286 A69-20836

Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation
08 p1327 A69-21088

Frequency selective mechanical filter and LCR circuits and applications, noting inductances in solid state and thin film technology
09 p1467 A69-22558

Singular integral method in approximation for synthesizing sequence of functions with spectrum of limited length
09 p1460 A69-22642

Frequency retuning characteristics of oscillator employing avalanche transit-time diode with complementary varactor subject to current or voltage variation
11 p1844 A69-24449

Voltage amplitude for combination frequency of small signal transistor amplifier calculated from feedback dependence
13 p2226 A69-27218

Frequency selector for gas laser, considering monochromatic emission and multimode oscillation
16 p2795 A69-31608

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
16 p2797 A69-32119

Solid state CW laser frequency control during operation, discussing emission properties and laser applications
19 p3331 A69-35864

Solid state laser emission frequency control and retuning using dispersive resonators, analyzing interference methods for wavelength measurement
19 p3331 A69-35865

Frequency controlled unmodulated laser for long path interferometry, noting servoloop correction of frequency relative to Lamb dip
20 p3553 A69-37303

Resonant parametric oscillator stable and random phases, considering smooth frequency tuning and two quantum luminescence laser construction
20 p3554 A69-37723

Single mode He-Ne laser frequency stabilization by Zeeman effect
20 p3554 A69-37729

He-Ne laser emission tuning with thin absorbing metallic film situated near reflecting mirror
20 p3555 A69-37730

Eye elemental response to individual frequency jumps in oscillations of light, noting transient effect polarity
21 p3650 A69-38320

Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
21 p3736 A69-38948

Spectral characteristics of Q switched single frequency ruby laser with tunable emission frequency in giant pulse mode
21 p3737 A69-38991

Reflex klystron with closed electron flux in crossed electric and magnetic fields permitting inertialess frequency returning
21 p3682 A69-39128

Periodic solutions of differential equation as example of locking in of frequencies, developing mapping procedure for perturbation methods application
22 p3979 A69-39894

FREQUENCY CONVERTERS
NT DOWN-CONVERTERS
NT PARAMETRIC FREQUENCY CONVERTERS

Graetz-connection frequency converter and three phase shunt-connection commutatorless motor, noting speed control performed by electronic circuit
01 p0012 A69-10064

Thermal and shot noise in pumped resistive diode for frequency conversion, analyzing equivalent circuits
03 p0406 A69-13828

Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders
04 p0634 A69-14456

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
04 p0577 A69-14850

Transistorized single sideband detector-converter operation in presence of large signal and heterodyne voltage levels, deriving equation for transmission coefficient
05 p0730 A69-16220

VHF to UHF conversion, noting modular UHF telemetry transmitter, miniature UHF special purpose transmitter, RF power amplifiers and telemetry receiver
05 p0732 A69-16305

Conversion of range telemetry systems /CORTS/ program noting installations and standardization
05 p0743 A69-16306

Tunable Raman upconverter as coherent light generator, using Q switched Nd-YAG laser beam [IEEE PAPER B-2]
05 p0774 A69-16309

Approximate functions for tunnel diode dynamic conductance in three voltage ranges and Fourier conductance terms for tunnel diode frequency converters
05 p0735 A69-16647

IR radiation at 10.6 micron from two point sources mixed with collimated ruby laser radiation in proustite, obtaining visible image
06 p0928 A69-17904

Wide range current-to-frequency converter with pulse frequency linear to input current
07 p1107 A69-19170

Microwave converters structural characteristics, calculating noise figure
08 p1285 A69-20594

Nonlinear capacitive parallel frequency converter circuit stability, using filtered circuit method
08 p1299 A69-21148

Autodyne frequency converters minimum noise and conversion factor calculation and optimal mode determination
09 p1469 A69-22631

Frequency conversion in microwave crystal mixer with EMF amplitude fluctuations in heterodyne
09 p1469 A69-22644

Visible imaging of IR objects by conversion of IR frequency to visible with sum-frequency generation within nonlinear dielectric medium
11 p1897 A69-25037

Microwave filters with lumped capacitances and coupled waveguides derived by frequency conversion from lumped filters circuits
11 p1855 A69-25628

Angle-to-code converter designed on basis of quantum magnetometers frequency sensors, transforming vector sum of bias magnetic fields into pulse repetition rates
12 p2016 A69-25963

Current to frequency converter for astronomical photometry, discussing oscillator drift, linearity characteristics and feedback pulse counting
12 p2040 A69-26479

Nd-doped glass pulsed laser with selected second harmonic radiation and KDP crystal frequency converter operating T 12Hz and 530 nm
12 p2108 A69-26594

FREQUENCY DISTRIBUTION

Multiband frequency conversion in filters or correcting circuits with four terminal networks, noting prototypes
13 p2235 A69-28519

Power conversion efficiency of frequency doubler using ideal nonlinear capacitance with arbitrary output phase angle
14 p2421 A69-29537

Homodyne frequency converter design using microwave oscillator with bitonal frequency modulation
14 p2451 A69-29801

CdS films vacuum deposited on optically polished single crystals used for converting microwave radio signals into hypersonic waves
15 p2575 A69-30236

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
15 p2575 A69-30242

Varactors for frequency conversion circuits, discussing efficiency and output power
15 p2578 A69-30797

Negative resistance converter with single differential input operational amplifier, discussing input and output signal
15 p2580 A69-31091

IR radiation detection sensitivity emphasizing frequency up-conversion
17 p2969 A69-32839

Noise during frequency combination and conversion in mixer
17 p2931 A69-33911

He speech processor for aerospace applications, discussing He speech distortion nature
17 p2911 A69-34095

Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance
19 p3270 A69-36238

Solid state traveling wave optical quantum amplifier for conversion of modulated signal carrier frequency, applying to frequency conversion in laser communication links
21 p3739 A69-39540

X ray scintillation spectrometers temperature stabilizing circuit, describing amplitude-frequency conversion technique for position stability
21 p3727 A69-39856

Symmetrically regulated AC/DC converters power characteristics improved by switching in phase rectifiers twice during control cycle
24 p4254 A69-42570

FREQUENCY DISTRIBUTION

Generalized pair of space correlation and wave number spectrum functions applied to plasma electron density fluctuations and velocity fluctuations of background fluid
01 p0127 A69-10339

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error
01 p0031 A69-10785

Particle size frequency distributions and lunar surface materials, showing impossibility of distinguishing between impact fragmentation of surface and pyroclastic rock deposition
02 p0325 A69-12567

Phonon states effective density in neodymium trichloride from vibronic spectra accompanying electronic transitions in trivalent Pr and Nd ions
03 p0473 A69-13907

Space-frequency correlation relationship of complex field fluctuations, amplitude and intensity to levels and phases of waves propagating in medium of random inhomogeneities
04 p0557 A69-14774

Frequency distribution of wind velocity as function of height, averaging time and thermal stratification
04 p0628 A69-15088

Blade natural frequency distribution around rotor and mechanical coupling between blades effects on flexing amplitudes under forced vibration [ASME PAPER 68-WA/GT-3]
05 p0837 A69-16139

Numerical determination of Doppler effect and reduced Doppler frequency difference for two coherent radio waves emitted from earth satellite
07 p1087 A69-19610

Frequency and radial velocity for various cepheid binaries, discussing hot companions detection through photometry
07 p1223 A69-19627

Propagation induced phase fluctuations reduction in widely separated oscillators, presenting microwave and optical methods
08 p1273 A69-20022

FREQUENCY DIVIDERS

Self damped pneumatic vibration isolators by modifying characteristics throughout frequency range, noting inertia block for improving HF behavior
08 p1301 A69-20398

Frequency distribution curves of spot groups according to area, confirming existence of stable stages in evolution of sunspots
08 p1379 A69-20612

One and two dimensional frequency distributions for probability estimates of climatological quantities, discussing temperature and interdiurnal changes
09 p1535 A69-21520

Frequency effects in laser with nonlinearly absorbing gas cell inserted in resonator, noting self stabilization of generation frequency
09 p1520 A69-22661

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error
10 p1653 A69-23114

Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level
10 p1689 A69-23939

Sunspot lifetime, maximum area and cyclic variations recorded in photoheliographic results of Greenwich, discussing frequency distribution and mean
10 p1770 A69-24000

Analytic investigation of spectrum of electrical signals induced by spherical defects in ferroprobe sensors
10 p1675 A69-24072

Periodic solutions of quasi-linear self contained system with several degrees of freedom in case of commensurate frequencies, showing coordinates functions breakdown
11 p1920 A69-25749

Descriptive statistics in quality control dealing with variability and probability, discrete and continuous variables, frequency distributions and measures of central tendency and dispersion
12 p2100 A69-25846

Phase pulsations between normal frequencies and combination tones in CW gas laser output, analyzing observations by scanning interferometer
12 p2108 A69-26635

Statistical distribution of instantaneous frequency and power of signal associated with Doppler spectrum for exponentially distributed and determinate frequencies
12 p2032 A69-26863

Amplitude and frequency spectra for Ipc pulsations during geomagnetic storms
14 p2441 A69-29417

Frequency distribution and statistical characteristics of high level RF noise produced by high permeance electron beam of magnetron injection gun/MIG/
14 p2449 A69-29558

Sporadic E layer frequency characteristics dependence on reflected signal fading, showing fine structure influence and maximum value of mean electron concentration
14 p2442 A69-29733

Frequency distribution of sudden cosmic ray intensity increases, considering Forbush phenomenon
14 p2514 A69-29773

Temperature, velocity and density perturbation propagation as heat convection wave in viscoelastic thermally compressible heat conducting fluid, analyzing damping and frequency spectra
16 p2878 A69-31952

Electromagnetic wave propagation in plasmas and plasma instabilities due to oscillations, deriving equations for frequency distributions in various plasma compositions
16 p2823 A69-32243

Frequency distribution of star masses formed from solid H grains clouds, noting agreement with Salpeter initial mass function
16 p2862 A69-32372

Radiation diffusion in plane-parallel isothermal gas layer of two and three level atoms, considering stimulated emission and frequency redistribution
16 p2864 A69-32587

Solar image motion frequency spectra analysis via photoelectric equipment, showing influence on photographic pictures, spectra and modulation transfer functions for diffraction telescope
17 p3029 A69-33047

Spatial frequency distribution of linear array with randomly located elements from probabilistic analysis
17 p2929 A69-33873

Thin disk galactic models small oscillations, discussing frequency spectra and types of continua
18 p3196 A69-34551

Occurrence frequency distributions at microwave frequencies as function of peak intensity and directivities of solar bursts
18 p3187 A69-34969

Statistical characteristics of wind wave development in initial stage, obtaining distribution functions and frequency spectrum for various velocities and temperatures
18 p3167 A69-35341

Optical frequencies mixing based on photoelectric effect in metals and semiconductors, noting internal photoconductivity
19 p3332 A69-35871

Energy criteria inconsistency in evaluating frequency band changes attributed to simultaneous narrowing and broadening of different signal power bands
19 p3278 A69-36716

Frequency spectra of Pi2 geomagnetic field pulsations, noting effects of auroral zone location, configuration and structure
20 p3520 A69-37038

Qualitative interpolation formula for phonon frequency spectrum of mass disordered alloys three dimensional systems at high concentrations
20 p3583 A69-37279

F 2 critical frequency meridional cross sections latitude profiles based on global network ionospheric stations observations, confirming daytime Northern Hemisphere ionization maximum
20 p3526 A69-37661

Sideband structure of transmitted frequency spectrum exhibited by plasma wave features on topside ionograms, noting harmonic resonances
20 p3496 A69-37891

Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands
21 p3737 A69-38998

Statistical analysis of wind velocity measurements at floating buoy stations, presenting velocity power spectra for different frequency bands
21 p3758 A69-39111

Natural frequency equations for torsional vibration of fixed/fixed and fixed/simply supported uniform thin walled beams of open section based on energy method
22 p4040 A69-39935

Statistical analysis of chromospheric flares connections with sunspots, using frequency distributions of flares occurrences in sunspot groups
22 p4001 A69-39996

Magnetic fluctuations in various frequency ranges, associated with earth bow shock, detected with search coil magnetometer on OGO 3
22 p3938 A69-40501

Frequency discrimination in optical harmonic generators, discussing spectral width of wideband laser for supershort pulses and spectral device, using frequency dependence of mode locking direction
22 p3965 A69-40964

Time domain expression derived for frequency varying nonperiodic square wave in FDM and FM systems, using orthogonal functions to obtain frequency spectrum
24 p4281 A69-42623

Heart murmurs frequency analysis on patients to improve detection of aortic insufficiency in presence of mitral stenosis
24 p4279 A69-43800

FREQUENCY DIVIDERS

Optimal coherent reception of frequency diversity signals in multipath channels investigated for noise immunity
01 p0028 A69-10375

Coherent diversity reception of discrete signals in presence of concentrated noise investigated for use of optimal solution circuits for noise elimination
01 p0028 A69-10376

Parametric frequency divider using reverse biased hyperabrupt junction diodes to provide nonlinear capacitance
02 p0217 A69-12152

Correlation coefficient between frequency diversified signals amplitudes estimated by approximation for two beam short wave radio channels
04 p0560 A69-15401

Transistor-transistor logic switching circuits design for use in frequency dividers with variable division ratios in frequency processing systems
05 p0729 A69-15963

Response curves of frequency changer circuits /multipliers and dividers/ using reactive nonlinearity calculated as function of filter mismatch
07 p1114 A69-18279

Natural amplitude and phase fluctuations of originally monochromatic oscillations at output of regenerative frequency divider with thermal and shot noise
07 p1099 A69-18526

Impacting oscillatory devices for use as mechanical frequency dividers
07 p1136 A69-19458

Antenna switch for cascading and separating RF channels of high power wideband broadcasting systems
11 p1854 A69-25617

System switch, separating RF bands according to frequency and polarization for simultaneous transmission from parabolic horn antenna
11 p1854 A69-25618

FREQUENCY DIVISION MULTIPLEXING

Dynamic tracking filter analysis and capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system
01 p0034 A69-11140

Electronically steered and shaped beams for linear and ring phased array antennas by sampling element signals multiplexed into single channel
04 p0570 A69-14307

Frequency division multiplex telemetry technique with double sideband-quadrature carrier multiplexing system, discussing data signals, channels and distortion
07 p1084 A69-19131

Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods
08 p1272 A69-19959

Preemphasis applications compared in active communication satellite systems for frequency division multiplex telephony and for TV
09 p1449 A69-21275

Precision trimmed RC active networks for high selectivity microelectronic filter fabrication for frequency division multiplex applications
09 p1466 A69-22452

One way measurement of dual inband frequency diversity improvement on HF ionospheric path with frequency division multiplexed FSK modulation
10 p1656 A69-23536

Optimum thermal and nonlinear noise intensities distributions in frequency division multiplex satellite communications systems, relating relay station power, frequency band and channels
14 p2412 A69-29426

Communication satellite frequency and time divisions multiple access problem, detailing microwave multiplexers design
14 p2417 A69-29688

Wideband multiplexers design with directional filters, discussing operational characteristics
15 p2581 A69-31524

Demand assigned frequency division multiple access-PCM system designed by COMSAT for satellite communication
16 p2749 A69-31602

Multiplexer network synthesis based on arbitrary divisibility of frequency range and obtainability of input impedance at all frequencies
21 p3681 A69-38530

Time domain expression derived for frequency varying nonperiodic square wave in FDM and FM systems, using orthogonal functions to obtain frequency spectrum
24 p4281 A69-42623

FREQUENCY MEASUREMENT

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results
02 p0237 A69-11668

Mass effect on frequency tested during approach of pulsar to sun
02 p0323 A69-12298

Beam laser as frequency standard, considering wavelength and molecular transfer constraints imposed by technology limitations and frequency stability requirements
03 p0440 A69-13715

Errors of wavemeter employing open resonator with spherical mirrors
03 p0407 A69-13983

Approximation formulas of Appleton-Hartree equations for nighttime medium wave frequency absorption in E region of ionosphere, discussing electron density
07 p1122 A69-18295

Frequency and stability measurements in far IR laser region
07 p1146 A69-18482

Frequency response from linearized dynamic equations for viscous incompressible fluid flow in viscoelastic tubes, discussing transfer gain
08 p1304 A69-20704

Automatic level measuring system, consisting of decade control oscillator, digital level generator and selective level meter for 200Hz-2MHz range
09 p1501 A69-22577

LF measurements with positive or negative temperature coefficient resistors based on current-voltage characteristics
11 p1845 A69-24522

Transverse beam natural vibration frequency evaluation method from Timoshenko theory
11 p1970 A69-24581

Characteristic frequencies approximation formula for gas bubbles in liquids compared with exact solutions
11 p1915 A69-24582

Count rate meter for statistical frequency of signals applied to input of trigger with Poisson distribution of pulse intervals
11 p1884 A69-24734

Radio signal carrier frequency and arrival time measurements, deriving expressions for phase amplitude distortions effects
11 p1835 A69-24959

Frequency measurement of moving spacecraft RF carrier waves at low SNR by analog recording of noisy signal and HF trigger tone, noting data processing and signal fading rate
12 p2038 A69-26051

High sensitivity LF and HF frequency deviation meter with resonant RC amplifiers for frequency discrimination and filtering
12 p2038 A69-26337

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results
13 p2257 A69-28699

Atmospheric multifrequency probing accuracy limitation imposed by irregularities based on scatter theory
14 p2449 A69-29535

Shields frequency ranges analysis to determine frequencies and parameters for electrostatic and magnetostatic modes transition to electromagnetic and microwave modes
15 p2562 A69-30120

Atomic and astronomical time and frequency measurement via Loran C and VLF/Omega phase tracking receivers
15 p2615 A69-31285

Laser harmonic frequency measurement application to absolute frequency determination of 84 micron heavy water laser
17 p2982 A69-33406

Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
17 p3006 A69-33674

Energy-frequency characteristics of vibrating machines obtained as spatial curves relating energy dissipation to system vibrations frequency
17 p3065 A69-33922

Microwave frequency measuring instruments design solutions for electric measurements reduction to length measurement
21 p3720 A69-38563

Resonance frequency behavior of waveguide cavity with evanescent air gap symmetrically loaded with dielectric
22 p3900 A69-40925

Thermonuclear explosion Operation Starfish effect on ionospheric state from recording in Central Kazakhstan, studying frequency characteristics
22 p3942 A69-41097

Empirical determination of equivalent frequency characteristics of nonlinear system in random noise, assessing measurement errors
24 p4289 A69-42950

FREQUENCY MODULATION
NT FEEDBACK FREQUENCY MODULATION
NT PULSE FREQUENCY MODULATION
NT PULSE FREQUENCY MODULATION
TELEMETRY

Frequency diversity for communication in fading environment, relating performance variance to between channel correlation variance
01 p0026 A69-10177

Injection locked oscillator FM receiver consisting of linear mixer and negative resistance oscillator in phase locked configuration, solving receiver output differential equation
01 p0042 A69-10247

Radar FM signal design with zigzag frequency variation, discussing relation between waveform characteristics and associated ambiguity function features
01 p0033 A69-11001

Electron distribution function of isotropic homogeneous Lorentzian plasma subjected to frequency modulated electric field calculated by successive approximation method
02 p0285 A69-11543

Superposition of discrete number of collinear amplitude modulated harmonic oscillations
02 p0281 A69-12252

AM and FM noise in mutually synchronized oscillators
02 p0220 A69-12449

Injection phase locking for synchronizing oscillators and reducing FM noise
02 p0220 A69-12450

Microwave measurements of AM and FM noise spectra with video frequency and RF coverage flexibility and high sensitivity
02 p0221 A69-12455

AM/PM noise conversion in solid state FM microwave signal sources, relating baseband noise power contribution to PM baseband noise power
02 p0212 A69-12462

Frequency locked loop /FLL/ to optimize loop filter and quantization of amplitude channel
03 p0390 A69-13202

Optimum demodulation of PAM-FM signal for case of minimum mean square error as performance criterion
03 p0392 A69-13250

MHD instability in current discharges in magnetic field stabilized by current frequency modulation higher than perturbation increment of plasma column
04 p0635 A69-14549

Digital nth order phase locked loop for FM demodulation
04 p0561 A69-15452

Frequency stabilization and noise suppression in argon FM laser
[IEEE PAPER P-7] 05 p0775 A69-16325

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network
05 p0721 A69-16531

Tube and transistor type quartz crystal FM oscillators circuitry and operating characteristics, discussing generation of three frequencies
05 p0732 A69-16532

Microwave generator of FM oscillations using two reflex klystrons and modified by wideband regenerative amplifier to minimize intrinsic AM
05 p0736 A69-16791

Statistical aspects of uncertainty function of linearly frequency modulated signals for nonstationary random process of phase errors
06 p0889 A69-17798

Incidental modulation effect on accuracy, signal loss and sensitivity of pseudorandom code systems
06 p0890 A69-17824

Q factors dependence of IMPATT diode oscillator FM noise, noting excess noise temperature correlation with diode current
06 p0899 A69-17826

External and internal modulation methods in lasers noting phase, amplitude and frequency modulation, birefringence, electrooptics and Stark and Zeeman effects
06 p0937 A69-18010

High power microwave oscillator /carpitron/ for pure or FM signal amplification, noting low output noise level
07 p1096 A69-18437

FM noise in two and three chamber klystron oscillators, discussing tubes to reduce noise and relative merits of active or passive stabilization circuits
07 p1096 A69-18438

Frequency modulated signal envelope passage through bandpass filter of inductively coupled circuits described by differential equation
07 p1100 A69-18555

AC fluidics for pressure pulse frequency control and monitoring in flow, discussing design and application to steam turbine speed control
07 p1058 A69-18938

OMEGA 4 100-k Hz ground station telemetry system for acquiring and processing outputs up to 23 FM and two TDM signals applied simultaneously from instrumentation recorder
07 p1105 A69-19103

Digital FM techniques, signal spectral properties, discrimination detection, phenomenological model, etc
07 p1081 A69-19105

Bit probability of PCM/FM for receiver with IF bandwidth equal to or greater than data rate, limiter-discriminator detection and postdetection filter
07 p1082 A69-19106

Smooth limiter effect on output of SNR for unbalanced and balanced FM discriminators, noting role of error function
07 p1106 A69-19127

Frequency feed forward open loop technique for lowering threshold and linearity of FM demodulators
07 p1106 A69-19128

Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests
07 p1084 A69-19132

Frequency modulation of CW mm-wave IMPATT diode oscillator with wide band tunability and related harmonic generation effects
07 p1106 A69-19146

Error probability for discriminator detection of wide-band PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect
08 p1271 A69-19864

Resonances in plasma column monitored by frequency and current modulation methods
08 p1365 A69-20552

Frequency modulation methods and multiple access for communication satellite systems, considering bandwidth for space station transponder
09 p1449 A69-21274

Preemphasis applications compared in active communication satellite systems for frequency division multiplex telephony and for TV
09 p1449 A69-21275

Structure of quasi-linear and wideband satellite transponders, discussing possible improvements
09 p1609 A69-21619

Thermal effects on modulation sensitivity and inherent AM percentage as functions of modulation frequency in IMPATT oscillators
09 p1468 A69-22588

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input
09 p1459 A69-22640

Envelope shock waves transitions between modulated wave amplitude and frequency in dispersive medium with relaxing nonlinearity
09 p1483 A69-22660

Magnetic tape recorder/reproducer for FM analog test data
10 p1691 A69-23233

Circuit for generation of square wave with frequency as sum or difference of two periodic signal frequencies, discussing SSB modulation
10 p1665 A69-24047

Injection locked oscillator FM demodulator, analyzing signal distortion, intermodulation noise, differential gain and differential phase
11 p1845 A69-24565

Signal to noise ratio in spectral composition of FM signals in magnetic recorder channels, taking into account parasitic FM and AM
11 p1834 A69-24612

Step-up mixer converting modulated IF signal to HF level by HF high power oscillator signal, discussing efficiency
11 p1854 A69-25615

Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion
11 p1841 A69-25634

Permutation modulation for waveform transmission of quantized bandlimited signal, deriving signal to noise ratio
12 p2030 A69-26386

Monograph on discrete signals transmission by FM, considering secondary signal compression device and wire communication channels
12 p2033 A69-26866

Analytic expressions for predicted widths of AM and FM mode locked pulses in homogeneous lasers
13 p2270 A69-27191

Pseudorandom FM waveforms for simultaneous range and Doppler shift radar measurements
13 p2221 A69-27944

FM laser pulse formation time characteristics noting modulated resonator losses
13 p2272 A69-28114

Phase distortion, conversion of delay coefficients into channel noise and determination of waveguide delay coefficients for FM satellite communication systems
[IEEE PAPER 68-TP-382-COM] 13 p2222 A69-28153

FREQUENCY MULTIPLIERS

Noise stability of nonoptimal radar detection system for noise and FM signals, deriving expressions for optimal spectral width

13 p2222 A69-28508

Carrier disappearance method for FM telemetry transmitter characteristics measurements including frequency deviation sensitivity, linearity and frequency response

14 p2411 A69-28881

Oscillation spectrum with harmonic phase or frequency modulation, analyzing structural dependence on initial phase

14 p2412 A69-29427

Performance of oscillating limiter driven by noise corrupted FM signals covering frequency deviations, carrier to noise ratio, etc

14 p2413 A69-29497

FM measurements of angle distortion introduced by single pole bandpass filters compared to theoretical distortion

14 p2416 A69-29552

FM discriminator click widths probability distribution function, defining click widths duration from input noise considerations

14 p2422 A69-29553

Time domain method for hybrid simulation to compute interchannel distortions due to linear transducers in FM systems

14 p2417 A69-29556

Plasma diagnostics FM phase meter circuits tests, considering raster phase indicators, phase detectors and frequency integrators

14 p2497 A69-29797

Three channel microwave FM phase meter for studying plasma electron concentrations directional distribution without interferences between channels

14 p2497 A69-29799

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, giving block diagrams of meter, detector and oscillator

14 p2451 A69-29800

Homodyne frequency converter design using microwave oscillator with bitonal frequency modulation

14 p2451 A69-29801

FM oscillations spectral width during modulation by finite sequences of multiple and nonmultiple frequencies

15 p2562 A69-30116

Residual phase term influence on compressed signal shape, analyzing linearly frequency modulated signal spectrum and sidelobe suppression in pulsed radar

15 p2564 A69-30143

Noise stability of FM receiver with automatic control of IF amplifier resonance frequency in presence of weak noise

15 p2564 A69-30144

Noise sensitivity of FM discriminator/limiter in digital binary communication system with FM/PCM-FM/

15 p2564 A69-30145

Frequency effects on Gunn oscillator modulation sensitivity, discussing microwave-frequency deviation and diode impedance

15 p2577 A69-30614

Scanning Fabry-Perot interferometer with ultralow modulation frequencies, obtaining inverse piezoelectric effect curves of ceramic element

15 p2611 A69-31107

Optimizing control system design using fluidic digital circuitry and FM type transducers

15 p2583 A69-31296

FM/FM telemetry system for high altitude rocket research, using independent subcarrier oscillator for each measurement transmitted with individual frequency modulation

16 p2750 A69-31853

Long distance FM radar signal relating to central station image processing, showing wideband sum signal especially suitable for transmission

16 p2750 A69-31862

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network

16 p2753 A69-32473

Maximum a posteriori estimate of modulation on carrier with noise, discussing iterative technique and FM test

17 p2994 A69-32917

FM detecting resolution using free running multimode uniphase Ar laser with Doppler broadened bandwidth

17 p2981 A69-33091

Broadband intracavity SHF modulation of He-Ne laser emission in 10 cm band, showing agreement with calculations

17 p2981 A69-33112

Short term frequency stability measured for Doppler radar and space tracking communication applications, reviewing FM theory for spectral purity relationship

18 p3100 A69-34277

Neumann-Lommel formula generalization for obtaining Bessel functions product sums illustrated with FM wave distortion calculation in multichannel system

18 p3101 A69-34625

Preemphasis analysis for FM system optimization to maintain constant output signal to noise ratio throughout baseband

18 p3103 A69-35088

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies, describing application to multichannel TV transmission system

19 p3266 A69-35763

Encoding and decoding in IR tracking system, analyzing chopping rotating FM reticle pattern

19 p3268 A69-36058

Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning

19 p3273 A69-36274

Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance

19 p3273 A69-36275

Baseband automatic gain control in AM/FM systems, determining time constant and steady state and tracking error

19 p3274 A69-36276

High index frequency modulated waveform spectrum analysis including upper bound on approximation error to avoid fallacy of Woodward theorem [IEEE PAPER 68-TP-74-COM]

19 p3276 A69-36485

FM radioaltimeter for Concorde aircraft, describing autocorrelation and automonitoring device, signal characteristics, reliability, etc

19 p3315 A69-36699

Analog telemetry signals generalizing frequency and pulse position modulations over coherent channels, noting added degrees of freedom function

20 p3492 A69-37713

FM data transmission distortion noise and error rate compared with AM and phase step modulation, noting role of bandwidth

20 p3496 A69-37905

Radio relay FM channel data transmission, evaluating cumulative thermal noise due to IF amplification at each station

21 p3672 A69-38653

Nonlinear electron conductivity of Lorentz plasma subjected to frequency modulated electric field

21 p3778 A69-39573

Real time FM-to-digital converter for measuring periods of demodulated FM/FM data, discussing systems design

22 p3903 A69-39923

Frequency modulating transducers advantages in process control by overcoming information loss due to series and shunt resistance, avoiding mains interference, easing commutation, etc

22 p3946 A69-40309

PCM role in FDM-FM short haul low density cable communications systems used in exchange area and tactical military systems

22 p3900 A69-40678

Nonlinearity effect on spectral shape and bandwidth in connection with frequency modulation by noise

22 p3900 A69-40923

Digital signal processing electronic device for linearizing signals from sensors with nonlinear frequency output by modifying time signal frequency

22 p3915 A69-40935

Discrete delay line measuring FM noise, discussing special case of narrow band cavity resonator method

23 p4137 A69-41606

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR

23 p4122 A69-41771

Equal bandwidth multichannel FM/FM EEG telemetry system using subcarrier frequencies and HF modulation via varactor diodes

23 p4106 A69-41802

Time domain expression derived for frequency varying nonperiodic square wave in FDM and FM systems, using orthogonal functions to obtain frequency spectrum

24 p4281 A69-42623

FREQUENCY MULTIPLIERS

Efficiency curve for step recovery diode frequency multipliers, using analog computer simulation

02 p0215 A69-11947

Microwave frequency multipliers for radio relay systems based on VHF transistors and varactor diodes

02 p0216 A69-12097

Frequency mixing of organic dye solution laser radiation with ruby laser radiation, showing broader UV spectrum

04 p0610 A69-14424

Equivalent circuit of varactor with open p-n junction used as frequency multiplier

04 p0575 A69-14465

Correlation function and spectrum analysis of passage of random noise and signal through multistage frequency multiplier

04 p0557 A69-14777

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

04 p0612 A69-15375

Response curves of frequency changer circuits/multipliers and dividers/ using reactive nonlinearity calculated as function of filter mismatch

07 p1114 A69-18279

Emission of Nd giant pulse laser with high repetition rate and peak power to generate second harmonic radiation in lithium niobate single crystals

07 p1144 A69-18469

Frequency doubling due to nonlinear response from Zeeman levels of ruby, discussing output and paramagnetic resonance

07 p1144 A69-18471

Two signal four quadrant multiplier design having subnanosecond response

07 p1103 A69-18879

Analog multiplier using differential transistor pairs, discussing FM/AM detection, suppressed carrier modulation and TV chroma demodulation

07 p1103 A69-18880

Frequency doubling of laser light with variable Q switched resonator

07 p1158 A69-19753

Phase synchronized oscillators in microwave frequency multipliers with improved SNR

09 p1464 A69-22113

Static ferromagnetic frequency doubler graphic design, considering magnetic field strength and flux density, energy cycle and energy transfer

10 p1663 A69-23566

Storage varactors and frequency dependent diode input power for multiplier cascades control, discussing series connections and limitations by thermal noise

11 p1841 A69-25607

Computer analysis on ideal step recovery diode frequency multipliers for optimum efficiencies

12 p2039 A69-26378

Power losses of varactor frequency multipliers with series connected circuits including open circuit tuned to second harmonic

12 p2043 A69-26888

Current harmonics in triode klystron for frequency multipliers, noting modulation voltage

13 p2234 A69-28510

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

16 p2797 A69-32122

Quantum mechanical microwave frequency doubling in ruby, discussing output power variation with orientation

17 p3015 A69-33024

Computerized design parameters for realizable over-driven bimode varactor frequency doubler based on charge-voltage relationship at break point

20 p3505 A69-37299

Step recovery diode principle and operation mode as frequency multiplier explained by models

21 p3684 A69-39736

Push-pull pentode frequency multipliers with sinusoidal undistorted outputs, studying grid bias effects on operating characteristics

22 p3912 A69-40260

FREQUENCY RANGES

NT RADIO RANGE

Quasi-sinusoidal tunnel diode oscillator studied for frequency and amplitude of harmonic voltage components

01 p0038 A69-10070

Signal absorption in negative ionospheric ions effect on maximal frequency for space radio communication [UN PAPER 68-95272] 01 p0029 A69-10529

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies 01 p0139 A69-10889

Working equivalent circuits for fluidic transverse impact modulator in LF and IF range 02 p0196 A69-12082

Anisotropically conducting spiral cone current phase distribution applied to frequency independent antennas analysis, discussing spiral motion and field azimuthal dependence effects 03 p0408 A69-14133

Frequency dependences of induced HF and high pressure discharge parameters, noting optimal frequency range independence from particular gas and gas flow rate 03 p0481 A69-14144

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition 04 p0610 A69-14383

Multivibrator with two widely different zones of discontinuous oscillation 06 p0896 A69-17474

Radio sources detected in HF surveys not listed in 4C catalog 06 p1010 A69-17974

Symmetrical three layer A and B type sandwich reflectionless radomes design for multifrequency operation and insertion phase delay 07 p1110 A69-19522

Magnetic probes characteristics measurement for frequency range from 10 kc to 50 mc, using quenching resistors 08 p1313 A69-20120

Wullenweber arrays with extended frequency ranges, discussing design considerations and performance characteristics 08 p1288 A69-20962

Argon laser frequency spectrum instability caused by competing axial oscillations 08 p1327 A69-21023

Frequency fluctuations in mode coupled gas laser used to determine natural emission line width 09 p1516 A69-21670

Small signal HF conductivity of GaAs calculated for arbitrary frequency and DC field, considering subcritical Gunn devices 10 p1747 A69-23694

Ionospheric slopes and range frequency characteristics obtained from oblique incidence sounding of horizontally nonuniform ionosphere 10 p1686 A69-23914

He-Ne laser radiation frequency spectrum as function of transverse magnetic field determined by photoheterodyne method 11 p1894 A69-24622

Space and carrier frequency diversity determination for mutually interfering microwave radio equipments 11 p1835 A69-24952

Dielectric properties measurement of plastics for electrical insulation, stressing techniques for complex dielectric constants in various frequency ranges 13 p2285 A69-27984

Automatic device for impedances and complex transmission factors measurement at meter and decimeter wavelengths, noting reflection factor 13 p2235 A69-28520

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition 14 p2456 A69-28756

Microwave filter tailored for frequency response in L through S band regions for high range resolution radar receiver 14 p2423 A69-29759

Adapter between dielectrically loaded waveguides with different cut-off frequencies and sizes for pulse compression systems 14 p2423 A69-29760

Frequency diversity reception system for drift of small scale ionospheric inhomogeneities, noting circuit diagrams 14 p2452 A69-29875

Earth Resources Technology Satellites design for complete spectrum of frequencies 14 p2453 A69-29952

Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency 15 p2633 A69-30059

FM oscillations spectral width during modulation by finite sequences of multiple and nonmultiple frequencies 15 p2562 A69-30116

Shields frequency ranges analysis to determine frequencies and parameters for electrostatic and magnetostatic modes transition to electromagnetic and microwave modes 15 p2562 A69-30120

Pulsar NP 0532 period measurements at various frequencies, obtaining accuracy in timing data reduction by linking pulse arrivals over interval of months 15 p2680 A69-30232

Relative dielectric constant and permeability of inhomogeneously filled rectangular waveguide filling medium expanded into trigonometric series to calculate cut-off frequencies and field patterns 15 p2577 A69-30627

Solar flares and bursts correlation, taking into account sunspot type associated with flare and frequency range of bursts 16 p2850 A69-32213

Lumped element circuit producing directional coupling by electric and magnetic coupling of reactance quadrupoles, discussing insufficient coverage of calculated frequency range 16 p2763 A69-32581

Ionosonde electric circuit modified to permit radio wave absorption measurements over wide frequency range, calculating electron collision frequencies in F region 17 p2968 A69-33994

Bandwidth limitations for phase steered planar arrays in satellite applications, discussing weight reduction by modulo 2 pi beam steering 17 p2941 A69-34082

Geomagnetic field latitudinal variation effect on cut-off frequencies of proton whistlers, discussing LF electromagnetic wave propagation in cold multicomponent plasma 18 p3100 A69-34253

Supported shafts natural vibration frequencies determination by averaging shaft parameters, noting suitability in HF ranges 18 p3147 A69-34546

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies 18 p3182 A69-34720

Mechanical machine for fatigue testing flat samples of thin walled structures under tension and at various frequency ranges 18 p3118 A69-34833

Reflected signals detection with limited frequency spectrum and minimum velocity resolution considered, analyzing signal properties 18 p3104 A69-35265

Single loop directional stripline filters synthesis, including general expression for frequency characteristics based on wave matrices 19 p3284 A69-36570

Spectral density of outgoing radiation in 0.6-0.8 micron frequency range, noting reflected radiation and cloud fields correlation functions 19 p3366 A69-36672

OGO-F electric and electromagnetic fields measurement for ionosphere using dipole antenna, emphasizing broadband observation covering whistler mode waves 19 p3284 A69-36677

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity 20 p3540 A69-37733

Multiplexer network synthesis based on arbitrary divisibility of frequency range and obtainability of input impedance at all frequencies 21 p3681 A69-38530

Frequency domain and Liapunov instability criteria for attitude control system design of large booster, noting nonlinear feedback [AIAA PAPER 69-853] 21 p3687 A69-39381

Electromagnetic radiation measurements in shielded enclosures, describing equipment and effects of frequency 21 p3683 A69-39439

Sensors array to determine propagation wave vector velocity via high resolution frequency wavenumber spectrum analysis, emphasizing seismic applications 22 p3902 A69-41220

Sweep tuning gas laser and output power vs frequency characteristics, demonstrating tuning ability within entire Doppler bandwidth 23 p4174 A69-41635

Type 4 bursts maximum intensities at different frequencies compared for centimeter and decimeter waves 24 p4366 A69-42964

FREQUENCY RESPONSE

Modified admittance yielding Kubo admittance at nonzero frequencies, discussing transformation of correlations of Ising model 01 p0115 A69-10019

Amplifying channel processes of DC amplifier, discussing relations to couple channel with HF channels of operational operators and to synthesize amplifier frequency characteristics 01 p0053 A69-10802

TAF /time and frequency/ code written in FORTRAN language for computing steady state, frequency and time response from nonlinear simultaneous differential equations 04 p0565 A69-15341

Transfer function coefficients from frequency response data determined to obtain information about dynamic system characteristics 05 p0844 A69-16764

Spectral response of fast GaAs point-contact diode in mm and submillimeter wavelength ranges 06 p0893 A69-16939

Steady state frequency response of conical and cylindrical shells under lateral excitation 06 p1021 A69-17147

Validity of formula for oscillation frequency of nearly sinusoidal tunnel diode oscillator extended to operation in nonsinusoidal regime 08 p1279 A69-19924

Pseudoexact Chebyshev response curves for band-pass filter design, discussing phase response and time delay characteristics 08 p1283 A69-20227

Transfer function and frequency response of notch filters used to achieve notch filter dimensioning and design 08 p1284 A69-20379

Interference capability of noise of different frequency bandwidths, comparing weighted sound pressure to loudness level 08 p1276 A69-20857

Fabry-Perot fringes maxima in frequency response of laser interferometer, describing passive technique using eight wave plate 09 p1517 A69-21915

IR He-Ne laser frequency response determined with inherently swept frequency modulator based on rotating corner reflector 10 p1702 A69-23347

Frequency response dynamics of beam type periodic structures on elastic supports typical in flight vehicle designs [ASME PAPER 69-VIBR-17] 10 p1804 A69-24150

Modal coupling in thermally stressed plates, obtaining solution for frequencies and stiffness 11 p1990 A69-25509

Wideband inverter operational amplifier frequency response, open and closed loop transfer functions, beta, settling time and slew rate limits, discussing HF performance prediction 11 p1857 A69-25666

Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams 12 p2051 A69-26244

Sufficient conditions for periodic motion existence of autonomous nonlinear feedback systems derived in terms of linear system frequency response 13 p2238 A69-27923

Two stage tunnel diode amplifier synthesis with gain stabilization circuit widening passband, discussing operating frequency and maximally flat amplitude frequency response 13 p2236 A69-28575

Wideband transistorized amplifier frequency response analysis by simplified approximations, subdividing operational frequency range 15 p2573 A69-30113

Frequency response of MIS capacitance beyond inversion voltage, discussing recombination rate and generation-recombination current in space charge region 15 p2565 A69-30179

FORTRAN program for calculation of magnitude and phase of digital filter transfer functions and power spectra of periodic waveforms 15 p2567 A69-30612

- Linear fluid amplifier with beam-deflection proportional active element, discussing optimum maximally flat frequency response 15 p2553 A69-31299
- Mechanical single degree of freedom system mean square response to AM random noise, considering frequency response, input excitation spectrum, etc [ASME PAPER 69-APM-25] 18 p3214 A69-34398
- Human ear frequency discrimination, discussing nonlinear functional modeling systems 18 p3097 A69-35440
- Thermoanemometer filament frequency response measured by generator of velocity pulsations compared with conventional methods 19 p3308 A69-35856
- Helicon wave dimensional resonance in n-InSb plasma waveguides at different wavelengths relative to wall thickness 19 p3383 A69-36479
- Acoustic and internal dampings in freely supported uniform beams of circular and rectangular section, showing frequency dependence and vacuum effect 20 p3620 A69-37062
- Ordinary coherence functions for computing frequency response in mechanical systems under random excitation 20 p3537 A69-37162
- Solar atmosphere line source function showing frequency dependence as consequence of spectral line disappearance at solar limb 20 p3588 A69-37540
- Nonmonochromatic laser emission frequency characteristics, studying second harmonic generation in nonlinear KDP crystal 20 p3554 A69-37727
- Monograph on frequency response characteristics of mechanical oscillator chains, calculating forced vibrations in linear systems 20 p3577 A69-37920
- Acoustic frequency response of unsteady turbulent flow in transmission lines, considering effects of small amplitude disturbances and heat transfer [ASME PAPER 69-FE-11] 20 p3516 A69-37988
- Fluidic pressure signal generator for use in fluidic system frequency response studies, considering design and performance [ASME PAPER 69-FLCS-40] 21 p3649 A69-38603
- Quadrupole network transfer matrix calculation from known octupole matrix, describing frequency response determination of coupled transmission lines 22 p3912 A69-40257
- Frequency response transient vibration testing of standing man, discussing data analysis procedure, test stand, and Welch correction for instrument dynamics 23 p4101 A69-41494
- Frequency response of thin film thermal detectors, discussing steady state harmonic response proportionality to film thickness and thermal conductivity 23 p4163 A69-41549
- Frequency and space averaging effect on variability and standard deviation of multimode media transmission responses, with application to reverberant media 23 p4115 A69-41576
- Aerodynamic frequency response calibration measurements of wind anemometer by input velocity and output drag values under unsteady flow conditions 24 p4315 A69-43262
- Dynamic pressure response of viscous compressible fluids in rigid tubes with dead ended volume termination, testing Ibrall theorem as function of Stokes number 24 p4301 A69-43287
- Small signal amplitude/frequency response or transfer gain of volume-terminated pneumatic lines with circular and rectangular cross sections 24 p4301 A69-43288
- ### FREQUENCY SCANNING
- Electronic scanning radar systems design, discussing beam types, bandwidth, tracking, target acquisition, etc 04 p0556 A69-14301
- CRT direction finder with linear scanning to determine statistical data for azimuthal distribution of atmospheric 04 p0600 A69-15104
- Pulsed ultrasonic flaw detectors resolving power enhancement by shunting semiconductor diodes across piezoelectric elements of scanning heads to shorten scan pulse duration 18 p3137 A69-35112
- Voltage variation frequency analysis for narrow-band sweep oscillators circuit design 20 p3486 A69-37010
- Semiconductor phase shifting for inertialess antenna scanning at microwave to millimeter wavelengths, describing diode construction with emphasis on solving insertion loss [ONERA-TP-712] 23 p4143 A69-42519
- ### FREQUENCY SHIFT
- Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction 01 p0134 A69-10009
- Emission and frequency shift angles of antiStokes radiation from trapped filaments of laser light in liquids 01 p0114 A69-10012
- Radar FM signal design with zigzag frequency variation, discussing relation between waveform characteristics and associated ambiguity function features 01 p0033 A69-11001
- Amplification process for VLF whistler mode radio signals observed in study of magnetosphere frequency shifting mechanism 01 p0077 A69-11241
- Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun 02 p0315 A69-11836
- Pulsar CP 1133 pulse duration increase with decreasing RF from analysis of pulse shape data 02 p0318 A69-12093
- Frequency difference of traveling waves in accelerated rotating ring laser 02 p0257 A69-12417
- Dye solution laser wavelength shift and simultaneous oscillations at different wavelength ranges for pumping by another dye laser 02 p0258 A69-12620
- Laser oscillation frequency shift dependence on discharge current in 6328 A He-Ne laser 02 p0260 A69-12658
- Light wave propagation in gyrotropic crystals, examining laser frequency shift circularly polarized by modulating field 03 p0436 A69-13037
- High range resolution by pulse to pulse frequency shifting, utilizing existing low resolution equipment by adding signal processing capability to receiver 03 p0388 A69-13181
- Pumping light filtration conditions effect on transition frequency of rubidium atoms 04 p0611 A69-14779
- Taurus A 21 cm absorption line frequency decrease during optical path approach to sun, discussing gravitational and electromagnetic origin 04 p0661 A69-15148
- Frequency variation during oscillation pulse in avalanche transit time diodes, discussing related thermally dependent diode voltage rise 07 p1098 A69-18459
- Frequency transformation coefficients in titanium oxide-chromide traveling wave maser 07 p1146 A69-18481
- Helium-Ne laser beat frequencies between neighboring axial modes shifting linearly with inserted cavity loss 07 p1156 A69-19412
- Frequency transformation allowing comb-line filters of narrow and wide bandwidth, using resonance type filters with lumped elements 07 p1108 A69-19487
- Peak acoustic attenuation frequency shifts and peak power insertion losses in air flow ducts related to air specific weight changes 07 p1117 A69-19700
- Frequency shift and Q change of microwave cavity caused by lossy dielectrics and plasmas, examining perturbing volume requirements for conductor behavior 09 p1544 A69-21323
- Optical pulse compression experiment illustrating performance of electro-optical Doppler shifter as linearly time varying frequency shift production device 09 p1519 A69-22445
- Rubidium vapor laser pumping induced frequency shifts eliminated by detuning resonator without decreasing output power 09 p1520 A69-22636
- High density plasma in resonant cavity obtained by frequency shifting power source 10 p1727 A69-22955
- Optical modulation through Doppler frequency shift obtained by rotating radial diffraction grating [AOLR-69-1] 11 p1889 A69-25394
- High sensitivity LF and HF frequency deviation meter with resonant RC amplifiers for frequency discrimination and filtering 12 p2038 A69-26337
- Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere 13 p2219 A69-27701
- Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure 14 p2457 A69-28929
- Design and operation of two frequency phase meter for plasma diagnostics, using frequency modulation of microwave oscillator and waveguide bridge 14 p2451 A69-29798
- First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies 16 p2755 A69-32614
- Frequency agility techniques applied to target detection in noncoherent pulsed radar systems 17 p2917 A69-32919
- Repetitively Q switched ruby laser applied to frequency conversion, stimulated Raman scattering and vacuum UV generation 17 p2980 A69-33027
- Frequency hopping technique applied to multiple access air-to-air/ground communication for tactical fighters, noting additive recognition 17 p2931 A69-34117
- Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning 19 p3336 A69-36344
- Frequency shift dependence in transition of Rb 87 atoms on pulsed pumping intensity, discussing continuous and pulse indication and peak determination 19 p3336 A69-36345
- Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction 20 p3496 A69-37892
- He-Ne laser oscillation frequency shifts with variations in DC discharge ascribed to changes in populations of He and Ne levels 20 p3556 A69-38124
- Hue shift and brightness enhancement of flickering light measured as function of illuminance, wavelength and target size 22 p3882 A69-40871
- Amplitrons use as broadband microwave amplifiers in high power radar systems with frequency agility, involving modified high vacuum tube modulator and modulator circuit 23 p4135 A69-41384
- Nonlinear theory of optically excited semiconductor laser for conditions of self excitation, steady state lasing amplitude and lasing frequency shift 23 p4174 A69-41733
- Rotating mirrors used for light signal Doppler frequency shifting 24 p4351 A69-43806
- ### FREQUENCY SHIFT KEYING
- Bit error probability for noncoherent binary FSK link involving Rician interfering signal 07 p1080 A69-19095
- Incoherent m-ary frequency shift keying (MFSK)/system analysis concerning automatic time synchronization 08 p1274 A69-20133
- Coherent FSK LF/VLF radio communication modem with large predetection bandwidth for improvement of reception in atmospheric noise 09 p1458 A69-22473
- Multichannel bit error probability for FSK and DPSK obtained for slow nonselective-fading multipath as function of multipath parameters and diversity order 10 p1656 A69-23533
- One way measurement of dual band frequency diversity improvement on HF ionospheric path with frequency division multiplexed FSK modulation 10 p1656 A69-23536
- Binary error investigation in noncoherent FSK communication link with nonselective fading, noting Doppler shift 14 p2414 A69-29498
- Compression capabilities of combined frequency and phase shift keying in radar and sonar pulse modulation using binary noise codes 15 p2568 A69-30628
- Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation 21 p3676 A69-39451

FREQUENCY STABILITY

Combustion instabilities in solid propellant rocket engines, emphasizing acoustic types for longitudinal and tangential modes

02 p0303 A69-11531

Frequency domain stability criterion for nonlinear feedback system consisting of nonlinear amplifier, linear dynamical system and transducer with backlash

02 p0225 A69-11968

Off-axis circle criterion for frequency domain stability of feedback systems with single monotonic nonlinearity, noting relation to Popov criterion

02 p0225 A69-11969

Solid propellant combustion instability models describing combustion zone dynamics applied to acoustic and nonacoustic instability in LF regime [WSCI PAPER 67-13]

02 p0352 A69-12311

F 2 layer critical frequencies variation coefficients, analyzing variation and root-mean-square deviations in terms of geomagnetic latitude and Wolf number

03 p0422 A69-13514

Hydrogen maser oscillations with external gain, noting frequency stability

04 p0611 A69-14443

Self adaptive systems stability analyzed using filter and correlation methods, considering higher harmonics at rectifier and synchronous detectors output

04 p0582 A69-14796

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels

05 p0727 A69-15643

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

05 p0770 A69-15656

Gas laser frequency stabilization, considering electromechanical control systems

05 p0773 A69-16230

Visible laser frequency stabilization scheme and simultaneous determination of frequency in terms of time standard

05 p0773 A69-16291

Frequency stabilization and noise suppression in argon FM laser [IEEE PAPER P-7]

05 p0775 A69-16325

Stabilization method for composite cavity single frequency laser, noting insensitivity to oscillation power level variations

05 p0776 A69-16333

Frequency and noise characteristics of gyrator circuits, analyzing Q factor, stability and oscillation sensitivity

05 p0735 A69-16621

Frequency domain stability criterion for pulse width modulated feedback

06 p0904 A69-17942

Stabilized frequency single mode ionized argon laser, discussing intensity of electric field in cavity and mode selector

07 p1145 A69-18475

Frequency and stability measurements in far IR laser region

07 p1146 A69-18482

Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses

07 p1147 A69-18543

Frequency-stable tunnel diode oscillator loaded with transmission line

07 p1104 A69-18890

Frequency reproducibility of He-Ne laser, using absorption dependence on frequency in strong field standing wave limit to provide stabilization [IEEE PAPER P-4]

07 p1153 A69-19073

Frequency discrimination characteristics of elliptically polarized dual polarization gas laser, discussing intensity crossover phenomenon and frequency stabilization application [IEEE PAPER P-5]

07 p1153 A69-19074

Upper and lower frequency stability bounds using hydrogen masers, studying signal power and relaxation rate as function of resonator effective field

08 p1327 A69-20715

Incoherent wave scattering of particle orbits as nonlinear effect of LF instabilities

08 p1367 A69-20801

Argon laser frequency spectrum instability caused by competing axial oscillations

08 p1327 A69-21023

Gas laser frequency stabilization by coupled oppositely circularly polarized components of single cavity mode in axial magnetic field

08 p1327 A69-21090

Stability of systems with periodic parameters, relation to automatic control systems and frequency characteristics role

09 p1473 A69-21855

Gunn effect domains propagation calculated for nonuniform diodes of annular geometry, obtaining frequency variation

09 p1464 A69-22159

Frequency domain stability criteria accuracy for application to fourth order nonlinear position control system

09 p1475 A69-22591

Intrinsic amplitude and frequency fluctuations in transistor autooscillator, examining natural additive noise influence

09 p1469 A69-22632

Optical frequency standards, discussing lasers VHF stability, RF and optical ranges, long and short term effects, etc

10 p1702 A69-23299

Ruby laser unsteady modes with ruby filter, discussing conditions for pulsed, monopulse and steady mode transitions, with formulas for steady emission

11 p1894 A69-24619

Amplification factor of He-Ne traveling wave light amplifier, discussing frequency stability and telescopic wave front broadening for uniform radiation distribution

11 p1894 A69-24623

Laser frequency drift effect on operation of three mirror interferometer, noting wave reflection by two compounded mirrors

11 p1895 A69-24720

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations

11 p1927 A69-24912

Frequency noises suppression in Gunn diode oscillators by frequency stabilization, using high Q external cavity

11 p1853 A69-25608

Frequency stabilization of He-Ne laser, using external Ne absorption tube in variable magnetic field as frequency standard

11 p1900 A69-25678

Upconverter with gain and stabilized frequency, using sideband locking of IMPATT diode oscillator

12 p2036 A69-25909

Multivibrator circuit for generation of oscillations with frequency stability against transistor ambient temperature changes

12 p2036 A69-25919

Microstripline circuit for stabilizing oscillating frequency of Gunn diodes prepared with GaAs slices

12 p2036 A69-25924

Frequency stability of He-Xe laser with nonresonant feedback, noting spectral line width dependence on number of interacting modes

12 p2105 A69-26049

Laser output power amplitude fluctuations effect on beat frequency stability for traveling waves in annular laser with broadened Doppler emission line

12 p2107 A69-26541

Spatial harmonics of harmonic frequency instabilities of cyclotron half frequency in system of two symmetrical electron beams confined by magnetic field

13 p2314 A69-28364

Three level He-Ne laser, showing nonlinear interference effects on gain line shape and use in magnetic field and frequency stabilization

14 p2460 A69-29671

Reference oscillator frequency instability effect on radio signals phase shift in ionosphere measurements, evaluating errors

14 p2444 A69-29873

Quartz oscillator amplitude and frequency fluctuations due to elements tolerance fluctuations, examining oscillator parameters contributions to spectral line width

15 p2579 A69-30944

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels

16 p2762 A69-32500

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

16 p2798 A69-32513

Relativistic effect detection on pulsar frequencies by general relativity theory, assuming pulsars are orbiting objects

17 p3037 A69-33645

General relativity theory test using earth orbital motion and solar gravitational field effects on pulsars frequency stability

17 p3037 A69-33646

Short term frequency stability measured for Doppler radar and space tracking communication applications, reviewing FM theory for spectral purity relationship

18 p3100 A69-34277

Single hyperfine-state atomic beam selector effect on hydrogen maser stability, discussing DC magnetic field variation

18 p3153 A69-35306

Gyrator stability and frequency behavior obtained by controlled sources selection

19 p3287 A69-36739

Pulse-to-pulse carrier frequency stability of microwave radar transmitter tube for fixed target suppression

20 p3485 A69-36943

Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses

21 p3735 A69-38695

Frequency stabilization in He-Ne three mode laser by stabilizing LF oscillations via automatic adjustment of laser resonator length

21 p3738 A69-39078

Automatic frequency control circuit for stabilizing beat emissions of coupled multifrequency gas lasers

21 p3738 A69-39079

Free space to dielectric waveguide millimeter wavelength ratio as function of frequency, discussing equipment and procedure

21 p3674 A69-39130

Superconducting cavity X band oscillator designed for study of stability and spectral purity dependence on temperature

21 p3683 A69-39453

Accuracy and frequency stability of H masers in terms of wall collision effect and cavity resonator tuning

21 p3741 A69-39685

Oscillators frequency instability theories emphasizing difference between concepts of frequency instability and spectral purity

22 p3900 A69-40930

Frequency and phase instability characteristics of negative resistance amplifier due to changes in circuit parameters

22 p3916 A69-40962

Three phase DC-AC inverter with low harmonic distortion, good efficiency and packaging capability, stabilizing frequency by crystal controlled clock oscillator

23 p4074 A69-42294

Short term frequency stability and spectral purity measurements of ATS 1 multiple access communication system

23 p4129 A69-42509

Short term frequency fluctuations of CW HCN masers reduced to 10 kHz by improving plasma stability

24 p4327 A69-42614

Frequency domain stability criteria for open and closed loop distributed parameter linear time invariant systems

24 p4294 A69-43309

FREQUENCY STANDARDS

Beam laser as frequency standard, considering wavelength and molecular transfer constraints imposed by technology limitations and frequency stability requirements

03 p0440 A69-13715

Varian cesium resonator as prime frequency testing standard with accuracy dependent on electronic system for quartz slaving

04 p0600 A69-15068

Solid state precision frequency standard for L multiplex carrier equipment, using four precision quartz crystal oscillators

04 p0561 A69-15451

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

05 p0770 A69-15656

Visible laser frequency stabilization scheme and simultaneous determination of frequency in terms of time standard

05 p0773 A69-16291

Absolute wavelength standard using saturated molecular absorption in methane inside He-Ne laser cavity [IEEE PAPER P-1]

05 p0775 A69-16323

Laboratory equipment for atomic and astronomical time and frequency measurement

05 p0827 A69-16582

Atomic clocks frequency standards, discussing masers, atomic beam resonators and gas cells and various applications 09 p1501 A69-22598

Optical frequency standards, discussing lasers VHF stability, RF and optical ranges, long and short term effects, etc 10 p1702 A69-23299

Frequency stabilization of He-Ne laser, using external Ne absorption tube in variable magnetic field as frequency standard 11 p1900 A69-25678

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard 16 p2798 A69-32513

FREQUENCY SYNCHRONIZATION

Q switched lasers powerful outputs obtainable at sum frequency, discussing frequency mixing in nonlinear dispersive media 03 p0438 A69-13047

Sampled data delay-lock loop for synchronizing pulsed envelope RF signals, using digital circuitry 03 p0390 A69-13216

Incoherent m-ary frequency shift keying (MFSK)/system analysis concerning automatic time synchronization 08 p1274 A69-20133

Two oscillator signal combiner based on mutual synchronization, providing output signal free of phase jumps or amplitude fluctuations 11 p1849 A69-24928

Tunnel diode self excited SHF oscillators synchronization, deriving single frequency generation conditions 11 p1849 A69-24955

Transient responses of mutually synchronized signal systems, obtaining design parameters 12 p2030 A69-26388

Discrete information transmission synchronization in communication systems concerning optimal signal detection, HF, phase and coded synchronization, etc 18 p3104 A69-35264

Bethenod pendulum behavior using coupled nonlinear differential equations, discussing synchronization methods 24 p4349 A69-42673

FREQUENCY SYNTHESIZERS

Electronic controller with integrated circuits and inexpensive SCR as coupler or interface between card reader and frequency synthesizer designed for unattended operation 06 p0897 A69-17704

Difference frequency generation by multiple quantum transition from laser medium considered as resonant optical frequency mixing device 07 p1144 A69-18470

Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions 09 p1556 A69-21578

Microwave frequency synthesizer for digitally tuned UHF and microwave superheterodyne receivers, considering phase locking voltage-tuned transistor oscillator 12 p2030 A69-26390

Digital frequency synthesizer design parameter selection, giving expressions for output frequency and division coefficient variations 19 p3284 A69-36594

FRESNEL DIFFRACTION

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching 07 p1132 A69-18801

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system 11 p1885 A69-24848

Statistical properties of electromagnetic field diffracted by illuminated plane aperture studied in Fresnel zone on basis of partial coherence theory 11 p1836 A69-24978

Diffraction theory of schlieren photometric slot and wire methods for cylindrical light wave of even order, discussing Fresnel diffraction for spherical wave 12 p2088 A69-26180

Fourier transform holograms by Fresnel zone-plate fringe interferometer, discussing source size and bandwidth 12 p2090 A69-26249

Fresnel irregularities calculated from radio wave partial reflection from lower ionosphere measured by rocket probes 15 p2604 A69-31420

Amplitude and intensity distributions of plane periodic Fresnel diffraction grating calculated by Fraunhofer theory, noting applicability to spectrometric and meteorological instruments 19 p3372 A69-35906

X ray heliography by Fresnel-Soret type zoneplate camera to obtain solar photographs from rockets 20 p3544 A69-37803

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching 21 p3724 A69-38946

Planetary atmosphere effect on Fresnel diffraction of ultrashort radio waves determined from short wave approximation of damping function 22 p3901 A69-40948

Optical ultrashort pulse compression with paired diffraction gratings in terms of phase shift frequency dependence and Fresnel diffraction analogy 23 p4171 A69-41392

FRESNEL REGION

Power transmission efficiency between arbitrarily focused circular antennas with Gaussian amplitude illumination in Fresnel region for various phase illuminations and Fresnel numbers 11 p1851 A69-24991

Statistical gain characteristics of radar antennas at very short Fresnel zone ranges compared to Fraunhofer zone 12 p2040 A69-26470

Fresnel zone plate as converging and diverging lens in holographic image reconstruction, noting sine wave zone plate 22 p3947 A69-40864

Asymptotic approximation formulas to compute on-axis Fresnel region fields for coupling between two large aperture antennas 23 p4136 A69-41582

FRETTING

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens [AIAA PAPER 69-585] 16 p2803 A69-32760

Relative slip effect on fretting fatigue strength, deriving stress initiating fatigue cracks 24 p4404 A69-43628

FRETTING CORROSION

Fretting effect on fatigue of press fitted axle assemblies, analyzing relative slip amplitude dependence on size, shape, clamping pressure, nominal stress and cycles 01 p0167 A69-10305

Fretting fatigue prevention in Al alloys, noting strength reduction due to fretting 09 p1526 A69-22148

Fatigue strength reduction in Ti alloy in sliding friction contact with metallic materials caused by fretting corrosion 12 p2113 A69-26125

Modes and mechanisms of wear covering adhesive, abrasive and corrosive wear, surface fatigue and fretting corrosion 13 p2265 A69-27231

Fatigue crack initiation in relation to contact stresses due to fretting, studying causes of strength reduction and crack inclination to surface 20 p3563 A69-38110

Mean stresses effects on fatigue crack initiation and propagation under controlled fretting slip amplitude 20 p3563 A69-38111

FRICTION

NT AERODYNAMIC DRAG
NT DRY FRICTION
NT FLOW RESISTANCE
NT INTERNAL FRICTION
NT KINETIC FRICTION
NT SKIN FRICTION
NT SLIDING FRICTION
NT STATIC FRICTION
NT SUPERSONIC DRAG
NT VISCOUS DRAG

Forced flexural vibrations of elastic truss systems with allowance for hysteresis friction 03 p0432 A69-12953

Laval nozzle resistance as result of friction and under expansion of gas, noting flow and pressure recovery coefficients 03 p0361 A69-12967

Atmospheric influence on friction endurance of solid powdered lubricants at constant layer thickness [IME PAPER 3] 07 p1138 A69-18563

European research on ultrahigh vacuum lubrication in space environments, emphasizing friction of materials under various loadings and temperatures [IME PAPER 10] 07 p1138 A69-18564

Short cylinder of perfectly plastic Coulomb yield conditions compressed between rigid plates, discussing cylinder-plate interface frictions, angles of internal friction and cohesion 08 p1410 A69-19890

Mathematical model of mechanical wear in surface friction based on approximation of cross section profiles, using Fokker-Planck equation for distribution function 14 p2455 A69-29331

Interface friction and adhesion of alloys workpieces and die materials under pressure and temperatures typical of plastic deformation 15 p2629 A69-30902

Viscous friction damping effect on impact vibrator stability, analyzing boundary region of multiply periodic single impact motion by point mapping 18 p3172 A69-34588

Friction and orography effects on vertical currents in planetary boundary layer and numerical forecasting of baric field 21 p3758 A69-38837

FRICTION COEFFICIENT

U COEFFICIENT OF FRICTION

FRICTION DRAG

NT AERODYNAMIC DRAG
NT SUPERSONIC DRAG
NT VISCOUS DRAG

Laminar flow stability parameter presenting coupling ratio between angular momentum change and loss rate by frictional drag 05 p0750 A69-16187

Incompressible laminar boundary layer with normal suction or blowing, discussing approximate method for evaluating laminar friction on wing contour 06 p0911 A69-17781

Polyvinyl chloride coating for reducing aerodynamic skin friction drag, noting water saturation effect on polyurethane foam [AIAA PAPER 69-165] 06 p0912 A69-18043

Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 07 p1119 A69-18751

Skin friction drag coefficient for right circular cylinder calculation coefficient on basis of Blasius solution for flow 11 p1819 A69-25384

Rotating cylinder or vortex motion in shear flow with friction, noting drag and rotor force combined influence 17 p2950 A69-33151

Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles 17 p2951 A69-33254

Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient [AIAA PAPER 69-648] 17 p2893 A69-33496

Skin friction drag formula for tapered and delta wings with allowance for coefficient variation and Reynolds number dependence on chord length 17 p2896 A69-34037

Parametric variations of nonlinear system moving in medium with nonlinear drag, using Bogoliubov-Krylov asymptotic method 18 p3171 A69-34564

Turbulent skin friction coefficients of compliant surfaces on flat plates determined as function of speed for different materials 21 p3695 A69-39039

FRICTION FACTOR

Viscoseal sealing coefficient and friction factor under turbulent flow conditions [ASLE PREPRINT 68AM 5B-1] 01 p0087 A69-10911

Resisting forces produced by transverse vibration of rotating disks in viscous fluid 02 p0232 A69-12257

Frictional forces and collision frequencies for ions moving in neutral gases 03 p0421 A69-13328

Two dimensional flow of incompressible fluid near sharp leading edge of plate at zero incidence, discussing approximation error and friction stress 03 p0415 A69-13651

Frictional losses in straight tubing and effect of system on ball type valve, using polyurethane foam damped flexible silastic tube 04 p0608 A69-15331

Equations for instability of stabilized platform of inertial navigation system with viscous friction in accelerometers

06 p0954 A69-16824

Oil lubricant vapors under frictional working conditions in vacuum analyzed by mass spectrometer and gas-liquid chromatography concerning molecular weight and composition
[IME PAPER 11]

07 p1137 A69-18558

Wind tunnel investigation of damage to aircraft radomes by water droplet encounter during cloud passage and gaseous molecule friction in air

07 p1054 A69-19541

Dynamical friction on star in postNewtonian approximation of general relativity

08 p1386 A69-20072

Wall friction influence on three dimensional flow in axial flow turbomachines, introducing shear stresses between flow planes

08 p1252 A69-20724

Primary explosives tested for effects of shock, friction, heat and electrical discharges

10 p1750 A69-23010

Axial vibration effects on frictional losses in gear systems under dry friction or boundary lubrication conditions
[ASME PAPER 69-VIBR-15]

10 p1701 A69-24169

Friction and wear characteristics of ceramics and cermets as bearing materials, with tabulation of room temperature hardness and maximum service temperatures

13 p2284 A69-27232

Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity

13 p2253 A69-27821

Relative variations of wall friction and thermal flux for laminar incompressible flow of constant volume mass

13 p2250 A69-28357

Reynolds number, incident flow turbulence and interblade channels roughness effects on friction losses in axial flow turbines

15 p2547 A69-30074

Mach numbers effect on pressure distribution and friction moment in nonisothermal layer of gas lubricant, using power series

15 p2629 A69-31021

Friction effects on friction couples made of two different nonferrous alloys, discussing temperature regime difference effects on microgeometry and structure

15 p2629 A69-31027

Inertia, compressibility and viscous friction effects on dynamic response of long fluid line, constructing models

16 p2771 A69-32066

Friction and wind relationships expressing actual and geostrophic wind as complex numbers or by corresponding vectors in Gauss-Argand diagram

16 p2808 A69-32455

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient

22 p3958 A69-41170

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory

23 p4058 A69-41727

Microrheological property of blood measured with microglass fiber viscosimeter, noting sensitivity to intercellular friction of erythrocytes

23 p4098 A69-42100

Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor

24 p4407 A69-42915

Transition from turbulent to laminar regime as consequence of high heating rates for internal convective flow, noting roles of Nusselt numbers and friction factors
[ASME PAPER 69-HT-9]

24 p4304 A69-43559

FRICION MEASUREMENT

Internal friction measurement apparatus for non-metallic solids, noting variations of Young modulus in extremely low loss materials

03 p0428 A69-13108

Thin film heated Pt resistance thermometer for skin friction or velocity measurements in air, water or blood

04 p0601 A69-15118

Solid lubricant compacts for ball bearing separator materials, describing fabrication, design and friction and wear properties in air and vacuum
[ASLE PAPER 68-LC-16]

07 p1139 A69-18626

Friction and wear tests of synthetic rutile single crystals against diamond styli and spherical sliders of ruby, sapphire and hardened steel
[ASLE PAPER 68-LC-3]

07 p1140 A69-19307

Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15]

07 p1140 A69-19308

Floating element skin friction meter designed for adverse pressure gradients, discussing wall shear stress measurement

11 p1889 A69-25557

Friction resistance between steel and ground basalt in ultrahigh vacuum, showing increase by adhesion

13 p2298 A69-28014

Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shear forces

14 p2427 A69-29029

Calculated and experimental surface wear damage data correlated for materials under friction conditions

15 p2618 A69-30106

Sliding friction tests of Cu and Cu-Be alloy plates in contact with various alloy sliders in air and vacuum
[ASLE PAPER 68-LC-5]

15 p2622 A69-30610

Contact conformity effects on spinning torque and friction coefficient in angular contact ball bearings from lubricated and unlubricated tests
[ASME PAPER 68-LUB-10]

15 p2628 A69-30901

Three dimensional effects on Stanton tube data for skin friction determination for small protuberances drag immersed in turbulent boundary layer

16 p2771 A69-31920

External friction of refractory materials at high temperature in vacuum, discussing testing machine and methods including metallographic, X ray, spectral and electron diffraction analyses

21 p3690 A69-39154

Friction tests for Mariner Mars 1969 spacecraft mechanisms in ultrahigh vacuum molecular sink chamber, noting increased friction attributed to vacuum environment
[AIAA PAPER 69-996]

22 p3920 A69-40374

Finite-difference grid procedure for predicting friction heat and mass transfer in two dimensional boundary layers

22 p3932 A69-40939

Wear resistance and antifriction measurement device for polymer coatings in high vacuum, various gases and during exposure to electron radiation

23 p4169 A69-41599

Aircraft braking, discussing systems, brakes, tires, runway interface, heat sink materials, friction measurements, skid control, cooling and recovery equipment
[SAE PAPER 690376]

23 p4063 A69-41671

FRICION PRESSURE DROP U SKIN FRICION

FRICION REDUCTION

Unsteady conducting incompressible viscous fluid flow past plate in magnetic field, analyzing surface friction reduction

07 p1192 A69-19018

Axial vibration effects on frictional losses in gear systems under dry friction or boundary lubrication conditions
[ASME PAPER 69-VIBR-15]

10 p1701 A69-24169

Plain and rolling metal bearings manufacture and use, discussing materials structure and properties, operating conditions, lubrication, etc

11 p1903 A69-24517

Friction damping properties of deployed structures vibrating in weightless state compared to damping in space for true determination

12 p2183 A69-26792

Collection of Soviet papers on wear and antifriction properties of materials

13 p2268 A69-28050

Antifriction characteristics of hard lubricating coatings based on molybdenum disulfide and graphite in inert gas atmosphere and vacuum, determining thermal stability temperature ranges

13 p2269 A69-28053

Dry dynamic friction of brass disk against steel surface reduced using ultrasonic oscillations creating air gap

18 p3135 A69-34587

Aircraft onboard weighing system, eliminating o ring seal friction to permit accurate measurement of oleo strut pressure
[SAWE PAPER 748]

18 p3137 A69-34883

Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions

24 p4321 A69-43126

FRINGE PATTERNS U DIFFRACTION PATTERNS

FROGS

Weightlessness effects on fertilized frog egg development on board Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogenesis

01 p0017 A69-11084

Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers

07 p1070 A69-18383

Simulated weightlessness used in determining ontogenesis of otolith organ in tadpoles and eggs as function of acceleration forces
[DVL-855]

10 p1647 A69-24021

Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance

22 p3885 A69-40974

Optic nerve spikes elicited by acetylcholine application on isolated perfused retina of frog, varying response by prostigmine and atropine

23 p4084 A69-41465

Electric potential measuring device for frog isolated skeletal muscle fiber mounted on micromanipulator

23 p4111 A69-42058

FRONTAL AREAS [METEOROLOGY] U FRONTS [METEOROLOGY]

FRONTS [METEOROLOGY]

Frequency of cold front passages during year in French part of Switzerland and times of occurrence during day

04 p0628 A69-15089

Satellite radiation maps for synoptic analysis regarding world weather maps, discussing front, intertropical convergence zones and typhoon location

14 p2473 A69-29729

Relation between radar echoes spatial extent and synoptic conditions with reference to various fronts, noting significance for aviation

14 p2474 A69-29738

Low level jet stream near meso-low on stationary front in Japanese rainy season analyzed from radar echoes, noting appearance of vertical current

16 p2809 A69-32601

Variable scatter mechanism in turbulent tropospheric propagation medium, employing dynamic meteorology concepts for frontal disturbances effect on scatter volume

17 p2927 A69-33856

FROST

Dew /or frost/ point determination method for low temperature humidity measurement

09 p1502 A69-22691

Vertical wind velocity profiles approximation accuracy determined by linear, exponential and logarithmic functions of altitude during ice and frost

13 p2293 A69-27846

IR reflection spectra agreement for frost particles and Venus clouds, noting ice as clouds constituent

18 p3190 A69-34282

Minimum air temperature forecast by terrestrial thermal or long wave radiation balance measurement, using radiometer data

23 p4184 A69-42211

FROUDE NUMBER

Hydrofoils fully submerged in seaway at up to 140 knots and constant Froude number, discussing foils lift/drag ratios as function of speed and submergence

11 p1871 A69-25122

Froude number for scaling wind stress at air-water interface, verifying logarithmic wind profile and relating shear velocity to surface roughness

17 p2996 A69-33152

FROZEN EQUILIBRIUM FLOW

Frozen shock in steady one dimensional compression flow of relaxing gases weaker than equilibrium shock

08 p1304 A69-20785

Electrical characteristics of equilibrium plasma sheaths at stagnation point of blunt body in high speed air, considering current collection regimes
[AIAA PAPER 69-702]

17 p3011 A69-33473

FROZEN FOODS

Astronaut feeding in space and NASA criteria for space foods, eliminating foods in metal tubes and directing development efforts to dehydrated foods

15 p2560 A69-31459

FRUSTUMS

Geometrical diffraction theory for bistatic scattering of plane wave by conducting frustum, calculating scattering matrix

11 p1837 A69-24999

Bending theory for truncated multilayer anisotropic conical shells, defining relations between displacements and external forces

11 p1984 A69-25141

Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences

11 p1992 A69-25519

Surface wave patterns of truncated conical shells with free edges attributed to mechanical properties

12 p2178 A69-26002

Longitudinal elastic waves produced in truncated hollow Al cone due to steel spheres impact

[ASME PAPER 69-APMW-15]

24 p4401 A69-43101

FUEL-AIR RATIO

Coal grain combustion rate and duration at finite air excess coefficient, solving combustion process equations under steady state assumption

04 p0687 A69-15168

Photochemical ignition of low pressure fuel-oxidizer mixtures applied to unsensitized stoichiometric mixtures of methane-oxygen and hydrogen-oxygen

[WSCI PAPER 68-42]

06 p1034 A69-17791

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system

[AIAA PAPER 69-85]

06 p0984 A69-18082

Hydrogen-air supersonic combustion at low densities, discussing laboratory computer simulation based on boundary layer concepts and finite rate chemistry

[WSCI PAPER 68-29]

07 p1240 A69-18358

Spark ignition of liquid fuel droplets atomized in air analyzed by spark discharge visualization for two phase mixture

09 p1623 A69-22220

Combustion chamber design for advanced gas turbines, noting influence of fuel air mixing and air flow distribution

09 p1573 A69-22612

Gas turbine engines smoke emission, considering smoke measurement, flame structure, carbon production, pressure effects fuel-air ratio, etc

09 p1573 A69-22622

Gas turbine engines smoke reduction, aerated fuel sprays for smoke control on engine design and factors affecting visibility of exhaust plumes

17 p3020 A69-33350

Kinetic model and steepest descent method to optimize one dimensional combustor

[AIAA PAPER 68-644]

19 p3448 A69-35943

FUEL CAPSULES

Multifuel-capsule radioisotope thermoelectric generator design procedure, applying statistical environment definition

24 p4349 A69-43191

FUEL CELL CATALYSTS

U ELECTROCATALYSTS

FUEL CELLS

NT HYDROGEN OXYGEN FUEL CELLS

NT REGENERATIVE FUEL CELLS

Hydrocarbon-air fuel cell producing electric power automatically for five days

01 p0013 A69-10965

Direct energy conversion and materials limitations, discussing thermoelectricity, solar cells, thermionics and fuel cells

02 p0194 A69-11801

Electrocatalysts for direct electrochemical oxidation on n-octane in fuel cells, discussing platinum consumption reduction

[ECS PAPER 8]

03 p0368 A69-13856

Secondary cells with liquid lithium anodes and immobilized fused salt electrolytes

04 p0552 A69-15330

Low temperature hydrogen fuel cells and basic electrolyte batteries design, discussing electrolyte concentration regulation by elimination of water formed

08 p1258 A69-21027

Manned spacecraft electrical power systems requirements, noting Gemini and Apollo fuel cell system design and configuration

08 p1259 A69-21035

Oxidizer reducing and fuel oxidizing catalysts role in large current densities production at electrodes of low temperature carbon fuel cells

08 p1259 A69-21037

Electrodes behavior for fuel cells with liquid electrolyte under high-g and weightlessness conditions, discussing spontaneous liquid motion

08 p1259 A69-21038

Cold hydrogen and basic electrolyte cells at CGE research center, discussing single cell batteries, reagent chambers and auxiliary control systems

08 p1259 A69-21039

ABEPAC fuel cell with ion exchange membrane electrolyte impregnated with sulfuric acid solution, describing electrodes and bipolar collectors

08 p1259 A69-21040

Ion exchange fuel cells for emitter-receiver on atmospheric constant ceiling balloon, stressing pressure effect on operation and fuel storage

08 p1260 A69-21042

Electrochemical characteristics of lateral diffusion gas electrodes for fuel cells, noting electrodes fabrication by pulverizing on nickel sheet

08 p1260 A69-21044

Fuel cell oxygen ionization on nickel, silver and nickel-silver disk electrodes

08 p1260 A69-21045

Medium temperature fuel cells, noting reliability and high efficiency leading to selection for lunar exploration vehicle of Apollo project

08 p1260 A69-21046

Fuel cell system using double skeleton catalyst gas diffusion electrodes, discussing design, mode of operation and performance

08 p1261 A69-21047

Proton electrolyte application to fuel cells, discussing proton diffusion in solids and materials with vacancies /proton conductors/ in structures

08 p1269 A69-21053

Fuel cells utilizing direct electrochemical conversion of energy of radioactive elements

08 p1269 A69-21054

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells

11 p1825 A69-24523

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant

[ECS PAPER 330]

15 p2562 A69-31540

Removal rate of reaction water from fuel cells by diffusion-condensation procedure as function of temperature and electrolyte concentration

16 p2736 A69-32200

Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems

16 p2737 A69-32406

Thin film metallic oxide catalysts for oxidation in low temperature cells using hydrogen and hydrocarbons and for oxygen reduction in acid electrolyte

16 p2738 A69-32408

Electrodes for fuel cells with liquid electrolytes, discussing problems under weightless and high gravity situations

16 p2738 A69-32409

Hydrogen and basic electrolyte cold cells, studying control systems for reactants supply, current, reaction by-products, etc

16 p2738 A69-32410

Power source with electrolyte consisting of ion exchange membrane in aqueous solution of sulfuric acid

16 p2738 A69-32411

Fuel cell oxygen electrode problems, noting oxygen ionization reaction and disk electrodes role

16 p2739 A69-32416

Medium temperature fuel cells advantages including improved electrochemical reaction kinetics, water and heat removal

16 p2739 A69-32417

Double skeleton catalyst type VARTA fuel cell system for space power, using potassium hydroxide as electrolyte

16 p2739 A69-32418

Fuel cells with solid membranes with ion conductivity, discussing proton electrolyte

16 p2740 A69-32424

Low temperature fuel cell with mixed oxidizer and fuel and fuel cell based on water radiolysis under alpha and gamma radiation

16 p2740 A69-32425

Irreversibility resulting from composition changes in operating fuel cell anode and cathode chambers and cell geometry influence

18 p3093 A69-34781

Secondary power sources for space applications in solar arrays, static and dynamic thermal systems, high power batteries and fuel cells, discussing NASA machinery procurement

19 p3255 A69-36323

Fuel cells ionic concentration changes across porous matrix during operation, measuring voltage losses due to pH changes and liquid junction potentials

[ECS PAPER 335]

20 p3466 A69-38069

Cathode materials role in high temperature zirconia electrolyte fuel cell performance, discussing metals, collector-embedded and electronically conducting oxides properties

22 p3869 A69-40734

Molecular hydrogen-CO fuel cells operation, studying natural voltage oscillations due to repeated electrode poisoning and reactivation

22 p3896 A69-40738

Fuel cell /battery and solar array/ battery systems for manned Apollo Applications Program /AAP/ space vehicles, considering mission and power requirements

23 p4069 A69-42244

Fuel cells construction materials selecting and optimizing techniques using diffusion block and differential corrosion concepts

23 p4075 A69-42299

Anisotropic porous media model for fluid motion in rectangular fuel cell cavities, analyzing pressure, velocity, stream functions and purge time

23 p4075 A69-42300

Battery/fuel cell hybrid power source, discussing fast transient response

[SAE PAPER 690205]

24 p4255 A69-42889

FUEL COMBUSTION

Sulfur organic compound formation effect on composition and structure of solid phase formed during hydrocarbon jet fuels oxidation

01 p0142 A69-11097

Gas turbine alloys composition role in high temperature corrosion resistance under high sulfur diesel fuel combustion

03 p0444 A69-13309

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system

[AIAA PAPER 69-85]

06 p0984 A69-18082

Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics

[AIAA PAPER 69-178]

06 p1037 A69-18100

Quasi-steady combustion model of fuel droplet with convection, including pressure effect

[AIAA PAPER 69-147]

06 p1037 A69-18114

Chemical kinetic model for hydrocarbon fuels combustion and application to multidimensional finite difference mixing analyses in hypersonic engines and nozzles

[AIAA PAPER 69-86]

06 p1037 A69-18119

Fuel mixing mechanism in diffusion type supersonic combustion, noting influence of combustor configuration and fuel density

[AIAA PAPER 69-32]

07 p1242 A69-19266

Petroleum sulfides advantageous effect on oxygen consumption during combustion

07 p1202 A69-19456

Kerosene droplets combustion stability studied by motion pictures, discussing pressure, temperature and O concentrations effects in turbulent carbon dioxide flow

08 p1421 A69-20345

Rolls Royce Spey engine combustion system development, emphasizing carbon formation, exhaust smoke, fuel injection, increased area interconnector, and overheating

09 p1573 A69-22613

Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water

11 p1999 A69-24484

Unsteady heating of fuel mixture in vertical cylindrical container with Arrhenius heat source, discussing heat conduction equations and wall temperature effects

11 p2001 A69-25192

Acoustic frequency of longitudinal self oscillations during vibrational fuel combustion in afterburner, taking into account nonlinear properties of heat supply zone

11 p2002 A69-25339

Tubular gas turbine combustion chamber design for optimum mixing performance using flow and mixing data of cold air injection into hot gas stream

[IME PAPER 15]

12 p2147 A69-25793

Platinum based metal binary catalysts as anodes for hydrogen/carbon monoxide fuel mixtures oxidation, discussing alloy surface chemisorption of CO

12 p2026 A69-25937

Transverse wave spacings for self sustaining detonations in oxygen and diluents mixtures with hydrogen, methane, acetylene or ethylene fuel, noting dilution

13 p2378 A69-28217

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions
13 p2379 A69-28456

Spherical symmetric unsteady conservation equations describing transient burning of volatile fuel droplets, obtaining time dependent fuel and heat distribution in flow field
14 p2537 A69-29016

Liquid fuel droplets combustion under free and forced convection noting combustion rate
15 p2719 A69-31174

Fuel drop combustion under unsteady conditions at high pressure in unlimited and limited air volume
15 p2719 A69-31476

Semiempirical correlation of characteristic velocity for Otto Fuel II during monopropellant combustion, assuming droplet vaporization as rate controlling process [AIAA PAPER 69-419]
16 p2877 A69-31843

Two phase detonations of fuel in liquid layer on shock tube wall with gaseous oxidizer, presenting one dimensional approximation for film detonation propagation
16 p2879 A69-32151

Hydrodynamic stability of solid fuel combustion in presence of acoustic disturbances in gas phase, considering material erosion and particle dispersion
18 p3231 A69-35150

Fuel droplet evaporation and combustion in still air as unsteady diffusion controlling phenomenon, basing calculations on flame front model
20 p3632 A69-37520

Film vaporization of fuel in combustion chambers of aircraft turbines, determining concentration and velocity distributions of fuel and air
20 p3633 A69-37921

Film vaporizing gas turbine combustor design including performance tests and combustion physics
21 p3784 A69-38607

Thermal stability of reactive spherical shell, investigating spontaneous ignition of volatile fuel drop exposed to hot oxidizing environment
21 p3849 A69-38804

Temperature influence of homogeneous kerosene-air mixture on flame stabilization by mechanical and gas dynamic baffle systems
21 p3850 A69-38859

Nonstationary solid rocket fuel combustion scheme, using unsteady combustion model for quantitative analysis of rocket engine irregularities attributed to excessive fuel
22 p4050 A69-40457

Supercritical burning of liquid fuel droplets in stagnant environment, using flame sheet model to obtain heat and mass fields
24 p4415 A69-43600

FUEL CONSUMPTION

Optimum control with respect to minimum fuel and power consumption involving constraints based on Kuhn-Tucker conditions and saddle point theorem
02 p0223 A69-11564

Hydrostatic journal gas bearings calculations for carrying capacity, gas consumption and optimal dimensions for maximum lifting capacity
03 p0432 A69-12960

Hovercraft range operating at constant speed as function of design efficiency, power apportionment, fuel consumption and initial specific resistance
03 p0367 A69-13909

Minimum fuel attitude control of spacecraft by Pontryagin principle and extended steepest descent method
03 p0522 A69-14100

Book on planetocentric, lunar and interplanetary transfer techniques covering communications and coordinate system selection, minimum fuel and time transfer and rendezvous, etc
04 p0652 A69-14458

Aerothermodynamics of subsonic-aircraft propulsion, analyzing performance of bypass engine, fuel consumption and specific weight
05 p0695 A69-15551

Minimum fuel consumption for low thrust jet engine propelled space vehicles maneuvering in circular trajectories
05 p0829 A69-15879

Minimum fuel rendezvous maneuver for two space vehicles in circular orbit, considering propelled tracking equipment nonlinear equations of motion
05 p0823 A69-16036

Optimization procedure developed and applied to minimum fuel midcourse guidance of spacecraft, discussing optimal closed loop control of linear stochastic systems
06 p0955 A69-17576

Minimum fuel control of spacecraft orbital elements for transfers between elliptical orbits by low variable thrust propulsion, noting interplanetary trajectory optimization
06 p0955 A69-17579

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional [AIAA PAPER 69-76]
06 p0956 A69-18081

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for mid-course impulses [AIAA PAPER 69-74]
06 p0956 A69-18183

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints [AIAA PAPER 69-209]
07 p1178 A69-19570

Aircraft gas turbine engines control systems capabilities and future requirements, considering maximum propulsion system performance with minimum fuel consumption [ASME PAPER 68-GT-62]
08 p1376 A69-19846

Optimum cruise altitude, block time and fuel relations for Conqair 600/640 aircraft for various temperatures, segment distances and weight
08 p1255 A69-21007

Damped mass expulsion for space vehicle attitude control reducing propellant consumption and pulsing frequency [AIAA PAPER 67-535]
09 p1610 A69-21986

Space flight fuel consumption optimization as function of acceleration of nozzle control
10 p1666 A69-22919

Propulsion optimization for various vehicles, considering power plant weight, specific fuel consumption, power and thrust ratios, etc
11 p1941 A69-24462

Isothermal theory of cool flames, discussing oscillations-fuel consumption relations, kinetics, etc
11 p1970 A69-24476

Spacecraft attitude control with minimum energy control logic for small constant disturbance torques, considering reaction jet torquers and fuel consumption
11 p1966 A69-25446

Thrust, bank angle and angle of attack of aircraft minimum fuel lateral turns at constant altitude and specified velocities
13 p2203 A69-28245

Turbofan engines impact on aircraft engineering development emphasizing large performances, high fan flow rates and low fuel consumption
15 p2550 A69-30322

Optimal rendezvous maneuver of pursuing vehicle with minimum fuel expenditure in approach stage on elliptic and hyperbolic orbits
15 p2701 A69-31548

Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust
16 p2852 A69-31558

Minimum fuel multiple impulse orbital rendezvous for fixed transfer time near circular orbits
16 p2857 A69-32161

Nitrogen reaction with excess fuel in ramjet engines, noting kinetic limitations in applications [WSCI PAPER 69-12]
16 p2831 A69-32351

Gas phase ignition shock tube analysis of solid propellant taking into account changing surface temperature and fuel vapor consumption
18 p3183 A69-34463

Time and fuel optimization of angular momentum alignment and nutation elimination of spin stabilized bodies with inertial reference direction
18 p3208 A69-34775

Economics evaluation for operation of commercial fixed wing aircraft at aft center of gravity position, noting fuel saving from drag reduction [SAWE PAPER 806]
18 p3091 A69-34902

Computer-generated airline fleet performance data on B-720, B-727 and DC-8 aircraft, attributing deterioration to increased drag and fuel consumption [AIAA PAPER 69-770]
19 p3245 A69-35651

Minimum fuel guidance from hyperbolic into specified circular orbit
19 p3367 A69-35663

Optimal fuel transfers between coplanar and non-coplanar coaxial elliptical orbits determined by Pontryagin maximum principle, using digital program for Hamiltonian equations solutions
19 p3399 A69-35670

Numerical integration of plane orbital transfers with multiple powered arcs, minimizing propellant expenditure of small thrust chemical rocket
19 p3400 A69-35673

Coplanar impulsive transfers and second variation test, using maximum principle and Lagrangian multiplier technique for propellant expenditure minimization
19 p3400 A69-35676

Stream surface characteristics as criteria for hypersonic lifting bodies shapes for optimal aerodynamic and fuel performance
19 p3248 A69-36399

Automatic stationkeeping/geosynchronization/ for maintaining satellite in circular synchronous orbit at all geocentric longitudes for prolonged time with low fuel consumption
21 p3805 A69-39213

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets [AIAA PAPER 69-904]
21 p3806 A69-39336

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions [AIAA PAPER 69-905]
21 p3806 A69-39337

Minimum fuel thrust limited transfer trajectories computation for coplanar elliptic orbits [AIAA PAPER 69-914]
21 p3808 A69-39344

Analytic approximation for initial adjoint vector for optimal/minimum propellant/ space trajectories [AIAA PAPER 69-916]
21 p3808 A69-39345

Fuel-time optimal retrothrust control for vertical and gravity turn ballistic trajectories of soft landing nonlifting bodies based on Pontryagin principle [AIAA PAPER 69-868]
21 p3809 A69-39394

Building block approach to turbofan engine design, discussing fuel consumption, noise and component research [RAES PAPER 14]
22 p3999 A69-40493

Optimal minimum fuel rendezvous maneuver variational problem, generalizing circular orbit results to conical orbits
22 p4028 A69-40754

SST stratospheric environment problems, discussing temperature effects on fuel consumption and convective turbulence effect on flight safety and efficiency
22 p3867 A69-41141

Thrust increase methods for air breathing turbojet engines analyzed with respect to effectiveness, taking into account environmental supporting mass and fuel expenditures
23 p4199 A69-41578

Flight range and fuel consumption formulas of power gliders used for transportation compared with automobiles
24 p4253 A69-43142

FUEL CONTAMINATION

Propellants volatile fraction removal followed by gas chromatographical determination, noting use of heating method
02 p0302 A69-11522

Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance
04 p0551 A69-15310

Petroleum sulfides advantageous effect on oxygen consumption during combustion
07 p1202 A69-19456

Aircraft design, fabrication and finish techniques taking into account aircraft integral fuel tank corrosion due to contaminants associated with microbiological debris [NACE PAPER 49]
08 p1320 A69-20599

Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects [AIAA PAPER 69-574]
16 p2870 A69-32774

Hydrogen fluoride corrosive effects in cryogenic propellant, emphasizing contamination by particulate matter from corrosion products
21 p3783 A69-39486

FUEL CONTROL

Computer simulation on engines dynamic behavior covering thrust transfer functions, time behavior and engine and fuel controller operation
08 p1301 A69-20167

Fuel control systems using emulsified fuel, noting exposure effects and temperature and pressure characteristics [ASME PAPER 69-GT-40]
09 p1571 A69-22486

Differential game for determining singular fuel optimal control of plant with uncertainty in dynamic equation
10 p1667 A69-24041

Gas turbine fuel and control systems for two and three shaft engines in military and civilian aircraft including helicopters
[IME PAPER 12] 12 p2147 A69-25796

Fluidic systems for automatic control of fuel supply to ramjet engine combustor, coolant rationing and distribution to engine structure and performance efficiency maintenance
14 p2508 A69-28875

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests
[AIAA PAPER 69-531] 16 p2833 A69-32691

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers
[AIAA PAPER 69-529] 16 p2868 A69-32713

Cost optimization of mixture ratio control systems for liquid propellant launch vehicles, considering open and closed loop systems
[AIAA PAPER 69-441] 16 p2870 A69-32775

Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funneling and fuel-driver gas interface stability
[AIAA PAPER 69-678] 17 p3021 A69-33444

Minimum-fuel controls in multidimensional optimum transfer problems
19 p3400 A69-35677

Acoustic pumping system for propellant control at zero gravity, describing system operation by hydraulic analogy for liquid sloshing prevention
20 p3548 A69-37294

Trajectory optimization of second state of rocket launched into earth circular orbit in gravitational field by stepwise fuel control, using Pontryagin maximum principle
21 p3829 A69-39818

JT9D engine fuel and vane control systems for Boeing 747, noting computing system positioning of throttle valve for fuel flow control
[SAE PAPER 69-0405] 23 p4201 A69-41658

Engine fuel and geometry control design for large high bypass aircraft turbofan engines used for airbus powering
[SAE PAPER 69-0403] 23 p4201 A69-41659

FUEL CORROSION

Corrosive characteristics of jet fuels near condensing water studied by weight loss method, using copper alloy plates
01 p0142 A69-11099

Additions of dialkyl and diaryldithiophosphates of Ba, Ca, Zn, Pb and Ni as antioxidants and corrosion inhibitors for hydrocarbons
12 p2027 A69-27091

Dynamic hot corrosion rig test for operating environment and alloy composition effect on sulfidation attack during gas turbine fuel combustion
23 p4150 A69-42448

FUEL ELEMENTS [NUCLEAR REACTORS]

U NUCLEAR FUEL ELEMENTS

FUEL FLOW

NT PROPELLANT TRANSFER

Concorde fuel management, discussing trim, fuel as coolant and booster pumps
07 p1057 A69-19705

Fuel jet shape in air stream/mechanical atomization calculated as function of stream and fuel injection parameters
11 p2002 A69-25336

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec
15 p2616 A69-31292

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity
18 p3171 A69-35181

Fueling process in internal combustion engines having fuel admission systems with different flow cross sections
19 p3393 A69-35824

Diffusion flame stability at inlet of fuel stream into oxidizer, showing ignition coordinates dependence on fuel, oxidizer and ratio of burning/flow rate
19 p3448 A69-35855

FUEL FLOW REGULATORS

Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 16 p2844 A69-32723

Stochastic fuel regulator problem investigated by optimal and self organizing techniques, emphasizing realizability of resulting controllers
24 p4292 A69-43284

FUEL GAGES

Aircraft nucleonic fuel gauging system, using radioactive gas to emit gamma rays for fuel mass sensing
18 p3139 A69-35468

FUEL INJECTION

Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection
08 p1421 A69-20762

Fuel concentration effect on turbojet engine reheat jet pipe vibrations via tests
09 p1573 A69-22616

Film cooling injection slots number and position over flame tube and minimum cooling airflow in aircraft gas turbines
09 p1625 A69-22623

Leading edge conditions of obstacle exuding fuel into oxidizer stream, using Oseen equations in parabolic coordinate system
11 p1997 A69-24307

Injected propellant behavior during one dimensional passage through rocket combustion gas chamber, considering Reynolds number and propellant characteristics
11 p1941 A69-24329

Fuel jet shape in air stream/mechanical atomization calculated as function of stream and fuel injection parameters
11 p2002 A69-25336

Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate
12 p2148 A69-26806

Fuel injector-induced mass flux and mixture ratio distributions effects on combustion performance, chamber volume and stability, discussing combustion oscillation avoidance
16 p2877 A69-31731

Liquid propellant injector design for rocket thrust chambers, discussing mass and mixture ratio regulation
16 p2836 A69-31999

Oxygen difluoride-diborane propellant injector and chamber design criteria applied to unmanned spacecraft rocket engine development
[AIAA PAPER 69-508] 16 p2839 A69-32671

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc
[AIAA PAPER 69-827] 16 p2840 A69-32673

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure
[AIAA PAPER 69-562] 16 p2880 A69-32741

Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants
[AIAA PAPER 69-506] 16 p2846 A69-32778

Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors
[AIAA PAPER 69-664] 17 p2953 A69-33437

Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement
24 p4362 A69-43128

Intermediate hydrazine-RFNA reaction product formed on injector nozzle and combustion chamber surfaces after fuel injection without ignition analyzed by various methods
24 p4365 A69-43669

FUEL OILS

Displacement pumps and fluids for extreme environments, discussing fluid types and operational parameters such as speed, pressure, temperature, power, displacement and size
06 p0931 A69-17188

Fuel requirements for flights up to Mach 3.5, discussing heat stable mineral oil based SST fuels
11 p1941 A69-25422

FUEL PUMPS

Liquid hydrogen circulation pump design emphasizing heat leaks
01 p0087 A69-11148

Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile
01 p0087 A69-11149

Vane type fuel pump designed for small gas turbine engines, describing design analysis and laboratory evaluation
[ASME PAPER 69-GT-45] 09 p1513 A69-22485

Fueling procedures for Boeing 747 aircraft, discussing design and operation of large capacity fuel trucks
10 p1674 A69-23631

Fueling procedures for Boeing 747 aircraft, discussing design of high rate mobile fuel dispensers
10 p1674 A69-23633

Close coupled accumulators for suppressing missile longitudinal oscillations (POGO) developed for Gemini and Titan 3, including pump interaction
[AIAA PAPER 69-547] 16 p2869 A69-32729

Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551] 18 p3140 A69-34415

FUEL SPRAYS

Gas turbine engines smoke reduction, aerated fuel sprays for smoke control on engine design and factors affecting visibility of exhaust plumes
17 p3020 A69-33350

Aerated fuel spray effect on smoke reduction from high pressure ratio aircraft gas turbine engines, including smoke measurement and visibility
19 p3395 A69-36770

Fuel droplet evaporation and combustion in still air as unsteady diffusion controlling phenomenon, basing calculations on flame front model
20 p3632 A69-37520

FUEL SYSTEMS

NT AIRCRAFT FUEL SYSTEMS

Gas turbine engines control and fuel systems integration, considering weight reduction
[ASME PAPER 69-GT-49] 09 p1571 A69-22483

On-off multiple tank fuel systems for single and twin engine light aircraft, noting fail-safe design
[SAE PAPER 69-0334] 11 p1825 A69-24502

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies
11 p1967 A69-25498

AH-56A Cheyenne armed compound helicopter designed to operate from unimproved bases with minimum support equipment, noting on-board fueling capacity
[AIAA PAPER 68-560] 12 p2017 A69-26770

Fueling process in internal combustion engines having fuel admission systems with different flow cross sections
19 p3393 A69-35824

Aircraft fuel vent line sensitivity to lightning hazards, using flame propagation and arrester experiments with high voltage and high current facilities
[SAE PAPER 69-0434] 23 p4062 A69-41651

FUEL TANK PRESSURIZATION

Model describing outflow of cryogenic propellant tank pressurized by pressurizing gas, predicting pressurant mass, gas and wall temperature distribution, inlet flow rate, etc
01 p0163 A69-11147

Volatile liquid pressurization, discussing pressurants, heat sources and system design
[AIAA PAPER 68-630] 02 p0232 A69-12382

Pressurization system for liquid rockets, analyzing inert weight and complexity reduction using Saturn 5 S-4B stage
02 p0305 A69-12386

Liquid nitrogen inertant for continuous suppression of pressurized fuel tank explosion
05 p0703 A69-16505

Fluidic component application to propellant tank pressurization and controller design
[AIAA PAPER 68-629] 09 p1442 A69-21980

Propellant pressurization system for British Black Arrow composite vehicle, describing valve design and performance
14 p2509 A69-29629

Liquid expulsion by direct pressurization of propellant tank in spinning missile system, demonstrating feasibility with subscale hardware
[AIAA PAPER 69-527] 16 p2838 A69-32651

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing
[AIAA PAPER 69-528] 16 p2767 A69-32717

Pressurant gas requirements for pressurized discharge of liquid hydrogen from propellant tanks for optimum pressurization system designs
[AIAA PAPER 69-526] 16 p2845 A69-32737

Main tank injection for packaged liquid missiles, discussing propulsion system design, pressurization, packaging and screen reservoir
[AIAA PAPER 68-627] 19 p3429 A69-35947

FUEL TANKS
NT WING TANKS
Axisymmetric vortex free motion of ideal fluid in conical container with spherical bottom under axial acceleration 06 p0910 A69-17335
HORA, flexible upper rocket stage, noting variable fuel tank capacity and high energy propulsion 08 p1409 A69-20094
Aircraft design, fabrication and finish techniques taking into account aircraft integral fuel tank corrosion due to contaminants associated with microbiological debris
[NACE PAPER 49] 08 p1320 A69-20599
Draining liquid surface dip formation in tanks of arbitrary shapes and drain hole positions 09 p1483 A69-21999
On-off multiple tank fuel systems for single and twin engine light aircraft, noting fail-safe design
[SAE PAPER 690334] 11 p1825 A69-24502
Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems 12 p2176 A69-25860
Stress corrosion cracking of titanium alloys in contact with high temperature fuel tank sealants 12 p2112 A69-25945
Aircraft integral fuel tanks corrosion causes and prevention, discussing microorganisms, maintenance and cleaning procedures, anticorrosive additives, etc 12 p2013 A69-25946
Fracture of bumper protected fuel tanks subjected to hypervelocity meteoroid impact, applying method of characteristics to stress wave propagation in tank walls
[AIAA PAPER 69-369] 13 p2367 A69-28301
Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funnelling and fuel-driver gas interface stability
[AIAA PAPER 69-678] 17 p3021 A69-33444
Tank configurations allowing for sloshing in liquid fuel reaction control system in spinning satellite 18 p3219 A69-34796
Microbiological corrosion and degradation of aircraft metals and organic materials in fuel tanks 19 p3341 A69-35569

FUEL TESTS
Jet fuel lubricity evaluation by ball-on-cylinder device
[ASLE PREPRINT 68AM 4A-2] 01 p0083 A69-10914
Laboratory test stands for ignition, combustion and expansion processes experiments in hypergolic liquid fuels, noting minimal recombination gains 08 p1301 A69-20170
Hot air open circuit wind tunnel for testing vaporized fuel films heat and mass transfer over flat plates 08 p1302 A69-20878
Fuel requirements for flights up to Mach 3.5, discussing heat stable mineral oil based SST fuels 11 p1941 A69-25422
Turbine and jet engines kerosene fuels tests in small and medium size laboratory combustion chambers 13 p2240 A69-27932

FUEL VALVES
LOX preclude accumulator system with He pressurant for prevention of Pogo effect on Saturn 5 04 p0666 A69-15298
Propellant pressurization system for British Black Arrow composite vehicle, describing valve design and performance 14 p2509 A69-29629
Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 16 p2844 A69-32723
Hydrogen check valve with low cracking pressure and flow pressure drop for hydrogen vent system at Saturn launch pad
[AIAA PAPER 69-578] 16 p2845 A69-32738
Stability of nonlinear systems with state variable feedback applied to fuel valve servomechanism 21 p3687 A69-39460

FUELING
U REFUELING

FUELS
U AEROZINE
U AIRCRAFT FUELS
U CHEMICAL FUELS
U CRYOGENIC ROCKET PROPELLANTS
U DOUBLE BASE ROCKET PROPELLANTS

U FUEL OILS
U GELLED ROCKET PROPELLANTS
U HYDROCARBON FUELS
U HYDROGEN FUELS
U HYPERGOLIC ROCKET PROPELLANTS
U JET ENGINE FUELS
U JP-4 JET FUEL
U LIQUID ROCKET PROPELLANTS
U METAL FUELS
U METAL PROPELLANTS
U MONOPROPELLANTS
U NUCLEAR FUELS
U SOLID ROCKET PROPELLANTS

FULL SCALE FATIGUE TESTS
U FATIGUE TESTS
FULL SCALE TESTS
Full scale and transonic wind tunnel store separation characteristics, outlining uses of heavy and light scaling methods 17 p2896 A69-34035
Helicopter rotors forward-flight noise characteristics determined by wind tunnel tests compared to rotor noise during flyover 18 p3119 A69-35225
V/STOL model small scale tests compared with full scale tunnel or flight tests, considering normal differences in parameters and rotor instability 18 p3119 A69-35227

FUMES
Monograph on spreading of explosive vapor/air mixtures during aircraft fueling, covering underlying flow technology principles 15 p2551 A69-30930

FUNCTION GENERATORS
Zener diode function generators used in analog computers for solution of complex problems involving nonlinear relationship 02 p0214 A69-11595
Dynamic programming application to function generation, determining breakpoints for best linear approximation of one dimensional function 03 p0401 A69-13765
Interpolation filters with restricted transmission zeros in transmission function capable of reconstructing continuous function from equidistant sample value 05 p0735 A69-16617
Function generator for approximating function of many variables without recourse to multiplication, providing continuous functions representation 08 p1278 A69-20235
Pneumatic diode function generator for simulating nonlinear control systems, discussing operating characteristics and programming methods 11 p1858 A69-24580
Cumulative probability distribution of positive random variable from moment generating function, exemplifying exponential and Poisson functions 12 p2120 A69-25927
Time-pulse function generator with piecewise parabolic approximation for converting value given by DC voltage or time interval into DC voltage for arbitrary functional relation 12 p2079 A69-25968
Energy metric algorithm for Liapunov functions generation, discussing stability conditions in Wall and Moe work 12 p2122 A69-26521
Random variables generation from distribution having given failure rate function 12 p2102 A69-26571
Function generator internal storage and dimensions diminished, approximating functions of several variables by hyperplane strip 14 p2425 A69-29142
Theory, function generator routine and testing for six node 18 degree of freedom triangular element for plate bending 15 p2706 A69-30430
Recognition system for discrete decision function generation to select one out of two classes of objects, deriving solutions for selection probability 17 p2932 A69-33119
Threshold logic for LSI to realize broad range of functions noting signal control, gate characteristics, weighting, etc 17 p2943 A69-34122
Planar distributed function generator for analog computing scheme, considering operation, cosine circuit and temperature error 17 p2934 A69-34123
Random function output current obtained in phototube and scintillation detector including amplitude distribution, time measurements and pulse shape discrimination 22 p3947 A69-40670

Minimization algorithm for switching systems synthesis, describing design of mass spectrometer curve function generator and autonomous shift register 23 p4146 A69-42535

FUNCTION SPACE
NT BANACH SPACE
NT HILBERT SPACE
Integral operators on space of Borel measurable functions bounded considering weight function, giving condition for infinite complex matrices, mapping analytic sequence spaces 01 p0107 A69-11244
Nonlinear programming of optimization of parameters and control functions of dynamic systems 03 p0408 A69-12974
Matrix theorem giving necessary and sufficient conditions for leaving cone invariant, considering finite dimensional spaces 04 p0624 A69-15003
Volterra equation generalization extended and applied to functional Volterra equations, proving theorem dealing with topological, quasi-compact and uniform spaces 08 p1342 A69-20268
Functional equations of physical systems in strong coupling solved by quantum theory model of anharmonic oscillator, discussing relativistic invariant field theories 09 p1541 A69-22393
Nondifferential function minimization on entire vector space or bounded subset for application to minimax problems in function spaces, time optimal control, etc 10 p1721 A69-23863
Differential equations describing system stability with delay in functional space 11 p1919 A69-25093
Topologies introduced on state space for differential equations to obtain dynamical systems 11 p1909 A69-25409
Parametric variations method for solving nonlinear algebraic and transcendental equations, determining number of solutions in complex space 12 p2123 A69-26608
Regional boundaries in control-parameter space constructed by computer algorithm, involving parameter vibration direction changes in parameter plane 13 p2225 A69-27967
Algebra of quasi-homogeneous pseudodifferential operators applied to lateral boundary values of solutions of parabolic differential equations, discussing function spaces 17 p2994 A69-32842
Eigenvalue conversion of second variation test for algebraic and differential constraints to Jacobi accessory minimum problem by introducing norm in coordinate perturbation space 19 p3400 A69-35672
Ordinary differential equations in linear topological space extended from Fattorini investigation, emphasizing use of linear operator 19 p3360 A69-36599
Computer-algorithm elements required for engineering design and invention problems including design requirements, selection of spaces for variables using computerized heuristics, etc 19 p3280 A69-36666
Stability criteria for integral manifold formed by intersection of hypersurfaces in Euclidean n-dimensional space 21 p3770 A69-38850
Asymptotic stability of differential equations solutions in linear normalized spaces via Liapunov theorems extension 21 p3755 A69-39105

FUNCTION TESTS
U TESTS

FUNCTIONAL ANALYSIS
NT BANACH SPACE
NT CONVOLUTION INTEGRALS
NT FOURIER TRANSFORMATION
NT FREDHOLM EQUATIONS
NT HARMONIC ANALYSIS
NT HILBERT SPACE
NT HILBERT TRANSFORMATION
NT INTEGRAL EQUATIONS
NT INTEGRAL TRANSFORMATIONS
NT LAPLACE TRANSFORMATION
NT SINGULAR INTEGRAL EQUATIONS
NT TESSERAR HARMONICS
NT VOLTERRA EQUATIONS
NT WIENER HOPF EQUATIONS
NT ZONAL HARMONICS
Sobolev first embedding theorem providing relationship between global and local properties of functions in theory of differential equations 01 p0103 A69-10005

Book on approximate representation of regular functions of complex variable, discussing Faber polynomials, best approximation theorems, etc
01 p0104 A69-10616

Controllability of dynamic systems obtained by studying vector function increments along system trajectories
01 p0051 A69-10698

Finite f function computation by d/r circuit, discussing computation time
01 p0105 A69-10734

Unstable minimization problem of functional, examining construction of sequences and stability
02 p0271 A69-11648

Mathematical analysis to determine complete characteristic of functions tolerating polynomial approximation in mean in crescent type noncaratheodory domains
02 p0272 A69-12164

Extremum problems from functional-analytic point of view, discussing methods of solving and convergence conditions
03 p0456 A69-13403

Rayleigh-Ritz finite element method for approximate solution of nonlinear energy functional describing large deflection bending behavior of uniform beam under point loads
05 p0833 A69-15711

Functions satisfying mixed boundary conditions derived for boundary value problems involving regions of complex form
05 p0787 A69-16455

Optimal approximation of functional matrix, giving upper bounds for deviations of general matrices from closest special matrices
06 p0948 A69-17495

Cauchy problem for nonstationary linearized Navier-Stokes equations for fixed container partially filled with liquid
06 p0959 A69-17888

Cosserat functions for homogeneous isotropic elastic body filling finite domain with sufficiently smooth boundaries, noting eigenfunctions for first and second boundary value problems
07 p1173 A69-18499

Uniqueness conditions of expansions in series of functions stressing Jacobi series applied to singular partial differential equations
07 p1174 A69-18805

Volterra equation generalization extended and applied to functional Volterra equations, proving theorem dealing with topological, quasi-compact and uniform spaces
08 p1342 A69-20268

Total error of minimization of differentiable functionals based on gradient projection procedures
08 p1342 A69-20319

Second order tensor describing deformation of particles of continuum determined by functional, noting invariance restrictions
08 p1416 A69-20690

Iterative method for least square polynomial curve fitting with abscissas and ordinates subject to error
08 p1343 A69-20827

Singular integral method in approximation for synthesizing sequence of functions with spectrum of limited length
09 p1460 A69-22642

Tricomi theorem extension concerning intermediate value property of continuous real valued functions of real variable
09 p1533 A69-22797

Book on special functions and approximations covering differential and integral equations and attendant theories arising in mathematical physics analysis
10 p1717 A69-22801

Minimal distance of image boundary from origin and second coefficient of univalent function in unit disk
10 p1718 A69-22860

Numerical orthonormalized system of functions for formulating functional equations in potential and elasticity theory, considering boundary value problems
10 p1801 A69-23687

Liapunov functions generation for deterministic ordinary differential equations, discussing integral methods, quadratic forms, partial differential equations, canonical forms, etc
11 p1908 A69-24317

Flight dynamics problems, determining extremum of functional by graph-analytical method and with aid of Pontryagin maximum principle
11 p1823 A69-25343

Parabolic interpolation method for values of function given for certain values of argument and of first derivative, including numerical examples
12 p2121 A69-26434

Analog simulation of nonlinear functions of single independent variable compared digital to analog representation principles
13 p2224 A69-27531

Book on calculus of variations and optimal control theory, discussing functional analysis for use in space science
13 p2289 A69-28054

Inequality theorems for multidimensional functional Volterra equations formulated and proved, deriving upper and lower solutions
13 p2290 A69-28684

Applied function theory, Volume 6, Tables of theta functions and elliptical functions with examples, Part I
14 p2471 A69-29774

Functional analysis methods to solve Cauchy problem for linear nonhomogeneous differential equations with delayed argument
15 p2643 A69-30101

Soviet monograph on projective-iterative methods of solving operator equations in generalized metric and structurally normalized spaces
16 p2805 A69-32366

Thermoelectric converter systems optimization by geometry independent functions
18 p3093 A69-34782

Cauchy problem for homogeneous linear difference scheme with constant complex coefficients, giving stability lemmas
18 p3165 A69-35049

Simplification of linear equation of first kind with Tikhonov smoothing functionals
18 p3165 A69-35052

Autonomous functional differential equations with finite time interval dependent derivatives, resulting in periodicity theorem applicable to difference equations
19 p3361 A69-36600

Approximation error involved in difference optimal control problem substitution for differential optimal control problem based on functional minimization
20 p3509 A69-36989

Algorithm for Chernousko local variation method during application to solution of variational problems involving nonadditive functionals, assessing convergence
20 p3513 A69-36990

Ordinary coherence functions for computing frequency response in mechanical systems under random excitation
20 p3537 A69-37162

Discrete extremum problems solution convergence to optimal control continuous problem as functional optimal value and optimal control
21 p3684 A69-38430

Partial differential equation initial value problems analyzed by ordinary differential equations via functional approximation method
21 p3756 A69-39132

Variational problem for nonlinear functionals connected with finite plasticity, extending existence and uniqueness theorems to limit analysis
21 p3837 A69-39157

Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control
22 p3975 A69-40333

Uniqueness theorem and successive approximations for delay functional differential equations, noting scalar problems
24 p4341 A69-43236

FUNCTIONAL INTEGRATION

Representation for real functions of quantum mechanical momentum operator obtained by functional integration in phase space
01 p0106 A69-10930

Displacement function selection in calculating rubber-metal valve design, considering boundary conditions of material deformation
01 p0087 A69-10829

Expanded describing functions used in studying nonlinear control systems with multiplication points, considering systems with/without integral response
01 p0054 A69-11359

Sunspots autocorrelation functions in sunspot area on solar disk, tabulating extremal values
02 p0314 A69-11677

Existence theorems for solutions to second order ordinary differential equations
02 p0272 A69-12129

Necessary and sufficient conditions for solution boundedness for Lienard equation with forcing function
02 p0272 A69-12132

Minimal conditions for association of binary variables, studying nondecreasing functions and equivalence in coherent binary systems theory
04 p0624 A69-15007

Book on computer evaluation of mathematical functions, discussing errors, square and cube root, Chebyshev polynomials, approximation, rational function, asymptotic expansions, etc
05 p0723 A69-15955

Motion stability analysis of system represented by differential equation having continuously differentiable functions as continuously acting disturbances
05 p0794 A69-16450

Difference iteration method for solving three dimensional Dirichlet problem presented as system of plane Dirichlet problems
05 p0787 A69-16457

Uniform matched asymptotic approximations derived for various functions, with application to boundary value problem for ordinary differential equation with turning point
07 p1180 A69-18810

Symmetry considerations method for determination of Walsh function values independent of previously computed functions
09 p1452 A69-21321

Duality between effect and influence problems in linear elastoplasticity, obtaining rules for influence functions plotting
09 p1612 A69-21604

Ultimate state periodic analysis of nonlinear electric systems by approximation methods in calculus of variations, discussing functional concept
09 p1474 A69-22448

Perturbation solution for propagation of fourth order coherence function in random medium extended to larger field fluctuations, deriving integrodifferential equation
10 p1724 A69-23042

Correction of linear functional differential equations with time delay showing error due to incorrect in-

terchange of order of integration involving Stieltjes integral
10 p1721 A69-23642

General extremality for optimal controls with restricted phase coordinates and with unorthodox criterion function, discussing hypotheses for deriving necessary conditions
10 p1721 A69-23864

Potential functions for three dimensional problems of elliptical crack in elastic solid
10 p1802 A69-24026

Optimal controls for differential system nonlinear in state function and linear in control function
10 p1667 A69-24057

Integral representation for Wiener Hopf factorization of functions of complex variables for numerical processing of radiation problems
11 p1851 A69-24998

Computational method for quasi-optimal control with parameter sensitivity function, noting application to dynamical system model
11 p1859 A69-25165

Eigenvalue approximation for first order systems by introducing artificial periodicity through successive impulse functions of alternate sign
13 p2287 A69-27242

Model atmosphere source function, mean intensity and flux by matrix methods
13 p2288 A69-27564

Variational principle for finite element method restricting deflection shapes to small region of model surrounding single element
13 p2364 A69-28229

Sunspots autocorrelation functions in sunspot area on solar disk, tabulating extremal values
13 p2355 A69-28708

Wentzel-Kramers-Brillouin approximation validity determined by sufficiency conditions based on differential equations series solution
14 p2471 A69-29454

Source functions of IR Fraunhofer lines obtained using solar disk equivalent width method, noting LTE role
14 p2528 A69-29961

Master equation in quantum optics phase-space formulation based on Schrodinger equation of motion, noting application to Volterra integral equation and Born approximation
15 p2633 A69-30307

Polygonal approximation to functional equation solution by using search algorithms, listing FORTRAN IV programs
15 p2644 A69-30424

Recognition systems nonlinear discriminant function for separating linear inseparable patterns, describing orthogonal representation, correlation ratio and average variance criteria
15 p2645 A69-30806

Random functions applications to random vibrations, discussing spectral power density, ergodic steady functions, etc
17 p3054 A69-33063

Function theoretic solution of dual integral equations applied to boundary value problem of supersonic flow over infinite span thin wing
19 p3239 A69-36311

Minimax error technique used with finite difference methods to estimate error in approximations to functions defined by nonlinear differential equations
20 p3568 A69-37832

Relation between smoothed and filtered linear least squares estimates of signal process in white noise from deriving resolvent identity of covariance function
21 p3754 A69-38432

Extremal trajectory formulations for state variable inequality constrained optimization problems, forming augmented functional
23 p4182 A69-41907

Complex configuration shells described by single analytical expression using R-conjunctive and R-disjunctive functions yielding boundary equations
23 p4229 A69-41991

FUNGI

NT MICROSPORES
NT NEUROSPORA
NT SPORES
NT YEAST

Aluminum corrosion by fungi isolated from jet fuel system with predominance of Cladosporium resinae, noting protective coatings
04 p0616 A69-14765

Aluminum corrosion by fungus culture isolated from jet fuel system
06 p0941 A69-17123

FUNGICIDES

U URIC ACID

FUNNELS

Laminar boundary layer on funnel wall, considering internal vortical and radial flow
21 p3692 A69-38611

FURAN RESINS

U POLYAMIDE RESINS

FURNACES

NT SOLAR FURNACES
NT VACUUM FURNACES

Impinging jet flames on furnace hearth, analyzing thermal boundary layer characteristics and convective heat transfer rates
06 p1035 A69-17933

Molten high melting compounds obtained by arc furnace with consumable electrode and adjustable protecting atmosphere
12 p2055 A69-26264

Furnace for automatic high temperature cycling in controlled oxidizing environment
12 p2093 A69-26483

FUSELAGE MOUNTING

U AIRCRAFT PRODUCTION

FUSELAGES

Flow fields about upswept rear fuselages of rear loading cargo transport aircraft
06 p0859 A69-17492

Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels
08 p1413 A69-20399

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material
09 p1509 A69-22341

Titanium fuselage skin contouring to shallow compound curvature of supersonic aircraft by elastic draping, shotpeen forming and cold stretching, discussing residual stresses
09 p1512 A69-22374

SST fuselage response to reverberant and turbulent boundary layer noise calculated for computing equivalent reverberant acoustic fields
15 p2549 A69-30302

Fixed weight aircraft growth factor variation with location of initial weight penalty along fuselage station, using static stability margin and trim capability [SAWE PAPER 796]
18 p3220 A69-34862

Forced pressure fluctuations in hydraulic systems of aircraft fuselages and engines, taking into account square law of losses at resistance points
18 p3094 A69-34991

Fuselage corrosion effect on structure and skin of older aircraft with emphasis on pressurized aircraft
21 p3646 A69-38392

FUSES [ORDNANCE]

General and classical statistical techniques for cutting effectiveness and operational reliability of cutting fuses
10 p1749 A69-23004

Detonating fuses for separation of missile and rocket stages, noting separation ease, aftereffects, priming capability and fabrication
10 p1752 A69-23023

FUSIBILITY

Presprayed metal films influence on visibility and contact resistance of GaAs prior to fusing in Sn, In and lead contacts
10 p1748 A69-24214

Fusibility diagrams for Ti-Ta-Cr by determining specimens melting points after homogenization at various temperatures in argon
22 p3969 A69-40075

FUSIFORM SHAPES

U CONES

FUSION [MELTING]

Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
07 p1165 A69-18792

Thermodynamic consequences of Lindemann mechanism for fusion of pure body, discussing application to isolated equilibrium system of solid and liquid phases
07 p1242 A69-19322

Continental diabases and oceanic tholeiites in light of rare earth and barium abundances and partition coefficients indicating fusion process
08 p1310 A69-20945

FUSION WELDING

NT ARC WELDING
NT BRAZING

NT ELECTRON BEAM WELDING
NT ELECTROSLAG WELDING
NT GAS TUNGSTEN ARC WELDING
NT GAS WELDING
NT LOW TEMPERATURE BRAZING
NT PLASMA ARC WELDING

Fusion, resistance and pressure welding of titanium, discussing shielding, brazing, diffusion and adhesive bonding
02 p0253 A69-12064

Oxygen free fluxes for fusion welding titanium alloys, discussing weld structure and properties
06 p0930 A69-17093

Wrought superalloys fusion welding behavior, discussing hot cracking, hot microfissuring and strain age cracking [SAE PAPER 690102]
09 p1503 A69-21558

Microcracking susceptibility studies of Inconel 718 weld heat affected zones, noting hot ductibility, weld circle patch and fillerless fusion welding tests
11 p1905 A69-24933

Fusion and solid state welding of steels, considering electron beam, HF resistance, friction and explosive welding
12 p2100 A69-25830

High power pulsed laser welding system for structural alloys and parts, discussing pulse length, repetition rate, shielding and applicability
19 p3320 A69-35556

Al alloy application to welded primary airframe structures, discussing welding processes with emphasis on fusion welding [SBAC PAPER 4]
20 p3549 A69-37445

Quality control and dimensional accuracy in airframe structures fusion welding
20 p3549 A69-37446

Fusion welding for thin gauge corrugated core sandwich airframe structures capable of operating at sand temperature, discussing equipment, techniques and quality control [SBAC PAPER 9]
20 p3549 A69-37448

H concentration and pore formation in Ti fusion welds
24 p4319 A69-42885

Seam welding processes and power supply effects on control efficiency based on electrode displacement for Al-Mg alloys
24 p4319 A69-42919

F4H AIRCRAFT

U F-4 AIRCRAFT

G

G FORCE

U ACCELERATION [PHYSICS]

G-91 AIRCRAFT

Fiat G.91Y subsonic light tactical fighter, discussing fixed armaments and weapons facilities
02 p0193 A69-12679

GADOLINIUM

High temperature research on systems formed by zirconium dioxide with samarium and gadolinium sesquioxides near melting point
01 p0101 A69-10044

Ferromagnetic ordering effect on gadolinium dialuminide thermoelectric power, measuring temperature dependence of power and electrical resistivity
03 p0485 A69-13322

Magnon density of states of ferromagnetic gadolinium trichloride in magnetic field, using high resolution optical spectroscopy
03 p0494 A69-14257

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence
08 p1374 A69-21186

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for intermetallic compounds, noting structure transformation and homogeneity
11 p1903 A69-24574

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence
18 p3183 A69-35155

GAGES

U MEASURING INSTRUMENTS

GAIN [AMPLIFICATION]

U AMPLIFICATION

GALACTIC EVOLUTION

Collisionless computer model performing gravitational experiments with two dimensional galaxy
02 p0322 A69-12271

Interstellar gas field dynamic instability, discussing enhanced ambipolar diffusion in twisted field
02 p0326 A69-12707

Evolutionary theory of origin and properties of Seyfert galaxies and quasars, postulating collisions within superdense clusters leading to supermassive stars and supernovas
05 p0819 A69-15703

Quasar and radio galaxy evolution, discussing energy release rate and particle acceleration effects on radio and optical emissions
05 p0822 A69-15852

MHD quasar model consisting of galaxy with supermassive plasma nucleus moving in magnetic field
05 p0822 A69-15853

Cosmology, discussing big bang and steady state models, arrow of time, red shift/distance relation, background radiation, etc
07 p1210 A69-18390

Galactic model with differential rotation, discussing experiments on bar and cylindrical galaxy and spiral and loop structures formation
07 p1216 A69-19204

Origin of galaxies, discussing initial conditions of formation including density, kinematic and composition inhomogeneities, time effect, etc
07 p1218 A69-19280

Evolution of galaxies, considering masses, gas masses, luminosities, spectra and motions
07 p1219 A69-19297

Critical density ratio concept introduced into cosmological models for matter concentration into galaxies in expanding universe
08 p1381 A69-19794

Physical conditions of intergalactic space in Local Group using virial theorem and assuming energy equipartition, discussing temperature, ionized hydrogen density, turbulent motions, etc
08 p1381 A69-19795

Galactic angular momentum of rotation, applying rotation theory to gravitational instability model of galactic formation
08 p1383 A69-20050

Galactic halo chronology determination by positron component flux measurement in primary cosmic rays
08 p1386 A69-20084

Morphology of E and SO galaxies in terms of equilibrium isopleths within general relativity
08 p1395 A69-20636

Galaxy formation from elements primeval abundance viewpoint stressing initial helium abundance
08 p1400 A69-20894

Stellar abundance and origin of elements, discussing stellar atmospheres and gaseous nebulae spectral determination, chronology of galactic halo, etc
09 p1587 A69-21306

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics
09 p1587 A69-21355

Quasi-stellar radio sources /QSS/ and radio galaxies structure and evolution, discussing nucleus nonuniform model
09 p1592 A69-21500

Cosmology, reviewing Friedman and Lemaitre model, big bang model, primeval fireball hypothesis for residual black body radiation and galactic origin theories
09 p1608 A69-22715

Solid hydrogen condensation on graphite grains for microwave background, discussing hydrogen grain promotion of galactic and stellar formation
10 p1776 A69-23216

Magnetic field and magnetic energy evolution in infinitely conducting homogeneous isotropic turbulent medium, applying results to galactic magnetic field model
10 p1783 A69-23793

Infinitesimal bending oscillations and/or responses of thin rotating disks applied to thin disk galaxies, discussing Magellanic Cloud passage near galactic center
10 p1786 A69-24110

Chemical compositions and ages of M67 and NGC 188 determined from color-magnitude diagrams, noting stellar distribution near gap in diagram and He content
10 p1789 A69-24128

Galaxies classified by matter content of nucleus, discussing evolution
11 p1953 A69-24351

Universe origin, discussing big bang theory, effects of expansion time and temperature on elementary particles, RF quanta, etc
11 p1953 A69-24352

Pulsed radio source near Crab Nebula studied to estimate age of longer period pulsars and frequency of pulsar-producing events in galactic history
11 p1963 A69-25252

Book on stellar, galactic and nucleosynthetic evolution covering nuclear, Fermi, electromagnetic and gravitational interactions roles
11 p1964 A69-25413

Cosmogonic nature of galactic nuclei activity, emphasizing streamers ejection and new formations in galaxies
12 p2163 A69-27016

Statistical data on space density of bright elliptical galaxies, radio galaxies, quasars, noting relation between space density and age
12 p2165 A69-27033

Isotropic 3 K black body radiation implications for hot cosmological model, formation of galaxies, existence of superdense bodies and density nonuniformity during prestellar stage
12 p2167 A69-27047

Interacting NGC 4485 and 4490 galaxies instability, establishing early stage of evolution from morphological and spectroscopic results of photographic observations
12 p2169 A69-27056

Intergalactic matter capture by NGC 1614 nucleus, stellar ejection from galaxies, explosive separation of close binary and other unsteady phenomena in galaxies
12 p2169 A69-27061

Galactic formation by massive matter cloud passage through antimatter cloud, discussing radio sources genesis
12 p2170 A69-27064

Gasdynamic phenomena during subsonic or supersonic motion of isothermal gas under action of gravitational forces in flatten axisymmetric galaxy containing spiral density waves
12 p2170 A69-27065

Spiral arms as wakes of gravitational shock waves arising at galactic nucleus boundary and propagating outward through interstellar gas
12 p2170 A69-27066

Galactic force law from observed stellar velocity and space density distribution
13 p2348 A69-27802

Twelve color stellar photometry for studying galaxy synthesis, relating observations to temperature, luminosity and metal abundance
13 p2348 A69-27804

Galactic formation in Lemaitre universe from statistically probable density fluctuations, using perturbation theory and Newtonian cosmology
14 p2520 A69-29373

Close galactic encounters in dense galactic clusters, discussing effects on internal motions dispersion and stellar dissipation
14 p2521 A69-29461

Polarization characteristics of quasars, radio galaxies and galactic objects suggesting separate evolutionary processes
14 p2526 A69-29771

Galactic nuclei nature, activity, evolution and classification
14 p2527 A69-29896

Low density Friedmann universe models with non-zero cosmological constant and long ages, deducing galaxy evolution rates from magnitude-red shift relations
14 p2527 A69-29944

Hydrogen gas role in galaxy formation, estimating quantity needed to dissipate gas cloud contraction energy, discussing formation mechanics of molecular hydrogen
15 p2680 A69-30204

Diatomic hydrogen abundance evolution in uniform medium, discussing photodissociation effects and galactic evolution
15 p2680 A69-30205

Symmetry between koinomatter and antimatter in universe, discussing koinonucleons production, big bang theory, protogalaxy model, quasi-stellar objects, galaxy evolution, etc
15 p2690 A69-30670

Galaxies formation from superstars ascribed to superstar instabilities
15 p2696 A69-31151

Viscous and thermal generators applicability to production of spin generated galactic magnetic fields in primordial fireball
16 p2866 A69-32812

Supernovae research, discussing supernovae classes and connections with cataclysmic processes in galactic evolution
17 p3044 A69-34173

Aligned galaxies, discussing possible formation by consecutive explosive ejections of new galaxies from parent galaxy
17 p3044 A69-34175

Dwarf elliptical galaxies of local group, discussing star distribution and orbits, formation process, origin and distribution about Milky Way
18 p3194 A69-34424

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics
18 p3197 A69-34745

Spiral arms interpreted and derived as consequences of galactic nuclei explosion
20 p3599 A69-37468

Universe evolution from hot initial state, discussing element synthesis, quanta, radiation particles, etc
21 p3795 A69-38401

Density fluctuations in universe during early stages, using hot big bang cosmological model
21 p3814 A69-39571

Gaseous self gravitating mass equations applied to galactic evolution and star formation
23 p4213 A69-41716

Radio studies of galactic structure, discussing Milky Way origin and formation
23 p4217 A69-42320

Galactic evolution using concept of stellar populations and correlation with metal and He abundances
23 p4218 A69-42323

Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis, discussing spectrum analysis of radio astronomical telescope observations
23 p4220 A69-42376

Density fluctuations during later stages of formation of universe, emphasizing problems of galactic cluster formation
23 p4221 A69-42390

Fluctuations in 3K radiation, considering scattering effect on gravitational fields of galactic clusters and large coherence or wavelength scattering by gravitational radiation
23 p4222 A69-42401

Galactic magnetic field origin from galactic turbulence, calculating individual Fourier components in random turbulent velocity
24 p4375 A69-42658

Book on physics and evolution of galaxies covering properties, stellar content, interstellar matter, high energy particles and radio galaxies
24 p4384 A69-43167

GALACTIC MAGNETIC FIELDS

U INTERSTELLAR MAGNETIC FIELDS

GALACTIC RADIATION

Energetic X ray intensities from large and small Magellanic clouds investigated by balloon flight sky survey, noting energy flux upper limits
01 p0150 A69-10370

Cosmic ray neutron integrated flux measurements up to 350 km for energies to 15 Mev, determining neutron leakage flux
01 p0146 A69-11223

Free access of low energy galactic particles to solar wind lines of force due to stochastic nature of lines
01 p0147 A69-11238

Solar and galactic cosmic rays measurement data to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
02 p0306 A69-11658

UV and X ray radiations of stars and interstellar gas of Milky Way and remote galaxies
02 p0316 A69-11906

Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
02 p0324 A69-12303

Normal galaxies radio emission and brightness of metagalactic radio background
02 p0325 A69-12564

Optical radiation from galaxies, discussing starlight, nonthermal flux and radiation from hot gas
02 p0326 A69-12706

Galactic X ray sources, discussing location along spiral arms, age and properties of stars responsible for emission

03 p0497 A69-12930

Galactic cosmic ray modulation by interplanetary magnetic fields, discussing compatibility of several models with experimental data

03 p0498 A69-12933

Numerical calculation of trajectories of high energy cosmic rays in galactic disk, using quasi-longitudinal model of magnetic field

03 p0501 A69-13960

Public health aspects of galactic radiation exposure at supersonic transport altitudes

03 p0375 A69-14072

Cosmic ray time variation and anisotropies near earth, discussing galactic and solar cosmic rays, trajectories in geomagnetic field, etc

03 p0504 A69-14236

Planetary nebulae as possible low energy galactic X ray source

04 p0661 A69-15144

Seyfert galaxies nuclear regions, noting multicolor photometric measurements between 0.3 and 1.6 micron and measurements of M87 jet at 1.55 micron

04 p0663 A69-15386

X ray emission from Seyfert galaxy nuclei, noting model with bremsstrahlung from hot source

04 p0649 A69-15387

Supernova remnant theories used to interpret results of 1-mile Molonglo cross type radio telescope survey of nonthermal galactic sources

04 p0664 A69-15441

X ray and gamma astronomy, discussing galactic gamma radiation source and diffuse X ray background radiation

06 p0998 A69-16969

Modulation of galactic cosmic rays due to electromagnetic conditions of interplanetary space, considering time variations and Parkers model

06 p0989 A69-17287

Galactic cosmic rays anisotropies due to density gradient perpendicular to ecliptic plane studied, using diurnal and semidiurnal component and intensity deficiency

06 p0990 A69-17289

Radio spectrum and cosmic ray electron data evaluated concerning conditions in Galaxy, deducing mean magnetic fields

06 p0991 A69-17309

Particle radiations and magnetic fields in metagalaxy, discussing galactic injection spectrum problems

06 p0991 A69-17310

Electron formation in lower ionosphere due to cosmic ray-atmosphere interaction, analyzing ionization of subrelativistic and relativistic solar and galactic cosmic rays

06 p0920 A69-17726

Radio spectra analyzed for NGC 1052 and NGC 4278 elliptical galaxies, discussing 178 MHz flux density, anomalies and radiation absorption mechanisms

06 p1009 A69-17959

Galactic soft X rays observation with two rocket-borne gas filled counters, noting source near Wolf-Rayet star Gamma Velorum in Vela

07 p1204 A69-18599

Cosmic ray astrophysics, discussing chemical composition, energy spectrum and galactic sources

07 p1205 A69-18909

Absolute isophotometry of hydrogen alpha photographs of bright galactic H II regions, attributing difference between theoretical and observed ratio to interstellar absorption

07 p1217 A69-19231

Astronomical unit determined by measuring Doppler shift of spectral features of galactic hydrogen

07 p1222 A69-19590

Rosette Nebula structure from high resolution observations at 178 MHz of galactic plane, deriving 8600 K electron temperature for Nebula, discussing Monoceros Nebulosity

07 p1223 A69-19625

Solar activity modulation of galactic cosmic rays with more than 1 Gev energy

08 p1378 A69-20224

Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature

08 p1392 A69-20562

Sky background of soft X ray emission in spectral band explained by emission lines from galaxies

08 p1380 A69-20769

Galactic H 56 alpha recombination radio line observation in Omega Nebula in millimeter band with radio telescope, obtaining electron temperature

08 p1397 A69-20771

Wideband 1665 MHz OH emission source in Carina region of galaxy in weak continuous radiation region with low degree of polarization

08 p1397 A69-20772

Radio spectra of normal galaxies noting transition in spectrum

08 p1398 A69-20777

Emission line galaxy NGC 5253, discussing radial velocity, line width and excitation and similarity to Seyfert galaxies

08 p1407 A69-21132

Astronomical data on background radiation examined for existence of galactic radio halo

09 p1590 A69-21395

Galactic and intergalactic ionic fine structure transitions effect on background microwave radiation intensity

09 p1590 A69-21445

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains

09 p1575 A69-21524

Further microwave emission lines and ammonia clouds in Sagittarius region, tabulating relevant transitions in ammonia and water

09 p1597 A69-22150

Galactic cosmic ray scattering and energy loss through solar wind interaction

09 p1580 A69-22202

Centaurus constellation search for gamma rays using balloons, discussing radio and X ray luminosity

09 p1580 A69-22269

Solar modulation of galactic cosmic rays, discussing disagreements between convection diffusion theory and observation

09 p1581 A69-22744

X rays from galactic center and Centaurus regions, discussing Cen X-2 flux

09 p1583 A69-22765

Radioactivity levels estimation at surface and in bulk of solar system planets caused by galactic and solar cosmic rays

10 p1756 A69-22813

Quasars and explosive processes in galaxies as cosmic ray sources in expanding universe, studying relation between galactic and metagalactic cosmic rays

10 p1756 A69-22815

Satellite data on galactic cosmic ray variations near magnetosphere and in interplanetary space, discussing Forbush decreases

10 p1756 A69-22819

Galactic cosmic ray modulation and solar activity analyzed on basis of cosmic ray measurement in stratosphere

10 p1758 A69-22832

Galactic and solar cosmic ray modulation in interplanetary space during different phases of 11 year solar activity cycle

10 p1758 A69-22833

Metallicity index Q value difference between cluster and noncluster galaxies determined from UV, blue and violet observation data

10 p1774 A69-22964

Qualitative considerations of color indices grouping for Abell-1781 cluster of galaxies, table of data and identification charts

10 p1775 A69-23204

Position and polarization of 1720 MHz OH emission from W28, W44 and galactic center, considering unresolved concentrations of shell type nonthermal sources

10 p1776 A69-23220

RF spectroscopy of OH molecule, RF absorption by galactic OH and radio emission from OH in dust clouds

10 p1781 A69-23671

Diffuse galactic radiation reinterpretation by solving same transfer problem exactly for properties of interstellar particles

10 p1782 A69-23680

Nuclear sizes, emission line widths and densities in Sc galaxy M 51 and Seyfert galaxy NGC 4151, noting similarities and difference between nuclei

10 p1785 A69-24089

Position of OH sources near seven galactic radio sources determined with two element variable-base-line interferometer, noting strong circular polarization

10 p1787 A69-24114

Radio brightness map at 22.25 MHz of galactic plane including H II regions IC 1805 and IC 1848, discussing LF absorption

10 p1787 A69-24115

Biological radiation doses and protection from galactic, solar particle and trapped radiation in space, noting secondary radiation and bremsstrahlung in absorber

11 p1831 A69-24866

Hydroxyl microwave emission sources in Cygnus not connected with continuum emission

11 p1964 A69-25403

Spheroidal galaxies with early type spectra distinguished by UV continuum, discussing telescopic spectral and color observations

12 p2159 A69-26663

Radio galaxies luminosities distribution and spectral indices, galactic structures and diameters, considering relations between radio emission parameters

12 p2165 A69-27031

Radio galaxy identification and luminosity measurement, noting limitations of red shift observation methods

12 p2165 A69-27032

X ray emission from radio galaxies as possible bremsstrahlung radiation of hot gas, noting Crab Nebula

12 p2166 A69-27037

Blue, UV and yellow spectral observations of M 82 /NGC 3034/, obtaining polarization dependence on reciprocal of wavelength, polarization and color characteristics

12 p2169 A69-27057

H alpha line photograph in M 82 spectra, giving equivalent radiating area and total ionized hydrogen mass

12 p2171 A69-27067

Cosmic rays suggested as origin of interstellar grain alignment, discussing galactic central radiation, gas collisions and isotropic bombardment

13 p2333 A69-28469

Galactic and relativistic and subrelativistic solar cosmic rays effect on electron production rate in ionosphere, detailing low energy SCR-atmosphere interactions

13 p2333 A69-28544

Solar and galactic cosmic rays measurement data used to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations

13 p2333 A69-28689

Rocket observations of Lyman alpha anisotropic galactic radiation, noting distribution of neutral interstellar hydrogen near sun

14 p2516 A69-28952

Galactic anticenter region surveyed at 13.1 MHz, observing ionized hydrogen concentrations in galactic plane

14 p2519 A69-29370

Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons

14 p2514 A69-29948

High energy gamma rays detection by balloon near geomagnetic equator, observing enhanced flux from galactic disk

15 p2675 A69-30695

Galactic cosmic rays and Alfvén waves interaction, considering gyration frequency resonance, wave growth, Fokker-Planck equation and diffusion model

15 p2675 A69-30761

Energetic gamma ray emission from Cygnus A and X-1, describing high altitude balloon telescope observation and gamma ray emulsion process

15 p2676 A69-30888

Extraterrestrial X ray galactic and extragalactic sources research fields, emphasizing identification with optical objects

15 p2696 A69-31213

Matter traversal of high energy primary galactic cosmic ray protons from antiproton flux and energy measurements

15 p2678 A69-31491

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains

16 p2851 A69-32519

RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus

16 p2864 A69-32571

Irregular dwarf galaxies as source of faint objects in close galactic groups

16 p2864 A69-32597

Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung

16 p2852 A69-32806

Earth motion relation to cosmic background radiation excess determined from radiometer study of galactic radiation

17 p3022 A69-32864

Galactic novae observational data and theoretical interpretations, considering envelope detachment from star, luminosity, motion and emission line intensities
17 p3032 A69-33103

Optical spectrum of galaxy NGC 3031 nucleus, considering emission and absorption lines and continuum
17 p3034 A69-33396

Red shift table for six galaxies near Coma Cluster from spectrograms of absorption lines
17 p3044 A69-34182

Cosmic X rays diffuse component possible origin, discussing galactic gamma ray flux and disagreement with measured isotropy
18 p3185 A69-34275

Cosmic ray propagation equilibrium model for rays origin and storage in galaxy, considering energy dependence of nuclei relative abundances
18 p3185 A69-34276

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm
18 p3190 A69-34287

Cosmic ray approach directions computation for high latitude stations, discussing results for low rigidity galactic cosmic rays and solar corpuscular events detection
18 p3187 A69-34940

Low energy cosmic ray density in Galaxy due to pulsar PSR 0833-45 caused by mass ejection
18 p3187 A69-34995

Milky Way continuum radiation at 4170 MHz using parabolic antenna, mapping discrete sources concentration at galactic equator
18 p3200 A69-34996

Radio emission attributed to galactic nebula NGC 6857, suggesting origin in high density H II regions excited by OB star clusters
18 p3202 A69-35209

Search for diffuse galactic light component between 2100-2800 Å by rocket measurements of night sky brightness, showing low albedo of interstellar dust
18 p3202 A69-35210

Water vapor microwave emission measurement from galactic hydroxyl sources
18 p3205 A69-35435

Be 7 stability in galactic cosmic radiation, noting lifetime dependence on electron density around nucleus
18 p3189 A69-35482

Red shift-distance relation for galaxies, discussing time dependence
20 p3597 A69-37411

Photographic photometry investigation of Light distribution in spiral galaxies NGC 681, 972 and 1084, discussing mass distribution
20 p3599 A69-37476

M-87 X ray luminosity from balloon-borne detectors, considering background counting rate relation to azimuth
20 p3588 A69-37488

Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation
20 p3603 A69-37554

Unresolved background radiation at 2695 MHz surveyed for galactic wing extent determination
20 p3606 A69-37830

Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection
20 p3592 A69-38098

Andromeda galaxy brightness distribution, discussing nuclear region, energy distribution, surface brightness, brightness profile, etc
20 p3610 A69-38141

Spectra of peculiar S zero galaxy NGC 7625 with irregular dust distribution, discussing central spheroidal rotation and mass
20 p3610 A69-38142

Galactic X ray source spectral data observed by rocket, presenting graph with corrections
20 p3594 A69-38172

Galactic nucleus observations in 1.65-19.5 micron range with evidence for strong radiation at 10 and 20 microns, noting mechanisms for IR radiation
21 p3799 A69-38650

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars
21 p3790 A69-38823

Galactic cosmic rays, discussing chemical composition, isotopic separation, proton and alpha particles energy spectra, propagation, interactions, etc
21 p3791 A69-39502

Galactic nuclei as collapsed old quasars from dynamics of gas cloud collection in galactic nucleus, discussing cosmic radiation emission from synchrotron mechanism
21 p3815 A69-39610

Milky Way galactic diffuse radiation photometric study using Schmidt camera, stressing Northern Coal-sack commencement region
21 p3817 A69-39725

Chemical composition of galactic and solar cosmic rays, discussing differences from universal cosmic abundances, using Cerenkov counters, emulsions, etc
22 p4002 A69-40090

Diffuse galactic radiation intensity and distribution from photoelectric measurements compared with radiative transfer calculations using various interstellar dust models
22 p4013 A69-40096

Extragalactic radio sources linear polarized radiation distribution at 1418 MHz indicating ordered magnetic fields often oriented differently
22 p4015 A69-40155

RF high resolution observations of edge on spiral galaxy NGC 4631, noting radio halo and spur absence, nonthermal radio emission region, etc
22 p4022 A69-40463

Photoionization model of Seyfert galaxy extended to calculate temperatures, luminosities and sizes of zones emitting forbidden Fe X /6374 Å/ and Fe XIV /5303 Å/
22 p4024 A69-40581

Radio observations of elliptical and spiral noncluster galaxies, noting correlation between magnitude and radio emission in elliptical galaxies
22 p4025 A69-40639

Galactic center observations over various wavelengths including polarization, diameter, flux measurements and power output
22 p4029 A69-40767

Galactic mass model and interstellar dust scattering data used to examine high latitude nebulae illumination possibility by integrated galactic light
22 p4033 A69-41059

Stellar and diffuse galactic radiation intensity observations to obtain albedo values of interstellar dust particles
22 p4034 A69-41112

Emission lines in optical spectra of radio galaxy nuclei, considering time dependent energy release nature
22 p4034 A69-41174

Strong IR millimeter wave emission from galactic center due to interstellar dust grains resembling semiconductor structure
23 p4215 A69-42115

Galactic X ray sources observed in EM spectrum high energy region, discussing hot plasma cloud thermal radiation and electrons synchrotron radiation as emission sources
23 p4206 A69-42318

Galactic magnetic field existence arguments, discussing general and optical evidences, radio emissions, Faraday rotation from extragalactic sources and from pulsars, etc
23 p4217 A69-42321

Low energy galactic cosmic ray spectrum determined from ionization rate per hydrogen atom, correlating peak intensity with stellar particle emission high energy portion
24 p3465 A69-42608

Fire hose instability growth rate in relativistic plasma with anisotropic pressure, discussing importance to cosmic ray liberation and isotropization at galactic halo
24 p4376 A69-42660

Cosmic rays properties and dynamical effects in Galaxy disk including origin, lifetime, magnetic field instability, etc
24 p4366 A69-42695

Milky Way hydrogen line survey with Parkes telescope, giving velocity-longitude control maps and tabulated data covering galactic equator
24 p4383 A69-42961

Galactic X ray flux from H I region low energy cosmic ray nuclei, studying electron capture effects on line intensities
24 p4367 A69-43048

Seyfert galaxies IR radiation attributed to dust grains thermal emission of energy absorbed from galactic nucleus
24 p4374 A69-43741

GALACTIC RADIO WAVES

Galactic H II regions morphology from high resolution radio observations, noting variation of electron density with region size
01 p0151 A69-10553

Compact high-gain chromium doped rutile traveling wave masers for Onsala radio telescope for galactic and extragalactic microwave emission studies
02 p0257 A69-12463

Linear polarization of cosmic radio emission measured near galactic anticenter at centimetric wavelengths
03 p0501 A69-13704

Space radio astronomy techniques for problems in galactic radio emission, solar studies and planetary observations
05 p0821 A69-15844

Cosmic ray electron energy spectrum compared with galactic radio noise for estimating galactic magnetic field
06 p0992 A69-17377

Galactic H 2 regions radio observation using Cassegrain antenna and Dicke radiometer
06 p1008 A69-17696

Ground based radio telescope sensitivity to radio emission from earth atmosphere and galactic sources
07 p1099 A69-18515

Radio telescope survey of intense emission regions along galactic plane, considering antenna temperatures, spectrum and steps of observed emission
07 p1216 A69-19138

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects
07 p1206 A69-19269

Inverse Compton effect and universal black body radiation from less energetic radio photons of galactic and metagalactic origin
08 p1381 A69-19786

Nonthermal cosmic radio emission spectral index angular variations during scanning of sky by receiver antenna, analyzing dependence on galactic latitude
10 p1784 A69-23940

LF observations of complex galactic radio source W51, discussing structure and radio spectra of resolved components
12 p153 A69-25807

Radio emission from 18 galaxies noting accompaniment of optical spectrum emission and enhancement due to production of relativistic electrons in active nuclei
12 p164 A69-27026

Interacting galaxies theories, characteristics and terminology, discussing galactic radio sources and properties of matter
12 p169 A69-27055

Radio emitting clouds properties as function of distance to parent galaxy nucleus
13 p2352 A69-27874

Irregular galaxies of type M 82 with weak condensation central parts and diffuse edges, considering radio emission spectrum
16 p2865 A69-32598

Radio wave absorption in interstellar H I regions, considering mean absorption coefficient dependence on height above galactic plane, evaluating planar electron density
17 p3034 A69-33608

Galactic plane at 9.26 cm between longitudes of 32 to 49 degrees, tabulating contour map of antenna temperature and sources
18 p3195 A69-34426

Galactic radio emission and magnetic field strength and structure, using radio surveys to obtain information on cosmic rays
21 p3790 A69-38820

Radio background radiation produced by Galaxy, considering energy, isotropy of radiation and black body character
21 p3790 A69-38821

Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
23 p4219 A69-42375

GALAXIES

NT ANDROMEDA GALAXIES
NT MILKY WAY GALAXY
NT RADIO GALAXIES
NT SPIRAL GALAXIES

Book on cosmic radiation origin and expansion of universe, covering astrophysical reasons for electric charging of galaxies in range of galactic and metagalactic dimensions
02 p0315 A69-11713

Far IR background due to superposition of IR galaxies, noting galaxies contribution to extragalactic radio background

02 p0308 A69-12128

IR and violet sulfur lines for Seyfert galaxies, noting substantial reddening in nuclei

02 p0325 A69-12593

Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra

02 p0329 A69-12790

Solar motion in distant objects kinematics, suggesting simultaneous solutions of local motion and galactic rotation parameters

04 p0654 A69-14627

Asymptotic solutions of linear difference equations, discussing applications to eigenvalue problems of free oscillations of model galaxies

04 p0623 A69-14946

Primary electrons implications on cosmic ray confinement in Galaxy, astrophysical aspects and problems of energy spectrum

06 p0991 A69-17308

Relative number of galactic pairs and distribution of linear separation of components determined from Palomar Observatory maps

07 p1214 A69-18663

Element synthesis in stars of galactic halo as possible explanation for heavy elements presence in supermassive objects

07 p1219 A69-19296

Absolute magnitudes and intrinsic color photoelectric observations of Wolf-Rayet stars in Magellanic Clouds and Galaxy

07 p1221 A69-19583

Neutral hydrogen distribution and dynamics in galaxies, discussing observations by spectrographic transit telescope, data processing and profiles

07 p1224 A69-19711

Bright galaxies observed at 408 MHz with fan beam of east-west arm of cross-type radio telescope for correlations between radio and optical properties

08 p1386 A69-20087

Neutral hydrogen asymmetry in Galaxy M101 as evidence for tidal effects due to nearby companions, noting hydrogen emission spectra

08 p1394 A69-20625

Morphology of E and SO galaxies in terms of equilibrium isopleths within general relativity

08 p1395 A69-20636

Galaxies classification using rectified images, noting pitch and inclination angles

08 p1408 A69-21135

Water molecules radio spectral lines from microwave emission sources in Galaxy studied for variability, size and polarization

09 p1587 A69-21307

Galactic clusters absorption, discussing optical thickness in blue and red light

09 p1587 A69-21356

Physical conditions in nuclei of various Seyfert galaxies deduced from line intensities, noting permitted and forbidden lines formation in different regions

09 p1596 A69-22056

Half intensity angular diameter upper limit of Seyfert galaxy NGC 4151 nucleus, considering nonthermal continuum

09 p1602 A69-22227

Galaxies and galactic clusters regarded as particles in kinetic theory of cosmology, discussing distribution function choice and red shift

09 p1605 A69-22410

Age of Galaxy from decay of uranium, assuming prompt synthesis

09 p1605 A69-22414

X ray universe, considering contribution of X ray astronomy to phenomena of big bang, supernovae, neutron stars, exploding galaxies, etc

10 p1760 A69-22869

Metallicity index Q value difference between cluster and noncluster galaxies determined from UV, blue and violet observation data

10 p1774 A69-22964

Abell 2199 cluster of galaxies, discussing population contours, volume density function, structure and other static properties

10 p1774 A69-22965

Supernova frequency in galactic clusters, 45 supernovae in 2144 galaxies and average frequency of one supernova per galaxy per 316 years

10 p1774 A69-22966

Double galaxies consisting of components moving away from each other with hyperbolic velocities from statistical tests of hypotheses

10 p1775 A69-23203

Qualitative considerations of color indices grouping for Abell-1781 cluster of galaxies, table of data and identification charts

10 p1775 A69-23204

Galactic discontinuity near longitude 140 degrees attributed to stars deficiency in anticenter quadrant or interstellar cloud obscuration

10 p1776 A69-23215

Error analysis of Hubble galaxies count to resolve contradiction of values for average optical half thickness tau of galactic absorbing layer

10 p1779 A69-23609

Nuclear sizes, emission line widths and densities in Sc galaxy M 51 and Seyfert galaxy NGC 4151, noting similarities and difference between nuclei

10 p1785 A69-24089

Spectroscopic observations of faint quasar near double galaxy NGC 3561, noting red shifts

10 p1785 A69-24092

Interstellar formaldehyde detection in absorption against galactic and extragalactic radio sources, discussing chemical evolution

10 p1786 A69-24108

Chemical compositions and ages of M67 and NGC 188 determined from color-magnitude diagrams, noting stellar distribution near gap in diagram and He content

10 p1789 A69-24128

Dynamical model for spherical inhomogeneity in mean mass density of universe to predict velocity dispersion observed for Coma Cluster

10 p1789 A69-24133

Microphotometer for stellar magnitudes of galaxies determination from photographs

11 p1879 A69-24256

Galaxies classified by matter content of nucleus, discussing evolution

11 p1953 A69-24351

Intergalactic gas temperature and density reevaluated, considering neutral hydrogen distribution in galaxies peripheries and metagalactic background of ionizing UV radiation

11 p1946 A69-24589

Magellanic Clouds color composite photographs prepared from negatives taken in blue and IR light

12 p2152 A69-25801

Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud

12 p2152 A69-25802

Planetary nebulae radial velocities in large and small Magellanic Clouds compared with young objects rotational pattern and interstellar gas densities and velocities

12 p2155 A69-25891

Observed frequencies of number of members in multiple systems of galaxies

12 p2156 A69-26222

Spheroidal galaxies with early type spectra distinguished by UV continuum, discussing telescopic spectral and color observations

12 p2159 A69-26663

Galactic descriptive functions and empirical model construction methods for determining mass distribution

12 p2160 A69-26852

Unsteady phenomena in galaxies - Conference, Buirakhan, Armenian SSR, May 1966

12 p2161 A69-27015

Cosmogonic nature of galactic nuclei activity, emphasizing streamers ejection and new formations in galaxies

12 p2163 A69-27016

Lallemand electronic camera application for spectroscopic observations of unsteady phenomena in galactic nuclei at 4000 A, noting radial velocities

12 p2163 A69-27017

Rotating central disk in galactic plane observed by radio telescope, assessing relation between expanding gas of disk and high velocity stream from center

12 p2163 A69-27018

Instability phenomena encountered in galaxies determined based on classification of galaxies according to mass and brightness

12 p2163 A69-27019

M 31 galaxy ionized gas region high resolution spectroscopy, emphasizing radial velocities in O II lines at various distances from nucleus

12 p2163 A69-27020

NGC 4151 bright lines intensity, electron density, temperature and ions quantity evaluation from spectrograms with 140 A/mm dispersion

12 p2164 A69-27021

Successive explosions produced two gas systems observed in six Seyfert galaxy nuclei by spectrophotometry, using diffraction spectrographs

12 p2164 A69-27022

NGC 4151 absolute intensities of wide emission of weak isolated and IR lines determined from photoelectric spectrophotometric measurements

12 p2164 A69-27023

Rotation curve peculiarities of Sc type galaxy NGC 3432 ascribed to noncircular gas motions

12 p2164 A69-27024

Colorimetric studies of galaxies exhibiting red shift with increasing radial distance from center

12 p2164 A69-27025

Photographic magnitudes of galactic nuclei, presenting plots for stellar magnitude distribution of galactic nuclei

12 p2165 A69-27029

Velocity distribution and density of neutral hydrogen in southern portions of M 31 and Sc- type galaxy M 33 by 75 m radio telescope

12 p2166 A69-27038

Radio emission correlation to nuclei shape in normal galaxies

12 p2166 A69-27040

Interacting galaxies theories, characteristics and terminology, discussing galactic radio sources and properties of matter

12 p2169 A69-27055

Interacting NGC 4485 and 4490 galaxies instability, establishing early stage of evolution from morphological and spectroscopic results of photographic observations

12 p2169 A69-27056

Blue, UV and yellow spectral observations of M 82 /NGC 3034/, obtaining polarization dependence on reciprocal of wavelength, polarization and color characteristics

12 p2169 A69-27057

Galaxies NGC 4402 and NGC 4438 structure, luminosity and color from two color photometric study of Virgo cluster center

12 p2169 A69-27058

Photometric and spectroscopic analysis of southern peculiar galaxy NGC 6438, discussing isophotes, color distribution and radial velocity

12 p2169 A69-27059

NGC 4038-9 velocity field from spectrum obtained at McDonald Observatory, suggesting existence of two centers of matter ejection

12 p2169 A69-27060

Photographic studies of unsteady features of galaxies, discussing spectra, color, spiral arm instability and extragalactic H II regions

12 p2170 A69-27063

NGC 4194 galaxy emission line spectrum analysis showing presence of highly excited gas in nucleus and in bright central region similar to NGC 7714

13 p2339 A69-27571

Ionization processes in Seyfert galaxies, considering thermal electrons, superthermal protons and electrons and nonthermal UV radiation

13 p2346 A69-27710

Ionized hydrogen regions in NGC 4449 from H alpha photography through narrow band interference filter, obtaining radial velocities

13 p2347 A69-27714

Markarian galaxies with strong UV continuum, observing emission lines differing from each other

13 p2351 A69-27866

Photometric data and law of rotation in symmetry plane for constructing mathematical model of mass and luminosity distribution in M 31

13 p2351 A69-27870

Emission line fluxes of southern planetary nebulae in Magellanic Clouds and Galaxy measured photoelectrically, giving upper limit to H beta emission of Magellanic planetary

14 p2520 A69-29376

Radial velocities of planetary nebulae in Magellanic Clouds and Galaxy, discussing Population I and II kinematics

14 p2520 A69-29377

Planetary nebulae nuclei magnitudes in Magellanic Clouds and Galaxy measured photoelectrically, discussing early evolution

14 p2520 A69-29378

Variable stars in Large Magellanic Cloud from photoelectric measurements obtained in blue and violet, including periods of Cepheids and some period amplitude differences

14 p2526 A69-29853

Cosmic dust role in determining structure and dimensions of Galaxy

14 p2527 A69-29897

GALAXY AIRCRAFT

- Excited hydrogen radio lines observations, analyzing neutral and excited hydrogen distribution in galaxies 15 p2682 A69-30502
- Optical and radio estimations of galactic masses, analyzing radius of rotation curve inflection point 15 p2687 A69-30547
- Neutral hydrogen high velocity clouds as possible extragalactic objects in Local Group not contracted to galactic dimensions or densities 15 p2694 A69-30785
- Quasar multiple absorption red shift lines caused by gas in extended galaxy halos, assuming broadened galactic cross section area 15 p2695 A69-30884
- Doppler effect significance in radio astronomy including galaxies relative motion and information concerning isolated hydrogen clouds between galaxies 16 p2853 A69-31565
- Spectrophotometry of elliptic galaxy NGC 1052 nucleus from 3400 to 6300 Å for relating radio properties and optical characteristics 16 p2853 A69-31610
- Magellanic-like galaxy NGC 4631 observed in H alpha light through narrow band interference filter, detecting and cataloging 88 H II regions 16 p2854 A69-31647
- Four color photoelectric photometry of bright galaxies in Virgo Cluster, analyzing properties in nuclear regions 16 p2860 A69-32230
- Galaxies clusters spatial distribution based on crude distance estimates, discussing serial correlation of counts and interpreting results 16 p2862 A69-32371
- Stellar system stability for corresponding stable barotropic gaseous system, discussing Schroedinger operator role 16 p2862 A69-32374
- Giant galaxy classified in terms of stellar population, discussing Orion, intermediate amorphous and combination categories 16 p2862 A69-32395
- Photoelectric observations of color and titanium oxide in M7 giants in nuclear bulge of Galaxy compared with late giants near sun 16 p2863 A69-32396
- Irregular galaxies of type M 82 with weak condensation central parts and diffuse edges, considering radio emission spectrum 16 p2865 A69-32598
- Line widths of 48 galaxies at 21 cm and spectroscopic data, estimating masses and angular momenta, finding mass-angular momentum relation 16 p2866 A69-32818
- Stationary galaxy dynamical theory, assuming constant velocity body of physically homogeneous star subsystems in space 17 p3031 A69-33102
- Optical spectrum of galaxy NGC 3031 nucleus, considering emission and absorption lines and continuum 17 p3034 A69-33396
- Proper motions, color magnitude and distance modulus of stars in galactic cluster in direction of Large Magellanic Cloud using Cape wide angle photometry 17 p3034 A69-33411
- Accurate positions at 2700 MHz and optical identification of radio sources with galaxies and quasi-stellar objects 17 p3035 A69-33611
- Aligned galaxies, discussing possible formation by consecutive explosive ejections of new galaxies from parent galaxy 17 p3044 A69-34175
- Red shift table for six galaxies near Coma Cluster from spectrograms of absorption lines 17 p3044 A69-34182
- H II regions distribution in nearby irregular I galaxies, attributing asymmetry to localized bursts of star formation 18 p3190 A69-34289
- Dwarf elliptical galaxies of local group, discussing star distribution and orbits, formation process, origin and distribution about Milky Way 18 p3194 A69-34424
- Thin disk galactic models small oscillations, discussing frequency spectra and types of continua 18 p3196 A69-34551
- Galactic clusters absorption, discussing optical thickness in blue and red light 18 p3197 A69-34746
- Galactic rotation in Cassiopeia region, studying O, B and A stars circular velocities as function of distance from galactic center 18 p3201 A69-35142

Magellanic clouds positions, associated gases, evolution, etc 19 p3401 A69-35757

Variable star in Large Magellanic Cloud having unusual light curve with complex maximum lasting 300 days 19 p3403 A69-35965

Forbidden emission lines in spectra of normal, radio and Seyfert galaxies and quasars, giving information about quasi-stellar mean densities, temperatures, ionization, etc 19 p3424 A69-36236

Markarian galaxies with strong UV continua, discussing emission spectra, red shift, absolute magnitudes, etc 19 p3426 A69-36577

Pulsar distance determined by electron content in line of sight to pulsar compared with neutral H amount integrated through galaxy in pulsar direction 20 p3597 A69-37409

Spectroscopic and photographic observations of compact galaxies, discussing distances, absolute magnitudes, linear dimensions, Hubble diagram position and correlations with objects showing similar characteristics 20 p3600 A69-37483

Galactic mass relativistic distribution calculated, considering spherically symmetric model differential rotation near sun 20 p3600 A69-37484

Irregular galaxy NGC 3077 with interstellar dust, measuring velocity field by spectroscopy 20 p3610 A69-38144

Cold disk galactic models free short wavelength oscillations, obtaining asymptotic approximations for eigenfrequencies and eigenfunctions of bending and planar modes 20 p3611 A69-38151

Stars of spectral class F 2 and earlier, brighter than magnitude 11.5, found in four regions of intermediate galactic latitude 20 p3612 A69-38162

Discreteness of distances to extragalactic objects, tabulating red shift values from Wilson formula for galaxy clusters 21 p3802 A69-38843

Statistical analysis of galactic structures subject to Newton gravitation covering globular clusters and spiral disk and rotating bar galaxies 21 p3803 A69-38924

Atlas of H II regions in 20 nearby galaxies 22 p4015 A69-40153

Finding list of spectral type A7 stars and earlier in region at south galactic pole compiled from prism survey data 22 p4021 A69-40436

Variational principle for stability of galaxies models, developing perturbation potential in terms of operator similar to Hartree-Fock exchange operator 22 p4022 A69-40468

Projected surface density upper limit of neutral atomic H between M31 and M33 galaxies, noting brightness temperature between NGC 4631 and 4656 22 p4024 A69-40578

Nonexistence of second order clustering of galaxies and relationship to gravitational cut-off, relativistic cosmologies and red shifted light by exponential decay of photon energy 22 p4024 A69-40579

Quasar association with galactic clusters, noting red shift and spectral correspondence 22 p4029 A69-40763

Absolute magnitude dispersion of galactic cluster brightest members as normally distributed random variable independent of cluster richness or faint members luminosity 23 p4215 A69-42113

Extragalactic universe major constituents and physical properties of normal, radio and compact galaxies, discussing missing matter existence 23 p4217 A69-42317

Observational cosmology in terms of relation between red shift and apparent luminosity of galaxies /Hubble relation/ 23 p4219 A69-42328

IC 3258 emission line spectrum observations, discussing blueshift, extragalactic location, possible nature, etc 23 p4219 A69-42374

Transient sources of cosmic rays, discussing possible time variable intensity and momentum spectrum of Galaxy 24 p4367 A69-43006

Book on physics and evolution of galaxies covering properties, stellar content, interstellar matter, high energy particles and radio galaxies 24 p4384 A69-43161

Elements origin and development in universe, discussing energy generation, structure and population of stars in Galaxy 24 p4386 A69-43333

Pulsars turn off time compared to Galaxy age, discussing physical theory and pulsar models 24 p4389 A69-43741

GALAXY AIRCRAFT
U C-5 AIRCRAFT

GALERKIN METHOD

Radiation from isothermal sphere in vacuum having spherical scattering indicatrix solved by Bubnov-Galerkin method with allowance for scattering 01 p0174 A69-10104

Approximate solution for Dirichlet problem for linear Karman differential equation used in thin plate deflections obtained by Bubnov-Galerkin method 01 p0105 A69-10700

Approximate solution convergence for linear operator equation in Hilbert space by least squares method 01 p0105 A69-10728

Modified Galerkin method applied to approximate solutions of two dimensional elasticity equations of equilibrium 02 p0338 A69-11748

Nonlinear boundary value problems direct generalized solutions based on linearization of Bubnov-Galerkin and Ritz method 02 p0272 A69-12136

Generalized Galerkin functions for asymmetric thermoelasticity, considering separation of coupled equations 03 p0525 A69-13608

Vibration analysis of plates with discrete mass distribution based on Galerkin approach 04 p0682 A69-15293

Equations for nonshallow spherical shell deformations derived by Bubnov-Galerkin method 04 p0684 A69-15539

Mathematical problem of MHD thermal entrance regions for parallel plate channel solved by Galerkin method [ASME PAPER 68-WA/HT-10] 05 p0803 A69-16118

Functions satisfying mixed boundary conditions derived for boundary value problems involving regions of complex form 05 p0787 A69-16455

Convergence of Grammel and Galerkin methods allows use of modified Green function 06 p1020 A69-17132

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method 06 p1021 A69-17180

Galerkin method of moments applied to stochastic bounded linear operator equation, discussing statistically homogeneous operator case and electric field in dielectric 07 p1174 A69-19477

Convergence of Bubnov-Galerkin method in complex separable Hilbert space, proving theorems for sufficient conditions 12 p2123 A69-26607

Nonlinear Galerkin analysis of curved plate flutter using shallow shell/von Karman equations and quasi-steady aerodynamic theory 13 p2364 A69-28207

Galerkin method applied to axial, transverse and three dimensional linear combustion instability problems in liquid propellant rocket motors 14 p2538 A69-2902

Galerkin-Kantorovich-Dorodnitsyn /GKD/ multiment integral method improved reversed flow formulation for lower branch similar flows 17 p2958 A69-34055

Modified Bubnov-Galerkin-Ritz method for determining approximation coefficients in stress and displacement analysis, using mixed variational principle of elasticity theory 18 p3215 A69-34561

Structural damping effects on semilinear panel boundary aeroelastic limit by Galerkin variations method 19 p3437 A69-36141

Stiffness matrices in plane elasticity problems by Galerkin method, leading to simultaneous expression related to finite element method 20 p3619 A69-36951

Nonlinear stability of shallow elliptical paraboloidal dome under uniformly distributed compression, solving by Bubnov-Galerkin method on computer
21 p3838 A69-39186

Galerkin method application to solve differential equation and boundary value conditions for elastic stability of bars, showing linear relation between critical loads
21 p3845 A69-39678

GALLATES

Propyl gallate radiation shielding effect variations with proton and gamma ray bombardment, noting growth and development of potato tuber eyes
08 p1262 A69-19927

GALLIUM

Homogenous mechanical stresses in amorphous and crystalline gallium films during vacuum deposition and annealing
01 p0141 A69-11420

Light absorption of In and Ga thin films in various gaseous media, noting displacement of irregular absorption band
10 p1747 A69-23792

Gallium distribution in YIG single crystals by X ray spectral analysis, observing concentration fluctuations
13 p2321 A69-28002

GALLIUM ALLOYS

Contact resistance of In or In-Ga on CdS single crystals
03 p0487 A69-13638

GALLIUM ANTIMONIDES

Electron irradiation induced damage in undoped GaSb single crystals at 77 K, noting dependence on energy and orientation
01 p0141 A69-11256

Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity
02 p0298 A69-12039

GaSb-ZnTe heterojunction fabrication method, noting photoresponse, fluorescence and light transmission
02 p0299 A69-12408

IR absorption and reflection in doped n-GaSb, obtaining absorption coefficient for various impurity concentrations
03 p0492 A69-14174

P-type GaSb crystals with various impurity concentrations noting conductivity, transverse magnetoresistance, Hall effect and acceptor band width and conductivity
04 p0643 A69-15259

Uniaxial compression load effect on activation energy in p-type GaSb single crystals
04 p0644 A69-15269

Thermal and excess currents in GaSb tunnel diodes
05 p0734 A69-16570

Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements
07 p1201 A69-19464

Face effect in p- and n-type gallium antimonide single crystals doped with zinc and tellurium
09 p1558 A69-21870

Drawn n-p and p-n junctions obtained in Te and Zn doped GaSb single crystals prepared in pure He atmosphere by Czochralski method
10 p1745 A69-23329

Microstructural analysis, determining junction orientation polarity effect on draw junction structure in GaSb crystals at room temperature
10 p1745 A69-23330

Repeated stepwise annealing process to obtain homogenized InSb-GaSb alloys continuous solid solutions
10 p1745 A69-23331

Tellurium doping effect on phonon diffusion in GaSb, discussing thermal conductivity at low temperatures
12 p2142 A69-26294

Vapor phase growth of epitaxial single crystalline GaAs-GaSb alloys using arsine and stibine
12 p2145 A69-26920

Conduction band structure in GaSb noting temperature dependence
13 p2319 A69-27899

Longitudinal magnetoresistance oscillations in n-type GaSb single crystals associated with electron concentrations minima
13 p2319 A69-27900

Band structure and optical constants of InSb, InAs and GaSb, calculating linear momentum matrix elements and state density with spin-orbit effects included
19 p3385 A69-36515

GaSb p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift
19 p3387 A69-36530

Electron effective mass, density and mobility in /000/ and /111/ conduction band minima in Te-doped degenerate GaSb-InSb single crystals
19 p3390 A69-36555

Tunnel p-n junctions preparation by diffusing Zn into degenerate Te doped n-type GaSb between 580-600 C, measuring volt-ampere and capacitance characteristics
21 p3780 A69-39043

S doped GaSb single crystals prepared by Crochral-ski method studied for temperature dependence of resistivity and Hall coefficient
21 p3781 A69-39048

Transverse thermomagnetic EMF and Nernst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers
21 p3783 A69-39558

Selenium distribution along GaSb single crystals during oriented crystallization determined by radiometry
23 p4198 A69-41725

GALLIUM ARSENIDE LASERS

Optically bistable operation of continuous wave GaAs p-n junction laser at 20 K
01 p0090 A69-10565

Continuous wave GaAs injection lasers operation at high temperatures shown possible by using available threshold current densities with suitable heat sink materials
02 p0255 A69-11710

Laser transition and photon energy of lightly doped GaAs, showing many body electron-hole-lattice interactions
02 p0257 A69-12615

Temperature dependence of electron beam pumped GaAs laser threshold current density and emission spectra, noting doping effects
02 p0260 A69-12683

GaAs injection laser transmission losses and threshold current density under influence of external optical coupling with spherical mirror
02 p0260 A69-12687

Clamp type diode holders for obtaining CW coherent emission from gallium arsenide injection lasers
03 p0435 A69-12985

Uniaxial pressure applied to p-n junction of GaAs injection laser, discussing effects on threshold current and wavelength
03 p0441 A69-13848

GaAs diode laser short wave emission, discussing coherent radiation and photon energy
03 p0441 A69-14165

Bistable operating mode of GaAs semiconductor laser involving light emission shifts
03 p0441 A69-14175

Spectral output time variation of GaAs diode laser operating in Fabry-Perot modes
05 p0772 A69-15961

Gallium arsenide injection lasers properties, analyzing band structure, optical transitions, recombination lifetimes, conduction band states, optical gain, etc
05 p0772 A69-16228

GaAs injection diode laser cooled by closed cycle gas refrigeration system, noting time required to reach laser operating temperature
05 p0777 A69-16793

GaAs laser excited by fast electrons exhibiting high efficiency and output power at room and liquid nitrogen temperatures
06 p0933 A69-16994

Gradual output degradation mechanism in GaAs injection lasers, attributing internal radiative quantum efficiency reduction to nonradiative recombination centers formation
07 p1148 A69-18857

GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels
07 p1157 A69-19593

GaAs laser employing external resonator with thin film active substance, noting output power and emission thresholds during electron beam excitation
08 p1326 A69-20543

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator
09 p1515 A69-21474

Picosecond structure of low power laser signals using calcite beam splitter and potassium diphosphate second harmonic generator
09 p1516 A69-21742

Microwave modulation of GaAs injection laser radiation, using Zaleskii recording method and liquid nitrogen to cool laser diode
12 p2105 A69-26031

Laser emission noise and voltage noise cross correlation coefficient for CW GaAs laser diodes at 77 K, noting strong dependence on bias current
12 p2038 A69-26328

Gallium arsenide junction laser resonant modes from theoretical model, calculating frequency separation
12 p2108 A69-26637

P-type GaAs-Ge lasing on band to band or conduction band to acceptor impurity transitions or on both transitions simultaneously
13 p2270 A69-27193

Temperature effects on polarization degree, threshold current and delay of radiation from GaAs laser diodes with diffused Zn
13 p2227 A69-27328

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current density measurement
13 p2271 A69-27467

Laser diodes p-n junctions obtained by Zn diffusion into Ga arsenide, stressing junction flatness problem and arsenic vapor pressure effect
13 p3323 A69-28640

Close confinement GaAs p-n junction lasers with reduced optical loss at room temperature
14 p2457 A69-28893

Gallium arsenide injection laser for communication systems with pulse frequency modulation, noting power output dependence on crystal quality
14 p2459 A69-29349

Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency
15 p2633 A69-30059

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator
15 p2633 A69-30719

Optimum metal contact stripe width for CW operation of GaAs junction lasers bonded on copper heat sink
16 p2796 A69-31698

OgaAs platelet laser modes time behavior, discussing control by electron-hole pair density
16 p2796 A69-31704

Injection semiconductor lasers emission characteristics, discussing gallium arsenide diodes, nonlinear losses in pulsed mode, laser interactions, etc
16 p2796 A69-31949

GaAs laser diode radar system for incremental range profiles
17 p2980 A69-32921

GaAs dual diode laser structure used to give electrical control of laser threshold and permit study of optical flux and current density role
17 p2980 A69-32959

GaAs diode laser pulse train emission during pumping near threshold
17 p2982 A69-33421

Monograph on GaAs injection laser electrical and optical properties during crystallization out of solution covering principle, p-n junction fabrication, I-V characteristics, doping effect, etc
17 p2982 A69-33571

GaAs semiconductor laser emission band homogeneity and continuous energy spectrum levels contribution to induced optical transitions
17 p2984 A69-34161

Radiation dynamics of semiconductor GaAs injection laser with pulsed and continuous modes operation of diodes
18 p3154 A69-35495

Amplitude and output spectra of optical quantum amplifier based on GaAs injection laser, noting values in traveling wave and regeneration mode
19 p3336 A69-36348

Magnetic field effects on emission line shift, threshold current and power output of GaAs injection laser, discussing spontaneous radiation in magnetic field
19 p3387 A69-36529

GaAs lasers emission dynamics, considering threshold amplification, spontaneous noise, nonlinear operation, etc
19 p3337 A69-36534

Radiation dynamics of GaAs injection semiconductor laser, plotting spike period dependence on resonator length
19 p3337 A69-36535

- GaAs-P injection laser time delay measured from start of current flow in p-n junction diode, studying effects of memory, temperature and reverse bias
19 p3387 A69-36536
- Power, efficiency and temperature dependence of emission spectra and threshold current density in electron beam pumped GaAs laser, noting doping concentration
19 p3338 A69-36538
- Gallium arsenide junction lasers operating above threshold, showing resonant modes dependence of steady state gain function and frequency dependence of spatial gain distribution
19 p3338 A69-36691
- GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime
19 p3339 A69-36696
- Stimulated emission at current pulse end ascribed to external resonator turn-on time delay effects with GaAs injection lasers at room temperature
21 p3734 A69-38408
- GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] 21 p3763 A69-39396
- GaAs injection laser properties calculation with doping levels for exponential band tails formation, deriving threshold currents, lasing frequencies, I-V characteristics, etc
22 p3959 A69-40012
- Spiking behavior detection in Q switched light output from GaAs pulsed junction laser, noting width at high pumping levels
22 p3963 A69-40563
- Electron beam pumped dislocation free GaAs lasers filamentary and nonuniform emission characteristics from X ray topographs before and after bombardment
22 p3963 A69-40565
- Emission dynamics and fine pulse structure in GaAs injection lasers, determining pulse duration and amplitude dependence on current and resonator length
22 p3963 A69-40603
- Lasing properties of Ni-doped GaAs diodes evaluated by plotting resonance, mode amplitudes and frequencies for various bias currents and external capacitance
22 p3912 A69-40606
- Amplification coefficient, luminescence power and spacing between Fermi quasi-levels in GaAs diode injection lasers, using spectral absorption dependence
22 p3965 A69-40801
- Intensity of optical pulses from CW GaAs injection lasers observed with fast sampling techniques
23 p4173 A69-41500
- Oscillographic recording of GaAs laser ultrashort radiation pulses, using isolated injection regions and semiconductor photodiode as photoelectric converter
24 p4329 A69-43740
- GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser reflectivity, taking into account optical losses
24 p4330 A69-43766
- GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser resonator length, taking into account optical losses
24 p4330 A69-43767
- GaAs junction laser total stimulated light power dependence on resonator length taking into account optical losses
24 p4330 A69-43768
- GALLIUM ARSENIDES**
- Small signal impedance of subcritically doped gallium arsenide Gunn diodes, using drift velocity vs electric field relationship
01 p0038 A69-10121
- Gallium arsenide single crystal epitaxy with doping/concentrations into semiinsulating microwave circuits
01 p0040 A69-10196
- Microstrip transmission line integrated circuits on semiinsulating GaAs substrates, showing feasibility at millimeter wave frequencies
01 p0040 A69-10197
- Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected with structural properties and contact formation conditions
01 p0136 A69-10256
- Limited space-charge accumulation mode efficiency for gallium-arsenide diodes, taking into account electron-lattice relaxation processes
01 p0137 A69-10321

- Electrical properties of gold-gallium arsenide n-type junctions investigated for influence of crystallographic orientation of surface and charge carrier density
01 p0138 A69-10432
- Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide
01 p0138 A69-10557
- Current/field characteristic of n-type GaAs, using high power microwave techniques in presence and absence of transverse magnetic field
01 p0139 A69-10819
- Forward current shot noise in parametric amplifiers using GaAs varactors, noting additional noise due to stored minority carriers current
01 p0048 A69-11137
- Specific heats of Cu, GaAs, GaSb, InAs and InSb measured over low temperature ranges
01 p0140 A69-11252
- Recombination radiation from excitons and free carriers in epitaxial GaAs with impurities at liquid He temperatures
01 p0140 A69-11253
- GaAs photoemissive yield spectrum analysis, discussing transition energies and energy band structure models
01 p0140 A69-11254
- Electron drift velocity, diffusion coefficient and trapping time in GaAs, measuring variation with electric field
01 p0140 A69-11255
- Recombination effects in high resistivity Cu doped gallium arsenide single crystals determined by photoconductivity methods
02 p0294 A69-11627
- Photoelectric properties of n-n junction interfaces in gallium phosphide and arsenide semiconductors
02 p0294 A69-11630
- Trapping parameters of Fe doped GaAs-GaP, measuring thermally stimulated conductivity and space charge limited currents
02 p0296 A69-11789
- Diffusion process in dislocation-free doped and undoped GaAs single crystals
02 p0296 A69-11792
- Injection laser emission from gallium arsenide base films grown epitaxially from gas phase in moist hydrogen atmosphere
02 p0255 A69-11879
- Gunn domains reduction in sheet type GaAs oscillators by spreading of field lines out of active region
02 p0215 A69-11933
- Cavity excitation and support of limited space-charge accumulation mode oscillations in n-GaAs epitaxial diode
02 p0297 A69-11940
- Fundamental microwave oscillations at high frequencies in GaAs epitaxial sandwich layers, using space charge growth control
02 p0297 A69-11941
- GaAs Gunn diode oscillators operating at Q band frequencies
02 p0297 A69-11944
- GaAs injection lasers noting spectral function, I-V characteristics and relations among lasing wavelength, threshold current density and impurity concentration
02 p0256 A69-11993
- Nonisothermal space charge wave analysis of transit time mode oscillations in bulk GaAs, studying device reactance at given negative resistance
02 p0299 A69-12240
- Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination
02 p0256 A69-12245
- Localized vibration modes of defects and IR absorption bands in compensated Si doped GaAs
02 p0299 A69-12402
- Linear absorption coefficient of semiinsulating Cr doped GaAs for IR carbon dioxide laser radiation, discussing lattice absorption mechanism
02 p0258 A69-12619
- Optical modulation near intrinsic edge in n-type bulk GaAs due to Franz-Keldysh effect, noting carrier production by photon initiated excitation
02 p0300 A69-12650
- Epitaxial GaAs transferred electron oscillators pulsed operation at bias voltage ten times threshold voltage, noting power output and efficiency
03 p0402 A69-12854
- Minority carriers lifetime measurement in degenerate GaAs, showing dependence on current density and operating temperature
03 p0483 A69-12917

- Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs
03 p0484 A69-13282
- Gunn effect in bulk GaAs, noting microwave oscillator applications
03 p0484 A69-13292
- Tellurium-doped gallium arsenides stacking-faults transmission electron microscopic study
03 p0486 A69-13614
- Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission
03 p0488 A69-13887
- Photoluminescence measurement of distribution of majority carrier concentration in GaAs
03 p0489 A69-13893
- Power epitaxial GaAs tunnel diodes grown from solution in tin with tellurium
03 p0489 A69-13895
- Heat capacity of diamond-like semiconducting Si, GaAs and GaP calculated on basis of quasi-chain dynamics of covalent crystals
03 p0490 A69-13943
- Epitaxial n-GaAs photoluminescence obtained from p-GaAs, considering emission intensity
03 p0492 A69-14167
- Epitaxial GaAs films with high electron mobility, noting radiation recombination spectra dependence on substrate orientation
03 p0492 A69-14172
- N-type GaAs single crystal magnetoresistivity, noting charge carrier scattering mechanisms
03 p0492 A69-14177
- Electron phonon coupling in barriers of GaAs Schottky diodes, noting first and second derivatives of I-V characteristic in n-type GaAs-Pd Schottky diode
03 p0493 A69-14242
- Small transverse dimensions effect and domain formation criterion for surface oriented Gunn diodes prepared on thin epitaxial GaAs layers
04 p0639 A69-14335
- Hybrid Gunn domain and LSA mode operation in oversized bulk and epitaxially grown GaAs, noting large signal impedance data
04 p0639 A69-14339
- Photoluminescence measurements of p-type thermal conversion in GaAs grown from silica boats, noting compensation by copper and shallow acceptors
04 p0639 A69-14434
- Cathodoluminescence of n-type GaAs with various carrier concentration bombarded with 24-kv electrons, studying emission spectrum for radiative transition
04 p0639 A69-14436
- Angular distribution of particles sputtered from GaAs and GaP single crystals, bombarding faces with Ar ions at low energy
04 p0640 A69-14452
- Temperature dependence of partial pressure of saturated As vapor over solid solutions of InAs-GaAs of different composition
04 p0642 A69-14938
- Semiinsulating GaAs mobile electric domains, determining electric field strength from electrooptical effect measurements
04 p0643 A69-15261
- Fe doped GaAs p-i-n structure electrical conductivity, Hall effect, thermally induced currents, space charge bounded currents and current instability
04 p0643 A69-15263
- Te and Zn doped p-type GaAs single crystals optical homogeneity, using interferometry
04 p0644 A69-15266
- Homogeneous electroluminescence at 77 K in n-type GaAs single crystals without artificial p-n junctions, noting effects of electric field strength and Zn doping
04 p0644 A69-15271
- Similarity between characteristics of T layers in oxygen discharge positive column and Gunn instabilities in GaAs, noting role of negative O ions
05 p0800 A69-15739
- Acoustoelectric domain propagation in n-type GaAs, noting flux influence on peak acoustic density
05 p0806 A69-15815
- Impurity transfer in doped and undoped epitaxially grown GaAs films, studying substrate dopants effect on carrier concentration profiles
05 p0807 A69-15957
- Multiple high field domain nucleation in GaAs, discussing dependence on contact inhomogeneities
05 p0807 A69-15959
- Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spec-

tra, current-voltage characteristics and temperature effects

05 p0729 A69-16210

Microwave diodes on GaAs base, determining basic parameters and effects on crystal formation and device construction

05 p0730 A69-16222

Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes

05 p0808 A69-16287

High temperature effects on gallium arsenide crystals current carriers lifetime, discussing recombination characteristics and impurity photoconductivity

05 p0809 A69-16551

Peripheral surface damage effects on epitaxial GaAs bulk diodes breakdown characteristics, noting measurements on mechanically and chemically prepared elements

05 p0733 A69-16561

Limited space charge accumulation /LSA/ oscillations in GaAs, noting frequency independent power interrelationships

05 p0810 A69-16568

Low power RF signal triggering of self sustaining Gunn oscillations in GaAs samples

05 p0734 A69-16575

Neutron and X ray radiation effects upon gallium arsenide devices including Gunn oscillators, transistors, Schottky barrier diodes and optoelectronic pulse amplifiers

06 p0978 A69-16890

Spectral response of fast GaAs point-contact diode in mm and submillimeter wavelength ranges

06 p0893 A69-16939

Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se

06 p0978 A69-16988

Injection characteristics of n-aluminum gallium arsenides-p-GaAs heterojunctions from recombination radiation spectra

06 p0979 A69-16993

Faraday effect at free carriers in indium antimonides and gallium arsenides, analyzing frequency dependence of rotation angle

06 p0979 A69-16996

Gallium arsenide double injection diode using vacuum deposited film electrode on single crystal substrate, noting current controlled negative resistance

06 p0893 A69-17156

GaAs IR emitters efficiency due to semiconductor material band structure

06 p0894 A69-17248

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs

06 p0934 A69-17466

Tunnel junctions of narrow gap GeTe and wide gap GaAs, noting current voltage characteristics similar to those in Schottky barrier

06 p0980 A69-17770

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

06 p0981 A69-17879

Selective etching technique in study of dislocations in epitaxial layers of gallium arsenide

06 p0981 A69-17891

Second order nonlinear coefficient measurement for optical generation of millimeter wave difference frequencies in GaAs waveguide, using carbon dioxide laser

06 p0928 A69-17903

Oscillators and amplifiers based on intervalley electron transfer in bulk GaAs

07 p1096 A69-18442

Oversized GaAs Gunn effect diodes operated in L and S bands at harmonics of fundamental transit time frequency with high power and efficiency

07 p1196 A69-18444

Pulse power from X band LSA devices at centimeter through millimeter wavelengths

07 p1097 A69-18445

Domain oscillations removal in n-type gallium arsenides by externally applied microwave field, noting doping effect on LSA conversion efficiency

07 p1196 A69-18446

Stable negative RF conductance and oscillation conditions for n-GaAs crystals of low $n \times L$ product

07 p1197 A69-18448

Solution regrowth method to prepare epitaxial GaAs for Gunn effect devices

07 p1197 A69-18451

Microwave oscillation and amplification in long bulk GaAs with barium titanate sheets on surface due to differential negative resistance across terminals

07 p1197 A69-18452

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals

07 p1197 A69-18454

Epitaxial GaAs IMPATT diodes for generating CW X band power, noting high efficiencies and low noise characteristics

07 p1102 A69-18660

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum

07 p1199 A69-18686

Electrical resistance and Hall coefficient measurement in InAs-GaAs solid solutions system, giving temperature dependence of electron mobility

07 p1199 A69-18689

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity

07 p1199 A69-19009

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content

07 p1200 A69-19013

Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles

07 p1200 A69-19401

Surface plasmon excitation by tunneling electrons in GaAs-Pb junctions, discussing conductance at bias voltages, plasmon energy and concentration

07 p1200 A69-19402

Dielectric surface loading on GaAs for suppressing traveling high field domain mode oscillations

08 p1371 A69-19911

Quenched multiple domain mode oscillations in GaAs microwave diodes noting relationships between efficiency, power output, negative resistance and bias voltage

08 p1282 A69-20107

Optimal electroluminescent efficiencies for vapor grown gallium arsenide phosphide diodes, analyzing current spreading, absorption, impurity and composition effects

[ECS PAPER 103] 08 p1284 A69-20366

Epitaxially grown guard rings for GaAs p-n junction and Schottky barrier avalanche diodes

08 p1284 A69-20368

Properties of ion implanted GaAs diodes fabricated at room temperature, analyzing light emission, resistance and breakdown voltage

[ECS PAPER 172] 08 p1284 A69-20369

Magnetophonon oscillations of transverse magnetoresistance of n-type epitaxial GaAs in pulsed magnetic field

08 p1373 A69-20760

Field effect transistors with Schottky-barrier gates using epitaxial layers of silicon on substrates and gallium arsenide on seminsulating substrates

08 p1286 A69-20863

Vapor deposition of high purity epitaxial layers of n-type gallium arsenide, noting resistivity and Hall coefficient measurements

[ECS PAPER 62] 08 p1373 A69-21067

Temperature dependence of energy gap in gallium arsenide and gallium phosphide from absorption measurements

09 p1553 A69-21330

Ag-GaAs Schottky barrier photodiodes, describing fabrication and use as UV radiation detectors

09 p1462 A69-21334

Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions

09 p1544 A69-21336

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

09 p1555 A69-21471

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes

09 p1555 A69-21475

Inhomogeneity distribution of carrier concentration and electrovoltaic effect in GaAs devices analyzed by scanning electron microscope

09 p1557 A69-21746

Current oscillations in seminsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra

09 p1557 A69-21753

Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected with structural properties and contact formation conditions

09 p1559 A69-22649

Schottky barriers on n-type GaAs, measuring forward current characteristics for various electron concentrations and temperatures

10 p1745 A69-23358

Transitions between heavy hole and spin orbit split bands in uniaxially stressed Ge and GaAs, noting spectra for various temperatures and valence band parameters

10 p1745 A69-23359

Quenched one dimensional bulk GaAs oscillators with linearly increasing and decreasing concave and convex doping gradients, showing profiles

10 p1663 A69-23667

Small signal HF conductivity of GaAs calculated for arbitrary frequency and DC field, considering subcritical Gunn devices

10 p1747 A69-23694

Presprayed metal films influence on visibility and contact resistance of GaAs prior to fusing in Sn, In and lead contacts

10 p1748 A69-24214

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

11 p1936 A69-24537

Etch pits behavior during diffusion and rediffusion of copper in low dislocation crystals of gallium arsenide, demonstrating vacancy nature

11 p1937 A69-25029

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission

11 p1939 A69-25688

Photoluminescence measurement of distribution of majority carrier concentration in GaAs

11 p1939 A69-25694

Power epitaxial GaAs tunnel diodes grown from solution in tin with tellurium

11 p1939 A69-25696

Fabrication procedure for microwave epitaxial GaAs diodes applicable for switching purposes

12 p2035 A69-25831

Gallium arsenide materials technology, discussing solution and vapor-phase epitaxy and liquid encapsulation as related to crystal growth and purification

12 p2141 A69-25834

High CW power K-band Gunn oscillators attained through control over doping level, profile and GaAs epitaxial layer thickness

12 p2036 A69-25907

Etched surfaces inhomogeneity of n-type GaAs single crystals, noting oxide layers formation

12 p2142 A69-25980

Carbon dioxide rotational constants from CW beat measurement in bulk GaAs mixer between carbon dioxide vibrational-rotational laser lines

12 p2105 A69-26311

Gallium arsenide thermometer calibration in 1 to 100 K range using interpolation formula derived from p-n junction diode equation

12 p2093 A69-26484

GaAs crystallization for various deviations of melt from stoichiometric state, noting concentration supercooling at phase boundary layer

12 p2144 A69-26586

Vapor phase growth of epitaxial single crystalline GaAs-GaSb alloys using arsine and stibine

12 p2145 A69-26920

Avalanche Schottky barrier photodiodes fabricated by plating GaAs with thin Pt layer and forming proton radiation guard ring, discussing gain bandwidth and SNR

13 p2226 A69-27195

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on seminsulating substrates, discussing recombination of excess electrons and holes

13 p2227 A69-27236

GaAs photoelectric devices for radiation detection and light to electric energy conversion, considering photoresistors, photodiodes and solar cells

13 p2203 A69-27465

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides

13 p2317 A69-27875

High resistivity GaAs impedance with nonlinear I-V characteristics, showing appreciable reactive component

13 p2317 A69-27881

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam

13 p2318 A69-27886

Electroluminescence of p-GaAs diodes analyzed over temperature range of linear dependence of lasing on injection current

13 p2230 A69-27887

Current oscillations in n-type gallium arsenide related to electroacoustic domains motions, noting oscillation period dependence on voltage

13 p2318 A69-27892

Gallium arsenide diode nonequilibrium carriers absorption of He-Ne laser radiation under emission conditions

13 p2272 A69-27893

Supplementary absorption and Hall effect temperature dependence in solid solutions of gallium arsenic phosphide

13 p2318 A69-27894

Gallium arsenide Fe-doped diodes efficiency as high speed switches from measured current-voltage characteristics at various temperatures

13 p2319 A69-27898

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

14 p2503 A69-28788

GaAs photoelectric emission at different activation degrees by adsorbed Cs and BaO layers, noting spectral response characteristics differences and causes

14 p2504 A69-28993

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs

14 p2508 A69-29655

Boltzmann equation for hot electron distribution functions in GaAs and threshold field in Gunn effect

15 p2665 A69-30025

Majority carrier lifetime temperature dependence obtained from photoconductivity measurements of p-type GaAs crystals doped with Ge

15 p2666 A69-30056

Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels

15 p2666 A69-30060

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field

15 p2666 A69-30061

Gunn effect GaAs oscillators with p-n junctions, studying electrical characteristics, threshold voltages and currents during breakdown and p-n junctions injection

15 p2666 A69-30065

Spectral distribution of photosensitivity for p-n junctions in silicon doped GaAs, showing agreement with state density model and absorption data

15 p2666 A69-30067

Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment

15 p2667 A69-30078

Push-pull circuit configurations for GaAs transferred electron oscillators, discussing CW X band and pulsed L band devices operation

15 p2574 A69-30168

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

15 p2669 A69-30716

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes

15 p2669 A69-30720

Diffuse Zn layers structure in GaAs single crystals, showing dislocations formation by anomalous Zn diffusion

15 p2670 A69-31048

GaAs zinc gallium selenide solid solutions properties, analyzing lattice constant, microhardness, forbidden zone and concentration relationships

15 p2670 A69-31050

Bound excitons spectra in Cu doped gallium arsenide crystals, analyzing line oscillation structure and uniaxial compression effect

16 p2824 A69-31571

Optical and electrical properties of electroluminescent diffused gallium arsenide phosphide diodes with low donor concentrations, analyzing spectral emission and fabrication effects

16 p2758 A69-31699

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed

16 p2825 A69-31708

Pulse duration control by two photon absorption, using GaAs as nonlinear element inserted in neodymium-glass laser cavity

16 p2796 A69-31798

Zinc diffused GaAs avalanche diode high CW power and efficiency in normal mode

16 p2760 A69-32015

Alloying pairs of metal pellets to n and p type semi-insulating GaAs, discussing photo effects

17 p3015 A69-32824

Magneto-optical constants and conduction band parameters of GaAs by coherent radiation at high temperatures, measuring Faraday rotation

19 p3386 A69-36522

Radiative recombination in GaAs, giving edge radiation spectra in p and n type crystals and photoluminescence method for measuring junction carrier concentration distribution

19 p3386 A69-36525

Voltage and temperature dependence of zero-bias anomaly in GaAs p-n junction at 0.40-60 K, investigating voltage dependence of differential resistance

19 p3388 A69-36542

Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra

19 p3391 A69-36606

High resistivity gallium arsenide single crystal LF current oscillations at low temperature, investigating electron heating effect and mechanisms

19 p3391 A69-36609

Undoped n-type gallium arsenide single crystals edge emission spectral band shape dependence on crystal type and ambient temperature

19 p3392 A69-36610

Fe-doped p-type gallium arsenide single crystal radiative recombination emission during current carriers transition from deep acceptor level into valence band

19 p3392 A69-36611

GaAs IMPATT diodes breakdown voltage, impurity density and outer layer thickness compared with Si IMPATT diodes

20 p3504 A69-36914

N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose

20 p3582 A69-36969

Crystallization front topography and stratified structure of melt extracted n-type GaAs single crystals from anodic etching method

20 p3582 A69-37013

Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects

20 p3506 A69-37783

Equivalent circuit for microwave cavity containing active GaAs device applied to waveguide and radial mode cavity design

20 p3508 A69-37900

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs

20 p3555 A69-37949

Temperature dependence of stimulated light power from GaAs junction lasers operated at constant bias current above threshold

21 p3734 A69-38437

Radiative recombination in GaAs p-n structures having region with concentrations of Ge atoms

21 p3780 A69-39044

Energy levels of multicharge acceptor centers and level splitting in InSb and GaAs deformed crystals, using multizone approximation

21 p3781 A69-39067

Microwave oscillations amplification in bulk GaAs, discussing experimental verification of small signal theory

21 p3781 A69-39127

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides

21 p3782 A69-39141

High resistivity GaAs impedance with nonlinear I-V characteristics, showing appreciable reactive component

21 p3782 A69-39143

Electroluminescence of p-GaAs diodes, analyzing temperature range of linear dependence of lasing on injection current

21 p3682 A69-39145

Solid state SHF transmission amplifiers design using rectangular waveguides and biased bulk GaAs

21 p3683 A69-39452

Triode with emitter controlled negative resistance of GaAs as oscillator for microwave applications

22 p3911 A69-40010

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption

23 p4198 A69-41499

Fast neutron irradiation effect on IR absorption in single crystal GaAs for various fluences

23 p4198 A69-41540

Ultrahigh vacuum cleaved GaAs-Cs and GaAs-cesium monoxide photoemission acceptor densities, noting crystal parameters role

23 p4198 A69-41548

Temperature gradients effects on GaAs crystals grown by Bridgman method

23 p4199 A69-42469

Luminescence, I-V and pulse characteristics of high resistivity Ni doped GaAs single crystals, noting injection conductivity

24 p4362 A69-43734

Anisotropic carrier distribution effect on polarization of spontaneous recombination radiation during GaAs breakdown in electric field

24 p4362 A69-43736

Diagonal tunneling and radiation polarization in doped heterojunctions and p-n junctions of GaAs, using electroluminescence spectrum analysis

24 p4362 A69-43737

Electroluminescence in doped p-type GaAs single crystal diodes ascribed to double injection of nonequilibrium current carriers

24 p4288 A69-43739

GALLIUM COMPOUNDS

NT GALLATES

Heat conductivity of liquid and solid gallium telluride in steady state regime, using graphite cylindrical device

16 p2824 A69-31572

GaAs-GaP heterojunctions, analyzing continuous conduction band, capacitance and current-voltage characteristics, photoresponse and modulation effect

21 p3779 A69-38424

GALLIUM PHOSPHIDES

GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods

01 p0137 A69-10259

Photoelectric properties of n-n junction interfaces in gallium phosphide and arsenide semiconductors

02 p0294 A69-11630

Trapping parameters of Fe doped GaAs-GaP, measuring thermally stimulated conductivity and space charge limited currents

02 p0296 A69-11789

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams

03 p0489 A69-13892

Heat capacity of diamond-like semiconducting Si, GaAs and GaP calculated on basis of quasi-chain dynamics of covalent crystals

03 p0490 A69-13943

Carrier scattering mechanisms in n-type GaP, measuring IR radiation absorptivity in Te doped GaP

03 p0492 A69-14168

Photoionization of donor impurities during absorption of IR radiation in n-type Te doped GaP at low temperatures

03 p0492 A69-14169

Vapor grown GaP electrical and optical properties, considering undoped and Se or S doped samples on GaAs and GaP substrates

04 p0640 A69-14438

Angular distribution of particles sputtered from GaAs and GaP single crystals, bombarding faces with Ar ions at low energy

04 p0640 A69-14452

Spectral study of crystal lattice of gallium phosphides for influence of vacancies and impurities on band formation

04 p0643 A69-15258

Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se

06 p0978 A69-16988

Red light emitting p-n junctions in GaP fabricated by epitaxial growth

06 p0979 A69-16999

Temperature dependence of energy gap in gallium arsenide and gallium phosphide from absorption measurements
09 p1553 A69-21330

Structural and optical properties of vacuum deposited GaP films at below 240-850 C
09 p1554 A69-21332

Hole density/Zn concentration ratio in Zn doped solution grown p-type GaP, noting anomalous electrical properties
09 p1557 A69-21750

GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods
09 p1559 A69-22652

Voltage dependence of red and green electroluminescence in GaP diodes prepared by growing n-type liquid epitaxial layer on p-type solution grown substrate
10 p1663 A69-23664

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams
11 p1939 A69-25693

Negative resistance in GaP electroluminescent diodes with p-i-n structure at low temperatures, noting oxygen role
13 p2226 A69-27194

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides
13 p2317 A69-27875

Supplementary absorption and Hall effect temperature dependence in solid solutions of gallium arsenic phosphide
13 p2318 A69-27894

Depth and planarity of zinc diffused junctions in GaP using temperature, phosphorus overpressure and time as independent variables
13 p2322 A69-28136

Ga phosphide p-n junctions formation from GaP. Ga solution, discussing electrical and luminescence properties
13 p2323 A69-28642

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation
14 p2419 A69-29325

Current effects on quantum efficiency of gallium phosphide junction diodes emitting red light
15 p2575 A69-30174

Gallium phosphide Schottky barrier diodes, discussing construction and metals used, barrier height relationships to impurity concentration and temperature, rectifying characteristics and internal quantum efficiency
16 p2757 A69-31613

Schottky barrier diodes for high temperature operation prepared on n type GaP single crystals, studying I-V and C-V characteristics
19 p3381 A69-35681

IR absorption in n-type gallium phosphide doped with telluride or Si in 1.5-2.0 micron range, analyzing wavelength dependence
19 p3385 A69-36518

GaAs-P injection laser time delay measured from start of current flow in p-n junction diode, studying effects of memory, temperature and reverse bias
19 p3387 A69-36536

Energy band gap variation as function of composition in In-Ga-P semiconductor crystals
19 p3390 A69-36553

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides
21 p3782 A69-39141

GALLIUM SELENIDES
GaAs zinc gallium selenide solid solutions properties, analyzing lattice constant, microhardness, forbidden zone and concentration relationships
15 p2670 A69-31050

GALVANIC CELLS
U ELECTROLYTIC CELLS

GALVANIC SKIN RESPONSE
Stability and habituation of nonspecific galvanic skin responses during light and sound stimulation periods in medical students
03 p0380 A69-13462

GALVANOMAGNETIC EFFECTS
.NT NERNST-ETTINGSHAUSEN EFFECT

Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern
02 p0298 A69-12098

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons
03 p0488 A69-13888

Localized umklapp scattering effect on galvanomagnetic properties of nearly free electron bcc metal with spherical Fermi surface
03 p0493 A69-14240

Anomalous size effects in galvanomagnetic properties of zinc crystal samples caused by compensation
06 p0981 A69-18232

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices
09 p1541 A69-22698

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons
11 p1939 A69-25689

Transverse quantum thermogalvanomagnetic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations
13 p2318 A69-27890

Transport processes under adiabatic conditions between external magnetic field and thermal and electrical gradients in solid, defining galvanomagnetic and thermomagnetic effects
13 p2299 A69-28129

Galvanomagnetic characteristics of n-type semiconductor subjected to perpendicular electric and magnetic fields, noting electron temperature
14 p2505 A69-29037

AC technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de Haas effects, noting error reduction
19 p3312 A69-36375

GALVANOMAGNETISM
U GALVANOMAGNETIC EFFECTS

GALVANOMETERS
Errors in amplitudes and phases recorded by earth tide recording equipment determined, using special multiflex galvanometer
04 p0601 A69-15305

GAME THEORY
NT MINIMAX TECHNIQUE
NT SADDLE POINTS [GAME THEORY]

Game interception of motions, obtaining proof for extremal aiming scheme
05 p0793 A69-15777

Differential pursuit games solved by integrating Bellman equation for value function and determining set of possible positions in game with prescribed duration
05 p0788 A69-16536

Differential games method solving pursuit problem for pursuer with greater maneuverability than pursued
09 p1476 A69-22671

Fuel optimal control for second order system determined by game theory approach
10 p1667 A69-24040

Differential game for determining singular fuel optimal control of plant with uncertainty in dynamic equation
10 p1667 A69-24041

Differential games solution value function constructible from solutions to associated one player optimal control problems
10 p1667 A69-24059

Synthesis for nonlinear second order differential equations with terms satisfying Lipschitz condition, using two person games optimal strategy
11 p1910 A69-25602

Nondeterministic differential games with imperfect state information, emphasizing linear system with quadratic cost functional and additive white Gaussian noise
12 p2053 A69-26505

Differential approach game for unfavorable pursued motion, examining optimum control laws
13 p2288 A69-27525

Pursuit problem involving controllable pursuing plant, deriving condition for engagement with prescribed period of time
14 p2482 A69-28800

Differential games theory with nonzero sum for application to economic analysis, discussing Nash equilibrium, minimax and noninferior strategies set
15 p2645 A69-31237

Nonzero-sum differential games characteristics, generalizing optimal control concepts, discussing Nash equilibrium and noninferior set solutions
17 p2943 A69-32834

Stochastic differential game theory, discussing nonlinear partial differential equations for solution, dynamic programming validity conditions, finite difference scheme, etc
17 p2994 A69-32844

Game interception of motions, obtaining proof for extremal aiming scheme
18 p3173 A69-35030

Two player zero-sum differential games with emphasis on play with state determined by differential equations, noting optimal solutions
19 p3359 A69-35665

Minimization of motion deviation from prescribed motion analyzed as differential game of converging motions using equations of motion
22 p3980 A69-40105

Existence theorem for Markov chain finite state stochastic games applied to saddle point and optimal strategy or epsilon-optimal strategy pairs
22 p3975 A69-41010

Risk taking under uncertainty in individual and group decisions, analyzing gambling and group discussion situations
23 p4091 A69-42016

Differential games derived for conjugate-point necessary conditions and definitions for minimum and maximum problems
24 p4340 A69-42959

Policies and controller design for pursuing vehicle developed in terms of pursuit-evasion differential games
24 p4341 A69-43295

Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions
24 p4341 A69-43296

GAMETOCYTES

Recessive lethal mutations frequency in gametes of male and female *Drosophila melanogaster* onboard Vostok spacecraft
07 p1063 A69-18598

Lignin presence in New Zealand moss gametophytes observed for characteristic color reaction and UV spectra, noting contrast with north temperate species
17 p2912 A69-34176

Insect gametes response to space flight and radiation in reduced gravity including plants and microorganisms
23 p4091 A69-42050

GAMMA FUNCTION

Tabulation of high accuracy gamma function values for some rational arguments, noting applications to Gaussian quadrature formulas, fractional Bessel functions and Airy functions
03 p0455 A69-13375

Failure distribution functions based on Eyring component aging model, including failure probability density function for Weibull and gamma type distributions
08 p1322 A69-21104

GAMMA GLOBULIN

Tryptic pentapeptide Asp-Glu-Leu-Thr-Lys synthesis showing relation to Gm/a/ antigen of human gamma g-globulin
24 p4279 A69-42712

GAMMA RAY BEAMS

Angular energy distribution in gamma quanta beam during collision between laser photons and relativistic electrons
10 p1701 A69-23132

GAMMA RAYS

Solar X-ray high activity level during spring 1966 connected with gamma type magnetic solar regions and correlated with ionospheric effects
01 p0146 A69-11119

Scintillation gamma spectrometer on Luna 10, eliminating charged particle background by fabricating detector from NaI single crystal in scintillating plastic container
01 p0084 A69-11314

Chronic gamma radiation biological damage in rats exposed to maximum nonlethal to minimum lethal doses for various periods
02 p0197 A69-11494

Pulsar CP 1133 high energy gamma ray emission, using atmospheric Cerenkov detection technique for high energy neutral cosmic rays
02 p0307 A69-11823

Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
02 p0308 A69-12092

GAMMA RAYS

Neutron and gamma irradiation effects on CdS crystals structure and properties, outlining electron energy level scheme
02 p0298 A69-12119

Gamma ray astronomy, noting fluxes above 100 Mev from strong radio sources and intensities of Crab Nebula
03 p0497 A69-12931

Angular correlation of inelastically scattered alpha particles and gamma rays emitted from 2-plus state of Sn 120
03 p0469 A69-13098

Angular correlation between inelastically scattered 42 Mev alpha particles and emitted gammas from 2-plus Ni 58
03 p0470 A69-13100

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
03 p0374 A69-13498

Gamma ray fluxes from pulsating radio sources, using detection of Cerenkov light generated by energetic particles in atmosphere
03 p0513 A69-13772

EPR investigation of free radicals formed during mechanical fracture and gamma irradiation, discussing recombination rate and reaction rate with oxygen
03 p0434 A69-13871

Extraterrestrial background gamma radiation /0.3-2 Mev/ observations used to derive upper limits for cosmic ray protons and CNO nuclei in interstellar space
03 p0501 A69-13934

Burning rate of composite propellant with gamma irradiated ammonium perchlorate, noting enhancement at atmospheric pressure
04 p0647 A69-15519

Gamma radiation effects on transistors and diodes, discussing dosage and thermal changes within operational temperature range of germanium devices
05 p0728 A69-15695

Solar gamma rays measurement role in knowledge of solar flares, discussing simultaneous satellite and ground based observations
05 p0814 A69-15863

Gamma irradiated silver carbonate EPR at liquid nitrogen temperatures
05 p0716 A69-15915

Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6]
05 p0783 A69-16160

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
05 p0709 A69-16511

Gamma ray production and high energy electrons in cosmic radiation
05 p0817 A69-16712

Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures
06 p0976 A69-16876

Recovery and long term reliability of Si n-p-n transistors subject to gamma radiation, using military specifications for failure
06 p0976 A69-16878

Gain degradation under applied voltage and injection current during low dose gamma irradiation by Co-60 source for bipolar transistors
06 p0977 A69-16880

Combined neutron degradation and gamma induced effects on closed loop system simulated by SECURE program
06 p0899 A69-16889

X ray and gamma astronomy, discussing galactic gamma radiation source and diffuse X ray background radiation
06 p0998 A69-16969

Low energy photon spectrum at balloon altitudes, noting small geomagnetic latitude dependence
06 p0992 A69-17313

Cosmic X rays, gamma rays and electron production under astrophysical conditions, noting potential use in supernova and quasar research
07 p1204 A69-18391

Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
07 p1178 A69-18825

Instrumentation design problems connected with NERVA, considering high gamma and neutron radiations and temperature environments
[IEEE PAPER 2D-5]
07 p1134 A69-19189

Gamma ray telescope development for balloon-borne astronomy in search for discrete gamma sources and supernova explosions
[IEEE PAPER 3A-5]
07 p1134 A69-19192

Onboard calibration system for gamma ray spectrometers and X ray detector in earth satellites, describing fabrication and test results for radioactive sources
[IEEE PAPER 3A-6]
07 p1134 A69-19193

X ray proportional counter, analog to digital converter and power supply for gamma ray spectrometry used in satellite applications
[IEEE PAPER 3A-7]
07 p1134 A69-19194

Inhibition of gamma ray induced DNA degradation by infection with bacteriophage
07 p1069 A69-19709

Cosmic gamma radiation with energies above 100 Mev in southern sky, discussing results of balloon-borne spark chamber flight
08 p1377 A69-19787

Very high energy gamma rays from pulsars, considering implications of various gamma ray production processes
08 p1377 A69-19897

Cosmic gamma ray generation by Compton scattering in discrete sources, applying formulas to M87, Crab Nebula, M82, Cen A, Ngc 1275, and Cas A
08 p1377 A69-20053

Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes
08 p1396 A69-20686

Discrete source hypothesis for interpreting high energy cosmic gamma ray measurements obtained by OSO-3 spacecraft
08 p1380 A69-20699

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate
08 p1328 A69-21185

Cosmic gamma ray spectra from metagalactic proton-antiproton annihilation
09 p1574 A69-21459

Gamma ray scattering gauge design optimum parameters to measure Mars atmospheric density
09 p1495 A69-21842

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei
09 p1579 A69-22172

Centaurus constellation search for gamma rays using balloons, discussing radio and X ray luminosity
09 p1580 A69-22269

Compton scattering of microwave radiation on cosmic ray electrons proposed as mechanism generating 100 Mev cosmic gamma rays
09 p1580 A69-22295

Inverse compton scattering of far IR background radiation proposed as explanation of high energy gamma ray flux
09 p1580 A69-22296

Gamma ray luminosity of typical type I supernovae remnant computed by assuming Ni 56 radioactive decay energy origin of optical luminosity
09 p1581 A69-22409

Cosmic ray electrons and gamma quanta at lower atmosphere recorded with balloon equipment, plotting vertical profiles of electron energy spectra
10 p1758 A69-22830

Phonon interactions with recoilless gamma rays, considering usability of Mossbauer effect as probe for VHF acoustic experiments
10 p1724 A69-23088

High altitude balloon measurements of secondary gamma quanta intensity vertical distribution, using scintillation counter with CsI/Tl crystal
10 p1770 A69-23924

Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration
11 p1945 A69-24241

Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
11 p1946 A69-24466

Northern sky scan for discrete sources of gamma rays in 240 to 1000 kev energy region by telescope on balloon flight
11 p1946 A69-24593

Electron, proton and gamma ray radiation effects on thin film CdS, GaAs and CdTe solar cells
11 p1825 A69-24872

Lasers applied to simulation of effects of X ray or gamma ray bursts on semiconductor devices
11 p1896 A69-24877

Shrinkage and heat release of polyglycol maleinate binder during gamma radiation consolidation compared with thermochemical consolidation
12 p2117 A69-25991

X ray polarization from Sco X-1, noting spurious instrumental polarization due to cosmic ray anisotropy using X ray polarimeter
12 p2149 A69-26315

Gamma quanta produced during high energy nucleon-nuclei interaction of air atoms recorded with X ray film
13 p2303 A69-28376

High energy nuclear interactions in graphite block at high altitude, recording gamma quanta produced
13 p2330 A69-28377

Gamma quantum spectrum shape from high altitude X ray film and nuclear emulsion blackening, discussing high energy pion production
13 p2330 A69-28378

Primary electrons and gamma quanta generated electron photon cascades in Pb, obtaining error free cascade curves
13 p2304 A69-28416

Lunar surface gamma radiation observed by Luna 10 spectrometer, suggesting basalt-like minerals composition of lunar maria
13 p2333 A69-28635

Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons
14 p2514 A69-29948

Mortality kinetics of Drosophila melanogaster, comparing effects of gamma radiation-induced life shortening and natural aging
15 p2555 A69-30444

High energy gamma rays detection by balloon near geomagnetic equator, observing enhanced flux from galactic disk
15 p2675 A69-30695

Energetic gamma rays emission from radio source Cassiopeia A by high altitude balloon observations, using high resolution telescope
15 p2675 A69-30760

Electrical parameters measurement for homogeneous batches of planar silicon transistors subjected to cobalt 60 gamma rays, considering isochronal and isothermal annealing
15 p2625 A69-30827

Energetic gamma ray emission from Cygnus A and X-1, describing high altitude balloon telescope observation and gamma ray emulsion process
15 p2676 A69-30888

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off
16 p2850 A69-32308

Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung
16 p2852 A69-32806

Low level beta, X and gamma radiation detector incorporating Geiger, proportional and scintillation counting features in various modes suiting radionuclide decay scheme
17 p2975 A69-33747

Corrections to previous papers on extragalactic gamma rays, discussing effects on various cosmological models
17 p3025 A69-34168

Radiation resistant devices for minimizing neutron and gamma radiation effects on military electronic components, discussing selection features and sampling lot sizes
18 p3144 A69-34491

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
18 p3095 A69-34730

Instruments for gamma ray astronomy including Ranger low energy detector, howitzer detector and cosmic spark chamber
18 p3138 A69-35135

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate
18 p3152 A69-35154

Aircraft nucleonic fuel gauging system, using radioactive gas to emit gamma rays for fuel mass sensing
18 p3139 A69-35468

Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
19 p3251 A69-35694

Electron spin resonance spectra of gamma irradiated single crystals of 9-methyladenine, analyzing H abstraction radical and temperature effects

19 p3264 A69-35974

Free radicals destruction rates by gamma irradiation at 77 K measured as first order function of dosage, using electron spin resonance spectroscopy

19 p3265 A69-36376

Supralethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles

19 p3259 A69-36459

Electron and gamma quanta concentrations measurements by high altitude balloon, noting fluctuations at various altitudes

20 p3587 A69-37046

Gamma ray flux from processes associated with high energy electrons from pulsar NP 0532, noting light polarization

20 p3588 A69-37410

Gamma ray emission of meteorite of 25 April 1969 measured by scintillation spectrometry, attributing peaks to annihilation radiation, Cs 137, Mn 54, etc

20 p3590 A69-37571

Neutron activation analysis for oxygen determination in Be by gamma emission intensity from nitrogen 16, noting bound oxygen

20 p3544 A69-37811

Gamma radiation effects on behavior of nickel and cadmium electrodes in alkaline solution

20 p3466 A69-38072

NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes

20 p3512 A69-38271

X ray sources and diffuse background radiation observed in gamma and X ray spectral regions, considering electromagnetic waves attenuation by interstellar matter

21 p3789 A69-38817

X rays and gamma rays extragalactic components, calculating background component intensity for given model of universe

21 p3789 A69-38818

Nuclear gamma ray astronomy utilization for stellar interior detection, showing identification of key radioactive nuclei of supernova at explosion time

21 p3792 A69-39572

Survival rates of continuously cultivated *Chlorella* plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

22 p3876 A69-40275

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation

22 p3877 A69-40285

Solar flare optical, neutron and gamma emission, discussing ionization losses and nuclear interaction of accelerated particles in flares

22 p4003 A69-40296

Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance

22 p3992 A69-40574

Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory

22 p4006 A69-40641

Relative abundances U-235/U-238, Th-232/U-238, Pu-244/U-238 and I-129/I-127 at solar system formation time to obtain time evolution of gamma process nuclei

22 p3986 A69-40766

Restoration processes in *Chlorella pyrenoidosa* to distinguish intense and less intense gamma ray irradiations

22 p3878 A69-40792

Air ionization and beta and gamma dose rates measurements for natural radiation from cosmic rays compared to nuclear weapons tests fallout, considering biological effects

22 p4007 A69-40915

Nonresonant and resonant cross sections for gamma ray transitions involving isobaric spin mixed states in Be 8

22 p3987 A69-41043

Bacteriophage desoxyribonucleic acid (DNA) degradation by gamma irradiation in vitro by Co 60, discussing breaks, cross links and molecular weight

23 p4079 A69-41402

Exposure rate influence on mechanical properties of polymer binder cross-linked by gamma radiation exposure from cobalt isotope source

23 p4179 A69-41711

Viruslike particles in fat body cells and oenocytes of *Drosophila melanogaster* imagoes, in glial cells of cephalic ganglionic center of flies and in gamma irradiated cells

23 p4091 A69-42021

High energy astronomical diffuse radiation component properties tabulated, discussing power law and thermal X ray background, gamma rays, etc

23 p4207 A69-42319

Cross sections of charge carrier capture by ions in gamma irradiated P-Al-Si glass with metal oxides additions measured for evaluating radiation stability improvement

23 p4180 A69-42470

Gamma radiation effect on AgCl-Cu redox state in AgCl activated, heat treated Na-Al-B-Si glass, using EPR method

23 p4180 A69-42471

High energy gamma rays point source in Sagittarius indicated from evidence obtained by high altitude balloon flights

24 p4365 A69-42606

Solar high energy gamma ray flux abrupt increase detected by neutral particle plastic scintillators at balloon altitude

24 p4371 A69-43612

GANGLIA

NT NERVES

NT NEURONS

Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers

07 p1070 A69-18383

Morphological microchanges in solar plexus ganglia of white rats after X irradiation

12 p2019 A69-26347

Pathological changes in solar ganglia cells of white rats following X ray exposure, using electron microscope

21 p3659 A69-39064

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, showing antibody producing cells number increase

22 p3877 A69-40277

Electroretinogram a-wave relationship to early inhibition and excitation of retinal ganglion cells produced by flash superimposition in rabbits

22 p3878 A69-40836

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina

22 p3883 A69-40882

Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic T3/ramus communicans

23 p4084 A69-41460

GAPS

NT SPARK GAPS

Capacitors pi network representation of series gap in center conductor of matched coaxial transmission line

14 p2424 A69-29766

GARNETS

NT YTTRIUM-ALUMINUM GARNET

NT YTTRIUM-IRON GARNET

Polarized low temperature laser excited Raman spectra of thulium gallium garnet

02 p0256 A69-11925

Ce activated garnet crystals optical properties, noting IR and near UV absorption spectra and room and low temperature fluorescence

07 p1201 A69-19647

Alternative explanation of garnet composition in Coorara meteorite, giving probable formula

08 p1382 A69-19819

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence

08 p1374 A69-21186

Polycrystalline Ca-V garnets and Mg-Cr ferrites magnetic properties after adding rare earth elements

13 p2320 A69-27999

Magnetic properties of ferrites with garnet structure, discussing temperature effect on magnetic states of Gd, Li, Y and Lu sublattices

13 p2323 A69-28564

Single crystals garnets Raman spectra using laser radiation, separating phonon spectra of host lattices from electronic Raman effect

14 p2507 A69-29334

Flux grown magnetic garnet crystal internal defects analyzed by etching and Lang X ray transmission topography, revealing tubular structural deviations

16 p2825 A69-31692

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence

18 p3183 A69-35155

IR lattice spectra of rare earth Al, Ga and Fe garnets, discussing oxygen anion, translational rare earth cation and crystal lattice external motions

24 p4360 A69-42974

GAS ANALYSIS

NT OZONOMETRY

Planetary atmosphere composition determination using mass spectrometry for neutral components, ion spectrometry for ionic components and data system optimization

[AAS PAPER 68-183] 02 p0247 A69-11468

Mass spectrometer residual gas analyzer/RGA for identifying and measuring subliminated substances from spacecraft construction materials, noting applications during vacuum testing

02 p0227 A69-11758

Polymethyl methacrylate irradiated by laser in vacuum to study mechanism responsible for gas formation

02 p0270 A69-11980

Gas adsorption of molecular oxygen and hydrogen on molybdenum surface using collector section of field emission retarding potential analyzer

08 p1268 A69-20179

Residual gas analyzer and leak detector by time of flight measurements on neutral metastable atoms and molecules between pulsed electron gun and auger surface detector

13 p2262 A69-28006

Molecular flow network theory extended to pulsed operation with gases mixtures having various molecular weights

13 p2247 A69-28085

Automatic ultrasonic method for determining dissolved gases content in liquid sample, using increasing acoustic oscillations amplitude for bubble development

19 p3308 A69-35822

Calcium-rich achondrites age distribution determined from inert gas measurements and existing data of eucrites, shergottites and howardites

19 p3413 A69-36107

Computerized mass spectrometer for monitoring atmosphere in astronauts suits and cabin

[AIAA PAPER 69-1016] 22 p3922 A69-40388

Jet engine combustion temperature measurements by thermocouples or gas analysis noting errors involved

23 p4165 A69-41650

GAS BEARINGS

Gas flow analysis for externally pressurized porous journal gas bearing, considering circumferential flow in bearing clearance and porous bushing

01 p0085 A69-10312

Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems

02 p0254 A69-12426

Hydrostatic journal gas bearings calculations for carrying capacity, gas consumption and optimal dimensions for maximum lifting capacity

03 p0432 A69-12960

Digital computer program for gas bearing analysis, discussing Reynolds equation and numerical approximations

04 p0604 A69-14518

Stability of high speed rotors with sliding bearings

04 p0607 A69-15163

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor

[ASME PAPER 68-WA/LUB-4] 05 p0768 A69-16130

Pressurized fluid journal bearing with fluid fed into space between shaft and shell from plenum chamber in bearing housing through circumferential slots

06 p0931 A69-17529

Stability of hydrostatic gas bearings with large clearances

08 p1303 A69-20271

Gas bearings for spool gas generator for aircraft turbine engines, noting rotor bearing stability and LP spool balancing and seal leakage

[ASME PAPER 69-GT-60] 09 p1513 A69-22515

Rotating mirror turbine with air cushion floating shaft for use in streak and framing cameras, noting framing rate

12 p2085 A69-26156

Self acting gas lubricated bearings design procedures and comparison with oil lubricated bearings [ASME PAPER 68-LUBS-10]

13 p2265 A69-27267

Pressure distribution in finite width high speed self acting gas lubricated slider and partial arc bearings, noting trailing edge conditions and side leakage effects [ASME PAPER 68-LUBS-15]

13 p2265 A69-27268

Herringbone grooved gas lubricated journal bearing static and dynamic characteristics analyzed approximately, noting pressure distribution and vibration amplitudes [ASME PAPER 68-LUBS-7]

13 p2265 A69-27269

Matched asymptotic expansions to obtain slider bearing load carrying capacity [ASME PAPER 68-LUBS-18]

13 p2266 A69-27270

Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl [ASME PAPER 68-LUBS-25]

13 p2266 A69-27271

Flat disk squeeze film air bearing, determining motion of supported mass by computer program [ASME PAPER 68-LUBS-38]

13 p2266 A69-27272

Lubricant compressibility effect on spiral groove gas bearing load carrying capacity [ASME PAPER 68-LUBS-33]

13 p2266 A69-27274

Design optimization for gas lubricated spiral grooved spool bearing based on narrow groove theory, analyzing static and dynamic characteristics for motion in axial direction [ASME PAPER 68-LUBS-12]

13 p2266 A69-27276

Linearized theory for stability of self acting gas journal bearings with noncircular members and elements of flexibility and damping, noting three lobed rotor [ASME PAPER 68-LUBS-45]

13 p2266 A69-27277

Radial and polar load support of squeeze film gas bearing in form of sphere pulsating radially or moving along polar axis [ASME PAPER 68-LUBS-3]

13 p2266 A69-27279

Flat disk squeeze film air bearing, determining motion of supported mass by computer program [ASME PAPER 68-LUBS-35]

13 p2266 A69-27280

Externally pressurized gas lubricated journal and thrust bearings designs, citing reference literature [ASME PAPER 68-LUBS-8]

13 p2267 A69-27282

Externally pressurized gas lubricated bearings treated theoretically using unevenly distributed supercharging method, noting Reynolds equation numerical integration [ASME PAPER 68-LUBS-44]

13 p2267 A69-27283

Gas lubricated hybrid journal bearings with external pressure, noting load capacity and stability in steady state and dynamic analyses [ASME PAPER 68-LUBS-21]

13 p2267 A69-27284

Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate [ASME PAPER 68-LUBS-2]

13 p2267 A69-27285

Heat transfer between surfaces as secondary effect in gas bearing lubrication from analysis taking into account viscosity variation with temperature [ASME PAPER 68-LUBS-4]

13 p2267 A69-27286

Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film [ASME PAPER 68-LUBS-30]

13 p2267 A69-27287

Magnetic and electric fields influence on gas lubrication of bearings [ASME PAPER 68-LUBS-26]

13 p2267 A69-27288

Rate gyro life and reliability, discussing gas bearings separating rotor from stator by thin gas film with conventional oil film characteristics

15 p2608 A69-30410

Gas lubricated tilting pad thrust bearing analysis and performance, determining optimum hydrodynamic crown profile [ASLE PREPRINT 69AM 3C-2]

15 p2619 A69-30472

Power generating unit operating on air bearings

15 p2629 A69-31028

Self excited vibrations of rotors supported in gas bearings from analyzing solutions to equations of rotor motion

16 p2875 A69-32250

Pressure distribution in gas lubrication layer of infinite radial sliding bearings, approximating differential equation by simple formulas

23 p4168 A69-41412

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor [ASME PAPER 68-WA/LUB-4]

24 p4320 A69-43035

GAS CHROMATOGRAPHY

Leak flow rates of nitrogen and helium at various pressure gradients measured by gas chromatography and mass spectroscopy

01 p0079 A69-10297

Quantitative determination of phenolic content in composite materials by pyrolysis gas chromatography method

01 p0025 A69-11267

Propellants volatile fraction removal followed by gas chromatographical determination, noting use of heating method

02 p0302 A69-11522

Gas chromatography used to determine residual solid propellant stabilizers content and nitro derivatives, including thin film chromatography

02 p0303 A69-11528

Gas chromatography technique for separation and purification of chemical compounds for ionizing radiation detectors

02 p0249 A69-12011

Automatic equipment for sampling and preparing gases by dual column gas chromatography for subsequent mass spectral analysis of carbon isotopes during methane metabolism

02 p0205 A69-12603

Escherichia coli detection and differentiation from other bacteria by direct gas chromatographic analysis of culture media

03 p0382 A69-13550

Gas chromatographic determination of hydrocarbon quantity in methane in parts per billion range

03 p0382 A69-14115

Oil lubricant vapors under frictional working conditions in vacuum analyzed by mass spectrometer and gas-liquid chromatography concerning molecular weight and composition [IME PAPER 11]

07 p1137 A69-18558

Gas-liquid and thin layer chromatographic and nuclear magnetic resonance techniques to steric analysis of diketopiperazines

07 p1075 A69-19498

Reagent menthyl chloroformate use in optical analysis of asymmetric amino and hydroxyl compounds by gas chromatography

07 p1075 A69-19499

Quantitative gas-liquid chromatography of sulfur amino acids trimethylsilyl derivatives

13 p2217 A69-28259

Quantitative gas-liquid chromatographic analysis of nucleic acid components including purine and pyrimidine bases, nucleosides or nucleotides

13 p2217 A69-28260

Quantitative analysis for N-acetylneuraminic acid by gas-liquid chromatography using trimethylsilyl derivative

13 p2217 A69-28315

Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media

13 p2216 A69-28627

Life detection for space missions based on detecting optical asymmetry in biogenic molecules by gas chromatography involving diastereomeric esters synthesis

15 p2556 A69-31315

Sugars identification as trifluoethylacetyl polyol derivatives by gas-liquid chromatography

15 p2558 A69-31539

Gas chromatograph-mass spectrometer combination for in situ analysis of lunar organic matter, describing instrument design and operation

18 p3113 A69-34238

Gaseous diffusion coefficients during argon, krypton, oxygen and nitrogen diffusion into helium measured by gas chromatography

18 p3099 A69-34280

Heats of adsorption of carbon dioxide on silver //I/ oxide and copper //II/ oxide by gas chromatography

20 p3485 A69-38277

Acid fraction extraction of Green River shale identified by gas chromatography-mass spectrometry-computer system, noting trimethyl pentadecanoic acid

21 p3669 A69-38983

GAS COMPOSITION NT CARBON DIOXIDE CONCENTRATION

Volcanic gas from lava lake, noting carbon and sulfur gases depletion during cooling and solidification

02 p0236 A69-11466

Planetary atmosphere composition determination using mass spectrometry for neutral components, ion spectrometry for ionic components and data system optimization [AAS PAPER 68-183]

02 p0247 A69-11468

Optimum proportions of gas mixture components in He-Ne laser related to field distribution in cavity

03 p0441 A69-13847

Composition and thermodynamic properties of gaseous system reacting at low temperatures with condensed phase formation, discussing iterative process convergence in approximation

11 p2001 A69-25223

Gas particle concentrations on moon due to solar wind, surface emissions and atmospheric contamination by lunar operations and rocket motor products

18 p3189 A69-34236

Irreversibility resulting from composition changes in operating fuel cell anode and cathode chambers and cell geometry influence

18 p3093 A69-34781

Diverging nozzle flow of gas mixtures containing solid or liquid particles analyzed by one dimensional approximation separately averaging boundary layer and flow core

19 p3298 A69-36389

Negative ion influence on electrical conductivity of partially ionized multicomponent gas mixtures, basing analysis on thermodynamic calculations of composition

21 p3774 A69-38867

Digital computer program for determining alveolar and capillary blood gas compositions corresponding to ventilation-perfusion values, considering dissolved oxygen and inert gas exchange

22 p3875 A69-40230

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition

22 p3892 A69-40284

Book on flow equations for composite gases derived from Boltzmann equation, BGK approximation application, etc

24 p4299 A69-42766

GAS COOLED REACTORS

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity

18 p3171 A69-35181

GAS COOLING

Mass transfer cooling of high velocity surfaces in gaseous environment noting applications to atmospheric entry

13 p2377 A69-28146

Closed cycle gas cooling techniques for self contained CW kilowatt carbon dioxide laser, relating output power to flow velocity and input power

23 p4173 A69-41497

GAS DENSITY

Earth atmosphere air density and temperature profiles from drag acceleration measurements in falling sphere experiment

02 p0251 A69-12809

Ideal gas spectra and density fluctuations correlations calculated during Markovian and nonMarkovian wandering of particles

03 p0477 A69-13414

Stagnation point electrostatic probe measurements of flowing partially ionized high density monatomic gases

06 p0964 A69-17196

Nonadiabatic reacting homogeneous system undergoing density changes, predicting chemical reaction rates and intermediate combustion products from chain reaction kinetics [AIAA PAPER 69-87]

06 p1036 A69-18054

Pulsar distance estimates, discussing effect of interstellar electron and H densities and temperature dependence of H density-electron density ratio within disk

08 p1397 A69-20698

Gas transport coefficients dependence on density and temperature, noting experimental results for Ne and molecular N and H

08 p1353 A69-21009

Three body ionic recombination coefficient for moderate and high gas densities, taking into account variability in mean free path and trapping radii

09 p1542 A69-21624

Light polarization from stimulated Brillouin effect in compressed gaseous nitrogen, presenting depolarization variations as function of gas density and laser power

09 p1516 A69-21691

Intergalactic gas temperature and density reevaluated, considering neutral hydrogen distribution in galaxies peripheries and metagalactic background of ionizing UV radiation

11 p1946 A69-24589

Dense real gas thermodynamic relations in piston driven shock tube facilities operation

11 p1862 A69-25011

Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud

12 p2152 A69-25802

Pulsed laser holography used in conjunction with schlieren three dimensional system for observing gas density gradients at different test positions

12 p2088 A69-26179

Velocity distribution and density of neutral hydrogen in southern portions of M 31 and Sc-type galaxy M 33 by 75 m radio telescope

12 p2166 A69-27038

Shock wave gas flow density behind shock tube calculated by shadows measurements using interferometric techniques

13 p2245 A69-27384

Polytropic gas spheres static models integral characteristics by nonrelativistic generalized gravitation theory, noting central densities dependence on critical values

13 p2352 A69-27872

Simple fluids viscosity dependence on density analyzed by molecular theory, exemplifying with liquid argon

13 p2299 A69-28036

Constant density heating upstream and constant pressure cooling downstream formulas for radiating shock waves

13 p2249 A69-28240

Collision integral kernels of kinetic equation for single component gas density matrix derived by Bogoliubov-Gubov method

14 p2458 A69-29169

Expression relating gas density, radial velocity and temperature at comet nucleus surface to nucleus surface temperature, applying results to unsteady sublimation process

15 p2684 A69-30521

Final states of density, velocity and pressure in gas, comparing states reached after transition through single oblique hydromagnetic shock and two successive shocks

15 p2664 A69-31217

Conditions behind incident and reflected shock waves in shock tube calculated from initial pressure, density, temperature and shock speed

15 p2593 A69-31487

Q switched laser produced blast waves in low pressure Ar, discussing gas density and time dependence roles

16 p2796 A69-31705

Thick gas model for monochromatic one dimensional radiant flux near diffusely emitting and reflecting boundaries, discussing gray gas and exponential kernel approximations

16 p2769 A69-31871

Approximate expression for temperature dependent radiative heat flux in optically thin gas, considering reentry body hypersonic flight

16 p2877 A69-31892

Electron concentration and mass density behind reflected shock in ionizing argon, using time resolved two wavelength interferometry

16 p2771 A69-31918

Atmospheric gas constituents number densities determined as function of altitude by correlating laser beam scattering and absorption data

16 p2781 A69-32387

Upper atmospheric gas density and temperature distribution diurnal and seasonal variations calculated from satellites orbiting time changes

17 p2959 A69-32924

Galactic X ray sources density nearly proportional to interstellar gas density squared, discussing X ray intensities estimation, galactic age, etc

17 p3030 A69-33069

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight

17 p3069 A69-33136

Shock wave structure dissipation in gaseous medium with microscopic particle velocities asymptotically approaching light velocity

17 p2958 A69-34145

Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock

18 p3176 A69-34452

Gas dynamics in transition regime between continuum motion at high gas density and free particle motion at low density limit

19 p3300 A69-36658

Two dimensional unsteady motion of medium with pressure as linear function of density, analyzing gas expansion into vacuum

20 p3512 A69-36916

F region vertical density profiles for positive ions and neutral molecules of various gases determined from rocket-borne mass spectrometer data

21 p3702 A69-38354

Interstellar absorption of 10 A X rays from sources in Scorpio-Sagittarius region, noting gas density between earth and Crab Nebula

21 p3788 A69-38648

Rocket optical experiment for determining water, methane, nitric oxide and ozone vertical profiles in stratosphere and mesosphere

22 p4035 A69-39910

P-V-T surface of fluids in critical region by dielectric measurements, presenting saturation densities of oxygen

[NAS-NRC PAPER H-5] 22 p4050 A69-40623

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem

22 p3861 A69-41114

Metastable atom detection system for ground state atom beams, measuring Ar beam density five orders lower than background gas density

22 p3950 A69-41230

Gas concentration measurement during injection into laminar boundary layer streaming along porous plate, using quadrupole resonance mass spectrometer

23 p4058 A69-41695

Gas concentration liberated during each revolution in atmospheres of short period comets to explain impulsive forces upon nuclei, noting diatomic carbon density

23 p4221 A69-42387

Gas dynamic functions of axisymmetric supersonic gas flows determined using flow density distribution optical measurements

24 p4247 A69-43496

GAS DETECTORS

Leak detection techniques efficiency determined for airtight atmospheric air sampling devices used at low pressure and concentration

24 p4296 A69-42656

GAS DISCHARGE COUNTERS

U COUNTERS

GAS DISCHARGE TUBES

NT THYRATRONS

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser

02 p0255 A69-11611

Scaling laws for RF discharge experiments in ionized environments, considering proper limit variables for simulation of electron density

02 p0283 A69-12241

Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources

02 p0210 A69-12437

Gas discharge tubes and waveguide mounts as reference noise accuracy standards for S, C and X bands in WR284, WR137 and WR90 waveguides

02 p0210 A69-12439

Waveguide band transition noise of gas discharge source, discussing measurement methods for establishing excess noise ratio

02 p0212 A69-12461

Glass pleats and cold cathodes in laser discharging tube, discussing angular displacements

03 p0435 A69-12981

Parallel and coplanar Brewster angle grinding of maser tube ends

03 p0440 A69-13302

Equivalent pressure concept verification for arc discharge with incandescent cathode in mercury vapor

03 p0478 A69-13843

Absorption coefficients of plasmas in capillary discharge tubes, discussing measurement using gas laser light source

03 p0442 A69-14218

Electron gun with plasma cathode consisting of gas discharge chamber, electron ejecting component and focusing system

04 p0598 A69-14857

Display techniques, discussing cold cathode luminous gas discharge /plasmas/ tube, electroluminescence and cathode ray tube

04 p0600 A69-15029

Electron density measurement in rapidly varying plasma, using improved Mach-Zehnder interferometer

05 p0760 A69-15613

Continuous and pulsed lasing characteristics during discharge in pure oxygen noting ozone formation and removal at tube walls

06 p0932 A69-16923

Probe noise in quiescent plasmas investigated using back diffusion type discharge tubes producing low density plasmas and positive plasma columns

06 p0967 A69-17715

Helium-neon laser output power dependence on spark gap cross section geometry, analyzing diffusion equation and population inversion

07 p1147 A69-18541

Gas segregation in positive column of DC discharge due to axial ion motion analyzed using conservation equation

08 p1361 A69-20145

Striation formation during steady state glow discharge, noting origin in cathode interfacial positive ions

09 p1545 A69-21343

Cathode material effects on temperature coefficients for glow discharge tubes, noting running voltage pressure characteristics

09 p1468 A69-22602

Gas laser output increase by nonconstricted discharge in aluminum tube cathode with mirror resonator

09 p1520 A69-22681

Xenon pulse discharge plasma temperature distribution, spectral brightness density and light absorption across quartz tube section, noting temperature drop near wall

10 p1742 A69-24081

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser

11 p1895 A69-24718

Plasma rotation by Lorentz force in homopolar gas discharge device, considering centrifugal forces effect on flow pattern

13 p2315 A69-28556

Microwave oscillations in low pressure arc noting long gas discharge in small transverse dimensions

14 p2489 A69-28739

Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure

14 p2457 A69-28929

Pulsed HF discharge analysis in hydrogen based on laser light scattering at plasma electrons, noting presence of satellites

14 p2451 A69-29781

AC ignitor priming of quartz-chlorine gas discharge X band waveguide limiter with fast recovery used as radar receiver protector

15 p2573 A69-30035

Ion nitride hardening of Mo-Ti alloy at 1300 degrees C in cathode glow discharge tube

15 p2637 A69-30212

Argon electric arc axis temperature measurements, showing current and tube diameter ratio dependence

15 p2662 A69-30977

Gas discharge tube graphite hollow cathode geometry leading to abnormal discharge operation under certain pressure conditions

16 p2814 A69-31838

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion

21 p3735 A69-38693

GAS DISCHARGES

NT RING DISCHARGE

Long lived low level chemiluminescence due to gaseous reactions at low concentrations induced by mercury lamp irradiation or Tesla coil discharge

01 p0024 A69-10618

Deuterium plasma evolution and creation modes obtained by short pulse laser discharge in gases, discussing detonation and phase wave ionization mechanisms

02 p0288 A69-12040

Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources

02 p0210 A69-12437

DC argon arc electrical and thermal parameters and optical properties at high pressure, using spherical anode

02 p0291 A69-12482

Gas parameters in collisionless region during discharge into vacuum, considering plane and axisymmetric cases and free molecular boundary region

02 p0234 A69-12583

Laser produced sparks in 200 kG magnetic field in air, butane and helium at atmospheric pressure

02 p0260 A69-12659

Positive Ar ion energy distribution for beam extracted from nonmagnetic hot cathode gas discharge ion source under various source conditions

03 p0427 A69-13102

Contact phenomena theory in decaying plasma applied to deionizing mercury vapor diode gas discharge plasma diagnostics

03 p0404 A69-13547

Xe gas discharge plasma resistivity dependence on current density measured in large tubular flash lamps

03 p0478 A69-13846

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation

03 p0480 A69-14052

Frequency dependences of induced HF and high pressure discharge parameters, noting optimal frequency range independence from particular gas and gas flow rate

03 p0481 A69-14144

Cascade acceleration of plasma by two stage device noting plasma dispersion, plasma losses and highest final plasma velocity

03 p0482 A69-14215

HF gas discharges, discussing plasma temperature and density, plasmoid length and spectroscopic applications

03 p0482 A69-14217

Microwave excited argon discharge emission spectrum analysis, suggesting possible laser action in microwave discharges

04 p0609 A69-14346

High speed shadow photographs of Q switched laser triggered spark gap air discharge, showing sonic waves and development of discharge channel

04 p0610 A69-14349

UHF discharge plasma, electron distribution over bound states and ionization stages

04 p0634 A69-14442

Toroidal gas discharge in waveguide by coupling of microwave power into gas to heat gas, noting plasma confinement

[IMPI PAPER A4]

04 p0636 A69-14999

High repetition rate pulsed illuminator using electrodeless halogen discharge for rapid light extinction

04 p0599 A69-15021

Inelastic collisions effect on electron energy distribution in low temperature diffusion dominated discharges

04 p0637 A69-15047

Electron density variation in region of change of regime in gas discharge excited by HF capacitance and external electrode

04 p0637 A69-15060

Pressurized spark gap triggered by focused Q switched laser beam introduced along axis

04 p0612 A69-15204

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma

04 p0639 A69-15369

Electron distribution function effect on microwave emission and HF conductivity of weakly ionized discharge plasma

05 p0799 A69-15734

Similarity between characteristics of T layers in oxygen discharge positive column and Gunn instabilities in GaAs, noting role of negative O ions

05 p0800 A69-15739

Hydrogen molecular action in vacuum UV region during high current discharge

05 p0771 A69-15814

Gas lasers involving gas-discharge collisions, selective pumping or chemical reactions to produce necessary inversion, giving theoretical analysis of excitation mechanisms

05 p0772 A69-16226

Time resolved measurements, microwave interferometer and pulsed double probe for studying collision dominated plasma expansion in inductive HF He discharge

05 p0804 A69-16535

Qualitative mechanisms to explain Langmuir paradox, discussing wall mechanism for Maxwellian distribution formation in low pressure discharges

06 p0960 A69-16922

Radial electron concentration profile determination by spectroscopic examination of continuous plasma radiation of pulsed discharge in capillary

06 p0964 A69-17253

Secondary emission and hollow cathode effects in low pressure hot cathode thyatron filled with hydrogen and with shield surrounded thermionic cathode

06 p0896 A69-17475

Zeta discharge in low density regime characterized by strong turbulence, rapid loss of plasma, resistance higher than predicted and high ion temperature

06 p0970 A69-17955

Gas lasers principles of operation, discussing population mechanism, lifetime conditions, excitation processes, electron velocity distribution and types of discharges

06 p0937 A69-18008

Sonic boom reduction devices, discussing supersonic electroaerodynamic flow with shock waves, gas discharge one dimensional continuum analysis, power expenditure and aerodynamic interaction

[AIAA PAPER 69-38]

06 p0869 A69-18150

Spectroscopic investigation of emission of air plasma in HF electrodeless plasmatron, analyzing near IR, UV and visible spectra

07 p1191 A69-18995

Nonsaturated gain of laser radiation in gas discharge in carbon dioxide with N and He

07 p1151 A69-19060

Electron acceleration in microtron through injection from low pressure gas discharge plasma

08 p1279 A69-19803

Harmonic generation in microwave gas discharge in pure and air mixed gases, noting rare gases failure in power source applications

08 p1283 A69-20177

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel

08 p1366 A69-20788

Transition probabilities in repetitively Q modulated HCN maser radiation dependent on gas discharge current

09 p1516 A69-21626

Laser radiation produced by continuous glow discharge within Al hollow cathode, determining laser power in terms of He-Ne mixture pressures

09 p1519 A69-22245

Formation and acceleration of luminescent current layer in Z pinch discharge, noting density and electron mean free path in cold gas

09 p1552 A69-22397

Velocity and temperature influence on discharge characteristics of K seeded argon plasma flow at 1 atm pressure

10 p1733 A69-23449

Argon discharges in metal capillary cathodes noting effects of electron density, flow velocity, electrode phenomena and gas temperature

10 p1733 A69-23450

Low voltage He-Ne laser, noting outputs for various pressures and grid anode separations

10 p1704 A69-23652

Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions

10 p1739 A69-23660

Charge transport in high pressure RF glow discharge in air at atmospheric pressure based on model plasma

10 p1740 A69-23662

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam

11 p1933 A69-25542

Neutral gas flow transport velocity and Mach number effects on critical electric field strength and direction in formation of self sustained discharge

11 p1933 A69-25545

Ar plasma diagnostics in pinch-discharge laser, determining electron temperature by spectroscopy and measuring plasma conductivity and ion concentration and temperature

11 p1933 A69-25548

Continuous polarized electron beam produced from spin conversion in ionizing reactions involving optically pumped metastable atoms in He discharge

12 p2130 A69-26312

Spontaneous emission of carbon dioxide lasers, studying emission in Second Positive System of nitrogen as function of discharge current and laser output power

12 p2105 A69-26316

Temperatures and densities of atoms and electrons from spectroscopic methods in gas discharge plasma used for CW ion-argon lasers, evaluating inversion mechanism

12 p2106 A69-26319

Nanosecond time variations in current-voltage characteristics of gas discharge in air, taking into account discharge circuit resistance and discharge space capacitance

12 p2137 A69-26534

Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters

12 p2107 A69-26540

Laser interferometer determining spatial distribution of neon metastable state in He-Ne active discharge, discussing lens effects

12 p2108 A69-26636

Soviet papers on physics of gas discharge plasma covering helical discharges, plasma jets, flame discharges, etc

12 p2139 A69-27121

Steady helical discharges /skin effect/ in air and Ar under high pressure without gas injection, discussing discharge stability factors

12 p2140 A69-27122

Parameter measurement technique for low pressure helical pulse plasma discharges, determining spatial distribution of HF electric and magnetic fields and current density

12 p2140 A69-27124

Electrodynamic model applicability to HF flame discharge for case of flame discharge stabilization by axial air injection

12 p2140 A69-27126

Dense plasma jets in flowing HF flame discharges, discussing energy balance and longitudinal and radial temperature distribution

12 p2140 A69-27127

Field distribution in HF flame discharges by measuring electrical and geometrical parameters of discharge channel

12 p2140 A69-27128

Oscillator parameter matching to flame discharge parameters to obtain optimal power for powering flame discharge for plasma jet source

12 p2140 A69-27129

Numerical solution to partial differential equations describing helical discharge in Ar with gas injection, discussing initial temperature distribution and radial distribution effects

12 p2141 A69-27131

Electric field frequency effect on cyclotron resonance during gas discharge, establishing causes of discrepancy between theory and experiments

13 p2315 A69-28577

Interaction between shock tube gas discharge plasma and fast electrons ionized stationary gas, noting luminous discontinuities propagation

14 p2490 A69-28998

Laser emission field effect on discharge current in pure carbon dioxide and mixtures with molecular N and He

14 p2458 A69-29161

Balance equations for axial separation in anisothermic plasma columns with radial variation of neutral gas temperature applied to argon discharge with mercury vapor addition

14 p2493 A69-29690

Moving striations relations to ion acoustic waves in DC discharge in neon at various pressures, discharge currents and measurement excitation modes

14 p2494 A69-29695

Time of flight mass spectrometers for plasmoids generated by theta pinch and discharge over organic glass, showing ion and electron currents oscillograms

14 p2498 A69-29813

HO₂ radical detection in rarefied H flame produced by HF discharges, recording high amplitude signals

15 p2716 A69-30054

Semiautomatic recording device to determine gas discharge ion and electron sources operation modes optimum parameters

15 p2658 A69-30237

Plasma three electrode source ion-optical characteristics, noting beam angular divergence dependence on spacing between discharge cavity and intermediate electrode

15 p2658 A69-30240

Induced high pressure HF discharge parameters computed for Ar, O and N by using electrical and thermal conductivity functions

15 p2662 A69-30976

Radiative luminescence of gas discharge plasmas in channel with substantial radial heat transfer determined from energy balance measurement

15 p2662 A69-30978

Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing

electron-electron interaction insufficient to maintain equilibrium

16 p2796 A69-31772

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma

16 p2822 A69-32116

Transition probability for 5577 Å auroral green line determined from measuring number density of O atoms in oxygen-helium discharge and emitted line intensity

16 p2781 A69-32319

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation

18 p3181 A69-35045

He-Ne laser discharges noise and oscillations classified, investigating interaction between intrinsic oscillations

19 p3338 A69-36605

Ion density, electric field and electron temperature responses to gas density perturbation calculated for acoustic wave propagation in gas discharge using hydrodynamic equations

20 p3578 A69-38243

He-Ne laser heterodyne system for measuring dispersion at 6328 and 6401 Å due to Ne metastable atoms in gas discharge

23 p4172 A69-41397

IR radiation transmission in pulsed carbon dioxide discharge as function of time, proposing pumping and relaxation mechanism model

23 p4174 A69-42196

Electron density in positive column of Cs vapor discharge related to current and gas pressure, discussing field strength effects on drift velocities

23 p4196 A69-42197

Moving striations dispersion and stability theory applied to ionization waves excited in Ar, Ne and Hg-Ar mixture low and medium pressure discharge

24 p4356 A69-43363

Anode fall measurements with Langmuir probe in coaxial arcs in Ar compared with anode energy balance values

24 p4256 A69-43695

GAS DISSOCIATION

Intermolecular interaction potentials for dissociating air components determined by calculating collision integrals for very high temperature gases

02 p0283 A69-11586

Dissociation and recombination of moderately complex molecules, using master equation with transition probabilities and decay rates obtained from reaction rates statistical theory

02 p0283 A69-12181

Dissociative velocity rates of oxygen and ozone in ionosphere obtained by exponential approximation for molecular concentration distribution

02 p0246 A69-12769

Reduction of optical breakdown threshold in laser focus by superimposed microwave field

03 p0441 A69-13997

Dissociating gas as working fluid for space plant, noting role in radiator area reduction

04 p0551 A69-15313

Time dependence of laser output in C and N atoms following dissociative excitation transfer explained in terms of measured populations of excited states

05 p0795 A69-15663

HF plane sound waves in ideal gases with internal dissipation, considering particular applications to dissociating diatomic and vibrational relaxing gases

05 p0792 A69-15723

Three atom interaction contribution to nonideal dissociating gas state equation, determining quantum correction for third virial coefficient

05 p0796 A69-15893

Photoelectric absorption studies on molecular nitrogen indicate predissociation contributing to atomic nitrogen production in upper atmosphere

05 p0756 A69-16282

Recombination constants of dissociated oxygen and nitrogen flow in supersonic nozzle at high temperatures using modified Bray method

06 p1030 A69-17349

Ice nucleus formation in developing comet, discussing dissociation and vaporization characteristics of parent molecules as participants in process

06 p1004 A69-17537

Laminar boundary layer on axisymmetric blunt body in dissociated air taking into account nonequilibrium homogeneous chemical reactions

07 p1050 A69-18734

Laminar boundary layer flow on sphere in hypersonic flow of equilibrium dissociating air

07 p1050 A69-18756

Laser induced gas breakdown by focusing nanosecond pulses in air and deuterium [IEEE PAPER U-3]

07 p1155 A69-19085

Early phase of Stromgren sphere development in interstellar molecular hydrogen cloud, analyzing R-type dissociation-ionization fronts using quasi-steady flow

07 p1218 A69-19281

Dissociation-ionization fronts in interstellar molecular hydrogen clouds, analyzing effects of UV radiation from early stars

07 p1221 A69-19584

HF breakdown of air using Boltzmann equation to determine net ionization frequency relation with electric field strength

08 p1357 A69-20810

TiO gas dissociation energy data discrepancies, discussing high temperature vaporization and thermodynamic properties

08 p1268 A69-21012

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere

09 p1590 A69-21376

Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator

09 p1441 A69-21840

Nonequilibrium three dimensional boundary layer over slightly yawed cone analyzed for air dissociation and ionization parameters, noting binary scaling application

09 p1430 A69-21965

Multicomponent diffusion coefficients of dissociated air as function of pressure, temperature and concentration, based on simplified model of binary diffusion

09 p1623 A69-22098

D type dissociation ionization front structure and associated shock fronts using quasi-steady flow approximation for Stromgren sphere development in interstellar molecular hydrogen cloud

10 p1772 A69-22858

Equilibrium dissociating gas laminar flow in circular tube calculated for heat transfer and hydraulic resistance, using boundary layer equations

10 p1679 A69-23426

Laser light scattering in radiation driven breakdown waves in He, using high resolution streak photography to obtain diagnostic data

11 p1915 A69-24420

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

11 p1873 A69-25226

Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters

12 p2107 A69-26540

Breakdown in air produced by picosecond mode locked laser pulses showing evidence for self focusing

13 p2270 A69-27196

Hayashi effect modifications due to high opacity stellar atmosphere or presence of molecular hydrogen dissociation zone, discussing pressure dissociation role

13 p2342 A69-27594

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom/molecule collisions, deriving kinetic equations for energy level changes

13 p2302 A69-27797

Carbon dioxide dissociation by electron impact, determining reaction rate in positive column of DC glow discharge

14 p2488 A69-29095

Enhanced plasma heating in absorption zone of laser-induced gas breakdown at spherical blast wave shock front

14 p2460 A69-29604

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time

14 p2492 A69-29636

Molecular dissociation by line radiation absorption, applying results to hydrogen molecules in H I region dissociated by photons of mean interstellar UV radiation field

15 p2693 A69-30783

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region

15 p2548 A69-31065

Carbon dioxide dissociation relaxation times measured in shock tube at 1900-2400 K and 1.5-2.5 km/sec

16 p2766 A69-31910

Laser induced gas breakdown covering breakdown mechanism and plasma expansion and decay, with bibliography

17 p2980 A69-33026

Exact similarity solutions of hypersonic small disturbance equations for steady flow, discussing equations of state and motion and dissociating gas flow [AIAA PAPER 69-707]

17 p2953 A69-33448

Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock

18 p3176 A69-34452

Br molecular dissociation rate in argon excess determined, considering visible emission intensity behind shock front

18 p3176 A69-34465

Population inversion in carbon dioxide laser related to pumping frequency, discussing molecular dissociation effect in gas mixture

18 p3151 A69-34620

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere

18 p3198 A69-34764

Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing hydrogen horizontal transport and hydrogen compounds dissociation as causes

18 p3129 A69-34956

Ionization effects in hydrodynamic model of radiation driven breakdown wave propagation, obtaining wave velocity and absorbed laser flux density relationship

18 p3174 A69-35286

Difference method for parabolic differential equations solution for Rayleigh boundary layer in dissociating gas, using integral estimates to determine stability

18 p3124 A69-35295

Sulfur hexafluoride dissociation in argon at various temperatures and pressures, using shock tube techniques to determine unimolecular parameters

18 p3100 A69-35475

Nonequilibrium laminar boundary layer of dissociating air on axisymmetric body determined using concentration profiles of oxygen and nitrogen components

19 p3239 A69-36395

Nonequilibrium laminar heat transfer in viscous flow of chemically unstable gases past blunt body and plate

20 p3513 A69-37087

Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature

20 p3514 A69-37208

Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field

20 p3555 A69-38067

Molecular oxygen rate of dissociation resulting from absorption in Schumann-Runge bands, calculating effects on chemistry of lower thermosphere and upper mesosphere

20 p3534 A69-38089

Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit

21 p3650 A69-38384

OH emission rise after sunset and decay at sunrise attributed to strong solar dissociation of ozone

21 p3712 A69-38520

Electrical excitation discharge effect on molecular composition of flowing carbon dioxide gas laser, noting dissociation characteristics

21 p3736 A69-38940

Laser induced multiphoton ionization and cascade breakdown in high pressure gases, considering roles of refractive index, laser nonideal output and beam self focusing

21 p3738 A69-39445

Thermal dissociation of chlorine trifluoride behind incident shock waves as function of temperature using UV absorption spectroscopy

21 p3670 A69-39739

Vibration relaxation time and dissociation rate constant of carbon dioxide in high temperature shock waves, using IR emission

21 p3775 A69-39801

Methyl alcohol, ether and acetone vapors decomposition in microwave discharge, obtaining H and CO in addition to solid polymeric films

22 p3895 A69-40103

Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate

22 p3927 A69-40583

Dissociation energy and ionization potential measured for gaseous SiO and GeO

22 p3896 A69-40725

- Dissociational nonequilibrium transonic flow near nozzle throat analyzed for diatomic gas with equilibrium vibrational energy, using perturbation method
22 p3861 A69-41177
- Nonequilibrium boundary layer of dissociated diatomic gas over catalytic flat plate in hot hypersonic uniform flow
22 p3934 A69-41181
- Carbon monoxide dissociation at high temperatures observed spectroscopically, finding complex reaction chain with diatomic C as intermediate
23 p4113 A69-41692
- Model for human hemoglobin dissociation into subunits taking into account molecular explanation of oxygen dissociation curves
23 p4097 A69-42096
- Hemoglobin O reaction model explaining molecular weight and oxygen dissociation curve dependence on hemoglobin concentration
23 p4097 A69-42097
- Atomic spectrophotometry to monitor O atom formation rate behind shock waves in oxygen-argon mixtures, noting dissociation over 2850-5550 K temperature range
23 p4194 A69-42209
- Blast wave energy determination of laser-induced gas breakdown in hydrogen, nitrogen, helium, argon and xenon in pressure chamber
24 p4299 A69-42651
- Reaction broadening in hydrogen-oxygen diffusion flame for slow hydrogen dissociation, using matched asymptotic expansions
24 p4408 A69-42920
- Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role
24 p4351 A69-43033
- Molecular vibrational relaxation effect on dissociating airflow behind shock wavefront, giving relations to chemical reaction rates in diffusion approximation
24 p4302 A69-43486
- Viscous shock wave chemical relaxation for diatomic nonequilibrium dissociating gas flow, using Navier-Stokes and chemical kinetics equations
24 p4302 A69-43487
- GAS DYNAMICS**
NT AERODYNAMICS
NT AEROTHERMODYNAMICS
NT HYPERSONICS
NT RAREFIED GAS DYNAMICS
NT ROTAR AERODYNAMICS
- High velocity motions in diffuse nebulae connected with stellar wind, noting wind formation of 2-layer shell between two shocks
01 p0148 A69-10050
- Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories
01 p0174 A69-10110
- Cooled probes for gas measurements in high pressure arc jets, hyperthermal wind tunnels, rocket motors, scramjets and similar severe environments
01 p0078 A69-10150
- Book on mathematical and physical fundamentals of molecular gasdynamics based on statistical mechanics, discussing free molecular flow
01 p0060 A69-10711
- Very high temperature air flow laminar boundary layers on rotating bodies with unsteady chemical reactions, determining flow dynamic behavior
01 p0060 A69-10725
- Difference schemes stability for solving linearized gasdynamic equations obtained by representing transition matrices in form of two matrix sum
01 p0060 A69-10729
- Electrohydrogasdynamic analogies to known MHD effects studied by differential equations for hydrodynamic and electric field energy relations
01 p0131 A69-10775
- Electromagnetic fields effect on turbulent boundary layer characteristics of compressible fluid on insulating wall of MGD channel
01 p0131 A69-10777
- Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations
01 p0007 A69-11070
- Krook kinetic relaxation equation generalized to include approximate kinetic equations with velocity independent collision frequency
02 p0234 A69-12582
- Radiation due to collective effects in plasma physical aspects of astrophysics, discussing synchrotron radiation and bremsstrahlung
02 p0310 A69-12792

Nonlinear weak shock wave diffraction around convex angled corners in polytropic inviscid thermally nonconducting gas
03 p0412 A69-12848

Gas dynamic choking limitation on heat transfer capacity of heat pipe operating at low vapor pressures from comparison of theory and experiment
03 p0531 A69-12989

Supersonic flow region about blunt body calculated on basis of gasdynamic equations for steady flow of inviscid nonheat conducting gas
03 p0363 A69-13658

Ideal gas flow near stagnation line for blunt bodies, applying van Dyke series truncation method to numerical solution
03 p0364 A69-13660

Flow rate effect on flow pattern of gas escaping through lateral hole of arbitrary depth
04 p0586 A69-14274

Anisotropic nonlinear wave propagation in arbitrarily moving ideal gas, using singular surface/ray combined theories
04 p0630 A69-14532

Effect of dipole/dipole resonance interaction between excited and nonexcited atoms on gas thermodynamic properties, showing unstable quasi-molecules formation
04 p0632 A69-14551

Monograph on radiation gas dynamics, thermal radiation, applied spectroscopy and ablation and applications in high speed atmospheric entry
04 p0685 A69-14597

One-dimensional self similar motion of relaxing gas, noting ODEs of process and gas dynamic parameters of flow field
04 p0588 A69-14623

Nongray radiation absorption coefficients reformulation employing alternative angular moment averaged absorption coefficients with emission/Planck/
04 p0686 A69-14744

Soviet book on shock waves in real gases covering gas flow patterns in shock tube, perturbations, shock and detonation wave reflection, etc
04 p0589 A69-14937

Two dimensional unsteady flow of inviscid polytropic gas using analysis of similarity solutions in homentropic flow
04 p0590 A69-15191

Soviet book on gas dynamics of solid fuel rocket motors covering combustion chamber flow, nozzle and thrust characteristics, pressure relaxation and channel charge
04 p0647 A69-15493

Thermistor assembly apparatus for measuring coefficient of thermal conductivity of pure and binary mixture of gases
05 p0845 A69-15616

Hyperbolic double waves found in compressible flow problems, presenting method of plotting all waves and determining geometrical characteristics
05 p0751 A69-16646

Supersonic gas dynamics variational problems concerning determination of axisymmetric minimum drag
05 p0699 A69-16675

Electrohydrodynamic gas flow in one dimensional approximation for transition through speed of sound, discussing flow parameters profile and dynamic efficiency
06 p0964 A69-17326

Arc phenomena and gas dynamic effects during shock heated plasma interaction with magnetic field
07 p1188 A69-18273

Steady two dimensional MHD flow in finite region of aligned fields
07 p1188 A69-18274

Gasdynamic flow shock wave phenomena during exploding wire dwell time inside metal vapor cylinder, noting effect on reignition
07 p1188 A69-18275

Gas dynamics effects of hot spot in explosive gas mixture using kinetic rate equations, discussing composition, enthalpy and time dependence [WSCI PAPER 68-53]
07 p1240 A69-18322

Initial stage of motion in Rayleigh problem, calculating time variable velocity of tangential stress on and velocity of gas near plate
07 p1118 A69-18701

Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field
07 p1215 A69-18706

Optimum profile of supersonic nozzle with nonequilibrium flow
07 p1119 A69-18737

Gas dynamic shock wave entry into magnetic field, discussing field distribution behind shock front and diffusion and medium motion effects on penetration depths
07 p1192 A69-19022

Neutral hydrogen distribution and dynamics in galaxies, discussing observations by spectrographic transit telescope, data processing and profiles
07 p1224 A69-19711

Wavelike photodissociation of gas molecules under quasi-monochromatic pulsed radiation, investigating associated supersonic disturbances
08 p1354 A69-19950

Frozen shock in steady one dimensional compression flow of relaxing gases weaker than equilibrium shock
08 p1304 A69-20785

Two fluid kinetic model for analyzing shock wave structure in binary mixtures of monatomic inert gases, noting no overshoot in velocity profiles
08 p1304 A69-20813

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
09 p1587 A69-21359

Energy transfer in gases transmitting heat by interaction of thermal conduction and IR radiation
09 p1621 A69-21442

Book on dynamics and thermodynamics of gas at hypersonic velocities and extremely high altitudes
09 p1483 A69-22400

Steady compression waves properties in relaxing gases found independent of thermodynamic behavior and relaxation process
10 p1631 A69-22893

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation
10 p1760 A69-23136

Laser applications to high temperature, gas dynamical and plasma phenomena
10 p1741 A69-23809

Hydrodynamic equations and conservation laws for nonviscous fluid in post-Newtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability
10 p1789 A69-24130

Stroboscopic generator of trains of high brightness light flashes for hydrodynamic and gas dynamic research, noting electronic control and thyatron circuits
11 p1879 A69-24235

Boltzmann equation for system of equations governing evolution of gas of identical particles with discrete velocity distribution, applying Chapman-Enskog method
11 p1921 A69-24325

Characteristic frequencies approximation formula for gas bubbles in liquids compared with exact solutions
11 p1915 A69-24582

Existence and completeness of eigenfunctions for boundary value problem arising in theory of small amplitude motions of stratified polytropic gas
11 p2081 A69-24884

Boltzmann H theorem and related mathematical topics, noting applications to subsonic gas flow and continuum flow around and over body
11 p1870 A69-25008

Dense real gas thermodynamic relations in piston driven shock tube facilities operation
11 p1862 A69-25011

Gas dynamics for supersonic nonequilibrium flows, discussing method for determination of nozzle contours for maximum thrust
11 p1820 A69-25475

Unsteady gas dynamics of explosions and detonation systems performance
11 p1876 A69-25595

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence
12 p2061 A69-25880

Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations
12 p2011 A69-26191

One dimensional stationary flow of medium consisting of charged and neutral components within electrohydrodynamic limits in AC and DC electric fields
12 p2135 A69-26398

Diffusion-stabilized difference schemes for inviscid compressible flow equations in conservation form for arbitrary number of space dimensions
12 p2062 A69-26624

Gasdynamic stability of detonation shock wave in case of arbitrary heat evolution kinetics using detonation model
12 p2062 A69-26672

Two dimensional flow of conducting gas dynamic and electrical parameters in MGD generator channel, considering magnetic field and plasma conductivity
13 p2305 A69-27386

Monograph on gasdynamics and classical theory of shock waves covering viscosity, heat conduction, gas cloud expansion into vacuum, etc
13 p2246 A69-27639

Flux, density and pressure variations with position in vacuum system /nonuniform gas distribution/, discussing causes and consequences
13 p2299 A69-28019

Dynamic gas flowmeter for ultrahigh vacuum based on transmission characteristics of diffuser screens and associated pressure drops
13 p2263 A69-28087

Flow field instability over concave bodies in supersonic free stream computed by integration of gasdynamic equations, noting application to supersonic parachutes [AIAA PAPER 68-946]
13 p2199 A69-28228

Plasma jets from MPD accelerators, analyzing swirl, entrainment and pressure distribution using gasdynamic probes
13 p2313 A69-28242

Reservoir conditions of reflected shock wind tunnel by subjecting gas to direct shock and shock reflected at closed downstream end of shock tube
13 p2243 A69-28359

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation
13 p2250 A69-28447

Turbulent jets of gases in general stream of air spreading in cylindrical chamber, discussing distributions of gas dynamic parameters
13 p2200 A69-28501

Completeness theorem for integrodifferential operator to establish Schwarzschild criterion for stability of gaseous masses
14 p2470 A69-28902

Transport coefficient density expansions obtained from time correlation functions in moderately dense gas with short range repulsive intermolecular forces
14 p2540 A69-29469

Difference schemes for quasi-linear hyperbolic equations, with applications to three dimensional supersonic flow past bodies
14 p2430 A69-29475

Gain and loss collision integrals in Boltzmann equation for rigid sphere gas evaluated for distribution expressed as linear combination of Maxwellians
14 p2431 A69-29578

Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients
14 p2492 A69-29610

Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy
14 p2390 A69-29616

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies
14 p2391 A69-29620

Kinetic theory of gases collision cross section definition compared to usual definition, discussing time reversed collisions
14 p2488 A69-29993

Oscillatory relaxation of multiatomic gases and gas mixtures with quantum exchange between oscillators, noting gasdynamic applications
15 p2654 A69-30109

Gasdynamic model of comet nucleus region, discussing molecular collisions, surface brightness distribution and dust particle motion
15 p2684 A69-30520

Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods
16 p2771 A69-32003

Book on quasi-linear equations systems and application to gasdynamics, including problems involving systems of quasi-linear hyperbolic equations with two independent variables
16 p2771 A69-32113

Trails arising in wake of fan type jets in transverse gas flow during uniform fuel-air mixture combustion
16 p2879 A69-32140

Book on gas dynamics of two phase media for thermal power engineering equipment, discussing phase transformations, condensation in high velocity flows, etc
17 p2948 A69-32951

Radiation gas dynamics in shock tube, studying radiation coupled flows with flow field affected by radiant energy transport
18 p3116 A69-34447

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
18 p3197 A69-34749

Nonlinear differential equations for nonequilibrium gases with internal degrees of freedom, considering spatially homogeneous gas and oscillatory relaxation in harmonic oscillators
18 p3122 A69-34911

MHD flow, deriving equation system and boundary conditions for gas dynamic process
18 p3181 A69-35054

Computer programs determining gaseous properties and aerodynamic characteristics for missiles, reentry vehicles and spacecraft at angles of attack
18 p3107 A69-35068

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation
18 p3231 A69-35325

Hydrodynamics of gas flow due to solar flares using point explosion model, determining shock wave travel time to earth orbit
18 p3189 A69-35397

Gas dynamics of interactions of tenuous ionosphere with moving satellites and diagnostic probes, using collision-free plasma kinetics methods
18 p3132 A69-35409

Gas dynamics equations solution applied to Cauchy problem
19 p3297 A69-35861

Gas dynamics of explosions - IAA Conference, Brussels, September 1967
19 p3448 A69-36351

Gas dynamics of material slab under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency
19 p3449 A69-36355

Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations
19 p3450 A69-36356

Detonation in unbounded gas mixture starting from spherical flame, discussing stability of gasdynamic discontinuities and cellular structure
19 p3450 A69-36358

Gas dynamics in transition regime between continuum motion at high gas density and free particle motion at low density limit
19 p3300 A69-36658

Comet heads gas dynamics, analyzing coma or head region as continuum source flow of dusty gas
19 p3428 A69-36807

Soviet book on theory and design of turbocompressors covering gas dynamic cascade theory, thermodynamics and aerodynamics, viscous gas flow, etc
20 p3459 A69-37238

Equilibrium and stability of axisymmetric gaseous polytropes in toroidal magnetic fields, calculating harmonic oscillations by virial tensor method
21 p3797 A69-38534

Galactic gaseous disk dynamics, considering interstellar gas behavior and cosmic ray-magnetic field instability
21 p3802 A69-38824

Blast angle effect on fanjet gas dynamics in crosswind, using equations for free lateral flow trajectories and reverse flow regions
21 p3850 A69-38863

Invariant transformations for hodograph matrix equations in gas dynamics
21 p3695 A69-39001

Chemical processes responsible for transformation of vast gas and dust cloud into planetary system
21 p3804 A69-39200

Closed cycle MHD with gaseous working fluids and steady state nonequilibrium ionization
21 p3777 A69-39479

Gas dynamic processes during vaporization of solid material under Nd laser emission, using high speed photography
21 p3740 A69-39551

Dynamics of viscous electrically charged gas using Navier-Stokes equation
22 p3931 A69-40686

Two dimensional gas dynamics differential equations for simple waves, discussing invariant solutions and conditions for group solutions
22 p3933 A69-41030

Kinetic processes in gases and plasmas covering molecular transport equations, transport coefficients, chemical reactions as collision processes, etc
23 p4193 A69-41511

Integro-interpolation difference schemes for gas dynamic equations system satisfying laws of mass, momentum, energy conservation and energy balance
23 p4151 A69-41527

Gaseous self gravitating mass equations applied to galactic evolution and star formation
23 p4213 A69-41716

Parametric differentiation applied to radiation gas dynamics equations solution, considering energy transfer by thermal radiation in high speed reentry [AIAA PAPER 68-668]
23 p4059 A69-41892

Detonation wave instability and damping in gas containing liquid or solid inflammable aerosol, considering atomized propellants
23 p4240 A69-42339

Class of one dimensional nonlinear waves and shock structure reduced to steady flows in radiation gas dynamics
23 p4240 A69-42466

Magnetic field implications in stellar formation mechanism including gravitational collapse, magnetic gas cloud fragmentation and stellar winds magnetic braking
24 p4378 A69-42699

Gas flow past bodies, deriving solution method without partial differential equations for flows with momentum potential
24 p4244 A69-43071

Gas dynamic functions of axisymmetric supersonic gas flows determined using flow density distribution optical measurements
24 p4247 A69-43496

GAS EVACUATING
U EVACUATING [VACUUM]

GAS EVOLUTION
Polymethyl methacrylate irradiated by laser in vacuum to study mechanism responsible for gas formation
02 p0270 A69-11980

Gas vacuoles development in blue green algae by cell transfer from defined medium to distilled water
10 p1644 A69-23184

Electrolytic hydrogen evolution reaction on Al covered by thin oxide in aqueous buffered acetate solutions
11 p1832 A69-25674

Free gas formation in propellant systems and effects on attitude control systems [AIAA PAPER 69-434]
16 p2870 A69-32765

Gas products evolved from selected thermal control coating materials during UV radiation in vacuum, noting permanent reflectance loss [AIAA PAPER 69-640]
17 p2992 A69-33289

Gas concentration liberated during each revolution in atmospheres of short period comets to explain impulsive forces upon nuclei, noting diatomic carbon density
23 p4221 A69-42387

GAS EXCHANGE
Biological life support system for regenerating closed atmosphere by photosynthesis, using gas exchange between man and microalgae
01 p0021 A69-11078

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia
03 p0377 A69-14204

Pulmonary capillary gas exchange and venous admixture model and inclusion into respiratory system model, discussing pressure and concentration gradients, pathological effects, etc
07 p1068 A69-19482

Weightlessness effects on human external respiration, gas exchange and energy expenditure indices during flight of Voskhod 2
12 p2020 A69-26563

Compensative adaptational reactions to weightlessness, discussing blood supply to thorax area, external respiration, gas exchange and energy loss during parabolic and orbital flights
17 p2909 A69-33384

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects
17 p2910 A69-33751

Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model
21 p3662 A69-38388

Respiratory gas exchange during workloads, comparing values for ventilation, oxygen uptake and carbon dioxide output measured in air and in helium-oxygen mixture
22 p3891 A69-40221

Lower body negative pressure /LBNP/ effects on ventilation and lung volumes, presenting lung model for pulmonary gas exchange changes
22 p3891 A69-40222

Human lung ventilation-perfusion scatter decreasing gas exchange efficiency during high altitude adaptation
22 p3875 A69-40227

Digital computer program for determining alveolar and capillary blood gas compositions corresponding to ventilation-perfusion values, considering dissolved oxygen and inert gas exchange
22 p3875 A69-40230

Aircraft passenger cabins pressure safety limits estimating factors, discussing human respiratory gas exchange mechanism, pressure drop and smoking effects, etc
24 p4269 A69-43411

Isotopic exchange reaction rate between O 18 and CO in shock tube coupled to time of flight spectrometer, noting rate increase with time
24 p4353 A69-43807

GAS EXPANSION

Polar wind, describing upward plasma expansion of topside polar ionosphere and acceleration of positive H and He ions
01 p0077 A69-11239

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
02 p0292 A69-12557

Laval nozzle resistance as result of friction and under expansion of gas, noting flow and pressure recovery coefficients
03 p0361 A69-12967

Chemical rockets theory for case of chemical equilibrium and frozen nozzle expansions
03 p0495 A69-13004

Idealized cycle of gas expansion machine with regenerator for cooling radio components
04 p0687 A69-15164

Nonsteady expansion of gas into vacuum in analysis of asymptotic solutions of Sedov
05 p0751 A69-16676

Numerical calculation of density profiles of shock waves in expansion flows
06 p0908 A69-17021

Shock wave profiles in expansion flows determined with static and impact pressure probes, investigating pressure gradient effects
06 p0908 A69-17022

Dynamics of Q spoiled neodymium laser created plasma expanding in vacuum magnetic field
06 p0970 A69-17952

Mach number distribution along axes of under-expanded supersonic jets measured in wind tunnel experiments
07 p1050 A69-18922

Stationary supersonic nonequilibrium plasma source in gas vacuum expansion and nozzle flows
07 p1191 A69-18986

Expanding atmospheres in OB supergiants from radial velocity measurements, proposing tentative temperature and velocity fields
08 p1387 A69-20091

Expansion tube modification incorporating nozzle plate at secondary diaphragm for reducing flow nonuniformity and contamination
[AIAA PAPER 68-371]
09 p1477 A69-21960

Impurity concentrations in expansion tube flow, measuring radiation intensities
[AIAA PAPER 68-371]
09 p1477 A69-21961

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator
10 p1636 A69-23103

Size and velocity measurements of particles suspended in gas expanding from nozzle into vacuum simulating cometary two phase flow with evaporation
10 p1674 A69-23686

Gravitational stability of spheroidal expansions of rotating gas masses in astronomy, noting mechanism for fragmentation in cosmology
11 p1962 A69-25112

Optical and spectral properties of dense plasma expanding after exploding electric wire in vacuum using high speed photography
12 p2137 A69-26533

Rotating central disk in galactic plane observed by radio telescope, assessing relation between expanding gas of disk and high velocity stream from center
12 p2163 A69-27018

Soviet book on liquid fuel rocket engines design covering gas expansion in nozzles, mixture formation, heat transfer, injectors and supply systems
12 p2148 A69-27078

Relaxing gas nonequilibrium flow in plane expansion, comparing partial differential equations with method of characteristics
13 p2244 A69-27322

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density
[AIAA PAPER 69-328]
13 p2200 A69-28263

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
15 p2658 A69-30254

Laser radiation absorption by inhomogeneous over-dense plasma, discussing effects of plasma expansion on energy coupling efficiency
16 p2818 A69-31679

One dimensional free expansion of collisionless plasma tested as function of thermal equilibrium and confinement, using Vlasov equations and computer
16 p2819 A69-31685

Fixed mass of monatomic gas unsteady spherically symmetric expansion into vacuum by asymptotic Boltzmann equation expansion
16 p2772 A69-32168

Steady Prandtl-Meyer expansion of shock heated gases for recombination studies, measuring static pressure, stagnation point heat transfer, IR emission and optical absorption
18 p3228 A69-34466

Subsonic and supersonic turbulent air jets expansion over perpendicularly positioned plane disk obstacle, deriving equations for pressure distribution and stagnation temperature
18 p3123 A69-34990

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem
19 p3241 A69-36721

Two dimensional unsteady motion of medium with pressure as linear function of density, analyzing gas expansion into vacuum
20 p3512 A69-36916

Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635]
20 p3631 A69-37188

He and Ar arc-heated flows into reservoir and expansion in converging-diverging supersonic nozzles, considering flow equilibrium effect on heat transfer and enthalpy
20 p3631 A69-37198

Flame pressure drop and burning velocity related, discussing stream tube area expansion error
21 p3849 A69-38806

Pneumatic Vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature
21 p3785 A69-39093

Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method
22 p4000 A69-40594

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients
23 p4146 A69-41547

Transonic expansion analysis applied to flow through convergent-divergent nozzles with small throat radius of curvature, noting coordinate system selection
23 p4060 A69-41906

Computer calculation of adiabatic expansion of air, allowing for specific heat ratio and compressibility factor changes
24 p4244 A69-43088

Volatile wall vaporization gas flow expansion into vacuum from tube approximating unsteady mass and energy transfer and pressure at blocked end
24 p4408 A69-43489

GAS EXPLOSIONS

Continuous and time-resolved absorption and emission spectra studies produced by exploding wires in

gases, discussing effects of environment, pressure and electrical energy
01 p0118 A69-10664

Detonation wave initiation in gaseous media, noting transition process for flames accelerating to detonation and explosions behind reflected shock wave
02 p0350 A69-11530

Detonation characteristics of gaseous explosives using equations of state for real gases, noting compressibility effect in mixture of hydrocarbons, O and N
05 p0848 A69-16337

Explosive combustion of hydrogen at high pressures, showing attainment of constant value of hydrogen peroxide
05 p0849 A69-16611

Electromagnetic field induced energy and momentum changes effects on pressure, temperature and particle velocity of flows behind propagating gaseous detonation waves
[AIAA PAPER 69-44]
06 p0970 A69-18084

Gas pressure variations behind autonomous stable detonation fronts in propane-O mixtures, noting effect of diameter tubes and initial pressures
08 p1421 A69-20757

Hot inert gas bubble thermal stability in cool reactive liquid
11 p1998 A69-24475

Explosive reactions between hydrogen and oxygen flashed in presence of nitrogen dioxide, chlorine or bromine as sensitizers, considering thermal contribution
11 p1832 A69-24878

Nova thermal explosion, analyzing hydrogen combustion after penetration from white dwarf shell into degenerate core
15 p2682 A69-30507

Monograph on spreading of explosive vapor/air mixtures during aircraft fueling, covering underlying flow technology principles
15 p2551 A69-30930

Shock waves propagation in inhomogeneous gases, considering time development and energy flux during point explosion in plane layers by quasi-stationary approximation
17 p2952 A69-33383

Wave motion nonsteadiness influence on detonation front thickness using quasi-steady kinetic model of induction process, discussing agreement with experimental observations
17 p2952 A69-33403

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model
19 p3449 A69-36353

Continuous explosion laser study of stationary detonation waves to determine conditions leading to partial population inversion and critical population density
19 p3336 A69-36360

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave
19 p3451 A69-36366

Detonation wave in gaseous media, current theories on wave initiation, structure and propagation
19 p3452 A69-36370

NT VERTICAL AIR CURRENTS

Rib positioning effect on mechanical behavior of cantilevered rectangular plate in gas flow, considering critical flow velocities and rigidity relationships
01 p0165 A69-10085

Heat transfer between arc column and discharge chamber wall of vortex linear plasmatron, using approximate similitude method
01 p0125 A69-10091

Gas combustion stability with respect to one dimensional perturbations, considering flow compressibility stabilizing effect
01 p0174 A69-10107

Combustion response of hydrazine-nitrogen tetroxide hypergolic rocket propellants to transverse gas flows, noting coupled and uncoupled oscillations
01 p0175 A69-10112

Cooled probes for gas measurements in high pressure arc jets, hyperthermal wind tunnels, rocket motors, scramjets and similar severe environments
01 p0078 A69-10150

Hypersonic flow of nonequilibrium diatomic gas on and near wedge, studying shock curvature variations
01 p0005 A69-10161

Gas flow analysis for externally pressurized porous journal gas bearing, considering circumferential flow in bearing clearance and porous bushing
01 p0085 A69-10312

Pressure measurements by gauges in rarefied gas flows past bodies of various shapes, discussing configurations effect on gauge readings
01 p0080 A69-10358

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle
01 p0006 A69-10379

Algorithms for three dimensional supersonic gas flow incident on bodies applied to calculating oxygen flow in asymmetric nozzle
01 p0060 A69-10724

Two dimensional compressible inviscid laminar gas flows unsteady processes studied by extending method of characteristics
01 p0008 A69-11360

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-cesium pressure
02 p0285 A69-11570

Pressure to density ratio to analyze one dimensional high temperature gas flows with heat transfer, considering motion equations
02 p0350 A69-11576

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer
02 p0188 A69-11651

Soviet book on hypersonic internal and external three dimensional viscous and nonviscous gas flow, emphasizing flow past slender blunted bodies
02 p0230 A69-11775

Gas flow model of coaxial electromagnetic plasma gun front profiles and speeds for operation with positive central electrode
02 p0288 A69-12032

Nonstationary wing motion in gas stream near solid surface, analyzing differential equation for acceleration potential
02 p0188 A69-12134

Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm
02 p0232 A69-12354

Longitudinal short wave stability in conducting quasi-one dimensional gas flow, considering regions of high thermal emission
02 p0233 A69-12487

Boundary layer local densities in high temperature gas flows obtained by measuring monochromatic soft X rays attenuation in layer
02 p0233 A69-12489

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques
03 p0363 A69-13657

Similarity motion of fluid particles in one dimensional gas flow, establishing limits of slip factor value change
03 p0419 A69-13920

Laminar and turbulent flow measurement in variety of tube diameters, using ring laser without insertion of mechanical probe
04 p0596 A69-14281

Dynamic processes of heat and mass transfer in transpiration cooling of gas flow
04 p0684 A69-14355

Difference approximation with second order accuracy of numerical solution for parabolic type equations
04 p0622 A69-14618

Numerical algorithm for supersonic gas flow past blunt bodies with shock wave separation, using Dorodnitsyn method of integral correlation
04 p0587 A69-14621

Quasi-neutral, steady, inviscid and nonheat conducting flow of conducting gas with high magnetic Reynolds number in plane channel with transverse magnetic field
04 p0636 A69-14984

Transverse magnetic field effect on three dimensional nonisothermal lubrication layer of conducting gas at small magnetic Reynolds number
04 p0607 A69-14990

Approximate hydrodynamic equations applied to analysis of heat transfer in real gas flow in tube, taking into account energy transfer by radiation
04 p0686 A69-14993

Steady plane supersonic gas flows with large number of shocks computed on basis of weak solutions of hyperbolic system
04 p0544 A69-15284

Axial deviation of gas flow resulting from mixing turbulent gas jets
04 p0591 A69-15411

Heat transfer between body and gas flow near stagnation point
04 p0544 A69-15412

Shock wave damping at large distances from body situated in ideal gas three dimensional flow
04 p0591 A69-15535

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
05 p0801 A69-15787

Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces
05 p0802 A69-15789

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile
05 p0748 A69-16090

Heat transfer in turbulent pipe flow of radiating optically thin gas in circular tube
[ASME PAPER 68-WA/FE-11]
05 p0847 A69-16121

Thermal transpiration for performance prediction and development of gas pump
[ASME PAPER 68-WA/ENER-4]
05 p0706 A69-16162

Gas flow rate predictions for long and short tubes and annuli and at densities between laminar continuum and free molecular regimes
[ASME PAPER 68-WA/PID-5]
05 p0750 A69-16166

Electroaerodynamics /EGD/ engineering, discussing generators and compressors
05 p0804 A69-16586

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas
05 p0699 A69-16673

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities
05 p0699 A69-16674

Stability of three layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear
05 p0843 A69-16683

Nonisentropic simple waves in two dimensional steady flow of ideal gas
05 p0752 A69-16687

Approximate method for calculating subsonic gas flows in curvilinear channels for gas admission control in arc welding
06 p0908 A69-16828

Numerical calculation of density profiles of shock waves in expansion flows
06 p0908 A69-17021

Shock wave profiles in expansion flows determined with static and impact pressure probes, investigating pressure gradient effects
06 p0908 A69-17022

Stagnation point electrostatic probe measurements of flowing partially ionized high density monatomic gases
06 p0964 A69-17196

One dimensional unsteady flows of combustible gas mixture with finite chemical reaction rates, considering piston motion, igniting shock wave propagation and point explosion
06 p0909 A69-17325

Linear theory of equilibrium and nonequilibrium gas flows applied to steady two dimensional nonequilibrium flow of inviscid nonheat-conducting gas
06 p0909 A69-17327

Stream function approximation for plane axisymmetric vortex free transonic inviscid gas flow
06 p0910 A69-17336

Surface roughness influence on interaction between gas flow and solid surface for case of diffuse and specular reflection, noting role of inclination angle
06 p0910 A69-17342

Kinetic boundary value problem of gas flow over plane wall with constant mass-velocity gradient
06 p0910 A69-17346

Hot gas flows turbulence linear component intensity and frequency spectrum using optical measurement of pulse velocities
06 p0926 A69-17540

Three dimensional steady/unsteady flows of conducting inviscid gas in magnetic field, in absence of electric field, solving related Cauchy problem
06 p0966 A69-17541

Dynamic behavior of three layer plates in supersonic gas flow
06 p1024 A69-17552

Aspiration psychrometric probe for measurements of relative humidity of gas-vapor phase of gas flow containing liquid droplets
06 p0927 A69-17689

Transmittance and absorption cross sections of carbon particles suspended in flowing stream of nitrogen gas
06 p1034 A69-17804

Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere
06 p0861 A69-17812

Thermal nonequilibrium of unsteady adiabatic gas flow in nonheat conducting tube with open ends
06 p0911 A69-17813

Air film cooling of rotating turbine disk, suggesting applicability to gas flows
06 p1034 A69-17814

Transmission and reflection coefficients of cylindrical tubes moving in free molecular gas flow determined by Monte Carlo method
06 p0911 A69-17877

Turbulent premixed flames stabilization, determining gas flow velocity, turbulence intensity, flame thickness and burning velocity relation to intensity
06 p1035 A69-17931

Three dimensional boundary layer problems analyzed by exact numerical method
[AIAA PAPER 69-138]
06 p0911 A69-18041

Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow
[AIAA PAPER 69-117]
06 p0913 A69-18106

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators
[AIAA PAPER 69-112]
06 p0971 A69-18140

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation
[AIAA PAPER 69-136]
06 p0864 A69-18141

Fluidic vortex valve warm gas flow control for rocket application
[AIAA PAPER 69-118]
06 p0872 A69-18147

Weakly ionized gas flow past discontinuous wall potential used to study edge effects and interaction problems for single and multiple flush electrostatic probes
[AIAA PAPER 69-80]
06 p0972 A69-18191

Free turbulent mixing, emphasizing flowing gas mixtures with and without chemical reaction
[AIAA PAPER 69-31]
06 p0915 A69-18223

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion
07 p1118 A69-18540

Exact partial solutions to transonic gas flow equations used to describe flow around shape streamlined by supersonic flow with additional shock wave
07 p1118 A69-18698

Mixed sub- and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction
07 p1050 A69-18739

Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities
07 p1120 A69-18754

Ellipsoidal gas bubble dissolution in low viscosity fluid, discussing rate of steady motion, deformation degree and diffusion rate
07 p1120 A69-18990

Rise velocity of large gas bubbles in liquid calculated, assuming velocity is determined by propagation of bubble produced wave disturbance
07 p1120 A69-18999

Spherical particle motion in vortex gas flow between planes of turbulence chamber perpendicular to axis of flow rotation, noting collisions effect
07 p1181 A69-19000

Two dimensional flow of conducting fluid in channels with longitudinal transverse magnetic field and

Hall effect, discussing gas motion equations linearization
07 p1192 A69-19015

Energy transfer through ionospheric electrons, discussing degradation of fast electrons and role of neutral gas motion in ionospheric currents
07 p1128 A69-19369

Collimated nozzle beam for probing low density gas flows, discussing transition from free molecular to isentropic flow and Knudsen numbers
07 p1136 A69-19467

Flowing CO-N-He laser with power enhancement and high efficiency, noting role of gases
08 p1324 A69-20163

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution
08 p1251 A69-20322

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium
08 p1412 A69-20324

High speed photographic study of finely dispersed Al particles combustion and ignition in high temperature gas flows, noting dependence on oxidizers concentration
08 p1375 A69-20341

Kine films of gas flows within highly luminous transient arc taken by laser schlieren technique
08 p1316 A69-20615

Gas flows in close binary systems of dwarf stars
08 p1396 A69-20648

Boundary layer separation and vortex street buildup conditions of gas flow in circular cylinder wake
08 p1252 A69-20713

Behavior of bounded and free arc discharges under action of transverse magnetic fields and gas flows
08 p1366 A69-20767

Jet engine gas flow, temperature, velocity and pressure measurements by analog and digital systems
08 p1316 A69-20869

Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
09 p1577 A69-21769

Arc driven shock tube with alumina ceramic liner to reduce driver gas contamination, noting shock speed and test time increase
[AIAA PAPER 68-366] 09 p1570 A69-21957

Steady axisymmetric gas flow from galactic center, determining supersonic to subsonic transition by equations of motion
09 p1599 A69-22189

Differential equation for droplet motion along ballistic trajectory in gas flow, noting applicability to solid bodies via computer programming
09 p1483 A69-22222

Wall temperature and Prandtl number effects on turbulent boundary layer thicknesses and shape factors for subsonic compressible gas flow over flat plate
[ASME PAPER 69-GT-55] 09 p1432 A69-22513

Frequency effects in laser with nonlinearly absorbing gas cell inserted in resonator, noting self stabilization of generation frequency
09 p1520 A69-22661

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature
10 p1677 A69-22894

Subsonic channel flow of frictionless barotropic gas through oscillating grid, investigating perturbation velocity field and aerodynamic forces on airfoils
10 p1631 A69-22905

Multidimensional theory of characteristics found applicable to calculating three dimensional time dependent gas flows
10 p1632 A69-22913

Weak discontinuities in wave propagation, studying ionized gas nonsteady flow having electrical conductivity in magnetic field
10 p1727 A69-22916

Carbon dioxide laser combining gas flow with fluid mixing to achieve high gain
10 p1701 A69-22954

General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas
10 p1727 A69-23096

Self similar solutions for collapse of empty cylindrical cavity in gas with given equation of state, describing gas motion past cavity
10 p1679 A69-23367

Existence and uniqueness to boundary layer continuation problem based on flow equation for steady gas flow
10 p1679 A69-23569

Finite difference technique for numerical computation of steady supersonic two dimensional gas flows, with or without diffusion normal to mean flow streamlines
10 p1679 A69-23595

Nozzle flow temperature patterns of relaxing combustion gases compared at different temperatures and pressures, using kinetic-chemical calculations
[DVL-896] 10 p1809 A69-23644

Ionized gas flow from globule containing atomic H in interstellar space, noting surrounding H II region and radiation at ionization front
10 p1782 A69-23682

Invariant transformation of equations for ideal gas plane steady motions, noting application to gas flows with shock waves and eddies
10 p1680 A69-23709

Second approximation of asymptotic damping of disturbances in viscous heat conducting gas supersonic flow about solid of revolution at critical velocity
11 p1817 A69-24627

Binary gas flow past curved body for stationary problem studied by solving Boltzmann equations in form of matched asymptotic expansions
[ONERA-TP-694] 11 p1867 A69-24753

Viscous effects of wall boundary layer behind primary shock wave on flow in shock tube, noting pressure and temperature changes
11 p1870 A69-25010

Small scale oscillations stability in quasi one dimensional conducting gas flow with longitudinal superimposed magnetic field, noting radiation role in transverse oscillations development
11 p1928 A69-25222

Nonorientable five channel adapter with spherical measuring head for three dimensional gas flow measurement, noting sensitivity to mechanical disturbances in calibration
11 p1888 A69-25340

Aerodynamic forces causing deformation and breakup of liquid droplet with ellipsoid of revolution form in constant velocity gas flow
11 p1875 A69-25466

Motion equations for ideal transonic gas flow, applying solutions to flow with incident shock waves of various profiles
11 p1820 A69-25468

Free transonic gas flow incident on symmetrical profile at angle of attack with given velocity at infinity calculated using difference scheme
11 p1820 A69-25469

Supersonic gas flow past plane and axisymmetric bodies with broken generatrix, determining tangential discontinuities and shock waves shape and position
11 p1820 A69-25470

Hypersonic viscous gas flow past thin bodies, deriving equations for interactions between boundary layer and external flow
11 p1820 A69-25472

Self similar axisymmetric and plane laminar viscous gas channel flows noting exponential or hyperbolic law of decrease in static pressure along channel
11 p1875 A69-25482

Neutral gas flow transport velocity and Mach number effects on critical electric field strength and direction in formation of self sustained discharge
11 p1933 A69-25545

Inviscid reacting flow free of molecular transport analyzed locally near stagnation point, using Lighthill-Freeman gas model
11 p1876 A69-25560

Three dimensional gas flows near characteristic surface extended over homogeneous polytropic gas at rest
11 p1876 A69-25729

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas
12 p2061 A69-25887

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows
12 p2061 A69-25889

Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations
12 p2011 A69-26191

Exhaust gas recirculation for VTOL aircraft
[AIAA PAPER 67-439] 12 p2013 A69-26760

Rotation curve peculiarities of Sc type galaxy NGC 3432 ascribed to noncircular gas motions
12 p2164 A69-27024

Gasdynamic phenomena during subsonic or supersonic motion of isothermal gas under action of gravitational forces in flattened axisymmetric galaxy containing spiral density waves
12 p2170 A69-27065

Shock wave gas flow density behind shock tube calculated by shadows measurements using interferometric techniques
13 p2245 A69-27384

Two dimensional flow of conducting gas dynamic and electrical parameters in MGD generator channel, considering magnetic field and plasma conductivity
13 p2305 A69-27386

Electric arc and hydrogen flow interaction at high pressure, showing radiation role in heat exchange
13 p2305 A69-27387

Current, magnetic field, flow velocity and plasmatron dimensions effects on arc voltage in coaxial plasmatron
13 p2306 A69-27388

Refractory ceramic materials thermal stability in high temperature subsonic ionized gas flow products, emphasizing zirconia and magnesia
13 p2285 A69-27472

Velocity, enthalpy and mass flux radial distributions in laminar boundary layer from calorimetry of argon subsonic flow
[ASME PAPER 68-HT-16] 13 p2374 A69-27776

Turbulent diffusion and Rayleigh-Taylor instability in inhomogeneous flow of combustion gases circulating through magnetic field
13 p2310 A69-28032

Molecular gas flows in containers for space environment simulation, discussing flux distribution
13 p2241 A69-28081

Electric arc structure in hydrogen magnetic annular discharge computed using nonequilibrium hydrodynamics to analyze supersonic and subsonic processes
13 p2312 A69-28221

High pressure AC arc heater system design criteria, discussing magnetic field, chamber gas flow, stabilizing elements, etc
[AIAA PAPER 69-348] 13 p2243 A69-28283

Turbulent jets of gases in general stream of air spreading in cylindrical chamber, discussing distributions of gas dynamic parameters
13 p2200 A69-28501

Spatial distribution patterns of gaseous argon atoms scattered from solid argon surface
13 p2300 A69-28658

Variational problems associated with supersonic gas flows with foreign particles, considering nozzle designs
14 p2389 A69-28801

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile
[ASME PAPER 68-WA/FE-11] 14 p2430 A69-29446

Shock wave and blunt faced cylinder interaction in supersonic gas flow in two chamber shock tube observed with high speed photography
14 p2390 A69-29467

Transonic ideal gas flow past semiinfinite bodies, determining flow potentials from body perturbations and surface boundary conditions
14 p2390 A69-29476

Supersonic gas flows in shock layer past blunt bodies taking into account selective radiation and radiative transfer in continuum, applying method of characteristics
14 p2390 A69-29477

Direct simulation Monte Carlo method for hypersonic rarefied gas flow past solids, modeling on digital computer
14 p2390 A69-29580

One dimensional unsteady monotonic Maxwellian gas flow at small Knudsen numbers using Hilbert method, noting validity for shear flows
14 p2432 A69-29611

Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model
14 p2390 A69-29614

Quasi-steady state supersonic gas flow past two closely spaced coaxial separating bodies at different velocities, showing dependence on separation rates
14 p2391 A69-29617

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies
14 p2391 A69-29620

Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time
14 p2391 A69-29622

- Shock wave velocity and gas flow parameters in shock tube with noninstantaneously opening diaphragm calculated by method of characteristics
14 p2432 A69-29623
- Electrical conductivity ratio of weakly ionized turbulent gas to quiescent gas as function of electron temperature
14 p2502 A69-29991
- Turbulent gas flow characteristics obtained by extremal hypothesis, using maximum perturbation stability in formulating variational problem and computer algorithm
15 p2590 A69-30263
- Gas flow deflection at centrifugal pump wheel outlet for wheels having different inlet and outlet vane angles
15 p2547 A69-30571
- Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet
15 p2592 A69-30986
- Heat release rate during gas combustion products recombination in supersonic nozzle, using graphic interpolation of flow parameters
15 p2717 A69-30987
- Mass transfer during Cs condensation from moving vapor mixture containing Ar in water-cooled tube
15 p2718 A69-30998
- Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region
15 p2548 A69-31065
- Wind tunnel investigation of turbulent gas flow heat transfer and hydrodynamic drag in variable pressure gradient field of divergent-convergent channel
15 p2548 A69-31173
- Gas ducted flow at subsonic inlet velocity and critical outlet Reynolds numbers, proposing surface friction relation to Mach number
16 p2771 A69-31956
- Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components
16 p2732 A69-32126
- Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow
16 p2837 A69-32139
- Oscillations and stability of cylindrical shell in gas flow taking into account inertia forces
16 p2875 A69-32287
- Monograph on solutions to equations for unsteady flow of ideal gases, with applications to hypersonic flows, based on three space coordinates and time
16 p2773 A69-32428
- Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 16 p2844 A69-32723
- Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics
17 p3010 A69-32865
- Shock detachment distance for flow around cylinders and spheres determined by microphotometric tracing of negatives of photographs of forward stagnation streamlines
17 p2949 A69-32962
- Temperature jumps at gas-solid interface in shock tube calculated by one dimensional approximation of thermal boundary layer behind reflected shock wave
17 p2949 A69-33023
- Axisymmetric supersonic gas flow with attached shock wave past cone, calculating flow parameters between body and shock wave
17 p2890 A69-33123
- Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc
17 p3070 A69-33142
- Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution
17 p2891 A69-33312
- Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium
17 p3058 A69-33317
- Nonlinear rarefied gas flow problems with thermal nonequilibrium solved by numerical methods, considering intermolecular collisions effect
17 p2952 A69-33325
- Turbulent gas coaxial mixing theory, deriving eddy viscosity model and semiempirical expressions for velocity, temperature and density fluctuations
[AIAA PAPER 69-682] 17 p2952 A69-33434
- Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations
17 p3035 A69-33627
- Flow rate effect of oxygen-argon mixture on Zr oxidation studied to determine exclusion as factor in Zr weight increase
18 p3154 A69-34272
- Fluidic sensor for measuring gas and liquid velocities, describing design and principles of operation
18 p3133 A69-34308
- Superposition method for predicting tube wall temperatures with gas property and heating rate axial variation, noting application to gas flow problems
18 p3227 A69-34315
- Simple waves in compressible isentropic flows of inviscid nonheat-conducting gas free of shock waves
18 p3121 A69-34534
- Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
18 p3181 A69-35038
- Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces
18 p3181 A69-35040
- Integral relation method analysis of supersonic gas flow past blunt body of revolution
18 p3086 A69-35051
- Dynamic pressure pulsations, temperature distribution and gas concentrations in discrete vortices zone in wake of plate in unbounded flow
18 p3124 A69-35120
- Asymptotic solution of supersonic linearized noneisotropic flow of viscous and heat conducting gas with internal heat sources past cylindrical shell, deriving surface pressure
18 p3089 A69-35460
- Electrostatic probes in nonequilibrium collision dominated ionized gas flow ballistic ranges
19 p3291 A69-35716
- Ferroelectric transducer for heat transfer rates and flow measurement in gaseous systems with autostabilized temperature, noting film coefficient
19 p3307 A69-35749
- Electrohydrodynamic subsonic flow of isothermal charged gas over wavy insulator wall by perturbation method, calculating surface pressure, streamlines and electric lines of force
19 p3297 A69-35837
- Plasma density and potential distributions along circular cylinder surface in weakly ionized high speed low pressure gas flow, noting boundary layer separation point
19 p3380 A69-35839
- Nonuniform gas flow past axisymmetric body from supersonic source simulating jet discharging into vacuum, using power series of stream function
19 p3238 A69-35851
- High velocity interstellar gas in H I and H II regions, emphasizing observations of neutral atomic hydrogen in and far from galactic plane
19 p3402 A69-35962
- Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc
19 p3437 A69-36201
- Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations
19 p3450 A69-36356
- Hypervelocity ionized gas flow analysis, allowing for finiteness of energy exchange duration between electrons and ions
19 p3379 A69-36383
- Gas motion behind cylindrical shock wave created by piston motion in gravitating medium
19 p3298 A69-36386
- Turbulent wake and ambient flow interaction analysis based on integral methods in boundary layer theory
19 p3299 A69-36390
- Pressure gradient produced steady plane flow of Maxwellian gas between infinite parallel planes, describing linearized Boltzmann equation solution
19 p3379 A69-36604
- Linearized theory of subsonic gas flow past profile compared with methods based on approximations of relationship between density and pressure
19 p3241 A69-36782
- Statistical equations for compressible gas, discussing turbulent quantities separated into fluctuating and macroscopic parts
19 p3300 A69-36784
- Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc
20 p3513 A69-36982
- Hypersonic gas flow past blunt bodies valid for any optical thickness of gas, allowing for absorption coefficients dependence on temperature, pressure and frequency
20 p3457 A69-36993
- Earth ionosphere and magnetosphere electrodynamic state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities
20 p3519 A69-37026
- Nonequilibrium laminar heat transfer in viscous flow of chemically unstable gases past blunt body and plate
20 p3513 A69-37087
- Unsteady heat transfer between gas flow and solid surface during melting
20 p3631 A69-37088
- Laminar flow of compressible viscous gas in channels of variable cross section
20 p3457 A69-37089
- Turbulent boundary layer problem of gas mixture motion solved by approximate methods
20 p3513 A69-37090
- Turbulent boundary layer gas mixture flow incident to porous plate surface
20 p3513 A69-37093
- Free jet boundary layer in mixing zone of hypersonic gas flow past body
20 p3513 A69-37094
- Heat protection efficiency of plane surface in turbulent boundary layer behind tangential slots, comparing cooling effects of insulating gas films
20 p3631 A69-37095
- Electromagnetic effects on pressure, temperature and particle velocity in flow behind propagating gaseous detonation waves based on one dimensional flow field model
20 p3514 A69-37190
- He and Ar arc-heated flows into reservoir and expansion in converging-diverging supersonic nozzles, considering flow equilibrium effect on heat transfer and enthalpy
20 p3631 A69-37198
- Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
20 p3514 A69-37208
- Hydrodynamics of turbulent gas flow through powder layer for vapor phase coating of particles, noting fluidized bed
20 p3548 A69-37363
- Magnetic field and radial gas motion in sunspots from Crimean magnetograph observations at different depths of solar atmosphere
20 p3615 A69-38299
- Heat transfer and hydrodynamic resistance for turbulent gas flow in longitudinal positive and negative pressure gradients analyzed using Reynolds number data
21 p3848 A69-38635
- Sedov canonic equations for supersonic gas flow solved by applying Chaplygin function to determination of Riemann function for potential and stream function equations
21 p3643 A69-38637
- Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion
21 p3693 A69-38692
- Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system
21 p3849 A69-38846
- Gas flow characteristics in shrouded and unshrouded turbine wheel assemblies, emphasizing radial flow role in efficiency
21 p3785 A69-38865
- Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method
21 p3695 A69-38961
- Equations governing steady diabatic gas flows in Crocco velocity vector field, discussing changes in total pressure
21 p3695 A69-39007
- Simultaneous passage of two unmixed gas flows through joint two circuit turbojet nozzle into ambient medium
21 p3785 A69-39094
- Jet deflection in drifting subsonic gas flow
21 p3644 A69-39096
- Turbulent gas jet mixing in chamber with four inlet nozzles
21 p3785 A69-39102

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

22 p3929 A69-40117

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation

[AIAA PAPER 69-1033] 22 p3924 A69-40401

Kinetic beam instability development in homogeneous dust /gas/ cylinder rotating in hot invariable medium under arbitrary perturbations

22 p4032 A69-41017

Radiative energy transport in moving gaseous media in local thermodynamic equilibrium, assuming spectral line shifts by temperature and pressure variations

22 p3982 A69-41018

Adiabatic plane ideal gas flow past airfoil, studying shock waves propagation effect on dynamic behavior

22 p3861 A69-41024

Polytropic gas unsteady motion in dihedral piston wake by solving mixed boundary value and Goursat problems

22 p3861 A69-41025

Pt wire detector for flow regulation of atomic hydrogen beam, noting hydrogen maser application

22 p3950 A69-41232

Nitrogen-carbon dioxide-helium lasers CW operation at various pressures and N flow rates

23 p4173 A69-41496

Transonic flows behind separated shock waves of ideal gases past bodies of various geometries

23 p4151 A69-41526

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack

23 p4058 A69-41579

Compressible gas flow into cavity of various volumes in presence of supercritical pressure gradients

24 p4298 A69-42587

Hot gas flow through multilayer cylindrical shells, calculating temperature fields in walls

24 p4407 A69-42588

Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically

24 p4244 A69-42716

Air bubbles rise velocity and path in water based on time measurement of bubble traversing two light beams, describing electronic recording system

24 p4299 A69-42918

Supersonic rarefied gas flow past circular cylinder, studying flow and shock parameters by multiple wave interferometry

24 p4244 A69-43070

DC argon plasma generator operation, studying effects of gas flow direction and rate

24 p4255 A69-43077

Iterative finite difference method for initial value problems applied to hyperbolic system representing one dimensional time dependent flow of compressible polytropic gas

24 p4340 A69-43226

Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow

[AIAA PAPER 69-117] 24 p4301 A69-43259

Turbulence and laminarity effect on vertical waves development rising in thin layer of heavy viscous fluid in contact with vertical gas flow

24 p4302 A69-43480

Velocity and pressure fields produced by deformable load carrying filament studied for unsteady gas motion past slender body with nonpotential external forces

24 p4246 A69-43483

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient

24 p4246 A69-43485

Intense heat exchange narrow zones on blunted semicone surfaces in hypersonic gas flows ascribed to large Reynolds numbers

24 p4246 A69-43494

Numerical program solving partial differential equations parabolic system for internal turbulent gas flow extended to flows undergoing circular tube laminarization by heating

[ASME PAPER 69-HT-52] 24 p4409 A69-43520

Eddy diffusivity hypothesis modified to fit observed heat transfer from smooth pipe wall to turbulent gas stream at low Reynolds numbers

[ASME PAPER 69-HT-H] 24 p4303 A69-43523

Heat transfer and fluid friction of hydrogen and helium gas flows undergoing turbulent to laminar flow transition in heated pipe

[ASME PAPER 69-HT-54] 24 p4303 A69-43539

Gas phase self induced pressure field and laminar velocity distribution of working fluid within closed heat pipe channels analyzed by momentum integral method

[ASME PAPER 69-HT-22] 24 p4412 A69-43546

Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel

24 p4248 A69-43588

Shear stress and free molecular drag for gas flow along concave cylindrical surface oriented at angle of attack, analyzing multiple surface collisions effect

24 p4249 A69-43660

High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions

24 p4305 A69-43664

GAS-GAS INTERACTIONS

Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection

01 p0005 A69-10357

Jet perpendicular penetration prediction from holes or tubes, discussing resultant gas stream mixing and temperature profiles

[ASME PAPER 68-WA/GT-8] 05 p0750 A69-16143

Circular turbulent air jet from flat plate into deflecting stream analyzed with potential flow model, noting applicability to V-STOL aircraft technology

[AIAA PAPER 69-223] 07 p1051 A69-19557

Polarization of Lyman alpha radiation in hydrogen rare gas collisions calculated in Born and distortion approximations including rotational coupling

08 p1355 A69-20207

High temperature gas mixture plasmas thermodynamical properties, emphasizing Debye electrostatic interactions and electron states

10 p1810 A69-23794

Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization

11 p1940 A69-24477

Chemical mechanism of two stage spontaneous ignition controlled by cool flames of alkane-air mixtures under engine conditions to avoid knocking

11 p1998 A69-24479

Explosive reactions between hydrogen and oxygen flashed in presence of nitrogen dioxide, chlorine or bromine as sensitizers, considering thermal contribution

11 p1832 A69-24878

Combustion chemical reactions kinetics of gaseous phase systems, discussing temperature, reaction rates extrapolation, hydrogen and hydrocarbons

11 p2000 A69-25185

Gas-gas interactions second virial coefficients measured at various temperatures, comparing experimental data with results calculated by Kihara potential

14 p2488 A69-29927

Perturbed molecular distribution in translational and internal degrees of freedom in dilute chemically reacting gases with low ion concentrations

14 p2410 A69-29988

Interaction between two phase dynamical and combustion parameters in one dimensional gas-gas-metal combustion system

[AIAA PAPER 69-540] 16 p2880 A69-32742

Rate coefficients for chemiluminescent reactions of excited He with N, O, carbon monoxide and dioxide determined from spatial dependence of visible emission

20 p3483 A69-36936

Plasma-dynamic forces used to suppress fuel-propellant interface turbulence in coaxial jet gas core reactors

24 p4349 A69-43679

GAS GENERATOR ENGINES

U ENGINES

GAS GENERATORS

Gas bearings for spool gas generator for aircraft turbine engines, noting rotor bearing stability and LP spool balancing and seal leakage

[ASME PAPER 69-GT-60] 09 p1513 A69-22515

Solid state ozone generator for preparing ozone in known concentrations to 1000 ppm in air for laboratory studies

10 p1693 A69-23346

Dense real gas thermodynamic relations in piston driven shock tube facilities operation

11 p1862 A69-25011

Piston driven facilities for hot high pressure gas production including gas tunnels, heavy piston facilities, piston driven shock tunnels and high speed guns

11 p1862 A69-25012

Thrust vector control by secondary gas injection for predicting lateral thrust performance, applying method to rocket engines, secondary gas generator and injector configuration

17 p3019 A69-33333

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor

17 p3020 A69-33344

High temperature combustion chamber as high velocity gas generator, noting application to MHD power generator research

18 p3184 A69-34931

Pressure drop in control element of gas generator during readjustment of throttle in hydraulic supply line, noting assumptions

19 p3393 A69-35819

Propulsion performance of XB-70A aircraft calculated by gas generator method

[AIAA PAPER 68-594] 20 p3461 A69-37152

Pyrotechnical gas generator performance tests during Europa 1 rocket second and third stage separation, including generator design, ground and flight tests

23 p4224 A69-42153

GAS GUNS

U LIGHT GAS GUNS

GAS HEATING

DC plasmatron for heating argon with potassium additions at high temperatures and at near atmospheric pressure to obtain argon flow

09 p1547 A69-21596

Enthalpy distribution in plasma tube arc heater inlet flow region with hot and cold gas core boundary in presence of electric field

09 p1553 A69-22538

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation

10 p1760 A69-23136

Interstellar gas model based on calculations of heating by low energy cosmic rays, noting gravitational compression to form clouds

10 p1770 A69-24095

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources

11 p1945 A69-24380

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

12 p2061 A69-25880

Ionosphere temperature profiles, discussing heating and cooling of electron gas and ion gases and thermal balance

12 p2063 A69-25903

Shock heated gas radiation frequency dependence and UB and B-V color indices determination, studying role in close binary systems luminescence

13 p2350 A69-27860

Plane and cylindrical thermionic converters, considering electricity generation by heating through flame, solar radiation and nuclear flux

14 p2419 A69-29178

Reacting gas ignition by sudden contact with heated noncatalytic surface, deriving heating time and transferred heat amount by Blasius perturbation method

16 p2878 A69-31955

Interstellar H I regions and clouds heating and ionization by low energy cosmic rays from quantitative models, noting pressure equilibrium role

17 p3038 A69-33726

Gas heat transfer on turbine interblade channel surfaces and working blade end surfaces at operating Reynolds and Mach numbers

21 p3849 A69-38858

Unsteady aerodynamic heating at stagnation region including surface combustion in arc heated high enthalpy wind tunnel

22 p3860 A69-40597

Arc heating of shock tube driver gas, describing radiative energy transfer mechanism

23 p4147 A69-41895

Transition from turbulent to laminar regime as consequence of high heating rates for internal convective flow, noting roles of Nusselt numbers and friction factors

[ASME PAPER 69-HT-9] 24 p4304 A69-43559

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources

24 p4375 A69-43770

GAS INJECTION

Atmospheric diffusion measurement based on analysis of thoron emitted continuously from point source, permitting study of diffusion in atmospheric boundary layer

01 p0144 A69-10043

Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection

01 p0005 A69-10357

Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium

01 p0176 A69-10385

Dynamics of moving gas bubble injected in quiescent liquid, considering velocity, heat flow and mass transfer [ASME PAPER 67-WA/HT-30]

02 p0351 A69-12201

Determining influence of blowing various gases into boundary layer on friction and heat and mass transfer when external flow velocity varies according to power law

02 p0234 A69-12581

Film cooling by subsonic gas injection of air through porous flat plate into 2.9 Mach air flow, noting wall temperatures

03 p0413 A69-12994

Hypersonic boundary layer on flat plate with strong hypersonic viscous interaction and uniform surface blowing distribution

04 p0588 A69-14722

Inert gas discontinuous injection into nonequilibrium laminar boundary layer

06 p0860 A69-17635

Transverse secondary gaseous injection penetration into confined supersonic flow [AIAA PAPER 69-2]

06 p0913 A69-18080

Axisymmetric hypersonic near wake with base injection, discussing zero injection case, jet-plume interaction and mixing region [AIAA PAPER 69-66]

06 p0914 A69-18115

Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection [AIAA PAPER 69-162]

06 p0864 A69-18138

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary injection into supersonic stream [AIAA PAPER 69-1]

06 p1039 A69-18196

Direction changing of large solid propellant motors by changing jets angle or gas injection

07 p1230 A69-19291

Ion-molecule reactions constants studied directly in ionosphere, using air injection from geophysical probe and airborne RF mass spectrometer

08 p1311 A69-21159

Global characteristics and similarity of ventilated cavity flows by injecting air behind immersed profiles of symmetrical wedge at zero incidence

10 p1680 A69-23788

Velocity distributions and skin friction coefficients in turbulent boundary layers over flat plate with injection or suction through porous wall

11 p1871 A69-25027

Porous cermet electrodes thermochemical protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics

11 p1826 A69-25232

Initial nonuniformity effect of temperature distribution in main stream on efficiency of cooling by air injection through slit or porous collar

11 p2002 A69-25338

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies

11 p1967 A69-25498

Displaced layer thickness dependence on air injection parameters measured in wind tunnel

13 p2245 A69-27385

Mass transfer cooling data correlation for estimating mass injection effect on slender cone drag

13 p2199 A69-28224

Turbulent viscoseals gas ingestion and fluid inertia analysis using stability of dynamic gas-liquid interface between rotating cylinders [ASLE FICFS PREPRINT 31]

15 p2621 A69-30496

Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet

15 p2592 A69-30986

Finite difference method for turbulent mixing and combustion of hydrogen injected parallel to supersonic air stream, considering vitiated and unvitiated air [AIAA PAPER 69-539]

16 p2877 A69-31844

Flow disturbances in supersonic rocket nozzles due to secondary injection analyzed by effective body approximation, including side forces [AIAA PAPER 69-443]

16 p2839 A69-32666

Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data [AIAA PAPER 69-473]

16 p2844 A69-32726

Thrust vector control by secondary gas injection for predicting lateral thrust performance, applying method to rocket engines, secondary gas generator and injector configuration

17 p3019 A69-33333

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases [AIAA PAPER 69-716]

17 p2891 A69-33463

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection [AIAA PAPER 67-706]

17 p2955 A69-33476

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis

20 p3457 A69-37065

Turbulent boundary layer of injection gas flow calculated past surfaces with pressure gradient

20 p3513 A69-37091

Rice-Ramsperger-Kassel kinetic theory applied to sulfur hexafluoride injection into boundary layer of high speed reentry vehicle

20 p3514 A69-37226

Law of wall parameters for compressible turbulent boundary layer with air injection through wall determined by analyzing data for hypersonic speeds

21 p3692 A69-38685

Gaseous injection effect on laminar boundary layer hypersonic flow around transpiration-cooled blunt bodies analyzed by integral method and Newtonian model

21 p3644 A69-39014

Gas concentration measurement during injection into laminar boundary layer streaming along porous plate, using quadrupole resonance mass spectrometer

23 p4058 A69-41695

Supersonic free stream flow past finite conical body with subsonic surface gas injection

23 p4059 A69-41884

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient

24 p4246 A69-43485

Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas

24 p4249 A69-43663

GAS-ION INTERACTIONS

Low density limit to three body ionic recombination coefficients in various gases

04 p0632 A69-14679

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate

06 p0919 A69-17724

Gas segregation in positive column of DC discharge due to axial ion motion analyzed using conservation equation

08 p1361 A69-20145

Diffusion coefficient, velocity distribution function and velocity averages for gaseous ions moving in strong electric fields, considering ion-gas molecule charge transfer collisions

08 p1355 A69-20209

Nonthermal intergalactic bremsstrahlung model as isotropic X ray background due to submicron electron interactions with thermal ionized gas in expanding universe

11 p1947 A69-24595

Ion-molecule reaction kinetics in nitrogen-hydrogen mixtures using ion cyclotron resonance

12 p2131 A69-25985

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions

15 p2655 A69-30963

Ion-molecular reactions measurements in ionosphere by VV type device and RF mass spectrometer

15 p2603 A69-31407

Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation

16 p2822 A69-32108

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P

16 p2747 A69-32312

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced

19 p3375 A69-35985

Shock ionization by ion impact against triatomic H molecules gas target, showing positive ion production dependence on extraction voltage, collision chamber pressure, etc

19 p3378 A69-36188

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method

20 p3578 A69-36934

Ion-molecule reaction rate constants measurement by ion cyclotron resonance, assuming no ion and neutral gas molecules collisions

20 p3579 A69-37495

Atmospheric small gaseous ions nature and properties, discussing solid elastic and composite interaction, complex, cluster, intermediate and Langevin ions, etc

22 p3940 A69-40538

GAS IONIZATION

NT ATMOSPHERIC IONIZATION

NT AURORAL IONIZATION

NT FLAME IONIZATION

Sparks from laser induced air breakdown due to focusing of laser beam, noting evidence for initiation by self focusing

01 p0092 A69-11246

Deuterium gas ionization over high pressure range under action of short pulse Q switched neodymium glass laser, noting breakdown wave existence

02 p0255 A69-11545

Carbon dioxide ionization by Q switched laser beam, using proportional counter

02 p0255 A69-11702

Preionization of gases by laser beam using theory based on molecular equilibrium concentration and collision excitation

02 p0283 A69-11703

Deuterium plasma evolution and creation modes obtained by short pulse laser discharge in gases, discussing detonation and phase wave ionization mechanisms

02 p0288 A69-12040

Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates

03 p0414 A69-13138

Empirical growth curve determined by using equivalent widths of absorption lines of quasar 3C 191, concluding ionization is mainly due to collisional processes

03 p0514 A69-13962

Solar wind abundance measurements at earth orbit related to solar corona

03 p0503 A69-14047

Collapsing cylindrical ionizing shock in axial magnetic field, solving governing equations numerically

04 p0637 A69-15049

Drift and diffusion of electron pulse advancing through gas, providing physical basis for Townsend ionization coefficient

04 p0633 A69-15443

Electron cyclotron instability and HF ionization in beam-plasma experiment using electron beam guided by magnetic field through He gas

05 p0798 A69-15612

Three energy dependent quantities examined for gases, describing relation between ionization yields, cross section and loss functions

05 p0795 A69-15660

Noble gas atom simultaneous ionization and excitation by removal of metastable electron in fast collision

06 p0961 A69-17137

Ionizing electron collisions with He, determining energies and angular correlation distributions of scattered and ejected electrons

06 p0962 A69-17191

Early phase of Stromgren sphere development in interstellar molecular hydrogen cloud, analyzing R-type dissociation-ionization fronts using quasi-steady flow

07 p1218 A69-19281

Dissociation-ionization fronts in interstellar molecular hydrogen clouds, analyzing effects of UV radiation from early stars

07 p1221 A69-19584

Plasma waveguide parameter changes due to additional gas ionization from microwave field

07 p1196 A69-19750

- HF breakdown of air using Boltzmann equation to determine net ionization frequency relation with electric field strength 08 p1357 A69-20810
- Fuel cell oxygen ionization on nickel, silver and nickel-silver disk electrodes 08 p1260 A69-21045
- Electron multiplication during ionized H plasma exposure to annular electric field and magnetic field, including microwave diagnostics 09 p1543 A69-21299
- Proportional counter pulse shapes calculation for point and extended ionization tracks, considering electron drift velocity and positive ion mobility 09 p1493 A69-21419
- Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse 09 p1490 A69-21772
- Ionic species identification in argon-cesium discharges for thermionic converter design 09 p1440 A69-21830
- Ionization and current growth in discharge in rotating plasma device with mirror shaped magnetic field 09 p1552 A69-22042
- Switch-on ionizing shock waves structure, analyzing condition of downstream state and effect on hydromagnetic wave speed 09 p1552 A69-22045
- D type dissociation ionization front structure and associated shock fronts using quasi-steady flow approximation for Stromgren sphere development in interstellar molecular hydrogen cloud 10 p1772 A69-22858
- Primary specific ionization in noble gases by charged particles 10 p1726 A69-23128
- Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals 10 p1731 A69-23437
- Electrical conductivity, electron energy balance, ionization equilibrium time and channel parameters in pulse discharge nonequilibrium Cs plasma containing inert gas addition 10 p1731 A69-23439
- Ionization front propagation rate in crossed electric and magnetic fields in Ar-Cs, Hg-Cs and Ne-Xe discharge plasmas 10 p1733 A69-23447
- Argas test loop as model for MHD power plant study, discussing component testing including channel preionization and relaxation experiments 10 p1673 A69-23478
- Engineering and reactor parameters associated with ionization of gas passing through nuclear reactor used as closed cycle MHD system working fluid 10 p1723 A69-23485
- Ionization and recombination processes in He 3 plasmas produced by neutron irradiation of H 3 10 p1738 A69-23488
- Pulse and CW breakdown criteria for plasmas subject to spatially nonuniform electric fields, using variational formulation 10 p1739 A69-23650
- Relaxation phenomena in ionization process in argon shock front structure, using EM and pressure driven shock tube to drive high speed shock waves 10 p1726 A69-23685
- Ionization-recombination thermodynamic equilibrium upset causing spectral excitation in He arc plasma 10 p1742 A69-24077
- Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 11 p1945 A69-24380
- Simultaneous photoexcitation and photoionization of He near threshold at 186 Å, measuring probability 11 p1921 A69-24926
- Radiation studies of pressure driven shock tubes with atomic ionization at high temperatures, discussing thermal light sources, autoionization, etc 11 p1863 A69-25014
- Chain mechanism of arc discharge development in crossed electric and magnetic fields explained by direct ionization of neutral particles by ions 11 p1932 A69-25540
- Gas velocity variation in ionizing shock waves arbitrarily oriented with respect to magnetic field, considering magnetic viscosity and conductive piston 11 p1935 A69-25740
- Gas ionization by UV radiation emitted by pellet, target or portion of gas in laser beam focus, using polished metallic mirrors 11 p1901 A69-25754
- Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence 12 p2061 A69-25880
- Charged state variations during protons and inert gas atoms interactions analyzed by coincidence method 12 p2133 A69-26543
- Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization 12 p2141 A69-27146
- Ionization and attachment of thermal electrons in oxygen and airlike nitrogen-oxygen mixtures during electron irradiation 13 p2302 A69-27456
- Negative charge production by H atoms collisions with rare gases and hydrogen, noting smooth rise of cross section with energy for rare gases 13 p2302 A69-27459
- Ionization processes in Seyfert galaxies, considering thermal electrons, superthermal protons and electrons and nonthermal UV radiation 13 p2346 A69-27710
- Ionization fraction as independent variable in plasma transport correlation, noting role in pressure effect increase 13 p2313 A69-28241
- Neutral gas ionization in lower ionosphere, discussing physicochemical reactions, recombination coefficients, equilibrium processes, etc 13 p2255 A69-28540
- Radiative and collisional ionization of H and He in planetary nebulae, discussing dielectronic recombination at high electron temperatures 14 p2518 A69-29133
- Auxiliary discharge thermionic converter with Penning mixture /Ne-Ar/, discussing pressure and Penning ionization effects, collector current discontinuities, etc 14 p2398 A69-29180
- Rasor phenomenological theory of space ionization in arc mode regime of Cs thermionic converter 14 p2402 A69-29242
- Ionization mechanisms in ignited mode cesium thermionic converter, discussing positive ions production for electron space charge neutralization and ion density calculations 14 p2404 A69-29258
- Lenses spherical aberration role in studying laser induced breakdown of gases, considering intense ionization collinear regions multiplicity along optic axis 15 p2634 A69-30878
- Electron ion recombination role in atomic collision process in rare gases ionization path, considering scintillation mechanism 15 p2655 A69-30961
- Initial ionization processes in strong shock wave in hydrogen, determining ionization relaxation length and cross section of atom-atom excitation collisions 16 p2815 A69-31590
- Microwave induced ionization wave propagation in rare gases, noting rapid electron density increase at wave front and subsequent slow plasma decay 16 p2818 A69-31671
- Steady state density profile dependence on electron density dependence of net volume ionization rate by analyzing ambipolar diffusion in RF excited magnetized plasmas 16 p2818 A69-31672
- Stripping and low-energy collisions of H atoms on O and N molecules, showing target ionization to projectile stripping ratio dependence on ionization potential 16 p2814 A69-31773
- Low temperature method for measuring breakdown threshold parameters of liquid and gaseous He by laser beam, observing stimulated Mandelstam-Brillouin scattering 16 p2796 A69-31799
- Monograph on ionization of Ar-CH mixtures during Townsend discharge, covering metastable Ar atoms lifetime in various pressure ranges 16 p2814 A69-31841
- Correlation coefficient of light fluctuations measured in Ar plasma in positive column of glow discharge, noting ionization wave appearance at critical gas pressure 16 p2822 A69-32039
- Laboratory plasma produced by electromagnetically generated shock front propagation through unionized hydrogen [AIAA PAPER 69-693] 17 p2945 A69-33447
- Interstellar H I regions and clouds heating and ionization by low energy cosmic rays from quantitative models, noting pressure equilibrium role 17 p3038 A69-33726
- Optically thin gas surrounding X ray source, plotting electron temperature and ionization equilibrium of hydrogen, He, carbon, nitrogen, oxygen and neon 18 p3186 A69-34295
- Gas ionization relaxation times from ion density profiles in shock tubes at low Mach numbers, discussing influence of impurities on ionization process 18 p3116 A69-34451
- Normal and transverse ionizing shock, discussing Alfvénic regime for normal shocks and shunting effect in transverse shocks 18 p3180 A69-34454
- Shock wave studies of gaseous NO thermal ionization in Kr as function of temperature, using time-of-flight mass spectrometer 18 p3099 A69-34464
- Ionization effects in hydrodynamic model of radiation driven breakdown wave propagation, obtaining wave velocity and absorbed laser flux density relationship 18 p3174 A69-35286
- Charge exchange cross sections and electron losses in hydrogen ion beam impacting on water vapor molecules 19 p3378 A69-36190
- Gas ionizing shock waves structure in arbitrary magnetic field, considering greater magnetic viscosity than dissipative coefficients 19 p3381 A69-36773
- Vacuum UV flux along T type shock tube axis and measurements of He I line precursor emission, indicating ionizing radiation contributions to precursor ionization and excitation 20 p3511 A69-38239
- Normal ionizing shock waves in H, analyzing shock velocities as function of drive magnetic field using Chapman-Jouguet hypothesis 21 p3691 A69-38332
- Laser induced multiphoton ionization and cascade breakdown in high pressure gases, considering roles of refractive index, laser nonideal output and beam self focusing 21 p3738 A69-39445
- Radiation emission and ionization in precursor and nonequilibrium region behind shock wave during approach to equilibrium in argon-like gas 22 p4006 A69-40526
- Collision processes in gaseous nitrogen leading to production of positive triatomic, diatomic and monatomic nitrogen ions 22 p3986 A69-40722
- Electron beam injection into magnetic trap, obtaining plasma by ionization of supersonic argon flow passing through system 22 p3990 A69-40791
- Ionizing shock wave propagation and reflection in transverse magnetic field based on MHD theory, assuming gas thermal equilibrium 22 p3992 A69-41176
- Atoms and ions collision strengths and photoionization cross sections for nitrogen, oxygen and neon fitted to interpolation formulas for temperature and frequency effects 22 p3988 A69-41244
- Xenon laser CW operation on unclassified spectral lines of high ionization states, using laser induced spectroscopy 23 p4172 A69-41399
- Ionization equilibrium and radiative cooling of high temperature low density plasma, noting cosmic gas cooling curve of line emission from oxygen ion transitions 24 p4376 A69-42661
- Moving striations dispersion and stability theory applied to ionization waves excited in Ar, Ne and Hg-Ar mixture low and medium pressure discharge 24 p4356 A69-43363
- Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations 24 p4353 A69-43700
- Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 24 p4375 A69-43770

GAS JETS

Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection

01 p0005 A69-10357

Supersonic gas jet impingement on inclined plane barrier, calculating parameters by approximation

03 p0413 A69-12958

Axial deviation of gas flow resulting from mixing turbulent gas jets

04 p0591 A69-15411

Gas mixture separation in supersonic jet, noting results for hydrogen-nitrogen mixture and diffusion flux

06 p0911 A69-17553

Mixing and combustion of gaseous and particle laden jets in air stream, analyzing turbulent, coaxial and jet mixing flows

[AIAA PAPER 69-33]

06 p1038 A69-18146

Soviet collection of papers on turbulent jets of air, plasma and real gas

07 p1049 A69-18392

Axisymmetric liquid nitrogen turbulent jet propagating under supercritical pressure in gaseous nitrogen medium

07 p1049 A69-18398

Stream function for plane free sonic gas jet flowing past profile

07 p1050 A69-18740

Pyrotechnic circuit closer using jet to achieve conduction between hollow charge lining and coaxial electrode

10 p1635 A69-23031

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics of fluid jet amplifiers

12 p2016 A69-25879

Halley comet abrupt daily motion variation ascribed to solid particles ejection from ice nucleus stimulated by gas outflow

14 p2524 A69-29712

Numerical analysis for spreading of free turbulent gas jets with arbitrary uneven initial distribution of momentum and heat and mass fluxes

15 p2590 A69-30157

Sound effects on turbulent flame in gasoline-air mixture jet in Toepfer device with pulsed light source, measuring ionization in combustion zone

17 p3069 A69-33141

Jet and Mach disk density measured by fluorescence electron beam technique, calculating Mach disk thickness from density profiles

19 p3239 A69-36396

Hydrogen jet structure ejected into vacuum from Laval nozzle at supersonic velocity, considering separation point from diffuser wall

19 p3240 A69-36601

Polytetrafluoroethylene ablation in high temperature argon, nitrogen, air and oxygen jets, discussing electric heater and heat flux measurement

20 p3632 A69-37522

Pulsed performance of saturated steam reaction jet, comparing steam performance to nine gases for equal temperatures and thrust levels

21 p3785 A69-39021

Dynamics of relay gas jet preliminary vibration damping system of gravity gradient stabilized satellite, allowing for sensor limitations and stabilizer flexural vibrations

21 p3826 A69-39638

Coaxial turbulent compressible gas jets propagation, discussing mass buildup data in coaxial jets

21 p3645 A69-39847

Underexpanded plane hypersonic gas jet injection into resting medium from straight nozzle, discussing shock wave formation

24 p4246 A69-43484

GAS LASERS

NT ARGON LASERS

NT CARBON DIOXIDE LASERS

Gas laser amplifier nonlinear behavior in axial magnetic fields and operating with two polarized light signals of strong or weak intensities

01 p0088 A69-10010

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system

01 p0088 A69-10028

Saturation peak half widths on Ne energy level population inside single frequency Michelson-type He-Ne laser by tuned differential spectrometry, observing power broadening

01 p0089 A69-10182

Carbon dioxide laser stabilization using laser profile and three mirror system

01 p0089 A69-10183

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

01 p0090 A69-10787

Continuous nonresonant visible radiation from Ar ion laser by utilization of wide bore, wall stabilized gas discharges, noting long time frequency stability

01 p0091 A69-10815

Drilling and welding with sealed-off continuous carbon dioxide gas laser with outgoing beam collimated by Ge lens

01 p0086 A69-10821

Pulsed nitrogen laser design involving gas discharge tube fed by low impedance parallel plate transmission line

01 p0091 A69-10842

Carbon dioxide spectral line broadening and self broadening coefficients, using carbon dioxide laser radiant energy

01 p0091 A69-10844

Elastic and inelastic collisions between deformable bodies, using Michelson interferometer with He-Ne laser as source

02 p0282 A69-12607

Evaporation rate measurements in fog during carbon dioxide laser radiation, obtaining correlation to describe visibility improvement

02 p0258 A69-12622

Laser oscillation frequency shift dependence on discharge current in 6328 A He-Ne laser

02 p0260 A69-12658

Transverse magnetic field influence on power and polarization of helium-neon laser emission

02 p0260 A69-12844

Carbon dioxide laser for observing nonlinear effects related to electron interaction with lattice vibration within semiconductors

03 p0437 A69-13041

Saturation effect theory in gas system, taking into account Doppler expansion and collisions based on density matrix

03 p0437 A69-13042

Single oscillation mode gas laser theory, calculating nonlinear susceptibility, gain profile, power tuning characteristics and oscillation frequency with Bloch equations

03 p0440 A69-13296

Raman effect in liquid glycerol obtained with 4880 A ionized argon laser, determining valence vibrational frequencies

03 p0440 A69-13366

Tradeoffs among beam divergence, power output and mirror alignment tolerances of high power argon ion lasers operating in various low order transverse modes

03 p0440 A69-13549

Technique to obtain desirable longitudinal oscillation mode for radiation of Ne-He laser

03 p0441 A69-13844

Temperature dependence of He-Ne laser output at various wavelengths over low temperature range

03 p0441 A69-13845

Optimum proportions of gas mixture components in He-Ne laser related to field distribution in cavity

03 p0441 A69-13847

Arc and HF discharges in Ne-He lasers, comparing output power, spectral line intensities and reduced electric field vs reduced tube radius plots

03 p0441 A69-14139

Simultaneous phase locking of longitudinal and transverse laser modes in He-Ne laser

03 p0441 A69-14188

Absorption coefficients of plasmas in capillary discharge tubes, discussing measurement using gas laser light source

03 p0442 A69-14218

Superradiant and laser spectroscopy in second positive system of molecular nitrogen

04 p0609 A69-14285

High power output from submillimeter continuous wave gas laser

04 p0609 A69-14289

Chirp pulse generation by carbon dioxide laser, discussing carrier frequency sweep

04 p0609 A69-14333

Microwave excited argon discharge emission spectrum analysis, suggesting possible laser action in microwave discharges

04 p0609 A69-14346

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

04 p0610 A69-14382

Interatomic collisions effect on multimode He-Ne lasers output power and spectral composition

04 p0610 A69-14383
